By an act of 13 William III., ch. v, in 1701, the Winchester bushel had been declared the standard for the measure of grain; and any cylindrical vessel of $18\frac{1}{2}$ inches diameter and 8 inches deep was made a legal bushel. By a subsequent statute of 12 Anne, ch. xvii, sec. 11, the bushel for measuring coal was to be of $19\frac{1}{2}$ inches diameter from outside to outside, and was to contain a quart of water more than the Winchester bushel, which made it of 2217.62 cubical inches.

There are several late acts of Parliament (1805, 45 George III.) which mention $272\frac{1}{4}$ cubic inches as the contents of the Winchester gallon, making a bushel of 2,178 inches; and others which recognise the existence of measures different from any of the legal standards of the exchequer. By an act of 31 George III., ch. iii, inspectors of corn returns are to make a comparison between the Winchester bushel and the measure commonly used in the city or town of their inspection, and to cause a statement in writing of such comparison to be hung up in some conspicuous place.

By these successive statutes, determining in cubic inches the capacity of the vessels by which certain specific articles shall be measured, the measures bearing the same denomination, but of different contents, are multiplied; and every remnant of the original uniformity of proportion has disappeared, with the exception of that between the wine and ale gallons, and that between the troy and avoirdupois weights.

By the English system of weights and measures, before the statute of 1496, the London quarter of a ton was the one measure to which the bushel for corn, the gallon, deduced by measure, for ale, and the gallon, deduced by weight, for wine, were all referred. The hogshead was a vessel deduced from the cubing of linear measure, containing sixty-three gallons, and measuring eight cubic feet; the gallon thus formed contained 219.43 cubic inches. This wine gallon, by another law, was to contain eight twelve-ounce pounds of wheat. One such pound of wheat, therefore, occupied 27.45 cubic inches. The vessel of eight times 27.45 cubic inches filled with wine, the liquor would weigh 54857.1 grains of troy weight; and the weight of eight such gallons of wine would be 438856.8 grains troy. The specific gravity of wine being to that of wheat as 175 to 143, the bushel thus formed would be of 2148.5 cubic inches, and its eighth part or ale gallon would be 268.5 inches. This is only two inches more than the standard Winchester bushel of the exchequer was found to contain, and two inches less than the bushel as prescribed

by the act of 13 William III.—a difference which a variation in the temperature of the atmosphere is of itself adequate to produce. It proves that the Winchester bushel has not without reason been preserved as the favorite of all standards, in spite of all the changes, errors, and inconsistencies of legislation. But it also proves that the ale and corn gallon ought to have continued, as they originally were, of 268½ inches, and the wine gallon of 219½.

The troy and avoirdupois weights are in the proportions to each other of the specific gravity of wheat and of spring water. The twelve and fifteen ounce easterling pounds were intended to be proportional between the gravity of wheat and wine; but they were roughly settled proportions, estimating the weight of wheat to be to that of wine as 4 to 5, and the gravity of wine and of water to be the same. Under the statute of 1496, the wine gallon was of 224 inches. If troy weight was to be introduced, a gallon of this capacity had the great advantage upon which the proportion of uniformity had originally been established. The gallon contained exactly eight pounds avoirdupois of wine; the pint of wine was a pound of wine. The corn gallon of 272 inches, corresponding with it, had the same advantage; it was filled with eight pounds of corn; a pint of wheat was a pound of wheat; and the bushel of 2,176 inches contained 64 pounds avoirdupois of that wheat, 32 kernels of which weighed one pennyweight troy. But the hogshead, being of eight cubic feet, could have contained only 61¾ gallons, and the tun would have been of 247.

The wine and ale gallons now established by law, of 231 and 282 inches, are still in the same proportion to each other as the troy and avoirdupois weights; but neither of them is in any useful proportion to the bushel. The corn gallon only is in proportion to the bushel. Neither the wine nor the corn gallon is in any useful proportion either to the weights or the coins. But the troy and avoirdupois weights are, with all the exactness that can be desired, standards for each other; and the cubic foot of spring water weighs exactly 1,000 ounces avoirdupois, by which means the ton of thirty-two cubic feet measure is in weight exactly 2,000 pounds avoirdupois.

Such was originally the system of English weights and measures, and such is it now in its ruins. The substitution of cubic inches to settle the dimensions of the gallons and bushels, which began with the last century, was a change of the *test* of their contents from gravity to extension. They had before been measured by number, weight, and measure; they are now measured by measure alone. This change has been of little use in promoting the principle of uniformity. As it respects the natural standard, it has only been a change from the weight of a kernel of wheat to the length of a kernel of barley; and although it has specified the particular standard bushels and gallons selected among the variety which the inconsistencies of former legislation had produced, it has very unnecessarily brought in a third gallon measure, quite incompatible with the primitive system; and it has legalized two bushels of different capacity so slightly different as to afford every facility to the fraudulent substitution of the one for the other, yet, in the measurement of quantities, resulting in a difference of between three and four per cent.

No further change in this portion of English legislation has yet been made. But the philosophers and legislators of Britain have never ceased to be occupied upon weights and measures, nor to be stimulated by the passion for uniformity. In speculating upon the theory, and in making experiments upon the existing standards of their weights and measures, they seem to have considered the principle of *uniformity* as exclusively applicable to identity, and to have overlooked or disregarded the uniformity of proportion. They found a great variety of standards differing from each other; and, instead of searching for the causes of these varieties in the errors and mutability of the law, they ascribed them to the want of an immutable standard from *nature*. They felt the convenience and the facility of decimal arithmetic for *calculation;* and they thought it susceptible of equal application to the divisions and multiplications of *time*, *space*, and *matter*. They despised the primitive standards assumed from the stature and proportions of the human body. They rejected the secondary standards taken from the productions of nature most essential to the subsistence of man; the articles for ascertaining the quantities of which weights and measures were first found necessary. They tasked their ingenuity and their learning to find, in matter or in motion, some *immutable* standard of linear measure which might be assumed as the single universal standard from which all measures and all weights might be derived. In the review of the proceedings in France relative to this subject, we shall trace the progress and note the results hitherto of these opinions, which have there been embodied into a great and beautiful system. In England they have been indulged with more caution, and more regard to the preservation of existing things.

From the year 1757 to 1764, in the years 1789 and 1790, and from the year 1814 to the present time, the British Parliament have, at three successive periods, instituted inquiries into the condition of their own weights and measures, with a view to the reformation of the system, and to the introduction and establishment of greater uniformity. These inquiries have been pursued with ardor and perseverance, assisted by the skill of their most eminent artists, by the learning of their most distinguished philosophers, and by the contemporaneous admirable exertions in the same cause of uniformity of their neighboring and rival nation.

Nor have the people or the Congress of the United States been regardless of the subject since our separation from the British empire. In their first confederation, these associated States, and in their present national constitution, the people—that is, on the only two occasions upon which the collective voice of this whole Union, in its constituent character, has spoken—the power of *fixing* the standard of weights and measures throughout the United States has been committed to Congress. A report, worthy of the illustrious citizen by whom it was prepared, and embracing the principles most essential to uniformity, was presented in obedience to a call from the House of Representatives of the first Congress of the United States. The eminent person who last presided over the Union, in the parting message by which he announced his intention of retiring from public life, recalled the subject to the attention of Congress with a renewed recommendation of the principle of decimal divisions. Elaborate reports, one from a committee of the Senate in 1793, and another from a committee of the House of Representatives at a recent period, have since contributed to shed further light upon the subject; and the call of both Houses, to which this report is the tardy and yet too early answer, has manifested a solicitude for the improvement of the existing system, equally earnest and persevering with that of the British Parliament, though not marked with the bold and magnificent characters of the concurrent labors of France.

After a succession of more than sixty years of inquiries and experiments, the British Parliament have not yet acted in the form of law. After nearly forty of the same years of separate pursuit of the same object, *uniformity*, the Congress of the United States have shown the same cautious deliberation: they have yet authorized no change of the existing law. That neither country has yet changed its law is perhaps a fortunate circumstance, in reference to the principle of uniformity, for both. If this report were authorized to speak to both nations, as it is required to speak to the Legislature of one of them, on a subject in which the object of pursuit is the same for both, and the interest in it common to both, it would say, is your object *uniformity?* Then, before you change any part of your system, such as it is, compare the uniformity that you must lose with the uniformity that you may gain by the alteration. At this hour, fifteen millions of Britons, who, in the next generation may be twenty, and ten millions of Americans, who in less time will be as many, have the same legal system of weights and measures. Their mile, acre, yard, foot, and inch, their bushel of wheat, their gallon of beer, and their gallon of wine, their pound avoirdupois, and their pound troy, their cord of wood, and their ton of shipping, are the same. They are, of the nations of the earth, the two who have with each other the most of that intercourse which requires the constant use of

weights and measures. Any change whatever in the system of the one, which would not be adopted by the other, would destroy all this existing uniformity. Precious, indeed, must be that uniformity, the mere promise of which, obtained by an alteration of the law, would more than compensate for the abandonment of this.

If these ideas should be deemed too cold and cheerless for the spirit of theoretical improvement; if Congress should deem their powers competent, and their duties imperative, to establish uniformity as respects weights and measures in its most universal and comprehensive sense, another system is already made to their hands. If that universal uniformity, so desirable to human contemplation, be an obtainable perfection, it is now attainable *only* by the adoption of the new French system of metrology in all its important parts. Were it even possible to construct another system, on different principles, but embracing in equal degree all the great elements of uniformity, it would still be a system of diversity with regard to France and all the followers of her system. And as she could not be expected to abandon that which she has established at so much expense, and with so much difficulty, for another possessing, if equal, not greater advantages, there would still be two rival systems, with more desperate chances for the triumph of uniformity by the recurrence to the same standard of all mankind.

The system of modern France originated with her Revolution. It is one of those attempts to improve the condition of human kind which, should it even be destined ultimately to fail, would, in its failure, deserve little less admiration than in its success. It is founded upon the following principles:

1. That all weights and measures should be reduced to one *uniform* standard of linear measure.
2. That this standard should be an aliquot part of the circumference of the globe.
3. That the unit of linear measure, applied to matter in its three modes of extension, length, breadth, and thickness, should be the standard of all measures of length, surface, and solidity.
4. That the cubic contents of the linear measure, in distilled water, at the temperature of its greatest contraction, should furnish at once the standard weight and measure of capacity.
5. That, for every thing susceptible of being measured or weighed, there should be only one measure of length, one weight, one measure of contents, with their multiples and subdivisions exclusively in decimal proportions.
6. That the principle of decimal division, and a proportion to the linear standard, should be annexed to the coins of gold, silver, and copper, to the moneys of account, to the division of *time*, to the barometer and thermometer, to the plummet and log lines of the sea, to the geography of the earth, and the astronomy of the skies; and, finally, to every thing in human existence susceptible of comparative estimation by weight or measure.
7. That the whole system should be equally suitable to the use of all mankind.
8. That every weight and every measure should be designated by an appropriate, significant, characteristic, name, applied exclusively to itself.

This system approaches to the ideal perfection of *uniformity* applied to weights and measures; and, whether destined to succeed, or doomed to fail, will shed unfading glory upon the age in which it was conceived, and upon the nation by which its execution was attempted, and has been in part achieved. In the progress of its establishment there, it has been often brought in conflict with the laws of physical and of moral nature, with the impenetrability of matter, and with the habits, passions, prejudices, and necessities of man. It has undergone various important modifications. It must undoubtedly still submit to others, before it can look for universal adoption. But, if man upon earth be an improvable being; if that universal peace, which was the object of a Saviour's mission, which is the desire of the philosopher, the longing of the philanthropist, the trembling hope of the Christian, is a blessing to which the futurity of mortal man has a claim of more than mortal promise; if the Spirit of Evil is, before the final consummation of things, to be cast down from his dominion over men, and bound in the chains of a thousand years, the foretaste here of man's eternal felicity, then this system of common instruments to accomplish all the changes of social and friendly commerce will furnish the links of sympathy between the inhabitants of the most distant regions; the metre will surround the globe in use as well as in multiplied extension; and one language of weights and measures will be spoken from the equator to the poles.

The establishment of this system of metrology forms an era, not only in the history of weights and measures, but in that of human science. Every step of its progress is interesting; and as a statement of all the regulations in France concerning it is strictly within the scope of the requisitions of both Houses, a rapid review of its origin, progress, and present state, with due notice of the obstacles which it has encountered, the changes through which it has passed, and its present condition, is deemed necessary to the performance of the duty required by the call.

In the year 1790, the present Prince de Talleyrand, then Bishop of Autun, distributed among the members of the Constituent Assembly of France a proposal, founded upon the excessive diversity and confusion of the weights and measures then prevailing all over that country, for the reformation of the system, or rather for the foundation of a new one upon the principle of a single and universal standard. After referring to the two objects which had previously been suggested by Huyghens and Picard, the pendulum and the proportional part of the circumference of the earth, he concluded by giving the preference to the former, and presented the projet of a decree. First, that exact copies of all the different weights and elementary measures *used* in every town of France should be obtained and sent to Paris. Secondly, that the National Assembly should write a letter to the British Parliament, requesting their concurrence with France in the adoption of a natural standard for weights and measures; for which purpose commissioners, in equal numbers from the French Academy of Sciences and the British Royal Society, chosen by those learned bodies, respectively, should meet at the most suitable place, and ascertain the length of the pendulum at the forty-fifth degree of latitude, and from it an invariable standard for all measures and weights. Thirdly, that, after the accomplishment, with all due solemnity, of this operation, the French Academy of Sciences should fix with precision the tables of proportion between the new standards and the weights and measures previously used in the various parts of France; and that every town should be supplied with exact copies of the new standards, and with tables of comparison between them and those of which they were to supply the place. This decree, somewhat modified, was adopted by the Assembly, and, on the 22d of August, 1790, sanctioned by Louis XVI. Instead of writing to the British Parliament themselves, the Assembly requested the King to write to the King of Great Britain, inviting him to propose to the Parliament the formation of a joint commission of members of the Royal Society and of the Academy of Sciences, to ascertain the natural standard in the length of the pendulum. Whether the forms of the British constitution, the temper of political animosity then subsisting between the two countries, or the convulsions and wars which soon afterwards ensued, prevented the acceptance and execution of this proposal, it is deeply to be lamented that it was not carried into effect. Had the example once been set of a *concerted* pursuit of the great common object of *uniformity* of weights and measures, by two of the mightiest and most enlightened nations upon earth, the prospects of ultimate success would have been greatly multiplied. By no other means can the uniformity, with reference to the persons using the same system, be expected to prevail beyond the limits of each separate nation. Perhaps when the spirit which urges to the improvement of the social condition of man shall have made further progress against the passions with which it is bound, and by which it is trammelled, then may be the time for reviving and extending that generous and truly benevolent proposal of the Constituent National Assembly of France, and to call for a *concert* of civilized nations to establish one uniform system of weights and measures for them all.

The idea of associating the interests and the learning of other nations in this great effort for common improvement was not confined to the proposal for obtaining the concurrent agency of Great Britain. Spain, Italy, the Netherlands, Denmark, and Switzerland were actually represented in the proceedings of the Academy of Sciences to accomplish the purposes of the National Assembly. But, in the first instance, a committee of the Academy of Sciences, consisting of five of the ablest members of the Academy and most eminent mathematicians of Europe, Borda, Lagrange, Laplace, Monge, and Condorcet, were chosen, under the decree of the Assembly, to report to that body upon the selection of the natural standard, and other principles proper for the accomplishment of the object. Their report to the Academy was made on the 19th of March, 1791, and immediately transmitted to the National Assembly, by whose orders it was printed. The committee, after examining three projects of a natural standard—the pendulum beating seconds, a quarter of the equator, and a quarter of the meridian, had, on full deliberation, and with great accuracy of judgment, preferred the last, and proposed that its ten millionth part should be taken as the standard unit of linear measure; that, as a second standard of comparison with it, the pendulum vibrating seconds at the forty-fifth degree of latitude should be assumed; and that the weight of distilled water at the point of freezing, measured by a cubical vessel in decimal proportion to the linear standard, should determine the standard of weights and of vessels of capacity.

For the execution of this plan, they proposed six distinct scientific operations, to be performed by as many separate committees of the Academy:

1. To measure an arc of the meridian from Dunkirk to Barcelona, being between nine and ten degrees of latitude, including the forty-fifth, with about six to the north and three to the south of it, and to make upon this line all suitable astronomical observations.

2. To measure anew the basis which had served before for the admeasurement of a degree in the construction of the map of France.

3. To verify, by new observations, the series of triangles which had been used on the former occasion, and to continue them to Barcelona.

4. To make, at the forty-fifth degree of latitude, at the level of the sea, *in vacuo*, at the temperature of melting ice, observations to ascertain the number of vibrations in a day of a pendulum equal to the ten millionth part of the arc of the meridian.

5. To ascertain, by new experiments, carefully made, the weight *in vacuo* of a given mass of distilled water at the freezing point.

6. To form a scale and tables of equalization between the new measures and weights proposed, and those which had been in common use before.

This report was sanctioned by a decree of the Assembly; and four committees of the Academy were appointed; the first three of those enumerated objects having been intrusted to one committee, consisting of Mechain and Delambre. The experiments upon the pendulum were committed to Borda, Mechain, and Cassini; those on the weight of water to Lefevre Gineau and Fabbroni; and the scale and tables to a large committee on weights and measures.

The performance of all these operations was the work of more than seven years. Two of them, the measurement of the arc of the meridian, and the ascertainment of the specific gravity of water *in vacuo*, were works requiring that combination of profound learning which is possessed of the facts in the recondite history of nature already ascertained, with that keenness of observation which detects facts still deeper hidden, that fertility of genius which suggests new expedients of invention, and that accuracy of judgment, which turns to the account, not only of the object immediately sought, but of the general interests of science, every new fact observed. The actual admeasurement of an arc of the meridian of that extent had never before been attempted. The weighing of distilled water *in vacuo* had never before been effected with equal accuracy. And, in the execution of each of these works, nature, as if grateful to those exalted spirits who were devoting the labors of their lives to the knowledge of her laws, not only yielded to them the object which they sought, but disclosed to each of them another of her secrets. She had already communicated by her own inspiration to the mind of Newton that the earth was not a perfect sphere, but an oblate spheroid, flattened at the poles; and she had authenticated this discovery by the result of previous admeasurements of degrees of the meridian in different parts of the two hemispheres. But the proportions of this flattening, or, in other words, the difference between the circles of the meridian and the equator, and between their respective diameters, had been variously conjectured, from facts previously known. To ascertain it with greater accuracy was one of the tasks assigned to Delambre and Mechain; for, as it affected the definite extension of the meridian circle, the length of the metre, or aliquot part of that circle which was to be the standard unit of weights and measures, was also proportionably affected by it. The result of the new admeasurement was to show that the flattening was of $\frac{1}{334}$, or that the axis of the earth was to the diameter of the equator as 333 to 334. Is this proportion to the decimal number of 1,000 accidental? It is confirmed as matter of fact by the existing theories of astronomical nutation and precession, as well as by experimental results of the length of the pendulum in various latitudes. It is also an index to another combination of extension, specific gravity, and numbers, hitherto undiscovered. However this may be, the fact of the proportion was, on this occasion, the only object sought. This fact was attested by the diminution of each degree of latitude in the movement from the north to the equator; but the same testimony revealed the new and unexpected fact that the diminution was not regular and gradual, but very considerably different at different stages of the progress in the same direction; from which the inference seems conclusive that the earth is no more in its breadth than in it length perfectly spherical, and that the northern and southern hemispheres are not of dimensions precisely equal.

The other discovery was not less remarkable. The object to be ascertained was the specific gravity of a given mass of water *in vacuo*, and at its *maximum* of density; that is, at the temperature where it weighs most in the smallest space. That fluids are subject to the general laws of expansion and contraction from heat and cold, was the principle upon which the experiments were commenced. It was also known that, in the transition of fluids to a solid state, the reverse of this phenomenon occurs; and that water, in turning to ice, instead of contracting, expands. It had been supposed that the freezing point was that at which this polarity of heat and cold, if it may be so called, was inverted; and that water, contracting as it cooled until then, began at once to freeze and to expand. The discovery made by Lefevre Gineau and Fabbroni was, that the change took place at an earlier period; that water contracts as it cools, till at five degrees above 0 of the centigrade, answering to forty-one of Fahrenheit's thermometer, and, from that term, gradually expands as it grows cold, till fixed in ice at 0 of the former, or thirty-two degrees of the latter.

In the admeasurement of the arc of the meridian, and in the weighing of the given volume of water, the standard measure and weights previously established by the laws of France were necessarily used. The identical measure was a toise or fathom belonging to the Academy of Sciences, which had been used for the admeasurement of several degrees of the meridian between the years 1737 and 1741, in Peru, and had thence acquired the denomination of the *toise du Pérou*. In 1766 it had served as the standard from which eighty others had been

copied, and sent to the principal bailiwicks in France, and to the chatelet at Paris. The instruments used by Delambre and Mechain for their mensurations were two platina rods, each of double the length of this fathom of Peru. A repeating circle, a levelling instrument, and a metallic thermometer, consisting of two blades, one of brass and the other of platina, and calculated to show the difference of expansion produced upon the two metals by the ordinary alternations of heat and cold in the atmosphere, all invented by the ingenious and skilful artist Borda, were also among the instruments used by the commissioners.

The weights with which the new standard was compared were a pile of fifty marks, or twenty-five Paris pounds, called the weights of Charlemagne, and which, though not of the antiquity of that prince's age, had been used as standards for a period of more than five hundred years.

The fathom of Peru was divided into 6 standard royal feet of France, each foot into 12 thumbs, each thumb into 12 lines. The toise, therefore, was of 72 thumbs, or 864 lines. The standard metre of platina, the ten millionth part of the quarter of the meridian, measured by the brass fathom of Peru, was found to be equal to 443 lines, and 295,936 decimal parts of a line; and as it was found impossible to fix in the concrete form a division smaller than the thousandth part of a line, the definitive length of the metre was fixed at 443,296 lines, equivalent, by subsequent experiments of the Academy, to 39.3827 English inches; by the latest experiments of Captain Kater, to 39.37079; and by those of Mr. Hassler in this country, to 39.3802.

The Paris pound, mark weight as it was called, (*poids de marc*,) of the pile of Charlemagne, consisted of two marks, each mark of 8 ounces, each ounce of 8 gros or drams, each gros of 3 deniers or pennyweights, and each denier of 24 grains. The pound, therefore, consisted of 9,216 grains, and was equal to 15 ounces and 15 pennyweights, or 7,560 grains troy. The grain was rather more than four-fifths of the troy grain, and had probably in the origin been equivalent to the kernel of wheat, which the troy grain could scarcely have been. The cubic decimetre, or tenth part of the metre of distilled water, at the temperature of its greatest density, weighed *in vacuo*, was found of equal weight with $18.827\frac{15}{100}$ grains, or 2 pounds 5 gros $35\frac{15}{100}$ grains of the mark weight; and this, by the name of the kilogramme, was made the standard weight, its thousandth part being the gramme, or unit, equivalent to 15.44572 grains troy, or about $2\frac{1}{5}$ pounds avoirdupois.

The capacity of the vessel containing this water was, at the same time, made the standard of all measures, liquid or dry; it was called a *litre*, and is of the contents of 61.0271 cubic inches, about one-twentieth more than our wine quart. The metre was applied to superficial and solid measures, according to their proportions; the chain of 10 metres being applied to land measure, and its square denominated an *arc;* the cubic metre was called a *stere*.

The principle of decimal arithmetic was applied exclusively to all these weights and measures; their multiples were all tenfold, and their subdivisions were all tenth parts.

To complete the system, a vocabulary of new denominations was annexed to every weight and measure belonging to it. As a circumstance of great importance to the final success of the system, it may be remarked that these two incidents, the exclusive adoption of decimal divisions, and the new nomenclature, have proved the greatest obstacles to the general introduction of the new weights and measures among the people.

It has, indeed, from its origin, like all great undertakings, been obliged to contend with the intemperate zeal and precipitation of its friends, not less than with prejudice, ignorance, and jealousy of every description. The admeasurement of the meridian was commenced at the very moment of the fanatical paroxysm of the French Revolution. At every station of their progress in the field survey, the commissioners were arrested by the suspicions and alarms of the people, who took them for spies or engineers of the invading enemies of France. The Government was soon overthrown; the Academy of Sciences abolished; and the National Assembly of the first constitutional monarchy, just at the eve of their dissolution, instead of waiting calmly for the completion of the great work which was to lay the foundation for a system to be as lasting as the globe, in a fit of impatience passed on the 1st of August, 1793, a law declaring that the system should go immediately into operation, and assuming for the length of the standard metre the ten millionth part of the quadrant of the meridian, according to the result of the old admeasurement of a degree in 1740, and arranging an entire system of weights and measures, in decimal divisions, with new denominations, all of which were to be merely temporary, and to cease when the definitive length of the metre should be ascertained. This extraordinary act was probably intended, as it directly tended, to prevent the further prosecution of the original plan; and though soon after it was followed by a decree of 11th September, 1793, authorizing the temporary continuance of the general committee of weights and measures which had been appointed by the Academy, yet, on the 23d December of the same year, a decree of Robespierre's Committee of Public Safety dismissed from the commission Borda, Lavoisier, Laplace, Coulomb, Brisson, and Delambre, on the pretence that they were not republicans sufficiently pure. Mechain escaped the same proscription only because he was detained as a prisoner in Spain.

Yet even Robespierre and his committee were ambitious not only of establishing the system of new weights and measures in France, but of offering them to the adoption of other nations. By a decree of that committee of 11th December, 1793, the board or commission of weights and measures were directed to send to the United States of America a metre in copper, and a weight, being copies of the standards then just adopted. They were accordingly transmitted; and on the 2d of August, 1794, the two standards were, by the then French minister plenipotentiary (Fauchet) sent to the Secretary of State with a letter recommending, with some urgency, the adoption of the system by the United States. This letter was communicated to Congress by a message from the President of the United States of the 8th of January, 1795.

In the mean time the mensuration of the arc of the meridian was entirely suspended by the dismissal of Delambre and the detention of Mechain. Its progress was renewed by a decree of the National Convention of 7th April, 1795, (18 Germinal, an 3,) which abolished almost entirely the nomenclature of the temporary standards adopted in August, 1793, and substituted a new one, being that still recognised by the law, and the units of which have been already mentioned—the metre, the gramme, the arè, the litre, and the stere. To express the multiples of these units, the Greek words denominating ten, a hundred, a thousand, and ten thousand, were prefixed as additional syllables, while their tenth, hundredth, and thousandth parts were denoted by similar prefixed syllables from the Latin language. Thus, the myrio-metre is 10,000, the kilo-metre 1,000, the hecto-metre 100, and the deca-metre 10 metres; each of those prefixed syllables being the Greek word expressive of those respective numbers; while the deci-metre, the centi-metre, and the milli-metre, are tenth, hundredth, and thousandth parts, signified by the Latin syllables respectively prefixed to them. The theory of this nomenclature is perfectly simple and beautiful. Twelve new words, five of which denote the things and seven the numbers, include the whole system of metrology; give distinct and significant names to every weight, measure, multiple, and subdivision of the whole system; discard the worst of all the sources of error and confusion in weights and measures, the application of the same name to different things; and keep constantly present to the mind the principle of decimal arithmetic, which combines all the weights and measures, the proportion of each weight or measure with all its multiples and divisions, and the chain of uniformity which connects together the profoundest researches of science with the most accomplished labors of art, and the daily occupations and wants of domestic life in all classes and conditions of society. Yet this is the part of the system which has encountered the most insuperable obstacles in France. The French nation have refused to learn

or to repeat these twelve words. They have been willing to take a total and radical change of things; but they insist upon calling them by old names. They take the metre, but they must call one-third part of it a foot. They accept the kilogramme; but, instead of pronouncing its name, they choose to call one-half of it a pound. Not that the third of a metre is a foot, or the half of a kilogramme is a pound; but because they are not very different from them, and because, in expressions of popular origin, distinctness of idea in the use of language is more closely connected with habitual usage than with precision of expression.

This observation may be illustrated by our own experience in a change effected by ourselves in the denominations of our coins—a revolution by all experience known to be infinitely more easy to accomplish than that of weights and measures. At the close of our war for independence we found ourselves with four English words, pound, shilling, penny, and farthing, to signify all our moneys of account. But though English words, they were not English things. They were nowhere sterling, and scarcely in any two States of the Union were they representatives of the same sums. It was a Babel of confusion by the use of four words. In our new system of coinage we set them aside. We took the Spanish piece of eight, which had always been the coin most current among us, and to which we had given a name of our own—a dollar. Introducing the principle of decimal divisions, we said a tenth part of our dollar should be called a *dime*, a hundredth part a *cent*, and a thousandth part a *mille*. Like the French, we took all these new denominations from the Latin language; but, instead of prefixing them as syllables to the generic term *dollar*, we reduced them to monosyllables, and made each of them significant by itself, without reference to the unit of which they were fractional parts. The French themselves, in the application of their system to their coins, have followed our example; and, assuming the franc for their unit, called its tenth part a *decime*, and its hundredth a *centime*. It is now nearly thirty years since our new moneys of account, our coins, and our mint, have been established. The dollar, under its new stamp, has preserved its name and circulation. The cent has become tolerably familiarized to the tongue wherever it has been made by circulation familiar to the hand. But the dime having been seldom, and the mille never, presented in their material images to the people, have remained so utterly unknown, that now, when the recent coinage of dimes is alluded to in our public journals, if their name is mentioned, it is always with an explanatory definition to inform the reader that they are ten cent pieces; and some of them, which have found their way over the mountains, by the generous hospitality of the country have been received for more than they were worth, and have passed for an eighth instead of a tenth part of a dollar. Even now, at the end of thirty years, ask a tradesman or shopkeeper in any of our cities what is a dime or a mille, and the chances are four in five that he will not understand your question. But go to New York, and offer in payment the Spanish coin, the unit of a Spanish piece of eight, and the shop or marketman will take it for a *shilling*. Carry it to Boston or Richmond, and you shall be told it is not a shilling, but nine pence. Bring it to Philadelphia, Baltimore, or the city of Washington, and you shall find it recognised for an elevenpenny bit; and if you ask how that can be, you shall learn that the dollar being of ninety pence, the eighth part of it is nearer to eleven than to any other number; and, pursuing still further the arithmetic of popular denominations, you will find that half eleven is five, or at least that half the elevenpenny bit is the fipenny bit, which fipenny bit at Richmond shrinks to four pence halfpenny, and at New York swells to six pence. And thus we have English denominations most absurdly and diversely applied to Spanish coins, while our own lawfully established dime and mille remain to the great mass of the people among the hidden mysteries of political economy—state secrets.

Human nature, in its broadest features, is everywhere the same. This result of our own experience upon a small scale and upon a single object will easily account for the repugnance of the French people to adopt the new nomenclature of their weights and measures. It is not the length of the words that constitutes the objection against them, nor the difficulty of pronunciation; for fipenny bit is as hard to speak and as long a word as kilogramme, and elevenpenny bit has certainly more letters and syllables, and less euphony, than myriometre. But it is because, in the ordinary operations of the mind, distinctness of idea is by the laws of nature linked with the chain of association between sensible images and their habitual denominations more closely than with the exactness of logical analysis.

The nomenclature of the French metrology was established by the law of 7th April, 1795, although the metre and the kilogramme were only provisional and not definitive. It was known that the difference between the provisional and definitive metre and kilogramme would be very small, scarcely perceptible; and by that inverted logic which presides over all precipitate legislation, it was concluded that because it was small it would be unimportant; instead of which, sound reason would have inferred that, to the purpose of uniformity, the smaller the difference was, the greater was the danger of its producing confusion between the temporary and the perpetual things which were to bear the same name.

But with the hasty call for a provisional metre and kilogramme, the law of 7th April, 1795, gave the definitive nomenclature, and directed the renewal of all the operations commenced under the direction of the Academy of Sciences; and the persons employed upon them were reinstated in their functions by the Committee of Public Instruction of the National Convention. A commission of twelve persons, Berthollet, Borda, Brisson, Coulomb, Delambre, Hauy, Lagrange, Laplace, Mechain, Monge, Prony, and Vandermonde, was appointed on the 17th of April, 1795, for the final accomplishment of the original plan; the most important and laborious part of which, the admeasurement of the arc of the meridian, was immediately resumed by Delambre and Mechain. By them the whole distance from Dunkirk to Mont Jouy, near Barcelona, a distance of nine degrees and two-thirds, more than a tenth part of the quadrant of the meridian, was measured by trigonometrical survey. The angles formed by every station with those next before and after it, rectified by the angles of elevation and depression formed by the inequalities on the surface of the ground, to reduce the whole to the level of the horizon, were measured and referred to the measure of two bases, one between Melun and Lieusaint, the other between Vernet and Salces, near Perpignan, each serving as a corrective upon the other. Observations of azimuth ascertained the direction of the sides of the triangles with reference to the meridian; and astronomical observations ascertained the celestial arc corresponding with that which was measured upon the earth. The distance from Dunkirk to Rhodez, about 450 miles, was performed by Delambre; and that from Barcelona to Rhodez, upwards of 200 miles, by Mechain. The base of Melun was of 6075.90 and that of Perpignan 6006.25 toises, each nearly seven miles: and though at the distance of near 400 miles from each other, the base of Perpignan, calculated by inference from the chain of triangles between them, differed from its actual admeasurement less than one foot. The portion of the distance allotted to Mechain was less than one-third of the whole; but, traversing the Pyrenees, and being chiefly upon the Spanish territories, was attended with more difficulties than those encountered by his associate. Mechain, in the execution of his task, had formed the project of extending the survey to the Balearic islands, which would have made the portion of the arc south of the forty-fifth degree equal to that northward of it. With a firmness and perseverance of pursuit, amidst innumerable obstacles, he had proceeded far in the execution of this supplementary plan. His triangles were already extended from Barcelona to Tortosa. His stations had been selected to Cullora. Six or seven triangles more would have carried his work to its termination in the island of Ivica. Arrested by a fever in his first progress, and compelled then to abandon the attempt, he had resumed it after the result of the original plan had been ascertained, and the new system had been finally established by law. The hand which sets bounds to all

human pursuits again and definitively met and closed his career. He died on the 20th of September, 1805, at Castellon de la Plana, in the Spanish province of Valencia. His more fortunate associate, Delambre, has published in three quarto volumes, under the title of the "Basis of the Metrical Decimal System, or measure of the arc of the meridian between Dunkirk and Barcelona," all the details and results of this admirable operation. A fourth volume yet remains to be published, which will contain the account of the actual execution since the death of Mechain of the idea which he had conceived of extending the admeasurement to the island of Formentara, and of the additional extension of it northward, to the Shetland islands, by connecting it with the trigonometrical survey of Great Britain. This work, in passing to future ages a monument of the philosophy, science, public spirit, and active benevolence of our own, will redeem, by the martyrdom of genius and learning in the cause of human happiness, the blood-polluted glories of contemporaneous war.

The reports of the proceedings of Delambre and Mechain, as well of their field surveys as of their astronomical observations, and all their calculations, were submitted to the inspection, scrutiny, and revision of a committee of the mathematical and physical class of the National Institute, that phœnix of science which had arisen from the ashes of the Academy of Sciences. The observations to ascertain the length of the pendulum, and the experiments for determining the specific gravity of distilled water at its maximum of density, were submitted to the same ordeal. Two reports upon the whole result were made to the class, one by Trallés of the Helvetic Confederation, the other by Van Swinden of the Netherlands, two of the foreign associates who had been invited to co-operate in the labor, and to participate in the honor of the undertaking. These two reports, combined by Van Swinden into one, were then reported from the class to the general meeting of the Institute, and by that body, with all suitable solemnity, to the two branches of the National Assembly of France, on the 22d of June, 1799, together with a definitive metre of platina made by Lenoir, and a kilogramme of the same metal made by Fortin. They were introduced by an appropriate address at the bar of the two Houses by the presiding member of the National Institute, Laplace; to which answers were returned by the respective presidents of the two legislative chambers. On the same day the standard-metre and kilogramme were deposited in the hands of the keeper of the public archives; and a record of the fact was made and signed by him and by all the members of the Institute, foreign associates, and artists, whose joint labors had contributed to the consummation of this more than national undertaking.

No apology will be deemed necessary by Congress for dwelling upon these details which signalized the establishment of the new French metrical system. The spectacle is at once so rare and so sublime, in which the genius, the science, the skill, and the power of great confederated nations are seen joining hand and hand in the true spirit of fraternal equality, arriving in concert at one destined stage of improvement in the condition of human kind, that, not to pause for a moment, were it even from occupations not essentially connected with it, to enjoy the contemplation of a scene so honorable to the character and capacities of our species, would argue a want of sensibility to appreciate its worth. This scene formed an epocha in the history of man. It was an example and an admonition to the legislators of every nation and of all aftertimes.

On the 10th of December, 1799, (19 Frimaire, 8,) the temporary metre and kilogramme, which had been ordained by the laws of 1st August, 1793, and 7th April, 1795, (18 Germinal, 3,) were abolished. That metre had been of 443 lines and $\frac{44}{100}$ of a line of the ancient foot, standarded by the fathom of Peru. The new and definitive metre was fixed at 443 lines $\frac{296}{1000}$. The difference between them was about one-seventh of a line, or $\frac{1}{100}$ of our inch, a difference imperceptible for all ordinary uses, but very important as a standard variety, and immediately apparent when multiplied to the cube for the measure of capacity and the weight. Thus the temporary kilogramme had been of 18,841 grains, mark weight, while the new and definitive kilogramme was reduced to 18827.15 grains.

During the violent ebullitions of the most inflammatory period of the French Revolution, it had been imagined that in the reformation of the system of weights and measures, upon the principle of uniformity, the mensuration of time ought to be included. But this was a different project from that of the reformed metrology, originating in motives less pure and ingenuous, connected with purposes interfering with religious impressions, and quite inconsistent with one of the principal expedients of perpetuating the identity of the new weights and measures. The length of the pendulum beating seconds, it has been seen, is, in the new metrical system, the test of verification for that of the metre, in case the original platina standard should be lost. The pendulum beating seconds vibrates 86,400 times in the solar day of 24 hours. But the fiery spirits of the Revolution called for a reformation of the calendar, for a new constitution of the seasons, and, above all, for decimal divisions. The establishment of the French republic was a new era to the world. It had taken place on the 22d of September, 1792, the day of the autumnal equinox, when the sun entered the sign of the Balance, the symbol of equality. Before it the Christian era was to disappear. The new year was to commence with that day. The division of twelve months was to be retained; but they were all to be of three times ten, or thirty days. The division of weeks of seven days, beginning with one specially devoted to the worship of the Creator and repose, was to be abolished; but every tenth day was to be dedicated to some moral abstraction or virtue, such as liberty, equality, fraternity, patriotism, conjugal affection, filial piety, old age, and once a year to the Supreme Creator, whose existence was formally authenticated by a decree of the National Convention. After their thirty-six decades, there remained five (and in leap-year six) complementary days, to which they gave a name which can scarcely be repeated with decency; but which were to be all holidays, and in which were to be revived the Olympic games of ancient Greece. The names of the months were to be significant. The three successive months, composing each of the four seasons, were to have the same terminating syllable, which in its sound should convey to the ear its distinctive character. The first of the four was *aire*, which was supposed to indicate the solemn and majestic tranquillity of autumn; the second *ose*, a dull and heavy sound, marking the torpor and frigidity of winter; the third *al*, which had all the reviving influence and liquid harmony of spring; and the fourth *dor*, burning to the fancy with the vivid ardor of summer. To these terminating syllables each month had an appropriate prefix. Thus, in autumn, Vendemi-aire was the month of vintage; Brum-aire the month of fogs; and Frim-aire, the month of incipient cold. From the winter solstice to the vernal equinox, there were Niv-ose, the month of snow; Pluvi-ose, the month of rain; and Vent-ose, the month of wind. These were succeeded by the darlings of the year: Germin-al, the month of buds; Flore-al, the month of blossoms; and Prairi-al, the month of blooming meads. The procession closed with the bounties and fervors of summer: Messi-dor, the month of harvests; Thermi-dor, the month of heat; and Fructi-dor, the month of fruit. The days of their decade were to be denominated by their numbers from one to ten; as Primedi, first day, Duodi, second day, and so on to Decadi, the tenth day; which was to be the day of relaxation from labor, and of meditations upon virtue. But the clashing of the new calendar with the new metrology was the division of the solar day, not into 24 hours of 60 minutes, with 60 seconds to the minute, but into 10 hours, each of 100 minutes, and each minute of 100 seconds. The pendulum of that day, therefore, would vibrate 100,000 times, and would be of quite a different length from that which was to be the test of verification to the metre.

This system has passed away, and is forgotten. This incongruous composition of profound learning and superficial frivolity, of irreligion and morality, of delicate imagination and coarse vulgarity, is dissolved. This statue,

with the form of Apollo, and the face of Silenus, has crumbled into dust; but it was established by a law of the 5th of October, 1792, and for the space of twelve years it was the calendar of the French nation. Henceforth it will only be remembered as preparing future problems in chronology.

The division of the day into a hundred thousand parts had some reasons to recommend it, but was the first part of the system that was abandoned. It had been decreed as compulsory, with the new nomenclature of the calendar, on the 24th of November, 1793, (4 Frimaire, 2,) but this regulation was indefinitely suspended by the law of 7th April, 1795, (18 Germinal, 3.)

On the 8th of April, 1802, when a First Consul, soon to be for life, had produced some perturbation of that balance, the symbol of equality in which the sun had first shone upon the French republic, there passed a law, retaining the *equinoctial* or republican calendar for all civil purposes, but resuming the *solstitial* or Gregorian calendar so far as to restore its week of seven days with their names, and its Sabbath of the first of them. The terms *equinoctial* and *solstitial*, in this law, applied to the new and old calendars, seem studiously selected to veil the balance of equality on one side, and the Sabbath of religion on the other.

But on the 9th of September, 1805, (22 Fructidor, 13,) in the month of *fruits*, and when the sun of the French republic had got, if not into the sign, at least deep into the constellation of the Lion; when the legend of her coins bore on one side the name and head of Napoleon Emperor, and on the other the name of the French republic, a senatus consultum ordained that, from the 11th of that dull and heavy month of snows of the fourteenth year, the 1st of January, 1806, should reappear, and the Gregorian calendar should be restored to use throughout the republican empire.

The decimal divisions and the fanciful contexture of the equinoctial calendar were a sort of episode to the new system of metrology. The attempt to decimate the year in its number of days was equally useless and absurd. The five successive holidays at the close of the year, just at the season of the vintage, with the institution of athletic sports, were a waste of time, and a provocation to mischievous idleness, ill compensated by the retrenchment of sixteen Sundays in the year, at the distance of a week from each other, and devoted to the exercises of piety.

The application of the metrical system to geography and astronomy was a much more rational part of the project, but has been attended with difficulties in execution hitherto insuperable. In adopting an aliquot decimal part of the quadrant of the meridian for the unit of long measures, it formed a natural division of the quadrant itself into ten parts, each of ten degrees. The degree would then have been of 100,000 metres, and the number of degrees to encircle the earth would have been 400. The degree, which is now of about 69 English miles, would have been of about 62, and the facility of all astronomical, geographical, and nautical calculations would have been much increased. But it would have rendered useless the all tables indispensable to the navigator, astronomer, and geographer; and, if it had not produced the same effect upon all the maps and charts now in use, it would have tended to produce confusion between those of the old and those of the new system. The ancient division of the sphere, and consequently of the circle, into 360, and therefore into quadrants of 90 degrees, originated in the coincidence of the daily rotations of the earth in its orbit round the sun, or the apparent motion of the sun in the ecliptic, which, as near as the approximation of numbers can bring it, is of one degree every day. The division of the day into 24 hours, each of 60 minutes, is founded on a similar coincidence of time in the rotation of the earth round its axis, and the apparent daily revolution of the firmament round the earth resulting from it, giving for the rising or setting of each sign of the zodiac a term of two hours, and for each degree of the circle described by the earth in its rotation a term of four minutes, or fifteen degrees to the hour. The adoption of the decimal divisions for the quadrant of the meridian, and for the circle, would have disturbed all these harmonies, as well as that of the sexagesimal division of the circle by the radius—a division not perfectly exact, since the radius is not exactly the sixth part of the circumference, but which, having been found the most convenient for practice, has been established from the remotest antiquity, and, being already used by all the civilized nations of the earth, could not, by being set aside, tend to uniformity, unless the method to supply its place could be alike secure of universal adoption.

The divisions of the barometer had always been marked in inches and lines. The application to it of the decimetre, its multiples and divisions, had for observation and calculation the usual conveniences of the decimal arithmetic. The graduation of the thermometer had always been arbitrary and various in different countries. The principle of the instrument was everywhere the same—that of marking the changes of heat and cold in the atmosphere, by the expansion and contraction which they produced upon mercury or alcohol. The range of temperature between boiling and freezing water was usually taken for the term of graduation, but by some it was graduated downwards from heat to cold, and by others upwards from cold to heat. By some the range between the two terminating points was divided into 80, 100, 150, or 212 degrees. One put the freezing, and another the boiling point at 0. Reaumur's thermometer, used in France, began with 0 for the freezing point, and placed the boiling point at 80. Fahrenheit's, commonly used in England and in this country, has the freezing point at 32, and the boiling point at 212. The centigrade thermometer, adopted by the new system, begins at the freezing point at 0, and places the boiling point at 100; its graduation, therefore, is decimal, and its degrees are to those of Reaumur as 5 to 4, and to those of Fahrenheit as 5 to 9.

The application of the new metrology to the moneys and coins of France has been made with considerable success; not, however, with so much of the principle of uniformity as might have been expected, had it originally formed a part of the same project; but the reformation of the coins was separately pursued, as it has been with us; and, as the subject is of great complication, it naturally followed that, from the separate construction of two intricate systems, the adaptation of each to the other was less correct than it would have been had all the combinations of both been included in the formation of one great masterpiece of machinery. It is to be regretted that, in the formation of a system of weights and measures, while such extreme importance was attached to the discovery and assumption of a national standard of long measure as the link of connexion between them all, so little consideration was given to that primitive link of connexion between them which had existed in the identity of weights and of silver coins, and of which France as well as every other nation in Europe could still perceive the ruins in her monetary system then existing. Her livre tournois, like the pound sterling, was a degeneracy, and a much greater one, from a pound weight of silver, but it had scarcely a seventieth part of its original value. It was divided into twenty sols or shillings, and the sol was of twelve deniers or pence. It had become a mere money of account; but the écu, or crown, was a silver coin of six livres, nearly equivalent to an ounce in weight, and there were half-crowns, and other subdivisions of it, being coins of one-fourth, one-fifth, one-eighth, and one-tenth of the crown. There were also coins of gold, of copper, and of mixed metal, called *billon*, in the ordinary circulations of exchange. Shortly after the adoption of the provisional or temporary metre and kilogramme, a law of 16 Vendemiaire, 2, (7th October, 1793,) prescribed that the principal unit, both of gold and of silver coins, should be of the weight of ten *grammes*. The proportional value of gold to silver was retained as it had long before been established in France, at 15½ for 1; the alloy of both coins was fixed at one-tenth, and the silver franc of that coinage would have been worth about thirty-eight cents, and the gold franc a little short of six dollars. This law was never carried into execution; it was superseded by one of 15th August, 1794, (28 Thermidor, 3,) which reduced the silver franc to five grammes; and it was

not until after a law of 7 Germinal, 11, (28th March, 1803,) that gold pieces of twenty and forty francs were coined at 155 of the former to the kilogramme.

In the new system, the name of *livre*, or pound, as applied to money or coins, was discarded; but the *franc* was made the unit both of coins and moneys of account. The franc was a name which had before been in common use as a synonymous denomination of the *livre*. The new franc was of intrinsic value $\frac{1}{80}$ more than the livre. The franc is decimally divided into *decimes* of $\frac{1}{10}$, centimes of $\frac{1}{100}$, and millimes of $\frac{1}{1000}$ of the unit; but the smallest copper coin in common use is of 5 centimes, equivalent to about one of our cents. The silver coins are of $\frac{1}{4}$, $\frac{1}{2}$, 1, and 2 francs, and of 5 francs; the gold pieces, of 20 and 40 francs. The proportional value of copper to silver is of 1 to 40, and that of billon to silver of 1 to 4; so that the kilogramme should weigh 5 francs of copper coin, 50 of the billon, 200 of the silver, and 3,100 of the gold coins; and the decime of billon should weigh precisely two grammes. The allowances, known by the name of remedy for errors in the weight and purity of the coins, are of $\frac{2}{100}$ upon copper, which is only for excess: those upon the weight of billon are of $\frac{14}{1000}$; upon silver $\frac{20}{1000}$ for $\frac{1}{4}$ francs, $\frac{14}{1000}$ for $\frac{1}{2}$ francs, and of $\frac{10}{1000}$ or 1 per cent. on 1 and 2 franc pieces, and of $\frac{6}{1000}$ for 5 franc pieces. That of the gold coins is of $\frac{4}{1000}$; all, excepting the copper, allowances either for excess or deficiency. But the practice of the mint never transgresses in excess; and the deficiency is always nearly the whole allowed by law. The remedy of alloy is of $\frac{7}{1000}$, either of excess or defect, for billon; of $\frac{3}{1000}$ for silver; and of $\frac{2}{1000}$ for gold. It is said that the actual purity of the coins, both of gold and of silver, is within $\frac{1}{1000}$ less than the standard.

The conveniences of this system are:

First. The establishment of the same proportion of alloy to both gold and silver coins, and that proportion decimal.

Secondly. The established proportions of value between gold, silver, mixed metal, and copper coins.

Thirdly. The adaptation of all the coins to the weights in such manner as to be checks upon and tests of each other. Thus the decime of billon should weigh 2 grammes, the franc of silver 5, the 2 franc piece of silver and the 5 centime piece of copper each 10, and the 5 franc piece 50. The allowances of remedy disturb partially these proportions. These are practices continued in all the European mints, after the reasons upon which they were originally founded have in a great measure ceased. In the imperfection of the art, the mixture of the metals used in coining, and the striking of the coins, could not be effected with entire accuracy. There would be some variety in the mixture of metals made at different times, though in the same intended proportions; and in different pieces of coin, though struck by the same process and from the same die. But the art of coining metals has now attained a perfection, that such allowances have become, if not altogether, in a great measure unnecessary. Our laws make none for the deficiencies of weight; and they consider every deficiency of purity as an error, for which the officers of the mint shall be *excused* only in case of its being within $\frac{1}{144}$ part, or about $\frac{7}{1000}$; for if it should exceed that, they are disqualified from holding their offices. Where the penalty is so severe, it is proper that the allowance should be large; but, as obligatory duty upon the officers of the mint, an allowance of $\frac{1}{1000}$ would be amply sufficient for each single piece, and no allowance should be made upon the average.

Among the difficulties attending all innovations upon established usages relative to weights and measures are their application to the tonnage of ships and boats, and to the form and size of casks. We have seen, in the review of the history of English weights and measures, how Henry VII.'s change of the Rochelle for the troy pound affected the barrels of herring fishers, the hogsheads of claret, and the butts of Alicante wine. The tonnage of ships, on the old established metrologies, was founded, like their weights and measures of capacity, upon a principle of combining specific gravity and occupied space. The ton of shipping was adapted both for a weight and a measure. The capacity of a ship as a measure is ascertained by its internal cubical dimensions, which, before the change of system in France, gave 42 royal cubic feet to a ton. The mode of admeasurement was, like ours, a complicated multiplication and division of length, breadth, and thickness, with given deductions and estimates, all finally divided by the standing number 94, as ours is by 95, and the quotient of which gives the number of what may be called custom-house *tons*. But the French ordinances, like our law, did not indicate by what specific measure this length, breadth, and thickness were to be taken. It was always perfectly understood here, that it is in feet and tenths of feet; and in France, that it was in royal feet and their tenths. Nothing can afford a more striking illustration of the construction which long-established usage can give to law than this admeasurement in feet and tenth parts of a foot; differing from that used in all other cases of feet and inches or twelfth parts; not expressly directed by law, and yet practised for these thirty years, probably without a question upon the meaning of the law. The attempt in France to apply it to the admeasurement by the metre, without changing the final common divisor 95, signally shows how cautiously complications of weights, measures, numbers, and coins must be dealt with. The law of the 12 Nivose, 2, (1st January, 1794,) directed those measures to be taken in the new metre and divisions, without changing the final divisor 95 to produce a number of *tons*. The consequence would have been that the cubic numbers divided by 95 would have been metres and their decimal parts, instead of feet and their decimal parts; and the quotient would have reduced the tonnage to about one-third of its proper dimensions. To have produced a quotient of a number of tons, their final divisor should have been 30 instead of 95. This mistake was precisely the same as that of the British Parliament of 1496, when, thinking to re-enact the law of 1266, they prescribed a bushel to be made from 64 gallons *troy* weight of wheat of 32 kernels to the troy pennyweight, instead of a bushel of 64 pounds sterling at 15 ounces to the pound of wheat, 32 kernels of which weighed the penny sterling of Henry III. It was the same mistake which the Greek church yearly repeats in celebrating Easter by the Julian calendar of 365 days 6 hours to the year, and the lunar cycle of 19 years. And, to come nearer home to ourselves, it was the same mistake which our own statute book discloses in estimating the British pound sterling $4 44, because 110 years ago Sir Isaac Newton found the Spanish Mexican piece of eight to be of the intrinsic value of 4 shillings and 6 pence sterling.

The burden of a ship, as a weight, is ascertained by the depth of the water that she draws. On the principles of hydrostatics, the weight of any floating object is equal to that of the mass of water displaced by it, and the weight of a ship's burden is the difference between the column of water drawn by her when in ballast and when laden. The draught of water, therefore, measured by the metre and its divisions, gives, of itself, the result in tons of 1,000 kilogrammes, by the mere multiplication of the dimensions of the vessels; the result giving cubic metres of water, each of which, saving the difference between the specific gravity of river or sea and distilled water, will of course be of 1,000 kilogrammes.

The size of casks was among the objects intended to be included in the reformed system; and regulations were adopted prescribing, first, that their dimensions should be of uniform proportions, the diameter of the two ends, that of the centre, and the length of the barrels being as eight, nine, and ten and a half to each other; and, secondly, that their contents should be in decimal or subdecimal divisions of *litres*. Tables were published prescribing the dimension in millimetres of the length and diameters of each cask, from the contents of 50 to those of 1,000 litres. But the forms and proportions of casks are different in different countries, and in different places of the same country. These differences may arise from the nature of the substance, liquid or dry, which they are to contain;

from the materials of which they are made or with which they are bound; from laws or usages long established, to which the cooper, the vintner, or brewer, the merchant, the miller, and other numerous professions dealing in articles which are packed in barrels, have accommodated themselves from time immemorial. With regard to articles of exportation, the laws of other countries also interpose by prohibiting their admission in casks of other dimensions than those which have been used; and the instruction of 2 Frimaire, 11, (23d of November, 1802,) revoked the regulation of Pluviose, 7, (January, 1799,) requiring only thenceforth, according to the proclamation of 11 Thermidor, 7, (29th of July, 1799,) that no wines or other liquors should be exposed to sale unless branded with the mark of their contents in litres; with a recommendation, however, that casks should be made as much as possible in the dimensions and proportions which had been ordained in January, 1799.

The intentions of reformation, upon the principles of uniformity and of decimal divisions, were, in the novelty of the system, extended to the mariner's compass, which it was proposed to divide into forty rhumbs of wind instead of thirty-two; to the log-line, the usual divisions of which are proportioned to the marine mile of sixty to a degree; to the sounding line, which had usually been divided by French mariners, not into their fathoms of six, but into *brasses* of five royal feet; and to the cable's length, which was of one hundred toises. Some of these were consequences of the project for dividing decimally time and the quadrant of the circle, and the others followed from the substitution of the metre for the foot and toise.

The lapidaries and dealers in precious stones throughout Europe have a weight peculiar to themselves, under the denomination of the carat, which is nearly of the weight of three grains troy, and which they divide into halves, quarters, eighths, and sixteenths. As this trade is of extremely limited extent even in Europe, it was to be considered only in the organization of a system for universal application.

It has been observed that, among the difficulties, hitherto insuperable, which have opposed the establishment in fact of this system, thus apparently established by law, the most unmanageable of all has been found to be the adoption of the nomenclature. It is curious to observe the various expedients of legislation to accommodate itself to the popular humors in this respect.

The law of the 1st of August, 1793, established all the principles of the new system, but under denominations different from those which had ever been used before, and not less different from those which have been adopted since. It directed the Academy of Sciences to compose an elementary book, containing a clear explanation of the new weights and measures, with tables of equalization, and instructions for adapting them to those which had been in use until then. A few days afterwards the Academy itself was abolished, but the duty of composing the book was assigned to a temporary commission or board of weights and measures, consisting of the same persons who had been employed as members of the Academy on the work. The book was composed and published in the year 1794; but, on the 19th of January of that year, (30 Nivose, 2,) the nomenclature had already been changed; and, on the 7th of April, 1795, (18 Germinal, 3,) a nomenclature entirely new, with the exception of three or four words, was enacted. The names ordained by this law of 7th April, 1795, are still the proper technical appellations, and have already been mentioned with their Greek and Latin prefixes of decimal multiples and subdivisions. The same law directed that weights or measures might be made of double or of half the units and their tenth part, or tenfold amounts; but that no other subdivision or multiple, such as thirds or quarters, or sixth or eighth parts, should be allowed. The law of 19 Frimaire, 8, (10th December, 1799,) declared the platina metre of 443,296 lines, and the kilogramme of 18827.15 grains, mark weight, to be the definitive standard weight and measure. On the 13 Brumaire, 9, (4th November, 1800,) the Executive Directory issued an arrête or order, authorizing, either in public writings or in habitual usage, what they called a translation into French words of the authentic nomenclature; so that the myriometre might be called a league, the kilometre a mile, the litre a pint, the kilogramme a pound, the hectogramme an ounce, the gramme a denier, and so of all the rest, excepting the *metre*, which was to have no synonymous or translated name, and the *stere* for firewood and measures of solidity. This ordinance was never executed; and the Minister of the Interior, by an order of 30 Frimaire, 14, (21st December, 1805,) directed all the subordinate administrations to use exclusively the denominations prescribed by the law of 7th April, 1795.

An imperial decree of 12th February, 1812, presents the subject under a new aspect, by ordaining:

1. That the *units* of weights and measures should remain unchanged, as established by the law of 10th December, 1799.

2. That the Minister of the Interior should cause to be made *instruments* for weight and mensuration, presenting the fractions or multiples of the said units the most commonly used in commerce, and accommodated to the wants of the people.

3. That these instruments should bear on their respective faces the comparison of the divisions and denominations established by law with those which had been formerly used.

4. That, after a term of ten years, a report should be made to the Emperor of the result of experience upon the improvements of which the system of weights and measures might be susceptible.

5. That, in the mean time, the legal system should continue to be taught in all the schools, and be exclusively used in all the public offices, and in all markets, halls, and commercial transactions.

For the execution and explanation of this decree, an ordinance was, on the 28th of March, 1812, issued by the Minister of the Interior, of the following purport:

Art. 1. Permission was granted to employ for the purpose of commerce—

1. A long measure, equal to two metres, to be called a toise, and to be divided into six feet.

2. A measure, equal to one-third of the metre, to be called a foot, to be divided into twelve thumbs, and the thumb into twelve lines.

Each of these measures shall bear on one side the corresponding divisions of the metre, that is to say: the toise, two metres, divided into decimetres, and the first decimetre into millimetres; and the foot, three decimetres and one-third, divided into centimetres and millimetres; in all, $333\frac{1}{3}$ millimetres.

Art. 2. All cloths may be measured by a stick equal in length to twelve decimetres, to be called an *ell* (aune,) which shall be divided into halves, quarters, eighths, and sixteenths, as well as into thirds, sixths, and twelfths. It shall bear on one of its sides the corresponding divisions of the metre, in centimetres only; that is to say, one hundred and twenty centimetres, numbered from 10 to 10.

Art. 4. Corn and other dry measure articles may be measured, *in sales at retail*, by a vessel equal to one-eighth of the hectolitre, which shall be called a boisseau, and shall have its double, its half, and its quarter.

Art. 5. For *retail* sales of corn, seeds, meal, and roots, green or dry, the litre may be divided into halves, quarters, and eighths.

Art. 7. For *retail* sales of wine, brandy, and other liquors, measures of one-quarter, one-eighth, and one-sixteenth of the litre may be used; each of which measures shall be called by a name signifying its proportion to the litre.

Art. 8. For retail sales of all articles which are sold by weight, the shopmen may employ the following *usual* weights:

The pound, (livre,) equal to half a kilogramme, or 500 grammes, which shall be divided into sixteen ounces.
The ounce, (once,) or sixteenth part of the pound, which shall be divided into eight gros.
The gros, or eighth part of the ounce, which shall be divided into halves, quarters, and eighths.
They shall bear, with their appropriate names, the indication of their weight in grammes, namely:

The pound, - - - - - -	500 grammes.
Half pound, - - - - - -	250
Quarteron, - - - - - -	125
Eighth or half quarter, - - - - -	62.5
Ounce, - - - - - - -	31.3
Half ounce, - - - - - -	15.6
Quarter ounce, two gros, - - - - -	7.8
Gros, - - - - - - -	3.9

And such is at this day the system of weights and measures, or rather such are the systems, existing in France in their present condition; for it cannot escape observation that this decree and explanatory ordinance engraft upon the legal system an entirely new system, founded upon different, and, in many important respects, opposite principles. So that the result hitherto of the most stupendous and systematic effort ever made by a nation to introduce uniformity in their weights and measures has been a conflict between four distinct systems:

1. That which existed before the Revolution.
2. The temporary system established by the law of 1st August, 1793.
3. The definitive system established by the law of 10th December, 1799.
4. The *usual* system, *permitted* by the decree of 12th February, 1812.

This last decree is a compromise between philosophical theory and inveterate popular habits. Retaining the principle of decimal multiplication and division for the legal system, it abandons them entirely in the weights and measures which it allows the people to use. Instead of the metre and its decimals, it gives the people a toise of six feet, an aune of three feet and one-fifth, a foot of twelve thumbs, and a thumb of twelve lines. And these measures, instead of divisions exclusively decimal, are divisible in halves, thirds, quarters, sixths, eighths, twelfths, and sixteenths. Instead of a decimated kilogramme, it gives them a pound of sixteen ounces, an ounce of eight gros, and a gros of seventy-two grains. The measures of capacity, wet and dry, have the same indulgence; and while the standard weight and measure are deposited in the national archives, the people have restored to them for use all the names and divisions of their ancient weights and measures, though not the same things; for the toise, which is twice the length of the metre, is not the old toise; the foot, which is the third part of the metre, is not the *pied de roi;* but both are longer measures. The half-kilogramme, which is a pound, is not the ancient mark weight pound; nor are the boisseau and litre those of ancient times; they are all, respectively, near approximations to them.

If the existing system and practice terminated here, it would be far from having attained the ideal perfection of uniformity; but it is believed that, for a multitude of purposes, with this double and complicated system, there is yet a very extensive remnant in use of that which prevailed before the Revolution. It appears from questions at this time in discussion between the Governments of the United States and of France, that the tonnage of the French shipping is calculated by admeasurements in cubic royal feet; and it appears hence probable that, in all the business of shipbuilding, and in practical navigation, those measures are still used. Without positive knowledge of the fact, the analogy of all experience warrants the conjecture that, in every part of France remote from the capital, not only the use of the old legal system, but of the local weights and measures which prevailed in the various cities and districts of the country, is far from being eradicated.

The changes which have forced themselves upon the new system, under the attempt to reduce it to practice, should serve as admonitions to correct the errors of theory, but not operate as discouragement to the pursuit of the principal object—*uniformity.* The French metrology, in the ardent and exclusive search for a universal standard from nature, seems to have viewed the subject too much with reference to the nature of things, and not enough to the nature of man. Its authors do not appear to have considered, in all the bearings of the system, the proportions dictated by nature between the physical organization of man and the *unit* of his weights and measures. The standard taken from the admeasurement of the earth had no reference to the admeasurement and powers of the human body. The metre is a rod of forty inches; and, by applying to it exclusively the principle of decimal divisions, no measure corresponding to the ancient *foot* was provided. A unit of that denomination, though of slightly varied differences of length, was in universal use among all civilized nations; and the want of it is founded in the dimensions of the human body. Perhaps for half the occasions which arise in the life of every individual for the use of a linear measure, the instrument, to suit his purposes, must be portable, and fit to be carried in his pocket. Neither the metre, the half-metre, nor the decimetre, is suited to that purpose. The half-metre corresponds, indeed, with the ancient cubit; but perhaps one of the causes which have everywhere, since the time of the Greeks, substituted the foot in the place of the cubit, has been the superior convenience of the shorter measure. Besides which, the cubit being the unit, the half-cubit might serve the purposes of the foot; but the metre, divisible only by 2 and by 10, gave no measure practically corresponding with the foot whatever. It appears also not to have been considered that decimal arithmetic, although affording great facilities for the computation of numbers, is not equally well suited for the divisions of material substances. A glance of the eye is sufficient to divide material substances into successive halves, fourths, eighths, and sixteenths. A slight attention will give thirds, sixths, and twelfths; but divisions of fifth and tenth parts are among the most difficult that can be performed without the aid of calculation. Among all its conveniences, the decimal division has the great disadvantage of being itself divisible only by the numbers 2 and 5. The duodecimal division, divisible by 2, 3, 4, and 6, would offer so many advantages over it, that, while the French theory was in contemplation, the question was discussed whether the reformation of weights and measures should not be extended to the system of arithmetic itself, and whether the number 12 should not be substituted for 10, as the term of the periodical return to the unit. Since the establishment of the French system, this idea has been reproduced by philosophical critics as an objection against it; and Delambre, in the third volume of the Base du Système Métrique, p. 302, has considered it, and assigned the reasons for which it had been rejected. He admits to the full extent the advantages of a duodecimal over a decimal arithmetic, but alleges the difficulty of effecting the reformation as the decisive reason against attempting it.

The review of the proceedings in Great Britain and France, relating to the uniformity of weights and measures, presents the general subject under two very different aspects, from the combination of which, it is believed, useful practical results may be derived. Considered as a whole, the established weights and measures of England are but the ruins of a system, the decays of which have been often repaired with materials adapted neither to the proportions nor to the principles of the original construction. The metrology of France is a new and complicated machine, formed upon principles of mathematical precision, the adaptation of which to the uses for which it was devised is yet problematical, and abiding, with questionable success, the test of experiment.

The standard of nature of the English system is the length of the human foot divided by the barleycorn. That of the French system is an aliquot part of the circumference of the earth decimally divided.

The material positive standard of the English system is an iron three foot rod in the British exchequer. That of France is a platina metre in the national archives.

To the English system belong two different units of weight, and two corresponding measures of capacity, the natural standard of which is the difference between the specific gravities of wheat and wine. To the French system there is only one unit of weight and one measure of capacity, the natural standard of which is the specific gravity of water.

The French system has the advantage of unity in the weight and the measure, but has no common test of both. Its measure gives the weight only of water. The English system has the inconvenience of two weights and two measures; but each measure is at the same time a weight. Thus, the gallon of wheat and the gallon of wine, though of different dimensions, balance each other as weights. A gallon of wheat and a gallon of wine, each, weigh eight pounds avoirdupois. This observation applies, however, only to the original principle of the English system, and not altogether to its present condition. The difference between the specific gravity of wheat and wine is still the difference between the troy and avoirdupois weights, but not between the wine and corn gallons. A third vessel of capacity, for which neither the necessity nor the use is perceived, has usurped the place of the corn gallon; and it has been shown how it was introduced. The acts of Parliament prescribing the dimensions of the bushel and of the wine gallon in cubic inches have assumed them from existing standards or erroneous calculations; and the proportions between the measures of corn and of wine, which belonged originally to the system, are now transferred to those of wine and beer, for which if the reason was that beer being a home made liquor and wine a foreign production, beer a comfort of the poor, and wine a luxury of the rich, the former ought to be dealt out in larger portions, and more lightly touched with taxation; it proceeded from the best motives of political morality, but which might have been as well accomplished by reducing the tax as by enlarging the measure. As vessels of capacity for fluids, there can be no useful reason for different measure, except the proportion of specific gravities.

In the English system, the smaller of the two weights was originally also identical with the coin; a pound of weight was a pound sterling in silver money. But this property it has irrecoverably lost.

In the French system, the weight is not a coin, but the metallic coins are weights. Gold, silver, mixed metal, and copper are all coined in proportions of weight and relative value prescribed by law.

In our monetary system, we have discarded the last trace of identity between weights and coins, by ceasing to apply to money the name of pound or penny. Our coins are of prescribed weight and purity, but in no convenient or uniform proportions to each other.

In the English system, the two weights are standards of verification to each other; the two pounds being in the proportion to each other of 144 to 175, and the pound avoirdupois being of 7,000 grains troy. For quantities amounting to one-fourth of a hundred pounds, or more, the English avoirdupois weight requires an accession of 12 per cent.; 28 pounds pass for 25, 56 for 50, and 112 for 100. The original motive for this must have been the convenience of dividing the hundred into halves, quarters, eighths, and sixteenths, without making fractions of a pound. The true hundred can thus be divided into no whole number less than a quarter, or 25.

In the English system, the standard linear measure is connected with the weights by the specific gravity of spring water, of which a measure of one cubic foot contains 1,000 ounces avoirdupois.

In the French system, the standard linear measure is connected with the weight and the measure of capacity, by the specific gravity of distilled water at its greatest density; one cubic decimetre of such water being the weight of the kilogramme, and filling the measure of the litre.

In the English system, every weight and every measure is divided by different and seemingly arbitrary numbers; the foot into twelve inches; the inch, by law, into three barleycorns; in practice, sometimes into halves, quarters, and eighths, sometimes into decimal parts, and sometimes into twelve lines; the pound avoirdupois into sixteen ounces, and the pound troy into twelve: so that while the pound avoirdupois is heavier, its ounce is lighter than those of the troy weight. The ton, in the English system, is both a weight and a measure. As a measure, it is divided into four quarters, the quarter into eight bushels, the bushel into four pecks, &c. As a weight, it is divided into twenty hundreds, of 112 pounds, or 2,240 pounds avoirdupois. The gallon is divided into four quarts, the quart into two pints, and the pint into four gills.

In the French system, decimal divisions were prescribed by law exclusively. The binary division was allowed, as being compatible with it: but all others were rigorously excluded; no thirds, no fourths, no sixths, no eighths, or twelfths. But this part of the system has been abandoned, and the people are now allowed all the ancient varieties of multiplication and division, which are still further complicated by the decimal proportions of the law.

The nomenclature of the English system is full of confusion and absurdity, chiefly arising from the use of the same names to signify different things: the term *pound* to signify two different weights, a money of account, and a coin; the gallon and quart to signify three different measures; and other improper denominations constantly opening avenues to fraud.

The French nomenclature possesses uniformity in perfection, every word expressing the unit weight or measure which it represents, or the particular multiple or division of it. No two words express the same thing; no two things are signified by the same word.

If, with a view to fixing the standard of weights and measures for the United States, upon the principles of the most extensive uniformity, the question before Congress should be upon the alternative either to adhere to the system which we possess, or to adopt that of France in its stead, the first position which occurs as unquestionable is—that change, being itself diversity, and therefore the opposite of uniformity, cannot be a means of obtaining it, unless some great and transcendent superiority should demonstrably belong to the new system to be adopted over the old one to be relinquished.

In what, then, does the superiority of the French system, in all its novelty and freshness, over that of England, in all its decays, theoretically consist?

1. In an invariable standard of linear measure, taken from nature, and being an aliquot decimal portion of the quarter of the meridian.

2. In having a single unit of all weights, and a single unit of measures of capacity for all substances, liquid or dry.

3. In the universal application of the decimal arithmetic to the multiples and divisions of all weights and measures.

4. In the convenient proportions by which the coins and moneys of account are adjusted to each other and to the weights.

5. In the uniformity, precision, and significancy of the nomenclature.

1. If the project of reforming weights and measures had extended, as was proposed by the French system, to the operations of astronomy, geography, and navigation; if the quadrant of the circle and of the sphere had been

divided into one hundred degrees, each of one hundred thousand metres, the assumption of that measure would have been an advantage much more important than it is, or can be, in the present condition of the system. Whether it would have compensated for disturbing that uniformity which exists, and which has invariably existed, of the division into ninety degrees, with sexagesimal subdivisions of minutes and seconds, is merely matter of speculation; at least, it has been found impracticable, even in France, to carry it into effect; and, without it, the metre, as the natural standard of the system, has no sensible advantage over the foot. To a perfect system of uniformity for all weights and measures, an aliquot part of the circumference of the earth is not only a better natural standard unit than the pendulum or the foot, but it is the only one that could be assumed. Every voyage round the earth is an actual mensuration of its circumference. All navigation is admeasurement: and no perfect theory of weights and measures could be devised, combining in it the principle of decimal computation, of which any other natural standard whatever could accomplish the purpose. Its advantages over the pendulum are palpable. The pendulum bears no proportion to the circumference of the earth, and cannot serve as a standard unit for measuring it. Yet a system of weights and measures, which excludes all geography, astronomy, and navigation from its consideration, must be essentially defective in the principle of uniformity.

But if the metre and its decimal divisions are not to be applied to those operations of man for which it is most especially adapted; if those who circumnavigate the globe, in fact, are to make no use of it, and to have no concern in its proportions; if their measures are still to be the nonagesimal degree, the marine league, the toise, and the foot, it is surely of little consequence to the farmer who needs a measure for his corn, to the mechanic who builds a house, or to the townsman who buys a pound of meat or a bottle of wine, to know that the weight or the measure which he employs was standarded by the circumference of the globe. For all the uses of weights and measures, in their ordinary application to agriculture, traffic, and the mechanic arts, it is perfectly immaterial what the natural standard to which they are referrible was. The foot of Hercules, the arm of Henry I., and the barleycorn, are as sufficient for the purpose as the pendulum, or the quadrant of the meridian. The important question to them is, the correspondence of their weight or measure with the positive standard. With the standard of nature, from which it is taken, they have no concern, unless they can recur to it as a test of verification. However imperfect for this end the human foot, or the kernel of wheat or barley, may be, they are at least easily accessible. It is a great and important defect of the systems which assume the meridian or the pendulum for their natural standard, that they never can be recurred to without scientific operations.

This is one great advantage which a natural standard, taken from the dimensions and proportions of the human body, has over all others. We are, perhaps, not aware how often every individual, whose concerns in life require the constant use of long measures, makes his own person his natural standard, nor how habitually he recurs to it. But the habits of every individual inure him to the comparison of the definite portion of his person, with the existing standard measures to which he is accustomed. There are few English men or women but could give a yard, foot, or inch measure, from their own arms, hands, or fingers, with great accuracy; but they could not give the metre or decimetre, although they should know their dimensions as well as those of the yard and foot. When the Russian general Suwarrow, in his Discourses under the Trigger, said to his troops "a soldier's step is an arsheen," he gave every man in the Russian army the natural standard of the long measure of his country. No Russian soldier could ever afterwards be at a loss for an arsheen. But, although it is precisely twenty-eight English inches, being otherwise divided, a Russian soldier would not, without calculation, be able to tell the length of an English yard or inch.

Should the metre be substituted as the standard of our weights and measures, instead of the foot and inch, the natural standard which every man carries with him in his own person would be taken away; and the inconvenience of the want of it would be so sensibly felt, that it would be as soon as possible adapted to the new measures: every man would find the proportions in his own body corresponding to the metre, decimetre, and centimetre, and habituate himself to them as well as he could. If this conjecture be correct, is it not a reason for adhering to that system which was founded upon those proportions, rather than resort to another, which, after all, will bring us back to the standard of nature in ourselves?

2. The advantage of having a single unit of all weights and a single unit of measures of capacity is so fascinating to a superficial view, that it would almost seem presumption to raise a question whether it be so great as at first sight it appears. The relative value of all the articles which are bought and sold by measures of capacity is a complicated estimate of their specific gravity and of the space which they occupy. If both these properties are ascertained by one instrument for any one article, it cannot be applied with the same effect to another. Thus the litre, in the French system, is a measure for all grains and all liquids; but its capacity gives a weight only for distilled water. As a measure of corn, of wine, or of oil, it gives the space which they occupy, but not their weight. Now, as the weight of those articles is quite as important in the estimate of their quantities as the space which they fill, a system which has two standard units for measures of capacity, but of which each measure gives the same weight of the respective articles, is quite as uniform as that which of any given article requires two instruments to show its quantity—one to measure the space it fills, and another for its weight. It has been observed that nature, in the relations which she has established between man and the earth upon which he dwells, and in providing for the wants resulting to him from these relations, offers him in his own person two natural standards even of linear measure—one for the range of his own movements upon the earth, and the other for articles loosened from the earth, and which are adapted to the immediate wants of his person. He finds by experience that these may with increased convenience be reduced to one. It is not exactly so with weights or measures of capacity. From the moment when man becomes a tiller of the ground, and civil society is organized; from the moment when the mutual exchange between the wants of one and the superfluities of another commences, measures of capacity and weights are necessary to the operation. The use of metals, as common standards of value, is of later origin, and, when first applied to that purpose, they are always delivered by weight. The first and most important article of traffic is corn, the first necessary of life; wine and oil successively come next; milk and honey follow. For all these, weights and measures of capacity are indispensable. When the metals are first used as common instruments of exchange, the proportions of their qualities are estimated by their weight. But that weight could not be ascertained by itself. The metal being in one scale, there must be something else to balance it in the other; and that other substance, first of all, would, whenever it should have come into use for food, be corn. It might next be wine. But thus compared, it would immediately be seen that the vessel containing of wine a counterpoise to the given metallic weight, would not contain a counterpoise of wheat to the same weight: and what could more naturally suggest itself than the device to bring to the scales the wheat in a measure to balance the weight, and the wine in a measure to produce the same effect? The metallic weight would then become the common standard for both, but would neither be the same weight by which its own gravity had been ascertained, nor a substitute for it. Thus, the operation of weighing implies in its nature the use of two articles, each of which is the standard testing the gravity of the other. And in the difference between the specific gravities of corn and wine, nature has also dictated two standard measures of capacity, each of them equiponderant to the same weight.

This diversity existing in nature, the troy and avoirdupois weights, and the corn and wine measures of the English system, are founded upon it. In England it has existed as long as any recorded existence of man upon the island. But the system did not originate there; neither was Charlemagne the author of it. The weights and measures of Rome and of Greece were founded upon it. The Romans had the *mina* and the *libra*, the nummulary pound of 12 ounces, and the commercial pound of 16. And the Greeks, as well as the Romans, had a weight for small and precious, and a weight for bulky and cheap commodities. The Greeks denominated them by significant terms—*the weight for measure*, and *the weight for money*. Whether the ounce, of which these pounds were composed, was the same, is a subject of much controversy, but of little importance to decide. At the period of the lower empire, these two weights were known by the name of the *eastern* and *western* pound. And the denomination of the former was the same in England: it was the *easterling* pound, and the origin of the term *sterling* in the English language: it was the pound of the eastern nations, by which Europe was overrun in the decline of the Roman empire. The avoirdupois pound had the same origin; for it came through the Romans from the Greeks, and through them, in all probability, from Egypt. Of this there is internal evidence in the weights themselves, and in the remarkable coincidence between the cubic foot and the thousand ounces avoirdupois, and between the ounce avoirdupois and the Jewish silver shekel. The Greek foot was, within a fraction of less than the hundredth part of an inch, the same with that of England. The ounce avoirdupois is the same with the Roman and Attic ounce, and the exact double of the Jewish shekel. The Silian plebiscitum, or ordinance of the Roman people of the year 509, two hundred and fifty years before the Christian era, declares that a quadrantal of wine shall be 80 pounds, a congius of wine 10 pounds; that 6 sextarii make a congius of wine, 48 sextarii a quadrantal of wine; that the sextarius of liquid and dry measures should be the same; and that 16 pounds make the modius. The congius was the Roman gallon, and the modius the Roman peck. The quadrantal was the same as the amphora, and was formed from the cubic foot of water, so that eighty pounds of wine were equal to a cubic foot of water.

The same combinations are traced with equal certainty to the Greeks and Egyptians; and, if the shekel of Abraham was the same as that of his descendants, the avoirdupois ounce may, like the cubit, have originated before the flood.

This diversity is therefore founded in the nature of things, and may be stated by the following rule: that, whatever is sold *by* weight, in *measure*, must have a measure for itself which will serve for no other article of different specific gravity; and as wheat and wine are both articles of that description, as their specific gravities are very materially different, although they are very suituable to be weighed by the same weight, they yet require different measures to place them in equipoise with that weight. The difference of specific gravity between the vinous and watery fluids is so slight, that neither in the Greek, the Roman, nor the English system was there any account taken of it. But, with regard to oil, it appears that the Greeks had a separate measure adapted to its specific gravity, which they considered as being in proportion to that of wine or water as 9 to 10.

Notwithstanding, therefore, the first appearance of superior uniformity and simplicity presented by the single unit of weights and single measures of capacity in the new system of France, it appears to be more conformable to the order of nature, and more subservient to the purposes of man, that there should be two scales of weight and two measures of capacity, graduated upon the respective specific gravities of wheat and wine, than with a single weight and a single measure, to be destitute of any indication of weight in the measure.

This conclusion has been confirmed by a very striking fact which has occurred in France under the new system. By an ordinance of police, approved on the 6th of December, 1808, by the Minister of the Interior, it is prescribed that the sale of oil in Paris by retail shall be *by* weight, in measures containing five hectogrammes, one double hectogramme, one hectogramme, &c. And these measures, being cylinders of tin, are stamped with initial letters, indicating that one is for sweet oil and the other for lamp oil. So that here are two new measures of capacity altogether incongruous to the new system, each differing in cubic dimensions from the other, though to measure the single article of oil, and both differing from the litre. They attach themselves, indeed, to the new system by *weight*, but abandon entirely its pretensions to unity of measure, and fall at once into the principle of the old system of adapting the measure to the weight.

By the usages of modern times, the weight of wine is of little or no consideration. Its first admeasurement is in casks of different dimensions in different places, and which cannot be made uniform unless by a system of metrology common to many nations. It is sold wholesale by the cask or hogshead, the contents of which are ascertained by mechanical gauging instruments adapted to the smaller measures of capacity of the country where it is to be consumed. These instruments give the solid contents of the vessel, and the number of the standard measures of the country which it contains. The gauging rods used in England and the United States give the contents in cubic inches and wine gallons. As a test of the quantity of wine contained in the cask, this mode of admeasurement is less certain and effectual than weight, especially if the cask is not full; but being more convenient and easy of application, and specially adapted to the legal measure of the gallon in cubic inches, it has superseded altogether the use of weights as proofs of the quantity of wine. By retail, the article is sold either in the gallon measures fixed by law at 231 cubic inches, or in bottles of no definite measure, but containing an approximation to a quart or pint.

Our system of weights and measures, by the substitution of the wine gallon of 231 for that of 224 cubic inches, has lost the advantage which it originally possessed of testing the accuracy of a wine measure by its weight. The average specific gravity of wine is of 250 grains troy weight to a cubic inch; four inches, therefore, make 1,000 grains, and twenty-eight inches a pint, weighing one pound avoirdupois. These coincidences would be of great utility and convenience, and would be rendered still more so by another, which is, that this number of 224 inches is the exact decimal part of 2,240, the number of pounds avoirdupois that go to a ton. As it now exists, therefore, the measure of the gallon of wine does not show its weight; and the unity of the measure of capacity in the French system is an advantage not compensated by any benefit derived from the different dimensions of our corn and wine gallons.

Our country is not as yet a land of vineyards. We have no "flowery dales of Sibma, clad with vines." Wine is an article of importation; an article of luxury, in a great measure confined to the consumption of the rich. Its distribution in measure, and the exactness of the measure by which it is distributed, is not an incident which every day comes home to the interests and necessities of every individual. We have less reason for regretting, therefore, the loss of a measure which would prove its integrity by its weight; and more reason for preferring the uniformity of singleness in the French system of capacious measures to the uniformity of proportion which belonged originally to the English. That proportion itself we have lost by the establishment of a wine gallon of 231, and a corn bushel of 2,150 cubic inches; and although it exists in the troy and avoirdupois weights, and in the wine and beer gallons, it exists to none of the useful purposes for which it was originally intended, and to which in former days it was turned.

The consumption of wine in modern times is exceedingly diminished, not only by the substitution of beer and of spirits distilled from grain in the countries where the vine is not cultivated, but by the use, now become univer-

sal, of decoctions from aromatic herbs and berries. Tea and coffee were potations unknown to the European world until within these two centuries; and they have probably diminished by one-half the consumption of wine throughout the world.

The measures by which solid and liquid substances are sold, are not, and cannot conveniently be, the same. The form and the substance of the vessels in which they are kept are altogether different. Grain is usually kept in bags, until ground into meal. Liquids, in large quantities, are kept in wooden vessels of peculiar construction, founded upon the properties of fluids and the laws of hydrostatics; in small quantities they are kept in vessels of glass, adapted by their form to the facility of pouring them off without loss. Such vessels are utterly unsuitable for containing grain, or any other solid substance. The forms, both of casks and of bottles, are among the most difficult forms into which cubical extension can be moulded for ascertaining quantity by linear measure. They not only contain the problem, hitherto unsolvible to man, of squaring the circle, but some of the most recondite mysteries of the conic sections. They are neither cylinders, nor ellipses, nor cones, nor spheres, but a combination of all these forms. Grain may be measured by a cylindrical or a cubical vessel, at pleasure. The cylindrical form is best adapted to convenience; and, by the known proportion of the diameter to the circle, its solid contents in linear measure may be ascertained with sufficient accuracy and little difficulty. Grain cannot be kept in vessels with large bodies, long necks, and narrow mouths. Liquids can be well kept for preservation in no other. Grain is a swiftly perishable substance, which must generally be consumed within a year from its growth; wines and spirituous liquors, in general, may be kept many years, and the vessels in which they are kept must be of forms and substances calculated to guard against loss by evaporation, fermentation, or transudation. So different, indeed, are all the properties of grain and of all liquids, that, instead of requiring the same measure to indicate their qualities, the call of nature is for different vessels, of different substances, and in different forms. The most certain and convenient test for the accuracy of dry measures is linear measure; that of liquids is *weight*. The sextarius of the Roman system, and the litre of the French, were measures common both to wet and dry substances; but, in applying it, the Romans formed a liquid measure of ten pounds *weight*, and a dry measure of sixteen. The French litre combines both the tests of linear measure and of weight for the single article of distilled water, at a certain temperature of the atmosphere; but it is not the test of weight for any thing else. The hectolitre of wine or of corn is no indication of the weight of either. The sale of wheat, from the nature of the article, must usually be in large quantity, seldom less than a bushel. The unit of the measure declared in Magna Charta is the quarter of a ton, or eight bushels. Wine is an article the sale of which is as frequent in retail as by wholesale. The accuracy of its admeasurement in small quantities is important. In this respect it has an analogy to the precious metals. In fine, the purchase and sale of liquid and dry substances is, by the constitution of human society, not at the same times or places, nor by the same persons. Their difference in the origin is that of the vineyard and the cornfield. They pass thence, respectively, to the wine press and the flour mill; thence to the vintner and the flour merchant, in vessels already adapted to their respective conditions; the corn having undergone a transformation requiring a different measure from that of wheat. Trace them through all their meanderings in the circulation of civil society, till they come to their common ultimate use for the subsistence of man: it will never be found that the same measures are necessary for, or suitable to them. The wheat comes in the shape of meal or of bread, to be measured by weight; and the liquors in casks or bottles, and still in the form given to them by distillation. The distiller and the brewer, who manufacture the liquid from the grain, have occasion for both measures; but the articles come to them in one form, and go from them in the other; nor is there any apparent necessity that they should receive and issue them by the same measure.

There are conveniences in the intercourse of society connected with the use of smaller and more minutely perfect weights and measures of capacity for sales of articles by retail than by wholesale, and for articles of great price, though of small bulk. Thus, drugs, as articles of commerce, and in gross, are sold by the avoirdupois or commercial pound; used as medicines, in minute quantities, and compounded by the apothecary, they are sold by the smaller or nummulary weight. The laws of Pennsylvania authorize innkeepers to sell beer, *within the house*, by the wine measure; but, for that which they send out of the house, require them to use the beer gallon or quart. In both these cases the difference of the measure forms part of the compensation for the labor and skill of the apothecary, and part of the profits necessary to support the establishment of the publican. There is, finally, an important advantage in the establishment of two units of weights and of measures of capacity, by the possession in each of a standard for the verification of the other. It serves as a guard against the loss or destruction of the positive standard of either. The troy and avoirdupois pounds are to each other as 5,760 to 7,000. Should either of these standard pounds be lost, the other would supply the means of restoring it. The same thing might be effected by the measures of beer and of wine. The French system has designated the pendulum as such a standard for the verification of the metre. The English system gives, in each weight and measure, a standard for the other.

The result of these reflections is, that the uniformity of nature for ascertaining the quantities of all substances, both by gravity and by occupied space, is a uniformity of proportion, and not of identity; that, instead of one weight and one measure, it requires two units of each, *proportioned* to each other; and that the original English system of metrology, possessing two such weights and two such measures, is better adapted to the only uniformity applicable to the subject recognised by nature than the new French system, which, possessing only one weight and one measure of capacity, identifies weight and measure only for the single article of distilled water; the English uniformity being relative to the *things* weighed and measured, and the French only to the instruments used for weight and mensuration.

3. The advantages of the English system might, however, be with ease adapted to that of France, but for the exclusive application in the latter of the decimal arithmetic to all its multiples and subdivisions. The decimal numbers applied to the French weights and measures form one of its highest theoretic excellencies. It has, however, been proved, by the most decisive experience in France, that they are not adequate to the wants of man in society; and, for all the purposes of retail trade, they have been formally abandoned. The convenience of decimal arithmetic is, in its nature, merely a convenience of calculation. It belongs essentially to the keeping of accounts, but is merely an incident to the transactions of trade. It is applied, therefore, with unquestionable advantage to moneys of account, as we have done; yet, even in our application of it to the *coins*, we have not only found it inadequate, but, in some respects, inconvenient. The divisions of the Spanish dollar, as a coin, are not only into tenths, but into halves, quarters, fifths, eighths, sixteenths, and twentieths. We have the halves, quarters, and twentieths, and might have the fifths; but the eighth makes a fraction of the cent, and the sixteenth even a fraction of a mill. These eighths and sixteenths form a very considerable proportion of our metallic currency; and, although the eighth, dividing the cent only into halves, adapts itself without inconvenience to the system, the fraction of the sixteenth is not so tractable; and, in its circulation as small change, it passes for six cents, though its value is six and a quarter, and there is a loss by its circulation of four per cent. between the buyer and the seller. For all the transactions of retail trade, the eighth and sixteenth of a dollar are among the most useful and convenient of our coins; and, although we have never coined them ourselves, we should have felt the want of them if they had not been supplied to us from the coinage of Spain.

This illustration, from our own experience of the modification with which decimal arithmetic is adaptable even to money, its most intimate and congenial natural relative, will disclose to our view the causes which limit the exclusive application of decimal arithmetic to *numbers*, and admit only a partial and qualified application of them to weight or measure.

It has already been remarked that the only apparent advantage of substituting an aliquot part of the circumference of the earth, instead of a definite portion of the human body, for the natural unit of linear measure, is, that it forms a basis for a system embracing *all* the objects of human mensuration; and that its usefulness depends upon its application to geography and astronomy, and particularly to the division of the quadrant of the meridian into centesimal degrees. In the novelty of the system, this was attempted in France, as well as the decimal divisions of time, and of the rhumbs of the wind. A French navigator, suffering practically under the attempt thus to navigate decimally the ocean, recommended to the National Assembly to decree that the earth should perform four hundred revolutions in a year. The application of decimal divisions to time, the circle, and the sphere, is abandoned even in France; and, for all the ordinary purposes of mensuration excepting itinerary measure, the metre is too long for a standard unit of nature. It was a unit most especially inconvenient as a substitute for the foot—a measure to which, with trifling variations of length, all the European nations and their descendants were accustomed. The foot rule has a property very important to all the mechanical professions which have constant occasion for its use—it is light, and easily portable about the person. The metre, very suitable for a staff, or for measuring any portion of the earth, has not the property of being portable about the person; and for all the professions concerned in ship or house building, and for all who have occasion to use mathematical instruments, it is quite unsuitable. It serves perfectly well as a substitute for the yard or ell, the fathom or perch, but not for the *foot*. This inconvenience, great in itself, is made irreparable when combined with the exclusive principle of decimal divisions. The union of the metre and of decimal arithmetic rejected all compromise with the foot. There was no legitimate extension of matter intermediate between the ell and the palm, between forty inches and four. This decimal despotism was found too arbitrary for endurance. Not only the foot, but its duodecimal divisions, were found to be no arbitrary or capricious institutions, but founded in the nature of the relations between man and things. The duodecimal division gives equal aliquot parts of the unit of two, three, four, and six. By giving the third and the fourth, it indirectly gives the eighth and sixteenth, and gives facility for ascertaining the ninth, or third of the third. Decimal division, in giving the half, does not even give the quarter but by multiplication of the subdivisions. It is incommensurable with the *third*, which unfortunately happened to be the foot, the universal standard unit of the old metrology. The choice of the kilogramme, or cubical decimetre, of distilled water as the single standard unit of weights, with the application to it of the decimal divisions, was followed by similar inconveniences. The pound weight should be a specific gravity, easily portable about the person, not only for the convenience of using it as an instrument, but as the measure of quantities to be carried. To the common mass of people, the use of weights is in the market or the shop. The article weighed is to be carried home. It is an article of food for the daily subsistence of the individual or his family. As he has not the means of purchasing it in large quantities, it must often be sold in quantities represented by the pound weight, which, like the foot rule, with various modifications, is universally used throughout the European world. Subdivisions of that weight, the half and the quarter of a pound, are often necessary to conciliate the wants and the means of the neediest portion of the people—that portion to whom the *justice* of weight and measure is a necessary of life, and to whom it is one of the most sacred duties of the legislator to secure that justice, so far as it can be secured by the operation of human institutions. The half of the kilogramme was nearly equivalent to the ancient Paris pound; but there was in the new system no half or quarter of a pound, because there was no quarter or eighth of a kilogramme. There was no intermediate weight between the pound or half-kilogramme and the hectogramme, which was a fifth part of a pound.

The *litre*, or unit of measures of capacity in the new system, had one great advantage over the linear and weight units, by its near equivalence to the old Paris pint, of which it was to take the place; but, on the other hand, decimal divisions are still more inapplicable to measures of capacity for liquids than to linear measures or weights. The substance in nature best suited for a retail measure of liquids is tin, and the best form in which the measure can be moulded is a slight approach from the cylinder to the cone. Our quart and gallon wine and beer measures are accordingly of that form, as are all the most ordinary vessels used for drinking. In the new French system, the form of all the measures of capacity is cylindrical, and the litre is a measure the diameter of which is half its depth; it is, therefore, easily divisible into halves, quarters, and eighths; for it needs only thus to divide the depth, retaining the same diameter; but all conveniences of proportion are lost by taking one-tenth of the depth and retaining the same diameter; and if the diameter be reduced, there is no means other than complicated calculation, squarings of the circle, and extractions of cube roots, that will give one liquid measure which shall be the tenth part of another.

In the promiscuous use of the old weights and measures and the new, which was unavoidable in the transition from the one to the other, the approximation to each other of the quarter and the fifth parts of the unit became a frequent source of the most pernicious frauds—frauds upon the scanty pittance of the poor. The small dealers in groceries and liquors, and marketmen, gave the people the fifth of a kilogramme for a half-pound, and the fifth of the litre for a half-setier. The most easy and natural divisions of liquids are in continual halvings; and the Paris pint was thus divided into halves, quarters, eighths, sixteenths, and thirty-second parts, by the names of chopines, half-setiers, possons, half-possons, and roquilles. The half-setier (just equivalent to our half-pint) was the measure in most common use for supplying the daily necessities of the poor, and thus the decimal divisions of the law became snares to the honesty of the seller, and cheats upon the wants of the buyer.

Thus, then, it has been proved, by the test of experience, that the principle of decimal divisions can be applied only with many qualifications to any general system of metrology; that its natural application is only to numbers; and that time, space, gravity, and extension inflexibly reject its sway. The new metrology of France, after trying it, in its most universal theoretical application, has been compelled to renounce it for all the measures of astronomy, geography, navigation, time, the circle, and the sphere; to modify it even for superficial and cubical linear measure; and to compound with vulgar fractions in the most ordinary and daily uses of all its weights and all its measures. It has restored the foot, the pound, and the pint, with all their old subdivisions, though not exactly with their old dimensions. The foot, with its duodecimal divisions into thumbs and lines, returns in the form the most irreconcilable possible with the decimals of the metre; for it comes in the proportion of 3 to 10, and consists of $333\frac{1}{3}$ millimetres. This indulgence to linear measure is without qualification, and may be used in all commerce, whether of wholesale or retail. The restoration of the pound, the boisseau,* and the pint, is limited to

* One of the most abundant sources of error and confusion in relation to weights and measures arises from mistranslation of those of one country into the language of another. Thus, to call the *pinte* of Paris a pint, is to give an incorrect idea of its contents. The Paris pinte corresponded with our wine quart, containing 46.95 French, or 58.08 English cubic inches. To call the boisseau a *bushel*, is a still greater incongruity between the word and the idea connected with it. The *boisseau* contained 655 French cubic inches, and was less than $1\frac{1}{2}$ peck English. The minot, or three boisseaus, was the measure corresponding with the English bushel.

retail trade. The fractions of the pound are as averse to decimal combinations as those of the foot. The eighth of a pound, for instance, is 625 decigrammes, each of about $1\frac{1}{2}$ grain troy weight. The half of this eighth is an *ounce*, to form which, decimally, requires a recourse to another fractional stage, and to say 31.25 milligrammes. But the milligramme, being equivalent to less than $\frac{1}{6}$ of a grain troy weight, is too minute for accurate application; so that it is called and marked upon the weight itself as 31.3 decigrammes. The half ounce, instead of 15.625 decimilligrammes, is marked for 15.6 decigrammes. The quarter of an ounce, instead of 7.8125, passes for 7.8 decigrammes; and the gros, or groat, instead of 3.90625, is abridged to 3.9. The ounce and all the smaller weights, therefore, reject the coalition of subdivision by decimal and vulgar fractions; and the weights for account are different from the weights for trade.

From the verdict of experience, therefore, it is doubtful whether the advantage to be obtained by any attempt to apply decimal arithmetic to weights and measures would ever compensate for the increase of diversity which is the unavoidable consequence of change. Decimal arithmetic is a contrivance of man for computing numbers, and not a property of time, space, or matter. Nature has no partialities for the number 10; and the attempt to shackle her freedom with them will forever prove abortive.

The imperial decree of March, 1812, by the reservation of a purpose to revise the whole system of the new metrology, after a further interval of ten years of experience, seems to indicate a doubt whether the system itself can be maintained. Ten years from 1812 was a period far beyond that which Providence had allotted to the continuance of the Imperial Government itself. The Royal Government of France which has since succeeded has hitherto made no change in the system. Whether, at the expiration of the ten years limited in the decree, the proposed revisal of it will be accomplished by the present Government, is not ascertained. In the mean time, the whole system must be considered as an experiment upon trial even in France; and should it ultimately prove by its fruits worthy of the adoption of other nations, it will at least be expedient to postpone engrafting the scion until the character of the tree shall have been tested in its native soil by its fruits.

4. The fourth advantage of the French metrology over that which we possess consists in the convenient proportions by which the coins and moneys of account are adjusted to each other and to the weights.

This is believed to be a great and solid advantage, not possessed exclusively by the French system; for it was, in high perfection, a part of the original English system of weights and measures, as has already been shown. It was more perfect in that system, because the silver coins and weights were not merely proportioned to each other, but the *same*. This is not the case with the French coins: and even their *proportions* to the weights are disturbed and unhinged by the mint allowance, or what they call toleration of inaccuracy, both of weight and alloy. This toleration, which is also technically called the *remedy*, ought everywhere to be exploded. It is in no case necessary. The toleration is injustice; the remedy is disease. If it were the duty of this report to present a system of weights, measures, and coins, all referrible to a single standard, combining with it as far as possible the decimal arithmetic, and of which uniformity should be the pervading principle, without regard to existing usages, it would propose a silver coin of nine parts pure and one of alloy, of thickness equal to one-tenth part of its diameter; the diameter to be one-tenth part of a foot, and the foot one-fourth part of the French metre. This dollar should be the unit of weights as well as of coins and of accounts; and all its divisions and multiples should be decimal. The unit of measures of capacity should be a vessel containing the weight of ten dollars of distilled water at the temperature of ten degrees of the centigrade thermometer; and the cubical dimensions of this vessel should be ascertained by the weight of its contents; the decimal arithmetic should apply to its weight, and convenient vulgar fractions to its cubical measure. This system once established, the standard weight and purity of the coin should be made an article of the constitution, and declared unalterable by the Legislature. The advantage of such a system would be to embrace and establish a principle of uniformity with reference to time, which the French metrology does not possess. The weight would be a perpetual guard upon the purity and value of the coin. No second weight would be necessary or desirable. The coin and the weight would be mutual standards for each other; accessible at all times to every individual. Should the effect of such a system only be, as its tendency certainly would be, to deprive the legislative authority of the power to debase the coins, it would cut up by the roots one of the most pernicious practices that ever afflicted man in civil society. By its connexion of the linear standard with the French metre, it would possess all the advantages of having that for a unit of its measures of length, and a link of the most useful uniformity with the whole French metrology.

But the consideration of the coins is beyond the scope of the resolutions of the two Houses; nor is their relation to the weights and measures of the country viewed by the constitution and laws of the United States as that of parts of one entire system. Excepting the application of decimal divisions to our money of account, and the establishment of the dollar as the unit both of the money of account and of the silver coins, our moneys have no uniform or convenient adjustment to our weights. The proportion of alloy is not the same in our coins of silver as in those of gold; and the only connexion between our monetary system and our weights and measures is, that the gravity and proportional purity of the coins are prescribed in troy weight grains. To obtain, therefore, the advantage existing in the French metrology, of easy proportions between the weights and coins, or the still greater advantage of identity between them which belonged to the old English system, an entire change would be necessary in the fabrication of our coins and in our moneys of account. It is at least extremely doubtful whether the benefits to be derived from such a change would be equivalent to the difficulties of achieving it, and the hazard of failing in the attempt.

5. The last superior advantage of the French metrology is, the *uniformity*, precision, and significancy of its nomenclature.

In mere speculative theory, so great and unequivocal is this advantage, that it would furnish one of the most powerful arguments for adopting the whole system to which it belongs. In every system of weights and measures, ancient or modern, with which we are acquainted, until the new system of France, the poverty and imperfection of language has entangled the subject in a snarl of inextricable confusion. The original *names* of all the units of weights and measures have been improper applications of the substances from which they were derived. Thus, the foot, the palm, the span, the digit, the thumb, and the nail, have been, as measures, improperly so called, for the several parts of the human body with the length of which they corresponded. Instead of a specific name, the measure usurped that of the standard from which it was taken. Had the foot rule been unalterable, the inconvenience of its improper appellation might have been slight. But, in the lapse of ages, and the revolutions of empires, the foot measure has been everywhere retained, but infinitely varied in its extent. Every nation of modern Europe has a foot measure, no two of which are the same. The English foot, indeed, was adopted and established in Russia by Peter the Great; but the original Russian foot was not the same. The Hebrew shekel and maneh, the Greek mina, and the Roman pondo, were *weights*. The general name *weight* improperly applied to the specific unit of weight. The Latin word *libra*, still more improperly, was borrowed from the balance in which it was employed; libra was the balance, and at the same time the pound weight. The terms *weight* and *balance* were thus generic terms, without specific meaning. They signified any weight in the balance, and varied according to the varying gravities of the specific standard unit at different times and in different countries. When,

by the debasement of the coins, they ceased to be identical with the weights, they still retained their names. The *pound* sterling retains its name three centuries after it has ceased to exist as a weight, and after having, as money, lost more than two-thirds of its substance. We have discarded it, indeed, from our vocabulary; but it is still the unit of moneys of account in England. The *livre* tournois of France, after still greater degeneracy, continued until the late Revolution, and has only been laid aside for the new system. The ounce, the drachm, and the grain are specific names, indefinitely applied as indefinite parts of an indefinite whole. The English pound avoirdupois is heavier than the pound troy; but the ounce avoirdupois is lighter than the ounce troy. The weights and measures of all the old systems present the perpetual paradox of a whole not equal to all its parts. Even numbers lose the definite character which is essential to their nature. A dozen become sixteen, twenty-eight signify twenty-five, one hundred and twelve mean a hundred. The indiscriminate application of the same generic term to different specific things, and the misapplication of one specific term to another specific thing, universally pervade all the old systems, and are the inexhaustible fountains of diversity, confusion, and fraud. In the vocabulary of the French system, there is one specific, definite, significant word, to denote the unit of lineal measure; one for superficial, and one for solid measure; one for the unit of measures of capacity, and one for the unit of weights. The word is exclusively appropriated to the thing, and the thing to the word. The metre is a definite measure of length; it is nothing else. It cannot be a measure of one length in one country, and of another length in another. The gramme is a specific weight, and the litre a vessel of specific cubic contents, containing a specific weight of water. The multiples of these units are denoted by prefixing to them syllables derived from the Greek language, significant of their increase in decimal proportions. Thus, ten metres form a deca-metre; ten grammes, a deca-gramme; ten litres, a deca-litre. The subdivisions or decimal fractions of the unit are equally significant in their denominations, the prefixed syllables being derived from the Latin language. The deci-metre is a tenth part of a metre; the deci-gramme, the tenth part of a gramme; the deci-litre, the tenth part of a litre. Thus, in continued multiplication, the hecto-metre is a hundred, the kilo-metre a thousand, and the myrio-metre ten thousand metres; while, in continued division, the centi-metre is the hundredth, and the milli-metre the thousandth part of the metre. The same prefixed syllables apply equally to the multiples and divisions of the weight, and of all the other measures. Four of the prefixes for multiplication, and three for division, are all that the system requires. These twelve words, with the *franc*, the *decime*, and the *centime* of the coins, contain the whole system of French metrology, and a complete language of weights, measures, and money.

But where is the steam engine of moral power to stem the stubborn tide of prejudice, and the headlong current of inveterate usage? The cheerful, ready, and immediate adoption, by the mass of the nation, of these twelve words, would have secured the triumph of the new system of France. The unutterable confusion of signifying the same thing by different words, and different things by the same word, would have ceased. The *setier* would no longer have been a common representative for twelve boisseaus of corn, for fourteen of oats, for sixteen of salt, and for thirty-two of coal, and for eight pints of wine. The pound would no longer have been of ten, of twelve, of fourteen, of sixteen, and of eighteen ounces in different parts of the same country. The weights and the measures would have been both perfect and just; and the blessing of uniformity enjoyed by France would have been the most effective recommendation of her system to all the rest of mankind. It is mortifying to the philanthropy which yearns for the improvement of the condition of man to know that this is precisely the part of the system which it has been found impracticable to carry through.

The modern language of all the mathematical and physical sciences is derived from the Greek and Latin, with a partial exception of some terms which are of Arabic origin. Geography, chemistry, the pure mathematics, botany, mineralogy, zoology, in all of which great discoveries have been made within the last three centuries, have borrowed from those primitive languages almost invariably the words by which those discoveries have been expressed. They are the languages in which all that was heretofore known of art or science was contained: nor are the moral and political sciences less indebted to them for numerous additions to their vocabularies which the progress of modern improvements has required. But there is a natural aversion in the mass of mankind to the adoption of words to which their lips and ears are not from their infancy accustomed. Hence it is that the use of all technical language is excluded from social conversation, and from all literary composition suited to general reading; from poetry, from oratory, from all the regions of imagination and taste in the world of the human mind. The student of science, in his cabinet, easily familiarizes to his memory, and adopts without repugnance, words indicative of new discoveries or inventions, analogous to the words in the same science already stored in his memory. The artist, at his work, finds no difficulty to receive or use the words appropriate to his own profession. But the general mass of mankind, of every condition, reluct at the use of unaccustomed sounds, and shrink especially from new words of many syllables. But weights and measures are instruments indispensable, not only to the philosophical student and the professional artist; they are the want of every individual and of every day; they are the want of food, of raiment, of shelter, of all the labors and all the pleasures of social existence. Weights and measures, like all the common necessaries of life, have, in all the countries of modern Europe, customary names of one, or at most of two syllables. The units of the new French system have no more; but their multiples and subdivisions have four or five; and, although compounded of syllables familiar to those who had any acquaintance with the classical languages of Greece and Rome, they had a strange and outlandish sound to the ears of the people in general, who would never be taught to pronounce them. Hence, after an experience of several years, it was found necessary, not only to give back to the people the vulgar fractions of their measures which had been taken from them, but all their indefinite and many-meaning words of pound and ounce, foot, aune, and thumb, boisseau and pint. Since which time there have been, besides all the relics of the old metrology, two concurrent systems of weights and measures in France: one, the proper legal system, with decimal divisions and multiplications, and the new, precise, and significant nomenclature; and the other, a system of sufferance, with the same instruments, but divided in all the old varieties of vulgar fractions, and with the old improper vocabulary, made still more so by its adaptation to new and different things.

Perhaps it may be found, by more protracted and multiplied experience, that this is the only uniformity attainable by a system of weights and measures for universal use; that the same material instruments shall be divisible decimally for calculations and accounts, but in any other manner suited to convenience in the shops and markets; that their appropriate legal denominations shall be used for computation, and the trivial names for actual weight or mensuration.

It results, however, from this review of the present condition of the French system in its native country, and from the comparison of its theoretical advantages over that which we already possess, that the time has not arrived at which so great and hazardous an experiment can be recommended as that of discarding all our established existing weights and measures, to adopt and legalize those of France in their stead. The single standard, proportional to the circumference of the earth; the singleness of the units for all the various modes of mensuration; the universal application to them of decimal arithmetic; the unbroken chain of connexion between all weights, measures, moneys, and coins; and the precise, significant, short, and complete vocabulary of their denominations, altogether forming a system adapted equally to the use of all mankind, afford such a combination of the principle

of uniformity for all the most important operations of the intercourse of human society. The establishment of such a system so obviously tends to that great result, the improvement of the physical, moral, and intellectual condition of man upon earth, that there can be neither doubt nor hesitation in the opinion that the ultimate adoption and universal though modified application of that system is a consummation devoutly to be wished.

To despair of human improvement is not more congenial to the judgment of sound philosophy than to the temper of brotherly kindness. Uniformity of weights and measures is, and has been for ages, the common, earnest, and anxious pursuit of France, of Great Britain, and, since their independent existence, of the United States. To the attainment of one object common to them all, they have been proceeding by different means, and with different ultimate ends. France alone has proposed a plan suitable to the ends of all; and has invited co-operation for its construction and establishment. The associated pursuit of great objects of common interest is among the most powerful modern expedients for the improvement of man. The principle is at this time in full operation for the abolition of the African slave trade. What reason can be assigned why other objects, of common interest to the whole species, should not be in like manner made the subject of common deliberation and concerted effort? To promote the intercourse of nations with each other, the uniformity of their weights and measures is among the most efficacious agencies; and this uniformity can be effected only by mutual understanding and united energy. A single and universal system can be finally established only by a general convention, to which the principal nations of the world shall be parties, and to which they shall all give their assent. To effect this, would seem to be no difficult achievement. It has one advantage over every plan of moral or political improvement, not excepting the abolition of the slave trade itself: there neither is, nor can be, any great counteracting *interest* to overcome. The conquest to be obtained is merely over prejudices, usages, and perhaps national jealousies. The whole evil to be subdued is diversity of opinion with regard to the means of attaining the same end. To the formation of the French system, the learning and the genius of other nations did co-operate with those of her native sons. The co-operation of Great Britain was invited; and there is no doubt that of the United States would have been accepted had it been offered. The French system embraces all the great and important principles of uniformity which can be applied to weights and measures; but that system is not yet complete. It is susceptible of many modifications and improvements. Considered merely as a labor-saving machine, it is a new power offered to man, incomparably greater than that which he has acquired by the new agency which he has given to steam. It is in design the greatest *invention* of human ingenuity since that of printing. But, like that, and every other useful and complicated invention, it could not be struck out perfect at a heat. Time and experience have already dictated many improvements of its mechanism; and others may, and undoubtedly will, be found necessary for it hereafter. But all the radical principles of uniformity are in the machine; and the more universally it shall be adopted, the more certain will it be of attaining all the perfection which is within the reach of human power.

Another motive, which would seem to facilitate this concert of nations, is, that it conceals no lurking danger to the independence of any of them. It needs no convocation of sovereigns armed with military power. It opens no avenue to partial combinations and intrigues. It can mask, under the vizor of virtue, no project of avarice or ambition. It can disguise no private or perverted ends, under the varnish of generous and benevolent aims. It has no final appeal to physical force—no *ultima ratio* of cannon balls. Its objects are not only pacific in their nature, but can be pursued by no other than peaceable means. Would it not be strange if, while mankind find it so easy to attain uniformity in the use of every engine adapted to their mutual destruction, they should find it impracticable to agree upon the few and simple but indispensable instruments of all their intercourse of peace and friendship and beneficence?—that they should use the same artillery and musketry, and bayonets, and swords, and lances, for the wholesale trade of human slaughter; and that they should refuse to weigh by the same pound, to measure by the same rule, to drink from the same cup; to use, in fine, the same materials for ministering to the wants and contributing to the enjoyments of one another?

These views are presented as leading to the conclusion that, as final and universal uniformity of weights and measures is the common desideratum for all civilized nations; as France has formed, and for her own use has established, a system adapted, by the highest efforts of human science, ingenuity, and skill, to the common purposes of all; as this system is yet new, imperfect, susceptible of great improvements, and struggling for existence even in the country which gave it birth; as its universal establishment would be a universal blessing; and as, if ever effected, it can only be by consent, and not by force, in which the energies of opinion must precede those of legislation; it would be worthy of the dignity of the Congress of the United States to consult the opinions of all the civilized nations with whom they have a friendly intercourse; to ascertain, with the utmost attainable accuracy, the existing state of their respective weights and measures; to take up and pursue, with steady, persevering, but always temperate and discreet exertions, the idea conceived, and thus far executed, by France, and to co-operate with her to the final and universal establishment of her system.

But although it is respectfully proposed that Congress should immediately sanction this consultation, and that it should commence, in the first instance, with Great Britain and France, it is not expected that it will be attended with immediate success. Ardent as the pursuit of uniformity has been for ages in England, the idea of extending it beyond the British dominions has hitherto received but little countenance there. The operation of changes of opinion there is slow; the aversion to all innovations, deep. More than 200 years had elapsed from the Gregorian reformation of the calendar before it was adopted in England. It is to this day still rejected throughout the Russian empire. It is not even intended to propose the adoption by ourselves of the French metrology for the present. The reasons have been given for believing that the time is not yet matured for this reformation. Much less is it supposed advisable to propose its adoption to any other nation. But, in consulting them, it will be proper to let them understand that the design and motive of opening the communication is to promote the final establishment of a system of weights and measures to be common to all civilized nations.

In contemplating so great but so beneficial a change as the ultimate object of the proposal now submitted to the consideration of Congress, it is supposed to be most congenial to the end to attempt no present change whatever in our existing weights and measures; to let the standards remain precisely as they are; and to confine the proceedings of Congress at this time to authorizing the Executive to open these communications with the European nations where we have accredited ministers and agents; and to such declaratory enactments and regulations as may secure a more perfect uniformity in the weights and measures now in use throughout the Union.

The motives for entertaining the opinion that any change in our system at the present time would be inexpedient, are four:

First. That no change whatever of the system could be adopted, without losing the greatest of all the elements of uniformity—that referring to the persons using the same system. This uniformity we now possess, in common with the whole British nation; the nation with which, of all the nations of the earth, we have the most of that intercourse which requires the constant use of weights and measures. No change is believed possible, other than that of the whole system, the benefit of which would compensate for the loss of this uniformity.

Secondly. That the system, as it exists, has a uniformity of proportion very convenient and useful, which any alteration of it would disturb, and perhaps destroy—the proportion between the avoirdupois and troy weights, and that between the avoirdupois weight and the foot measure; one cubic foot containing of spring water exactly one thousand ounces avoirdupois, and one pound avoirdupois consisting of exactly seven thousand grains troy.

Thirdly. That the experience of France has proved that binary, ternary, duodecimal, and sexagesimal divisions are as necessary to the practical use of weights and measures as the decimal divisions are convenient for calculations resulting from them; and that no plan for introducing the latter can dispense with the continued use of the former.

Fourthly. That the only *material* improvement of which the present system is believed to be susceptible would be the restoration of identity between weights and silver coins—a change the advantages of which would be very great, but which could not be effected without a corresponding and almost total change in our coinage and moneys of account; a change the more exceptionable, as our monetary system is itself a new, and has hitherto been a successful institution.

Of all the nations of European origin, ours is that which least requires any change in the system of their weights and measures. With the exception of Louisiana, the established system is, and always has been, throughout the Union, the same. Under the feudal system of Europe, combined with the hierarchy of the church of Rome, the people were in servitude, and every chieftain of a village or owner of a castle possessed or asserted the attributes of sovereign power. Among the rest, the feudal lords were in the practice of coining money, and fixing their own weights and measures. This is the great source of numberless diversities existing in every part of Europe, proceeding not from the varieties which in a course of ages befell the same system, but from those of diversity of origin. The nations of Europe are, in their origin, all compositions of victorious and vanquished people. Their institutions are compositions of military power and religious opinions. Their doctrines are, that freedom is the grant of the sovereign to the people, and that the sovereign is amenable only to God. These doctrines are not congenial to nations originating in colonial establishments. Colonies carry with them the general laws, opinions, and usages of the nation from which they emanate, and the prejudices and passions of the age of their emigration. The North American colonies had nothing military in their origin. The first English colonies on this continent were speculations of commerce: they commenced precisely at the period of that struggle in England between liberty and power which, after long and bloody civil wars, terminated in a compromise between the two conflicting principles. The colonies were founded by that portion of the people who were arrayed on the side of liberty. They brought with them all the rights, but none of the servitudes, of the parent country. Their constitutions were indeed, conformably to the spirit of the feudal policy, charters granted by the Crown; but they were all adherents to the doctrine that charters were not donations, but compacts. They brought with them the weights and measures of the law, and not those of any particular district or franchise. The only change which has taken place in England with regard to the legal standards of weights and measures since the first settlement of the North American colonies has been the specification of the contents of measures of capacity, by prescribing their dimensions in cubical inches. All the standards at the exchequer are the same that they were at the first settlement of Jamestown, with the exception of the wine gallon, which is of the time of Queen Anne; and the standards of the exchequer are the prototypes from which all the weights and measures of the Union are derived.

A particular statement of the regulations of the several States relative to weights and measures is subjoined to this report, in the appendix.

The first settlement of the English colonies on the continent of North America was undertaken towards the close of the reign of Queen Elizabeth, in honor of whom it received the name of Virginia.

During the same reign of Elizabeth, and contemporaneous with the adventures which preceded the settlement of Jamestown, the act of Parliament of 1592 passed, defining in feet the statute mile. This mile, together with its elementary units, the foot and inch, were the measures by which all the territories granted by the successors of Elizabeth, in this hemisphere, were defined. The foot and inch, from usage immemorial in England, and by a statute then of more than three centuries' antiquity, had been the elements of superficial as well as of itinerary land measure. These, therefore, were not only the most natural measures for the use of the English colonies; they were inwoven in their primitive constitutions, and were brought with their charters, an essential part of their possessions.

Among the earliest traces of colonial legislation in Virginia and in New England, we find acts declaring the assize of London and the standards of the exchequer to be the only lawful prototypes of the weights and measures of the colonies. The foot and inch were of dimensions perfectly well ascertained; and in the year 1601, only seven years before the settlement at Jamestown, and less than twenty before that of Plymouth, new standards, not only of the yard and ell, but of the avoirdupois and troy weights, and of the bushel, corn gallon, quart, and pint, had been deposited at the exchequer. There was neither uncertainty nor perceptible diversity with regard to the long measures or the weights; but the standard vessels of capacity were of various dimensions. The bushel of 1601 contained 2,124 cubic inches; it was therefore a copy from an older standard, made in exact conformity to the rule prescribed in the statute of 1266, and very probably the identical standard therein described. It contained 8 corn gallons of wheat, equiponderant to 8 Irish gallons of Gascoigne wine; of wheat, 32 kernels of which were of equal weight with the round unclipped penny sterling of 1266. Its corresponding wine gallon, therefore, would have been the Irish gallon of 217.6 cubic inches; and its corresponding corn gallon of 265.5 inches, an intermediate between the Romford quart and gallon of 1228, and differing less than one inch from either of them. There were two other standard bushels at the exchequer, of the same dimensions: one of the age of Henry VII., and one dated 1091. This has been supposed to be a mistake for 1591 or 1601. But as it is not probable that two standard bushels should have been deposited in the exchequer at the same time, or even at dates so near to each other, a conjecture may be indulged that the 1091 marks the date when the standard measure described in the statute of 1226 was made. Of that standard these three bushels were unquestionably copies.

The corn and the ale gallons of 1601 were of 272 cubic inches; and there was one of Henry VII. there, of the same size, as reported by the artist who measured them for the commissioners of the excise in 1688. When measured again by order of the committee of the House of Commons, in 1758, they were reported to contain each about one inch less. The true size intended for all of them was 272; and they were made by an application of the rule of 1266 to the troy weight wheat of the act of 1496. They were the eighth parts of a bushel of 2,176 inches; and their corresponding wine gallon was the Guildhall gallon of 224 inches.

There were, in 1601, a standard quart of 70 inches, and a pint of 34.8, which were evidently intended to be in exact proportions to each other; and the gallon to which they referred was the gallon of 282 inches. This would have made a bushel of 2,256 inches; and its corresponding wine gallon is of 231 inches. The standards, thus made, were, by an application both of the wheat and of the rule described in the statute of 1266 to the troy weight gallon of 1496; that is, the wheat was of the kind 32 kernels of which weighed the same as the old penny sterling, and of which the wine gallon contained eight pounds troy weight. There was a standard bushel of Henry VII. at the exchequer, of 2,224 inches, probably the bushel from which this quart and these pints were deduced.

There was also the *Winchester* bushel of 2145.6 cubic inches, made in the reign of Henry VII., but from its name evidently copied from a standard which had been kept at Winchester when that place was the capital of the kingdom. This bushel had been made by combining the rule of 1266 with the assize of casks, which, in the statute of 1423, is declared to be of *old time*, by which the hogshead or eight cubic feet of Gascoigne wine consisted of 63 gallons. That hogshead was a quarter of a tun of wine, as eight Winchester bushels contained a quarter of a ton of wheat. The gallon was of 219½ cubic inches; and the corresponding ale gallon was of 268.2 inches. There was at the exchequer no wine or ale gallon of those dimensions; because the wine gallon of 224 inches, and the corn gallon of 272, made under the statutes of 1496 and 1531, had been substituted in their stead. At the exchequer, there was, indeed, no wine gallon at all. Those of older date than the act of 1496 had disappeared, and the gallon of 224 inches, made according to that act, had been delivered out of the exchequer to the city of London, and was at Guildhall.

Such was the state of the standards in London at the time of the first colonial emigrations to this continent.

MASSACHUSETTS.

Among the colony laws of Massachusetts there is an act of the year 1647, directing the country treasurer *to provide*, at the country's charge, weights and measures *of all sorts* for continual standards. In the specification which ensues in the act, all the measures, of which there were standards at the exchequer, are mentioned, with special discrimination of *wine* and *ale measures;* but the weights only *after sixteen ounces* to the pound are named. They then had no occasion for the troy weights.

At a still earlier date, in 1641, it had been prescribed that all casks for any liquor, fish, beef, pork, or other commodities to be put to sale, should be *of London assize;* and in 1646 a corresponding assize of *staves* had been ordained.

The law of 1647 did not expressly direct where the treasurer was to procure the standards; but the exchequer and Guildhall were the only places where they were to be obtained; and, from subsequent acts, the fact appears that they were obtained there.

At the first session of the general court under the charter of William and Mary, in 1692, two laws were enacted: one, re-ordaining the London assize of casks, and specifying that the butt should contain 126 gallons, the puncheon 84, the hogshead 63, the tierce 42, and the barrel 31½ gallons; the other, for due regulation of weights and measures, declaring that the brass and copper measures *formerly sent* out of England, with certificate out of the exchequer to be approved *Winchester* measure, according to the standard in the exchequer, should be the public allowed standard throughout the province for the proving and sealing all weights and measures thereby, and re-enacting, with an additional clause, the colonial law of 1647.

An act of the year 1700 prescribes that the bushel used for the sale of meal, fruits, and other things usually sold by heap, shall be not less than 18½ inches wide within side; the half-bushel not less than 13¾ inches; the peck not less than 10¾, and the half-peck not less than 9 inches.

It is very remarkable that this law was enacted one year *before* the act of Parliament of 13 William III., which gives and prescribes in cubical inches the dimensions of the Winchester bushel. The object of the provincial law was to prohibit the use of bushels which, though of the same cubical capacity, should be of shorter diameter and greater depth. It was for the benefit of the heap. It prescribed, therefore, only the diameter, without mentioning the depth; but that diameter, for the bushel, is identically the same, 18½ inches, as the act of Parliament of the ensuing year declares to be the width of the Winchester bushel in the exchequer. As the provincial standard must have been the model from which the law of the province took its measure of a diameter, its perfect coincidence with the subsequent definition of the act of Parliament is a proof of the correctness of the copy from the Winchester bushel of the exchequer.

In 1705, the treasurer of the province was required by law to procure a beam, scale, and a nest of *troy weights*, from 128 ounces down, marked with a mark or stamp used at the exchequer, for a public standard. Every town was to be provided with a nest of troy weights of different form from the avoirdupois; and a penalty was annexed to the use of any other than sealed troy weights for weighing silver, bullion, or other specie whatsoever, proper and *used* to be weighed by troy weights.

In the year 1707, there was an act of Parliament, (6 Anne, ch. xxx,) "for ascertaining the rates of foreign coins in Her Majesty's plantations in America." It had been preceded, in 1704, by a proclamation of the Queen, declaring the value of many foreign silver coins, and particularly of the Spanish piece of eight, or dollar. At that period, as in a certain degree at the present, the Spanish dollar and its parts formed the principal circulating coins of this country. The act declares the value of the Seville, Pillar, and Mexican pieces of eight to be four shillings and sixpence sterling, and their weight to be seventeen pennyweights and a half, or 420 grains. It forbids their being taken in the colonies at more than six shillings each: and this act constituted what, from that time till the period of the Revolution, in Virginia and New England, was denominated "lawful money." The act itself was published in the province of Massachusetts Bay with the statutes of the Provincial Legislature, as was practised with regard to all the acts of Parliament the authority of which was recognised. It may be here incidentally remarked that the laws of Congress, which estimate the value of the English pound sterling at four dollars and forty-four cents, are all founded upon the proportions established by this act, although the weight and value, both of the dollar and of the shilling and pound sterling, have, since that time, been changed. Some further observations on this subject are submitted in the appendix; from which it will appear that the real value of our silver dollar, in the silver English half-crowns or shillings of this time, is four shillings seven pence and nearly one farthing; and that the pound sterling of such actual English silver coins is, in the silver money of the United States, not 4 dollars 44 cents, but only 4 dollars 34 cents and 9 mills.

In the year 1715 a light-house was built at the entrance of Boston harbor; and a tonnage duty being levied upon vessels entering the harbor to defray the expense of building and supporting it, the rule of measurement for ascertaining the tonnage prescribed by the act was, that a vessel of two decks should be measured upon the main deck, from the stem to the stern post; then, subducting the breadth, from outside to outside, athwart the main beam; the remainder to be accounted her length by the keel, which, being multiplied by the breadth, and the product by one-half the breadth for the depth, and the whole product divided by 100, the quotient was to be accounted the tonnage of the ship. Vessels of a single deck, or 1½ deck, were to be measured in the same manner, except the depth in hold, which was to be from the under side of the main beam to the ceiling.

In 1730 a new set of brass and copper avoirdupois weights and of measures was imported from the exchequer, with certificate of their being approved Winchester measure, according to the standard in the exchequer. These were, by a new statute, declared to be the public standards of the province; and they continue to be those of the commonwealth at this day. It does not appear that the troy weights were renewed at the same time. The standards of them had been imported only twenty-five years before, and could not need renewing.

In 1751 the act of Parliament introducing the Gregorian calendar was adopted in the usual manner, by inserting it among the laws of the Provincial Legislature.

Since the Revolution all the laws of the province have been revised; and, by an act of the Legislature of 26th February, 1800, all the principal regulations concerning weights and measures were renewed and confirmed.

This law declares that the brass and copper measures, *formerly* (1730) sent out of England with a certificate from the exchequer, shall be and remain the public standards throughout the commonwealth; and it requires the treasurer of the commonwealth to cause to be had and preserved a complete set of new beams, weights, (avoirdupois and troy,) and measures of length and of capacity, wet and dry, to be used only as public standards. This act is to continue until Congress shall have fixed by law the standard of weights and measures.

A statute of 9th March, 1804, recites that the troy weights used by the treasurer of the commonwealth as State standards had, by long use, diminished and undergone an alteration in their proportions. (They had then been just one century in use.) It directs him therefore to add, or cause to be added, a specified number of grains to each of the weights, from that of 128 ounces to the half-ounce, or to procure new weights of the same denomination, and conformable to the State standards, with such additions; which weights, so corrected, are declared to be the standards of troy weight for the commonwealth. By information from various sources, it is known that the standards of the State of Massachusetts are, at this time, perfectly conformable to those of the exchequer.

There are a multitude of laws regulating the assize of casks, assigning different dimensions for containing different articles. They generally prescribe the length of the staves within the chime, and sometimes the diameter of the heads. They also specify the weight of the article which the cask is to contain. Staves are an article of exportation; and their length, breadth, and thickness are regulated by law.

NEW HAMPSHIRE AND VERMONT.

The laws of New Hampshire and of Vermont relating to weights and measures appear to have been modelled upon those of Massachusetts. In both these States, the standards are required to be according to the approved Winchester measures allowed in England in the exchequer. The first act of New Hampshire to that effect was of 13th May, 1718, and the last, of 15th December, 1797. The statute of Vermont is of the 8th of March, 1797. Neither New Hampshire nor Vermont has established the authority of the troy weights by law.

RHODE ISLAND.

Rhode Island has no statute upon the subject. Her weights and measures are, however, the same, and her standards are taken from those of Massachusetts.

CONNECTICUT.

In the laws and standards of Connecticut, there are peculiarities deserving of remark.

A statute of October, 1800, contains the following provisions: "That the brass measures, the property of this State, kept at the Treasury, that is to say, a half-bushel measure, containing *one thousand and ninety-nine* cubic inches, very near a peck measure, and a half-peck measure, when reduced to a just proportion, be the standard of the corn measures in this State, which are called by those names respectively; that the brass vessels, ordered to be provided by this Assembly, [one of the capacity of two hundred and twenty-four cubic inches,]* and the other of the capacity of two hundred and eighty-two cubic inches, shall be, when procured, the first of them the standard of a wine gallon, and the other the standard of an ale or beer gallon in this State; that the iron or brass rod or plate, ordered by this Assembly to be provided of one yard in length, to be divided into three equal parts for feet in length, and one of those parts to be subdivided into twelve equal parts for inches, shall be the standard of those measures, respectively; and that the brass weights, the property of the State, kept at the Treasury, of one, two, four, seven, fourteen, twenty-eight, and fifty-six pounds, shall be the standard of avoirdupois weight in this State."

A subsequent section (5th) requires of the selectmen of each town to provide town standards, of good and sufficient materials, which, for the standards of liquid measure, shall be copper, brass, or pewter; also, vessels for corn measure of forms and dimensions thus described: "A two-quart measure, the bottom of which, on the inside, is four inches wide on two opposite sides, and four inches and a half on the two other sides, and its height from thence seven inches and sixty-three hundredths of an inch," [137.34 cubic inches.] A quart measure of "three inches square from bottom to top throughout, and its height seven inches and sixty-three hundredths of an inch," [68.67 cubic inches.] A pint measure of three inches square from bottom to top throughout, and its height three inches and eighty-two hundredths of an inch, [34.38 cubic inches.]

The assumption of the old Guildhall wine gallon of 224 inches, in this act, is the more surprising, inasmuch as a colonial statute of the year 1752 had already established the gallon of 231 inches. What the occasion of it was, has not been ascertained; but it was probably taken from an existing standard which had been originally taken from the Guildhall gallon. Whatever the cause of it may have been, this part of the act was repealed the next year, (October, 1801,) and the treasurer was directed, without delay, to provide a vessel of brass, of five inches square from bottom to top throughout, and nine inches and twenty-four hundredths of an inch in height, containing 231 cubic inches, which was declared the standard wine gallon of the State.

The half-bushel measure, which, in 1800, was the property of the State, kept at the Treasury, containing 1,099 cubic inches very near, was, of course, not originally derived from the Winchester bushel. By the colonial laws of Connecticut, it appears that, as early as the year 1670, there were *colony standards* kept at Hartford; and the half-bushel, which, in the year 1800, was there at the Treasury, the property of the State, was either one of those same standards of 1670, or a copy from it. That it was not borrowed from the Massachusetts standards is also manifest, because the Massachusetts bushel was copied from the Winchester bushel. It may be concluded, with great probability, that the Connecticut half-bushel was first taken from the bushel in the exchequer of Henry VII., with a copper rim, though it contains thirteen cubic inches less than in proportion to that standard. This difference in so large a measure may have been the effect of very slight inaccuracy in the first copy, increased by the decay or the change of the vessel. The bushel with the copper rim was deposited at the exchequer after the act of 1496, and was made from the wine gallon of that act, with the rule of the act of 1266, and the pound of fifteen ounces troy weight. The quart and pint at the exchequer of 1601 were formed from this bushel. The pint differs less than half an inch from that prescribed by this act of Connecticut of 1800.

In the laws of Connecticut, as in those of New Hampshire and Vermont, there is no formal establishment or recognition of troy weights, nor does there appear to be any standard of them existing in the State; but, in the lists of ratable estate, prescribed by the laws of Connecticut, silver plate is estimated at one dollar and eleven cents per ounce, by which must obviously be intended the ounce troy.

* These brackets in the printed volume of the Laws of Connecticut indicate that the part enclosed has been repealed.

The assize of casks is regulated by various laws; and the dimensions of the barrel for packing salted provisions for exportation are the same as those established in Massachusetts and New York. The London assize of *tight* casks, from the puncheon of 126 to the barrel of 31½ gallons, was coeval with the first legislation of the colony, and was re-enacted by a statute of 1795. It expressly declares that these gallons shall be of 231 cubic inches; and directs that they shall be computed by taking, in inches and decimal parts of an inch, the bulge or bung diameter, each head diameter, and the length within the cask, with Gunter's rule of gauging.

The assize of staves is the same as in Massachusetts.

By an act of October, 1796, the standard weight of wheat is declared to be 60 pounds nett to the bushel.

NEW YORK.

New York was originally the seat of a colony from the Netherlands, the settlers of which doubtless brought with them the weights and measures of their own country. Towards the close of the seventeenth century it fell into the possession of the English; and, on the 19th of June, 1703, an act of the Colonial Legislature established all the English weights and measures, *according to the standards in the exchequer.* This act was drawn with great care, and evidently with the purpose of embracing all the provisions of the then existing English statutes regulating weights, measures, and casks, particularly those of 1266, 1304, 1439, and 1496, without being aware of the utter incompatibility of those statutes with one another.

Instead, however, of adopting in terms the London assize of casks, from the tun of 252 gallons downwards, this act prescribes in inches the length and head diameters of the various casks; and, by a very remarkable peculiarity, changes the names of all the dry casks. It directs that

The hogshead shall be	40	inches long,	33	inches in the bulge,	27	inches in the head.
The tierce,	36	do.	27	do.	23	do.
The barrel,	30	do.	26	do.	22	do.
The half-barrel,	25	do.	20	do.	16	do.
The quarter-barrel,	20	do.	16	do.	13	do.

But it adds that "*tite*" barrels shall contain 31½ gallons wine measure, or within half a gallon more or less, and all other casks in proportion. This last provision adopted the whole London assize for tight casks. But the dimensions prescribed for the *hogshead* give a cask of about 126 gallons, which, in the London assize, made the butt or pipe; and thus the New York tierce was of 80 gallons, which constituted the *real* contents of the London puncheon; the New York barrel was of 60 gallons, answering to the London hogshead; and the New York half-barrel of 30 gallons to the London barrel.

On the 10th of April, 1784, the Legislature of New York passed an act to *ascertain* weights and measures within the State. It declares the standard weights and measures which were in the custody of William Hardenbrook, public sealer and marker in the city and county of New York, at the time of the declaration of independence, which were according to the standard of the exchequer, to be the standards throughout the State. William Hardenbrook was directed to deliver them to the clerk of the city and county of New York, and to make oath that they were the same which he had received from the court of exchequer.

By an act of 7th March, 1788, the standard weight of wheat brought to the city of New York for sale was fixed at 60 pounds nett to the bushel.

On the 24th of March, 1809, passed an act relative to a standard of long measure, and for other purposes. It declares a brass yard measure, engraved and sealed at the exchequer of Great Britain, procured in 1803 by the corporation of New York, presented to the State, and deposited with authenticating documents in the Secretary's office, to be the standard yard measure of the State.

The last statute upon this subject, of New York, is an act to regulate weights and measures, and passed on the 19th of March, 1813, which declares that there shall be one just beam; one certain weight and measure for distance and capacity, that is to say, avoirdupois and troy weights, bushels, half-bushels, pecks, half-pecks, and quarts; and gallons, half-gallons, quarts, pints, and gills; and one certain rod for long measure, according to "the standard in use in the State on the day of the declaration of the independence thereof; and that the standard of weights and measures in the office of the Secretary of the State, which is according to the standard in the court of exchequer in that part of Great Britain called England, shall be and remain the standard for ascertaining all beams, weights, and measures throughout the State, until the Congress of the United States shall establish the standard of weights and measures for the United States."

The assize of casks continues as it was regulated by the act of 1703; but a variety of special statutes assign dimensions different from it for barrels in which beef, pork, fish, flour, pot and pearl ashes, &c. are packed for exportation. These, as in the New England States, are adapted to contain a certain specified weight of each article. The assize of *staves*, regulated by an act of 26th March, 1813, is substantially the same as that of Massachusetts; and as the capacity of the barrel must always depend in a great degree upon the size of the staves and heading of which it is made, the contents of all these barrels vary little from 30 gallons wine measure of 231 cubic inches, equal to 6,930 inches.

NEW JERSEY.

In New Jersey, which was originally a part of the Dutch settlement, the English weights and measures were established at a later period than in New York. An act of the Colonial Legislature of 13th August, 1725, recites, in its preamble, that nothing is more agreeable to common justice and equity than that throughout the province there should be *one* just weight and balance, one true and perfect standard for measures, for *want* whereof experience had shown that many frauds and deceits had happened; for remedy of which it establishes, in the first section, an assize of casks for packing of beef and pork, since altered; and in the second declares that there shall be one just beam and balance; one certain standard for "weights, that is to say, for avoirdupois and troy weights; one standard for measures, bushels, half-bushels, pecks, and half-pecks; one just standard for liquid measures, that is to say, wine and beer measure; and one yard; all which shall be according to the standard of the exchequer in Great Britain."

The phraseology of this statute has some resemblance to that of the 25th chapter of Magna Charta, and may serve as a lucid commentary upon it; for, although its avowed object is uniformity, and even *unity* of standard, it expressly sanctions two weights, avoirdupois and troy, and two liquid measures, for wine and beer. This statute also, as well as that of New York of 1813, shows that the term *gallon* is improperly used when applied to dry measure, its real denomination being that of half-peck.

The laws of New Jersey relating to the assize of barrels have been various. By an act of 1774, revived in 1783, the barrel is required to contain 31½ wine gallons, and not ½ a gallon more or less; half-barrels 16 gallons, and not 1 quart more or less. The assize of staves (26th September, 1772,) is materially the same as in all the eastern States.

PENNSYLVANIA.

In the year 1700, two laws relating to weights and measures were enacted by the Colonial Legislature. The first [Laws of Pennsylvania, Bioren's edition, vol. 1, page 18] ordains that brass standards of weights and measures, according to the standards for the exchequer, should be *obtained*, and kept in each county. Sec. 2. That a brass half-bushel, then in Philadelphia, and a bushel and peck proportionable, and all lesser measures and weights coming from England, being duly sealed in London, or other measures agreeable therewith, should be accounted good till the standard should be obtained. Sec. 3. That no person should sell beer or ale by retail *but by beer measure*, according to the standard of England.

The second not only adopted the London assize of casks, but required that *all* tight casks for beer, ale, cider, pork, beef, and oil, and all such commodities, should be made of good, sound, well-seasoned white oak timber, and contain

The puncheon,	- - - - - -	84 gallons.
The hogshead,	- - - - - -	63 "
The tierce,	- - - - - -	42 "
The barrel,	- - - - - -	31½ "
The half-barrel,	- - - - - -	16 "

wine measure, according to the practice of the neighboring colonies.

This act regulated the assize of staves for hogsheads and barrels, and prescribed that tobacco hogsheads should be 4 feet long, or within an inch more or less, 32 inches in the head, equal to the gauge of Maryland, and be four hogsheads to a ton; that the flour cask should be not above *double* the gauge of wine measure; the half-barrel to be of 31½ gallons, and the barrel of 63 gallons, wine measure.

As the gauge of Maryland was adopted for tobacco, so that of New York was assumed for flour, by constituting the barrel and half-barrel at double the gauge of wine measure. The origin of this must have been in the measures of the Dutch colonies, which had reference to the *last*, or double *ton* of shipping, the customary measure of the Netherlands, instead of the ton.

But the most remarkable peculiarity of these two laws of Pennsylvania, enacted at the same session of the Legislature, was, that while one of them applied the London assize of wine measure to the casks which were to contain *beer*, ale, and cider, the other expressly prohibited the retailers of beer and ale from selling those liquors otherwise than by beer measure; so that the retailers were obliged to buy by the small, and to sell by the large measure. This inconsistency between the two statutes will not surprise us when we recollect that it occurred precisely at the time when the trial in the court of exchequer of England was litigated concerning the duties to be paid on Mr. Thomas Barker's importation of Alicante wine. For while he, upon a claim to pay duties upon wine only by beer measure, was reducing the Attorney General, after a trial of five hours, to withdraw a juror, and cast the remedy upon Parliament, the Legislature of Pennsylvania, by the same erroneous application of the same name to different things, were (certainly without intention, but in effect) enjoining upon all the publicans of the province to pay for beer by wine measure. It was a whimsical operation of the same incongruity happening in the two hemispheres at the same time, that, while Barker was struggling successfully against the supreme authority of the mother country to pay for wine by beer measure, the Pennsylvania publicans, by the acts of their Provincial Legislature, were compelled to pay for beer by wine measure, and yet to be paid for it by its own.

The remedy to these disorders was applied in England and in Pennsylvania also about the same time. In both cases, however, it was partial; applied only to the special inconvenience, without reaching the source of the evil. Parliament only defined the capacity of the wine gallon, fixing it at 231 cubic inches. The Pennsylvania Legislature, by an act of 1705, [Penn. Laws, Bioren's ed., vol. 1, ch. 138, p. 43,] reciting the inconsistent provisions of their two acts of 1700, and ingenuously remarking that, in consequence of them, *retailers are obliged to sell by far greater measure than they buy*, released them from this burdensome obligation by authorizing innkeepers to sell beer by wine measure in their houses, and by beer measure to persons to carry it out of the house. The real evil, in both cases, had proceeded from calling the two different measures of liquids by the same name. If the beer gallon had been called a *half-peck*, no such questions and no such clashing legislation would ever have arisen. The statute of 1700, which had prescribed the London assize of casks, was repealed only in March, 1810.

The assize of staves and heading was fixed, in Pennsylvania, by a statute of 1759, (chap. 439, vol. 1, p. 222.) It was, with slight variations, the same as in all the States eastward of it. The necessary width of all staves for exportation was, by this act, fixed at three and a half inches. By a subsequent act, (30th March, 1803, ch. 2362, vol. 4, p. 83,) staves of three inches wide are allowed as merchantable. Uninspected staves or heading may, by an act of 1790, (ch. 1501, vol. 2, p. 529,) be used within the State. A great multitude of statutes in Pennsylvania, as in all the other navigating States, have regulated the assize of casks, adapting them to contain the weight of the respective articles to be exported in them, and to the convenience of stowage in ships. This, as has been shown, was the original foundation of the London assize of the ton, and of the whole English system of weights and measures; and this, in the act of Pennsylvania of 12th September, 1789, (ch. 1422, vol. 2, p. 490,) is expressly assigned as one of the reasons for requiring casks of given dimensions.

DELAWARE.

In 1705, " An act for regulating weights and measures" directs that each county should obtain standard brass weights and measures according *to the Queen's standards* for the exchequer; that a standard brass half-bushel should be taken from that in Philadelphia, to which the bushel and peck should be proportionable. It authorizes the use of measures and weights coming from England, duly stamped in London, or others agreeable therewith, till the standards should be procured; and it prescribes that beer or ale should be sold in retail only by beer measure.

Subsequent acts of the Legislature of Delaware define the cord of fire-wood, rate gold and silver coins by their weight in troy pennyweights and grains, and regulate the assize of casks for flour, corn, and Indian meal in exact conformity to that of Pennsylvania.

MARYLAND.

The first act concerning weights and measures to be found in the printed editions of the statutes of this State is of the year 1715, ch. 10—" An act relating to the standard of English weights and measures," the preamble of which recites that the standards are very much impaired in several of the counties of the province, and in some wholly lost or unfit for use. It therefore directs the justices of the several county courts to cause the standards they already had to be made complete, and to purchase new standards where they had none; and requires them to take security from the standard-keepers for the due execution of their office, and the safe-keeping of the standards in future.

What these standards were, is ascertained by recurrence to the records of the State for the laws, the titles only of which are given in the printed compilations of the statutes.

In 1637, at the first General Assembly of which any record is extant, *a bill for corn measures* is one of forty-two which were prepared and propounded to the lord proprietary for his assent, but which were not enacted into laws, nor is there any copy of them to be found upon the record.

The next year, (1638,) an act for measures and weights was one of thirty-six bills twice read and engrossed, but never read a third time, nor passed the House. There were in this bill several remarkable peculiarities. It provided that there should be one standard measure throughout the province, to be appointed by the lieutenant general, and a sealer of measures; that all contracts made for the payment of corn should be understood of corn shelled; that a barrel of new corn, tendered in payment at or afore the 15th of October in any year, should be twice shaked in the barrel, and afterwards heaped as long as it will lie on; and at or before the feast of the Nativity, should be twice shaked and filled to the edge of the barrel, or else not shaked, and heaped as before; and after the said feast it should not be shaken at all, but delivered by strike. No steelyards or other weights not sealed by the lieutenant general, or by the sealer appointed by him, were to be used, except it be small weights *sealed in England.* The act was to continue till the end of the next General Assembly.

In 1641 there passed *an act for measures*, which, after reciting the inconveniences from the want of a set and appointed measure whereby corn and other grain might be bought and sold within the province, provides that from thenceforth *the measure used in England called the Winchester bushel* should be only used as the rule to measure all things sold by the bushel or barrel; and the barrel was to contain five such bushels; the sheriff of each county was to procure and keep such a standard bushel, whereby others should be sized and sealed; and penalties were affixed to the use of any others.

This act was to continue only two years, and then expired; but *the Winchester bushel* has, from the time of its enactment, remained the standard dry measure of Maryland.

In 1671 passed an act for providing a standard, with English weights and measures, in the several and respective counties within this province. And this statute, though omitted in all the late printed editions of the laws of Maryland, established the standard recognised by the existing act of 1715, and by all the subsequent laws of Maryland relating to the subject.

The preamble complains that much fraud and deceit is practised in the province by false weights and measures; for prevention of which it enacts:

That no inhabitant, or *trader hither*, shall use in trading any other *weights* or measures than are used and made *according to the statute of Henry VII. King of England* in that case made and provided, [the statute of 1496.]

That, for the discovery of abuses, nine persons, who are indicated by name, one for each county then in the province, should set up a standard at their own houses, and provide by the next shipping, or the shipping then next following at farthest, twelve half-hundredweights, a quartern, half-quartern, seven pounds, four pounds, two pounds, and one pound; also, each person six stamps for making steelyards and weights, to be lettered from A to I, one letter for each county; also, each person to have nine irons, numbered from 1 to 9, and another with 0, for the numbering of steelyards and pea, that they might not be changed; and to procure brass measures of ell and yard, to be sealed in England; also, a sealed bushel, half-bushel, peck, and gallon, of Winchester measure, and gallon, pottle, quart, pint, and half-pint of wine measure, with three burnt stamps for the wooden measures, and three other stamps for the pewter measures, to be all of the same letter with their other stamps; and that these weights, measures, and stamps should be kept by those nine persons at their respective houses, to which all persons were to bring their steelyards to be tried, stamped, and numbered once a year, and also their barrels, which were to contain five bushels, and other measures, to be sealed.

The act further provides penalties for using other weights and measures, and, in case of the death of any of the nine persons named as standard-keepers, directs that other persons should be appointed by the commissioners of the respective county courts in their stead.

The limitation of the act was to three years, or the end of the next General Assembly. It was revived and continued by several successive acts till 1692, when there passed "An act for the *settling of a standard* with English weights and measures within the several and respective counties in this province."

This is, in substance, a re-enactment and confirmation of the statute of 1671, providing that the justices of the county courts should, from time to time, appoint a person in each county to keep the standards, and to provide all such weights and measures as were wanting, according to the directions of the act of 1671, and an additional set for Cecil county, with stamps to be marked K.

September 21, 1704, chap. 71, an act *relating* to the standard of English weights and measures has the following preamble:

"Whereas *there is now* a standard of weights and measures *agreeable to the standard of weights and measures in Her Majesty's exchequer* in England, settled within the several counties of this province."

After this preamble the act directs that all persons, whether inhabitants or foreigners, shall bring their steelyards, with which they weigh and receive their tobacco, every year to be tried, stamped, and numbered; and every person trading with bushels, half-bushels, &c., shall have them tried and stamped at the standard, except such as come out of England and are there stamped; and penalties are prescribed for buying or selling by steelyards or dry measures not thus tried and stamped, but they are not extended either to the weights or the liquid measures.

The titles only of all these statutes are given in the printed editions of the statutes of Maryland. But the parts of them which prescribe the standard are yet in full force. The law is the memorable act of Parliament of 1496; and the fact, in Maryland as in England, is, that the standards have been copied from those in the exchequer.

In 1765, (1st November, ch. 1,) was passed a supplementary act to the act of 1715 already noticed, entitled "An act relating to the standard of English weights and measures."

The preamble recites that, in the act of 1715, there is no penalty upon *buyers* by unstamped dry measures as there is upon sellers; whence persons refuse to *buy* grain, flaxseed, and other commodities, unless by measures larger than the standard.

It therefore prohibits, upon five pounds penalty, buying by such measures.

Neither of these two acts takes any notice either of long or liquid measures, or of weights. But the standards had been established by the statute of 1671, and have continued to this time. Beer measure appears never to have been formally established by the statute law of Maryland; but troy weight is explicitly recognised in the act of November, 1781, (ch. 16,) to declare what foreign gold and silver coin shall be deemed the current money of the State. It fixes the value of several of those coins proportionably to their weight in ounces, pennyweights, and grains, intending (though not naming) troy weight; but rating Spanish milled pieces of eight at seven shillings and six pence, and French and English crowns at eight shillings and four pence.

In 1796, by an act to erect Baltimore, in Baltimore county, into a city, and to incorporate the inhabitants thereof, the corporation (section 9) are empowered to regulate and fix the assize of bread; to provide for the safe-keeping and preservation of the standard of weights and measures used within the city and precincts; also to regulate the assize of bricks, &c. And, in 1805, by an act supplementary to the act incorporating Baltimore as a

city, it is ordained (Congress not having yet fixed any standard of weights and measures) that the mayor and city council shall have and exercise the right of regulating all weights and measures within the city and precincts by the present standard, until one shall be determined on by Congress.

The assize of casks has been in Maryland, as in the other parts of the Union, both before and since our Revolution, a subject of frequent and voluminous legislation. As early as the year 1658, there had passed an act concerning the gauge of tobacco hogsheads, which had prescribed the length and diameter at the head of those casks, the dimensions of which were then the same as those used in Virginia. In 1676, this law was re-enacted with some additional sections, and was from time to time continued until 1732.

In November, 1763, by an act for amending the staple of tobacco, &c., the hogsheads containing that article were required to be 48 inches in the length of the stave, and 70 inches in the whole diameter within the staves, at the croze and bulge; a regulation repeated in the act of November, 1801, to regulate the inspection of tobacco, which is now in force.

In 1745, there passed an act for the gauge of barrels for pork, beef, pitch, tar, turpentine, and tare of barrels for flour or bread. It did not prescribe the dimensions of flour and bread casks, but directed that all barrels made or used for either of those articles should be of the size and gauge to contain at least the quantity of 31½ gallons, wine measure; and that the contents of every pork or beef barrel for exportation or sale should be at least 220 pounds nett of meat.

This act, though originally limited in duration to three years, and the end of the next session of the Assembly, has, by successive re-enactments, always limited, been continued in force to this day.

Another act of 1786, for the inspection of salted provisions, exported and imported from and to the town of Baltimore, required that the staves of beef and pork barrels should be 29 inches long, and 18 inches diameter at the head. And these regulations, though superseded at Baltimore by the exercise of the powers vested in the corporation of that city, have been extended to other parts of the State, and are yet in force.

The size of fish barrels had been prescribed by the same act. But in February, 1818, by an act to regulate the inspection of salted fish, it was directed that the barrel staves should be 28 inches in length, the heads 17 inches between the chimes, and to contain not less than 29 nor more than 31 gallons; tierces to hold not less than 45, and half-barrels not less than 15 gallons.

VIRGINIA.

Among the earliest records of the General Assembly of the colony of Virginia is an order of the 5th of March, 1623–'4, that there be no weights nor measures used but such as should be sealed by officers appointed for that purpose.

By an act of 23d February, 1631–'2, it was ordained that a barrel of corn should be accounted five bushels of *Winchester measure*, 40 gallons to the barrel. The commissioners of the monthly courts were to keep sealed barrels, and to seal such as should be brought to them. Whoever used unsealed barrels or bushels was to forfeit thirteen shillings and four pence, and sit on the pillory; and the measure and barrel deficient was to be broken and burnt. And for defective *weights*, it was ordained that the offender should be punished according to the statute in that case provided.

An act of 5th October, 1646, declares that merchants and others, as well *Dutch* as English, practise deceit by *diversity* of weights and measures used by them; and enacts that no merchant or trader, whether English or Dutch, shall trade with other weights and measures than according to the statute of Parliament in such cases provided. What this statute of Parliament was, is explained by an act of 23d March, 1661–'2, which declares that, "Whereas dayly experience showeth that much fraud and deceit is practised in this colony by false weights and measures;" "for prevention thereof, no inhabitant or trader hither shall trade with any other weights or measures than are used and made according to the statute of 12 Henry VII., ch. v., [the statute of 1496,] in that case provided; and that for the discovery of abuses, county commissioners shall provide sealed *weights* of half-hundreds, quarternes, half-quarternes, seaven pounds, fower pounds, two pounds, one pound, measures of ell and yard, of bushel, half-bushel, peck, and gallon of Winchester measure; gallon, pottle, quart, pint, half-pint, of wine measure out of England; to be kept by the first of every commission at the house, and a burnt mark of (cv.;) and a stamp for leaden weights and pewter potts, whither all persons, not using weights and measures brought out of England and sealed there, shall bring all their barrels (which are to contain five bushels) and other measures to be sealed, and their stillyards to be tried." Then follow penalties (in tobacco) for selling by other than sealed weights and measures, and upon commissioners for not providing standards.

Thus in Virginia, as in Maryland, the English statute of Henry VII., of 1496, has for near a century and a half been nominally the law of the land concerning weights and measures; while, at the same time, the actual weights and measures of capacity have been copies from the standards in the exchequer, not one of which has ever been conformable to the statute of 1496. And this very act of Virginia, of 1661, while establishing by law the exclusive *troy* weight, *wine* gallons, and never-made bushel, of the English act of 1496, requires of the county commissioners to provide the *avoirdupois* weights and the *Winchester* measures of the English exchequer.

In the year 1734, a new and amendatory act "for more effectual obliging persons to buy and sell by weights and measures according to the English standard" repeated all the principal provisions of the act of 1661, omitting, however, all reference to the English act of Parliament of 1496. And since the Revolution, by an act of the Legislature of Virginia of the 26th December, 1792, this act of 1734 is continued, to remain in full force until the Congress of the United States shall have otherwise provided.

Among the numerous wise and honorable examples which the Commonwealth of Virginia has given to her sister States of this Union, has been that of an undertaking to compile and publish a complete collection of her *statutes at large;* that is, of all the acts of her legislative assemblies, from the first settlement of the colony to the present time. This work is at this time in the process of publication; and, besides exhibiting the series of all the direct proceedings for the regulation of weights and measures, contains a mass of information shedding light on every portion of our national history. The connexion of weights and measures with the successive progress of this legislation is more intimate and remarkable from the fact that the original staple commodity of the colony, *tobacco*, was, for more than a century, not only merchandise, but *money*. It was the circulating medium of exchange, and to a great degree so continued until supplanted by the modern and less valuable article of bank paper. To trace the varieties of value affixed to this article of tobacco, in its character of a circulating medium, as rated by legislative enactments, in comparative estimation with other articles of traffic with the sterling currency of the mother country, with foreign coins of gold, silver, and copper, with the assessment of taxes, the levies of imposts, the wages of labor, and the compensations for public service, would be an inquiry into facts of high and interesting curiosity, but too far transcending the immediate objects of Congress to be properly comprised in this report. It must suffice to say, that the inspection laws relating to this article have been so numerous and so variant, that the collection of them would alone fill several volumes. The latest of these laws, and that which is now in force, is of March 6,

1819, and provides that the tobacco hogshead shall not be more than 54 inches long of the stave, nor more than 34 inches at the head within the crow, making reasonable allowance for prizing, not exceeding two inches above the gauge in the prizing head; and that it shall contain 1,250 pounds nett of tobacco, with certain allowances for shrinkage.

The assize of casks for other articles, as in most of the other States in the Union, is regulated by different laws, adapted to the different articles. The barrel for tar, pitch, and turpentine, by an act of 26th December, 1792, must contain 31½ wine gallons, the precise nominal dimensions of the old English wine barrel or half-hogshead, as prescribed by acts of Parliament time out of mind. But, by the same act of 1792, barrels for beef and pork are to contain 204 pounds nett of meat, with an allowance of 2½ per cent. for shrinkage, and are to be of capacity from 29 to 31 gallons. By another act of 28th December, 1795, barrels for fish are to be of not less than 30, nor more than 32 gallons. By an act of 8th January, 1814, the barrel of *salt* is to contain five bushels; agreeing thereby with the primitive Virginian corn barrel of 1631. But an act of 18th February, 1819, now requires that the barrels for bread, flour, or Indian meal, should be made of staves 27 inches long, and be of 17½ inches diameter at the head, and contain 196 pounds of flour or meal.

The size of staves and heading is regulated by an act of 21st February, 1818, as follows:

Staves, long butt, from 5 feet 6 inches to 5 feet 9 inches long; from 5 to 6 inches broad; from 2 to 2½ inches thick.

Do. short butt and pipe, from 4 feet 6 to 4 feet 9 inches long; from 3 to 4 inches broad; from ⅝ of an inch to 1¼ inch thick.

Do. hogshead, from 3 feet 6 to 3 feet 9 inches long; from 3 to 4 inches wide; from ¾ to 1¼ inch thick.

Do. barrel, from 2 feet 8 to 2 feet 10 inches long; not less than 3 inches wide; not less than ¾ of an inch thick in any place.

Do. heading, of 28, 30, 32, in due proportion, and not more than 34 inches long; from 5 to 7 inches broad, dressed, and clean of sap; and from ¾ to 1¼ inch thick.

NORTH CAROLINA.

The only law of this State relating to weights and measures, a knowledge of which has been obtained, was enacted prior to the American Revolution, during the administration of Governor Gabriel Johnston, and is yet in force. It prohibits the use, in trade, by all the inhabitants or traders within the province, of any weights and measures other than are made and used *according to the standard in the English exchequer*, and the statutes of England in that case provided. It charges the justices of the county courts to provide, at the charge of each county, sealed weights of half-hundred, quarter of hundred, seven pounds, four pounds, two pounds, one pound, and half-pound; measures of ell and yard, of brass or copper; measures of half-bushel, peck, and gallon of dry measure, and a gallon, pottle, quart, and pint, of wine measure. It prescribes the appointment of standard-keepers in each county, to whom all weights and measures of the inhabitants are to be brought to be sealed, and who are to be sworn to the faithful discharge of their duties; and it subjects to suitable penalties the various offences of falsifying weights and measures, or of trading with such as have not been duly tried by the standard, and sealed. It also repeals all former laws of the province upon the subject.

SOUTH CAROLINA.

By an act of 12th April, 1768, the public treasurer was required to procure, of brass or other proper metal, one weight of 50 pounds, one of 25 pounds, one of 14 pounds, two of 6 pounds, two of 4 pounds, two of 2 pounds, and two of 1 pound, avoirdupois weight, according *to the standard of London;* and one bushel, one half-bushel, one peck, and one-half peck measures, according *to the standard of London.* The weights were to be stamped or marked in figures denominating their weight, and to be kept by the public treasurer; and, by these weights and measures, declared to be the standards, all others in the province were to be regulated. By another act, of 17th March, 1785, subsequent to the Revolution, the justices of the county courts were authorized to regulate weights and measures within their respective jurisdictions, and to enforce the observance of their regulations by adequate penalties.

GEORGIA.

An act of the State Legislature of 10th December, 1803, declares the standard of weights and measures established by the corporations of the cities of Savannah and Augusta to be the fixed standard of weights and measures within the State; and that all persons buying and selling shall use that standard until the Congress of the United States shall have made provision on that subject. It directs the justices of the inferior courts in the respective counties to obtain standards conformable to those of the corporation of one of those cities; and prescribes regulations for keeping the standards, and for trying, marking, and sealing by them the weights and measures of individuals, with penalties for using in traffic any others not corresponding with them.

An ordinance of the city council of Augusta directs that all weights for weighing any articles of produce or merchandise shall be of the *avoirdupois* standard weights; and all measures for liquor, whether of wine or ardent spirits, of the *wine* measure standard; and all measures for grain, salt, or other articles usually sold by the bushel, of the dry or *Winchester* measure standard. And it prohibits the use of any other than brass or iron weights thus regulated, or weights of any other description than those of 50, 25, 14, 7, 4, 2, 1, ½, ¼ pound, 2 ounces, 1 ounce, and downwards.

KENTUCKY.

An act of the Legislature of the 11th December, 1798, reciting, in its preamble, that Congress are empowered by the federal constitution to fix the standard of weights and measures, and that they had not passed any law for that purpose, recognises, as thereby remaining in force within that commonwealth, the act of the General Assembly of Virginia of the year 1734.

It therefore authorizes and directs the Governor to procure one set of the weights and measures specified by the Virginian act of 1734, with measures of the length of one foot and one yard; and declares that the bushel dry measure shall contain 2150⅖ solid inches, and the gallon of wine measure 231 inches. It provides that these standards shall be kept by the Secretary of State of the commonwealth; that the Governor shall cause to be made, and transmitted to each county, scales and standards conformable to those of the State, which are to be kept by persons to be appointed by the county courts, and with which all the weights and measures used in trade by individuals are to be made to correspond.

TENNESSEE.

From a communication received from the Governor of the State of Tennessee, it appears that there is in that State no standard of weights and measures fixed by the Legislature.

OHIO.

The only act of the Legislature of the State of Ohio on this subject is of 22d January, 1811. It directs the county commissioners of each county in the State to cause to be made one half-bushel measure, to contain $1075\frac{2}{10}$ solid inches, which is to be kept in the county seat, and to be called the standard.

LOUISIANA.

Before the accession of Louisiana to the Union of these States, the weights and measures used in the province were those of France, of the old standard of Paris. An account of these, and of the present state of the weights and measures in the State of Louisiana, is submitted in the appendix to this report.

By an act of the Legislature of 21st December, 1814, the Governor of the State was required to procure, at the expense of the State, weights and measures corresponding with those used by the revenue officers of the United States, together with scales and a seal, to be deposited in the custody of the Secretary of the State, to serve as the general standard for the State.

Provision was also made by the same act for the appointment of an inspector at New Orleans, and for furnishing standards to the several parishes throughout the State.

By the last section of this act, a special dry measure is ordained, by the name of a barrel, to contain three and a quarter bushels, according to the American standard, and to be divided into half and quarters-barrel. The capacity of this measure, containing, according to the law, 6988.86 cubic inches, is referrible to none of the usual dry measures of the ancient Paris standard, but corresponds with tolerable exactness with the ancient Bordeaux half-hogshead, and with the assize of barrels prescribed by almost all the States of the Union, for packing beef, pork, and flour for exportation.

INDIANA.

An act of the Territorial Legislature of 17th September, 1807, authorized the courts of common pleas of the respective counties in the Territory, whenever they might think it necessary, to procure a set of measures and weights for the use of the county; namely, one measure of one foot, or twelve inches English measure, so called; one measure of three feet, or thirty-six inches English measure; one half-bushel for dry measure, to contain $1075\frac{1}{5}$ solid inches; one gallon measure, to contain 231 solid inches; the measures to be of wood, or any metal, as the court may think proper; also, one set of avoirdupois weights, to be sealed with the name or initial letters of the county. These weights and measures were to be kept by the clerks of the county courts for the purpose of trying and sealing those used in their counties. After due notice given by the courts that these standards had been procured, all persons were prohibited from buying or selling by weights or measures not corresponding with them; and the clerk was to try and seal all weights or measures brought to him therefor corresponding with the standard. This act was to continue in force till Congress should otherwise provide.

The provisions of this act are, in substance, and nearly to the letter, repeated in an act of the State Legislature of 21st January, 1818.

There is also an act of 24th December, 1816, regulating the inspection of tobacco, and one of 2d January, 1819, regulating the inspection of flour, beef, and pork. The assize of hogsheads and of casks prescribed in them is the same as that of the Virginia laws.

MISSISSIPPI.

An act of the Territorial Legislature of 4th February, 1807, directed the treasurer to procure a set of the large avoirdupois weights, according to the standard of the United States, if one were established, but if there were none such, according to the standard of London, with proper scales for weights, together with measures of foot and yard, dry measures of capacity, and liquid *wine* measures. He was also required to furnish each county in the Territory with a set of weights, scales, and measures, conformable to the above standards, to be kept by a person appointed by the county courts, under oath, and accessible to all persons desirous of having their weights and measures tried and sealed. Penalties were also annexed to the use of weights and measures not corresponding with these standards.

A subsequent act of 23d December, 1815, further required of the treasurer to procure six sets of the weights and measures as above described, and to distribute them at suitable places in the several counties of the Territory; and additional penalties were prescribed for the use of weights and measures not corresponding with the standard.

An act of the Legislature of the State of Mississippi of 6th February, 1818, "to provide for inspections and for other purposes," contains many other regulations for the keeping of the standard weights and measures, and for securing conformity to them. It makes no alteration of the standard, but confirms, "until Congress shall fix a standard for the United States," that which had already been established. It also requires that barrels of flour should contain 196 pounds nett, and barrels of pork and beef 200 pounds nett of meat.

ILLINOIS.

The Territorial act of 17th September, 1807, passed while the State of Illinois formed a part of the Indiana Territory.

But by an act of the Legislature of this State "regulating weights and measures," of 22d March, 1819, the county commissioners of each county in the State were required to procure, at the expense of the county, one foot and one yard English measure; a gallon liquid or wine measure to contain 231 cubic inches; corresponding quart, pint, and gill measures, of some proper and durable metal; a half-bushel dry measure to contain eighteen quarts, one pint, and one gill, wine measure, or 1075.2 cubic inches, and a gallon dry measure to contain one-fourth part of the half-bushel; these two measures to be of copper or brass: also a set of weights, of one pound, one-half pound, one-eighth pound, and one-sixteenth pound, made of brass or iron, the integer of which to be denominated one pound avoirdupois, and to be equal in weight to 7,020 grains troy or gold weight. These weights and measures are to be kept by the clerk of the county commissioners for trying and sealing the measures and weights in common use.

All persons are authorized to have their weights and measures tried by the standards and sealed; and are forbidden, upon suitable penalties, to buy or sell by others not corresponding with them.

The most remarkable peculiarity of this act is, its departure from the English standard weights, by fixing the avoirdupois pound at 7,020 instead of 7,000 grains troy.

ALABAMA.

This State having formed a part of the Mississippi Territory previously to the admission of the State of Mississippi into the Union in 1817, the acts of that Territory of 4th February, 1807, and 23d December, 1815, embraced this section of territory. No act of the State Legislature of Alabama on this subject is known to have been passed.

MISSOURI.

The Territorial Legislature, by an act of 28th July, 1813, directed the several courts of common pleas within the Territory to provide, for and at the expense of the respective counties, one foot and one yard English measures; one half-bushel to contain 1075$\frac{1}{5}$ solid inches for dry measure; one gallon to contain 231 solid inches, and smaller liquid measures in proportion, to be of wood or any metal the court should think proper; also, one set of avoirdupois weights, and one seal, with the initial of the county inscribed thereon: all to be kept by the clerks of the courts of common pleas or circuit courts, for the purposes of trying and sealing the measures and weights used in their counties.

The use, or keeping to buy or sell, of weights or measures not corresponding with these standards, after due notice, was prohibited under penalties by the same acts, but with a proviso that all contracts or obligations made previous to the taking effect of the act should be settled, paid, and executed agreeably to the weights and measures in common use when the contracts or obligations were made or entered into.

DISTRICT OF COLUMBIA.

By the act of Congress of 27th February, 1801, concerning the District of Columbia, the laws of the State of Virginia, as they then existed, were continued in force in the part of the District which had been ceded by that State, and the laws of Maryland in the part of the District ceded by Maryland.

The act to incorporate the inhabitants of the city of Washington, of 3d May, 1802, authorizes the corporation to provide for the safe-keeping of the standard of weights and measures fixed by Congress, and for the regulation of all weights and measures used in the city.

The supplementary act of 24th February, 1804, gives the city council power to establish and regulate the inspection of flour, tobacco, and salted provisions, and the gauging of casks and liquors.

And by the act of 4th May, 1812, further to amend the charter of the city of Washington, further power is given to the corporation to regulate the measurement of, and the weight by which all articles brought into the city for sale shall be disposed of.

The weights and measures of the city have accordingly been regulated by various acts of the corporation, conformably to the standard used in the State of Maryland. The inspection laws, the assize of tobacco hogsheads and flour casks, the dimensions of bricks and of cord wood, are all formed upon the same model. The weight of bread is adapted once a month to the price of flour; but, by a special ordinance, all coal for sale within the city is sold by a measure containing five struck-standard half-bushels, stamped and marked by the sealer of weights and measures, and the stricken measure of which is considered as two bushels.

As preliminary remarks in reference to that part of the resolutions of both Houses which requires the opinion of the Secretary of State with regard to the measures which it may be proper for Congress to adopt in relation to weights and measures, it may be proper to state the extent of what can be done by Congress. Their authority to act is comprised in one line of the constitution, being the fifth paragraph of the eighth section and first article, in the following words: "*to fix the standard of weights and measures.*"

It may admit of a doubt whether, under this grant of power, is included an authority so totally to subvert the whole system of weights and measures as it existed at the time of the adoption of the constitution as would be necessary for the introduction of a system similar to that of the French nation. To *fix* the standard appears to be an operation entirely distinct from changing the denominations and proportions already existing, and established by the laws or immemorial usage. And this doubt acquires a further claim to consideration, if it be true, as the experience of other nations seems to warrant us in the conclusion, that there is no object of regulation by human power in which the prescriptions of a Government are so difficult to be carried into execution. Throughout Europe, in the most absolute as well as in the freest Governments, every historical research presents a fruitless struggle on the part of authority to introduce order and uniformity, and an unconquerable adherence of custom to the diversities of usage among the people. There is, perhaps, less of this diversity in the United States than in any country in Europe. At the adoption of the constitution, all the weights and measures in common use throughout the United States were derived, either by the statutes of the States, or by an invariable usage, which had supplied the place of law, from the standards in the English exchequer. Hence, the English foot, divided into twelve inches, was the unit of all measures of matter in length, breadth, or thickness. Its various multiples of the yard, ell, perch, pole, furlong, acre, and mile, were all recognised by the laws, and in the familiar use of the people. The avoirdupois and troy weights, with the difference of modification of the latter as used for weighing the precious metals or apothecaries' drugs in retail, the wine gallon of 231, and the beer gallon of 282 solid inches, were equally well known, and in general use, and the Winchester bushel of 2150.42 solid inches formed the general standard of all the dry measures of capacity.

In many of the States the standards established by statute had been procured from the court of exchequer; and the only variety discernible in the legislation of the States on this subject arises from a difference existing in the several standards of the same measures at the exchequer and at Guildhall, in London.

In the exercise of the authority of Congress, with a view to the general principle of uniformity, there are four different courses of proceeding which appear to be practicable:

1. To adopt, in all its essential parts, the new French system of weights and measures, founded upon the uniformity of identity.

2. To restore and perfect the old English system of weights, measures, moneys, and silver coins, founded upon the uniformity of proportion.

3. To devise and establish a system in which the uniformities of identity and of proportion shall be combined together by adaptations of parts of each system to the principles of the other.

4. To adhere, without any innovation whatever, to our existing weights and measures, merely fixing the standard.

1. In the review which has been taken, and the comparison which has been submitted to Congress between the old English and the new French, or, as they may with more propriety be called, the ancient and the modern systems of metrology, it has been the endeavor of this report to show that, while each of these systems embraces principles of the highest importance, neither of them includes all the elements resulting from the nature of the relations between man and things as created beings, and between man and man in society, mingling in the purposes to which weights and measures are applicable. The opinion has been expressed that the uniformity of proportion in the ancient system, uniting weight and measure by the relative gravity, extension, and numbers incident to dry and liquid substances, possessed advantages of which the uniformity of identity in the modern system was entirely deprived; that the property of the ancient system, by which the money weight and the silver coin were the same,

the most useful of all uniformities of which weights, measures, money, and coins are susceptible, was very imperfectly adapted to the modern system of France; that the French system, admirable as it is, looked, in its composition, to weights and measures more as exclusively matters of account than as tests of quantity; that, in its eagerness for extreme accuracy in the relations between things, it lost sight a little of the relations of weights and measures with the physical organization, the wants, comforts, and occupations of man; that, in its exclusive partialities for decimal arithmetic, it forgot the inflexible independence and the innumerable varieties of the forms of nature, and that she would not submit to be trammelled for the convenience of the counting-house. The experience of the French nation under the new system has already proved that neither the immutable standard from the circumference of the globe, nor the isochronous vibration of the pendulum, nor the gravity of distilled water at its maximum of density, nor the decimation of weights, measures, moneys, and coins, nor the unity of weight and measure of capacity, nor yet all these together, are the only ingredients of practical uniformity for a system of weights and measures. It has proved that gravity and extension will not walk together with the same staff; that neither the square, nor the cube, nor the circle, nor the sphere, nor the revolutions of the earth, nor the harmonies of the heavens, will, to gratify the pleasure or to indulge the indolence of man, be restricted to computation by decimal numbers alone.

The substitution of an entire new system of weights and measures, instead of one long established and in general use, is one of the most arduous exercises of legislative authority. There is, indeed, no difficulty in enacting and promulgating the law; but the difficulties of carrying it into execution are always great, and have often proved insuperable. Weights and measures may be ranked among the necessaries of life to every individual of human society. They enter into the economical arrangements and daily concerns of every family. They are necessary to every occupation of human industry; to the distribution and security of every species of property; to every transaction of trade and commerce; to the labors of the husbandman; to the ingenuity of the artificer; to the studies of the philosopher; to the researches of the antiquarian; to the navigation of the mariner, and the marches of the soldier; to all the exchanges of peace, and all the operations of war. The knowledge of them, as in established use, is among the first elements of education, and is often learned by those who learn nothing else, not even to read and write. This knowledge is riveted in the memory by the habitual application of it to the employments of men throughout life. Every individual, or at least every family, has the weights and measures used in the vicinity, and recognised by the custom of the place. To change all this at once, is to affect the well-being of every man, woman, and child in the community. It enters every house, it cripples every hand. No legislator can attempt it with any prospect of success, or any regard to justice, but upon two indispensal le conditions: one, that he shall furnish every individual citizen easy access to the new standards which take the place of the old ones; and the other, that he shall enable him to *know* the exact proportion between the old and the new. A multiplication of standard copies to a great extent is indispensable; and the distribution of them throughout the country, so that they may be within the means of acquisition to every citizen, is among the duties of the Government undertaking so great a change. Tables of equalization must be circulated in such a manner as to find their way into every house; and a revolution must be effected in the use of books for elementary education, and in all the schools where the first principles of arithmetic may be taught. All this has been done in France, and all this might be done, perhaps, with more ease in the United States. But were the authority of Congress unquestionable to set aside the whole existing system of metrology, and introduce a new one, it is believed that the French system has not yet attained that perfection which would justify so extraordinary an effort of legislative power at this time.

The doubts entertained whether an authority so extensive as this operation would require has been delegated to Congress are strengthened by the consideration of the character of the executive power, corresponding with the legislative authority. The means of execution for exacting and obtaining the conformity of individuals to the ordinances of the law in the case of weights and measures belong to that class of powers which, in our complicated potitical organization, are reserved to the separate States. The jurisdictions to which resort must be had for transgressions of this description of laws are those of municipal police. In England they were originally of the resort of views of frank-pledge in every separate manor, and have since been transferred to the clerks of the market and to the justices of the peace. The sealers of weights and measures, officers who have the custody of the standards, and the authority to compare with them, from time to time, the weights and measures used by individuals, and to prosecute for all offences by variations from the standards, and the courts before whom all such offences are triable, are institutions not only existing in almost every State in the Union, but essentially belonging to that portion of public authority suited to the State administration rather than to that of the Union. It is a general principle of our constitutions, that, with every delegation of legislative authority, a co-extensive power of execution has been granted. Affairs of municipal and domestic concern have, for obvious reasons, been reserved to the State authorities; and of this character are most of the regulations and penal sanctions for securing conformity to the standards of weights and measures. In *fixing the standard*, it is believed that Congress must rely almost entirely, if not altogether, upon State executive authorities for carrying their law into execution. And, although this reliance may be safely indulged in relation to a law which should merely fix the uniformity of existing standards, its efficacy would be very questionable in the case of a law of great and universal innovation upon the habits and usages of the people. Of such a law the transgressions could not fail to be numerous; any doubt of the authority of the legislator would stimulate to systematic resistance against it, and the power of enforcing its execution being in other hands, naturally disposed to sympathize with the offender, the whole system would fall into ruin, and afford a new demonstration of the impotence of human legislation against the laws of nature in the habits of man.

2. The restoration of the old English, which was also the Greek and Roman system of weights, measures, and silver coins, founded upon the uniformity of proportion, would require an exercise of authority no less transcendent than the introduction of the French system. Its advantages were, the identity of the money weight and silver coin, the wine gallon at once a multiple of the money weight, and an aliquot part of the cubic foot, and its proportions of the money and commercial pounds, and of the wine and corn gallons, to the relative specific gravity of wine and wheat. But, as all these combinations were founded upon the assumption that the relative gravity of wheat to wine was as 4 to 5, and that the gravity of wine and of spring water was the same; and as it allowed of the making of the wine gallon by two processes—by the weight of wheat multiplied, and by the weight of the cubic foot of water divided, the result of the two processes was not exactly the same. The Irish gallon, of 217.6 inches, was made by one process; and the Romford gallon, of 266.25, was its corresponding corn and ale measure. A wine gallon of 219.5 cubic inches was made by assuming 252 gallons as the measure of the tun, or 32 cubic feet; and its corresponding corn measure was the Winchester bushel, with an ale gallon of 268. The Winchester bushel is the only existing relic of the old English system, which has outlived all the changes of the laws, and all the revolutions of ages. Should that be retained, and its contents fixed at 2148.5, to restore and perfect the whole system by an exact combination of the two modes of forming the water gallon, without regard to the weight of wine, would require a liquid gallon of 219.5 inches, a dry gallon of 268.5, a money pound of 5714.28, and a commercial pound of 6944.44 grains troy. This money pound should then be made the weight of the unit of silver coins, of a settled

standard purity, and might be decimally divided, like our present silver coins, and decimally or duodecimally divided as a weight. Or, the tun might be declared to contain 256 gallons of 216 cubic inches; in which case the money pound would be of 5,625, and the commercial pound of 6,836 grains troy; the corn and ale gallon of 262.5, and the bushel of 2,100 cubic inches. If the old easterling twelve and fifteen ounce pounds should be restored, and the gallon, according to its primitive composition, be made to contain 10 twelve-ounce pounds of wine, it would then be, considering the gravity of wine as of 250 grains troy to a cubic inch, of the same capacity of 216 cubic inches. It would also contain 8 fifteen-ounce pounds of 6,750 grains troy; but the proportion between the two pounds would not be exactly that between the gravity of wheat and wine. The wine gallon, filled with 8 twelve-ounce pounds of wheat, would contain in wine 8 pounds, not of 6,750, but of 6,608 grains; and, if divided into 15 ounces, the ounce would not be the easterling, but the avoirdupois ounce.

3. The proportions between the existing troy and avoirdupois weights, and between the wine gallon of 231, and the beer gallon of 282 cubic inches, are more exactly those between the specific gravity of wheat and of spring water than were the easterling pounds of 12 and 15 ounces, or those of the primitive gallon of 216 inches, with the ale gallon deduced from the Winchester bushel. They are exact, to the utmost degree of precision; but these proportions are without use. Neither does the wine gallon contain an exact number of pounds of wine, nor is the beer gallon an aliquot part of the bushel. These were proportions, in their origin, of great usefulness, but imperfectly settled. The whimsical operation of time and human laws upon them has been to make the proportions perfect, but to render them useless. There are, nevertheless, very useful proportions in our existing weights and measures, one of which is between the tun measure of water and the pound avoirdupois. As 1,000 ounces avoirdupois weigh exactly one cubic foot of water, it follows that the ton of 2,000 pounds weight is the ton of 32 cubic feet measure. The other is between the pound avoirdupois and the pound troy; the former consisting of precisely 7,000 grains troy. The pound avoirdupois is therefore the connecting link between weight and linear measure. It is at once a test and standard of the cubic foot, of the ton measure, and of the troy weight; while the foot, the ton, and the troy weight are each, by this connecting link, tests and standards of each other, and of the avoirdupois pound. But the 32 cubic feet, which are at once the ton weight of 2,000 pounds, and the tun measure of water, are not sufficient as measure, to contain the same weight of wheat. The bushel is the measure containing the same weight of wheat which the cubic foot contains of water. Thirty-two bushels, therefore, contain the ton weight of 2,000 pounds avoirdupois; but they would make a tun measure, within a small fraction, of 39 cubic feet.

The avoirdupois pound of 16 ounces, and of 7,000 grains troy, is used, however, only for quantities of less than a quarter of a hundred pounds. It then receives an accession of 12 per cent. on its quantity: the quarter of a hundred contains 28 pounds, the hundred 112, and the ton of 2,000 actually contains 2,240. If the hundred and twelve pounds should be considered as a nett hundred, each pound would be of 7,840 grains troy weight, and would bring it within one-quarter of an ounce troy to the weight of the French half-kilogramme or usual pound. If the wine gallon were, as under the statute of 1496 it should have been, and as the Guildhall gallon before the statute of Anne 5 actually was, of 224 inches, it would have had two further useful coincidences: it would have contained just eight pounds avoirdupois of wine; eight pounds troy weight of wheat; and a number of cubic inches in decimal subdivision to the number of pounds avoirdupois in the ton of 2,240, or twenty hundred of 112 pounds.

There are two changes, therefore, in our existing weights and measures, which would restore and perfect the system of ancient metrology: one, to make the troy weight the unit of our silver coins, in which case it might be decimally divided as coin, retaining its divisions into ounces, pennyweights, and grains, as a weight; and the other, to restore the wine gallon of 224 inches, with its corresponding ale gallon of 272, and bushel of 2,176 inches.

But it has been already remarked that in the ancient system, founded on the uniformity of proportion between the relative extension and gravity of wheat and wine, there were, in the double sets of weights and measures of capacity, two advantages: one, of a general nature, resulting from it as proportional, without reference to the articles selected for settling the proportions; and the other special, arising from the selection of wheat and wine as the articles. The first belongs to every proportional system of which the proportion between the standards is accurately ascertained, and consists in this: that each weight and each measure is a test and standard for all the others. The second depends on the selection of the articles, and is limited to the conveniences and facilities of trade, commerce, and navigation, as incidental to them. Reasons have been suggested why the two articles of wheat and wine should have been selected in the primitive system, as being, from the nature and physical constitution of man, the first, and, for many ages, the greatest and most important articles of traffic. The necessity for establishing a proportion between the relative weight and measure of those articles was also dictated by the practice of transporting them both by sea in ships.

The space in cubic feet which would be filled by a determinate weight of each of them was an object of essential importance to be known, not as a philosophical theory, but for every mechanical operation of the commerce. The size of the cask must be adapted to the capacity and the burden of the ship: and when the ton weight of wine had been adapted to the tun measure of water, it became of the utmost use to make the measure of corn so correspond with the cask of wine as to contain the same determinate quantities by weight. But in modern times, and especially to these United States, neither wheat nor wine is an article of primary importance in domestic trade or in foreign commerce. Whatever may be the capacities of our country for producing wine, they have hitherto scarcely been discovered. Tea and coffee have taken the place of wine as comforts, or next to necessaries of life, and have degraded that article into the class of luxuries. We import little, and export none of it. We receive it in the casks of the several countries from which it comes; and although the laws of some of our States, as well as those of England, still exhibit the absurdity of requiring that the hogshead should contain 63 wine gallons of 231 cubic inches, because it once contained 63 gallons of 219½ inches, yet no one complains that the real hogshead is just what it was 600 years ago, without either swelling to the dimensions of Queen Anne's cubic inches, or contracting the gravity of its contents to the troy weight of Henry VII. We raise vast quantities of wheat, but export it almost exclusively in its manufactured state of flour. The weight of wine is, between the buyer and seller, never a subject of inquiry. We have universally the Winchester bushel, defined by the 13th William III., of 2150.42 cubic inches, with the single exception of the State of Connecticut, whose standard bushel is *very near* 2,198 inches. And the laws of many of the States require that the bushel should contain 60 pounds avoirdupois of wheat. Should a standard bushel now be made in the manner described in the statute of 1266, it would be a measure of 2148.5 cubic inches, and would contain 60½ avoirdupois pounds of wheat. The relative proportion between the extension and specific gravity of wheat and wine is to us, therefore, of no importance or use in our system of weights and measures. When the wine gallon contained a determinate weight of the liquor, and was at the same time a sixty-third part of 8 cubic feet, there were motives of convenience and utility in using another measure for ale and beer, which, being brewed from grains, had natural proportions to the measures used for them. It was natural, therefore, to employ the eighth part of the measure of the bushel as the beer gallon, though at the same time a vessel of smaller size was used for the measurement of wine. But since the weight of wine, and the proportions of its measuring vessel to the cubic foot, have ceased to be of any account, there is no purpose of utility

answered by the employment of two different measures for different fluids; while there is great tendency to error and fraud in the use of two such measures, of the same materials, and bearing the same name.

4. Our system of weights and measures is, therefore, susceptible of great improvements, by restoring some of the principles which belonged to the system from which it was originally derived. It is perhaps still more improvable by the adoption of some of the principles contained in the new French metrology. There is no doubt that the decimal divisions might be introduced to great advantage both into linear measure, by the adoption of the metre, and into weights, by identifying the money weight with the silver coin. It is believed that a system embracing the essential advantages of all the three might, without much difficulty, be combined; and that it would be better adapted than either of them to the use of all human kind, and thus secure, in its utmost possible extent, the uniformity with reference to persons.

Weights and measures, and the final establishment of a system for them, with a view to the utmost practicable extent of uniformity, are at this moment under the deliberative consideration of four populous and commercial nations—Great Britain, France, Spain, and the United States. The interest is common to them all: the object of *uniformity* is the same to all. Could they agree upon one result, the advantages of that agreement would be great to each of them separately, and still greater in all their intercourse with one another. But this agreement can be obtained only by consultation and concert. It is, therefore, respectfully proposed, as the foundation of proceedings necessary for securing ultimately to the United States a system of weights and measures which shall be common to all civilized nations, that the President of the United States be requested to communicate, through the ministers of the United States in France, Spain, and Great Britain, with the Governments of those nations, upon the subject of weights and measures, with reference to the principle of uniformity as applicable to them. It is not contemplated by this proposal that the communication should lead to any conventional stipulations or treaties; but it is hoped that the comparison of ideas, and the mutual reciprocation of observation and reflection, may terminate in concurrent acts, by which, if even universal uniformity should be found impracticable, that which would be obtained by each nation would at least approximate nearer to perfection.

In the mean time, should Congress deem it expedient to take immediate steps for accomplishing a more perfect uniformity of weights and measures within the United States, it is proposed that they should assume as their principle that no innovation upon the existing weights and measures should be attempted.

To fix the standard of weights and measures of the United States as they now exist, it appears that the act of Congress should embrace the following objects:

1. To *declare* what are the weights and measures to which the laws of the United States refer as the legal weights and measures of the Union.

2. To procure positive standards of brass, copper, or such other materials as may be deemed advisable, of the yard, bushel, wine and beer gallons, troy and avoirdupois weights; to be deposited in such public office at the seat of Government as may be thought most suitable.

3. To furnish the executive authorities of every State and Territory with exact duplicates of the national standards deposited at the seat of Government.

4. To require, under suitable penal sanctions, that the weights and measures used at all the custom-houses, and land surveys, and post offices, and, generally, by all officers under the authority of the United States, in the execution of their laws, should be conformable to the national standards.

5. To declare it penal to make or to use, with intent to defraud, any other weights and measures than such as shall be conformable to the standards.

1. The existing weights and measures of all the States of this Union are derived from the exchequer, or from the laws of Great Britain. The one common standard from which they are all deduced is the English foot, divided into twelve inches, and three of which constitute the yard. The positive standard yard is a brass rod of the year 1601, in the British exchequer. The unit of measure is the foot of 12 equal inches. The inch, by the English laws, is divided into three equal parts, called barleycorns; but this division is not used in practice. The practical divisions of the inch are, at option, binary or decimal; that is, of halves, quarters, and eighths, or of tenths, hundredths, and thousandths. Thirty-two cubic feet of spring water, at the temperature of 56 degrees of the thermometer of Fahrenheit, constitute the ton weight of 2,000 pounds avoirdupois. The pound avoirdupois consists of 16 ounces; the ounce of 16 drachms. The pound avoirdupois is equal in weight to 7,000 grains troy, or to 14 ounces 11 pennyweights 16 grains troy. The troy pound consists of 12 ounces, each ounce of 20 pennyweights, each pennyweight of 24 grains. It is otherwise divided for the use of apothecaries; but the grain and the pound are the same. The troy pound is equal in weight to 13 ounces and $2\frac{2}{3}$ drachms avoirdupois.

The bushel is a cylindrical vessel $18\frac{1}{2}$ inches in diameter, and 8 inches deep; or any vessel of 2150.42 cubic inches. It is divided into 4 pecks, each peck into 4 pottles, each pottle into 2 quarts, each quart into 2 pints.

The ale and beer gallon is a vessel of 282 cubic inches. It is divided into 4 quarts, each quart into 2 pints, each pint into 4 gills.

The wine gallon is a vessel of 231 cubic inches; divided, like the beer gallon, into wine quarts, pints, and gills.

Any cubic vessel of 12.9 inches in length, breadth, and thickness, is of equal contents with the Winchester bushel. Any cubic vessel of 6.55767 is of equal contents with the ale gallon. Any cubic vessel of 6.13579 is a wine gallon.

For the purposes of the law, it will be sufficient to declare that the English foot, being one-third part of the standard yard of 1601 in the exchequer of Great Britain, is the standard unit of the measures and weights of the United States; that an inch is a twelfth part of this foot; that 32 cubic feet of spring water, at the temperature of 56 degrees of Fahrenheit's thermometer, constitute the ton weight of 2,000 pounds avoirdupois; that the gross hundred of avoirdupois weight consists of 112 pounds, the half-hundred of 56, and the quarter-hundred of 28, the eighth of a hundred of 14, and the sixteenth of a hundred of 7 pounds; that the troy pound consists of 5,760 grains, 7,000 of which grains are of equal weight with the avoirdupois pound; that the bushel is a vessel of capacity of 2150.42 cubic inches; the wine gallon a measure of 231, and the ale gallon a measure of 282 cubic inches.

The various modes of division of these measures and weights, the ell measure, and the application of the foot to itinerary, superficial, and solid measure, producing the perch, rood, furlong, mile, acre, and cord of wood, may be left to the established usage, or specifically declared, as may be judged most expedient. The essential parts of the whole system are the foot measure, spring water, the avoirdupois pound, and the troy grain.

2. For the purpose of uniformity, it would be desirable to obtain a copy, as exact as the most accomplished art could make it, of the standard yard of 1601, in the exchequer of Great Britain, made of the same material, (brass,) but divided with all practicable accuracy into three feet and thirty-six inches, and each inch further divided into tenth and hundredth parts. This rod, with the words "standard yard measure of the United States—three feet—thirty-six inches," and the date of the year engraved on one of its sides, should be enclosed in a wooden case, and deposited for safe-keeping in one of the offices at the Capitol. From the foot measure of this yard the standard bushel and two gallons should be made. The avoirdupois pound and the troy weight of 256 ounces should be made

exactly conformable to the standards in the exchequer. The weights of 56, 28, 14, and 7 pounds avoirdupois should be made exact multiples of the pound weight. But no subdivisions of the bushel or gallons, or of the avoirdupois pound, should be placed among the standards. An enactment that no subdivisions of the standards other than in the due proportion to them should be legal, would avoid the inconvenience and the varieties which multiplied material standards always produce. All the standards should, like the yard, have their names, as standards of the United States, the date of the year, and a designation of quantity engraved upon them. On the bushel, for instance, "$2150\frac{42}{100}$ cubic inches;" on the wine and ale gallons, respectively, 231 and 282 inches; on the avoirdupois pound "7,000 grains troy weight, avoirdupois pound;" on the troy weights "256 ounces—12 ounces, or 5,760 grains, to the pound troy weight." These standards, all enclosed in suitable cases, to preserve them from injury and as effectually as possible from decay, should be deposited in the custody of a sworn and responsible officer, with the standard yard.

3. These national standards being thus made and deposited, exact copies of them should be made of the same materials, substituting for the words "standard of the United States," engraved upon the originals, the words "United States standard, State of ——;" and these copies should be transmitted to the Executives of every State in the Union. The standard for the Territories might leave the name of the State to be engraved when the Territory should pass to that condition; and the standards for the District of Columbia might properly be committed to the charge of the clerk of the Supreme Court of the United States.

4. It should be made the duty of the collectors, surveyors, and naval officers of the customs, the registers of the land offices, and receivers of public moneys, of the Postmaster General, and all postmasters, the quartermasters, and commanding officers at military posts of the army, the commanding officer and purser of every vessel of the navy, the commanding officer at the Military Academy, of all Indian agents, and of the marshals of the several judicial districts of the United States, to ascertain and to certify, in writing, upon oath, to the heads of their respective departments, that the weights and measures used by them in the discharge of their official duties are conformable to the standards of the United States. And to secure the future observance of this uniformity, every such officer, civil or military, to be appointed hereafter, should, together with the oath to support the constitution of the United States, have administered to him an oath that he will, in the discharge of his official duties requiring the employment of weights and measures, scales and beams, use such as are conformable to the legal standards of the United States, and not knowingly any others. To the penalties of removal from and disqualification for office might be added a right of action for damages given to any person injured by the wilful neglect or refusal of any such officer to observe the requisitions of the law.

5. The offence of fraudulently or wilfully making or selling any weight, measure, scales, or beam, to be used as conformable to the United States standards, and not conformable, might be made punishable by fine and imprisonment upon presentment and conviction before the circuit courts of the United States.

The existing laws of all the States should be declared, so far as they are conformable to the act of Congress *fixing* the standard, to remain unrepealed and in full force. All sealers of weights and measures, and all persons appointed under the authority of the several States for the custody of standards, should be required to ascertain them to be conformable to the standards of the United States. It is scarcely possible that any law of the United States to establish uniformity of weights and measures throughout the Union should be made effectual without the cordial aid and co-operation of the State legislative and executive authorities. This is one of the most powerful reasons which have led to the conclusion that, in fixing the standard, all present innovation should be avoided. The standards of all the States are now, or by their laws should be, the same as those herein proposed, excepting only the Connecticut bushel—the change in which will be inconsiderable. Several of the States have systems well organized, and in full operation for the uniformity of their weights and measures. The standards of many of them are incorrect; some from careless usage and decay, others from having been copies of copies made without much attention to accuracy, and others from having transferred to this country all the varieties of the original standards in the exchequer. The object of the act, the substance of which is now proposed to Congress, would be to make the uniformity already existing by the laws and usages of every part of the Union more effectual and perfect in point of fact. The table* of a return from the several custom-houses of the United States will show the extent of the existing varieties; and, while they add new demonstration of the justness of the sentiment universally prevailing that the authority delegated to Congress by the constitution of fixing the standard should be exercised without delay, they also show that the best exercise of that authority will be by making it essentially auxiliary to the efficacy of the existing State laws.

In the consultation which it is proposed that the President of the United States should be requested to authorize and conduct with foreign Governments, with a view to future, more extensive, and perfect uniformity, there is one object which, it is presumed, may be accomplished with little difficulty or expense, and by means of which the standard from nature of the new French system, the metre, may be engrafted upon our system without discomposing any of its existing proportions.

In all the proceedings, whether of learned and philosophical institutions or of legislative bodies, relating to weights and measures, within the last century, an immutable and invariable standard from nature of linear measure has been considered as the great desideratum for the basis of any system of metrology. It is one of the greatest merits of the French system to have furnished such a standard for the benefit of all mankind in the metre, the ten millionth part of the quarter of the meridian. Of the labors, and researches, and liberal expense, and art and genius which have been lavished by France upon this operation, and of the success with which it has been accomplished, the notice which it amply merited has already been taken in this report. Since this great and admirable undertaking has been achieved, a disposition to detract from its merit and usefulness has been occasionally manifested. Some philosophical speculators have started doubts whether the metre is really the forty millionth part of the circumference of the earth; and, indeed, whether such a measure can, with perfect accuracy, be ascertained by human art. Other standards from nature have been suggested as preferable to the arc of the meridian; individual passions and antisocial prejudices have insinuated themselves into the inquiry; and the question between the metre and the pendulum has almost festered into a test of party controversy and an engine of national jealousy. In the establishment of the French system, the pendulum, as well as the meridian, has been measured; but the *standard* was, after long deliberation, after a cool and impartial estimate of the comparative advantages and inconveniences of both, definitively assigned to the arc of the meridian, in departure from an original prepossession in favor of the pendulum. Two reasons are deemed decisive for concurring in the principle of this determination: one, that the earth being the greatest object of actual measurement within the physical powers of man, an aliquot part of its circumference is the only measure which, applicable to that object, is also equally applicable to every other purpose of weight or mensuration; and the other, that this standard, once settled, is invariable, while the pendulum, being of different lengths in different latitudes, is essentially defective in one of the most important principles of uniformity—that of *place*, or capacity of application to every part of the earth.

* See appendix.

It is proposed, therefore, to discard all consideration of the pendulum, as the theory of its vibrations, however interesting in itself, is believed to be, since the definitive determination of the metre, useless with reference to any system of weights and measures. Nor is it of more importance to know whether the metre really be, within the ten thousandth part of an inch, an exact aliquot part of the circumference of the earth. An error to that, or even to a greater extent, admitted to be possible, leaves for all practical purposes of human life, even including the operations of geography and astronomy, the metre as perfect a standard for weights and measures as any other that ever was devised, and a much more perfect one than the pendulum.

It is therefore submitted to the consideration of Congress that, in the act for fixing the standard of weights and measures for the United States, together with a definition of the foot, its exact proportion to the standard metre of France should be declared; to effect which purpose with the most attainable accuracy, it would be necessary to compare together the identical measure, to be used hereafter as the standard linear measure of the Union, with the standard metre in platina, deposited in the national archives of France. It is not doubted that the French Government would readily give their assent to this operation, and would agree that it should be performed in such manner as to settle definitively, for the future use of both countries, the exact proportion to the ten-thousandth part of an inch between the foot measure of the United States and the metre. From the perfection which the instruments used for comparing together measures of length have attained, accuracy to that extent may be effected. But the necessity of such an operation for the definitive settlement of this proposition is apparent from the fact that the comparisons hitherto made in France, and in England, and in the United States, though all made with all possible care, have terminated in results so different, that it would scarcely be safe to assume either of them as the proportion to be declared by a legislative act.

In the attempt to determine distances of space less than the two hundredth part of an inch, the experiment is met by obstacles in the temperature and pressure of the atmosphere, and in the different degrees of their influence upon the matter to be measured. Heat and cold, moist and dry, high and low, affect the metals of which measures are composed, with various degrees of dilatation and contraction. Brass, the metal of which the English standards are formed, being a compound metal, is variously dilatable; and, although tables have been formed of the degrees in which the simple metals are expanded by heat, according to the scale of the thermometer, yet, as those tables, made by different men, do not agree, no perfect reliance can be had upon them. As yet, no experiments of admeasurement, made by different persons at different times, but of the same standards, have exhibited results approximating within one two-hundredth part of an inch. Of a contrary result, the examples are numerous, and so remarkable that they deserve to be noticed more particularly.

In the year 1797, Sir George Shuckburg Evelyn measured with Troughton's microscopic beam compass and scale all the standards at the exchequer; the scale made by Sisson for Graham in 1742; the parliamentary standards of 1758 by Bird; the scale used by General Roy for the measurement of the base, and several others. The result of his experiment was published in the Transactions of the Royal Society of that year. He found that the standard yard of Elizabeth at the exchequer marked 36.015 inches; Bird's parliamentary standard of 1758 36.00023, and General Roy's scale 36.00036, on the scale of Troughton.

In the year 1818, Captain Henry Kater, one of the commissioners of the Prince Regent, with the same microscopic beam compass of Troughton, measured the same scale of General Roy, and found 39.4 inches on the latter to be equal to 39.40144 on the scale of Troughton. The difference between these two results is $\frac{105}{10000}$, or rather more than a hundredth part of an inch. Captain Kater, to account for it, supposes that when Sir George Shuckburg made the comparison, the two scales were not at the same temperature: but Sir George Shuckburg, in his own account of his experiments, expressly mentions his leaving together another of the scales with that of Troughton, by which he measured it 24 hours, that they might acquire the same temperature; and marks the state of the thermometer (51.7) when he measured the scale of General Roy. Captain Kater states the thermometer, when he measured it, to have been at 70.

A difference equally striking has happened in the experiments made in France and England to ascertain the relative proportions of the English foot and of the French metre. The result of numerous experiments made in France, under the direction of the National Institute or Academy of Sciences, has been to announce the metre to be precisely equal to 39.3824 English inches. The result of Captain Kater's experiments, after numerous others under the direction of the Royal Society, is the declaration that the French metre is equal to 39.3708 English inches. The difference is $\frac{116}{10000}$ of an inch, more than one hundredth part, and as near as possible the same as that of the experiments of Captain Kater and of Sir George Shuckburg Evelyn upon the scales of Troughton and of General Roy.

A very interesting account of experiments made in this country by Mr. Hassler to ascertain the length of the metre is subjoined to this report, from which the mean length of four standard metres was found to be 39.38024797 English inches upon a scale of Troughton's, of equal perfection with that of Sir George Shuckburg Evelyn.

Again, in the year 1814, the committee of the House of Commons resolved, and, in 1815, the House itself enacted, that the length of a pendulum vibrating seconds, in the latitude of London, had been ascertained to be 39.13047 inches of Bird's parliamentary standard yard.

In the year 1818, Captain Kater reported, as the result of his experiments, that the length of the pendulum vibrating seconds *in vacuo* at the level of the sea, at the temperature of 62° of Fahrenheit, in latitude 51° 31′ 8″ 4‴ north, (London,) was 39.13842 inches of the same Bird's parliamentary standard yard.

The difference is $\frac{795}{10000}$, or a one hundred and twenty-sixth part of an inch.

By assuming a mean average from all these experiments, and the yard of Elizabeth at the exchequer, (the standard from which all the long measures of the United States are derived,) as the measure of comparison, we might be warranted in taking 39.38 English inches as the length of the French platina standard metre, and 39.14 as the length of the pendulum vibrating seconds in the latitude of London. And if the attempt at a minuter decimal fraction than that of the one hundredth part of an inch in the making of metallic measures should terminate again in disappointment, it is nevertheless true that, to obtain accuracy even to that extent, the microscopic beam compasses, and the micrometer marking subdivisions to the twenty-five thousandth part of an inch, are essential auxiliaries: for in this, as in all the energies, moral or physical, of man, the pursuit of absolute perfection is the only means of arriving at the nearest approximation to it attainable by human power.

When the proportion shall be thus ascertained by a concurrent agreement with France, the act might declare that the foot measure of the United States is to the standard platina metre of France in such proportion that 39.3802 inches are equal to the metre, and that 472.5623 millimetres are equal to the foot. The proportion of the troy and avoirdupois pounds to the kilogramme might be ascertained with equal accuracy, and declared in like manner. A platina metre and kilogramme, being exact duplicates of those in the French national archives, should then be deposited and preserved with the national standards of the United States.

It is not proposed that the standard yard measure of the United States should be made of platina; but that it should be of the same metal as the yard of 1601 at the exchequer, from which it will be taken. The very extraordinary

properties of platina, its unequalled specific gravity, its infusibility, its durability, its powers of resistance against all the ordinary agents of destruction and change, give it advantages and claims to employment as a primary standard for weights and measures, and coins, to which no other substance in nature has equal pretensions. The standard metre and kilogramme of France are of that metal. Should the fortunate period arrive when the improvement in the moral and political condition of man will admit of the introduction of one universal standard for the use of all mankind, it is hoped and believed that the platina metre will be that measure. But as the principle respectfully recommended in this report is that of excluding all innovation or change, for the present, of our existing weights and measures, it is with a view to uniformity that the preference is given, for the choice of a new standard, to the same metal of which that measure consists which has been the standard of our forefathers from the first settlement of the English colonies, and is exactly coeval with them. It is not unimportant that the standards to be transmitted to the several States of the Union should be of the same metal as the national standards, of which they shall be copies. The changes of the atmosphere produce different degrees of expansion and contraction upon different metals; and, when a measure of brass or copper is to be taken from a measure of platina, the differences of their expansibility become subjects of calculation, upon data not yet ascertained to entire perfection. The selection of platina for the French kilogramme has been attended with the singular consequence that the standard of the archives is not of the same *weight* as the standard for use. The latter is of brass; and the copies taken from it for the real purposes of life are of the same weight in the air, but not of the same weight as the platina standard, because that is the weight of the cubic decimetre of distilled water *in vacuo*. Whenever calculations of allowances for atmospheric changes in the different metals are introduced into the comparison of measures, estimates take the place of certainty; and different results proceed from different times, places, or persons. The very immutability of platina, therefore, makes it unsuitable for a practical standard of mutable things. Change, and not stability, is the uniform measure of change. Justice consists in estimating every thing by the law of its nature; and to illustrate this idea by applying it to moral relations, it may be observed that, to bring mutable substances to the test of immutable standards, would be like charging disembodied spirits to pass sentence, by the laws of their superior nature, upon the frailties and infirmities of man.

The plan which is thus, in obedience to the injunction of both Houses of Congress, submitted to their consideration, consists of two parts, the principles of which may be stated: 1. To fix the standard, with the partial uniformity of which it is susceptible, for the present, excluding all innovation. 2. To consult with foreign nations for the future and ultimate establishment of universal and permanent uniformity. An apology is due to Congress for the length, as well as for the numerous imperfections, of this report. Embracing views, both theoretic and historical, essentially different from those which have generally prevailed upon the subject to which it relates, they are presented with the diffidence due from all individual dissent encountering the opinions of revered authority. The resolutions of both Houses opened a field of inquiry so comprehensive in its compass, and so abundant in its details, that it has been, notwithstanding the lapse of time since the resolution of the Senate, as yet but very inadequately explored. It was not deemed justifiable to defer longer the answer to the calls of both Houses, even if their conclusion from it should be the propriety rather of further inquiry than of immediate action. In freely avowing the hope that the exalted purpose, first conceived by France, may be improved, perfected, and ultimately adopted by the United States, and by all other nations, equal freedom has been indulged in pointing out the errors and imperfections of that system which have attended its origin, progress, and present condition. The same liberty has been taken with the theory and history of the English system, with the further attempt to show that the latter was, in its origin, a system of beauty, of symmetry, and of usefulness, little inferior to that of modern France.

The two parts of the plan submitted are presented distinctly from each other, to the end that either of them, should it separately obtain the concurrence of Congress, may be separately carried into execution. In relation to weights and measures throughout the Union, we possess already so near an approximation to uniformity of law, that little more is required of Congress for fixing the standard than to provide for the uniformity of fact, by procuring and distributing to the Executives of the States and Territories positive national standards conformable to the law. If there be one conclusion more clear than another deducible from all the history of mankind, it is the danger of hasty and inconsiderate legislation upon weights and measures. From this conviction, the result of all inquiry is, that while all the existing systems of metrology are very imperfect, and susceptible of improvements, involving in no small degree the virtue and happiness of future ages; while the impression of this truth is profoundly and almost universally felt by the wise and the powerful of the most enlightened nations of the globe; while the spirit of improvement is operating with an ardor, perseverance, and zeal, honorable to the human character, it is yet certain that, for the successful termination of all these labors, and the final accomplishment of the glorious object, permanent and universal uniformity, legislation is not alone competent. A concurrence of will is indispensable to give efficacy to the precepts of power. All trifling and partial attempts of change in our existing system, it is hoped, will be steadily discountenanced and rejected by Congress, not only as unworthy of the high and solemn importance of the subject, but as impracticable to the purpose of uniformity, and as inevitably tending to the reverse, to increased diversity—to inextricable confusion. *Uniformity* of weights and measures—permanent, universal uniformity—adapted to the nature of things, to the physical organization, and to the moral improvement of man, would be a blessing of such transcendent magnitude, that, if there existed upon earth a combination of power and will adequate to accomplish the result by the energy of a single act, the being who should exercise it would be among the greatest of benefactors of the human race. But this stage of human perfectibility is yet far remote. The glory of the first attempt belongs to France. France first surveyed the subject of weights and measures in all its extent and all its compass. France first beheld it as involving the interest, the comforts, and the morals of all nations and of all afterages. In forming her system, she acted as the representative of the whole human race, present and to come. She has established it by law within her own territories; and she has offered it as a benefaction to the acceptance of all other nations. That it is worthy of their acceptance, is believed to be beyond a question. But *opinion* is the queen of the world; and the final prevalence of this system beyond the boundaries of France's power must await the time when the example of its benefits, long and practically enjoyed, shall acquire that ascendency over the opinions of other nations which gives motion to the springs and direction to the wheels of power.

Respectfully submitted.

JOHN QUINCY ADAMS.

DEPARTMENT OF STATE, *February* 22, 1821.

APPENDIX.

LIST OF PAPERS.

A. 1. Weights and measures used in the several custom-houses of the United States.
A. 2. Table of do. do. do.
A. 3. Note on the weights and measures used in the District of Columbia.
B. 1. Table of the several English statute measures of capacity at different periods, compared with existing standards.
B. 2. Notes on do. do. do. do.
C. Note on the proportional value of the pound sterling and the dollar.
D. 1. Mr. F. R. Hassler to the Secretary of State, October 16, 1819.
D. 2. Mr. Hassler's comparison of French and English standard measures of length.
E. Weights and measures of the several States, viz:
E. 1. New Hampshire. *a*. Governor Plumer to the Secretary of State, November 21, 1818.
b. Law of May 13, 1718.
c. Law of 6 George III.
d. Law of December 15, 1797.
e. Governor Plumer to the Secretary of State, January 4, 1819.
E. 2. Vermont. - *a*. Governor Galusha to the Secretary of State, January 20, 1818.

A 1.

With a view to ascertain the existing varieties of fact in the weights and measures used at the several custom-houses of the United States, and thereby the state of the standards in the several States, the following circular letter was, at the request of the Secretary of State, addressed by the Register of the Treasury to the collectors of the customs throughout the Union.

[CIRCULAR.]

SIR: TREASURY DEPARTMENT, REGISTER'S OFFICE, *November* 15, 1819.

I am requested by the Secretary of State to ask the favor of your early information to that Department, relative to the standard of weights and measures used at the custom-house in the collection of the duties of the United States; and to observe, that it will be particularly acceptable to be informed whether, in dry measure, any other than the Winchester bushel and its parts is used, and the capacity thereof, that is, its diameter at the top and bottom, and its depth in inches and tenths of inches. In liquid measure, whether wine or beer measures are, respectively, used for wines and beer; or whether confined to wine measure, both for beer and wine. In respect to weights, whether the troy weight is at all used, and whether Dearborn's patent balance is altogether adhered to, in collecting the duties on articles paying duty by the pound or hundredweight.

I am, &c.

P. S. Be so good as to state the number of grains by your troy weight which your avoirdupois pound weighs.

The following table is the result of the answers received from the collectors: As the cubic foot, or 1,728 cubical inches of spring water, at the temperature of 56 degrees of the thermometer, weighs 1,000 ounces avoirdupois, the Winchester bushel of 2150.42 inches contains 77 lbs. 12 oz. $7\frac{1}{4}$ drachms of the same water, and the half-bushel 38 lbs. 14 oz. $3\frac{5}{8}$ drachms. The returns will show how nearly the actual weights and measures correspond with those proportions. It will not be expected that experiments made at the custom-house with scales adapted to heavy weights in constant use, and with such water as was nearest at hand, should be marked with philosophical precision or very minute accuracy. But it is evident that they were generally made with great care, and, in several instances, repeated with various kinds of water. From the experiments of Sir George Shuckburg Evelyn, it appears that the specific gravity of *distilled* water, at the temperature of 62°, is $252\frac{1}{2}$ grains troy to a cubical inch; and of that water the bushel should contain 77 lbs. 9 oz. $1\frac{1}{2}$ drachm, and the half-bushel 38 lbs. 12 oz. $8\frac{3}{4}$ drachms. Mr. Pollock found the specific gravity of the pump water at Boston to be 253.6042 grains troy to the cubic inch, and of that water the statute Winchester bushel should contain 77 lbs. 14 oz. $8\frac{1}{2}$ drachms, and the half-bushel 38 lbs. 15 oz. $4\frac{1}{4}$ drachms. From 38 lbs. 12 oz. to 39 lbs. may be, therefore, considered as the range within which the different kinds of fresh water should fill the correct standard copper or brass half-bushel.

In several of the returns it is apparent that the weight certified includes that of the wooden vessel which held the water. By the experiment of the late venerable William Ellery, collector at Newport, it appears that of two half-bushels of the same dimensions, one of copper and the other of wood, the former contained $1\frac{1}{2}$ ounce more than the latter, and both of them half an ounce more of spring-water than of rain water; and by experiments of G. Davis, inspector at New Orleans, from whom a very interesting report was received, it appears that, by weighing the wooden half-bushel before it had been filled, and after it was emptied of Mississippi river water, there was a difference of nearly 15 ounces, to be accounted for partly by the absorption of the water into the wood, and partly by the adhesion of it to the sides and bottom of the vessel.

By the testimony of Mr. John Warner, a brass founder in London, much employed in making for country corporations brass standard weights and measures, duplicates of those in the exchequer, given before the committee of the House of Commons in the year 1814, it was shown that, from the extreme difficulty and expense of turning a bushel measure truly cylindrical, the practice of the trade is, notwithstanding the act of Parliament, to pay no attention to the dimensions of the measures which they make, but to rely entirely upon the trials by the weight of water which they contain. From all the admeasurements which have been made of the English standards, it is apparent that neither the weight of water which a bushel or half-bushel may be found to hold, nor the direct measurement by the depth and diameters of the vessel, can be relied upon by itself to ascertain its exact capacity; and even when one of these tests is applied as a check upon the other, the result may differ to the extent of four or five inches upon a half-bushel. The corn gallons at the exchequer, which in 1688 were found by a skilful artist to be of 272 cubic inches, in 1758 were, when remeasured by order of the committee of the House of Commons, returned as of 271, or less; and one of them, tried in April, 1819, by Sir George Clerk and Dr. Wollaston, appeared by the weight of water which it held to be only of 270.4 inches.

If this apparent diminution should be attributed to the decay of the vessel in the lapse of time, that will not account for the opposite result of the two experiments upon the bushel, which, by direct measurement in 1758, was found to be of 2,124 cubical inches, and in 1819, by the weight of water it contained, was of 2128.9 inches. The statute Winchester bushel is a cylinder $18\frac{1}{2}$ inches in diameter and 8 inches deep; a difference of $\frac{1}{100}$ of an inch, either in the depth or diameter, increases or diminishes the contents of the vessel nearly three cubical inches. Mathematical instruments are now constructed by which the division of $\frac{1}{10000}$ part of an inch may be discerned; but such refinement of art cannot be applied to the making of vessels of the size of a bushel or its half. In all such vessels inequalities in the depth, diameter, or circumference, are unavoidable, producing differences in their capacity of more than five cubical inches; the test, therefore, by the weight of water they will hold, is more effectual for accuracy than that of measurement; its results, however, depend upon the correctness of the scales and weights as well as upon the care and attention with which the experiment is made.

As the patent scales of Dearborn are used in most of the custom-houses throughout the Union, few of them possess the avoirdupois heavy weights. The correctness and convenience of the patent scales are generally attested by the collectors who have them in use, and may be relied upon with all the confidence of which any steelyard can be susceptible.

The beer measure and the troy weight are seldom used except in the principal and most populous ports. Of forty single avoirdupois pounds, the average weight in troy grains was 6,998. In all the principal ports they were exact, within one grain, with the exception of New York, where the custom-house pound was five or six grains over weight, but where that of the city was exact.

A 2.

A 3.

Note on the weights and measures of capacity in the District of Columbia.

By the constitutional law of the District, the standard weights and measures of Alexandria are derived from Virginia, while those of Washington City and Georgetown are from the standard of Maryland. The law in both States, as has been shown, is, and for more than one hundred and fifty years has been, the same, namely: the act of Parliament of 1496 for the statute book; the Winchester measure, avoirdupois weights, and the exchequer standards for practice. The avoirdupois pound of Alexandria is one of the most defective in the Union, being 50 grains troy, or more than two pennyweights, short of 7,000 grains. The half-bushel is also too small; its primitive standard having been, not the Winchester bushel, but one of the oldest exchequer standards, made under the statute of 1266. It is 16 cubical inches less than the parliamentary Winchester half-bushel.

The Georgetown peck is in exact proportion to the Winchester bushel. Its pound avoirdupois is too light by 30 troy grains.

The new measures at Washington lately obtained at Baltimore are, a half-bushel, peck, and half-peck, of copper, lined with tin, cylindrical in form; the half-bushel and peck with a hole and cock in the centre of the bottom, to let off the water.

The half-bushel appears to have been intended to be of 13 inches diameter and 8 inches depth, which would have given 1,064 inches of cubical contents. This would correspond almost exactly with *one* standard bushel at the English exchequer, which was tried in April, 1819, by weight of water, and found to hold 2128.9 inches; but, of the new Washington half-bushel, neither the depth nor the diameter is uniform. They vary to the extent of a quarter of an inch in different parts of the vessel. The bottom is not perfectly flat, but bulges a little inward at the centre; nor is the edge of the top circumference perfectly level; so that, while on one side it overflows, it is left not entirely full on the other. Its mean diameter is, with sufficient exactness, 13 inches, and its depth 7.9, which gives 1058.6 inches for its cubical contents. This is 16.61 inches less than it ought to be.

It was found to contain 46lbs. 5oz. 13dwt., or 267,672 grains, troy weight, of mixed rain, river, and pump water, with Fahrenheit's thermometer at 42°, and then overflowed at one side of the border, while on the opposite side there was about one-tenth of an inch yet to fill. This also gives 1058.6 inches as its capacity. It contained of wheat, in stricken measure, 31lbs. 4oz. 5½dr. avoirdupois, of which the old half-bushel had contained 32lbs.

The peck has in its dimensions the same irregularities, though in a less degree than the half-bushel. Its diameter is 10 inches; its depth from 6.7 to 7, with a bottom bulging inward. The mean depth is about 6.9, and its contents, by that measure, are 541 inches. It holds 23lbs. 8oz. 15dwt., or 136,680 grains troy of water; giving also 541 inches, being 3.4 inches more than the standard measure.

The half-peck is 7.5 diameter, and 6.25 inches deep, which gives 276.25 inches for its contents. It holds 12lbs. 1oz. 4dwt., or 69,696 grains troy of water, or 276.5 inches, being 8 inches more than the standard measure.

Although each of these measures, separately taken, is incorrect, they are so far just in the aggregate, that the half-bushel and the peck, with the half-peck twice filled, would yield, with perfect exactness, a bushel of the legal standard of 2,150.42 cubic inches.

The half-bushel, peck, and half-peck, which had been used as standards at Washington until the last autumn, were much more exact, both in their proportions to one another, and in their conformity to the Winchester bushel, than those now substituted in their stead. The one pound avoirdupois had been of 6,962 grains, or 38 grains too light. The weights now are

1 pound	7,010	grains troy	10	grains too much.
2	14,024	-	24	
4	28,062	-	62	

The wine gallon is of 231 solid inches, and the smaller measures proportional to it. There are no standards either of troy weight or beer measure.

B 2.

* *The object of this table is to show:*

1st. That the varieties of the ancient standard measures of capacity in England correspond very exactly with the variations of the laws.

2d. That, by the statute of 1266, the bushel was of capacity to contain wheat equal not to the *measure*, but to the *weight* of eight gallons of *wine*.

3d. That the statute of 1496, contrary to its professed intention, not only changed the pound sterling for the pound troy, but, by its letter, changed the capacity of the bushel from the *weight* of eight gallons of wine to the *measure* of eight gallons troy weight of wheat, which was a gallon of 224 cubic inches.

4th. That, so far as concerns the corn or ale gallon, and the bushel, this act of 1496 was never executed; that no such standard bushel as it prescribes was ever made.

5th. That by the statute of 23 Henry VIII. chapter 4, section 13, the ale gallon is defined equal to one-eighth of the *measure* of the bushel, with express reference to the *compositio mensurarum* of 1266.

† 1266. *Statute 51st Henry III., compositio mensurarum, and treatise of* 1304.

1 penny sterling, round and unclipped, shall weigh 32 wheat corns.
1 ounce, - - - - 20 pence.
1 pound, - - - - 12 ounces.
8 pounds, - - - - 1 gallon of wine.
8 gallons of wine, - - - 1 bushel.
8 bushels, - - - - 1 quarter of London.

‡ *Statute 18th Henry VI. chapter* 17. *Ancient assize of the tun.*

1 tun, =252 gallons; 1 gallon 1-63 of 8 cubic feet,=219.43 cubic inches.

1 tertian, 84
1 hogshead, 63

§ *Statute 12th Henry VII. chapter 5.* 1496.

Measure of one bushel, 8 gallons of wheat.
Every gallon, 8 pounds troy weight of wheat.
Every pound, 12 ounces troy weight.
Every ounce, 20 sterlings, [meaning pennyweights troy.]
Every sterling, 32 corns of wheat.

‖ *Statute 23d Henry VIII. chapter 4, section 13.* 1531.

Every ale barrel shall be made according to the assize specified in the *compositio mensurarum:* that is to say, to contain 32 gallons of the said assize, of which 8 gallons make the common bushel.

C.

Note on the proportional value of the pound sterling and the dollar.

The whole amount of the commercial intercourse between two countries within a given time (say a year) may be considered as the barter of an equivalent portion of their respective productions. The balance of trade is the excess of exportation from the one, and of importation to the other, beyond the equivalent value of specific articles of the trade.

In the practice of commerce, all the articles of the trade are valued in the established currencies of both countries—each article first in the country from which it is exported, and, secondly, in that to which it is imported. The balance of the trade must be discharged by some article of equal agreed value to both parties. There are two precious metals *(gold* and *silver)* which, by the common consent of all commercial nations, are such articles; and there is no other.

These two metals constitute also the principal basis of the money or specie currency of all commercial countries; and, as they are variously modified by weight and purity in the *coins* of different countries, a common standard must be resorted to by which the relative value of the coins of the two countries may be ascertained and settled in their commercial dealings with each other.

Some one specific coin or money of account on each side is assumed, between which a proportional value is established as the conventional par of exchange. Thus, between the United States and Great Britain, the dollar of the former and the pound sterling of the latter, with their respective subdivisions, are assumed as the standards of comparative value; and the conventional proportion of value between them commonly used in their commercial intercourse, and sanctioned by several acts of Congress, has settled the *par of exchange* at one pound sterling for four dollars and forty-four cents in the United States; while, in Great Britain, it is at four shillings and six pence for the dollar.

But observe: First. That here are already two different bases of exchange—the American, which assumes the pound sterling for the unit, and estimates it in the proportional parts of the dollar; and the English, which assumes the dollar for the unit, and values it in the proportional parts of the pound sterling. This would have been immaterial if the calculations upon which the exchange was originally settled had been correct; but the results of the two estimates are not the same. If the dollar is worth four shillings and six pence, the pound sterling is equivalent to four dollars forty-four cents and four mills, and an endless fraction of four decimal parts. If the pound sterling is worth four dollars and forty-four cents, four shillings and six pence, or fifty-four pence, are equal only to ninety-nine cents and nine mills. The difference is one mill in a dollar, or one thousand dollars in a million.

Secondly. That the elements of this exchange (the two objects of comparative estimated value) are not homogeneous. The dollar of the United States is, at once, a money of account and a specific silver coin; while the pound sterling, at the time when the exchange was settled, was only a money of account, having no coined representative, in one piece, of either of the precious metals. Since that time, indeed, the pound sterling has found a spurious representative in paper notes of the Bank of England, and, of late, a more truly sterling representative in the piece of gold which is called a *sovereign:* so that the pound sterling in England is an indefinite term, represented by three different materials; that is, in gold, by the sovereign, or by the guinea with deduction of a shilling; in silver, by twenty shillings, or four crowns; or in paper, by a bank note.

In the United States, their coins, both of gold and silver, are legal tenders for payments to any amount; but in England, silver coin is a legal tender for payments only to an amount not exceeding forty shillings; and by the restrictions of cash payments by the bank, the only actual currency, the only material in which an American merchant having a debt due to him in England can obtain payment is Bank of England paper: so that, at this time, the materials of *exchange* between the United States and England are, on the side of the United States, gold or silver; on the side of Great Britain, bank paper.

Suppose an American merchant has a debt due to him in England which is remitted to him in gold bullion or coins of the English standard, say £10,000: he receives, of pure gold, 196 pounds 2 ounces 3 pennyweights 22 grains, for which, when coined at the mint of the United States, he receives $45,657 20. The pound sterling, therefore, yields him $4 56.572; and such is the value of the pound sterling if the par of exchange be estimated in gold, according to the standard of purity common to both countries.

If the payment should be made in silver bullion, at 66 shillings the pound troy weight, according to the present English standard of silver coinage, he would receive only $43,489 43, and the pound sterling would only nett him $4 34.8943.

The pound sterling, therefore, estimated in gold, is worth - - -	$4 56.5720
In silver, - - - - - - -	4 34.8943
Making a difference of - - - - - -	21.6777
Half of which, - - - - - -	10.8388
Added to - - - - - - -	4 34.8943
And deducted from - - - - - -	4 56.5720
Makes what is called the medium par of exchange, - - -	$4 45.7331

It is contended by some writers upon the commercial branch of political economy that this medium is the only equitable par of exchange; but this is believed to be an error. It is, perhaps, of as little importance what the conventional par of exchange is, as whether a piece of linen or of broadcloth should be measured by a yard or an ell. The actual exchange is never regulated by the medium or any other par, but by the relative value of bullion in the two countries at the time of the transaction; by the relative proportions between the value of gold and silver established in their respective laws; by the prohibitions of exportation of bullion sometimes existing, and the duties upon its exportation levied at others; by the laws which, in some countries, make gold alone, in others silver alone, in others, again, both silver and gold, legal tenders for the payment of debts; by the existing condition of the commerce of the two countries, and of each of them with all the rest of the world; and last, and most of all, by the substitution of paper currency instead of the precious metals in one or both of the countries, and the existing depreciation of the paper.

But the law of the United States, first enacted on the 31st July, 1789, sec. 18, prescribing that, for the payment of duties, the pound sterling of Great Britain shall be estimated at $4 44, (United States Laws, Bioren's edition, vol. 2, p. 22,) is not so indifferent. This provision of the law has been continued in both the collection laws since enacted, and, by that of 2d March, 1799, (3 United States Laws, sec. 61, p. 193,) is still in force.

By section 30 of the act of Congress of 31st July, 1789, the duties were made receivable in gold and silver coin *only;* the gold coins of France, England, Spain, and Portugal, and all other gold of equal fineness, at 89 cents per pennyweight; the Mexican dollar at 100 cents; the crowns of France and England at 111 cents each, and all silver coins of equal fineness at 111 cents per ounce.

As this was one of the first experiments of legislation under the present constitution of the United States, it is unnecessary to make upon it many of the remarks which suggest themselves; but, with regard to those of its provisions which are still in force, let us observe—

That, on the 31st of July, 1789, there had been no suspension of specie payments by the Bank of England. The pound sterling, if paid in gold, yielded 113.0014 grains of pure metal; if paid in silver, 1718.72 grains of pure silver.

That the dollars and cents in which this pound sterling was estimated by the act of 31st July, 1789, were not the dollars and cents of the standard now established, but of the standard established by the resolution of the old Congress of 8th August, 1786, and their ordinance of 16th October of the same year, [1 United States Laws, page 646,] by which the dollar was to contain 375.64 grains of pure silver, and the eagle 246.268 grains of pure gold.

This dollar had been assumed as the money unit of the United States upon a report from the Board of Treasury, dated 8th April, 1786, from which report it appears that the board intended and believed that it would be of equal value with the Spanish dollar, then generally current in the United States at four shillings and six pence sterling, excepting an allowance which they proposed to make for the waste and expense of coinage of silver. They made a similar allowance of a half per cent. upon the coinage of gold.

The ordinance assumed, for the standard of purity, both of gold and silver coins, eleven parts fine, and one part alloy. This standard was, with respect to gold, the same as that of England. But the English standard of silver coins is eleven ounces and two pennyweights of fine, to eighteen pennyweights of alloy; so that, while the English pound troy weight of coined silver contained 5,328 grains of pure metal, that of the United States, by the standard then established, contained only 5,280 grains.

In the elaborate calculations of the report, which were adopted as the basis of the ordinance, no allowance whatever is made for this difference of 48 grains in the pound troy between the English standard and that prescribed for the United States. It expressly states that the English mint price of standard silver is sixty-two shillings sterling, and professes to prepare a dollar of *equal* value, excepting an allowance of two per cent. for waste and coinage. It then draws a proportion without reference to the difference between the two standards, and computes the sixty-two shillings of the English standard pound troy as if they contained only 5,280, while they really contained 5,328 grains. The object of this omission apparently was, together with the two per cent. allowance for waste and coinage, to preserve what the report states to have been the proportional value established by custom in the United States between coined gold and silver of 15.6 for 1, while their proportional value in the English coins was 15.21 for 1.

The ordinance for the establishment of the mint, and for regulating the value and alloy of coin, therefore prescribed that bullion or foreign coin should be received there as follows:

Uncoined gold, or foreign gold coin, 11 parts fine, and 1 part alloy, 1 pound troy weight, -	$209 77
Silver, 11 parts fine, and 1 part alloy, 1 pound troy weight, - - - -	13 77 7

And so in proportion to the fine gold and silver in any other foreign coin or bullion. And the dollar to be issued from the mint of the United States was settled at 375.64 grains of pure silver, because the report of the Board of Treasury had first supposed, contrary to that fact, that there were only 5,280 grains of pure silver in sixty-two shillings of English silver coin; consequently only 383.225 grains, instead of 387, in four shillings and six pence; and then provided an allowance of two per cent. for waste and coinage. By these operations it seems to have been thought that the standard dollar of the United States would be of equal value with the Spanish dollar then current in this country, and with four shillings and six pence of English silver coin. Thus, while, by the eighteenth section of the act of 31st July, 1789, the pound sterling was estimated, for the payment of duties, at $4 44, by the thirtieth section of the same act, every pound sterling paid in guineas or other gold was received for $4 57.143, and, if paid in English crowns, was received for $4 57.5445.

That the calculations upon which the rated value of gold and silver coins was fixed were loose and inaccurate, is apparent. The gold coins of France and Spain were rated as of the same standard of purity with those of England and Portugal; the crown of France as of equal value with the English crown; both without reference to their weight, and both as equivalent to an ounce of silver of the same fineness. It was well known and intended that all these coins should be rated at more than their intrinsic value, compared with the pound sterling, as estimated at $4 44, or with the standards of gold and silver coins of the United States then established. The differences might be considered in the nature of a discount for prompt payment of the duties. And, as the merchants of the United States were deeply indebted in England, inasmuch as the pound sterling was undervalued, the difference was clear profit to them in discharging the balances due to their English creditors.

The act of 31st July, 1789, was, at the succeeding session of Congress, repealed, and that of 4th August, 1790, substituted in its stead, [2 U. S. Laws, page 131.] The 40th and 56th sections of this act correspond with the 18th and 30th sections of that of 1789. The pound sterling is again rated at $4 44, and the coins as before.

But on the 2d April, 1792, passed the act establishing a mint and regulating the coins of the United States, by which the whole system established by the ordinance of 1786 was abandoned, and different principles and different standards were assumed. The standard of gold coins was left at 11 parts fine to 1 of alloy; but, instead of 246.268 grains of pure gold, the eagle was required to contain 247.5 grains. The silver standard was altered from 11 parts in 12 of fine, to 1485 parts in 1664. Instead of 375.64 grains of pure silver, the dollar was required to contain only $371\frac{4}{16}$ grains; and its weight, instead of 409 grains, was fixed at 416. The proportional value between gold and silver was fixed by the same law at 15 for 1; and, instead of the allowance of two per centum for waste and coinage, the principle was adopted of placing gold and silver coined at the same rate as uncoined, and of delivering at the mint, coined, the same weight of pure metal as should be brought to it in bullion or foreign coin.

By this operation, the value of the silver dollar, as compared with British silver coin, was reduced from 52.4539 pence sterling to 51.8409 pence; and the pound sterling, from $4 57.5445, was raised to be worth $4 62.955; and, at the same time, the value of the dollar estimated in the English gold coin was raised from 52.304 to 52.5656 pence, and the pound sterling was reduced in the gold coin of the United States from $4 57.143 to $4 56.572.

The act establishing the mint had, however, no direct reference to the value or the rates of foreign coins. But on the 9th February, 1793, passed the act regulating foreign coins, and for other purposes, [2 U. S. Laws, page 328,] which made the gold coins of Great Britain and Portugal, of their then standard, a legal tender for the payment of all debts and demands, at the rate of 100 cents for every 27 grains of their actual weight; the gold coins of France and Spain, at the rate of 100 cents for every $27\frac{2}{5}$ grains; Spanish dollars, weighing not less than 415 grains, at 100 cents; French crowns, weighing not less than 459 grains, 110 cents each. The 55th [56th] section of the act of August, 1790, was repealed, but the 40th section was left in force, and the pound sterling was still

receivable for $4 44. It was, however, thenceforward, whether paid in the gold coins of England or of the United States, worth $4 56.572.

A new collection law was enacted on the 2d March, 1799, which is still in force. In the 61st section of which [3 U. S. Laws, page 193] the pound sterling of Great Britain is again rated at $4 44; while, in the 74th section, the gold coins of Great Britain of the standard prior to 1792 are receivable at the rate of 100 cents for every 27 grains. But a proviso is added to the 61st section, that the President may establish regulations for estimating duties on goods invoiced in a depreciated currency; and a proviso to the 74th, that no foreign coins but such as are a lawful tender, or made receivable by proclamation of the President, shall be received.

In the act of 9th February, 1793, the English crown was not rated at all, and from that time no English silver coin has been a legal tender, nor consequently receivable in payment of duties.

The act of 10th April, 1806, regulating the currency of foreign coins in the United States, continued the rates established by the 74th section of the act of 2d March, 1799; and it required of the Secretary of the Treasury to cause assays to be made every year, and report them to Congress, of the foreign coins made tenders by law, and circulating in the United States.

20th April, 1816, [6 U. S. Laws, page 117.] Act regulating the currency within the United States of the gold coins of Great Britain, France, Portugal, and Spain, the crowns of France, and five-franc pieces.

Gold coins of Great Britain and Portugal, 27 grains = 100 cents, or $88\frac{8}{9}$ cents per dwt.

France, - -	$27\frac{1}{2}$	do. =	do.	$87\frac{1}{4}$	do.
Spain, - -	$28\frac{1}{2}$	do. =	do.	84	do.

Crowns of France, weighing 449 grains, 110 cents, or $1 17 per ounce.

Five-franc pieces, do. 386 do. 93.3 do. $1 16 do.

3d March, 1819. Act to continue in force the above act.

After 1st Nov. 1819, foreign gold coins ceased to be a tender. Rest of the act to be in force till 29th April, 1821.

The act of 2d April, 1792, establishing the mint, was founded, in its principal features, upon the report of the Secretary of the Treasury, (Hamilton.) It is remarkable that in this report all notice of the ordinance of Congress of 16th October, 1786, is omitted.

It says, "a prerequisite to determining with propriety what ought to be the money unit of the United States, is to endeavor to form as accurate an idea as the nature of the case will admit of what it actually is. The pound, though of various value, is the unit of the money of account of all the States. But it is not equally easy to pronounce what is to be considered as the unit in the coins. *There being no formal regulation on the point*, (the resolutions of Congress of the 6th July, 1785, and 8th August, 1786, having never yet been carried into operation,) it can only be inferred from usage or practice."

Now, the ordinance of 16th October, 1786, was a formal regulation which recognised the principles in regard to the unit of coins of the resolutions of 6th July, 1785, and 8th August, 1786; and the Congress, under the new constitution, had, by the two successive collection laws of 31st July, 1789, and 4th August, 1790, not only rated the foreign moneys of account, but foreign coins, by the standard of dollars and cents established in the resolution of 8th August, 1786. Millions of dollars had been received in revenue under those laws in foreign coins, estimated in those dollars and cents. A pamphlet was published by Mr. Boardley, at Philadelphia, in 1789, in which he shows that the real value of the dollar, in the first collection law, was 52.46 pence sterling, and not 54; and adds: "I do not consider whether this valuation accords with a late declaration that 20 shillings sterling shall be estimated at the value of $4 44 of the present dollar, but I recommend it to the consideration of others."

In the Gazette of the United States of 24th October, 1789, is an essay entitled "A Few Thoughts concerning a proper Money of Account, by a gentleman of Virginia," in which it is fully shown that the valuation of the pound sterling, as it stands rated by Congress, (at four dollars and forty-four cents,) was inconsistent with the pennyweight of gold, rated at 89 cents; that the pound sterling should be rated at $4 $57\frac{8\,9}{6\,23}$, or the pennyweight of foreign gold coin at $86\frac{19}{36}$ cents, instead of 89, which it states to be greatly to the injury of the revenue.

The alterations from the system established by the old Congress, recommended in Mr. Hamilton's report, and adopted by the law for establishing the mint, were, a dollar of $371\frac{1}{4}$ grains pure silver, instead of 375.64 grains; an eagle of $247\frac{1}{2}$ grains pure gold, instead of 246.268; 15 for 1 proportional value of silver and gold, instead of 15.6 for 1; gratuitous coinage, instead of a duty of two per cent. for the bullion sent to the mint to be coined.

Mr. Hamilton proposed to leave the standard of purity of the silver coin at 11 parts in 12 pure, as it had been established by the old Congress; but, in this respect, the law departed from the principles of the Secretary. It took the weight as well as the pure contents of the Spanish dollar then in circulation for a model, not, indeed, its legal weight and purity, which would have been 420 grains, at $10\frac{3}{4}$ parts in 12 pure silver, but its actual weight and purity, with the allowances for remedy, and ascertained by the average from a considerable number of the Spanish dollars of the coinage since 1772 which were then in actual circulation; the result gave us a dollar of 416 grains, and containing $371\frac{1}{4}$ grains of pure silver.

In the coins of the United States there is no allowance for what is called the remedy of weight; but assays of all coins issued from the mint are made, and, if any of them are found inferior to the standard prescribed to the amount of more than $\frac{1}{144}$ part, the officers of the mint, by whose fault the deficiency has arisen, are to be dismissed. This provision was adopted from what was stated in Mr. Hamilton's report to be the practice of the mint in England.

By the acts of incorporation of the Banks of the United States, their bills, *payable on demand*, are made receivable in all payments to the United States, unless otherwise directed by Congress.

By the acts of 31st July, 1789, and 4th August, 1790, the gold coins of Great Britain were rated at 89 cents the pennyweight. By the act of 9th February, 1793, passed after the change of the standard of our domestic coins, British gold coins were rated at 27 grains to the dollar, equivalent to $88\frac{8}{9}$ cents the pennyweight, at which they stand to this day.

In the year 1797 the British Parliament passed an act restricting the Bank of England from paying their own notes in specie—a restriction which has been continued to this day, with certain exceptions, by recent acts of Parliament. The pound sterling, therefore, in all English invoices and accounts, is now neither gold nor silver, but bank paper. This paper has been at times so depreciated that Spanish dollars have been issued by the bank itself, successively, at five shillings and five shillings and sixpence the dollar; and they have passed in common circulation at six shillings.

In the year 1816 there was a coinage of silver at the mint, in which the pound troy weight of standard silver was coined into 66 shillings, instead of 62 shillings, which had been the standard before.

And an act of Parliament of 2d July, 1819, confirms the restrictions upon cash payments by the bank until the 1st day of May, 1823, with the following exceptions:

1. That, between 1st February and 1st October, 1820, any person tendering to the bank its notes payable on demand to an amount not less than the price or value of 60 ounces of gold, at the rate of £4 1*s.* per ounce, shall receive payment in gold, of the lawful standard at that rate of £4 1*s.* per ounce.

2. That, from 1st October, 1820, to 1st May, 1821, such payments shall be made in gold, calculated after the rate of £3 19*s.* 6*d.* per ounce.

3. And that, from the 1st of May, 1821, to the 1st of May, 1823, they shall be made in gold, calculated after the rate of £3 17*s.* 10½*d.* per ounce. All these payments to be made, at the option of the bank, in ingots or bars of the weight of sixty ounces each, and not otherwise.

Throughout this whole canto of mutability, the pound sterling of Great Britain, from the 31st July, 1789, to this day, has been rated by the laws of the United States at $4 44.

There has probably been no time since the establishment of the mint of the United States, nor since the first establishment of the dollar as the unit of account in the moneys of the United States, when this has been the intrinsic value of the pound sterling, whether computed in gold, silver, or bank paper.

A proclamation of Queen Anne, issued in the year 1704, declared that the Spanish, Seville, and Mexican *pieces of eight* (as dollars were then called) had, upon assays made at the mint, been found to weigh seventeen pennyweights and a half, (420 grains,) and to be of the value of four shillings and sixpence sterling; from which the inference is conclusive that they contained of pure silver 387 grains: and the proclamation accordingly prohibited their passing or being received for more than *six* shillings each, in the currency of any of the British colonies or plantations. An act of Parliament in 1707 corroborated by penalties the prohibition contained in the proclamation. Six shillings for the Spanish dollar became thenceforth the standard of lawful money in the colonies, although the currencies of some of them afterwards departed from it. In 1717 Sir Isaac Newton, being master of the mint, again made assays of the Spanish dollars, and found them still to contain 387 grains. From this standard they successively fell off in 1731, in 1761, and in 1772; since which their average weight and purity has been that at which the dollar of the United States is fixed.

The dollar being thus of the intrinsic value of four shillings and six pence sterling, the pound sterling was of course equivalent to $4\frac{4}{9}$ dollars. This was the par of exchange, computed in the *silver coins* of the two countries; for even then, if the computation had been made between their gold coins, the result would have been different.

Thus, while the laws of the United States, in establishing their mint, and the unit of their currency, have assumed for their standard the Spanish dollar of 1772—in the calculations of their revenue, and their estimate of the English pound sterling, they have adopted the Spanish dollar of 1704.

But when, in 1704, the value of the Mexican dollar was fixed at four shillings and sixpence, it was because it contained 387 grains of pure silver, the same quantity which was also contained in four shillings and sixpence of English coined silver. At this time, four shillings and sixpence sterling of English silver coin contain only $363\frac{1}{4}$ grains of pure silver, and the dollar of the United States contains $371\frac{1}{4}$ grains.

The following statements show the relative present value of the dollar and pound sterling in the gold and silver coins of both countries, in gold bullion, as payable by the Bank of England, and in English bank paper at its current value in 1815.

1. *Gold.*

One pound troy weight of standard gold in England contains 5,280 grains of pure gold. It is coined into £46 14*s.* 6*d.*, or 11,214 pence.

Then 11,214: 5,280:: 240: 113.0014 grains of pure gold in a pound sterling.
In the United States 24.75 grains of pure gold is coined into a dollar, or 247.5 grains to an eagle.
Then 24.75: 1:: 113.0014: 4.56572 dollars to £1.
Thus the pound sterling in gold is worth $4 56.572.
And as 5,280: 11,214:: 24.75: 52.5656.
Dollar in English gold 4*s.* 4.5656*d.*
Pound sterling in gold $4 56.572.

2. *Silver.*

One pound troy weight of standard silver in England contains 5,328 grains of pure silver, and is coined into 66 shillings, or 792 pence.

The dollar of the United States contains 371.25 grains of pure silver.
Then, 5,328: 792:: 371.25: 55.1858.
Dollar in English silver 4*s.* 7.1858*d.*
792: 5,328:: 240: 1614.545 grains pure silver in a pound.
371.25: 1614.545:: 1: 4.348943.
Pound sterling in silver $4 34.8943.
Medium par dollar, 4*s.* 5.8757*d.*
Pound sterling in gold $4 56.5720—
in silver 4 34.8943+ 10.8388*d*=$4 45.7331 medium par pound sterling.

3. *Value of the pound sterling and dollar in gold and silver coins, in gold bullion, and in English bank paper.*

	Pence stg.
Value of a United States dollar in English silver coin, at 66 shillings per lb. troy weight,	55.1858
In English gold coin, at £3 17*s.* 10½*d.* per ounce,	52.5656
In English bank notes in 1815,	72.
In gold bullion, at £4 1*s.* per ounce,	54.675

	D. Cents.
English pound sterling, in silver coin, worth in the United States, silver dollars,	4 34.8943
Gold coin, at £3 17*s.* 10½*d.* per ounce, in United States gold,	4 56.5720
In English bank notes, 1815,	3 33.3333
In gold bullion, at £4 1*s.* per ounce,	4 38.9574
In gold bullion, at £4 per ounce,	4 44.4444

D 1.

Mr. Hassler to the Secretary of State.

MOST HONORED SIR: NEWARK, N. J., *October* 16, 1819.

When I had the honor to see you relative to my appointment for the boundary line, the conversation falling upon French and English standards of weights and measures, I mentioned to you that I had brought a complete set of them, with the instruments for the survey of the coast, of which I handed you a catalogue; mentioning at the same time that I had made comparisons of those standards of length measures, and some others which I had besides, (having not had time to extend it to the standards of weights.)

Since then I could not occupy myself with this subject until lately, in the course of the papers upon the scientific part of the survey of the coast, which I prepared for publication.

I have, therefore, now the pleasure to fulfil my promise, and your desire of that time, by forwarding you herewith an extract of this paper, containing the part which may interest you, with the necessary details to convey the conviction of accuracy necessary in such subjects to inspire confidence in the results.

You will observe that these are not so full and extensive as I intended them to be. I am sorry that the circumstances which befel this, in a national point of view, so honorable and useful work, have also in this part frustrated the aim of my exertions.

I believe, however, what has been obtained will be sufficient for your purpose of a report to Congress upon this subject.

If you should wish any thing more that I could be able to do, I will do it with pleasure.

You may probably conclude with me, from the comparisons of Captain Kater and other circumstances, that a platinum *metre copy* will yet remain much inferior in real scientific value to the iron original of the committee which I had in trial, and that the large expansion and reduction necessary in the comparison by the English way of giving the ratio of the standard may introduce some uncertainty by the less accurately known expansion of platinum. I have, besides, repeatedly, and also in these comparisons, had some reasons to suspect that copies are most generally shorter than the original in standards cut to a determined length.

I have the honor to be, with perfect respect and esteem,

Most honored sir, your most obedient, humble servant,

F. R. HASSLER.

The Hon. JOHN QUINCY ADAMS,
Secretary of State to the United States, Washington City.

D 2.

Comparisons of French and English standard length measures made in March, 1817, *by F. R. Hassler.*

The two length measures which have been the most scientifically ascertained and compared are the French and the English.

They are essentially different in their principles, and of different metals; which circumstance has always presented difficulties in their comparison.

The English standard is *a brass scale of undetermined length*, divided into inches and tenths of inches. They are of different ages and accuracy, and successively perfectioned by various artists, by making new scales of any convenient length from the mean of distances taken upon the old scales. Sir George Shuckburg Evelyn's account of comparisons of a number of them may be consulted for the nearer details. (Philosoph. Trans. of London.)

The French standard is *a certain determined unit of length in iron*, given by a bar cut off to the given length, either a toise or a metre. The account of their comparison, ratio, and the determination of the latter from nature, is contained in detail in the "Base du Système Métrique."

Whoever has attempted to copy an absolute length, or to multiply it with accuracy, to form a long standard from a short one, will soon have discovered that great care is needed in the choice of means. Beam-compasses and similar means are fully unsatisfactory for both. This conviction, and the perusal of the different modes of proceeding used in Europe in the works of this nature, decided me to adopt for the unit measure of the bars to be used in the base-measuring apparatus the mechanical combination of four iron bars, of two metres length each, (of which account is given in another part of the papers.) An additional deciding reason for this was, that I had to my disposition, for this use, one of the metres standarded by the committee of weights and measures in Paris in 1799, which is therefore equally authentic with the one in Paris itself, and places the accuracy of my unit measure above all possible doubt, while of any other measure I could only obtain the copy of a copy. The comparison of this with the other copies mentioned in this paper, and my bars, rendering it besides comparable to any standard by mere numerical calculation.

The comparisons to be related here were made in February and March, 1817, and intended to be repeated before the measurement of the first base line of the survey of the coast; which having become impossible, by events which I was too far from supposing possible, I will here only give the result of what was done.

The following are the different standards compared, and their origin, which is the first thing to be related minutely:

1st. An iron metre standarded at Paris in 1799 by the committee of weights and measures, composed of members of the Institute and foreign deputies, *ad hoc:* its breadth is 1.″1 English; its thickness = 0.″37. Like all metres then made, to which it is exactly similar, it bears the stamp of the committee, namely, a section of the elliptic earth, of which one quadrant is clear, with the number 10,000,000 inside of the arc, the other three quadrants being shaded.

My friend, Mr. J. G. Tralles, now member of the Academy of Berlin, was at that time deputy of the Helvetic republic for this purpose, and, as appears by the account of the proceedings, the foreign member who attended the construction and comparison of the length measures. He was so kind as to have this metre made expressly for me, simultaneously with all the others, passing in all respects the same process and comparisons; and, on his return, to make me a present of this, as well as of a kilogramme, also standarded by the committee, under the direction of Mr. Van Swinden, (being No. 2.)

2d. A very well executed iron toise, with its mother, in which it fits, forming with it a bar of three inches broad and half an inch thick. It is made by *Canivet, à la Sphère à Paris.* This is engraved upon it, together with the notice, "*Toise de France étalonnée le* 16*me Octobre*, 1768, *à la température de seize du thermomètre de M. — Réaumur.*" On the back edge of the toise a line is drawn in the middle over the whole length, and, from a per-

pendicular crossing this line near one extremity, a point is laid off near the other extremity; along this line is engraved "*La double longueur du pendule sous l'équateur*," a point being also in the middle at the simple length of the pendulum.

Having been in Paris in 1796, the heirs of M. Dionis du Séjour, who had died shortly before, had given this toise to the celebrated artist Mr. Lenoir, to sell it, from whom I bought it, considering it as the best and most authentic standard of this kind in private hands.

It is well known that, about the time stated for the standarding of this toise, the Academy of Sciences had it in contemplation to establish, as a natural standard, the double length of the pendulum under the equator, marked on this toise, probably to this very purpose; in which M. Dionis du Séjour must, by his situation at the Academy, have taken particular interest. The work denotes its intention to a valuable purpose.

3d. Two copies of the toises of Mr. Lalande, which have been compared in England with Mr. Bird's scale of equal parts in 1768, after the return of Messrs. Mason and Dixon from the measurement of the degree in Maryland. These copies being of the same size and shape as the originals.

When I was in Paris in 1793, Mr. Lalande communicated to me the above toises for the use of the survey of Switzerland, which I had then begun. Mr. Tralles and I made two copies of each of them, those here compared being one set. The toises of Mr. Lalande are known to be marked A and B, but only on the woods in which they are framed, and from which they can easily be changed; ours were marked upon the iron itself, so as we found them at the time on the toises of Mr. Lalande.

N. B. The standards hitherto mentioned I brought with me to this country at my first arrival in 1805, and ceded them some time after to John Vaughan, Esq., of Philadelphia, who has been so good as to lend them to me for the intended comparison.

4th. The brass metre standarded by Lenoir, (No. 16 of the collection of instruments for the survey of the coast,) which was compared at the Observatory of Paris, as per certificate of Messrs. Bouvard and Arrago; its breadth is = 1.″1 English, its thickness = 0.″18. The certificate, dated at the observatory, 16th March, 1813, says of it: "En applicant à nos mesures une correction dépendante de l'inégalité de dilatation des deux métaux, il nous a semblé qu'à zero du thermomètre, (centigrade,) le metre en cuivre de M. Hassler, seroit plus court que l'étalon en fer de nos archives de $\frac{1}{100}$me de millimetre."

Mr. Lenoir, who has been employed by the committee of weights and measures to construct the standards, had taken the precaution, at that time, to make one brass metre, which passed all the comparisons with the others, at the standard temperature of 0° centigrade, at which, therefore, it is equal to the authentic iron metres, and forms the only direct mean of comparison between French and English measure. Of this metre the present is a copy, which I thought so much more interesting to have, as the original is unique in its kind, and the comparison of it with the English standard possible by direct means.

5th. One iron toise of Lenoir, (No. 15 of the collection of instruments for the survey of the coast.) It is near two inches broad, and about a fourth of an inch thick. Its comparison at the observatory at Paris, by the certificate quoted above, says it is to be exactly equal to the toise of Peru, preserved at the said observatory.

6th. One iron metre, standarded by Lenoir, (No. 18 of the catalogue of instruments for the survey of the coast.) It is of the same breadth and thickness as the iron metres of the committee, but was not compared at the Observatory of Paris on account of being received too late.

7th. An iron bar, similar to the metre just mentioned, which I intended to bring to the proper metre length for myself, being yet too long. It was used in the comparison, as well as an operation necessary for its standarding as to vary the means of combination in the comparisons. It has not been worked since this, having been reserved for a future comparison.

8th. A brass standard scale, of English measure, of 82 inches, divided on silver to every tenth of inches, made by Mr. Troughton, (No. 14 of the catalogue of instruments for the survey of the coast.) It has the arms of the United States engraved upon it, and "*Troughton, London*, 1813." It is three inches broad, and half an inch thick.

To it belongs an apparatus for comparing measures by two compound microscopes, sliding on a rule of equal breadth and thickness with the standard; and adjustible, parallel to it, one microscope, having a micrometer reading directly the $\frac{1}{10000}$ of an inch.

A description of this arrangement existing already in Nicholson's Journal, though on a much smaller scale, all details may here be omitted.

The scale was divided by Mr. Troughton with the utmost care and accuracy, so justly praised in this eminent artist. It contains the double length of the principal part of his own scale, of which an account has been given in the paper of Sir George Shuckburg, above quoted. Mr. Troughton compared his scale first again in itself, and made a table of errors for the same, in like manner as he has described in his method of hand dividing, (Philosophical Transactions, 1809,) and then laid off the scale here used, correcting each point according to this table.

To give to a bar of a certain thickness an accurate length, by a cut perpendicular to its length, is an operation which cannot be performed by the free hand, which will always work it uneven, and most likely rounded. To do this with accuracy, I had a tool constructed, &c. &c.

(The description of this tool, the iron bars, and the manner in which they have been worked, may here be passed over, merely mentioning that the four bars were of equal breadth and thickness with the metres, and lettered A, B, C, D.)

For the actual comparison, the unequal thickness of the different standards obliged to support them, so as to bring them exactly to the elevation of the thickest, for which the foci of the microscopes are adjusted, and the value of the micrometer determined. In the comparison of the metres the brass scale was the thickest, and in that of the toises the toise of Canivet. The influence of this necessary supporting, when done only partially, is very great; therefore, I had pine rules, made of sufficient breadth and length to support fully the standards and the butting pieces, which were used in reading off, as will be said immediately, and of the accurate thickness to bring each of the metres exactly to the focus, and free from all parallax. As it is completely inadmissible to take the edge of a bar, if ever so sharp, as object under the microscope for the purpose of comparison, because it never forms a good image, pieces cut off from the end of the above-mentioned bars (which had originally been made purposely about nine inches too long) were placed at the two ends of the metres under comparison, to make the reading from the separation lines, presented by their close contact, which were not thicker than the lines of the scale. These pieces were from two to four inches long, worked to the exact thickness of the metre, or toise, with which they had to serve; and, by rubbing with emery and oil one against the other, turning them in all positions, they were brought to make exact contact on the whole surface, which afterwards joined to the metre did the same with it, and on account of their equal thickness presented a plane crossed by the partition line. Upon this the micrometer wires, which cross each other under an angle of about 30°, were brought, by optical contact, so that the partition line bisected the angle exactly in the crossing point of the wires.

The microscopes were furnished with paper reflectors, by a piece of white paper placed in a forward inclined direction between the microscopes and their supports, by which the light was reflected upon the scale or standard in the direction of the division lines, as required to avoid all shades of the lines, or partitions, which prevent accurate reading.

To prevent the influence of the heat of the observer's body upon the scale and apparatus, a large sheet of paper was nailed to the work bench, near the microscopes, where the observer approaches, and I worked with gloves on, for the same reason.

From seven to twelve thermometers were constantly lying over the scale and the standards, and read off at proper intervals of time.

The work bench itself was near double as long as the scale, to obtain a sufficient length fully accurate plane; it was in this respect accurately adjusted before the work, and so placed in respect to the windows, that each microscope corresponded to the best equal light from a separate window; the bench was made of two three-inch planks at right angles, and upon six legs.

There was no fire made in the room during the comparison, and for a number of days before; the windows were, besides, left open day and night, to bring the room to a steady temperature, being equal to that of the atmosphere.

For the intended comparison of a day all was prepared the day before, and left lying just fit to begin the observations the next day, in order that all parts might be fully at rest, and, after verification in the morning, the actual comparison begun.

All these precautions are necessary to obtain satisfactory results, as I think may be observed by what will follow.

The possible inaccuracy of the readings may be considered in the direct ratio of their number, having four metres; and the scale holding the sum of two, I had the mean to halve this error by comparing always two together alternately, reading their sum at once on the scale, and forming an equation between the results, to obtain the value of each individual metre. This method had yet the advantage of leaving the observer fully unprejudiced upon what he shall read, as the combination of the different measures and the different influence of temperature occasion a variation which precludes previous estimates.

To this effect, the microscopes were placed to the decimal on the scale nearest to the sum of two metres, viz: 78.″7 or 78.″8, which was taken from +1″ to 79.″8, which approximated it nearest to the middle of the scale. When the scale had been removed, and the two metres with their support properly laid under, so as to bring the middle of their breadth under the centre of the microscopes, the middle contact was exactly made, and with a magnifying glass verified; then, the butting pieces being laid on, the coincidence of one end with the crossing wires of the fixed microscope was obtained by longitudinal motion, and the micrometer wires being moved upon the other line of contact, between the metre end and the butting piece, the value of the corresponding subdivisions was read on the micrometer by its revolutions and subdivisions. The longitudinal motion cannot be made by hand; it is obtained by light strokes with a proper piece of wood, and requires dexterity and care, particularly not to separate the different pieces by the counter-stroke.

The value of the micrometer parts was to be previously ascertained by accurate and repeated measurements of a decimal on the scale in different places. By a mean of many, I found under the adjustment for the metres 0.″1 on the scale = 1.″004 of the micrometer.

At last the individual value of the distance used on the scale in relation to the mean value of the same distance resulting from the measurement of it, on as many parts of the scale as was admissible, was to be determined, in order to give the true mean value of the distance of the points of the scale compared. This was done by about fifty measurements, principally after the comparison had been made, and before any alteration had been made in the microscopes. So I found the distance used, or 79.″8 — 1.″0 = 78.″800172 of the mean value of the scale; to this, therefore, all the values obtained by the metre comparison were ultimately referred.

To shorten the manner of registering the results and the combination of the metres and their position, the following mode of notation was adopted:

Mc denotes the iron metre of the committee of weights and measures.
Ml - iron metre of Lenoir.
Mb - brass metre of Lenoir.
Mj - iron bar which I intended to bring to a metre length.
Mc+l - metre of the committee and that of Lenoir together, all marks up.
Mɔ+ɻ - same metres, all marks down.

And, in like manner, in the other combinations, the adding of the special marks at the top denoting always the sum of the metres so indicated, and the inversion of the letters the inversion of these metres.

The 15th March, early in the morning, the eleven thermometers which had been lying over night on the scales, prepared the evening before, were read; after having verified that all was in order, then it was further observed, as by the following table:

Standards under comparison.	Measures of the micrometer.	Mean of the four results.	Correction for the micrometer value.	Final value of the mean.	Mean of thermometers Fahrenheit's temperature.
Mc+b	78.″76040				30.°85
Mɔ+q	.76115				
Changed ends for middle.		78.″760962	—0.″000244	78.″760718	
Mc+b	78.76099				
Mɔ+q	.76131				
Mb+l	78.759030

Mb+l	78.75920				
Mq+ɻ	—.760303				
Mc+l	78.760415				
Mɔ+ɻ	—.760450				
Changed ends for middle.		78.760472	—0.000242	78.760230	
Mc+l	78.760475				
Mɔ+ɻ	—.760550				34.1

(The four bars intended for the base measurement were now also compared, but the result is omitted as unimportant here.)

The micrometer microscopes having, in the foregoing comparison, read by addition, or from 78."7 onwards, it was, the 17th March, turned for one-half revolution horizontally, so as to read by subtraction, or from 78."8 backwards, in order more effectually to compensate the influences possible from them by the following comparisons. The micrometer values were verified, and found as before. Then all was prepared for the comparison of next day. All other things being otherwise equally disposed.

The 18th March, A. M., all having been verified, the comparisons were made as by the following table:

Standards compared.	Microscope readings.	Mean of the four results.	Correction for microm. value.	Corrected result of reading.	Final value.	Mean temperature.
	78."8	-	-	-	+	46.6
Mc+l=	0.044075					
Mɔ+ɻ=	0.043000					
Changed ends for middle.		0.043900	0.0001756	0.043724	78.756276

To make these results comparable, it is necessary to reduce them all to one temperature by the difference of expansion between iron and brass. I shall, for this, make use of my own results of the pyrometrical experiments

made immediately after the comparison, and published in the Philosophical Transactions of Philadelphia of the same year, the results of which gave the expansion for one degree of temperature of Fahrenheit's scale—

In iron = 0.000006963535
In brass = 0.00001050903 } Difference, 0.000003545495 decimal parts of the length.

On account of the change of temperature during the comparison, and the considerable influence of this element in the results, it is necessary to take for each comparison the proportional temperature corresponding to it between the readings of the thermometer. The work proceeding regularly, each single comparison will correspond to the proportional time.

The standard temperature to which I find it most natural to reduce the measurements is, 32° Fahrenheit, or 0° centesimal and Reaumur, it being adopted for the metre and toise. I shall reduce the results of the iron to brass, so that the numbers will express the length of the metres in English inches of the brass scale, both at the temperature of 32°, which appears to me most naturally, being possible to obtain by actual experiment; while the giving of the metre at 32° in length, on the scale at 62°, is impossible to produce and verify in nature; therefore, always a result of calculation in which the ratio of expansion used has too much influence. The brass metre is, therefore, considered as needing no reduction.

The constant quantity of 0.″000172 is also to be added to each measure taken on account of the individual value of the part of the scale made use of.

The following table will, therefore, present the results of all the foregoing comparisons, with their reductions:

Date of comparison.	Standards compared.	Temperature of comparison.	Result of comparison.	T. 32°.	Reduction for temperature.	Value at 32° F.
15th March,	$Mc+b$	31°.4	78.760718	0°.6	0.000083773	78.760806226
					+

By the principles of the arrangement, it is evident that the value of any one single metre, compared above, will be obtained by a simple equation of the form $C=\frac{(c+b)+(c+l)-(b+l)}{2}$; and so any of the others, mutating the letters accordingly.

The final results of these comparisons form, therefore, the following table of the values of the different metres compared at the temperature of 32° of both metre and scales, in English inches:

Date of the comparison.	Mc.	Ml.	Mb.	Mj.
15th March, - - -	39.380952064	39.37992415	39.379854162	
18th March, A. M. - - -	—.3809641	—.3797004	- -	39.3840606
18th March, P. M. - - -	—.38115196	—.37953601	- -	—.3836290
Means, - - - -	39.381022708	39.37972015	- -	39.3838448
Correction of the brass metre by the certificate, - - -			+0.00039381	
Which, applied, gives the metre corrected, - - -			39.38024797	

These results might now be compared with those obtained by various comparisons made in England; these being, however, always stated so as taking the metre at 32°, and in value of the English scale at 62°, it is necessary to reduce them all for 30° difference of temperature full expansion of the brass. As I have not now the books in which they are related, and am ignorant, so various are they, which English standard and expansion has been used, (supposing, however, that it has most generally been that of Borda,) I will here only present, in a tabular shape, the different results as I have them, and reduce them to 32°, to compare them with my results; observing, at the same time, that they are yet subject to the differences between the English standards themselves, which are in some instances greater than the differences of these results, as may be seen by the paper of Sir G. Shuckburg, quoted above, and the account of Mr. Pictet, of Geneva, made in London in 1802. Borda's expansion for brass being 0.00000999, (though I have seen it lately stated at 0.0000101; on what ground I do not know, unless I suppose a mistake.)

Authority or observer.	Value given at 62°.	Reduced to 32°.	Difference with my results of committee metre.
The Royal Society accepted, - - -	39.370572	39.38126801	+0.0002453
The Royal Society, in 1800, - - -	—.3702	—.380896	—0.0001267
Mr. Pictet, in 1802, - - - -	—.371	—.381696	+0.0006733
Mr. Kater, on Sir G. Shuckburg's scale, lately, (1818,) -	—.37079	—.381486	+0.0004633
The same on Bird's scale, - - - -	—.37062	—.381316	+0.0002933

(Unknown which of Bird's scales, there being a difference.)

I do not compare by my ratios of expansion, because they were not made or known at the times of the older comparison; of course could never have been employed in them.

The 21st March, I took the different standards of the toise under comparison.

The toise of Canivet being half an inch French in thickness, and the brass scale half an inch English, this difference was compensated by laying four thicknesses of white paper strips under the whole length of the scale; the

microscopes were adjusted to fit this toise, and then the scale adjusted to it; the other toises had rules of proper thickness to bring them to the same focus.

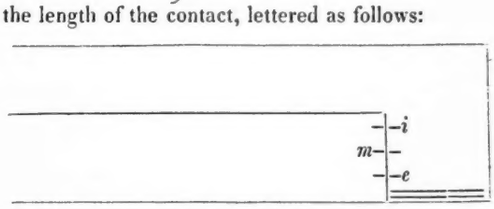
The distance of 76.″8, as nearest to the toise, was taken between the microscopes, from + 2″ to 78.″8 on the scale, as bringing the measure again nearest the middle of the scale.

The value of the micrometer was determined by repeated measurement of the decimal on the scale between 78.7 and 78.8, and found that it measured 0.″10053 by the micrometer; the readings here given will, therefore, be corrected by this value of the micrometer, by which they will represent regular decimals of this individual subdivision.

It was of course also here intended to compare the distance taken on the scale with all the other measures of the same distance which can be measured on the scale, and the value of the micrometer upon a great number of decimal divisions, to obtain a mean value of it. But, it being necessary to begin the pyrometrical experiments before the cold weather should cease, I delayed this comparison until after, or to another opportunity, which did not occur before I delivered the whole of these standards, and the scale, with the other instruments. The values here obtained will, therefore, remain individual, unless some future occasion should present to make this necessary trial of the scale on the indicated length, when the results here given may be corrected accordingly.

The microscopes being screwed fast, and the 0.° of the micrometer not agreeing fully with the division of the scale, which, for small differences, it is not proper to correct by the screw of the sliding piece, I used the better method of reading repeatedly the divisions of 78.7 and 78.8 on the micrometer, taking the point of the micrometer so determined, by a mean, for the zero, from which the readings of the micrometer are to be subtracted, as the micrometer read yet by subtraction from 78.″8; this point being 78.″8001375, all the readings given immediately are to be subtracted from that number, instead of 78.″8 only.

I intended of course also to repeat the comparison with the miscroscope reading directly or onwards, but the same reasons stated prevented the execution of it.



Using again abridged notations for the registering of the results,

I called C = the toise of Canivet, - - -
I called L = the toise of Lenoir, - - -
I called *l*A = the toise of Lalande, marked A, - -
I called *l*B = the toise of Lalande, marked B, - -

} Inverting the letter when the marks lay downwards.

In the toise of Canivet three points were observed on the length of the contact, lettered as follows:

i, at a quarter of the contact from the inner corner.
m, in the middle of the contact.
e, at 0.″05 from the outer end of the contact.

In the toise of Lenoir only the middle was taken, (which is marked by a line,) like in the comparison at Paris. The same was done with the toises of Lalande. The turning end for end of the toise of Canivet, in both cases related, was impossible, on account of its breadth. These comparisons present the following table:

Toise compared.	Temp. mean.	Micrometer readings.		Means of the readings.	Corrections for microscopic er.	Corrected reading.	Final value.
	33.°4	76.8001375		—	(—0.00053)	—

	39.°0						

The results of the foregoing table are now to be reduced to the standard temperature of 32° by the difference of expansion between iron and brass, for which I shall again use the result of my own experiments. They present thereby the following table of results of toise comparisons:

Denom. of toise.	Temperature.	Result of the comparison unreduced.	T. 32°.	Reduction for temperature.	Value at 32°.
C	34.2	76.″7427475	+ 2.°2	0.00059722	76.″74334472
L	36.0	—.7408389	+ 4.0	0.00108820	—.74192710
*l*A	37.4	—.7386302	+ 5.4	0.00146921	—.74009941
*l*B	38.5	—.7467470	+ 6.4	0.00174145	—.74848845
$\frac{l\text{A} + l\text{B}}{2}$	as accepted in the comparison of the original of these toises in 1768, in London,				- 76.74429393

Having no books about me in which I could see for the details of comparison of toises with English measures, the comparison just quoted is the only one with which I could compare mine, and the inferiority of the two toises of Mr. Lalande in every respect renders it of very little importance.

In the comparison of 1768 the mean adopted as result was—

$\frac{lA+lB}{2}$ = 76.734 at the temperature of 62°, which is stated to be 0.024 of an inch longer than when determined by Mr. Graham.

I have not before me sufficient data to judge of the propriety of the mean adopted, as it does not follow immediately from the two individual results stated in my notice. In respect to the temperature, it seems that both toises and the scale of Bird of equal parts were supposed both at the temperature of 62°. Reducing this result to 32°, by different ratios of expansion, it presents the following result comparable with mine:

	Ratio of difference of expansion.	Amount of expansion. +	Value at 32°.
By Borda's expansion, - - - -	0.00000352	0.0081031	76.7421031
By Troughton's, - - - -	0.0000039	0.0089779	—.7429779
By my experiments, - - - -	0.000003545495	0.0081618	—.742162

Which are all smaller than mine, and I should suppose deviate more from truth, as they would give a more erroneous proportion between the metre and toise. But I must again observe that my results may yet be subject to a small correction, by the reduction of the distance used on the scale to its mean value, as has been done with the metres.

The ratio between metre and toise, which may be quoted, as well for curiosity's sake, as also as a kind of trial of my comparison, may here be stated in all combinations which the different standards admit; and I have, in doing so, the private interest of giving the ratio of the toise of Canivet to an authentic metre, because this toise has served in 1796 to Mr. Tralles and myself to measure a base line of more than 40,000 feet by an arrangement of toise bars which were standarded in it.

The ratio of the metre to the toise, or the metre expressed in decimals of the toise, is given by Mr. Delambre.

Metre=0.513111185

With my denomination is obtained:

Toise

$\frac{Mc}{C}$ =0.513152

$\frac{Mc}{L}$ =0.513162

$\frac{Ml}{C}$ =0.5131355

$\frac{Ml}{L}$ =0.513145

$\frac{Mb}{C}$ =0.513137

$\frac{Mb}{L}$ =0.513146

$\frac{Mc}{l\frac{A+B}{2}}$ =0.513146

$\frac{Ml}{l\frac{A+B}{2}}$ =0.513130

$\frac{Mb}{l\frac{A+B}{2}}$ =0.513131

Captain Kater's comparison of the metre with Bird's scale would give—

Bird's sc.

$\frac{M}{C}$ =0.513156

Bird's sc.

$\frac{M}{L}$ =0.5131658

With Sir George Shuckburg's scale the deviation would be still greater.

F. R. HASSLER.

Newark, New Jersey, *October*, 1819.

E 1—*a*.

NEW HAMPSHIRE.

Governor of New Hampshire to the Secretary of State.

Sir: Executive Department, Epping, *November* 21, 1818.

By the last mail I received your letter of the 4th instant, requesting a copy of the law of New Hampshire of 1718 upon the subject of weights and measures, and a statement of each scale beam, weight, and measure described in the act of 1797, and where, and in whose custody, they are kept.

I herewith send you a copy of the law of 1718, and of an additional act passed the 6th of George III. upon that subject. I transcribed them from books in my library; and, as I presume you do not wish to use them in a court of law, I did not suppose it necessary to send to the Secretary of this State for official copies, especially as I doubt whether even copies remain of both those laws in that office.

I have taken measures to obtain the requisite information respecting the scale beams, weights, and measures belonging to this State, and, as soon as I obtain it, will write you on the subject.

I have the honor to be, with much respect, sir, your obedient servant,

WILLIAM PLUMER.

Hon. JOHN QUINCY ADAMS, *Secretary of State U. S., Washington.*

E 1—*b.*

Copy of an act passed by the General Court or Assembly of the Province of New Hampshire, in New England, begun and held at Portsmouth, on the 13th day of May, 1718.

AN ACT for regulating weights and measures.

To the end that weights and measures may be one and the same throughout this Province,

1. *Be it enacted by His Excellency the Governor, Council, and Representatives convened in General Assembly, and by the authority of the same*, That the treasurer of this province shall provide one set of weights and measures as are according to the approved Winchester measures allowed in England in the exchequer, which shall be public allowed standards throughout this province, for the proving and sealing of all weights and measures thereby: and the town clerk of every town within this province, not already supplied, shall, within three months next coming, provide, upon the town charge, one bushel, one half-bushel, one peck, one ale quart, one wine quart, one ell, one yard, one set of brass weights to four pounds, after sixteen ounces to the pound, with fit scales and steel beam, tried and proved by the aforesaid standard, and sealed by the treasurer, or his deputy, in his presence, which shall be kept and used only for standards in the several towns, who is hereby authorized to do the same, for which he shall receive from the town clerks of every town two pence for every weight and measure so tried, proved, and sealed. And the town clerk of every town shall commit the weights and measures unto the custody of the selectmen for their town for the time being, who, with the town clerk, are enjoined to choose an able man for a sealer of all weights and measures for their own town, from time to time, and until another be chosen, who shall be presented to the next court, or some justice of the peace, to be sworn to the faithful discharge of his duty, and shall have power to send forth his warrants by the constables to all the inhabitants of each town, to bring in all such weights and measures as they make any use of, in the month of April, from year to year, at such time and place as he shall appoint, and make return to the sealer in writing of all persons so summoned; that then and there all such weights and measures may be proved, and sealed with the town seal; which is likewise to be provided by the town clerk, at each town charge, who shall have for every weight and measure so sealed one penny from the owner thereof at the first sealing. And all such weights and measures as cannot be brought to their just standard he shall deface and destroy: and, after the first sealing, he shall have nothing so long as they continue just with the standard.

2. *And it is further enacted by the authority aforesaid*, That if any constable, selectman, or sealer, do not execute these laws, so far as to each and every of them appertains, [he] shall forfeit, for every neglect the space of one month, the sum of forty shillings; one-half to the informer, the other half to the use of the poor of the town where such default is found; and every person neglecting to bring in their weights and measures at the time and place appointed, being only warned thereof, shall forfeit three shillings and four pence; the one-half thereof to the use of the poor as aforesaid, the other half to the sealer; and the penalties herein mentioned to be levied by distress, by warrant from any justice of the peace within this province.

3. *And it is further enacted by the authority aforesaid*, That, in every seaport town within this province, the town clerk is to provide, likewise, upon the town charge, one hundredweight, made of iron, to be tried, proved, and sealed as aforesaid, and one half-hundred, and one quarter of a hundred, and one fourteen pound weight, made of iron, to be tried, proved, and sealed as aforesaid, and to be kept as standards in the said several towns, to be used as before for other weights and measures as is directed.

4. *And it is further enacted by the authority aforesaid*, That all steelyards that are or shall be approved of by the standards shall be allowed in any of the towns of the said province, and be in the liberty of both buyer and seller to weigh by which they please.

5. *And be it further enacted by the authority aforesaid*, That all measures by which meal, fruits, and other things usually sold by heap, shall be sold, be conformable as to bigness to the following dimensions, viz: the bushel not less withinside than eighteen inches and a half wide, the half-bushel not less than thirteen inches and three-quarters wide, the peck not less than ten inches and three-quarters wide, and the half-peck not less than nine inches wide. And if any person, at any time from and after the first day of October next, after the publication of this act, shall sell, expose to sale, or offer any meal, fruits, or other things usually sold by heap, by any other measure than is aforementioned, as to bigness and breadth, such person, being complained of and convicted before any justice of the peace within this province of so doing, shall forfeit and pay, to the use of the poor of the town where the offence is committed, the full value of the meal, fruits, or other things so sold or offered to sale; and such justice may commit the offender to prison until payment be made of the said forfeiture, or cause the same to be levied by warrant of distress, and paid unto the town treasurer, or overseers of the poor, to the use of the poor aforesaid; and shall also cause such measure to be defaced; any law, usage, or custom, to the contrary in anywise notwithstanding.

6. *And be it further enacted by the authority aforesaid*, That the sealer appointed in each town within this province from time to time shall be, and hereby is, empowered to go to the houses of such of the inhabitants as, upon warning given in manner as is above appointed, shall neglect to bring or send in their beams, weights, and measures, to be proved and sealed at the place assigned for that purpose, and shall there prove and seal the same, and shall demand and receive of the owner of every beam, weight, and measure, proved and sealed, two pence, and no more: and every person that shall refuse to have their beams, weights, and measures viewed, proved, and sealed, shall forfeit the sum of five shillings; one moiety thereof to the use of the poor of the town, and the other moiety to the sealer, to be recovered as is above provided. And if any person shall bring his beam, weights, or measures to be proved and sealed at any other time than on the day or days set by the sealer for that purpose, he shall in like manner pay two pence for each that shall be tried and sealed.

7. *And be it further enacted by the authority aforesaid*, That if any person, from and after the first day of September next, after the publication of this act, shall sell, vend, or utter any goods, wares, merchandises, grain, or other commodities whatsoever, by other beams, weights, or measures than such as shall be proved and sealed as this act requires, the person so offending shall lose or forfeit the sum of five shillings for each offence of that kind; one moiety thereof to the use of the poor of the town where the offence shall be committed, the other moiety to the sealer or informer who shall prosecute the same, to be heard and determined by one or more of His Majesty's justices of the peace.

8. *And be it further enacted by the authority aforesaid*, That all beams, weights, and measures kept for standards in the several towns shall be proved and tried by the public standard at the end of ten years from time to time; and all town standards shall be stamped with this mark, P N H, any law, usage, or custom to the contrary notwithstanding.

E 1—*c*.

Copy of an act passed 6th George III.

AN ACT in addition to an act entitled "An act for regulating weights and measures."

Whereas the said act, by experience, is found ineffectual to answer the good end thereby intended, as the penalties therein imposed are insufficient to enforce a due observance thereof: wherefore,

1. *Be it enacted by his excellency the Governor, Council, and Representatives, convened in General Assembly, and it is hereby enacted and ordained by the authority of the same*, That, from and after the passing of this act, every person who shall neglect to bring in their weights and measures at the time and place appointed (being duly warned thereof) shall forfeit the sum of forty shillings, to be recovered and applied in the same manner as by the said act is directed for recovering the fine therein inflicted for such neglect.

2. *And it is further enacted by the authority aforesaid*, That when and so often as the sealer of weights and measures in any town or parish within this province shall have probable cause of suspicion that any inhabitant has two sets of weights and measures, according to one whereof (being legal) the said inhabitant buyeth, and with the other (being lighter or smaller) he selleth, and secreteth the latter, or produceth not the same to the sealer, it shall and may be lawful for the said sealer verbally to warn the said inhabitant to appear before the next justice of the peace for the said province, who is hereby authorized and required to examine the said inhabitant upon oath (without fee or reward) touching the same weights and measures, that so the fraud (if any there be) may be detected; and if the said inhabitant so verbally warned as aforesaid shall refuse to attend upon the said justice as aforesaid, the said justice, upon satisfactory proof of the said warning, shall issue his warrant to apprehend such delinquent, and bring him or her before him, when, if the said delinquent shall refuse to answer upon oath, he or she shall incur and forfeit the same penalty as in the said act is inflicted on persons who shall sell, vend, or utter any goods, wares, merchandise, grain, or other commodities, by other beams, weights, or measures than such as shall be proved and sealed as the same act requires, and pay the cost of prosecution.

3. *And be it further enacted*, That for the future the selectmen of the said towns and parishes (not already provided) shall, at the charge of the towns and parishes, respectively, procure all those weights and measures which by the law aforesaid are to be provided by the town clerks, and improved and used as standards for the said towns and parishes; and in default thereof, for the term of six months from the passing of this act, those selectmen who shall be delinquent herein shall forfeit and pay the sum of ten pounds, for the use of the poor of the town or parish where the selectmen shall be so negligent, to be levied by distress and sale of their goods and chattels by warrant from any justice of the peace.

E 1—*d*.

AN ACT regulating scale beams, steelyards, weights, and measures.

Sec. 1. *Be it enacted by the Senate and House of Representatives in General Court convened*, That the Governor, by and with the advice of council, be, and hereby is, authorized and empowered to appoint a sealer of weights and measures in each county in this State.

Sec. 2. *And be it further enacted*, That each sealer of weights and measures, appointed as aforesaid, shall provide, at the expense of the State, one complete set of scale beams, weights, and measures, similar to those now owned by this State; which shall be kept by him as standards for the use of said county. And it shall be the duty of said sealer of weights and measures to try and prove by said standards all scale beams, steelyards, weights, and measures which shall be brought to him for that purpose by the sealers of weights and measures chosen in the respective towns in said county; and to seal such as shall be found just, agreeable to said standards, who shall receive six cents for every scale beam, steelyard, weight, and measure so tried, proved, and sealed.

Sec. 3. *And be it further enacted*, That the selectmen of every town in this State shall provide, at the proper expense of their respective towns, one complete set of weights and measures, and a scale beam as aforesaid, for the use of said town, of such materials as the town shall think proper, provided the liquid measures be of some kind of metal.

Sec. 4. *And be it further enacted*, That each town in this State shall, at their annual meeting, choose one suitable person for a sealer of weights and measures in said town, who shall be sworn to the faithful discharge of his duty, who shall notify the inhabitants to bring in all scale beams, steelyards, weights, and measures, as they make use of, in the month of May, from year to year, at such time and place as he shall appoint, by posting up a notification at every meeting-house in said town, (and if there be no meeting-house, then at some public place in said town,) three weeks successively prior to the day appointed; and the said sealer shall try, prove, and seal all such scale beams, steelyards, weights, and measures, as shall be brought to him, and shall be found just, agreeable to said standards; and he shall have for every scale beam, steelyard, weight, and measure so sealed, two cents from the owner thereof at the first sealing, and after the first sealing one cent only, so long as they continue just with the standard.

Sec. 5. *And be it further enacted*, That all measures by which meal, fruit, and other things usually sold by heap, shall be sold, be of the following dimensions, viz: the bushel not less withinside than eighteen inches and a half wide; the half-bushel not less than thirteen inches and three-quarters wide; the peck not less than ten inches and three-quarters wide; and the half-peck not less than nine inches wide. And if any person, at any time from and after the first day of September next, shall sell, expose to sale, or offer any meal, fruit, or other things usually sold by heap, by any other measure than is aforementioned, as to bigness and breadth, such person, being complained of, and convicted before any justice of the peace within the county of so doing, shall forfeit and pay to the use of the poor of the town where the offence is committed the full value of the meal, fruit, or other things so sold or offered to sale, with costs.

Sec. 6. *And be it further enacted*, That the sealer of weights and measures appointed in each town within this State, from time to time, shall be, and hereby is, empowered to go to the houses of such of the inhabitants, having been duly notified as aforesaid, who shall neglect to bring or send in their scale beams, steelyards, weights, and measures, to be proved and sealed at the place assigned for that purpose, and shall there prove and seal the same, and shall receive of the owner, for every scale beam, steelyard, weight, and measure proved and sealed, twenty

cents, and no more; and every person that shall refuse to have their scale beams, steelyards, weights, and measures viewed, proved, and sealed, shall forfeit the sum of ten dollars, one moiety thereof to the use of the poor of the town, and the other moiety to the sealer; and if any person shall bring his scale beams, steelyards, weights, or measures to be proved and sealed at any other time than on the day or days set by the sealer of weights and measures for that purpose, he shall, in like manner, pay three cents for every scale beam, steelyard, weight, or measure that shall be tried and sealed, and one cent and a half for such as do not need sealing.

Sec. 7. *And be it further enacted*, That if any person, from and after the first day of September next, shall sell, vend, or utter any goods, wares, merchandises, grain, or other commodities whatsoever, by other scale beams, steelyards, weights, or measures than such as shall be proved and sealed as this act requires, in any town where provision is made, and notification given agreeably to this act, or shall fraudulently so sell, utter, or vend any goods, wares, merchandises, grain, or other commodities, by any scale beams, steelyards, weights, or measures that may be so sealed, that shall prove unjust, the person so offending shall forfeit a sum not less than one dollar nor more than ten dollars, with costs, for each offence; one moiety thereof to the use of the poor of the town where the offence shall be committed, the other moiety to the informer who shall prosecute the same.

Sec. 8. *And be it further enacted*, That all scale beams, steelyards, weights, and measures kept for standards in the several towns, shall be proved and tried by the public county standards at the end of every five years from time to time.

Sec. 9. *And be it further enacted*, That if the selectmen of any town in this State neglect to comply with their duty in procuring weights and measures, and a scale beam, as by this act is required, they shall forfeit the sum of one hundred dollars, to be recovered, one-half for the use of the county in which the neglect shall happen, and the other half for the use of the person who shall sue for the same.

Sec. 10. *And be it further enacted*, That when any sealer of weights and measures, that may be duly appointed in any town where a scale beam, weights, and measures are provided according to this act, shall neglect to notify the inhabitants as aforesaid, he shall forfeit the sum of fifty dollars; and for neglecting the duties of his office in any other respect, from one to twenty dollars; one-half for the prosecutor, the other half for the use of the town where such neglect shall happen. And all penalties and compensations mentioned in this act may be sued for and recovered by action, bill, plaint, or information, in any court proper to try the same.

Sec. 11. *And be it further enacted*, That the sealer of weights and measures for each county may make use of such seal as he may think proper, provided a description thereof, in writing, be lodged in the Secretary's office before it be made use of, and that the sealer of weights and measures chosen by each town, respectively, shall use such seal as the town may agree on, a record of which being previously made in the town records.

Provided, That this act shall remain in force till superseded by an act of the General Government.*

Approved: December 15, 1797.

E 1—*e*.

The Governor of New Hampshire to the Secretary of State.

New Hampshire, Executive Department,

Sir: Epping, *January* 4, 1819.

I regret that circumstances beyond my control have prevented me, till this time, from returning an answer to that part of your letter of November 4, 1818, requesting a statement of the scale beams, weights, and measures owned by this State, and where, and in whose custody, they are kept.

The State owns, of *dry measures*, a bushel, a half-bushel, and other measures of that kind, down to the smallest denomination. These measures are of copper, the bushel weighing about 100 lbs., and the others in proportion.

Of *liquid measures*, there are a gallon and a half-gallon; these are of block tin.

The weights are a 56 lb., 28 lb., and 14 lb., and two or three of a smaller denomination; these also are of copper.

The measures and weights are at Portsmouth, in the office of Robert Neal, jun., Esq., Commissary General of this State.

As to scale beams and steelyards, I can find none owned by this State.

I have the honor to be, &c.

WILLIAM PLUMER.

Hon. John Quincy Adams,
Secretary of State United States, Washington.

E 2—*a*.

VERMONT.

State of Vermont, Executive Department,

Sir: Shaftsbury, *January* 20, 1818.

In compliance with a request from the Department of State, I have the honor to enclose to you a copy of a law of this State relating to weights and measures, which is the only act now in force in this State relative to a standard of weights and measures.

Mere accident, and not intentional delay, has prevented a more speedy compliance with said request.

I am, sir, with great respect, your most obedient servant,

JONAS GALUSHA.

Hon. John Q. Adams,
Secretary of State of the United States.

E 2—*b*.

AN ACT relating to weights and measures.

Sec. 1. *It is hereby enacted by the General Assembly of the State of Vermont*, That the treasurer of this State shall provide, and keep in good order and repair in his office, one complete set of weights and measures necessary

* The operation of this act was postponed by four several acts till 10th December, 1801.

for the use of this State, according to the approved Winchester measure, allowed in England in the exchequer, namely: one half-bushel, one peck, one half-peck, one ale quart, one wine gallon, one two-quart wine measure, one quart, one pint, one half-pint, one gill, and one half-gill wine measure; one English ell, one yard, one set of iron weights, namely: one fifty-six pound weight, one twenty-eight pound weight, one fourteen, one seven, one four, one two, and one pound weight, and a suitable scale and beam necessary for the use of the same; also, one set of brass weights, from one ounce to four pounds, at the rate of sixteen ounces to the pound, and a suitable scale and steel beam necessary for the use of the same, tried and approved according to said standard of Winchester; which shall be considered and understood to be the public standard throughout this State for the approving and sealing all weights and measures; which standard of weights and measures shall be provided by the treasurer of this State, from time to time, as the same shall become necessary, and kept in his office. And if the said treasurer shall neglect to procure and keep in his office aforesaid all or any of the weights, measures, scales, or beams as aforesaid, he shall forfeit and pay *one hundred dollars* for each and every six months he shall be so deficient, with costs, to be recovered before any court of competent jurisdiction; one moiety of which sum to the prosecutor, and the other moiety to the treasury of the county in which such prosecution shall be had. And each and every county treasurer within this State shall, at the expense of their respective counties, provide within six months, and keep the same in repair in his office, all the aforesaid weights, measures, beams, and scales, according to the standard above mentioned, proved and sealed by the treasurer of this State; and shall, from time to time, keep the same in his office in good order and repair. And the selectmen of every town within this State shall provide, from time to time, as they may be wanted, at the expense of the town, one half-bushel and one peck, of the following dimensions, namely: the half-bushel in diameter, withinside, not less than thirteen inches and three-quarters of an inch; the peck not less than ten inches and three-quarters withinside; one half-peck, one ale quart, one wine gallon, one two-quart, one quart, one pint, one half-pint, one gill, one half-gill, wine measure; one English yard; one set of brass weights from one ounce to four pounds avoirdupois weight, with scales and steel beam. All the above measures, weights, scales, and beams to be tried, proved, and sealed by the county treasurer, according to the aforesaid standard of Winchester provided by the respective counties, which shall be kept only for standards.

Sec. 2. *And it is hereby further enacted*, That all steelyards that are or shall be approved of by the standard, shall be allowed of in any town of this State, and be at the liberty of both buyer and seller to weigh by.

Sec. 3. *And it is hereby further enacted*, That all weights, measures, scales, and beams, provided by the respective towns within this State as aforesaid, shall yearly and every year be delivered to the sealer of weights and measures, who shall be chosen and sworn, as the law directs, in the several towns; and the sealer of weights and measures within every town in this State shall post up a notification, in writing, in the month of January annually, requiring all and every person within their respective towns to bring in to said sealer of weights and measures all such weights and measures by which they respectively buy or sell, giving at least fourteen days' notice of the time appointed for sealing as aforesaid; and the sealers of such weights and measures may demand and receive from the owner of all weights and measures so tried, proved, and sealed by the town seal, two cents for each weight or measure so sealed by him; and if any person shall carry any weights or measures to be sealed at any time after the day notified for sealing as aforesaid, the sealers of weights and measures in such case may demand and take eight cents for each article sealed; which town seals shall be provided by the selectmen of their respective towns, at the expense and charge of the same.

Sec. 4. *And it is hereby further enacted*, That if the treasurers of the respective counties, or the selectmen or sealers of weights and measures of any town in this State, shall neglect or refuse to procure any weights, measures, scales, or beams, or shall neglect or refuse to seal any weight or measure, or to give notice as above directed, they shall severally forfeit and pay, for every month's neglect or refusal, the sum of *three dollars and fifty cents;* one moiety to the prosecutor, and the other moiety for the use of the poor of the town in which such delinquent lives, to be recovered by action of debt before any court proper to try the same.

Sec. 5. *And it is hereby further enacted*, That if any person or persons within this State shall, twenty days after notice given by the sealers of weights and measures as aforesaid, sell or vend any wares, merchandise, or other commodities whatever, by any other beams, weights, and measures but such as shall be tried, proved, and sealed as this act requires, the person so offending shall forfeit, for each offence, a sum not exceeding *seven dollars;* one moiety thereof to the prosecutor, the other moiety for the use of the poor of the town, to be recovered in manner as is hereinbefore provided.

Sec. 6. *And it is hereby further enacted*, That all beams, weights, and measures, kept for standards in the several towns, shall be tried and proved every ten years by the county standard; and the State standard shall be stamped with the letters S. S., the several county standards shall be stamped with the letters C. S., and the several town standards with the letters P. D.

E 3—*a*.

MASSACHUSETTS.

The Governor of Massachusetts to the Secretary of State.

Sir: Medford, *October* 24, 1817.

I have the honor to transmit to you, enclosed herewith, on abstract of the laws of the commonwealth of Massachusetts for regulating weights and measures.

With great respect, I have the honor to be, sir, your most obedient servant,

J. BROOKS.

Hon. John Quincy Adams, *Secretary of State.*

E 3—*b*.

Commonwealth of Massachusetts,

Sir: Secretary's Department, *September* 5, 1817.

In obedience to instructions from your excellency to furnish an abstract of the laws now in force in this commonwealth respecting *weights and measures*, for the purpose of complying with a request of the acting Secretary of State of the United States, made to your excellency by a note of the 29th of July last, in pursuance of a resolution of Congress of March 3d, 1817, I have now the honor to submit the following statement on that subject.

In February, 1800, an act passed the Legislature of this commonwealth, entitled "An act for the due regulation of weights and measures," by which it was required that the brass and copper weights and measures formerly sent

out from England with a certificate from the exchequer to be approved Winchester measures, according to the standard in the said exchequer, and adopted, and used, and allowed in this commonwealth, should be and remain the public allowed standards through the same, by which all weights and measures should be tried, proved, and sealed.

By said act it was made the duty of the treasurer of the commonwealth to have and keep, as public standards, to be used only as such, the *beams*, *weights*, and *measures* following, to wit: one bushel, one half-bushel, one peck, one half-peck, one ale quart, one wine gallon, one wine half-gallon, one wine quart, one wine pint, one wine half-pint, and one wine gill; the said measures to be of copper or pewter, conformable as to contents to said Winchester measures; and as to breadth, that is to say, the diameter of the bushel not less than eighteen inches and a half, containing thirty-two Winchester quarts; of the half-bushel, not less than thirteen inches and three-quarters, consisting of sixteen Winchester quarts; of the peck, not less than ten inches and three-quarters, containing eight Winchester quarts; and of the half-peck, not less than nine inches, containing four Winchester quarts; the admeasurement to be made in each instance withinside the measure. Also, one ell, one yard, one set of brass weights to four pounds, computed at sixteen ounces to the pound, with fit scales and steel beam. Also, a good beam and scales, and a nest of troy weights, from one hundred and twenty-eight ounces down to the least denomination, with the weight of each weight, and the length of each measure, marked or stamped thereon, respectively, and sealed with a seal, to be procured and kept by the said treasurer of the commonwealth; and also one fifty-six pound weight, one twenty-eight pound weight, one fourteen pound weight, and one seven pound weight, made of iron.

By the same act the county treasurers were also required to keep a complete set of beams, and of brass, copper, pewter, and iron weights, and of the aforesaid measures, (the bushel measure excepted,) tried, proved, and sealed by the said State standards, and marked or stamped as aforesaid; the measures to be conformable, as to breadth and contents, to the State standards, to be kept for the sole use of the respective counties, and to be used only as standards, and every ten years to be tried and proved by the treasurer and standards of the commonwealth; and, for neglect of duty in this behalf, the county treasurers are made liable to a fine of two hundred dollars.

The treasurers of towns were also required by the same law to procure and keep for town standards a complete set of *beams*, weights, and copper or pewter measures, under a penalty of one hundred dollars, to be conformable to said State standards, (excepting as to a bushel measure, and with the liberty also to have a wooden, instead of copper, iron, or pewter half-bushel, peck, and half-peck.) The town treasurers also to be excused from procuring a nest of troy weights, other than from the lowest denominations to the size of eight ounces; the same to be tried, proved, and sealed, either by the treasurer of the commonwealth, or of the county within which the town lies, and to be proved and sealed every ten years. Said town treasurer also to procure and keep a town seal for the purpose of sealing weights, &c. And the selectmen of every town are directed by the same law annually to appoint a suitable person as sealer of weights and measures, with power to remove and appoint others. The person appointed to be sealer of weights and measures to be under oath. The selectmen are liable to a fine of ten dollars for neglect of duty in this case; and the sealer of weights and measures to a fine of one hundred dollars for neglect of duty. The sealer to receive the town seals and standards for the purpose of proving, marking, and sealing weights and measures.

The sealer of weights and measures is also required by said law to give public notice of his appointment, and of the time when, and place where, he will try, prove, and seal the measures and weights. And he is authorized to go to the houses, stores, or shops of such as do not come to him to have their measures and weights proved, &c. And those who refuse to have beams, weights, and measures so tried, proved, and sealed, to forfeit ten dollars for every offence. Those who offer to sell, or do sell, without such proved and sealed weights and measures, to forfeit one dollar for every offence.

Fees to be paid State or county treasurer for sealing any weight, measure, scale, or beam, the first time three cents, and two cents for every after-sealing of the same. The sealer of weights and measures, for trying and proving town standards, and sealing them, to receive three cents, if they are found not conformable to the standard, and one cent and five mills for each beam, weight, and measure, if conformable thereto.

In March, 1804, an act passed the Legislature, in addition to the act above referred to, and abridged, requiring the treasurer of the commonwealth to add to the troy weights (by the first act ordered to be kept by him for public use) as follows, viz: To the weight of one hundred and twenty-eight ounces, the further weight of twenty-seven grains; to the weight of sixty-four ounces, the further weight of fifteen grains; to the weight of thirty-two ounces, the further weight of six grains; to the weight of sixteen ounces, the further weight of seven grains; to the weight of eight ounces, the further weight of four and a half grains; to the weight of four ounces, the further weight of two and a half grains; to the weight of two ounces, the further weight of two and a half grains; to the weight of one ounce, the further weight of two grains; to the weight of half an ounce, the further weight of one-quarter of a grain; or to procure new weights of the same denomination, and conformable to the State standards, with the additions aforesaid, respectively; and the same to be the standards of troy weight for the commonwealth.

By the last named act the directors of all banks in the State are required annually to have all the weights used in their respective banks compared, proved, and sealed by the treasurer of the commonwealth, or by some person specially appointed by him for the purpose; and the weights of banks are not, therefore, required to be sealed by town treasurers or sealers. And no tender of gold by any bank is to be legal unless weighed with weights thus compared, proved, and sealed.

The county treasurers are required by this law to have their standards of troy weights compared, proved, and sealed by the treasurer of the commonwealth once in ten years, at the expense of the county. And the treasurers of towns, at the expense of the towns, to have the town standards of troy weight compared, proved, and sealed every ten years, by the treasurer of the commonwealth, or the treasurer of the county.

The above is the substance of the laws of this State now in force through the whole commonwealth on the subject of weights and measures. In June, 1817, a law passed regulating weights and measures in the town of Boston. The provisions of this law vary but little from the former law above abridged, which is obligatory through the State. It provides that the sealer of weights and measures for the town of Boston shall have a house or office, to which all persons in Boston using scale beams, steelyards, weights, or measures, for the purpose of buying or selling any article, shall be obliged, after due notice in the public papers, to send annually their scale-beams, steelyards, weights, and measures, to be tried, proved, and sealed, as required by the act first above referred to. The sealer in Boston by this act is authorized and required to go to the houses or shops of those who do not send their weights, scales, &c. to him, to try, prove, and seal the same; and is to have double fees in such case. For refusing to have scales, weights, &c. proved and sealed, and for using weights, scales, &c. which are not conformable to the State standards, a fine of $10 is provided for each offence; and for altering any scale or weight, &c., a penalty of $50 for each offence.

ALDEN BRADFORD,
Secretary of Commonwealth of Massachusetts.

To His Excellency Gov. Brooks.

E 4.

RHODE ISLAND.

Governor of Rhode Island to the Secretary of State.

SIR: THE STATE OF RHODE ISLAND, PROVIDENCE, *September* 5, 1817.

Agreeably to your request of the 29th July last, relative to the regulations and standards for weights and measures here, I have to observe there is not any statute of this State regulating weights and measures, though the General Assembly have passed some acts regulating the assize of casks for cider and stone lime, but have never declared the cubical contents of a gallon or bushel.

The weights and measures now in use are sealed by the standard weights and measures procured from England many years since, and are said to be in conformity with those called the *lower standards.* However, they are the same as those used in the States of Connecticut and Massachusetts, which are generally known to be the same as the Winchester measure.

I have not been able to find, in the course of my researches, any thing written on the subject of weights and measures by any authority of this State, but I find it the immemorial custom of merchants to buy and sell sugar, rice, hay, iron, hemp, cordage, copperas, and dyewoods by gross hundreds, that is, 112 pounds for the hundred.

Respectfully, sir, your obedient servant,

N. R. KNIGHT.

N. B. Land and distances are measured here by the English rod.

Hon. RICHARD RUSH, *Acting Secretary of State.*

E 5—*a.*

CONNECTICUT.

SIR: STATE OF CONNECTICUT, LITCHFIELD, *August* 5, 1817.

I have received your letter of the 29th of July, and have directed the Secretary of State to transmit to your Department exemplifications of the acts of this State establishing the standards of weights and measures.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT.

The Hon. RICHARD RUSH, *Acting Secretary of State, Washington.*

E 5—*b.*

SIR: STATE OF CONNECTICUT, SECRETARY'S OFFICE, *August* 12, 1817.

In compliance with the request of his excellency the Governor of this State, I enclose, herewith, for your use, exemplifications of all the statutes of this State now in force relating to weights and measures.

With great respect, I have the honor to be your obedient servant,

THOMAS DAY.

The Hon. RICHARD RUSH, *Acting Secretary of State, Washington.*

E 5—*c.*

STATE OF CONNECTICUT:

At a General Assembly of the State of Connecticut, in America, holden at New Haven, in said State, on the second Thursday of October, being the ninth day of said month, and continued, by adjournments from day to day, until the first day of November, in the year of our Lord one thousand eight hundred:

AN ACT prescribing and regulating weights and measures.

SEC. 1. *Be it enacted by the Governor and Council and House of Representatives, in General Court assembled,* That the brass measures, the property of this State, kept at the treasury, that is to say: a half-bushel measure, containing one thousand and ninety-nine cubic inches, very near, a peck measure, and a half-peck measure, when reduced to a just proportion, be the standard of the corn measures in this State, which are called by those names, respectively; that the brass vessels ordered to be provided by this Assembly, one of the capacity of two hundred and twenty-four cubic inches, and the other of the capacity of two hundred and eighty-two cubic inches, shall be, when procured, the first of them the standard of a wine gallon, and the other the standard of an ale or beer gallon in this State; that the iron or brass rod, or plate, ordered by this Assembly to be provided, of one yard in length, to be divided into three equal parts for feet in length, and one of those parts to be subdivided into twelve equal parts for inches, shall be the standard of those measures, respectively; and that the brass weights, the property of this State, kept at the treasury, of one, two, four, seven, fourteen, twenty-eight, and fifty-six pounds, shall be the standard of avoirdupois weight in this State.

SEC. 2. *Be it further enacted,* That the treasurer of this State for the time being shall have the custody and safe-keeping of all the aforesaid weights and measures; and it shall be his duty, personally, or by some meet person or persons by him appointed, to try all such weights and measures as shall, pursuant to the provisions of this act, be presented to him to be tried by the proper standard, and to seal such as are found true with the capital letters S. C.

SEC. 3. *Be it further enacted,* That the treasurer of each county shall, on or before the first day of January next, provide, and constantly keep and preserve in good order, weights and measures correspondent to all the aforesaid standards, and of like materials, and shall, within the time aforesaid, cause them to be tried and sealed by those standards; and, in default thereof, shall, on conviction before the county court of the same county, pay a fine of seventeen dollars to the treasury of such county, to be recovered at the suit of the State's attorney for such county; and the county treasurer for the time being, after such conviction, shall incur a like penalty every term of three months he shall neglect his duty herein prescribed, to be recovered as aforesaid, for the use aforesaid: *Always provided,* That the State standards aforesaid may be used and improved, as heretofore, as standards for weights and measures for the county of Hartford.

Sec. 4. *Be it further enacted*, That the treasurer of each county for the time being shall have the custody and safe-keeping of the weights and measures belonging to the county; and it shall be his duty, either personally, or by some meet person or persons by him deputed, to try all such weights and measures as shall, pursuant to the provisions of this act, be presented to him to be tried by the county standard, and to seal such as are found true with the capital letter C, and that which begins the name of the county.

Sec. 5. *Be it further enacted*, That the selectmen of each town shall, on or before the first day of March next, at the cost and charge of the town, provide weights and measures of the various kinds aforesaid, of good and sufficient materials, which, for the standards of liquid measure, shall be copper, brass, or pewter, as standards for such town, and cause the same to be tried and sealed by the county standards; also, the following vessels for corn measure, of the forms and dimensions herein described, to wit: a two-quart measure, the bottom of which on the inside is four inches wide on two opposite sides, and four inches and a half on the two other sides, and its height from thence seven inches and sixty-three hundredths of an inch; a quart measure, the capacity of which is three inches square from bottom to top throughout, and its height seven inches and sixty-three hundredths of an inch; and a pint measure, the capacity of which from bottom to top is three inches square throughout, and its height three inches and eighty-two hundredths of an inch; and, in default thereof, such selectmen shall, on conviction before an assistant or justice of the peace, forfeit and pay a fine of seven dollars; the one-half to him or them who shall prosecute to effect, and the other half to the town treasury. And all informing officers are required to inquire after, and due presentment make of, all breaches of this act; and, after such conviction, the selectmen for the time being shall incur a like penalty for every term of two months they shall neglect their duty herein prescribed, or shall, at any future time, fail to preserve such weights and measures, true and in good order, for the use of the town, to be recovered as aforesaid, for the use aforesaid.

Sec. 6. *Be it further enacted*, That the sealers of weights and measures in each town shall have the custody and safe-keeping of the weights and measures belonging to the town, respectively; and it shall be their duty, once in every year, to try the several weights, steelyards, and measures that are used and improved by any person or persons in such town, by the town standards; to deface and destroy all such as cannot be brought equal with the standard, and to seal with the capital letter initial in the name of the town all such as are found or made true; and such sealer shall, some time in the month of April, yearly, give notice, in writing, to the inhabitants of the town, posted on the sign post and other public places in the town, to bring their steelyards, weights, and measures, at a time and place therein fixed, to be tried and sealed. And if any person or persons shall, after the first day of May next, for the purpose of buying or selling, use any weight or measure until the same shall have been sealed in the manner aforesaid, each person so offending shall, for every such offence, forfeit the sum of two dollars, one-half for the benefit of the town in which such offence shall be committed, and the other half for the benefit of the sealer of weights and measures for said town, whose duty it shall be to prosecute the same to effect.

Sec. 7. *Be it further enacted*, That every sealer who shall neglect his duty required in this act shall forfeit the sum of five dollars for every such neglect to the town treasury.

Sec. 8. *Be it further enacted*, That the statute entitled "An act for the due regulation of weights and measures" be, and the same is hereby, repealed.

E 5—*d*.

State of Connecticut:

At a General Assembly of the State of Connecticut, in America, holden at New Haven, in said State, on the second Thursday of October, being —— day of said month, and continued by adjournments from day to day, until the ——, in the year of our Lord one thousand eight hundred and one:

AN ACT in alteration of the statute, entitled "An act prescribing and regulating weights and measures."

Sec. 1. *Be it enacted by the Governor and Council and House of Representatives in General Court assembled*, That the treasurer of this State do, without delay, provide a vessel of brass, the capacity of which shall be five inches square from bottom to top throughout, and nine inches and twenty-four hundredths of an inch in height, containing two hundred and thirty-one cubic inches, and the same, when provided, shall be the standard of a wine gallon in this State; any thing in said act to the contrary notwithstanding.

Sec. 2. *Be it further enacted*, That the provisions of said act shall relate to the said standard in all respects as they related to that in place of which it is substituted; and the treasurer of each county, by the first day of January next, and the selectmen of each town, by the first day of March next, shall, respectively, on penalty as by said act is in each case provided, to be recovered and applied as therein directed, provide, and cause to be tried and sealed by the proper standard, and constantly kept in good order, a vessel or measure of the same capacity as and for a standard of a wine gallon, for such counties and towns, respectively.

E 5—*e*.

At a General Assembly of the State of Connecticut, holden at Hartford, in said State, on the second Thursday of May, in the year of our Lord one thousand eight hundred and ten:

AN ACT regulating the measure of charcoal.

Be it enacted by the Governor and Council and House of Representatives in General Court assembled, That the standard measure of charcoal shall be the half-bushel measure prescribed by the act entitled "An act prescribing and regulating weights and measures," and that in measuring charcoal such measure shall be well heaped.

General Assembly, *May Session*, 1810.

LYMAN LAW,
Speaker of the House of Representatives.
JOHN TREADWELL, *Governor.*

Attest: Thomas Day, *Secretary.*

E 6—*a*.

NEW YORK.

The Governor of New York to the Secretary of State.

Sir: Albany, *September* 4, 1817.

In compliance with the request contained in your letter of the 29th of July, I now transmit a copy of the law of this State relative to weights and measures, marked No. 6. The papers numbered 1, 2, 3, 4, and 5, exhibit our regulations on this subject, at different periods.

I have the honor to be, very respectfully, your most obedient servant,

The Hon. R. Rush. DE WITT CLINTON.

E 6—*b*.

AN ACT to ascertain the assize of casks, weights, measures, and bricks, within this colony. Passed June 19, 1703.

Whereas nothing is more agreeable to common justice and equity, nor for the good and benefit of any people or Government, who live in community and friendship together, than that they have one equal and just weight and balance, one true and perfect standard and assize of measure among them; for want whereof experience shows that many frauds and deceits happen, which usually fall heavy upon the meanest and most indigent sort of people, who are least able to bear the same, and may be accounted little better than oppression: for remedy of which evil,

Be it enacted, and it is hereby enacted, by his excellency the Governor, by and with the consent of Her Majesty's Council and Representatives of this colony, &c., That, from and after the first day of August next, no cooper, or other person or persons whatsoever, within this city or colony, shall make any dry cask or vessel but of good and well-seasoned timber, and of the respective dimensions following, viz: every hogshead to be forty inches long, thirty-three inches in the bulge, and twenty-seven inches in the head; every tierce to be thirty-six inches long, twenty-seven inches in the bulge, and twenty-three inches in the head; every barrel to be thirty inches long, twenty-six inches in the bulge, and twenty-two inches in the head; every half-barrel to be twenty-five inches long, twenty inches in the bulge, and sixteen inches in the head; every quarter-barrel to be twenty inches long, sixteen inches in the bulge, and thirteen inches in the head. All tight barrels to contain thirty-one gallons and a half of wine measure each, and not to exceed or be half a gallon over or under the same, and all other casks to contain in proportion to a barrel, upon penalty of five shillings for every offence committed to the contrary hereof, to be paid by the maker or user of such casks or vessels, in whose hands the said offence shall first happen to be known or discovered.

And to the preventing other frauds and deceits that may be in casks made as aforesaid,

Be it further enacted, &c., That, from and after the said first day of August, all and every the cask and casks, which shall be employed or used for the stowing or packing of flour or biscuit, within this city or province, for transportation thereof, or otherwise, in any way, of merchandise, before any of the said goods or commodities shall be put or packed therein, shall be truly weighed, and the just weight and tare thereof be set with a marking iron upon the head of each cask so employed as aforesaid, together with the name of each respective person using or employing the same, upon the penalty of nine pence, to be paid for every neglect herein by the person or persons, respectively, on whose account any of the goods or commodities aforesaid shall, to the contrary hereof, be stowed or packed as aforesaid.

And be it further enacted, &c., That, from and after the first day of August aforesaid, there shall be one just beam or balance, one certain weight and measure, and one yard, that is to say, avoirdupois and troy weights, bushels, half-bushels, pecks, and half-pecks, according to the standard of Her Majesty's exchequer, in her realm of England, throughout all this colony, as well in places privileged as without, any usage or custom to the contrary notwithstanding; and that every measure of corn shall be striked without heap. And whosoever shall sell, buy, or keep any other beam, weight, measure, or yard, than as aforesaid, whereby any corn, grain, or other thing is bought or sold, from and after the time limited as aforesaid, shall forfeit for every such offence twenty shillings.

And for the better observance and putting in execution of this act, fit persons be appointed in all counties and cities within this colony, for the sealing and marking all beams, weights, measures, and yards, to be used within the respective counties and cities aforesaid, with the letter A, according to the standard of Her Majesty's exchequer in England, that the same may be known throughout this colony; and that his excellency the Governor aforesaid be desired to nominate and appoint such fit persons in all proper places within this colony aforesaid, the which respective persons, when nominated and appointed, shall take for their pains in sealing and marking all such beams, weights, measures, and yards, as shall from time to time for that purpose be brought in to them, the rate of nine pence, except weights and small liquid measures, which shall pay only one penny each, and no more, on penalty of five shillings for the least exaction therein; saving always, nevertheless, unto the cities of New York, Albany, and borough of Westchester, and the mayors thereof for the time being, all such rights, privileges, and usages as they respectively can justly claim as clerks of the market within the said cities and borough, or otherwise howsoever, any thing herein contained to the contrary hereof in anywise notwithstanding.

And be it further enacted, &c., That, from and after the first day of August, no person or persons, be he master or servant, shall make, or suffer to be made, in any place or places within this colony, any bricks, or kiln of bricks, but such as shall be well and thoroughly burnt, and of the size and dimensions following, that is to say: every brick to be and contain nine inches in length, four inches and one-quarter of an inch in breadth, and two inches and one-half inch in thickness thereof, all well struck off in good and workmanlike order and manner, and made of right and well-tempered mould or clay, on penalty of six shillings for every neglect herein, to be paid by the master or owner of the said brick, or kiln, in whose hands or wheresoever the neglect or offence aforesaid shall be discovered or found out, except well bricks.

And it is hereby also further enacted, &c., That, from and after the time limited as aforesaid, no other casks, beams, weights, measures, yards, or bricks, shall be used within this colony than such as aforesaid, except well bricks and such other bricks as are already made or to be made before the commencement of this act, on the penalty of twenty shillings, to be paid by the person using the same, or any of them: *Provided, always*, That all and every the penalties and forfeitures in and by this act set and appointed as aforesaid, shall be, one-half to the use of the poor of the parish, town, or place where the default or offence happens to be; the other moiety thereof to the use of the person or persons who shall inform and sue for the same forfeitures in any of Her Majesty's courts of record within this colony, or else to be recovered to the uses aforesaid, upon conviction of the offender by the oath of one sufficient witness before any justice of the peace, mayor, or other head officer of the city, county, town, or place, respectively, where the offence against or breach of this act shall be committed, (who, by virtue of this act, shall have power to administer an oath on that behalf,) by way of distress and sale of the offender's goods and chattels; the overplus (if any be, after charges of the distress deducted) to be returned to the owner thereof; and where no distress can be had, that it shall and may be lawful to and for any justice of the peace, mayor, or head officer aforesaid, to commit the said offender or offenders to prison, there to remain without bail or mainprize until he or they shall pay the penalties and forfeitures aforesaid, for which they shall be so committed, to the uses aforesaid: *Provided, also*, That no prosecutions shall be for any of the forfeitures aforesaid but within three months after the respective facts are committed; any thing herein to the contrary hereof notwithstanding.

E 6—*c*.

AN ACT to ascertain weights and measures within this State. Passed 10th April, 1784.

Whereas it is agreeable to equity, and beneficial to commerce, that a people who live in the same community shall have one equal and just weight and balance, according to a true and perfect standard and assize of measures, to be established by law, without which necessary provision frauds and deceits may be practised with impunity:

1. *Be it therefore enacted by the people of the State of New York, represented in Senate and Assembly, and it is hereby enacted by the authority of the same*, That, from and after the first day of June next, there shall be one just beam, one certain weight and measure, that is to say, avoirdupois and troy weights, bushels, half-bushels, pecks, and half-pecks, according to the standard in use in this State on the day of the declaration of the independence thereof; and that the standard weights and measures in the custody of William Hardenbrook, who, before and at the time of the said declaration, was the public sealer and marker of all beams, and weights, and measures within the city and county of New York, which standard is according to the standard of the court of exchequer in that part of Great Britain called England, shall forever hereafter be deposited with, kept, and preserved by the clerk of the peace, or common clerk of the city and county of New York, for the time being, and shall be, and hereby are, declared and established to be and remain the standard for ascertaining all beams, weights, and measures throughout the State, any usage or custom to the contrary thereof notwithstanding; and the said clerk of the peace, or common clerk, now and for the time being, shall take an oath, to be administered to him in open court before the mayor, recorder, and aldermen of the said city, well and faithfully to preserve the said weights, seals, and measures, and to suffer no other person to make use of the same except a sworn public sealer and marker of weights and measures: *Provided, always*, That the said William Hardenbrook shall deliver the said beam, weights, and measures to the clerk of the peace or common clerk of the said city and county, in the presence of the mayor, recorder, and one or more of the aldermen of the said city, and shall declare, on his solemn oath, that the said beam, weights, or measures are the same which he received from the court of exchequer aforesaid, according to the best of his knowledge and belief.

2. *Provided, always, and be it further enacted*, That, if any of the said standard beams, weights, and measures shall be broken, impaired, or missing, it shall and may be lawful to and for the mayor and aldermen of the city of New York in common council convened to cause to be delivered to the said clerk of the peace, or common clerk, for the time being, any standarded beam, weights, and measures, respectively, to supply such deficiency, taking care that the same is according to the standard established in the late colony (now State) of New York immediately preceding the declaration of independence of this State.

3. *And be it further enacted by the authority aforesaid*, That, for the better observance and execution of this act, it shall and may be lawful to and for his excellency the Governor of this State for the time being, by and with the advice and consent of the council of appointment, to appoint fit persons in all convenient and proper places within this State for sealing and marking all beams, weights, and measures; that the persons so to be appointed shall impress with the letter A all beams, weights, and measures to be sealed and marked by each of them, respectively, and shall respectively take and subscribe an oath, before one of the judges of the court of common pleas of the county in which he or they shall reside, for the faithful execution of the trust to be committed to them by virtue of this act; and the judge before whom such oath shall be taken shall cause a certificate thereof to be filed with the clerk of the county wherein such judge shall reside; and every such sworn public sealer and marker of weights, seals, and measures shall be entitled to receive for his pains in sealing and marking all such beams and measures as shall from time to time for that purpose be brought to him, the rate of nine pence, and for every weight and every small liquid measure one penny, and no more; saving always, nevertheless, unto the cities of New York and Albany, and borough of Westchester, and the mayors thereof for the time being, all such rights, privileges, and usages as they respectively can justly claim as clerks of the markets within the said cities and borough, or otherwise howsoever, any thing herein contained to the contrary hereof notwithstanding.

E 6—*d*.

Extract from an act supplementary to the act entitled "An act to prevent the exportation of unmerchantable flour, and the false taring of bread and flour casks." Passed 7th March, 1788.

7. *And be it further enacted by the authority aforesaid*, That the standard weight of wheat brought to the city of New York for sale shall be sixty pounds nett to the bushel; and in all cases of sales of wheat in the said city by the bushel, if the same shall exceed the standard weight, the buyer shall pay a proportionably greater price; and if the same shall be less than the said standard, the buyer shall pay a proportionably less price: *Provided*, That this regulation shall not extend to any special contracts respecting the sales of wheat, whatever may be the weight thereof.

E 6—*e*.

AN ACT to amend an act entitled "An act to ascertain weights and measures within this State." Passed February 2, 1804.

Be it enacted by the people of the State of New York, represented in Senate and Assembly, That the Secretary of this State for the time being shall, *ex officio*, be the State sealer of weights and measures; and that there shall be one assistant State sealer, to be appointed from time to time, as occasion may require, by the person administering the government of this State, by and with the advice and consent of the council of appointment, in the county of Oneida; and that there shall be one sealer of weights and measures in each county of the western district of this State, to be appointed by the board of supervisors that shall think proper to appoint one at their annual meeting in October, and one town sealer of weights and measures in each town that shall think proper to elect one; to be elected as other town officers are directed to be elected.

And be it further enacted, That the several State standard weights and measures shall be made of iron, brass, or copper, as the Secretary shall direct; and the several county standard weights and measures shall be of such materials as the several boards of supervisors shall direct; and the several town standard weights and measures shall be of such materials as the supervisor of each town shall direct.

And be it further enacted, That it shall be the duty of the said Secretary, within nine months after the passing of this act, at the cost of this State, to procure two sets of standard weights and measures, of the same weight and capacity as is mentioned in the act hereby amended, with such beams as he shall think necessary; one set to be kept by himself as a principal State standard, and the other three sets to be delivered to the said assistant State sealers.

And be it further enacted, That the said county sealers of weights and measures shall, at the cost of the respective counties for which they are elected, within six months after being notified of their several appointments by the clerks of the several boards of supervisors, whose duty it shall be to give such notice, procure a complete set of standard weights and measures for the use of each respective county; and that the several town sealers of weights and measures, at the cost of the respective towns, shall, within six months after their respective appointments, procure a set of standard weights and measures for the use of the town or towns for which they shall be respectively appointed.

And be it further enacted, That the letters N. Y. shall be impressed on all the State standard weights, measures, and beams, and on the several county standard weights, measures, and beams, with such other device, in addition, as the said Secretary shall direct for each county; which device shall be recorded in the records of this State, and a copy thereof delivered by the Secretary to the assistant State sealer; and the several town standard weights, measures, and beams shall be impressed, by the county sealer in which such town shall be situate, with such other device, in addition to the county device, as the board of supervisors shall direct for the several towns in their several counties; which several town devices shall be recorded by the clerks of the several boards of supervisors in a book suitable for that purpose, and a copy of such record delivered by said clerk to the county sealer: *Provided, nevertheless*, That if any town shall neglect to appoint a town sealer of weights and measures, then it shall be lawful for the county sealer to seal all the weights, measures, and beams belonging to the inhabitants of such town so neglecting.

And be it further enacted, That it shall be the duty of the assistant State sealers to have their standard weights and measures compared with the principal State standard once in fourteen years; and that the several county sealers shall have their standard weights and measures compared with one of the State standards once in seven years, and oftener if necessary; and the several town sealers shall have their town standards compared with the county standard once in three years; that before either of the sealers of weights and measures, who shall be appointed by virtue of this act, shall enter on the duties of his office, he shall take and subscribe an oath or affirmation before one of the judges of the supreme court, court of common pleas, or justice of the peace of the county wherein such sealer is resident, well and truly, according to the best of his skill and ability, to perform the duties by this act enjoined, and cause a certificate thereof to be filed in the Secretary's office, or the office of county or town clerk, as the case may be.

And be it further enacted, That each of the sealers of weights and measures within this State shall be entitled to receive for his service for sealing and marking beams or measures which shall from time to time be brought to him for that purpose, twelve and a half cents, and for every weight and every small liquid measure two cents, over and above his cost of making them right, if they are not so when brought to him for that purpose.

And be it further enacted, That so much of the act hereby amended as respects the appointment of sealers of weights, measures, fees, and device, shall be, and hereby is, repealed, so far as respects the said western district.

E 6—*f*.

AN ACT relative to a standard of long measure, and for other purposes. Passed March 24, 1809.

Whereas the corporation of the city of New York did, in the year one thousand eight hundred and three, procure a brass yard measure, engraved and sealed at the exchequer in Great Britain, and have presented the same to this State, which has been deposited, together with the documents authenticating it, in the Secretary's office: therefore,

Be it enacted by the people of the State of New York, represented in Senate and Assembly, That the said brass measure is, and shall be, the standard yard measure of this State.

And be it further enacted, That, as soon as may be after the passing of this act, it shall and may be lawful, and it is hereby made the duty of the Secretary of this State, to cause the said standard measure to be engraved with the words *State of New York* thereon; and that he cause to be made and procured two brass yard measures for the city and county of New York, engraved with the words *City and County of New York;* one for the assistant State sealer in the village of Utica, engraved with the words *State of New York;* and one for each of the respective counties of this State, engraved with the name of the proper county, similar to the aforesaid standard; and that he cause the measure so procured and marked for each county [to be] delivered to the clerk thereof, who shall keep the same for the use of the county, as the standard yard measure of this State for such county, and compare therewith all yard measures or rods which may be presented to him for that purpose.

And be it further enacted, That the assistant State sealer and clerk of each county shall be paid twelve and a half cents for comparing each yardstick or rod that shall be presented to him for that purpose, over and above the expense of making such stick or rod exactly compare and agree with the said standard measure of the county, when so presented.

And be it further enacted, That no surveyor, for any survey made for one year from the passing of this act, shall give evidence as a surveyor in any court or elsewhere in this State, in any cause wherein land is in dispute, respecting the survey or measurement thereof, unless such surveyor shall make oath, if required, that the chain or measure used by him, when surveying or measuring such land, was conformable to the standard measure of this State.

And be it further enacted, That the treasurer, on the warrant of the comptroller, shall pay to the Secretary the expenses incurred by virtue of this act.

And be it further enacted, That the act entitled "An act to direct the Secretary to procure a State standard of long measure, and for other purposes," passed the 11th day of April, 1808, be, and the same is hereby, repealed.

And be it further enacted, That it shall and may be lawful for the inhabitants of any town in this State, for their convenience, and by a vote at their annual town meeting, to direct the clerk of such town to procure, and deposite in his office, a standard brass yard, to be sealed by the person authorized to seal and compare such yard, and to be considered as the true yard for all the purposes aforesaid.

E 6—*g*.

AN ACT to regulate weights and measures. Passed March 19, 1813.

1. *Be it enacted by the people of the State of New York, represented in Senate and Assembly*, That there shall be one just beam, one certain weight and measure for distance and capacity, that is to say, avoirdupois and troy weights, bushels, half-bushels, pecks, half-pecks, and quarts, and gallons, half-gallons, quarts, pints, and gills, and one certain rod for long measure, according to the standard in use in this State on the day of the declaration of the independence thereof; and that the standard of weights and measures now in the office of the Secretary of this State, which is according to the standard of the court of exchequer in that part of Great Britain called England, shall be, and is hereby, declared to be and remain the standard for ascertaining all beams, weights, and measures throughout this State, until the Congress of the United States shall establish the standard of weights and measures for the United States.

2. *And be it further enacted*, That the Secretary of this State for the time being shall, *ex officio*, be the State sealer of weights and measures; and that there shall be three assistant State sealers, to be appointed from time to time, as occasion may require, by the person administering the government of this State, by and with the advice and consent of the council of appointment, to continue in office during the pleasure of the said council; one of which assistants shall reside in the city of New York, one in the city of Albany, and one in the county of Oneida; and that there shall be one county sealer of weights and measures in each county in this State, to be appointed by the

board of supervisors of the respective counties, at their annual meeting in October, to continue in office during pleasure; and one town sealer of weights and measures in each town in this State, to be elected at the annual town meetings, who shall continue in office for one year, and until another shall be chosen in his stead.

3. *And be it further enacted*, That it shall be the duty of the Secretary of this State, within nine months after the passing of this act, in addition to the weights and measures already provided by law, and now remaining with the said Secretary, and the assistant State sealer in the county of Oneida, to procure, at the expense of this State, so many weights, measures, and beams as shall make out four complete standards of weights and measures, both of liquid and dry measures, and avoirdupois and troy weights, with proper beams and standards, brass rods of long measure; one complete set to be retained in his office as a principal State standard, and one other set of the said standards to be delivered to each of the assistant State sealers, taking their receipts, respectively, therefor; and the comptroller is hereby directed to audit the account of the Secretary for his expenses in procuring the said additional standards of weights, measures, and beams, and draw his warrant for the amount on the treasurer, who is hereby directed to pay the same out of any moneys in the treasury not otherwise appropriated.

4. *And be it further enacted*, That the several State standards of weights, beams, and measures shall be made of iron, brass, or copper, as the Secretary shall direct; and the several county standard weights and measures shall be made of such materials as the several boards of supervisors shall direct; and the several town standard weights and measures shall be made of such materials as the supervisors of each town shall direct.

5. *And be it further enacted*, That the said county sealers of weights and measures shall, at the expense of the respective counties for which they are elected, within six months after being notified of their respective appointments by the clerks of the several boards of supervisors, whose duty it shall be to give such notice, and after receiving from their respective county treasurers, by order of the said board, so much money as may be necessary for the purpose, procure a complete set of the said standard weights and measures for the use of their respective counties; and every such county sealer shall forthwith, after having procured such standard, deliver to the clerk of the board of supervisors a statement, in writing, of the expense thereof, and that such standard is in his possession; and that the several town sealers of weights and measures shall, at the expense of the respective towns, within six months after their appointments, and after having received sufficient money for the purpose, procure a complete set of the said standard weights and measures for the use of the respective towns; and, having procured the same, shall deliver to the clerk of the town, to be filed in his office, such statement, in writing, as is before specified.

6. *And be it further enacted*, That the letters N. Y. shall be impressed on all the State standard weights, measures, and beams; and on the several county standard weights, measures, and beams, such other device, in addition, as the said Secretary shall direct for each county; which device shall be recorded in the Secretary's office, and a copy thereof delivered by the Secretary to each of the assistant State sealers; and the several town standard weights, measures, and beams shall be impressed by the county sealer in which such town shall be situate, with such other device, in addition to the State and county device, as the board of supervisors shall direct for the several towns in their respective counties; which several town devices shall be recorded by the clerks of the several boards of supervisors in a book to be kept for that purpose; and that such clerk shall deliver a copy of such record to every county sealer.

7. *And be it further enacted*, That it shall be the duty of the assistant State sealers to compare their standard weights and measures with the principal State standard once in fourteen years; and that the several county sealers shall compare their standard weights and measures with one of the State standards once at least in seven years; and the several town sealers shall compare their town standards with the county standard once at least in three years; that, before either of the sealers of weights and measures, who shall be appointed by virtue of this act, shall enter on the duties of his office, he shall take and subscribe an oath or affirmation before one of the justices of the supreme court, or one of the judges of the court of common pleas, or justice of the peace of the county wherein such sealer is resident, well and truly, according to the best of his skill and ability, to perform the duties enjoined on him by this act; and that every assistant State sealer shall cause a certificate of the oath by him taken to be filed in the Secretary's office; and every county sealer and town sealer shall, in like manner, cause such certificate as aforesaid to be filed in the clerk's office of their respective counties.

8. *And be it further enacted*, That each of the sealers of weights and measures within this State shall be entitled to receive for his services in sealing and marking measures and beams which shall from time to time be brought to him for that purpose, twelve and a half cents, and for every weight and every small liquid measure three cents, over and above a reasonable compensation for making them conform to the standard established by this act.

9. *And be it further enacted*, That it shall be the duty of the clerks of the several counties to deliver to the respective county sealers of weights and measures heretofore appointed, or hereafter to be appointed, the standard brass yard measure which shall have been received by such clerks from the Secretary of this State for the use of the said counties.

10. *And be it further enacted*, That no surveyor shall give evidence in any cause pending in any of the courts of this State, or before arbitrators, respecting the survey or measurement of lands, unless such surveyor shall make oath (if required) that the chain or measure used by him in surveying or measuring such lands was conformable to the standard measure of this State.

11. *And be it further enacted*, That, whenever either of the assistant State sealers of weights and measures shall resign or remove from the cities of New York or Albany, or the county of Oneida, or whenever any of the county or town sealers shall resign or remove from the counties or towns in which they were respectively appointed, it shall, in that case, be the duty of the person so resigning or removing to deliver to his successor in office all the standard beams, weights, and measures in his possession; and, in case of the death of any sealer of weights and measures, it shall, in like manner, be the duty of his executors or administrators to deliver to the successor to be appointed, all the said standard beams, weights, and measures in the possession of their testator or intestate at the time of his death; and, in case of neglect or refusal to deliver such standard entire and complete, the successor in office may maintain an action on the case against the person so removing or resigning, or against such executors or administrators, and recover double the value of such standard, or such parts thereof as have not been delivered to the said successor in office, with costs of suit; and, in every such action, if judgment shall be rendered for the plaintiff, he shall recover double costs, one moiety of which may be retained by the person so recovering, and the other moiety shall be by him applied to the purchase of such standard beams, weights, and measures as may not be delivered over as aforesaid.

12. *And be it further enacted*, That if any person or persons shall, after one year from the passing of this act, use any weights, measures, or beams, in weighing or measuring, which shall not be conformable to the standard of this State, whereby any purchaser of any commodity or article of trade or traffic shall be injured or defrauded, it shall be lawful for the person so injured or defrauded to maintain an action on the case against the offender in any court having cognizance thereof; and, if judgment shall be rendered for the plaintiff, he shall recover treble damages against the defendant, with costs of suit.

E 7.

NEW JERSEY.

SIR: ELIZABETHTOWN, *September* 20, 1817.

I have the honor to acknowledge the receipt of your letter of the 29th of July last, accompanying a copy of a resolution of the Senate relative to weights and measures. There is not in the State of New Jersey any legislative act establishing or regulating weights or measures, nor can I learn that the subject has, at any time, engaged the attention of the State Legislature; but, by custom, the English standard of weights and measures has been adopted, and is in use throughout this State; and I know of no information that I can furnish for enabling the Department of State to fulfil the views of the Senate.

I have the honor to be, with very great respect, your most obedient servant,

ISAAC H. WILLIAMSON.

The Hon. RICHARD RUSH, *Acting Secretary of State.*

E 8—*a.*

PENNSYLVANIA.

SIR: HARRISBURG, *August* 26, 1817.

Your letter to the Governor, accompanied by a copy of a resolution of the Senate of the United States relative to weights and measures, has been duly received some time since. In this office there are no materials calculated to afford any information on that important subject. There does not appear to have been any legislative act relative to it since A. D. 1700, which directs the standards to be regulated "according to the King's standards for the exchequer." [See Smith's edition of the Laws, page 19.] I addressed a note to Mr. Meer, keeper of weights and measures in the city; I herewith enclose his answer, together with a report of a committee of the Senate in 1814, and Dr. Bollman's letter; none of which, probably, will suggest any new ideas to you on the subject.

Very respectfully, sir, your obedient servant,

N. B. BOILEAU, *Secretary.*

RICHARD RUSH, Esq., *Acting Secretary of State.*

E 8—*b.*

SIR: PHILADELPHIA, *August* 20, 1817.

Your letter of the 16th instant requests me to give information respecting weights and measures for the consideration of the Senate of the United States; a task I cheerfully undertake, as far as I am acquainted with the business, because they are in an incorrect and deranged condition throughout the Union, in consequence of the regulators not having a fixed and correct standard to which they can resort to keep those they use in order. The variant and irregular weights and measures of the different States and towns prove a serious evil both to the wholesale and retail dealer, and often produce difficulties in the trade between the several States, which call for immediate redress. It being the peculiar province of the Legislature of the United States to fix the standard of weights and measures, I am happy to find that the Senate have taken the subject under their serious consideration.

The standards in my keeping were, I believe, brought here by William Penn, more than one hundred years ago, and have been in use ever since; of course, they cannot be very correct.

I would therefore propose that one simple standard weight be adopted and used for all purposes, and that its scantlings and parts be decimally divided, so as to suit the money of the United States, and that the unit be the English avoirdupois pound.

That, for measures of capacity, the wine gallon be the unit, and be used for all purposes where measures of capacity are necessary; and that, for the measure of extension, the English foot be adopted as the unit, and be decimally divided.

I believe that the British standard weights are made of agate, so that they may not be corroded by oxydating principles of the air, as most metals are. But I believe that platina would be fitter for the purpose, being easily formed, and less liable than any other metal to be oxydated. I consider a cylindric form most suitable, both for weights and measures of capacity. No doubt the Legislature will see the propriety of furnishing the capital or principal town of every State with a complete set of standards, so that the regulators may have the necessary standards made of coarser metal for their immediate use, as well as a resort to the means of keeping them in order.

In a trading community it is equally necessary to have correct scale beams as to have just weights. Frauds are daily occurring in consequence of not having a law for the inspection and regulation of them similar to that for the regulation of weights. No person should be permitted to sell beams before they have been inspected and sealed by the proper officer.

I wish to refer you to Dr. Bollman's paper on the subject, in the appendix to the Journals of the Senate of March 18, 1814, No. 3; likewise to the report of March 3, 1808, Journals of the Senate; in which will be found valuable information. I am, sir, with great respect, yours, &c.

JOHN MEER.

P. S. I wish to refer you, likewise, to a small treatise on moneys, coins, weights, and measures, proposed for the United States of America, written by Thomas Jefferson; printed by Daniel Humphries in 1789, Philadelphia.

I enclose Mr. Dorsey's report, as above noticed.

N. B. BOILEAU, Esq.

E 9—*a.*

DELAWARE.

OFFICE OF THE SECRETARY OF STATE,

SIR: DOVER, DELAWARE, *November* 7, 1818.

By direction of the Governor, I have the honor to reply to your letter requesting "such information of the acts of the State of Delaware in relation to weights and measures as he may think proper to communicate."

There is in our statute books but one act in relation to weights and measures; that is to be found in the first volume of our laws, page 57. By this act it is directed that standards of brass for weights and measures, according to the Queen's standards for the exchequer, shall be obtained in each county within two years after the making of the law, and that these standards shall remain with such officer in each county as shall be from time to time appointed by the county court in each county; and that all weights and measures shall be made just, and marked by the keeper of these standards, &c.

This law is not *now* observed in any part of the State, and I am unable to say whether it ever went into operation in the counties of Kent and Sussex; the probability is that it never did, as no evidence can now be had that it ever was carried into effect in either of these counties. In the county of Newcastle the act was carried into execution: the standard weights and measures which it prescribed were obtained for that county, and persons were appointed at different times to be keepers of those standards: but for a great many years the law has ceased to be observed in that county; nor is it known whether the standards that were procured for that county are now in existence.

The Philadelphia weights and measures are generally used, I believe, in this State; but whether they are conformable to the standards designated by the act of Assembly aforesaid or not, I cannot say.

No decision of any of our courts sanctioning any particular weights or measures has, to my knowledge, ever been made.

I herewith transmit you a communication which I lately received from James Booth, Esq., the chief justice of our courts of common pleas and quarter sessions, a gentleman whose age, experience, and different public stations have afforded many opportunities for obtaining information as to the subject of weights and measures as used and regulated in this State.

I have the honor to be, sir, with great respect, your most obedient servant,

H. M. RIDGELY.

The Hon. JOHN Q. ADAMS, *Washington City.*

E 9—*b.*

AN ACT for regulating weights and measures.

SEC. 1. *Be it enacted by the honorable John Evans, Esq., with Her Majesty's royal approbation, Lieutenant Governor of the counties of Newcastle, Kent, and Sussex, upon Delaware, and Province of Pennsylvania, by and with the advice and consent of the freemen of the said counties, in General Assembly met, and by the authority of the same,* That, in each county of this Her Majesty's Government, there shall be had and obtained, within two years after the making of this law, at the charge of each county, to be paid out of the county levies, standards of brass for weights and measures, according to the Queen's standards for the exchequer; which standards shall remain with such officer in the counties aforesaid as shall be from time to time appointed by the county court in each respective county of this Government; and every weight, according to its standard, and every measure, as bushel, half-bushel, pecks, gallons, pottles, quarts, and pints, shall be made just weights and measures, and marked by him that shall keep the standards; and that no person within this Government shall presume to buy or sell by any weights or measures not sealed or marked in form aforesaid, and made just according to the standards aforesaid, by the officer in whose possession the standards remain, on penalty of forfeiting five shillings to the prosecutor, being convicted by one justice of the peace of the unjustness of his weights and measures; and that, once a year at least, the said officer, with the grand jury, or the major part of them, and, for want of a grand jury, with such as shall be appointed and allowed by the respective county courts aforesaid for assistants, shall try the weights and measures in the counties aforesaid; and those weights and measures which are defective shall be seized by the said officer and assistants; which said officer, for his fees for his marking each bushel, half-bushel, and peck, just measure, and marking the same that is large enough, when brought to his hands, shall have ten pence, and for every less measure three pence; for every yard three pence; for every hundred and half-hundredweight, being made just and marked, three pence; for every less weight one penny; and if the weights and measures be made just before they be brought to him, then to have but half the fees aforesaid for marking the same. And if the said officer shall refuse to do any thing that is enjoined by this law for the fees appointed, and be duly convicted thereof, [he] shall forfeit five pounds, to the use of the Governor for the time being. That a true measure or standard be taken from the brass half-bushel in the town of Philadelphia, and bushel and a peck proportionable; and all less measures and weights coming from England, being duly sealed in London, or other measures agreeable therewith, shall be accounted and allowed to be good by the aforesaid officers, until the said standards shall be had and obtained.

SEC. 2. *And be it further enacted by the authority aforesaid,* That no person shall sell beer or ale by retail, but by beer measure, according to the standard of England.

E 9—*c.*

Mr. James Booth to H. M. Ridgely.

SIR: NEWCASTLE, *October* 24, 1818.

The letter on the subject of weights and measures, which you were pleased to address to me, should have been earlier answered had not my engagements demanded my presence and attention to objects out of town.

The act of Assembly passed in the reign of Queen Anne, (vol. 1, 57,) to which you refer, was, I believe, carried into execution in the county of Newcastle. The standard weights and measures which it prescribed were obtained for this county; and I am enabled to state, from recollection, that persons were appointed, at two different times, to be keepers of those standards; other appointments were probably made, of which I have no recollection, and which cannot now be ascertained from the public records, many of which were lost during the revolutionary war. On inspecting those remaining in the office of the clerk of the peace, I found one appointment of keeper of the standards made in the year 1760. These keepers, with a part of the grand jury, traversed the county to examine and to rectify the weights and measures used by *sellers and buyers;* but this was not done once a year, agreeably to the act. I think I can recollect this duty to have been performed but twice in different years; and it is so long since, that I cannot pretend to point out the year when it was last performed; nor can I tell whether these standards are still in existence, or, if they are, in whose possession they remain. I am also unable to state whether the act of Assembly went into operation or not in the counties of Kent and Sussex, or in either of them.

Whether the Philadelphia weights and measures differ from the exchequer standards, I cannot tell; but I believe the Philadelphia measures of capacity, particularly, are generally used in this State. I think it is so in the county of Newcastle; and I remember that, in a controversy in Sussex about corn, it appeared from the testimony that the Philadelphia sealed bushel was deemed by the parties to be the proper measure to ascertain the quantity; but I know of no decision of any of our courts sanctioning any particular weights or measures.

I regret that I can give you no definite information on all the subjects of your inquiry, nor do I know any source from which it can be drawn.

With every sentiment of regard, I am, sir, &c.

JAS. BOOTH.

H. M. RIDGELY, Esq.

E 10—*a*.

MARYLAND.

SIR: COUNCIL CHAMBER, ANNAPOLIS, *August* 9, 1817.

In the absence of his excellency the Governor from the State of Maryland, I do myself the honor to acknowledge the receipt of your letter of the 29th ultimo at this department, and to inform you that the English standard of weights and measures has been adopted by this State. His excellency, however, will do himself the honor, immediately on his return, of replying to your letter.

I have the honor to be, with high respect, your most obedient servant,

NINIAN PINKNEY, *Clerk of the Council.*

The Hon. RICHARD RUSH, *Acting Secretary of State.*

E 10—*b*.

SIR: COUNCIL CHAMBER, ANNAPOLIS, *December* 1, 1819.

In reply to your letter of the 1st of November, enclosing a copy of a resolution of the Senate of the United States, passed the 3d of March, 1817, on the subject of weights and measures, I have the honor to inform you that the only legal regulation upon those subjects in the State of Maryland is comprised in several acts of Assembly, of which copies are herewith transmitted to you. It may be proper to add that, by the act incorporating the city of Baltimore, passed at November session, 1796, chapter 68, the powers before vested by law in the standard-keeper of Baltimore county were transferred, within the limits of their jurisdiction, to that corporation; whose proceedings, from its being the only large commercial town we have, in effect now regulate the weights and measures throughout the whole State. It is believed that the English standard of measures has not in practice been strictly adhered to, as it is recollected that some years ago the half-bushel which was used for measuring grain at Elkton was larger than the one in use at Baltimore, and that the same measure in Baltimore was somewhat larger than the old standard kept in the different counties. It is believed, also, that a similar difference, in a small degree, exists between the fifty-six and other weights regulated in Baltimore and those adjusted by the standard-keepers in the counties. The result has been that the Baltimore standard, both of weights and measures, now governs all the dealings and business of the State.

I am, sir, with much respect, your obedient servant,

C. GOLDSBOROUGH.

Hon. JOHN QUINCY ADAMS, *Secretary of State.*

E 10—*c*.

AN ACT relating to the standard of English weights and measures. Passed April, 1715.

Whereas the standards of English weights and measures are very much impaired in several of the counties of this province, and in some wholly lost or unfit for use:

Be it enacted by the King's most excellent Majesty, by and with the advice and consent of His Majesty's Governor, Council, and Assembly of this Province, and by the authority of the same, That the justices of the several county courts shall, by all convenient speed, at the charge of their respective counties, cause the standards they already have to be made complete, and purchase new standards where they have none; and, for the better preservation of them for the future, that they take good and sufficient security, in His Majesty's name, to the use of the county where taken, from the persons that shall be intrusted by them to keep such standard, in the penal sum of fifty pounds sterling, "for the safe-keeping of such standard, and for the due execution of the office of standard-keeper, and for the delivering the same up in the like good order they receive the same, when they shall be legally discharged from such trust," under the penalty of five hundred pounds of tobacco for each justice of that county court that shall omit to do what is required of them by this act; the one-half to His Majesty, his heirs and successors, for the support of Government, the other half to the informer, or to him or them that shall sue for the same, to be recovered in the provincial court of this province, against such justices, jointly or severally, by action of debt, bill, plaint, or information, wherein no essoine, protection, or wager of law to be allowed.

3. *And be it enacted by the authority aforesaid, by and with the advice and consent aforesaid*, That all persons, whether inhabitants or foreigners, shall repair and bring their steelyards with which they weigh and receive their tobacco, to the standard, yearly and every year, to be tried, stamped, and numbered, for which they are to pay the person keeping the standard one shilling for every time such steelyards shall be tried and stamped as aforesaid; and every person or persons shall have their bushel, half-bushel, peck, gallon, pottle, quart, and pint, if they make use of the same, or any of them, in buying or selling, duly tried and stamped at the standard aforesaid, except such of the measures aforesaid as come out of England, and are there stamped; for which trying and stamping they shall pay six pence apiece.

4. And whosoever shall presume to sell by any dry measures, without first having the said measures tried and stamped at the standard, shall forfeit the sum of five hundred pounds of tobacco.

5. And whosoever, likewise, shall presume to weigh and receive tobacco by steelyards which have not, within one year past from such weighing and receiving, been tried and stamped at the standard, shall forfeit one thousand pounds of tobacco; the one-half of which aforementioned forfeitures to be paid to His Majesty, his heirs and successors, towards the defraying the charge of the county where the offender shall dwell or reside, and the other half to the informer or informers, to be recovered in any county court of this province, by bill, plaint, or information, wherein no essoine, protection, or wager of law to be allowed.

6. And if any person or persons shall refuse to weigh any tobacco by such steelyards, tried and stamped as aforesaid, and shall thereby compel the owner to have them tried over again within the year, if the steelyards are true, such persons so refusing or compelling as aforesaid shall pay for the new stamping, but, if not, the owners of the steelyards to pay for the same.

E 10—*d*.

A supplementary act to the act entitled "An act relating to the standard of English weights and measures." Passed December 20, 1765.

Whereas, by the act entitled "An act relating to the standard of English weights and measures," no penalty is imposed upon persons buying by any dry measure or measures, without first having the said measure or measures

tried and stamped at the standard, as there is upon the seller. And whereas it is represented to this General Assembly that many buyers of grain, flaxseed, and other commodities, when the people have carried them a great distance to market, refuse to buy them unless by measure or measures of their own, which have been found, upon trial, to be larger than the standard aforesaid:

2. *Be it therefore enacted by the right honorable the lord proprietary, by and with the advice and consent of his lordship's Governor, and the Upper and Lower Houses of Assembly, and the authority of the same*, That, if any person or persons shall hereafter buy by any dry measure or measures, being his, her, or their property, or found or provided by him, her, or them, contrary to the true intent and meaning of the above-recited act, he, she, or they shall forfeit and pay the sum of five pounds current money for every offence; one-half thereof to the informer, or him, her, or them that shall sue for the same, and the other half to be paid into the hands of the treasurer of the respective shore where such forfeiture shall happen, and applied as the General Assembly for the time being shall direct and appoint, to be recovered in any court of record within this province, by action on the case, action of debt, bill of indictment, or information, wherein no essoine, protection, or wager of law, or more than one imparlance, shall be allowed.

3. *Provided, always*, That such action shall be commenced within one year from the time of the said offence being committed, and not afterwards.

E 11—*a*.

VIRGINIA.

The Governor of Virginia to the Secretary of State.

SIR: RICHMOND, VIRGINIA, COUNCIL CHAMBER, *August* 15, 1818.

In compliance with the request contained in your letter of the 5th instant, I have the honor herewith of transmitting you the only laws on the statute book of this State on the subject of weights and measures.

I presume this is all the information which you need, or would wish to have communicated.

I have the honor to be, with the greatest respect, your obedient servant,

JAMES P. PRESTON.

The Hon. JOHN QUINCY ADAMS, *Secretary of State.*

E 11—*b*.

AN ACT for more effectually obliging persons to buy and sell by weights and measures according to the English standard. Passed August, 1734.

1. Forasmuch as the buying and selling by false weights and measures is of late much practised in this colony, to the great injury of the people:

2. *Be it enacted by the Lieutenant Governor, Council, and Burgesses of this present Assembly, and by the authority of the same*, That from henceforth there shall be but one weight, one measure, one yard, and one ell, according to the standard of the exchequer in England; and whosoever shall sell, or lay by, or keep any other weight, measure, yard, or ell, whereby any corn, grain, salt, or other thing is bought or sold after the tenth day of June, one thousand seven hundred and thirty-six, shall forfeit for every offence twenty shillings, being thereof lawfully convicted by the oath of one sufficient witness before any justice of the peace of the county where the offence shall be committed, to be levied by distress and sale of the goods of the offender, for the use of the poor of the parish, rendering the overplus to the party so offending; and, in default of such distress, such justice of the peace shall commit the said party to the common jail or prison, there to remain without bail or mainprize until he shall pay such forfeitures as aforesaid.

3. And to the end all people may be more easily provided with such weights and measures, *Be it further enacted*, That the justices of the peace of every county, where they have not already provided the same, shall, within eighteen months after the end of this session of Assembly, provide, at the charge of their respective counties, brass weights of half-hundreds, quarters, half-quarters, seven pounds, four pounds, two pounds, and one pound weight, according to the said standard; and measures of bushel, half-bushel, peck, and half-peck, dry measure, according to that standard; and gallon, pottle, quart, and pint, of wine measure, according to the said standard; with proper scales for the weights, upon pain of forfeiting, by every justice sworn into the commission of the peace, five shillings for every month such weights and measures shall be wanting, to be recovered, by action of debt or information, in any court of record in this colony; one-half whereof shall go to the King, his heirs and successors, for supporting the contingent charges of this Government, and the other moiety to the informer.

4. And the said weights and measures so to be provided shall be kept, from time to time, by such person as shall be appointed by the county courts, respectively, to which all persons may resort for trying their weights and measures; and when they are tried, and found to agree with the standard, the same shall be sealed by the person keeping such standard, with a seal, to be likewise provided by the justices aforesaid. And that the fees to the persons intrusted with the keeping such standard weights and measures be, for the trying every *stillyard* and certificate thereof, one shilling; for the trying any weights or measures and sealing the same, four pence for every such weight or measure sealed, to be paid by the person for whom the service shall be done; any former law, custom, or usage to the contrary hereof in anywise notwithstanding.

5. *Provided, always*, That this act, or any thing herein contained, shall not be construed to prohibit any person or persons whatsoever from buying and selling by steelyards, which shall be tried by and agree with the standard aforesaid, where the buyer and seller, payer and receiver, shall both consent thereto; any thing in this act contained to the contrary hereof notwithstanding.

A copy. Test: ANTHY. WHITAKER, *Cop'g C. C.*

E 11—*c*.

AN ACT concerning weights and measures. Passed 26th December, 1792.

1. Whereas the General Assembly of Virginia, at their session in the year 1734, did pass an act entitled "An act for more effectually obliging persons to buy and sell by weights and measures according to the English standard:"

2. *Be it therefore enacted by the General Assembly*, That the said act shall continue and remain in force until the Congress of the United States shall have made provision on that subject.

3. *Provided, always*, That all fines, forfeitures, and penalties, in the said act mentioned, shall be and inure one moiety to the commonwealth, and the other to the use of the informer.

4. This act shall commence and be in force after the passing thereof.

A copy. Test: ANTHY. WHITAKER, *Cop'g C. C.*

E 12—*a*.

NORTH CAROLINA.

Governor Miller to Mr. Rush, Acting Secretary of State.

SIR: EXECUTIVE OFFICE, N. C., RALEIGH, *August* 19, 1817.

In compliance with the request contained in your letter of the 29th July, I enclose you a certified copy of an act of the General Assembly of this State regulating weights and measures.

With much respect, your obedient servant,

WILLIAM MILLER.

RICHARD RUSH, Esq., *Acting Secretary of State.*

E 12—*b*.

AN ACT for regulating weights and measures.

1. Whereas many notorious frauds and deceits are daily committed by false weights and measures: for prevention whereof,

2. *We pray that it may be enacted, and be it enacted by his excellency Gabriel Johnson, Esq., Governor, by and with the advice and consent of His Majesty's Council and General Assembly of this Province, and it is hereby enacted by the authority of the same*, That no inhabitant or trader shall buy or sell, or otherwise make use of in trading, any other weights or measures than are made and used according to the standard in His Majesty's exchequer, and the statutes of England in that case provided.

3. *And for the discovery of abuses, be it further enacted by the authority aforesaid*, That the justices of each and every county within this Government shall, within two years next after the ratification of this act, at the charge of each county, respectively, provide sealed weights of half-hundred, quarters of hundred, seven pounds, four pounds, two pounds, one pound, and half-pound; and measures of ell and yard, of brass or copper, and measures of half-bushel, peck, and gallon of dry measure; and a gallon, pottle, quart, and pint, of wine measure; for the payment of which charge the said justices are hereby empowered to levy a tax on their respective counties, to be kept by such person and in such place as the justices of each respective county shall appoint, such person first giving sufficient security to the said justices in the sum of fifty pounds proclamation money; and the said justices shall also find and provide for the said person a stamp for brass, tin, iron, lead, or pewter weights or measures, and also a brand for wooden measures, of the letters N. C., upon pain of forfeiting and paying the sum of ten pounds proclamation money, to be recovered from the said justices by action of debt, bill, plaint, or information, in the general court of this province, and applied to the use of our sovereign lord the King, for and towards the support of this Government, and the contingent charges thereof.

4. *And be it further enacted by the authority aforesaid*, That any person whatever using weights and measures shall bring all their measures and weights to the keeper of the standard of the county where such person shall reside or trade, to be there tried by the standard, and sealed or stamped; and if any person or persons shall buy, sell, or barter, by any weight or measure which shall not be tried by the standard, and sealed or stamped as aforesaid, he, she, or they so offending shall, for every such offence, forfeit and pay the sum of ten pounds proclamation money, one-half to the use of the county where such offence shall be committed, and the other half to the use of the party who shall sue for the same, to be recovered in any court of record in this Government, wherein no essoine, protection, privilege, injunction, or wager of law shall be allowed.

5. And whereas steelyards by use are subject to alterations:

Be it further enacted by the authority aforesaid, That all and every person who shall use, buy, or sell by steelyards, shall, once every year, try the same with the standard, and take a certificate from the keeper of the standard for the county wherein such person shall reside, upon pain of twenty shillings proclamation money, to be recovered and applied as aforesaid.

6. Repealed, vol. 2, 48.

7. *And be it further enacted by the authority aforesaid*, That the standard keeper of each and every county shall, at the next court to be held for the county in which he shall reside, take the following oath, viz: "You shall swear that you will not stamp, seal, or give any certificate for any steelyards, weights, or measures, but such as shall, as near as possible, agree with the standard in your keeping, and that you will, in all respects, truly and faithfully discharge and execute the power and trust by this act reposed in you to the best of your ability and capacity: so help you God."

8. *And be it further enacted by the authority aforesaid*, That the standard keeper of each and every county in this Government is hereby empowered and required, with the assistance of a constable, (who is hereby commanded upon notice to attend him, upon information made to him of any person or persons keeping or having in his or their house or custody any steelyards, weights, or measures, which shall have been altered, lessened, or shortened, since they were tried and sealed by the standard, or shall be suspected of buying, selling, or bartering by such false weights and measures,) to search the houses or other suspected places of such offender for any such weights or measures so falsified; and if, upon search, any such false weights or measures shall be found, he shall charge a constable with the owner of them, or the person using them, who shall forthwith convey him, her, or them before any justice of the peace, who is hereby directed to bind him, her, or them over to the next court to be held for the county where the offence shall be committed; and the said offence shall be laid before the grand jury by the King's attorney general, or his deputy, and, for want of them, by any person the county court shall think fit to appoint, and shall be cognizable by the said grand jury either by indictment or presentment; and if, upon trial by a petit jury, such offender or offenders shall be found guilty, the county court shall fine each and every person so convicted in a sum not exceeding twenty-five pounds proclamation money, one-third part thereof to the informer, one-third part to the standard keeper, and one-third part thereof to be paid to the justices of the county, to be applied to the use of the county where the offence shall be committed; and shall commit the offender to jail until the same shall be paid: and further, if it appear to the county court, by the verdict of the petit jury, that the offender altered, lessened, or shortened his or her steelyards, weights, or measures, or caused the same to be done, or used such steelyards, weights, or measures, knowingly, after they were so altered, lessened, or shortened, with an intent to defraud any person, in such case the court shall, besides and notwithstanding the said fine, sentence such offender to stand publicly during the sitting of the court two hours in the pillory, with his offence written over his or her head; any law, custom, or usage to the contrary notwithstanding.

9. *And be it further enacted by the authority aforesaid*, That the naval officer of each and every port within this Government shall affix up, in a public part of his office, and there constantly keep affixed, an advertisement of this act, that traders coming into this Government may have notice thereof, upon pain of forfeiting five shillings pro-

clamation money for every twenty-four hours the same shall be neglected, to be recovered by a warrant from any justice of the peace of the county where the offence shall be committed, by any person who shall sue for the same, and applied, one-half to the informer, and the other half to the use of the said county.

10. *And be it further enacted by the authority aforesaid*, That the justices of every county, respectively, shall have power to take and receive into their custody all such weights and measures as have been already provided by their respective county or parish, and shall also demand and receive from all and every person or persons whatsoever all such sums of money as have been already raised to purchase such weights and measures, and dispose of and apply the same according to the directions of this act.

11. *And be it further enacted by the authority aforesaid*, That all and every other act and acts, and every clause and article thereof, heretofore made, so far as relate to weights and measures, or any other matter or thing within the purview of this act, is, and are hereby, repealed and made void, to all intents and purposes, as if the same had never been made.

A true copy. Given 18th August, 1817.

WM. HILL, *Secretary.*

E 13—*a.*

SOUTH CAROLINA.

The Governor of South Carolina to the Secretary of State.

SIR: EXECUTIVE OFFICE, SOUTH CAROLINA, *September* 10, 1818.

Yours of the 5th ultimo, covering a resolution of the Senate of the United States, requesting information upon the laws of this State regulating weights and measures within the same, has been received. I had the honor of receiving a former like communication from you, and directed the Secretary of this State to give you every information upon the subject. This, I presume, has never reached you. I now enclose you copies of two sections of acts, which I believe are every thing contained in our statute book relating to weights and measures.

I have the honor to be, with great respect, &c.

ANDREW PICKENS.

HON. SECRETARY OF STATE *for the United States.*

E 13—*b.*

Act of Assembly, passed 12*th April*, 1768.

SEC. 5. The public treasurer shall, immediately after the passing of this act, procure, or cause to be made, of brass, or other proper metal, one weight of fifty pounds, one of twenty-five pounds, one of fourteen pounds, two of six pounds, two of four pounds, two of two pounds, and two of one pound, avoirdupois weight, according to the standard of London; and, also, of cedar wood, neatly shaped, and handled with iron, one bushel, one half-bushel, one peck, and one half-peck measures, according to the standard of London; which weights shall each, respectively, be stamped or marked in figures denominating the weight thereof, and shall be kept by the said public treasurer: and the said weights and measures shall be deemed and taken to be the standard weights and measures by which all the weights and measures in this province shall be regulated.

E 13—*c.*

Act passed 17*th March*, 1785.

SEC. 63. The several justices of the county courts in this State, as soon as the same shall take place in the respective counties, shall have full power and authority to regulate weights and measures within each of their respective jurisdictions, and shall enforce the observance thereof in such manner and form, and under such penalties, as are already prescribed by law for regulating weights and measures.

E 14—*a.*

GEORGIA.

The Governor of Georgia to the Secretary of State.

EXECUTIVE DEPARTMENT, GEORGIA,

SIR: MILLEDGEVILLE, *December* 5, 1819.

I have the honor to enclose a copy of an act of the General Assembly of this State, and an extract from an ordinance passed by the corporation of the city of Augusta, showing the regulation and standard for weights and measures in this State. Some delay in obtaining from Augusta the extract, together with a multiplicity of business occasioned by the Legislature now in session, has prevented me from complying with your request at an earlier period.

The documents mentioned in your letter of the 4th ultimo have been duly received at this Department.

I have the honor to be, very respectfully, your most obedient servant,

JOHN CLARK.

HON. JOHN QUINCY ADAMS, *Secretary of State.*

E 14—*b.*

AN ACT to regulate weights and measures in this State.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the State of Georgia in General Assembly met, and by the authority of the same*, That the standard of weights and measures established by the corporations of the cities of Savannah and Augusta, and now in use within the said cities, shall be, and the same are hereby declared to be, the fixed standard of weights and measures within this State; and all persons buying or selling shall buy and sell by that standard, until the Congress of the United States shall have made provision on that subject.

SEC. 2. *And be it further enacted by the authority aforesaid*, That it shall be the duty of the justices of the inferior courts, or a majority of them, in their respective counties, by their clerk, or some other person especially

authorized by them for that purpose, to obtain from the said corporations, or one of them, to be paid out of the county funds, the standard of weights and measures as fixed by them, within six months from the passing of this act; and that the said justices, or a majority of them, shall, so soon as they obtain the standard of such weights and measures, give thirty days' notice thereof at the court-house and three other public places in the county; and if any person or persons whosoever shall sell, or attempt to sell, any article or thing by any other or less weight or measure than that so established, he, she, or they so offending shall forfeit and pay three times the value of the article so sold, or attempted to be sold, to be recovered before any justice of the peace, if it should not amount to more than thirty dollars, and, if above that sum, before any judge of the superior court, or the justices of the inferior court, by action of debt; one-half whereof shall be for the use of the informer or person bringing the action, and the other for the use of the county in which such act or offence may happen.

Sec. 3. *And be it further enacted by the authority aforesaid*, That it shall be the duty of the justices of the inferior court, or a majority of them, of the respective counties of this State, to procure a marking instrument, seal, or stamp, for the purpose of marking, sealing, or stamping all weights and measures within their several counties, which marking instrument, seal, or stamp shall remain in the clerk's office of the inferior court, by him to be affixed to any weight or measure which he may find to correspond with, or not less than, the standards established by said corporations of Savannah and Augusta.

Sec. 4. *And be it further enacted*, That the said clerks of the inferior courts shall receive six and one-fourth cents for every weight and measure by them so marked, sealed, or stamped, to be paid by the person obtaining the same.

ABRAHAM JACKSON,
Speaker of the House of Representatives.
DAVID EMANUEL,
President of the Senate.

Assented to, December 10, 1803. JOHN MILLEDGE, *Governor.*

E 14—*c*.

"*And be it further ordained*, That all weights for weighing any articles of produce or merchandise shall be of the avoirdupois standard weight; and all measures for liquor, whether of wine or ardent spirits, of the wine measure standard; and all measures for grain, salt, or other articles usually sold by the bushel, of the dry or Winchester measure standard; and all weights and measures used within this city shall be in conformity to the said public standard. It shall not be lawful for any person or persons to make use of any other than brass or iron weights, regulated as aforesaid, or weights of any other description than those of fifty, twenty-five, fourteen, seven, four, two, one, half, quarter pound, two ounce, one ounce, and downwards."

I certify the above to be true extracts from the original ordinance of the city council of Augusta.

Clerk's Office, *November* 30, 1819.

JOSEPH CRANE, *Dep. C. C.*

E 15—*a*.

KENTUCKY.

The Governor of Kentucky to the Secretary of State.

Sir: Frankfort, *November* 26, 1817.

In compliance with your request, and the resolution of Congress on the subject of weights and measures, I have the honor to transmit to you a copy of the law of this State on that subject.

It may not be improper to remark that weights and measures, agreeably to said law, have been procured as a general standard for this State.

I have the honor to be your most obedient and humble servant,

GABRIEL SLAUGHTER.

The Hon. Secretary of State, *Washington City.*

E 15—*b*.

AN ACT concerning weights and measures. Approved December 11, 1798.

Whereas the Congress of the United States are empowered by the federal constitution to fix the standard of weights and measures, and they have not hitherto passed any law for the aforesaid purpose, whereby an act passed by the General Assembly of Virginia, in the year 1734, entitled "An act for more effectually obliging persons to buy and sell by weights and measures according to the English standard," still remains in force in this commonwealth:

Section 1. *Therefore, be it enacted by the General Assembly*, That the Governor be, and he is hereby, authorized and directed to procure one set of the weights and measures in the said act specified, with proper scales for the weights, together with measures of the length of one foot and of one yard; and the bushel, dry measure, shall contain two thousand one hundred and fifty and two-thirds solid inches; and the gallon of wine measure shall contain two hundred and thirty-one inches; and the said weights, measures, and scales shall be deposited in the custody of the Secretary of State, to serve as a general standard for weights and measures within this commonwealth.

Sec. 2. *And be it further enacted*, That, when the aforesaid weights, measures, and scales shall be procured as aforesaid, the Governor shall cause to be made for each county within this State one set of weights and measures, and the last-mentioned weights and measures shall be compared by the Secretary of State with the aforesaid general standard, and, if found to agree therewith, shall be forthwith transmitted by him, together with scales proper for the weights, to be procured as aforesaid, to the clerks of the several county courts in this State.

Sec. 3. *And be it further enacted*, That the said weights, measures, and scales shall be kept by such person in each county as the court of the said county shall appoint; and, immediately after such appointment, the clerk shall make known the same by advertisement, to be fixed up at the door of the court-house. And all persons desirous of trying their weights and measures may resort to the aforesaid county standards for that purpose; and the person appointed to keep the said standards shall, if he find them true, seal them with a seal to be provided by the county court, at the expense of the county; and the persons appointed in the several counties to keep the said county standards shall be entitled, for trying every steelyard, and certificate thereof, to twenty-five cents; for trying any

weights or measures, and sealing the same, twelve and one-half cents for each weight or measure sealed, to be paid by the person for whom such service shall be done.

SEC. 4. *And be it further enacted*, That three months after the appointment of a person to keep the said county standards shall have been made known as aforesaid, every person who shall knowingly buy, or who shall sell, any commodity whatever by weight or measure that shall not correspond with the said county standards, or shall keep any such for the purpose of buying or selling with them, shall, for every such offence, forfeit and pay four dollars, to go towards lessening the county levy, and to be recovered before any justice of the peace for the county in which such offence shall be committed.

SEC. 5. *And be it further enacted*, That the auditor of public accounts shall issue his warrant or warrants on the treasurer, to such amount as the Governor shall certify to be due, and to such person or persons as the same shall be owing, for furnishing and transporting the aforesaid weights, measures, and scales.

This act shall be in force from and after the passage thereof.

E 16.

TENNESSEE.

The Governor of Tennessee to the Secretary of State.

SIR: MURFREESBORO', *November* 24, 1819.

Your communication relative to a standard of weights and measures has been received; and as no fixed standard exists as to weights, I laid your request before the Legislature, who are now in session. Indeed, I pursued the same course two years past, when a similar request was made by Mr. Rush, and am sorry to say the subject was not attended to, which, I trust, will not be the case in the present instance. At all events, I will do myself the honor to advise you of the result.

I am, with great respect, your obedient servant,

JOS. McMINN.

JOHN QUINCY ADAMS, Esq., *Secretary of State of the United States.*

E 17—*a*.

OHIO.

Governor Worthington to Mr. Rush, Acting Secretary of State.

SIR: CHILICOTHE, *August* 18, 1817.

In compliance with the request made in your letter of the 29th ultimo, I have directed the Secretary of State of Ohio to forward a certified copy of any law of the State for the regulation of weights and measures.

I have the honor to be, very respectfully,

T. WORTHINGTON.

RICHARD RUSH, *Acting Secretary of State of the United States.*

E 17—*b*.

SIR: COLUMBUS, OHIO, *September* 13, 1817.

Pursuant to a request of the Governor of our State, I have the honor to transmit an extract from an act of this State relating to measures. I concluded it was not necessary to transcribe the whole act, as the remainder thereof only relates to the appointment of a person to keep said standard, and to try and prove others thereby. As to weights, we have no legislative provision on the subject, which is much to be regretted.

I have the honor to be, with great respect, your most obedient, humble servant,

JOHN McLENE.

The Hon. SECRETARY OF STATE *for the United States.*

E 17—*c*.

Extract from an act of the General Assembly of the State of Ohio, entitled "An act for regulating measures," passed the 22d day of January, 1811, *and now in force.*

SEC. 1. *Be it enacted by the General Assembly of the State of Ohio*, That the county commissioners of each county in this State are hereby required and directed to cause to be made for each county one half-bushel measure, which shall contain $1{,}075\frac{2}{10}$ solid inches, which shall be kept in the county seat, and shall be called the standard.

E 18—*a*.

LOUISIANA.

The Governor of Louisiana to the Acting Secretary of State.

SIR: NEW ORLEANS, *September* 15, 1817.

I have the honor to acknowledge the receipt of your letter of the 29th July last, together with the resolve of the Senate of the United States, and to enclose you herein the true copy of an act passed in 1815, by which you will perceive that the Legislature of this State have deemed it most proper to adopt the same standards for weights and measures as are established in the United States, and used by their revenue officers.

With sentiments of very great respect, I remain, sir, &c.

JAMES VILLERE,
Governor of the State of Louisiana.

The Hon. RICHARD RUSH.

E 18—*b*.

AN ACT to establish a uniform standard of weights and measures within this State.

Whereas it is essential to the commerce of the State of Louisiana that a uniform standard of weights and measures be established by law: therefore,

SECTION 1. *Be it enacted by the Senate and House of Representatives of the State of Louisiana in General Assembly convened*, That the Governor, at the expense of the State, shall procure one complete set of copper weights, to correspond with weights of their like denomination used by the revenue officers of the United States in their offices, together with scales for said weights, and a stamp or seal, with such device as the Governor may choose; as also one complete set of measures, calculated for dry, liquid, and long measure, of the same capacity and length as those of their like denomination used by revenue officers as aforesaid; which set of weights and measures, together with the scales and stamp, to be deposited in the custody of the Secretary of State, to serve as a general standard of weights and measures within this State.

SEC. 2. *And be it further enacted*, That the administration and distribution of weights and measures within the limits of the city of New Orleans shall be confided to an inspector of weights and measures, to be nominated by the Governor, with the advice and consent of the Senate; and it shall be the duty of the said inspector to see that no other weights but those established by this act be made use of within the limits of the said city, and, in case of negligence or breach on the part of the said inspector, he shall be condemned to pay a fine not exceeding two hundred dollars, nor less than one hundred. The mayor and city council of New Orleans shall be authorized to pass any regulations or such ordinances relative to the police of the said weights and measures, and to insure, within the limits of the said city, the execution of the present act: *Provided, however*, That said ordinances or regulations do not contravene the provisions of this act; and that, should the office of inspector become vacant during the recess of the Legislature, it shall be the duty of the Governor to fill such vacancy.

SEC. 3. *And be it further enacted*, That every parish judge shall procure, at the expense of his parish, a set of weights and measures and a stamp conformable to those mentioned in the first section of this act, the same to be stamped, on their request, by the Secretary of State, or his deputy. The inspector of the city of Orleans shall procure the above set, at the expense of the corporation of the said city.

SEC. 4. *And be it further enacted*, That the aforesaid weights, measures, and stamp shall be deposited by the judge in the office of the clerk of the said parish, on his accountable receipt; and it shall be the duty of the said clerk and inspector, when thereto required by any person, to stamp all measures whatsoever, if they find them true; and they shall be entitled to ask and demand for such service the following fees, and no more, viz: for every steelyard, with certificate thereof, twenty-five cents; for every measure that they shall try or stamp, six and a quarter cents, (to be paid by the owners of the weights and measures by them stamped,) over and above the price of the labor and materials they may employ on such measures as require to be regulated by the standard: *Provided, always*, That the stamp shall be impressed, and payment required for doing the same, only on such as have not yet been stamped, or such as, having been once stamped, are found so defective as to require to be again regulated with the standard. Be it understood, however, that, during the first year ensuing the day when this act shall begin to be in force, the said inspector shall only be entitled to half the fees established by the present section; and, in case of the resignation, removal, or death of the inspector or clerks, the said weights, measures, steelyards, and stamps shall be delivered to the person or persons named in their places.

SEC. 5. *And be it further enacted*, That, if any clerk, inspector, or any person legally authorized to stamp weights and measures, shall knowingly and wilfully stamp weights and measures which do not correspond with the standard aforesaid, they shall, on conviction, be condemned to pay a fine of one hundred dollars for each offence, to be recovered, on motion by the attorney general or district attorney, before any court of competent jurisdiction, to the benefit of the parish in which the said offender may reside; and any person thus convicted shall, besides, be removed from office. The court, during the prosecution against the said clerks, shall be authorized to appoint a clerk *pro tem.*

SEC. 6. *And be it further enacted*, That, one year after the Governor shall have deposited such weights, measures, and steelyards with the Secretary of State, as required by this act, no person shall buy or sell any commodity whatsoever by weights or measures which do not exactly correspond with the aforesaid standard, or are not stamped; nor shall they keep any such weights or measures for the purpose of buying or selling thereby, under penalty of a fine of fifty dollars for each offence, besides the forfeitures of the weights, measures, and steelyards found to be false, and of a fine of ten dollars when the measures, weights, and steelyards shall be found just, though not stamped; said fines to be recovered before any tribunal of competent jurisdiction, one-half to the benefit of the informer, and the other half to the parish in which the said offender may reside. All weights and measures seized shall be forfeited for the benefit of the stamper who shall have discovered the fraud; and he shall not return them into circulation until he has made them conformable to the standard.

SEC. 7. *And be it further enacted*, That whoever shall make or cause to be made use of, or utter, false stamps or scales, shall, on conviction before the district court where this offence is committed, be subject to all the pains and penalties of forgery under the law of this State.

SEC. 8. *And be it further enacted*, That it is forbidden to any person to sell, or cause to be sold, measures and weights, unless they have been tried and stamped by persons appointed for that purpose, agreeably to the present act, under the penalties imposed by the sixth section of this act against all persons who shall have used false weights.

SEC. 9. *And be it further enacted*, That the persons to be appointed agreeably to the present act to try and stamp the weights, measures, &c., shall not commit their functions to a substitute, without being liable to all fines prescribed by this act.

SEC. 10. *And be it further enacted*, That (any provision in this act contained to the contrary notwithstanding) there shall be in this State a dry measure, to be known under the name of barrel, which shall contain three and a quarter bushels conformable to the American standard, and shall be divided in half and a quarter barrel.

SEC. 11. *And be it further enacted*, That it shall be the duty of the Governor, so soon as he shall have procured the weights and measures agreeably to this act, to make it known throughout the State by proclamation.

MAGLOIRE GUICHARD,
Speaker of the House of Representatives.
FULWAR SKIPWITH,
President of the Senate.

Approved, December 21, 1814:

WILLIAM C. C. CLAIBORNE,
Governor of the State of Louisiana.

A true copy from the original in my office.

MAZUREAU, *Secretary of State.*

E 18—*c*.

[TRANSLATION.]

Statement of M. Bouchon respecting weights and measures in Louisiana before its cession to the United States.

NEW ORLEANS, *October* 9, 1820.

1st. The measures in use in Louisiana before its cession to the United States were the following:

Measures of length.

The King's foot, consisting of 12 inches; the inch of 12 lines.
The fathom (toise) of 6 King's feet.
The perch of 3 fathoms, or 18 feet.
The linear arpent of 10 perches, or 30 fathoms.
The league of 84 arpents.
The ell of Paris of 3 feet 7 inches $10\frac{5}{6}$ lines.

Superficial measures.

The square foot of 144 square inches.
The square fathom of 36 square feet.
The square perch of 9 square fathoms.
The square arpent of 100 square perches.
The square league of 7,056 square arpents.

Weights.

The scruple of 24 grains.
The gros of 3 scruples.
The ounce of 8 gros.
The mark of 8 ounces.
The pound of 16 ounces.
The quintal of 100 pounds.

Measures of capacity, for liquids.

The pint of Paris of 46.95 cubic inches.
The velte of 8 pints.
The muid of 288 pints.

Measures for grain.

The litron of Paris of 40.986 cubic inches.
The bushel (boisseau) of 16 litrons.
The septier of 12 bushels.
The muid of 12 septiers.

Measures for firewood.

The cord of 4 feet height, 8 feet length, and the billets of wood 4 feet long.

2d. These measures are all of French origin. The linear arpent, the league of 84 arpents, and the square arpent are the particular measures of Louisiana. This is certain.

3d. The measures of length, of superficies, and of firewood, are still in general use in the State of Louisiana. They begin to measure firewood by the American foot, because it is to the advantage of the seller; for the same reason, the use of the pound has been so easily adopted. I know of no other measure of capacity except the American gallon. Several persons who speculate in town lots buy by the French foot, and sometimes sell by the American foot. They sometimes yet use the French ell, but its use in commerce is insensibly losing ground.

4th. The surveyor's chain of 22 yards contains 10 fathoms 1 foot 10.896 inches; 100 French fathoms contain 9.6916515 chains; the linear arpent extends 63.9654 yards; the league of Louisiana, 244.2296 American chains; an acre is equal to 1.1829 superficial arpents of Louisiana; a square mile is equal to 756.1424 square arpents; one may calculate, in general, that the French foot is to the American as 16 is to 15; a square arpent is equal to 4091.5724 square yards.

5th. It does not appear that the Spanish weights and measures have ever been used.

6th. The new superficial measures are very seldom used; the French and Spanish population will find it difficult to make use of them, as well as of the linear measures.

7th. Neither Mr. Pilié, city surveyor, nor myself, know of any police law relative to weights or measures; and, although I have had an opportunity of reading a great deal, I have never fallen in with one of that nature. We know not of any French or Spanish standard in this country. The French and Spanish records of survey (*procès-verbaux*) are reported entirely according to the measures of Paris.

8th. The ancient inhabitants are well enough satisfied with the American weights; but all, and especially those in the country, find it very difficult to accustom themselves to the measures of length and the superficial measures, and I think they will be long in doing so. This depends upon long contracted habits, and they cannot change these habits all at once. One must have gained great facility in calculation to be able to comprehend new superficial measures, at all times more difficult than measures of length or weights, especially when he sees no advantage to be derived from them.

The reports which I have presented of the ancient and new measures will be sufficient data for an accountant to find out those others which I have not time to point out. Mr. Pilié and myself are very much pressed by business at present, and we beg Mr. Johnson to excuse us for not having done more, and in shorter time.

I beg him to be assured of the perfect consideration with which I am, &c.

BOUCHON,
Surveyor General of the State of Louisiana.

E 19—*a*.

INDIANA.

The Governor of Indiana to the Secretary of State.

SIR: CORYDON, *September* 9, 1817.

I have herewith the honor of submitting a report from the Secretary of State for Indiana, relative to the regulations and standards for weights and measures in this State, in conformity to a resolution of the Senate of the United States of the 3d of March last.

Absence from the seat of Government of our State prevented an earlier compliance with your request.

I have the honor to be, with great respect, your obedient servant,

JONATHAN JENNINGS.

The Hon. the SECRETARY OF STATE.

E 19—*b*.

SECRETARY OF STATE'S OFFICE, CORYDON.

The Secretary of State, to whom was referred the resolution of the Senate of the United States of March 3, 1817, requiring a statement relative to the regulations and standards for weights and measures in the several States, &c., has the honor to submit the following report, containing the regulations and standards for weights and measures as used and now in force in the State of Indiana:

One measure of one foot, or twelve inches, English measure, so called; also, one measure of three feet, or thirty-six inches, English measure as aforesaid; also, one half-bushel measure for dry measure, which shall contain one thousand and seventy-five and one-fifth solid inches; also, one gallon measure, which shall contain two hundred and thirty-one solid inches; which measures are to be of wood, or any metal the court may think proper; also, one set of weights, commonly called avoirdupois weight.

R. A. NEW, *Secretary.*

His Excellency the GOVERNOR *of the State of Indiana.*

E 20—*a*.

MISSISSIPPI.

The Governor of Mississippi to the Secretary of State.

SIR: NATCHEZ, *September* 17, 1818.

I have had the honor to receive your letter of the 8th ultimo. By an act of the Legislature of the Mississippi Territory, passed the 4th February, 1807, the treasurer thereof was directed to procure one set of weights and measures according to the standard of London, which was to serve as a general standard for the Territory. He was also directed to procure a set for each county: the latter provision was never carried into effect. The Legislature, therefore, by an act of the 23d December, 1815, authorized the treasurer to procure six sets of the same standard, and directed them to be deposited at certain public places, under the care of an officer, whose duties are prescribed by the act. This law was duly executed, and the weights and measures which were procured are now the standard by which weights and measures are regulated throughout the State. I enclose to you copies of the acts herein alluded to.

I have the honor to be, with great respect, your obedient servant,

DAVID HOLMES.

To the Hon. JOHN Q. ADAMS.

E 20—*b*.

AN ACT establishing weights and measures in the Mississippi Territory. Passed February 4, 1807.

SECTION 1. The treasurer of the Territory be, and he is hereby, authorized and required to procure as soon as may be, at the public expense, one set of weights and measures, viz: one weight of fifty pounds, one of twenty-five, one of fourteen, two of six, two of four, two of two, and two of one pound, avoirdupois weight, according to the standard of the United States, if one be established, but, if there be none such, according to the standard of London, with proper scales for weights; together with measures of one of the length of one foot, and one of one yard, cloth measure; and the measures of one half-bushel, one peck, and one half-peck, dry measure; also, the measures of one gallon, one of half a gallon, one of one quart, one of one pint, one of half a pint, and one of one gill, wine measure, according to the above-named standards; and the said weights, measures, and scales shall be deposited with the said treasurer, to serve as a general standard for weights and measures within this Territory, until otherwise directed by Congress.

SEC. 2. When the aforesaid weights, measures, and scales shall be provided as aforesaid, the treasurer shall cause to be made or procured for each county within this Territory, at the public expense, one set of weights, scales, and measures; and the last-mentioned weights and measures shall be compared by the said treasurer with the aforesaid general standard, and, when found to agree therewith, shall be forthwith transmitted by him to the clerks of the several county courts in this Territory.

SEC. 3. The said weights, measures, and scales shall be kept by such person in each county as the county court shall direct, who shall take the following oath, viz: "I, A B, do solemnly swear (or affirm, as the case may be) that I will, in all things, act with justice and faithfulness in my appointment as keeper of the standard of weights and measures for the county of ———, according to law, to the best of my skill and judgment: so help me God;" and, immediately after such appointment, the clerks of the several county courts shall make known the same by advertisement, to be fixed at the door of the court-house, and also by inserting the same in one of the public gazettes of this Territory; and all persons desirous of trying their weights and measures may resort to the aforesaid county standard for that purpose; and, if they are found true, the person appointed to keep the said standard shall seal them with a seal, to be provided by the county court at the expense of the county; and the persons appointed in the several counties to keep the said county standard shall be entitled to receive for trying every steelyard, and giving certificate therefor, and for trying any other weights and measures, and sealing the same, fifty cents each, to be paid by the person for whom such service is rendered or done.

SEC. 4. Three months after the appointment of a person to keep the said county standard shall have been made as aforesaid, every person or persons who shall sell any commodity whatever by weight or measure that shall not correspond with the said county standard, or shall keep any such for the purpose of buying or selling with, shall, for every such offence, forfeit and pay the sum of ten dollars, recoverable before a justice of the peace by any person who will sue for the same, and applied to his own use.

SEC. 5. The Territorial treasurer shall transmit to the clerks of the respective counties the weights, scales, and measures, as directed by the second section of this act, within twelve months from and after the passing hereof.

E 20—*c*.

An act passed December 23, 1815.

SECTION 1. The treasurer of the Territory be, and he is hereby, authorized and required to procure as soon as may be, at the public expense, six sets of weights and measures as described in the act entitled "An act establishing weights and measures in the Mississippi Territory," passed February 4, 1807.

Sec. 2. When the sets of weights, measures, and seals shall have have been procured by the treasurer as authorized by this act, one set shall be conveyed at the public expense to Huntsville, in Madison county; one other set to some place on or near Pearl river; one other set to the town of St. Stephen's; one other set to the town of Mobile; one other set to the town of Woodville; and the sixth set to the town of Port Gibson, and be placed in the hands of some person to be appointed by the Governor; and the sets of weights and measures heretofore procured shall be forthwith delivered to some person residing in the city of Natchez, to be appointed in the manner above described. And the keepers of weights and measures hereby authorized to be appointed shall, previously to entering upon the discharge of their duties, take the oath or affirmation prescribed in the third section of the act above recited; and the said keepers shall, immediately after their appointment, make known the same by advertisement, to be fixed at the door of the court-house of the counties in which they reside; and also by inserting the same in the nearest newspaper published in this Territory. And, immediately after the appointment of the said keepers, all persons residing in any part of this Territory, and desirous to try their weights and measures, may resort to any of the aforesaid standards for that purpose; and if they are found true, the keeper of any of the said standards shall seal them with a seal, to be procured by the said treasurer at the expense of the Territory; and the persons appointed keepers as aforesaid shall be entitled to receive the fees prescribed by the third section of the act above recited for the services therein specified.

Sec. 3. Three months after public notice of the appointment of a person to keep the said standard in the city of Natchez, every person residing in any of the counties lying upon the Mississippi river, and three months after public notice of the appointment of the other keepers of weights and measures hereby authorized to be made, every person residing in this Territory, who shall sell any commodity whatever by weight or measure that shall not correspond with the standard hereby established shall, for every such offence, forfeit and pay the sum of fifty dollars, recoverable before any justice of the quorum or of the peace, to be paid to the county treasurer for county purposes.

Sec. 4. The sum of four hundred dollars, in addition to the eight hundred dollars heretofore appropriated for the purpose of procuring weights and measures, be, and the same is hereby, appropriated for the purposes specified.

E 21.

ILLINOIS.

AN ACT regulating weights and measures.

Sec. 1. *Be it enacted by the people of the State of Illinois, represented in the General Assembly*, That it shall be the duty of the county commissioners in each and every county within this State, as soon as practicable after they are qualified to office, to procure, at the expense of their respective counties, one measure of one foot, or twelve inches, English measure, so called; also, one measure of three feet, or thirty-six inches, English measure, as aforesaid; also, one gallon liquid or wine measure, which shall contain two hundred and thirty-one cubic inches; one measure that shall contain one-fourth part, one measure that shall contain one-eighth part, one measure that shall contain one-sixteenth part of the aforesaid liquid gallon, denominated quart, pint, and gill, each of which shall be made of some proper and durable metal; also, one half-bushel measure for dry measure, which shall contain eighteen quarts, one pint, and one gill, of the above liquid or wine measure, the solid contents of which is equal to one thousand and seventy-five cubic inches and fifty-nine hundredths of a cubic inch; likewise, one measure that shall contain one-fourth part of the aforesaid half-bushel, or one gallon dry measure, which said half-bushel and its fourth shall be made of copper or brass; also, a set of weights of one pound, one-half pound, one-fourth pound, one-eighth pound, and one-sixteenth pound, made of brass or iron, the integer of which shall be denominated one pound avoirdupois, and shall be equal in weight to seven thousand and twenty grains troy or gold weight; which measures and weights shall be kept by the clerk of the county commissioners for the purpose of trying and sealing the measures and weights used in their counties; for which purpose the said several clerks shall be provided with a suitable seal or seals, with the name or initials of their respective counties inscribed thereon.

Sec. 2. *Be it further enacted*, That as soon as the county commissioners shall have furnished the measures and weights as aforesaid, they shall cause notice thereof to be given at the court-house door, one month in succession immediately thereafter; and any person thereafter, who shall knowingly buy or sell any commodity whatsoever by measures or weights in their possession which shall not correspond with the county measures and weights, shall, for every such offence, being legally convicted thereof, forfeit and pay the sum of twenty dollars, for the use of the county where such offence shall have been committed, and costs of suit, to be recovered before any justice of the peace of said county. Every person desirous of having his measures and weights tried by the county standard shall apply to the clerk of the county commissioners, and, if he find it correspond with the county standard, shall seal the same with the seal provided for that purpose; and said clerk is allowed to demand and receive such fees as now are, or hereafter may be, allowed by law.

This act to be in force from and after its passage.

E 22.

MISSOURI.

Extract from a law of the Territory of Missouri concerning weights and measures.

Sec. 1. The several courts of common pleas [circuit courts] within this Territory shall provide for their respective counties, and at the expense of their said counties, one measure of one foot, or twelve inches, English measure, so called; also one measure of three feet, or thirty-six inches, English measure, as aforesaid, to be denominated one yard; also, one half-bushel measure, which shall contain one thousand and seventy-five and one-fifth solid inches, to be denominated dry measure; also, one gallon measure, which shall contain two hundred and thirty-one solid inches; one half-gallon measure, which shall contain one hundred and fifteen and one-half solid inches; and one quart measure, which shall contain fifty-seven and three-fourths solid inches; which measures are to be of wood or any metal the court shall think proper; also, one set of weights, commonly called avoirdupois weights; and one seal, with the initial of the county inscribed thereon; which measures, weights, and seal shall be kept by the clerk of the court of common pleas [circuit court] in each county, for the purposes of trying and sealing the measures and weights used in their counties. [L. M. T. July session, 1813.]

F.

SIR: PARIS, *July* 16, 1817.

I had the honor to receive your letter dated London, the 5th of May last, together with the resolution of the Senate of the 3d of March, 1817, on the subject of weights and measures.

I accordingly enclose, in relation to those of France, *Tarbe's Manuel*, which is considered as the best elementary practical work on the subject; the Annuaire of the Board of Longitude for the present year, in which you will find a very concise exposition of the principles of the system; the third volume of Delambre's *Base du Système Métrique Decimal*, which explains them at large; the *Connoissance des Tems* for the year 1816, in which are found (in pages 314 to 332, and particularly page 330) some subsequent observations on the pendulum; and some sheets of a journal now printing, which contains an additional note of De Prony on the ratio of the metre to the English foot.

I have not sent the first two volumes of Delambre's work, which contain the details of the measurement of the meridian from Dunkirk to Barcelona, as all the results are found in the third volume. The fourth volume, edited by Biot and Arrago, which, besides other matter, will give the measurement of the meridian from Barcelona to Formentera, its northern extension to Greenwich, and through a part of Great Britain, and Biot's observations of the pendulum at several places, is not yet printed.

You requested that I might add such observations as might occur to me. The following are made less on account of their intrinsic value than because they may assist in explaining some points of the works enclosed.

The *legal metre*, or unit of the French linear measures, is presumed to be $\frac{1}{10000000}$ of the quarter of the meridian from the equator to the pole, and has been deduced from the actual measurement of the arch from Formentera to Dunkirk, compared in order to calculate the flattening of the earth with the former measurement in Peru. This standard metre, such as it is definitively adopted by law, is equal to $443\frac{296}{1000}$ lignes (or twelfth parts of an inch) of the old French measures. Doubts have, however, arisen whether it is truly the $\frac{1}{10000000}$ of the quarter of the meridian. Delambre, in his third volume, deducing the $\frac{1}{10000000}$ from the measurement of the arch from Barcelona to Dunkirk alone, had made it equal to $443\frac{322}{1000}$ lignes. The calculations of the flattening of the earth, as deduced solely from theory would give a result nearer to the legal metre. The measurement made in England of an arch of the meridian would seem to affect those conclusions. But it must be observed that an error of two seconds in the latitude observed would, in the long arch measured from Formentera to Dunkirk, produce a difference in the length of the metre equal to the difference between Delambre's calculation and the legal metre; that the same error would, in the much shorter arch measured in England, produce a much greater difference; and that the most candid astronomers acknowledge that, with the instruments now in use, such an error (of two seconds of latitude) is possible. Although, therefore, it seems probable that the legal metre is a little too short, (and it seems to be regretted that it was not made equal to $443\frac{3}{10}$ lignes,) it is, upon the whole, nearly as exact as was practicable in the present state of science. But, should more extensive measurements of the meridian, greater improvements in the instruments, and a more precise knowledge of all the elements which affect the observations, lead to a still more correct calculation of the true length of the quarter of the meridian, the standard or legal French metre would remain, as it now is, the unit or basis of the system of French measures; and the only difference would be, that instead of being, as now presumed, $\frac{1}{10000000}$, it might be found to be $\frac{1}{10000100}$, or some other not far distant fraction of the quarter of the meridian. And this difference would be less than the errors which will always take place in the confection, not of a standard metre executed with every possible care, but of the measures used for common purposes. For the purpose of ascertaining the ratio of the length of the metre to that of the pendulum, observations have been made with great care in several places; but those at Paris, by Borda and Cassini, inserted in Delambre's third volume, are the only ones (with the exception of those mentioned in the *Connoissance des Tems*, pages 314 to 322,) which are given in detail by the French writers. Those of Biot and others will appear in Delambre's fourth volume; but their general result is given in the Connoissance des Tems, and it thereby appears that the length of the pendulum making 100,000 oscillations in twenty-four hours, (*in vacuo*, and at the freezing point of water,) and referred to the level of the sea, is, at Paris, in latitude 48° 50′ 14″, equal to $\frac{74193}{100000}$ of the metre; at Bordeaux, in latitude 44° 50′ 25″, equal to $\frac{74161}{100000}$; and at Formentera, in latitude 33° 39′ 56″, equal to $\frac{74125}{100000}$. The final calculation of Borda for Paris of the second pendulum (which makes 86,400 oscillations in twenty-four hours) is $\frac{99383}{100000}$ of the metre, and $440\frac{560}{1000}$ lignes, old French measure.

From the metre are immediately deduced, by a descending and ascending decimal ratio, all the French measures, linear, superficial, and of capacity, such as they are found everywhere, and which require no observation.

The unit of weight, which is in fact the kilogramme, or 1,000 grammes, has been determined by ascertaining the weight *in vacuo* of the $\frac{1}{1000}$ part of a cubic metre of distilled water at its maximum of density, which is 4° of the centigrade thermometer above the freezing point, corresponding to 39.6 of Fahrenheit. The experiments, which in every system of measures which may be adopted are extremely important, were made with great care and skill by Lefevre Gineau; the substance is found in Delambre's third volume, but the detailed account appears to have been unfortunately lost. The old French pound (*poids de marc*) is $\frac{4895}{10000}$ of the kilogramme.

From the kilogramme or gramme has been deduced, by a decimal ratio, the whole system of French weights, including also that of moneys, in the manner stated in all the elementary works.

The ratio of the English foot to the old and new French measures may have been lately ascertained in England, where a correct standard metre of platina has been sent. By De Prony's experiments, the metre is equal to 39.3827 English inches, and the old French foot to 12.1232 English inches.

It is probable that the second pendulum will, at Washington, be found nearly equal to $\frac{993}{1000}$ of a metre, and to 39.107 English inches.

The great advantages of the French system seem to consist, 1st. In having a unit from which derives the whole by a decimal ratio; 2dly. In having ascertained the ratio of that unit to constant quantities, (the quarter of the meridian, and the length of the pendulum,) so as to be able to perpetuate, and, in case of accident, to make new standard measures, perfectly similar to those now established by law; 3dly. In the great correctness of the experiments by which this ratio has been ascertained, and in the similar care bestowed on the confection of the standard measures and weights.

These advantages are, in a great degree, independent of the substitution of new to ancient measures, which has in practice met with such difficulties. Provided the ratio of the old French foot to the natural and constant measures of the earth and of the pendulum had been ascertained, that foot might have been preserved, introducing only its decimal subdivision.

I will, for the present, only add, that as one of the first steps (if any plan be adopted on that subject in the United States) must be to ascertain the ratio of our foot to natural measures, it will be important to obtain the observations (not yet printed) of Biot, which, together with those of Borda, give all the information necessary for correct experiments of the length of the pendulum. As we will not probably very soon measure with sufficient correctness

a considerable arch of the meridian, the best mode to obtain at once the ratio of our foot both to the quarter of the meridian and to the French measure, will be to cause a metre of platina to be made here by Fortin. I could, I think, prevail on Mr. Arrago, or some other member of the Board of Longitude, to superintend the execution. Two have been completed for the Royal Society of London, and one is now on hand for the King of Prussia. The price will be about one hundred guineas. The brass metre made by order of Mr. Hassler, and which belongs to the United States, was executed by young Lenoir, and is not sufficiently correct for the purpose.

I am, &c.

ALBERT GALLATIN.

G.

Mr. Russell to the Secretary of State.

SIR: STOCKHOLM, *July* 31, 1818.

The duplicate of your letter (No. 3) of the 25th of May last reached me on the 15th instant, but the original is not yet received. I have now the honor, in compliance with your request therein expressed, to communicate such information as I have been able to collect "relative to the proceedings of this country for establishing uniformity in weights and measures," and which was required by the resolution of the Senate to which you refer.

Not being made acquainted with the object of the Senate in framing that resolution, either by the resolution itself or by your letter, I have felt some uncertainty with regard to the precise import of the term "uniformity," as therein used. It may relate to the proceedings of any foreign country to establish, *within itself*, one sole standard for weights and measures, respectively; or it may relate to the proceedings of several foreign countries to establish such a standard *in common;* or to the regulations of each particular country, for preserving the constancy of its weights and measures, by an exact conformity to one or more standards, respectively, which may there exist; and thus, in regard to those respective standards, establishing *uniformity* throughout such country.

Were I to confine myself to either of these constructions, singly, I might err in my selection, and furnish information altogether inapplicable to the real object of the resolution. I have believed it safer, therefore, to communicate all the information which I have collected on the subject, considered in the three points of view above suggested. I shall even present some details, which, although obviously not called for by the resolution of the Senate, may be useful on some other occasion.

MEASURES.

Throughout Sweden there is but one measure, which was last established by the royal ordinance of King Frederick, in 1739. This measure appears, like many others now in use in Europe, to have been originally taken from the human foot and thumb. The Swedish foot is divided into twelve work inches, (werktums,) or decimally into ten inches. The work inches are used in building, handicraft, and commerce; and the decimal inches for geometrical mensuration.

Long measure.

To the foot thus divided into inches are all the Swedish measures of length, superficies, or capacity referrible: 2 Swedish feet = 1 Swedish (aln) ell; 3 ells = 1 fathom, (famm;) 5 ells = 1 perch, (stang;) 36,000 Swedish feet = 18,000 Swedish ells = 1 Swedish mile.

Land measure.

56,000 Swedish square feet = 14,000 ells = 1 Swedish (tunnland) acre of land; 1 tunnland = 2 spannlands = 4 half-spannlands = 32 kapplands = 56 kannlands.

Dry measure.

1 Swedish cubic foot = 1,000 Swedish decimal cubic inches = 10 Swedish (kannor) cans; 5,600 decimal cubic inches = 1 (tunna) ton = 2 span = 8 quarts (fjerdingar) = 32 kappar = 56 cans, (kannor;) 7 cans = 4 kappe.

Liquid measure.

48 cans (kannor) = 1 ton (tunna) = 2 half-tons = 4 quarters (fjerdingar) = 8 eighths (attingar;) 1 can (kann) = 2 stoopes (stoppar) = 4 half-stoopes = 8 quarts (quarter) = 32 gills (ort or jungfrur.)

The can (kann) remains invariably the same in all measures, whether dry or liquid, in which it is used.

The measures of Sweden compared with those of France and England.

According to the official comparison made by the French philosophers De Prony, Legendre, and Pictet, between the French standard metre and an English measure made expressly by Troughton for that object, both these measures being at the temperature of freezing, the French metre is equal to 39.3827 English inches.

See Annals of Chemistry, (Annales de Chimie et Physique,) for June, 1817, p. 166. Thus:

1 French metre = 39.2827 English inches (log. .5953056.)
= 36.9413 old French inches (log. .5675125.)
= 40.4175128 Swedish work inches (log. .6065695.)
= 33.6812606 Swedish decimal inches (log. .5273883.)

1,000 English feet = 1026.275 Swedish feet, } the proportion between the decimal } (log. .0112639.)
974.397 English feet = 1,000 Swedish feet, } inches is the same. } (log. .9887361.)

1,000 English duodecimal inches = 1026.275 Swedish work inches.
1,000 English duodecimal inches = 855.229 Swedish decimal inches (log. .9320827.)
1169.276 English duodecimal inches = 1,000 Swedish decimal inches (log. .0679173.)
1,000 English square feet = 1053.24 Swedish square feet (log. .0225278.)
949.945 English square feet = 1,000 Swedish square feet (log. .9774722.)
1,000 English duodecimal square inches = 731.417 Swedish decimal square inches (log. .8641654.)
1367.21 English duodecimal square inches = 1,000 Swedish decimal square inches (log. .1358346.)
1 Swedish acre (tunnland) = 56,000 Swedish square feet = 53,169 English square feet (log. .7256602.)
1,000 English cubic inches = 625.53 Swedish cubic decimal inches (log. .7962481.)
1 Swedish can (kann) = 100 Swedish cubic decimal inches = 159.864 English cubic inches (log. .2037519.)
1 Swedish meal ton (maltunna) = 5,600 Swedish decimal cubic inches = 8952.41 English cubic inches;

This is divided into 8 fjerdingar, each 700 Swedish decimal cubic inches = 1119.048 English cubic inches.
In commerce there is also a corn ton (sparnmaltunna) = 6,300 Swedish decimal cubic inches = 10,071 English cubic inches.
Which is in fact the same measure of exactly 5,600 Swedish decimal cubic inches.

But in the sale of all kinds of grain is added thereto 1 fjerding, or eighth part,	700
	6,300

It was formerly the practice in the sale of grain to give *heaped* measure; but as this practice, for want of precision, occasioned continual disputes, it was at length abolished by law, and the addition of one-eighth part ordained in its stead; that is, 9 tons make 8 of corn, and the measure now is not to be *heaped* or *shaken.*

WEIGHTS.

Mintvigt (mint weight.)

The Swedish mint weight, or that with which gold and silver are weighed at the mint and at the bank, when these metals are left for coining, is divided into the *mark*, *lod*, *qvintin*, and *ass;* and, in respect to the *fineness* of silver, into the *mark*, *lod*, and *gran*, (grain;) and, in respect to the fineness of gold, into the *mark*, *karat*, (carat,) and *gran*, (grain.)

1 mark mint weight = 16 lod = 64 qvintin = 4,384 (troyske) Dutch ass.

Medicenalsvigt (apothecary weight.)

1 pound (libra) medicenalsvigt is divided into 12 ounces, 1 ounce into 8 drachms, 1 drachm into 3 scruples, 1 scruple into 60 grains.

Thus, 1 libra = 12 ounces = 96 drachms = 288 scruples = 5,760 grains = 7,416 (troyske) Dutch ass.

Victualievigt, (provision weight.)

The Swedish victualievigt is divided into *sheppund*, (shippounds,) *centner*, (hundreds,) *lispund*, and *marks*, or *skulpund.* Thus, 1 *shippound* = 4 *centner* = 5 *lispounds* = 400 *marks*, or *skulpounds.* The *skulpound* is divided into *lod* and *ass*, and 1 *skulpound* = 32 *lod* = 8,488 *ass.*

N. B. The centner is generally omitted in accounts, and one shippound divided at once into 20 lispounds.

Metallsvigt, Stapelstadsvigt, or Exportationsvigt.

The weight which is called by these three names is divided, like the victualievigt, into shippounds, centner, lispounds, skulpounds, lod, and ass, of the same relative value. The skulpound is also divided into fourth, eighth, and sixteenth parts.

Uppstadsvigt, Bergsvigt, and Tackjernsvigt.

These are three distinct weights, but are divided and subdivided in the same manner as the provision weight and the exportation weight.

Application of the several weights.

The use of the *mint weight* is already explained. The *medicenalsvigt* is, as the term imports, for weighing drugs and medicines. The *victualievigt* is that which is most generally and frequently used in Sweden. With it are weighed all kinds of provisions, and all merchandise which is sold within the country, or exported abroad by weight, excepting those articles only which specially appertain to the other sorts of weights herein mentioned. The *metallsvigt*, stapelstadsvigt, or exportationsvigt, is applied exclusively to weighing iron, steel, copper, and other gross metals, for *exportation abroad.*

Bergsvigt, also called *bergshammersvigt*, (that is *weight* or *mine hammerweight*,) is the weight used *at the forges* for iron intended for *home consumption*, and to be sent into the interior, or to the *uppstads*, which are towns or cities whence no exportation abroad is allowed, there being at those places no custom-houses for this purpose. But iron sent to the *stapelstads*, or cities whence exportation abroad is permitted, and at which there are custom-houses for this purpose, is weighed *at the forges* by the *metalls*, *stapelstads*, or *exportationsvigt.*

Uppstads weight is that used at *these places*, or anywhere in the *interior* where iron is sold for *home consumption.*

Tackjernsvigt (pig iron weight) is exclusively used throughout Sweden for weighing pig iron to the workmen, who are to forge it into bar iron for account of the proprietor.

Comparative view.

The Swedish *ducat* ought to consist of gold of the fineness of 23 carats and 5 grains, and to weigh gross $72\frac{28}{60}$ Dutch ass, or $62\frac{1}{2}$ ducats make one mark mint weight = 4,384 Dutch ass (nearly.) One mark of gold of the fineness of 24 carats gives $62\frac{2}{281}$ ducats. The addition is according to the alloy. The *remedium (mintage)* which is allowed for ducats is one grain in the fineness, and one ass in the weight, each piece.

The Dutch ducat contains gold of the fineness of 23 carats and 8 grains, with a remedium of one grain per piece of $72\frac{1}{2}$ Dutch ass. At least 72 pieces, new ducats, ought to weigh 5,088 ass, or 159 angels.

Swedish silver coin (whole rixdollars, two-thirds rixdollars, and one-third rixdollars) consists of silver of the fineness of 14 lod 1 grain, with a remedium of one grain; one dollar of which ought to weigh gross $608\frac{8}{9}$ Dutch ass, or 36 rixdollars ought to weigh 5 marks mint weight;

1 *whole* dollar, of fine silver, $534\frac{8}{9}$ ass;

1 *mark* mint weight, of fine silver, gives $8\frac{196094}{1000000}$ rixdollars;

1 *sixth* part of a rixdollar, or 8 styck, (shillings,) half the fineness of silver, 11 lod 1 grain;

1 *twelfth* part of a rixdollar, or 4 styck, (shillings,) half the fineness of silver, 8 lod 2 grains;

1 *twenty-fourth* part of a rixdollar, or 2 styck, (shillings,) half the fineness of silver, 6 lod 2 grains.

All with a remedium of one grain. All, both the whole dollar and the parts of the dollar, have each its full value in silver, and the copper alloy is thereto superadded.

Wrought silver ought to have the fineness of 13 lod 4 grains, with a remedium of $2\frac{1}{4}$ grains. If the fineness be not 13 lod, the vessel shall not on that account be broken up, but subjected to a double control duty, which makes it cost more than if the silver was of the requisite fineness.

All wrought silver is sold according to the lod victualievigt; and all wrought gold according to its weight in ducats.

The fineness of crown gold, so called, (kronguld,) for different vessels or other articles, is 18 carats. In victualievigt, as above, one skulpound = 8,488 Dutch ass. The skulpound victualievigt is divided also into lod and qvintin, thus: 1 skulpound = 32 lod; and 1 lod = 4 qvintin = $276\frac{1}{2}$ ass. One ounce or 8 drachms *medicenalsvigt* are equal to 9 qvintin *victualievigt*, or 1 *libra* = 7,416 Dutch ass. *Metallsvigt* is $\frac{4}{5}$ of victualievigt. Thus, 16 skulpounds victualievigt = 20 skulpounds metallsvigt; and 1 skulpound metallsvigt = $7{,}078\frac{4}{10}$ Dutch ass.

Uppstads weight has a shippound = 421 skulpounds metallsvigt, or 20 uppstadsvigt = $21\frac{1}{20}$ metalls or stapelstadsvigt. *Bergshammersvigt* has a shippound = 442 skulpounds *metallsvigt*, or 20 *bergshammersvigt* = $22\frac{1}{10}$ *metalls* or *stapelstadsvigt.*

The reason for this difference in the two last mentioned instances is, that, the iron being valued at the uppstads and at the stapelstads, respectively, at the same price per shippound as at the forges, this factitious increase of weight has been devised to cover the expense of transportation to the respective places of delivery. Tackjernsvigt has a shippound = 26 lispounds, or 520 skulpounds bergshammersvigt, or 20 tackjernsvigt = 26 bergshammersvigt; which means simply this—that the forgeman, for every 26 pounds of pig iron which he receives, must deliver to the proprietor 20 pounds of bar iron. From the *data* here furnished, all the weights of Sweden may be reduced to the victualievigt, or to the (troyske) Dutch ass. I will here observe that the word "*troyske*," which is used in the Swedish publications on weights and measures, applied to the ass, cannot be satisfactorily translated into other languages, as its derivative meaning is lost. Several learned men, however, have told me that they conjecture that it came from Holland. I have therefore translated it "Dutch."

To compare our weights with those of Sweden, the following *data* are believed to be sufficient:

1 skulpound Swedish victualievigt = 8,848 Dutch ass.
1 pound English troy weight = 7,766 do.
1 pound English avoirdupois weight = 9,489 do.

1,000 pounds English troy weight = 877.7124775 skulpounds Swedish victualievigt = 1,000 pounds English avoirdupois weight = 1066.794476 skulpounds Swedish victualievigt = 1333.49355 Swedish skulpounds, metalls, stapelstads, or exportationsvigt.

Uniformity.

With regard to uniformity, in the *first* sense above suggested, you will perceive that it exists in Sweden in respect to *measures*, so far as the different uses of those measures will easily admit, as they are all reducible to the Swedish foot, linear, square, or cubic, divided into ten or twelve parts or inches. In respect to Swedish *weights*, such uniformity does not exist. The mint, apothecary, and provision weights rest on foundations entirely distinct from each other, and the principal unit of each is divided into parts, with denominations and quantities peculiar to themselves. Although metalls, uppstadts, bergs, and tackjerns weights have indirectly a certain relation to provision weight, and the principal unit of each is divided into parts of the same names and relative quantities, yet their diversity is sufficiently obvious from their different uses, and the different standards to which they must necessarily be made to conform. With regard to uniformity, in the *second* sense above suggested, there have been no proceedings whatever in this country for the purpose of establishing it; indeed, the policy as well as the habits of the people appear to be opposed to its adoption. The only time when this question has been agitated here was upon the receipt of the circular which the French Government, soon after the introduction of the new weights and measures in France, addressed to the Governments of other countries, recommending a universal conformity to the new standard. But there never for a moment existed here a disposition to accede to that proposition. All the convenience and facilities afforded by the plan proposed could not prevail against the prejudices opposed to it. The people consider their ancient customs as a constituent part of their rights, and would defend their old weights and measures as attributes of their liberty and independence.

The bankers object to the *decimal* system, because it does not readily admit of *thirds*, in which they pretend to have a great interest. And the politicians affect to believe that a diversity in weights and measures is necessary for the preservation of a diversity in Governments, and that the adoption of general uniformity would facilitate universal conquest. I will not detain you with a comment on these objections.

With regard to uniformity, in the *third* sense above suggested, which consists in preserving the *constancy* of weights and measures, by an exact conformity to one or more standards, respectively, I shall now present to you the regulations of Sweden.

Standard weights and measures are required by law to be kept at Stockholm, in the college of commerce and the mines, in the office of the receiver of the revenue, in the land surveyor's office, and in the city-hall. Standard weights and measures, adjusted by those of Stockholm, are also kept in the offices of the receiver of the revenue and of the land surveyor in all the other towns or cities, and at all the parish churches in the country. The standard measures, the ell and the foot, are made of brass or steel. The standard weights are made of bronze. It is the duty of the land surveyors in the interior to take care that the weights and measures in their respective districts conform to the standards, and they are allowed a compensation for so doing.

The land surveyor at Stockholm is authorized and required to inspect the conduct of the land surveyors in the interior, and to see that they do their duty herein.

The measure for all kinds of grain, and for flour, salt, beef, and fish, must be made *square*, to promote the facility of ascertaining their justness by the foot measure. But *round* measures are allowed for measuring salt, grain, and *other dry merchandise on board of vessels when imported from foreign countries.* This round measure must be assayed once in every two months during the season of navigation, and while it is used a square measure ought to be at hand with which to compare it. For measuring sea coal, charcoal, chalk, and lime, the round measure is generally allowed. The seller is permitted to measure his own goods, but he must then pay the ordinary fee to the public measurer. Square measures are assayed by the foot rule; and round measures, if tight, by water; if not tight, by wheat or flaxseed. All measures for use ought to be made of seasoned wood, and their capacity stamped on the inside. To distinguish between the several sorts of weights, the victualievigt ought to be made round, and the metallsvigt *hexagonal;* and these weights, when used in the stapelstads, are to be marked with a *round* stamp, and, when used in the interior, with a square stamp. The bergshammersvigt ought to be made triangular.

Steelyards were prohibited in 1638 and 1665, and were again prohibited by the ordinance of 1739, excepting for ore and pig iron by proprietors, for their own satisfaction; and also in such places where no regular weights are to be had. The ordinance of 1739 also excepts for the buying and selling of fish, and for domestic use; also for country people who bring their produce to market; in this case, however, the steelyards must be regularly adjusted, and not of a greater power than two lispounds victualievigt. The large weights for use are made of iron or bronze, and adjusted with solder or lead, on which the stamp is impressed. The small weights are made of bronze;

indeed, an ordinance of Gustavus III. required *all* weights to be made of bronze, but this ordinance has had hitherto but a partial execution. Every person who uses weights or measures not conformable to the standards established by law is liable to a penalty.

I have now furnished all the information of any interest which I have been able to collect here relative to weights and measures, and I trust it will be found at least sufficient to satisfy the resolution of the Senate, so far as that resolution has any relation to Sweden.

I have the honor to be, with very great respect, sir,
Your faithful and obedient servant,

JONA. RUSSELL.

To the Hon. JOHN QUINCY ADAMS.

16th CONGRESS.] No. 504. [2d SESSION.

ABOLISHING IMPRISONMENT FOR DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1821.

Mr. NELSON, of Virginia, from the committee to whom was referred a resolution directing them to inquire into the expediency of abolishing imprisonment for debt on process issuing from the courts of the United States, reported:

That the practice of imprisoning the body of a debtor, though sanctioned by very ancient usage, seems to have had its origin in an age of barbarism, and can only be considered an amelioration of that system by which the person of the debtor was subjected to be sold. Were it not wholly repugnant to every principle of free government and incompatible with every sentiment of generous humanity, the exposure to sale of the debtor might seem more tolerable than his subjection to imprisonment. Policy and individual interest appear to combine to justify the servitude of the debtor, in preference to his seclusion from society and his confinement in a dreary dungeon. By the former system, the profits of the labor of the debtor, brought into the common stock, would contribute to augment the wealth of the nation, and might, eventually, reimburse to the creditor the amount of his demand. It would certainly avoid those expenses which are annually incurred by subsisting so many unprofitable prisoners, without occupation, confined in the jails of the country. The unfortunate debtor himself might at least be blessed with the enjoyment of air and of light, and the occasional society of family and friends, from which, by the latter, he is ofttimes most cruelly secluded, and closely immured within the walls of a prison; yet who is there, in this liberal age, and in this country, where the blessings of freedom are so extensively diffused, who would not recoil with horror and disgust from a proposition to expose to sale and servitude a fellow-citizen whose misfortunes might subject him to the griping pressure of a hard creditor? And yet how few are there among the fortunate and successful, and even among those whom the benign precepts of our religion have taught "to melt at others' wo," who will be roused from apathy and indifference, when they daily learn that our jails are crowded with groups of these victims of misfortune; and who do not bury in the oblivious round of frivolity and pleasure even the momentary sensibilities which such a picture may produce? Nor are the rulers of this happy land free from the reproach which such a stain upon our code of laws cannot fail to imprint. Year after year has elapsed, and misery upon misery has been heaped upon these victims; and yet the hand of mercy is withheld. This crying indifference to the miseries of the wretched, this cold insensibility to the distress and suffering of our fellow-creatures, has too long stained the annals of our country, and blurred with the imputation of incongruity our boast of independence, liberty, and happiness, when contrasted with our practice of imprisonment for misfortune, not for crime. Rescued from this thraldom, the ingenious and the active, restored to a condition for energy and enterprise, may happily find means for accumulation, to the advantage of their creditors, and the subsistence, in comfort, for their families and themselves. Nor will it fail to add one other and important item to the long catalogue of blessings which spring from the fruitful source of happiness founded in the liberal principles of free and equal government. Whilst, in other Governments regulated by no such principles of equity and justice, imprisonment at the will of the despot may be enforced; whilst subject may prey upon subject, through the instrumentality of law and the extinction of his liberty, here let it be our boast that none can be deprived of his liberty but by the judgment of the law, upon conviction of crime; that none can be imprisoned by his fellow-citizen for his poverty or misfortune; here let the possessions and the effects of the debtor be made subject to his debts; but spare his person, at least, for the solace and the comfort of his beggared and impoverished family.

In some of the States of this Union laws exist whereby the unfortunate may be relieved from this confinement. It is an example worthy of imitation by this Government. This singular phenomenon is presented, that a man imprisoned under one jurisdiction, in the same country, may, by one code of laws, be liberated from confinement, whilst another, confined in the same prison, under another jurisdiction, is denied this privilege, and must continue in hopeless and irremediable occlusion. To rescue the character of this Government from such a stigma is the object of the committee. Aware that great delicacy and difficulty are to be encountered in devising such a system as would conduce to the complete attainment of this desirable object, and, at the same time, combine with it the most ample security to the rights of individuals, your committee might be deterred from making the attempt were they not encouraged by the benevolence of the object, and strengthened by the persuasion that any errors which may spring from the novelty of the trial may in future be corrected by the experience which will be readily acquired in the progress of the experiment. Believing that the remedy heretofore extended to the creditor, whereby he has been enabled to use this coercion for the recovery of his debts, is completely within the control of the National Legislature to alter and modify as in their discretion shall seem wise, and, whilst they endeavor to exempt the person of the debtor, they supply the most unrestrained control over his goods and effects, they have no scruple to recommend the interference of Congress. Nor have your committee been unmindful of one of the happy consequences which may result from this innovation in the limitation of that unbounded credit which has so extensively prevailed to the great injury, and even ruin, of many honest but imprudent debtors. The diminution of this sys-

tem, so fascinating and seductive to many, may prove a real blessing to those who so often disregard the strongest dictates of prudence and discretion.

Upon the whole, whilst your committee attempt to shield the unfortunate debtor from cruel and useless oppression, they propose, in the most ample and unrestrained manner, to subject all his property to the rights and interests of the creditor.

They therefore beg leave to report a bill.

17th Congress.] **No. 505.** [1st Session.

CONTESTED ELECTION OF PETER SHARPE, A REPRESENTATIVE FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1821.

Mr. Sloan made the following report:

The Committee of Elections, to whom were referred the memorial and documents of Cadwallader D. Colden, of the city of New York, contesting the election of Peter Sharpe to a seat in the House of Representatives of the United States, have had the same under consideration, and report:

That it appears that by law the State of New York is divided into districts for the purpose of electing Representatives to Congress; that the first congressional district of said State is composed of the counties of Suffolk, Queens, Kings, Richmond, and the first and second wards of the city of New York, and is entitled to elect two Representatives; that by the law of said State the elections are held in the several towns and wards, by ballot, before the supervisors, assessors, and town clerks, who officiate as inspectors of said elections; that after the polls are finally closed, and the number of votes ascertained, it is required of the said inspectors to make out a certificate of the election, specifying the number of votes given for each candidate, a record of which is to be made by the town clerk, and a copy of the certificate is to be lodged by the inspectors with the clerk of the proper county, who is required to transmit an exact transcript of all the certificates thus delivered to him to the Secretary's office of said State; and the Secretary, Surveyor General, Attorney General, Comptroller, and Treasurer of said State are constituted canvassers of elections, and are required to examine said transcripts, and determine therefrom who are elected in the several districts, and to give to the persons elected certificates of their election; that in the month of April last an election was held for Representatives to Congress from the State of New York, and that by a statement of the votes given in the said first district at said election, and which statement is under the official seal of the Secretary of said State, it appears that Silas Wood, Peter Sharpe, Cadwallader D. Colden, and Joshua Smith were candidates at said election, and that

Silas Wood had	- - -	3,960 votes.
Cadwallader D. Colden had	- - -	3,339 do.
Peter Sharpe had	- - -	3,369 do.
Joshua Smith had	- - -	3,326 do.
Cadwallader D. Colder had	- - -	220 do.
And Cadwallader Colden had	- - -	395 do.

The 220 votes which appear by this statement to have been given to Cadwallader D. Colder are represented to have been given in the town of Brookhaven, in the county of Suffolk; and the 395 votes for Cadwallader Colden are stated to have been given in the town of Hempstead, in Queens county; in which towns no votes were allowed to Cadwallader D. Colden by the State canvassers. Charles H. Havens, clerk of the county of Suffolk, testifies that, by the certificate of election returned to him by the inspectors of the said election in the town of Brookhaven, Cadwallader D. Colden had 220 votes, and that he presumes that, in the transcript made out by him, and transmitted to the office of the Secretary of State, the State canvassers have mistaken his final letter in the name of Mr. Colden for an *r*. Samuel Sherman, clerk of Queens county, testifies that, by the return made to his office by the inspectors of the town of Hempstead, it appears that Cadwallader D. Colden had in said town of Hempstead 395 votes, but that in the transcript which he made therefrom, and transmitted to the office of the Secretary of the State of New York, the letter D., in Mr. Colden's name, was omitted by him through mistake. From which testimony it appears that the votes in the towns of Brookhaven and Hempstead were in fact given for Cadwallader D. Colden, and ought to have been so returned and allowed by the officers of the State of New York at the general canvass of the State; and that, being allowed these votes, it will make the whole number of votes given for Cadwallader D. Colden amount to 3,954, being 585 votes more than were given to Peter Sharpe. The committee will forbear from exhibiting arguments to prove that votes thus fairly and honestly given ought not to be lost or set aside for any omission or mistake of any of the returning officers. It is conceived to be entirely unnecessary to prove that what has been the uniform decision of the House of Representatives ever since the formation of the Government, in such cases, has been eorrect. It is to be presumed that Mr. Sharpe has obtained from the proper authority of the State of New York a certificate of his election. There is testimony that Mr. Colden has notified him that he intended to contest his right to a seat, but Mr. Sharpe has produced no testimony whatever, nor signified any intention to resist the claim of Mr. Colden. The committee submit the following resolutions:

Resolved, That Peter Sharpe is not entitled to a seat in this House.

Resolved, That Cadwallader D. Colden is entitled to a seat in this House.

17th Congress.] No. 506. [1st Session.

RECOVERY OF FUGITIVE SLAVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 17, 1821.

By the House of Delegates, *February* 7, 1821.

Whereas the owners of slaves in this State are frequently subjected to great imposition and serious inconvenience, from the constant and ready protection afforded their runaway negroes by the citizens of Pennsylvania, it is deemed necessary to call the attention of Congress to the subject.

Whenever a runaway slave is pursued and found in Pennsylvania, every possible difficulty is thrown in the way, so as to prevent the recovery of such slave. There are persons always ready to lend every practicable aid in thwarting the just and legal efforts of the owner in the recovery of his negro. If the color of legal proceedings fail, force is not unfrequently resorted to. As the present acts of Congress are not sufficient to protect the rights of our citizens in relation to their negroes, and since the present state of things is not only vexatious to master, but extremely pernicious, and calculated to destroy the contentment and happiness of slaves, therefore,

Resolved by the General Assembly of Maryland, That it is the duty of the Congress of the United States to enact such a law as will prevent a continuance of the evils here complained of.

Resolved, That his excellency the Governor be requested to forward, immediately, copies hereof to each of our Senators and Representatives in Congress, with a request that they will exert their influence in procuring the adoption of such measures as will effectually protect the right of slaveholders.

By order:

JOHN BREWER, *Clerk.*

By the Senate, *February* 16, 1821.

Read and assented to.

By order:

JOHN N. WATKINS, *Clerk.*

True copy of the original on file in the Executive Department of the State of Maryland.

NINIAN PINKNEY,
Clerk of the Council of Maryland.

17th Congress.] No. 507. [1st Session.

CITY OF WASHINGTON: VALUE OF PUBLIC LOTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 26, 1821.

Office of Commissioner of Public Buildings,

Sir: Washington, *December* 26, 1821.

In obedience to a resolution of the House of Representatives, passed the 21st instant, requiring a report of the amount of unimproved property in the city of Washington belonging to the United States, with an estimate of its probable cash value at this time, I have the honor to state:

That the public ground in this city consists of two descriptions: 1st. Building lots assigned to the United States upon a division with the original proprietors, agreeably to the terms and conditions of the deeds of trust for the ground within the limits of the city, by which the proprietors ceded to the United States one-half of the building lots, without any pecuniary equivalent. 2dly. "Reservations" of entire squares, or larger sections of ground, purchased from the original proprietors, on account of and for the use of the United States.

Of the building lots there remain unsold about the number of 5,150. The reservations contain, together, 541 acres 1 rood and 29 perches, or 23,584,745 square feet, equal to 4,479½ standard lots.

Any estimate of the cash value of this property must, under present circumstances, be extremely arbitrary. Owing to the general stagnation of business and scarcity of a circulating medium, few sales have been effected, either on public or private account, within the last year or two; and it is only from actual sales in the vicinity that the value of any given lot can be ascertained. The average price of the public lots heretofore sold is $180 per lot, or about $3\frac{419}{1000}$ cents per square foot. Taking this as the rule of valuation, the whole of the ground belonging to the United States, in the city of Washington, would amount to one million seven hundred and thirty-three thousand three hundred and ten dollars.

I have the honor to be, with great respect, sir, your most obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. Philip P. Barbour, *Speaker of the House of Representatives.*

17th CONGRESS.] No. 508. [1st SESSION.

LONGITUDE OF THE CAPITOL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9 AND MARCH 19, 1822.

To the House of Representatives: WASHINGTON, *January* 8, 1822.

In pursuance of a joint resolution of the two Houses of Congress of the 3d of March, 1821, authorizing the President to cause such number of astronomical observations to be made, by methods which might, in his judgment, be best adapted to insure a correct determination of the longitude of the Capitol, in the city of Washington, from Greenwich, or some other known meridian in Europe; and that he cause the data, with accurate calculations or statements founded thereon, to be laid before them at their present session, I herewith transmit to Congress the report made by William Lambert, who was selected by me on the 10th of April last to perform the service required by that resolution.

As no compensation is authorized by law for the execution of the duties assigned to Mr. Lambert, it is submitted to the discretion of Congress to make the necessary provision for an adequate allowance to him and to the assistant whom he employed to aid him in his observations.

JAMES MONROE.

SIR: CITY OF WASHINGTON, *November* 8, 1821.

The illustrious personage by whose name the metropolis of the American Union has been designated unquestionably intended that the Capitol, situated at or near the centre of the District of Columbia, should be a first meridian for the United States, by causing, during the first term of his presidency, the geographical position of that point in longitude 0° 0′, and its latitude 38° 53′ north, (as found by Mr. Andrew Ellicott to the nearest minute of a degree,) to be recorded in the original plan of the city of Washington. Desirous of promoting a scientific object contemplated by that great and good man, the undersigned determined to call the attention of the legislative and executive authorities of the General Government to the establishment of a first meridian for his native country; and, accordingly, on the 27th of December, 1809, a memorial addressed to both Houses of Congress, (No. 1,) was presented in the House of Representatives by Mr. Burwell, one of the members from Virginia. [See No. 277, page 53.]

The explanatory remarks in No. 2 have been since examined and revised by the author. In some parts of the original communication inaccuracies were permitted to remain, to which the undersigned now objects. The following, with variations in one or two paragraphs, is an extract from that paper:

"The subject of this communication being of national concern, it is submitted without a tedious introduction to apologize for its nature or contents; such explanations, or information alone, as have a tendency to show the progress and effect of a novel undertaking, will be given as indispensably connected with its development.

"In all branches of science which admit of mathematical demonstration, the principles and rules on which the operation is founded should be clearly understood: these may be stated by a plain expression in words at length, or by symbolical characters or signs, often substituted in a work of this kind under the denomination of algebraical formulæ; but, as some of the elements necessary to produce an accurate result must be obtained by a needless waste of additional labor, without a competent knowledge of analytical process, the latter method will be adopted in all cases where a strict confinement to its use will not be attended with ambiguity.

"By the plan of the city of Washington, in the territory of Columbia, the Capitol in that city is intended as a first meridian for the United States of America; but, in order to establish it as such, the distance between it and some known meridian in Europe, or elsewhere, measured or estimated on a parallel to the equator, and referred to the centre of the earth under the meridian for which the computation may be made, should be ascertained on correct principles, and with due precision. As many of our mariners and geographers are still in the habit of taking their departure or reckoning their longitude from Greenwich observatory in England, it will not, it is hoped, be considered as an instance of *unpardonable presumption* for attempting to extricate ourselves from a sort of degrading and unnecessary dependance on a foreign nation by laying a foundation for fixing a first meridian of our own.

"The geographical position of any place on the surface of the earth is determined from its latitude and longitude: the former is easily obtained with sufficient accuracy by the help of a good sextant or quadrant in the hands of a skilful observer; but the latter is attended with greater difficulty, and often with uncertainty. Of all the means hitherto discovered or devised for a satisfactory accomplishment of this desirable object, solar eclipses and occultations of known fixed stars by the moon afford the most to be depended on. In such cases, when the weather is favorable, the exact moment of time of the beginning and end of an eclipse of the sun, or of the immersion and emersion of a star, may be either observed or inferred without the hazard of error in any sensible degree. The frequent eclipses of Jupiter's satellites furnish us with a simple and easy method to find the longitude on land; but the immense distance of that planet from the earth renders it necessary that many observations should be made, a mean of which may be taken as a near approximation to the truth.

"In several methods used for ascertaining the longitude on land, as well as at sea, it is customary to consider the form of the earth as a *perfect sphere*, whereas it has been proved to be that of an *oblate spheroid*, from the ingenious admeasurements and observations of certain French mathematicians at or near the equator, and in the northern parts of Europe during the last century, who, by carefully determining the length of a degree of latitude in toises at the respective places to which they were sent by order of Louis XV., verified the hypothesis of the celebrated Sir Isaac Newton concerning the *real* figure of the earth, contrary to the opinion of many, and even of *scientific* persons at that period, some of whom believed it to be an *exact globe*, and others a *prolate* instead of an *oblate spheroid*. The ratio of the equatorial diameter to the polar axis of the earth, as adopted by Sir Isaac Newton, is as 692 to 689, and that since used by Messrs. Vince, Mackay, and other British astronomers, 230 to 229, (which is nearly the same.) In consequence of some mistakes of calculation in the Mécanique Celeste of M. de la Place, the ratio of 334 to 333 was used for several years by European and American astronomers and geographers; but those mistakes having been discovered and rectified, the ratio of 320 to 319 has been adopted, in some calculations, as a near approximation to the truth. Perhaps a correct proportion may be between the ratios of 318 to 317, and of 321 to 320; and that of 639 to 637 be sufficiently accurate to be fixed on as a standard, and used

in all astronomical computations which require the *true* figure of the earth to be taken into view. It will be readily discovered that a variance, proportionate to the distance between any two meridians, will be found by supposing the earth to be a *perfect sphere*, when compared with the result obtained by admitting it to be either a *prolate* or an *oblate spheroid;* and that difference will be shown in the course of this work, according to the ratios assumed for the calculation.*

"The moon being the only satellite which revolves around the earth as one of the primary planets, is so much nearer thereto than any other of the celestial bodies composing our solar system, that it is a fit object to be observed for ascertaining the longitude of a place with precision, especially when its correct position with respect to the sun or a known fixed star is obtained; but greater reliance may always be had on the data afforded by the *apparent time* at which those positions are determined, than such as relate to the *angular distances*, because an error of only one minute of space will occasion a deviation in the result of twenty-seven minutes of longitude from the truth. The error arising from a single observation may, indeed, be lessened, if not entirely removed, by a sufficient number of them taken with a good instrument, and by an accurate observer; this is usually done at sea, from the frequency to which the practice may be resorted; and the rules for clearing the observed distance of parallax and refraction having been rendered more simple from the introduction of natural co-sines and versed sines in the process, may be attended with advantage on land, as an auxiliary to some other methods better adapted to insure a correct result.

"About the year 1770 the lunar tables constructed by Tobias Mayer, of Gottingen, in Germany, having been previously received, in manuscript, by the British Board of Longitude, with the curious and elaborate theory on which they were formed furnished by M. Euler after Mayer's decease, they were ordered to be printed under the inspection of Dr. Maskelyne. These tables, far superior in point of accuracy to any that had ever appeared before, were further improved by Mr. Charles Mason, some time after their original publication; and the discovery of the longitude from lunar observations, to any desirable degree of precision, which for a series of ages had been considered impracticable, was not only rendered certain, but comparatively easy of attainment, by the additional help of Hadley's (or rather Godfrey's) reflecting quadrant and sextant. It is said that M. Burg, of Vienna, in Germany, has constructed a new set of tables still further improved; but very few copies, if any, are yet to be procured in this country.

"The irregularities in the moon's motions, arising from the constant but unequal disturbing forces of the sun, the earth, and some of the other planets, particularly Jupiter and Venus, have produced that difficulty which was once thought insurmountable for a correct determination of the longitude by any computation founded on their observations. There are upwards of twenty equations necessary to reduce the moon's *mean* to her *true* place. The motion in right ascension and longitude, as referred to the equator or the ecliptic, is progressively, though not uniformly, accelerated from the apogeon to the perigeon, and retarded, in like manner, from the perigeon to the apogeon; and even the figure of the elliptical orbit in which this secondary planet moves around the earth is subject to change: hence, great credit is due to the indefatigable labors of Mayer, and other scientific characters in Europe, for the present state of perfection to which the theory has been brought. A tedious routine of calculation has been saved by the annual publication of the British Nautical Almanac, and the French Connoissance des Tems: the former, being printed in our own language, must, of course, be better understood and more generally used in the United States than the latter. It would be a valuable improvement of that useful production if all the elements contained in it, particularly such as relate to the moon, were extended to the fractional parts of a second in time as well as space.

"To those who are not acquainted with practical astronomy, it may be proper to remark:

"That the *apparent* or *visible* place of the sun, moon, or any of the planets, is that seen by an observer wherever he may be on the surface of the earth; and the *true* place, that which would be viewed by a spectator, if he could be fixed at the centre of the earth, under the same meridian, and no obstacle intervened to prevent the effect of his vision: the difference between these positions is called "parallax," and is generally applied to the *altitude*, *longitude*, and *latitude* of the observed object, but may, with equal propriety, be extended to its *right ascension* and *declination*, when referred to the equator, instead of the ecliptic.

"Aberration of a star is a small *apparent* motion occasioned by a sensible proportion between the velocity of light, and that of the earth in its annual orbit. Nutation is also a small *apparent* motion, proceeding from the variable attraction of the sun and moon on the spheroidal figure of the earth, both of which should be computed and applied according to the signs + or — to the *mean* right ascension and declination of the star, when great accuracy is required.

"The ecliptic is a great circle, one-half of which is always above the horizon; and the middle of this part, being 90° from their intersection, is called the *nonagesimal*, on the altitude of which, and the longitude from the equinoctial point Aries, the effects of parallax depend; for when the observed object is in the nonagesimal, it has no parallax in longitude, and the parallax in latitude is then equal to the parallax in altitude, because a great circle, passing through the pole of the ecliptic and nonagesimal, passes also through the zenith.

"The moon's parallaxes in longitude and latitude may be obtained by means of the parallax in altitude, and the angle formed between the vertical circle and a parallel to the ecliptic,† divided by the co-sine of the moon's *apparent* altitude."

The remaining parts of No. 2 contained rules and process to find—

1. The longitude and latitude of the moon or star, from its right ascension and declination, and the obliquity of the ecliptic.
2. A constant logarithm to reduce the latitude of a place according to any assumed ratio of the equatorial diameter to the polar axis of the earth, applicable to any latitude between 0° and 90°.
3. The reduction of the moon's equatorial horizontal parallax.
4. The right ascension of the meridian or mid-heaven.
5. The moon or star's horary angle, or distance from the meridian.
6. The altitude and longitude of the nonagesimal, or highest point of the ecliptic.
7. The moon's parallaxes in longitude and latitude.
8. The moon or star's *true* altitude.

* By comparing the results contained in the original calculation, and ascertaining the longitude of the Capitol in Washington from Greenwich according to the ratio of 320 to 319, also the results contained in the revised statement hereafter exhibited, the longitude is found to be greater without reduction of the latitude of the place, and the moon's horizontal parallax, than with such reduction, according to the ratio of

334 to 333,	- - - -	2′	8″	55 dec.
320 to 319,	- - - -	2	13	84
230 to 229,	- - - -	3	5	55

† This angle, or its supplement, may be called the "parallactic angle." The rule contained in this paragraph is more proper to be used in cases of occultations of fixed stars by the moon than of solar eclipses, because the longitude and latitude of the star is considered to be the same, whether viewed from the centre or from the surface of the earth.

9. The angle of position at the moon or star.

10. The moon's parallax in altitude, and apparent altitude of her centre, exclusive of refraction.

11. The moon's augmented semidiameter, arising from her apparent altitude.

12. The inflection of the moon's light, from the works of several astronomical writers.

13. The angle between the parallels to the ecliptic and equator; the angle between the meridian passing through the centre of the moon or star, and a parallel to the ecliptic; and the angle between the vertical circle and a parallel to the ecliptic.

14. The moon's parallaxes in longitude and latitude, from the parallax in altitude, and the angle last mentioned in the preceding article.

15. Abstract of the calculation to ascertain the longitude of the Capitol in the city of Washington, from Greenwich, in which an error, arising from the parallax in latitude having been found incorrect, was rectified by a repetition of the process, until the moon's *apparent* longitude at the points of occultation was brought to agree exactly with the star's longitude.

	°	′	″	*dec.*
Without reduction of the latitude of the place, or moon's horizontal parallax, -	76	56	11	700
Reduced, (334 to 333,) - - - - -	76	54	4	125
Reduced, (230 to 229,) - - - - -	76	53	6	930

No. 3, which accompanied the memorial, contained rules and process for computing the moon's longitude, latitude, right ascension or declination, and its hourly velocity, at any intermediate time between 0 and 12 hours, extended to the fourth order of differences.

Nos. 4 and 5 were communicated to the House of Representatives, or its committee, after the memorial had been referred.

No. 4 contained rules and series for computing the moon's augmented semidiameter by another method, with tables of logarithms, constructed by the undersigned, corresponding with the augmentation, when the moon's apparent latitude is 90°, with the process for reduction according to any given altitude.

The reduction of the moon's horizontal parallax, in which, through inadvertence, the rule contained in No. 2 was repeated.

No. 5 contained a table of fixed logarithms, also constructed by the author of the statement, to reduce the moon's equatorial horizontal parallax according to the ratios then in use, viz: 334 to 333, and 230 to 229, adapted to all latitudes from 0° to 89°, inclusive, with examples.

Such was the form (excepting a few corrections since made in No. 2, relating to the explanatory remarks) in which the application of the undersigned originally presented itself to the consideration of the National Legislature. On a careful examination of the elements contained in article 15 of that number, it was discovered that an error of 5″ 17 *dec.* at the immersion, and 4″ 61 *dec.* at the emersion, in the parallax in latitude, had been committed, occasioned by an omission to apply the logarithm co-sine of the moon's apparent latitude to the parallax in latitude, *approximated*, to obtain that element as correctly as it ought to have been found. It has been already stated in article 15, before mentioned, that the error arising from the incorrect parallax in latitude had been rectified by a repetition of the process. The following revised statement will show that the results originally found were near the truth; it will also exhibit the process of computation, and the intention of its author to ascertain the longitude of the Capitol in Washington, from Greenwich, with due precision:

1. By considering the form of the earth to be that of a *perfect sphere*, and without reduction of the latitude of the place, or of the moon's equatorial horizontal parallax.
2. Admitting its form to be that of an *oblate spheroid*, and reducing the latitude and moon's horizontal parallax, according to the ratio of 334 to 333.
3. Ditto, ditto, according to the ratio of 230 to 229.

The longitude of η Pleiadum (Alcyone) on the 20th of October, 1804, was found by tables of its right ascension and declination, used in the original calculation, to be 57° 16′ 35″ 925 *dec.* and latitude 4° 1′ 59″ 809 *dec.* N. In a subsequent calculation by M. de la Lande's tables, hereafter stated in this report, the longitude of the same star, deduced from the *mean* right ascension and declination, corrected for aberration and nutation, was found to have been, at that time, 57° 16′ 37″ 44 *dec.* and its latitude 4° 2′ 1″ 16 *dec.* The times of immersion and emersion of the star were reduced from the place of observation to the Capitol; and the said original statement, as revised, using *two* instead of *three* decimal parts of a second, is as follows:

Occultation of η Pleiadum, (Alcyone,) observed on the night of the 20th of October, 1804, at a place north 75°, west one mile and seven-tenths (estimated) of the Capitol, in the city of Washington.

	deg.	*m.*	*s.*	*dec.*	
Latitude of the Capitol, *assumed*, - - - -	38	52	57	0	N.

Revised statement,	76	56	9	75	76	54	1	20	76	53	4	20
Original calculation,	76	56	11	70	76	54	4	12	76	53	6	93
Variance,	0	0	1	95	0	0	2	92	0	0	2	73

A degree of longitude in latitude deg. 38 m. 53 is = 46.7055 geographical miles or minutes, equal to 53.867 of our miles, or 94,806 yards; the above variance will therefore be,

	yds.	ft.	in.
Without reduction of latitude, or moon's horizontal parallax,	51	1	0
Reduced, (334 to 333,)	76	2	8
Reduced, (230 to 229,)	71	2	8

} less than the results contained in the original statement.*

To prove that the moon's hourly velocity in longitude, above stated, has been correctly found, the moon's motion in longitude, from the respective times at Greenwich, corresponding with the apparent times of immersion and emersion at Washington, to the time of *true* conjunction at Greenwich, when the moon's *true* longitude was equal to that of the star, will be ascertained as follows:

				h.	m.	s.	dec.
Time of *true* conjunction of moon and star at Greenwich,				15	50	35	56
Corresponding time at Greenwich, when the immersion happened at Washington,				14	30	12	32
Interval of time,				s. 4,823	dec. 24	= 1	20 23 24
As one hour	= s. 3600	log. arith. comp.					6.4436975
To ☽'s hourly velocity	= 2258	dec. 3328	log.				3.3537879
So interval of time	= 4823	24	log.				3.6833389

	deg.	m.	s.	dec.	s.	dec.		
Moon's motion in longitude during interval,	0	50	25	688	= 3025	688	-	log. 3.4808243

	h.	m.	s.	dec.		
Moon's longitude at	14	30	12	32	56 26 10 24	
Moon's longitude at *true* conjunction,					57 16 35 928	

				h.	m.	s.	dec.
Time of *true* conjunction at Greenwich,				15	50	35	56
Corresponding time at Greenwich, when the emersion happened at Washington,				15	24	50	32
Interval of time,				s. 1545	dec. 24	= 0	25 45 24
As one hour	= s. 3600	dec.	log. arith. comp.				6.4436975
To ☽'s hourly velocity	= 2257	8663	log.				3.3536982
So interval of time	= 1545	24	log.				3.1889959

	deg.	m.	s.	dec.	s.	dec.		
Moon's motion in longitude during interval,	0	16	9	151	= 969	151	-	log. 2.9863916

	h.	m.	s.	dec.		
Moon's longitude at	15	24	50	32	57 0 26 78	
Moon's longitude at *true* conjunction,					57 16 35 931	

* The differences in these results, small as they appear to be, arise, in some measure, from the moon's hourly velocity in longitude not being the same in the revised statement as in the original calculation.

deg. m. s. dec.
The star's longitude being 57 16 35 925, the variance does not amount to $\frac{1}{100}$ part of a second, by the immersion or emersion.

By the foregoing process of calculation, the difference arising from the figure of the earth being considered either as a *perfect sphere*, or an *oblate spheroid*, may be found according to any assumed ratio of the equatorial diameter to its polar axis, and will be useful to determine the reduction in the distance from the city of Washington to Greenwich, or any other known meridian in Europe, from the results founded upon transit observations, or such other approved methods to ascertain the longitude as shall require that reduction to be applied.

On the 28th of March, 1810, a select committee of the House of Representatives of the United States, of which Mr. Pitkin, of Connecticut, was chairman, made a report on the memorial and papers herein alluded to, in the words following:

"The committee to whom was referred the memorial and representation of William Lambert, report:

"That the memorialist states that, for the purpose of laying a foundation for the establishment of a first meridian for the United States of America, at the seat of Government, he has made calculations to determine the longitude of the Capitol, in the city of Washington, from Greenwich observatory, in England; and that he submits the same, together with the data and elements on which his calculations are made, to the consideration and patronage of the National Legislature.

"The committee have deemed the subject worthy the attention of Congress, and would, therefore, beg leave to observe, that the necessity of the establishment of a first meridian, or a meridian which should pass through some particular place on the globe, from which geographers and navigators could compute their longitude, is too obvious to need elucidation.

"The ancient Greek geographers placed their first meridian to pass through one of the islands which by them were called the Fortunate Islands, since called the Canaries. Those islands were situated as far west as any lands that had then been discovered, or were known by ancient navigators, in that part of the world.

"They reckoned their longitude east from Hera, or Junonia, supposed to be the present island of Teneriffe.

"The Arabians, it is said, fixed their first meridian at the most westerly part of the continent of Africa. In the fifteenth and sixteenth centuries, when Europe was emerging from the dark ages, and a spirit of enterprise and discovery had arisen in the south of Europe, and various plans were formed, and attempts made, to find a new route to the East Indies, geographers and navigators continued to calculate longitude from Ferro, one of the same islands, though some of them extended their first meridian as far west as the Azores, or Western Islands.

"In more modern times, however, most of the European nations, and particularly England and France, have established a first meridian to pass through the capital, or some place in their respective countries, and to which they have lately adapted their maps, charts, and astronomical tables.

"It would, perhaps, have been fortunate for the science of geography and navigation if all nations had agreed upon a first meridian, from which all geographers and navigators might have calculated longitude; but as this has not been done, and, in all probability, never will take place, the committee are of opinion that, situated as we are in this western hemisphere, more than three thousand miles from any fixed or known meridian, it would be proper, in a national point of view, to establish a first meridian for ourselves; and that measures should be taken for the eventual establishment of such a meridian in the United States.

"In examining the maps and charts of the United States, and the particular States, or their seacoasts, which have been published in this country, the committee find that the publishers have assumed different places in the United States as first meridians.

"This creates confusion, and renders it difficult, without considerable calculation, to ascertain the relative situation of places in this country. This difficulty is increased by the circumstance that in Louisiana, our newly acquired territory, longitude has heretofore been reckoned from Paris, the capital of the French empire.

"The exact longitude of any place in the United States being ascertained from the meridian of the observatory at Greenwich, in England, a meridian with which we have been conversant, it would not be difficult to adapt all our maps, charts, and astronomical tables to the meridian of such a place; and no place, perhaps, is more proper than the seat of Government.

"It appears, by the papers submitted to the consideration of the committee, that Mr. Lambert has calculated the longitude of the Capitol, in the city of Washington, from the royal observatory at Greenwich, by one of the most approved methods now in use for that purpose, viz: an occultation of a known fixed star by the moon.

"His calculations are founded on an occultation of η Pleiadum *(Alcyone,)* one of the seven stars, on the night of the 20th of October, 1804. By these calculations, it appears that the longitude of the Capitol, in the city of Washington, as reduced according to the true figure of the earth, (being that of an oblate spheroid,) is *76° 53′ 6″ 920*dec.* The committee would observe that Mr. Lambert appears to be well acquainted with astronomical calculations; and that, so far as the committee have had time to examine them, they appear to be correct. In a question, however, of so much nicety, the correct decision of which depends so much on the accuracy of the observations made, and the goodness of the instruments used, and when the smallest error in the data will necessarily produce an erroneous result, full reliance ought not to be placed on calculations made from a single observation.

"Indeed, in order to be certain of a correct result, it may be proper that more than one of the various methods of ascertaining longitude should be used; that calculations should be made from observations of the eclipses of Jupiter's satellites, of solar eclipses, of the angular distances between the sun and moon, or of the moon and a fixed star, and other methods, as well as from observations on occultations of fixed stars.

"The committee are therefore of opinion that, in order to lay a foundation for the establishment of a first meridian in this western hemisphere, the President of the United States should be authorized to cause the longitude of the city of Washington from the observatory at Greenwich, in England, to be ascertained with the greatest possible degree of accuracy; and that he also be authorized, for that purpose, to procure the necessary instruments.

"They therefore beg leave to submit to the consideration of the House the following resolution:

"*Resolved*, That it is expedient to make provision, by law, authorizing the President of the United States to cause the longitude of the city of Washington from the observatory at Greenwich, in England, to be ascertained with the greatest possible degree of accuracy; and also authorizing him, for that purpose, to procure the necessary astronomical instruments."

This report was read, and, with the papers accompanying it, laid on the table, and ordered to be printed for the use of the members of both Houses of Congress. No further proceeding appears to have been had thereon during the remainder of that session; and there is no evidence, from the records of that branch of the National

* The committee appear to have given a preference to the ratio of 230 to 229, by taking the result found according to that ratio, with a deviation of 1-100 part of a second, supposed to have been a typographical mistake.

Legislature to which the report was submitted, to show that it was, at any time thereafter, taken up for consideration or decision, otherwise than by reference of it to another select committee, on the 2d February, 1815.

On the 23d of January, 1811, the memorial and papers herein alluded to were referred again to a select committee of the House of Representatives, of which Mr. McKee, of Kentucky, was chairman, who were, on the 23d of February, in the same year, discharged from further consideration, and the said memorial and papers referred to the then Secretary of State. His report thereon was transmitted to the House on the 3d of July, 1812, which, together with a letter accompanying it, was read, and ordered to lie on the table. [See No. 328, p. 194.]

On the 8th of December, 1812, the foregoing letter and report were referred to a select committee of the House of Representatives, of which Dr. Samuel L. Mitchill, of New York, was chairman, who, on the 20th of January, 1813, made a report thereon. [See No. 332, page 197.]

The foregoing report was read, and ordered to be referred to a Committee of the Whole House on the Friday next ensuing. No further proceeding was had therein during the remainder of that session.

From the 25th of March, 1813, to the 4th of December, 1814, the undersigned was absent from the city of Washington on public business of the United States; and, during this interval, no measure was taken by himself, nor, probably, by any other person, to bring this subject again to the view of the National Legislature.

On the 2d of February, 1815, the memorial originally presented, with the several reports of committees and of the Secretary of State thereon, was referred to a select committee of the House of Representatives, of which Mr. Hugh Nelson, of Virginia, was chairman, who, on the 18th of the same month, delivered in their report. [See No. 386, page 273.]

The resolution submitted by the committee having been amended by striking out therefrom the words "*by competent persons residing*," it was, as so amended, agreed to on the same day by the House of Representatives; but, not being in the form of a concurrent resolution of the two Houses of Congress, it was not ordered to be engrossed and sent to the Senate in the manner usually adopted in cases of such resolutions. It was considered only as the act of one branch of the National Legislature, and the executive authority could not, with propriety, take any efficient measures in consequence of the agreement to the resolution by the House of Representatives *alone*.

On the 23d of November, 1818, another memorial from the undersigned was presented in the House of Representatives by Mr. Hugh Nelson, one of the members for Virginia, in the words following, to wit:

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled: The memorial of William Lambert respectfully showeth:

That the abstracts of astronomical calculations to ascertain the longitude of the Capitol, in the city of Washington, from Greenwich observatory, in England, herewith submitted to the consideration of Congress, are founded upon the most accurate data that could be had at the respective times when the observations were made, and have been admitted by the American Philosophical Society of Philadelphia into the last volume of their Transactions. The work is intended as a foundation for the establishment of a first meridian for the United States at the seat of their Government, according to the original plan of the city.

It is not contemplated, nor asked by the memorialist, that an observatory be erected and furnished with suitable instruments at the present time; but he respectfully solicits the adoption of a concurrent resolution of the two Houses of Congress, authorizing additional observations to be made, to test the accuracy of the result already obtained, by such methods as may be best adapted to insure a correct determination of our longitude from Greenwich, which, it is presumed, may be completed by scientific persons resident in this place, with little or no expense to the public. It is left to the wisdom of Congress to decide whether the object is in itself of sufficient national importance to engage their attention.

Two hundred printed copies of the abstracts of calculations alluded to are now laid before the House of Representatives, to enable the members to examine them fully, and to act on the prayer of this memorial in such manner as in their judgment may be deemed expedient and proper.

WILLIAM LAMBERT.

CITY OF WASHINGTON, *November* 19, 1818.

A similar memorial was presented to the Senate of the United States, accompanied with fifty printed copies of the abstracts of calculations.

It appears, also, from an entry on the Journal of the House of Representatives of the 11th of January, 1819, that a letter from the undersigned, addressed to the Speaker of that House, was then received, accompanied with two hundred additional copies of the abstracts of calculations alluded to in the memorial presented on the 23d of November, 1818. A similar letter was likewise addressed to the President of the Senate, accompanied with fifty copies.

The memorial last mentioned was, on the day in which it was read, ordered to be referred to a select committee of the House of Representatives, of which Mr. Hugh Nelson, of Virginia, was chairman, who, on the 24th of February, 1819, [see No. 468, page 546,] reported a resolution in the form of a concurrent resolution of the two Houses, which was ordered to be engrossed for a third reading on the ensuing day. It passed the House of Representatives on the 25th of February, and was sent to the Senate for their concurrence, who, on the 3d of March, 1819, postponed the further consideration thereof until *to-morrow*.

On the 20th of January, 1820, the said memorial was referred to the Committee on the Judiciary, one of the standing committees of the House of Representatives, of which Mr. Sergeant, of Pennsylvania, was then chairman, who, on the 31st of the same month, reported a resolution in the form of a concurrent resolution of the two Houses, which was referred to a Committee of the Whole House on the day next ensuing. No further proceeding appears to have been had therein during the remainder of that session of Congress.

On the 29th of November, 1820, the House of Representatives resolved itself into a Committee of the Whole House on the resolution reported from the Committee on the Judiciary at the preceding session, and, after consideration, reported it to the House without amendment: it was then ordered to be engrossed for a third reading. On the 30th of November it passed the House of Representatives, and was sent to the Senate for concurrence, who, on the 2d of March, 1821, agreed thereto, and, on the 3d of the same month, the resolution was approved and signed by the President of the United States.

It has been previously mentioned that abstracts of calculations relating to the longitude of the Capitol, in Washington, from Greenwich observatory, had been undertaken and prepared by the undersigned. Some time in the year 1815 he revised the original statement by another method of computation, assuming the ratio of 320 to 319 of the equatorial diameter to the polar axis of the earth; and having afterwards obtained observations founded on an occultation which happened in January, 1793, the result was calculated, and prefixed to those arising from an annular solar eclipse in September, 1811, and from an occultation in January, 1813; the data connected with which had been furnished him by the respective observers. These abstracts of calculations were printed in the

month of September, 1817, at the expense of their author: about six hundred and seventy copies of which (including five hundred transmitted to the two Houses of Congress) have been distributed in various sections of the United States and in Europe, that the results, with the data and process on which they were ascertained, might be *impartially* scrutinized by scientific persons competent to the task; and that, if any material errors should be discovered therein, they might be pointed out for correction. Although it will not be contended that data obtained with common instruments, inferior in their construction to those which may at this time be resorted to, could have been in every case *strictly correct*, the results contained in these abstracts of calculations furnish the best criterion within our reach by which those connected with subsequent observations that may be taken for the same purpose can be compared and tested. They are, therefore, with propriety, introduced as a part of this report, in the words, figures, and symbolic signs, or characters, following, to wit:

JANUARY 21, 1793.

Occultation of α ♉, (Aldebaran,) observed by Andrew Ellicott, Esq., supposed to have been at the Capitol, in the city of Washington.

Equal to 5*h.* 7*m.* 42*sec.* 02*dec.* in time.

It has been stated in the notes annexed to the printed copies of the foregoing abstracts, that "no corresponding observations at Greenwich have yet been received by which the errors of the lunar tables might be discovered and corrected. A variance in the results of the first and third observations of 19′ 6″ 03*dec.* probably arises from this cause. If a *mean* of both be taken, the result, = 76° 55′ 50″ 86*dec.*, nearly agrees with the last observation. The improved solar tables of M. Delambre, and the lunar tables constructed by M. Burg, have been used at Greenwich from the commencement of the year 1813. Such observations of occultations or solar eclipses as may hereafter be made in the city of Washington can therefore be relied on with greater certainty."

That errors still exist in the lunar tables, by which all calculations relating to a correct determination of the longitude may be more or less affected, will be proved by the remarks of the celebrated Dr. Maskelyne, formerly astronomer royal at Greenwich Observatory, in England, which state that "the error of Mayer's last lunar tables, as corrected from a series of Dr. Bradley's observations of nine years, by Mr. Charles Mason, in 1778, and M. de la Place's further corrections, being those made use of for the Nautical Almanacs of 1805, 1806, and 1807, probably never exceeding 30″, the uncertainty hence arising in the determination of the longitude can scarcely ever exceed seventeen miles of longitude, and generally will be much less." It must, therefore, be evident to all persons who are in any degree acquainted with the subject, that, when corresponding observations in Europe are not attainable, those which are taken in our own country should be often repeated, as the best method we can adopt to remove or lessen those errors.

The resolution of the two Houses of Congress, approved on the 3d of March, 1821, relating to this subject, is in the following words:

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the President of the United States be authorized to cause such number of astronomical observations to be made, by methods which may, in his judgment, be best adapted to insure a correct determination of the longitude of the Capitol in the city of Washington, from Greenwich, or some other known meridian in Europe; and that the data, with accurate calculations or statements, founded thereon, be laid before Congress at their next session."

In virtue of the powers vested in the President of the United States by this resolution, the undersigned was on the 10th day of April, 1821, "authorized and commissioned to make astronomical observations, by lunar occultations of fixed stars, solar eclipses, or any other approved method adapted to ascertain the longitude of the Capitol, in the city of Washington, from Greenwich, or any other known meridian in Europe; taking care to return the data, with accurate calculations or statements founded thereon, to him, [the President,] in time to be laid before Congress at their next session."

Conformably with the trust reposed in the undersigned by the Chief Magistrate of the Union, such arrangements were made as, in his judgment, were best calculated to insure its faithful discharge. The first was, to resign the station of an inferior clerk, which he had held for several years in the Pension Office of the War Department, from and after the 30th day of April; and to remove into the immediate vicinity of the Capitol, that his time and attention, detached from any other public business, might be devoted to the object connected with his new appointment. The use of suitable astronomical instruments and apparatus, and the choice of one or more skilful observers, were necessary to the progress and completion of the work. Such of those instruments brought into the United States from Europe for the special purpose of surveying our seacoasts, as were deemed most useful and convenient for the observations intended to be made, were obtained, on loan, from one of the Departments of Government, and conveyed to rooms in the south wing of the Capitol assigned for their safe-keeping and use, among which were a transit instrument, a circle of reflection, an astronomical clock, and a chronometer. Mr. William Elliot, well known in the city of Washington as a teacher of algebra and mathematics, was selected to make transit and other observations to determine the latitude as well as the longitude of the Capitol, to the nearest second of a degree, if practicable. In order to be prepared for correct transit observations, a meridional or north and south line was drawn by means of concentric circles, on a large platform, nineteen feet west of the original line through the centre of the building, marked by Mr. Andrew Ellicott, and its direction from one of the windows at the south wing verified with minute exactness by actual admeasurement, and by a comparison of distant objects. The propriety of testing the accuracy of the time-pieces by a series of observations to ascertain their gain or loss on *apparent* or *mean* time, before any calculations relating to the longitude were made, will not be questioned by persons in any degree acquainted with the subject. Among the best methods which could be used for this purpose, a choice was made

of alternate transits of the sun and of known fixed stars over the meridian, by which the daily rate of the astronomical clock was found with due precision; and, consequently, the apparent times of such transit observations as were taken to determine the longitude of the Capitol in the city of Washington may be confidently relied on. Objections to the results, if any should arise, will probably be on account of the reduction used in the process of the longitude on a *sphere* to that on an *oblate spheroid*, according to the ratio assumed in former calculations. The reason for applying it may be discovered by a reference to the explanatory remarks [No. 2] contained in this report.

Among the various methods which may be adopted for that purpose, the passage of the moon's centre over the meridian of the place deserves consideration, as inferior to none, and preferable to others more generally in use, particularly the angular distances between the sun and moon, or the moon and a fixed star. Mr. Brinkley, the principal astronomer at Trinity College, Dublin, strongly recommends this method, (or a modification of it, when compared with the transit of a fixed star,) as easy in practice, and capable of great accuracy, far beyond that from the eclipses of Jupiter's satellites. [See Vince's Astronomy, vol. 1. page 534.] It is subject, as other methods are, to inaccuracies, arising from errors which may still exist in the solar and lunar tables; and requires, as in eclipses of the sun, and occultations of fixed stars by the moon, the apparent time of the transit to be ascertained correctly to the nearest tenth of a second, at least. The number of observations of this kind which may be taken entitles the method to peculiar estimation. The results are found on a supposition that the form of the earth is a *perfect sphere*, and should be reduced, in every case, according to the *true* or spheroidal form, admitting the ratio of the equatorial diameter to the polar axis to be as 320 to 319. This reduction for the distance between Paris Observatory and the Capitol in Washington is 2*m.* 17*sec.* 91*dec.* of longitude, and between Greenwich and Washington, 2*m.* 13*sec.* 84*dec.* The difference of longitude of Paris and Greenwich, as ascertained by a *mean* result of the first two transits of the moon observed at our meridian, is 2*deg.* 20*m.* 11*sec.* 15*dec.*, equal to 9*m.* 20*sec.* 7433*dec.* in time.

It has been already stated in the introductory part of this report, that the latitude of the Capitol in the city of Washington had been ascertained to the nearest minute of a degree only, = 38° 53′ north. If greater accuracy was obtained from the observations of Mr. Andrew Ellicott, it is unknown to us, for we have no other evidence than the result recorded in the original plan of the city to decide upon it. The method adopted to ascertain the latitude to the nearest second has been by altitudes of the sun taken with the transit instrument on the passage of his eastern limb over the meridian at the south wing, sixty yards from the centre of the building. The sun's declination, in every instance, was found to the nearest tenth of a second, corrected by the equation of second differences; the *mean* refraction was also corrected by a proper allowance for the height of the barometer and thermometer. An example of the process of calculation will exhibit the manner in which all the results have been obtained.

	deg. m. sec. dec.
Mean of 22 observations, - - - - -	38 52 43 53
From the south wing to the centre of the Capitol, - - -	+ 0 1 77
Latitude of the centre of the Capitol to the nearest second, - - -	38 52 45 — N.

The foregoing *mean* result is believed to be a near approximation to the truth. As an additional evidence of it, the following observation was taken with a sextant accurately adjusted; the observers being careful to ascertain the times and the sets of altitudes with due precision.

On the 20th July, 1821, at 4*h.* 54*m.* 10*sec.* 2*dec.* P. M., apparent time, the true altitude of the sun's centre at the Capitol in Washington was found to be 25° 18′ 52″ 5*dec.*; the sun's declination, corrected, was then 20° 38′ 2″ north.

Here are two sides of an oblique angled spherical triangle, and the angle opposite to the sun's zenith distance given to find the third side, = complement of the latitude of the place.

	h. m. sec. dec.		*deg. m. sec. dec.*		
Horary angle, or time from noon, - -	4 54 10 2	=	73 32 33 0	cosine,	9.4522528
Sun's north polar distance, - - -	-	=	69 21 58 0	tangent,	0.4241768
Arc 1, - - -	-	=	36 57 23 7	tangent,	9.8764296
Sun's north polar distance, - - -	-	=	69 21 58 0	secant,	0.4529699
Sun's zenith distance, - - -	-	=	64 41 7 5	cosine,	9.6310255
Arc 1, - - -	-	=	36 57 23 7	cosine,	9.9025964
Arc 2, - - -	-	=	14 9 51 3	cosine,	9.9865918
Sum of arcs 1 and 2, - -	-	=	51 7 15 0		
			90 0 0 0		
Latitude, north, -			38 52 45 0		

In this case, the perpendicular falling within the spherical triangle supposed to have been constructed, the sum of arcs 1 and 2, = complement of the latitude.

For the longitude of the Capitol.

To determine its geographical position in this respect, recourse has been had to such methods as appeared to be best adapted to obtain an accurate result. No occultation of a fixed star by the moon has yet been observed. The solar eclipse which happened on the 27th of August, so far as relates to its beginning, has been taken into view, and an abstract of the calculation of our longitude from Greenwich will hereafter appear as a part of this report. The end of this eclipse could not be ascertained with sufficient accuracy, on account of clouds which covered the sun, and prevented the observers from deciding on the time with precision. Such transits of the moon over the meridian as were considered to be correctly observed have been calculated as follows:

JUNE 7, 1821.

Longitude from Greenwich, - - - - -							76 55 19 84

* The moon's right ascension and declination are computed in the French *Connaissance des Tems* to the nearest second of a degree, and in the British Nautical Almanac to the nearest minute *only*. A preference is therefore given to the former, because it saves the trouble of computing to the nearest second one or both of those elements from the moon's longitude and latitude, and the obliquity of the ecliptic, in every case where such calculation may be necessary.

† Answering to June 22, 5*h.* 35*m.* 30*sec.* 6*dec.* A. M., according to the common or civil reckoning of time.

The difference of longitude between the Observatories of Paris and Greenwich is stated in Garnett's Requisite Tables at 2*deg.* 20*m.*, and in the *Connaissance des Tems* for the present year, (1821,) at 2*deg.* 20*m.* 15*sec.* To ascertain this difference by the foregoing transits, the moon's right ascension to the nearest second has been computed from its longitude and latitude, and the obliquity of the ecliptic, as is given in the British Nautical Almanac; and a *mean* of the results found to be 2*deg.* 20*m.* 11*sec.* 15*dec.* = 9*m.* 20*sec.* 7433*dec.* in time, as follows:

Longitude from Greenwich, -	- - - -	76	55	26	74

The Connaissance des Tems for the present year (from what authority or source of information received from this country, or elsewhere, we are yet to learn) has stated the latitude of the city of Washington to be 38° 55′ 0″ north, and longitude from Paris Observatory 79° 19′ 0″ = 5*h*. 17*m*. 16*sec*. in time, west. We will suppose this longitude to be *correct*, and apply it to a determination of the result from the moon's transit last computed.

	deg.	m.	sec.	dec.
Apparent time of the moon's transit at Washington, in degrees, &c., - -	166	57	57	30
Corresponding time at Paris, allowing the longitude stated in the Connaissance des Tems, = 16*h*. 25*m*. 7*sec*. 82*dec*. Sun's right ascension then, - - -	113	3	3	77
Moon's right ascension at the time of the transit at Washington, - - -	280	1	1	07
Subtract the position C, - - - - - -	277	18	4	00
Difference of moon's right ascension, or increase from preceding midnight, - -	2	42	57	07

Corresponding time at Paris Observatory, = 16*h*. 25*m*. 7*sec*. 82*dec*.; at which time the moon's motion in right ascension for 12 hours was 7° 22′ 37″ 73697*dec*.

		sec.	dec.		
As moon's motion in right ascension for 12 hours, -	=	26557	73697	arith. comp. log.	5.5758089
To 12 hours of time, - - -	=	43200		- log.	4.6354837
	deg. m. sec. dec.				
So - - -	2 42 57 07 =	9777	07	- log.	3.9902087
	h. m. s. dec.				
Time from midnight, - -	4 25 3 81 =	15903	81	- log.	4.2015013
Add - -	12 0 0 00				
Time at Paris, - -	16 25 3 81 approximated.				
Transit at Washington, - -	11 7 51 82				

		deg.	m.	sec.	dec.
Longitude, in time, - -	5 17 11 99 - Equal to -	79	17	59	85
Reduction, -	- - - - —	2	17	91	
Longitude from Paris Observatory, (320 to 319,) approximated,	- - -	79	15	41	94
Paris east of Greenwich, - -	- - - - —	2	20	11	15
Longitude from Greenwich, approximated,	- - - -	76	55	30	79

If we repeat the process, assuming the approximated time at Paris Observatory, = 16*h.* 25*m.* 3*sec.* 81*dec.*, we shall have the sun's right ascension = 113*deg.* 3*m.* 3*sec.* 60*dec.*; the moon's right ascension at the time of the transit at Washington, = 280*deg.* 1*m.* 0*sec.* 90*dec.*; the increase of moon's right ascension from the preceding midnight, = 2*deg.* 42*m.* 56*sec.* 90*dec.*; and the moon's hourly motion in right ascension, = 36*m.* 53*sec.* 13468*dec.*; hence, the *corrected* time at Paris Observatory, corresponding with the apparent time of the transit at Washington, is found to be 16*h.* 25*m.* 3*sec.* 614*dec.*; from which the time of transit at Washington being subtracted, gives 5*h.* 17*m.* 11*sec.* 794*dec.* in time, equal to 79*deg.* 17*m.* 56*sec.* 91*dec.*, the longitude from Paris Observatory, *corrected;* the reduced longitude, (320 to 319,)′ = 79*deg.* 15*m.* 39*sec.*; and the longitude from Greenwich 76*deg.* 55*m.* 27*sec.* 85*dec.*

Mean result—Longitude from Greenwich, by solar eclipse, (320 to 319,)						- -	76	55	30	45

The statement received from Mr. William Elliot, the observer herein alluded to, relating to this eclipse, dated the 31st of August, 1821, of which the following is an extract, will justify the admission of the foregoing calculations as a part of this report:

"From corrections which I have been able to make, I find that the times of the beginning and end of the solar eclipse of the 27th instant, as given to you, and published in the newspapers of this place, were erroneous. The commencement was August 26, about 19*h*. 22*m*. 4½*sec*. in time. On account of clouds, the end of the eclipse was not properly observed.

"There seems to be much difficulty in observing accurately the beginning of an eclipse of the sun, because a sensible indentation must be made on the disc before it is certain that the eclipse has commenced; and this, of course, must require *some time*, which must be allowed for in the calculation. The *end* could be ascertained with greater precision, because the observer is prepared by constantly watching the progress of the eclipse to the end.

"An occultation of a fixed star by the moon can be much better observed than an eclipse; for, by means of a good glass, the approach of the moon is easily seen, and the instant of the immersion may be determined to the nearest second of time.

"WILLIAM ELLIOT."

The method of determining the longitude by transits of the moon over the meridian being entitled to a preference, on account of the number of observations, and the accuracy with which they may be made, and having been principally resorted to since the passage of the resolution of Congress of the 3d of March, 1821, for the purpose of carrying the same into effect, some explanatory remarks relating to this method are proper to be submitted, that its claim to future attention and practice, by the scientific part of our community, may be fully understood.

It is an object of primary importance that the apparent time, in each case, be correctly obtained by transits of the sun, and of some fixed stars, taken alternately,† that the error of the clock, or other time-piece, may be accurately ascertained. In the use of the transit instrument, it should be examined immediately before the observation

* Astronomical reckoning, answering to September 22d, 9*h*. 25*m*. 59*sec*. 65*dec*., A. M.

† The apparent time, thus obtained, may be depended upon for its accuracy; when recourse cannot be had to those transit observations, equal altitudes of the sun, corrected by the proper equations for the latitude of the place, and the sun's declination, may be used with advantage in other methods.

is made, and be placed correctly in the meridian by means of the adjusting screws attached thereto; this course of proceeding ought to be uniformly attended to, for a slight deviation from the meridian will sensibly affect the longitude. It is also material that the interval of time of the passage from the eastern or western limb to the moon's centre be found with due precision. This interval will change according to the variation in the moon's right ascension for twelve hours, the increase or diminution of its apparent semidiameter, and the declination from the equator. In some astronomical works, particularly those published by Messrs. Mackay and Garnett, tables are given to find the interval; but it may always be obtained with greater accuracy by the following rules:

Reduce the variation in the moon's right ascension* for the twelve hours during which the transit may happen, into time; add it to twelve hours, and call the sum, in seconds, A.

Let the moon's horizontal semidiameter, corrected for the augmentation arising from the apparent altitude, and diminished by 3*sec.*, as an allowance for the inflection of light, be reduced to seconds, and called B.

To the constant logarithm 4.1884250, add the logs. of A and B, and the log. secant of the moon's declination, computed strictly to the nearest second at the time of the transit; the sum of these four logarithms will be the log. of the moon's semidiameter in time, or the interval in seconds and decimal parts of the passage from the eastern or western limb to the moon's centre.

EXAMPLE I.

Let the variation in the moon's right ascension for twelve hours be 7*deg.* 16*min.* 45*sec.;* the semidiameter, corrected, 16*min.* 8*sec.* 4*dec.*; and the declination 18*deg.* 37*min.* 25*sec.* south. Required the interval of passage from the eastern limb to the moon's centre?

Interval of passage,	1 1 799 =	61 799	log.		- 1.7909803

The interval thus obtained is to be added to the time of transit of the western limb, and subtracted from that of the eastern limb, to find the correct time of passage of the moon's centre over the meridian. If irregularity be discovered in the motion of the clock or chronometer, the equation arising from a *mean* of second differences ought to be applied to ascertain its daily rate of loss or gain.

Eclipses of Jupiter's satellites present to us another method to determine the longitude. Dr. Maskelyne, formerly astronomer royal at Greenwich, in a communication relating to the transit of Venus which happened on the 3d of June, 1769, thus remarks: "In like manner as in observing the eclipses of Jupiter's satellites, the immersion or emersion shall often seem instantaneous, or nearly so, equally to two observers in distant places, and yet the absolute times of the observations may differ a minute of time or more from each other, owing to the difference of telescopes, weather, or other circumstances." [See Transactions of the American Philosophical Society, vol. 1, page 106.] If there be such uncertainty in the use of this method, it cannot be among the *most approved.* It is true that a great number of observations might, and probably would, tend to lessen the errors; but, notwithstanding the facility with which the results may be obtained, their accuracy cannot always be depended upon. Angular distances of the sun and moon, or of the moon and a fixed star, from the difficulty, if not impracticability, of observing those distances sufficiently exact, are *less* entitled to consideration, except at sea, where a deviation of fifteen or twenty minutes from the truth is said to be sometimes little regarded. It will be recollected that an error of one minute in space will affect the longitude thus found at least nine-twentieths of a degree; for, as 13*deg.* 10*min.* 35*sec.*, the moon's daily motion in her orbit, at a *mean* rate, is to the whole circle, or 360*deg.*, so is one minute to 27*min.* 19¼*sec.* of longitude. If those distances, taken with the best instruments now in use, placed in the hands of the most expert observers, are not generally true to 20 or 30 seconds, the propriety of adopting this method on land, where great accuracy in the results may be required, is much to be questioned.

In ascertaining the longitude by transits of the moon over the meridian, as well as by solar eclipses and occultations of fixed stars, it is advisable to assume a near approximation to the true distance of the meridians for which the calculations may be made, to avoid unnecessary repetitions of a tedious process. This method has been uni-

* This variation in right ascension for twelve hours should be computed by the method of interpolation from successive differences, for the precise time at which the transit happens, to insure greater accuracy in the result.

formly pursued to obtain the results hitherto found: much labor must be encountered, without the smallest advantage to be derived in point of accuracy, by the adoption of a different course of proceeding. The *approximated* longitude may be either previously known, or determined sufficiently exact, by one or two of the first observations.

It being suggested, soon after this transit was observed, that our meridian, or north and south line, was so far incorrect as to affect, in a material degree, the results of all the transits of the moon which had been calculated; and this intimation coming from a quarter that entitled it to particular attention, it was determined to suspend all further observations until the accuracy of the line should be satisfactorily proved by offsets at several stations taken at right angles with the original line drawn by Mr. Andrew Ellicott. This was done on or about the first day of October; and, from the admeasurements, made with great exactness, it appeared, by the transit instrument, which was removed from its place, that the signals made use of were perfectly in a range, and no sensible deviation could be discovered. We have, therefore, just reason to conclude that the line was correctly drawn; and no allowance for error, in the slightest degree, is necessary to be made in *all* or *any* of the results ascertained by means of the moon's transits over our meridian.

On the 10th of October, the immersion of Jupiter's first satellite was observed at the Capitol in Washington. The computed *mean* time of this eclipse at Paris Observatory, as stated in the French *Connaissance des Tems*, was at 14*h.* 25*m.* 28*sec.*; and at Greenwich, (*Naut. Alm.*) at 14*h.* 15*m.* 54*sec.*; making the difference of those meridians = 9*m.* 34*sec.* in time, or 2*deg.* 23*m.* 30*sec.* of longitude: this is 3*m.* 15*sec.* more than has been given in the first mentioned ephemeris for the present year, (page 184,) and 3*m.* 18*sec.* 85*dec.* greater than it has been found by calculations contained in this report. The errors to which this method is subjected, arising, principally, from the immense distance of that planet and its satellites from the earth, have hitherto prevented recourse being had to it, when other methods capable of superior accuracy could be used. The time at Washington was obtained by a watch, compared with the astronomical clock immediately before and after the immersion,

		h. *m.* *sec.* *dec.*
Which happened at - - - - - -		9 18 30 00
Watch fast for *mean* time, - - - - - - -	—	10 53 45
Mean time of the immersion at the Capitol, - - - -		9 7 36 55

This subtracted from 14*h.* 25*m.* 28*sec.* and 14*h.* 15*m.* 54*sec.*, respectively, leaves 5*h.* 17*m.* 51*sec.* 45*dec.*, = 79*deg.* 27*m.* 51*sec.* 75*dec.*, the longitude from Paris Observatory; and 5*h.* 8*m.* 17*sec.* 45*dec.*, = 77*deg.* 4*m.* 21*sec.* 75*dec.*, the longitude from Greenwich; showing a variance too material, when compared with the results obtained by transits of the moon over our meridian, to admit it to be incorporated with them.

On the 2d November, the altitude of the sun's eastern limb was taken with the transit instrument, and found to be 36° 36′ 30″, the error of the instrument — 1′ 50″ = 36° 34′ 40″, the correct observed altitude of the upper limb; hence, the meridian altitude of the sun's centre was = 36° 17′ 26″ 2*dec.*; the sun's declination, allowing the equation arising from second differences, being then 14° 49′ 50″ 7*dec.* south, the latitude of the south wing of the Capitol, by this observation, is 38° 52′ 43″ 1*dec.* north. This is additional evidence that the latitude of the centre of that building, as heretofore ascertained and recorded in this report, = 38° 52′ 45″ N. has been determined with sufficient accuracy to the nearest second of a degree.

In Dr. A. Mackay's Treatise on the Latitude and Longitude, vol. 1, pages 196, 197, the method of determining the longitude by transits of the moon over the meridian is strongly recommended by himself, and others to whom he alludes, particularly Mr. Pigott, who states, in the British Philosophical Transactions for the years 1786 and

1790, his conviction "that, in a short time, it must be universally adopted, having every advantage over Jupiter's first satellite, and but little inferior in precision to occultations." It is worthy the ingenious research of eminent practical astronomers to devise and investigate rules for reducing the longitude on a *sphere* to that on a *spheroid*, according to the ratio of 320 to 319, or any other which may be more approved and generally adopted. If this reduction, in all cases, be correctly found and applied, it is not perceived that any method whatever has the advantage of superior accuracy. It is known that solar eclipses, and occultations of fixed stars by the moon, visible at any particular place on the earth, do not often occur; whereas observations of the moon's transits over the meridian may be frequently resorted to. The only reason which can, with propriety, be given for a preference of the former to the latter, is, that, in the process of calculation, the latitude of the place, and the moon's equatorial horizontal parallax, are reduced according to the *true* or *spheroidal* form of the earth, and, consequently, that the results obtained by those methods are considered, on that account, to be more correct. It has been proved, by repeated trials, that the apparent time may be found with greater precision by alternate transits of the sun and of known fixed stars over the meridian, than by any other experiment which can be made for that purpose; and if the truth of this remark be admitted, it is equally certain that the precise instant of time by a clock or chronometer, of the passage of the moon's western or eastern limb, can be determined with as much accuracy as that of the immersion and emersion of a star, or the beginning and end of an eclipse of the sun.

A transit instrument furnished with a circle of altitude is, perhaps, among the best that can be invented for an accurate determination of both the latitude and longitude of any place on the earth. In our climate, especially in the heat of summer, the sun's rays operate so powerfully upon the instrument, as materially to affect the level during the time necessary to make an observation for the latitude: the instrument should, therefore, be immediately restored to its level, and the error ascertained, which must be applied according to its affection + or —, to obtain the observed altitude of the sun's upper limb. When a sufficient number of experiments shall have been made, this error, if not allowed for, will be lessened, if not entirely removed; for if the latitude be found *too great* by some observations, it will be *less than the truth* by others, and a mean result may be depended upon as sufficiently correct. In observing the transits of fixed stars to ascertain the apparent time, our instrument was never known to vary from its level, in the slightest degree.

The most accurate method of fixing a transit instrument, in northern latitudes, is by placing several posts or signals, to which lanterns are attached, at remote distances, and in an exact range with Alioth, when it is directly above or below the pole star; for then the latter will be on the meridian of the place of observation. Another method is, to find the apparent noon by equal altitudes of the sun, corrected by the proper equations for the latitude and sun's declination, and compare the time by the clock or chronometer corresponding thereto with that shown by the meridian mark: let a temporary mark or signal be set up, ranging as nearly as may be with the sun's centre at the corrected time, which position may be obtained with tolerable accuracy by means of concentric circles drawn on a large platform. Repeat the observations, and remove the temporary mark, until it shall be found exactly in the meridian; it may then be taken away, and the stone, or other permanent meridian mark, set in its place.

In closing this report, it will not be improper to remark, that the unfavorable state of the atmosphere, and the sickness of the observer and his family at other times, rendered it impracticable to avail ourselves of more transit observations, which might otherwise have been made; and that before the next lunation, or the time when the moon will be again in suitable positions for such observations to be repeated, the rooms in the south wing of the Capitol, where the instruments are now deposited, must be given up to prepare for the reception of Congress or their committees. A statement of the longitude of the Capitol in the city of Washington from the Observatories at Paris and Greenwich, as deduced from all the observations which have been made, admitting the ratio of 320 to 319, of the equatorial diameter to the polar axis of the earth, is, therefore, exhibited, as follows:

RESULT OF ALL THE OBSERVATIONS.

	From Paris Obs'y.	From Greenwich.
	deg. m. sec. dec.	*deg. m. sec. dec.*
Prior to the 3d March, 1821,	79 15 41 46	76 55 30 31
Transit observations,	79 15 42 00	76 55 30 85
Solar eclipse of August 27, 1821. (Mean of two methods,)	79 15 41 60	76 55 30 45
Mean result,	79 15 41 69	76 55 30 54

The near agreement of the result of the foregoing transit observations with that formerly obtained by the *most approved* methods was not expected at the commencement of our operations, nor would it probably have occurred had not the error of the astronomical clock for apparent time been ascertained with great precision by alternate transits of the sun and of fixed stars, whose right ascensions and declinations have been accurately obtained. The rule given in this report to compute the interval of time of the passage from the eastern or western limb to the moon's centre, known to be founded upon correct principles, has also been essentially useful to determine that interval in every case in which it has been applied, from the 9th of July to the 1st of November; previously to the time first mentioned, the tables contained in Garnett and Mackay's astronomical publications were used for that purpose. It is likewise to be understood that such observations as were doubtful as to the time shown by the clock have been invariably rejected, and none but those which have been well taken, and ought to be depended upon, have been admitted. If, notwithstanding all the care that has uniformly directed the process, errors sensibly affecting the result herein contained should be discovered, it is hoped that they will be pointed out with candor by such scientific persons *alone* as are fully competent to the task.

The greatest variance in the results, as above stated, allowing 94,806 yards to a degree of longitude in our latitude, is 14 yards, 0 feet 8 inches; from which, if we deduct 19 feet, the distance at which the transit instrument was fixed west of the centre of the Capitol, we shall have 7 yards 2 feet 8 inches. If we compare the mean result of all the observations with that which has been recorded in the abstracts of calculations heretofore furnished the two Houses of Congress, and allow the same deduction, the variance nearly vanishes, and does not amount to 11 inches of our admeasurement. If we admit the difference of the meridians of Paris and Greenwich to be 2° 20′ 15″, as stated in the Connaissance des Tems for the present year, instead of 2° 20′ 11″ 15*dec.* applied to the results of the transit observations which have been made, the variance would still be less than the length of the Capitol in the city of Washington, viz: 120 yards. Under all the circumstances in which the foregoing result can be viewed, allowing a small error to have been committed in ascertaining the reduction of longitude from a *sphere* to a *spheroid*, according to the ratio of 320 to 319, and to the distance of the meridians of Paris and Washington, it is not believed that it differs one quarter of a minute of longitude from the truth.

The President's House is stated to be N. 70° W. one mile and a half and 50 feet, or 7,970 feet, from the centre of the Capitol. If this statement be correct, the difference of latitude and longitude from the latter, allowing 69.2 of our miles to a degree of latitude, may be thus determined:

	sec. dec.

Difference of longitude,	+ 1 34 79	+ 1 34 79
Longitude of the President's house,	79 17 16 48 W.	76 57 5 33 W.

The geographical position of the President's house, as above stated, is given as a near approximation. It may hereafter be ascertained with greater certainty.

It has been considered the duty of the author of the calculations originally made, in justice to the American community, as well as to his own feelings and character, to exhibit to the members of the seventeenth Congress a detailed statement of such proceedings as are explanatory of, or connected with, the plan proposed for the establishment of a first meridian for the United States at the city of Washington. The legislative and executive authorities of the National Government will decide on the utility or inexpediency of erecting an observatory, and furnishing it with suitable instruments and apparatus. Without such an institution, the right ascension, declination, longitude, and latitude of the moon, planets, &c., cannot be ascertained with sufficient accuracy; and any attempt

to compute a Nautical Almanac, or Astronomical Ephemeris, for ourselves, would be futile, if not preposterous. Until an observatory be erected and furnished, we shall be compelled to rely on the labors of scientific men in Europe for the elements necessary to be used in our astronomical calculations; and it never can be in the power of a few individuals in this country, however laudable and persevering their exertions may be, to remove or lessen that dependance on foreign nations, if they do not meet with adequate encouragement and support.

All which is respectfully submitted.

WILLIAM LAMBERT.

To the PRESIDENT OF THE UNITED STATES.

SUPPLEMENTARY REPORT.

To the House of Representatives of the United States: WASHINGTON, *March* 12, 1822.

I lay before the House of Representatives the copy of a supplementary report, made by William Lambert, in relation to the longitude of the Capitol from Greenwich, in pursuance of a joint resolution of the two Houses of Congress, of the 3d of March, 1821; and I subjoin an extract from the letter of Mr. Lambert submitting that report.

JAMES MONROE.

Extract of a letter from Mr. William Lambert to the President, dated

WASHINGTON, *March* 7, 1822.

I have the honor to enclose a supplementary report in relation to the longitude of the Capitol from Greenwich, embracing all that could be expected or done by me to promote the national object of establishing a first meridian for the United States at the seat of their Government. When I inform you that a great part of the elements furnished only in abstract have been found by three and sometimes four rules in oblique angled spherical trigonometry, it is presumed you will readily agree with me in opinion that, if all the process had been recorded, necessarily used to ascertain those elements, instead of eighty-one printed pages, there would be at least five hundred. How this labor has been estimated, it is needless for me to state; when, and in what manner, these exertions will be compensated, does not depend on me.

SIR: CITY OF WASHINGTON, *March* 7, 1822.

Major Isaac Roberdeau and Mr. William Elliot, who attended at the Capitol to observe the solar eclipse which happened on the 21st of February last, have furnished a statement, by which the apparent time of the beginning is ascertained to have been at 2*h*. 56*m*. 0*sec*. P. M. Although the data, for want of a sufficient number of observations to correct the error of the chronometer, is not believed to be *strictly accurate*, it is considered to be the duty of the undersigned to submit an abstract of the calculation in a supplementary report. It has been represented that some obstacles intervened to prevent the end of the eclipse being observed with due precision; and it may be proper to remark that, upon testing the time furnished as such by the process usually employed for that purpose, the result ought not to be incorporated with others founded on a series of observations taken with great care, and in which the error of the time-piece, in every instance, has been ascertained with scrupulous attention and minute exactness. It is probable that the *correct* apparent time of the beginning of this eclipse at the Capitol was about 2*h*. 55*m*. 58*sec*. P. M.

Abstract of the calculation to ascertain the longitude of the Capitol in the city of Washington from Greenwich Observatory in England, by the beginning of the solar eclipse on the 21st February, 1822.

By method I, - - - - -	76 55 4 35
Mean result of the two methods, - - - - -	76 55 10 05

In justice to the exertions and disposition manifested by the observers herein named, it is proper to remark, that the unfavorable state of the atmosphere for several days immediately preceding that on which the eclipse happened, precluded a series of observations to correct the error of the chronometer, by repeated experiments necessary to produce a more accurate result than the one now submitted.

WILLIAM LAMBERT.

To the PRESIDENT OF THE UNITED STATES.

17th CONGRESS.] No. 509. [1st SESSION.

UNIFORM SYSTEM OF BANKRUPTCY.

COMMUNICATED TO THE SENATE JANUARY 10, 1822.

To the Senate and House of Representatives of the United States in Congress assembled: The Chamber of Commerce of the city of Baltimore respectfully present their opinion in favor of a uniform system of bankruptcy:

Such a system is naturally incident to every commercial community; it results necessarily from the rights and fluctuations of property, and seems to be an essential attribute of active and humane society. All enlightened nations, even those not so vitally mercantile as the United States, have given this shelter to the debtor, and this assurance to the creditor. But it is now absolutely adjudged that no such protection can be administered by the limited sovereignty of the States; and, while the federal authority affords no resource, the grievance of our privation is universally severe. Hence it is that we desire to awaken that constitutional power with which you are invested, and which has so long been dormant. While we solicit from this power a uniform system of bankruptcy, to it we ourselves submit the interests of our diversified commerce, the diligent spirit of our enterprise, and, more than all, the pervading cause of individual happiness. A process of bankruptcy not only intercedes for the debtor, but, since it may be brought into action at the creditor's instance, it also empowers the creditor to limit the indiscreet adventure and wasteful progress of the debtor, and, in furnishing this scrutinizing control, it strengthens the security of contract.

But, independently of this consideration, so important to the confidence on which commercial intercourse relies, the relief which it yields to the debtor is not only sanctioned but commanded by every civilized feeling and every principle of social justice. Without such a resource, humanity may be violated by the creditor, and trust abused by the debtor; with claims which beset his existence, his industry is fearfully circumscribed, and his enterprise expires; the public good loses the benefit of a free industry and while the debtor is kept in this slavery to obligations, the creditor's claim, severely as it may press, presses fruitlessly.

Various insolvent systems prevail throughout the United States. Our domestic commerce is extensive, and our population has a migratory spirit; these systems reflect so many various lights and contingencies on the transactions within the scope of our domestic trade, and are so many contentious embarrassments to it. But a uniform system of bankruptcy would regulate and identify all these United States; it would give a permanent boundary, a definite guide and appeal to the creditor; and, to consummate its excellence, it would give peace and zeal to the debtor in his poverty, after passing through the watchful investigation of the law. The mere certainty of law is always important, and often more so than the choice of any particular provisions of its enactment; and as all the intercourse of society is so much prompted and affected by pecuniary views and relations, an ascertained and general system of bankruptcy would tend to give to this country an actual union of confidence as much as any measure within your legislative power.

In the name of the debtor and of the creditor, in behalf of the national good, and in vindication of the national humanity, we solicit this benefit of the constitution of the United States: in that safeguard the debtor will find his home, and thence that the defined privileges of the creditor must be expected.

And we will ever pray, &c.

In behalf of the Chamber of Commerce.

ROBERT GILMORE, *President.*

WILLIAM COOKE, *Secretary.*

DECEMBER 18, 1821.

17th Congress.] No. 510. [1st Session.

CONTROVERSIES BETWEEN STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 15, 1822.

Whereas controversies exist between the States of New Jersey and New York, and of New Jersey and Delaware, concerning their respective boundaries: and whereas the constitution of the United States has declared that the judicial power of the General Government shall extend to controversies between two or more States, thereby providing for the legal settlement of disputes which might otherwise endanger the peace and safety of the Union: and whereas Congress have hitherto omitted to carry into effect the wise and salutary provisions of the constitution for that purpose, by vesting adequate powers in the courts of the United States: therefore,

Resolved by the Council and General Assembly of this State, That our Senators and Representatives in Congress be requested to use their endeavors to procure the passage of a law for the decision of territorial or other controversies between States, in such manner as is authorized by the constitution of the United States.

Resolved, That his excellency the Governor be requested to transmit copies of the foregoing preamble and resolution to each of our Senators and Representatives in Congress, to be by them laid before their respective Houses.

HOUSE OF ASSEMBLY, *November* 27, 1821.

These re-engrossed preamble and resolutions having been read in the House, *Resolved*, That the same do pass.

By order of the House,

DAVID THOMPSON, JUN., *Speaker.*

COUNCIL CHAMBER, *November* 27, 1821.

These re-engrossed preamble and resolutions having been compared in the Council, *Resolved*, That the same do pass.

By order of the Council,

ISAAC H. WILLIAMSON, *President.*

17th Congress.] No. 511. [1st Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 15, 1822.

SIR: TREASURY DEPARTMENT, *January* 14, 1822.

In obedience to a resolution of the House of Representatives of the 20th of December last, directing the Secretary of the Treasury to lay before that House "a copy of the report made by the commissioners appointed to view and inspect the Cumberland road," I have the honor to submit the said report, plat of survey, and field notes, recently forwarded by the commissioners to this Department.

The originals are transmitted because much time would be taken in copying them. It is, therefore, respectfully requested that they may be directed to be returned when no longer necessary to the object for which they have been required.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

The Hon. SPEAKER *of the House of Representatives.*

SIR: WHEELING, VA., *January* 2, 1822.

To show the progress made in the location of the western road, the commissioners appointed for that purpose, in addition to their former report, make the following:

The draught of the work, and the book of field notes accompanying this report, will, on examination, be found to explain the nature and extent of the services performed by the commissioners, and leave but a few facts and explanations necessary in a formal report.

When the bill which passed the Senate of the United States at the last session, proposing a modification of the law under which the commissioners were appointed, had failed in the House of Representatives, as they were informed, for want of time to consider it, the commissioners were at some loss to judge in what manner it was their duty to proceed, keeping in view the objects for which they were appointed. The law, as proposed to be modified, made Columbus, and the other seats of Government, points in the location; and the commissioners have already stated that, under the law as it now stands, they, in all probability, could not be embraced. In this situation, they considered it expedient, with the balance of the appropriation in their hands, to prosecute the location as far as the Muskingum river at Zanesville, believing it highly probable that, whether the law were modified or not, from the nature of the country on both sides of that river, a point at or near that place must be selected at which to pass the stream; and, also, that their labors must be ultimately bestowed on this ground, whatever might be the points fixed or agreed upon westward of it. They have, therefore, employed their time, until the appropriation became

expended, between Wheeling and Zanesville, a distance of about eighty-one miles on the present travelled road. The ground throughout the entire distance is very hilly and broken; the principal streams run nearly at right angles with the course of the location; and the hills bordering those streams have to be passed in a lateral direction, and making a considerable angle with the general direction of the location, otherwise a descent and ascent sufficiently gentle could not be had. Several of the larger streams crossed by the location fall into the Muskingum river above Zanesville, run a great distance generally in an opposite direction to that river, and are sluggish, with little or no fall, pursuing a crooked course, and are often obstructed by rafts of drift-wood that assist, particularly in spring floods, in throwing the water to the depth of several feet upon the bottoms, that are frequently of considerable width, and of a rich alluvion soil. Hence it is found difficult, except in particular places, to cross the bottoms and streams without incurring great expense in bridges and causeways. Another difficulty to be overcome in locating a road through this tract of country arises from the nature of the ground itself; this should be mentioned, because a peculiarity in some measure confined to the western country. The substratum, particularly on the sides of hills, is generally a lime or rotten slate stone. The superstratum, of different depths, consists of the decomposition of the one below, combined with the decayed vegetation on its surface. This seems to be continually increasing, until its accumulated weight, with a growth of heavy timber, is too great to be held together by its own tenacity, and, in the spring seasons particularly, the surface of the hill sides are found sliding into the valleys below, or stopping in their course where the ground becomes more level. These landslips (as they are called) become more frequent after the ground is cleared and cultivated than before, owing, perhaps, to the decay of the roots that before assisted in keeping the ground together. The necessity of avoiding ground of this nature is obvious; for, if a road be made on a side hill where the ground is of this description, the support is cut off by the road, and the surface, perhaps charged with trees and rocks, will force itself upon the road and destroy it. Ground subject to these accidents may generally be discovered; for, although the slips be ancient, and trees many hundred years old are seen standing, yet its broken and distorted surface discovers the anarchy it has once undergone.

Hence, it will be easily seen that, through a country where so many difficulties present themselves, great care must be taken before a location can be said to approximate to perfection; and such a one the commissioners have been anxious to make, believing that the erroneous location of a road, designed for permanent national purposes, would be worse than a useless expenditure of public money; for as the location must be made the basis of all future contracts for constructing the road, if left imperfect, the Government would either have to be at the expense of a new location, or make the road on the old one; and, in the latter case, the public would probably be at the inconvenience of occupying it for a great length of time without attempting an alteration.

In finding the best ground on which to locate a road between any two given points over a rough country, the mode of procedure to obtain, in the first instance, a correct delineation of the surface, by topographical surveys, of the region to be examined, would be too tedious and expensive; there remains, therefore, no other way but by repeated experiments (many of which will be found unsuccessful) upon the ground, and by laying down and comparing different routes, until, by such examination, you arrive at the fact. Such an examination the commissioners have endeavored to give the ground between the points mentioned. They do not pretend to say that the route represented as the shortest is brought to that state of perfection which is practicable; some necessary trials yet remain to ascertain whether better ground cannot be had, and the distance diminished; but the labor, it is thought, will be inconsiderable compared with what has been bestowed the last summer. The routes have all been graded at an angle of not exceeding 4½ degrees with the horizon, with the exception of 123 chains 28 links, (see the book of notes, pages 1, 17, and 18.) The distance from Wheeling to Zanesville has been shortened from the State road at present travelled about five miles.

The commissioners would remark that, from the knowledge they have of the country west of the Muskingum river, the difficulty of making a location will considerably diminish. The surface of the earth is, in general, gently undulating, and the highlands bordering the largest streams are much less elevated. But the probability is, that, in some considerable part of that region, a difficulty in procuring stone convenient for a turnpike will be experienced; but pebble or gravel was discovered in some places, of excellent quality, a small depth below the surface. Between Wheeling and Zanesville, but little difficulty, they apprehend, will be found in procuring stone for the road.

The commissioners would further observe, that that portion of the national road between Uniontown and Washington, Pennsylvania, including about thirty miles, was contracted for in the year 1819, and since completed, including mason work and other expenses, for $6,400 per mile. Taking into view the scarcity of money in circulation, and the reduced price of labor and provisions, they have no hesitation in saying that the probability is that the road between the Ohio and the Muskingum rivers, including culverts and bridges, with stone arches, could, at the present time, be contracted for, and completed in a similar manner, for a much less sum.

On the subject of the appropriation, it is proper to state that the expenditures have exceeded it by a small amount; the surveyor and assistants have, however, been paid.

A. LACOCK,
DAVID SHRIVER, Jun.
WILLIAM McREE.

To Wm. H. Crawford, *Secretary of the Treasury.*

17th Congress.] **No. 512.** [1st Session.

CANAL BETWEEN THE ALABAMA AND HIWASSEE RIVERS.

COMMUNICATED TO THE SENATE JANUARY 22, 1822.

To the honorable the Senate and House of Representatives of the United States in Congress assembled: The Senate and House of Representatives of the State of Alabama respectfully represent:

That the State of Alabama, along with the other sections of the Union, has, for some time past, experienced its full share of the consequences which have followed the general derangement of the commerce of the United States, and the great depression in the value of the products of agricultural industry throughout our com-

mon country; that, in addition to this depression in the value of the staple production of that part of the Union, embracing the whole State of Alabama, they have felt the additional calamity, for years past, of the best efforts of their industry being partially destroyed throughout a large portion of the State, by a cause which no human sagacity could foresee or prevent; that, in addition to these depressing circumstances, the necessity of paying the United States for their lands has exhausted their moneyed capital, and left them so far without resources as not to be enabled for the present to avail themselves of those natural and artificial advantages their section of country possesses, as one efficient means of regaining their former prosperity.

That, relying on the liberal and enlightened policy of the Government of the United States, and the belief that it is the guardian of the general prosperity, they feel a strong confidence that whatever object can be made appear to the General Government to be productive of extensive good to any portion of the Union, it will receive its fostering hand, and claim and secure as full a share of the national liberality as is commensurate with the protection which the Government of the Union owes to its several sections of country; that amongst those natural advantages to which the State of Alabama has a just claim, that of streams, valuable for internal navigation, stands pre-eminent; that, amongst other important and valuable streams, running through almost the whole extent of the State from north to south, the Alabama river claims the first regard; that this river commences, and becomes capable of affording a facility to water transportation, within eight to eleven miles of a stream equally susceptible of being rendered navigable, emptying into the Tennessee river, and which latter stream receives the tribute of several others which take their rise, and become navigable, in the State of Virginia, passing through some of its most productive lands, and watering, in their course, the whole eastern section of the State of Tennessee; that it is satisfactorily ascertained that the dividing ground separating those waters affords a more than usually favorable opportunity of connecting them by canal navigation; that the canal would connect the waters of the Alabama with the Hiwassee, a principal branch of the Tennessee, and which empties into the latter below the junction of six navigable rivers; that the distance then required for the produce of Tennessee to find a market on the seaboard would be reduced from nearly two thousand miles to New Orleans, to six or seven hundred to Mobile; that the great saving to the agriculturists of that valuable, productive, and extensive section of country, in expenses of transportation, would enable them not only to obtain a fair price for their labor, but would hold out an actual encouragement to agricultural industry, by placing them on an equally advantageous ground, as regards a market, with the most favored interior of the United States; that instead of the present equally tedious and hazardous route to a market, to which the citizens of Tennessee and part of western Virginia are now subjected, and which requires months to perform, a few days by the contemplated one would find them on the seaboard, and by a route entirely freed from the difficulties and dangers which the immense losses that have been made on the Mississippi prove that immense watercourse subject to; that a large amount of the most valuable articles for commercial exportation would be raised and sent to market from the before-mentioned extensive section of country, which now is not attempted to be raised, in consequence of the present tedious and expensive route of transportation to a market; that many manufactures, and, to a large amount, of first necessity, especially those of iron, hemp, flax, &c., for which the State of Alabama is now tributary to a foreign market, would be produced by the labor of the citizens of the before-mentioned States, and for which those States are eminently calculated; that the expenses of transporting all species of provisions to the seaboard or place of shipment would be so far reduced that the flour, beef, pork, fruit, &c. of the interior of our country could be exported to a foreign market, and the citizens become fully remunerated for their labor and industry; that, by opening new and extensive markets to the manufactories of our country, we thereby make a valuable addition to our national independence of foreign supplies; that the States of Tennessee and Virginia abound in, and are productive of, many of the raw materials, the basis of the most valuable manufactories, which the plentifulness of provisions, dense population, and the low price of labor are peculiarly calculated to produce, if sufficiently encouraged by a market, and the mode of transportation to it; that, in addition to the before-mentioned considerations, one, in the opinion of your memorialists, not to be disregarded, arises from the recollection that an uninterrupted water communication to the bay of Mobile would afford a happy facility for the transportation of troops, with the necessary supplies, in case of the invasion of the southwestern section of the Union.

After the most mature reflection, your memorialists cannot avoid viewing the objects contemplated in their memorial as worthy of national attention; and, when they contemplate the extensive advantages that they feel assured would grow out of their completion, in a national as well as sectional point of view, they cannot avoid viewing them as worthy the most benevolent and wise policy of the General Government. And we further beg leave to call your attention to the communication of the Pensacola bay with that of Mobile, which we believe can be effected with less expense than any communication of the same importance within the United States.

Be it resolved, That one copy of this memorial be forwarded, as soon as practicable, to each of our Senators and Representatives in the Congress of the United States, by his excellency the Governor, with instructions to use their best endeavors to direct the attention of the National Legislature to the important objects therein referred to.

Approved: December 17, 1821.

EXECUTIVE OFFICE, CAHABA, *December* 24, 1821.

It is hereby certified that the forgoing memorial is a true copy taken from the original filed in this office.

JS. J. PLEASANTS, *Secretary of State.*

17th CONGRESS.] No. 513. [1st SESSION.

TRANSACTIONS IN THE FLORIDAS UNDER GOVERNOR JACKSON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 29, 1822.

To the House of Representatives: WASHINGTON, *January* 22, 1822.

In compliance with the resolution of the 2d instant, I transmit a report of the Secretary of State, with all the documents relating to the misunderstanding between Andrew Jackson, while acting as Governor of the Floridas,

and Elijius Fromentin, judge of a court therein; and also of the correspondence between the Secretary of State and minister plenipotentiary of His Catholic Majesty on certain proceedings in that Territory, in execution of powers vested in the Governor by the Executive, under the law of the last session, for carrying into effect the late treaty between the United States and Spain. Being always desirous to communicate to Congress, or to either House, all the information in the possession of the Executive, respecting any important interest of our Union, which may be communicated without real injury to our constituents, and which can rarely happen, except in negotiations pending with foreign Powers; and deeming it more consistent with the principles of our Government, in cases submitted to my discretion, as in the present instance, to hazard error by the freedom of the communication, rather than by withholding any portion of information belonging to the subject, I have thought proper to communicate every document comprised within this call.

JAMES MONROE.

DEPARTMENT OF STATE, WASHINGTON, *January* 28, 1822.

The Secretary of State, to whom has been referred the resolution of the House of Representatives of the 2d instant, requesting the President of the United States to cause to be laid before that House such information as he might think proper to communicate in relation to any misunderstanding between Andrew Jackson, as Governor of the Floridas, and Elijius Fromentin, as judge of the court therein, and in relation to various other subjects connected with the occupation of the Floridas during the last year, has the honor of submitting to the President the papers containing the information required by that resolution.

JOHN QUINCY ADAMS.

List of documents transmitted to the House of Representatives with the message of the President of the United States of January 28, 1822.

Papers received from, and correspondence with, Governor Andrew Jackson.

I.—*General Jackson to Mr. Adams.*

SIR: PENSACOLA, *August* 26, 1821.

The enclosed documents will advise you of an occurrence painful to me, but unavoidably necessary, and dictated by the imperious rules of justice, to save the unprotected orphan from being ruined by the most cruel oppression, by the most corrupt and wicked combination I ever investigated.

In the re-establishment and resuscitation of the judiciary in West Florida, and from the various distribution of the judicial functions, I had indulged the hope that no cases would occur to compel me to exercise the judicial powers with which I was invested by my commission from the President.

I was well aware that much corruption existed in Spanish judicial proceedings, but still my mind was not prepared to expect such a scene of combined wickedness and corruption as has been brought to light by this investigation, and which the enclosed extracts, taken from the original documents or records, and certified by the alcalde of Pensacola, exhibit. They relate to the succession or estate of Nicolas Maria Vidal, who died in this place about the year 1807, having made his will, leaving persons in this country his heirs, but who, from that time to this day, have never received one cent of their inheritance. It was this case which gave rise to the proceedings alluded to, marked No. 1, and to which I beg leave to refer you.

The document No. 2 is an extract of the whole proceedings instituted by the heirs for the recovery of the testamentary papers and other documents relative to the estate of their deceased father, and for the recovery of which I was compelled to exercise my judicial functions, and to take the energetic measures I did; and which were well warranted by the laws of Spain as well as by those of the United States; and which alone could have preserved to the heirs of Vidal the evidence of their right of property. Without these records, they would have been unable to compel the house of Innerarity & Forbes, the depositary and debtor of the estate, to do them right and justice. This act of justice was due to them by every law, human and divine. By the second article of the late treaty with Spain this right was expressly guarantied, and, under that article, Colonel Callava, as the commissioner of Spain, was bound to deliver these documents, as the evidence of the right of property here, at the time of his surrendering the country, and with other papers which he did deliver.

It is clearly to be perceived that the influence of J. Innerarity prevented all the decrees of Callava, as well as of his predecessors, in favor of the heirs of Vidal, from being executed; thus exhibiting a judicial mockery without example. And by the influence and arts of this man, (and, as some have it, by his gold,) the final attempt was made secretly to carry away the papers relating to this large estate; by this means shielding Innerarity from all responsibility to the heirs, and enabling him to continue in undisturbed possession of property to a very large amount so unjustly, corruptly, and fraudulently obtained.

I have reason to believe that Callava would not have presumed to stand out in contempt of my order, but that he would have delivered the papers when first demanded, nay, that he would have directed Domingo Sousa to have done so, had he not been urged to this obstinate resistance by some of our American citizens, under the impression that I would not, nay, durst not, commit him for the contempt. This, added to the influence which Innerarity had over him, who was continually by his side, and, I am convinced, urging him to withhold the papers, from a belief that their production would unfold the villany practised, makes him responsible to the heirs, and destroys both his character and that of Callava. It was, no doubt, this conviction which caused him to make the involuntary exclamation, when my order was read to Colonel Callava by Colonel Butler, and when told, on his refusal to deliver the papers proven to be in his house, that he must appear before me, that "the die was cast." Yes, he said truly the die was cast; for he must have clearly seen that the arts, the influence, the wealth, the power of no individual, not even of Innerarity himself, could any longer obstruct the pure channels of justice.

I have to regret that the conduct of some of our officers on this occasion was highly reprehensible, and that in particular of Judge Fromentin unaccountable, indecorous, and unjustifiable. I have said indecorous, because, from an interview with him on the subject of his jurisdiction and powers under his commission and instructions, it was well understood that the former only extended over the revenue laws and the acts of Congress prohibiting the introduction of slaves. My commissions and instructions had been shown him, and he had acknowledged all other judicial powers to reside in the alcalde and in other judicial jurisdictions under me, as well as in those with which I was invested by the President. After this clear understanding between us, and his being instructed to aid me in the administration of the Government, to attempt thus to oppose me without even giving me notice, or making inquiry into the nature and cause of my proceedings; to issue what he calls a writ of *habeas corpus*, without petition or affidavit, or oath of any kind, and that on the application of Innerarity and of some Spanish officers, (the former interested in the destruction of these papers,) was such an act of indecorum and contempt of my authority, and displayed such ignorance of his duty, to say the least of it, as caused me to notify him to appear before me, and show cause why he had attempted this improper interference with me in the exercise of my judicial powers. The time when the interference was made renders his conduct still more reprehensible; he did know that opposition by force had been threatened by Callava and his Spanish officers to my authority, aided, as they had a right to believe, by some of my officers. This, as you will discover, I put down, as it ought to have been; and the lecture I gave the judge when he came before me will, I trust, for the future, cause him to obey the spirit of his commission, aid in the execution of the laws and administration of the Government, instead of attempting to oppose me, under Spanish influence.

I enclose you a copy of the paper he calls a writ of *habeas corpus*. If the view of this paper does not furnish sufficient evidence of his incapacity for the office of a judge; if it be not sufficient to strike him from the roll of judges, I must say that ignorance of law is no objection against any one's holding a judicial station, however high

and important. Judge Fromentin was represented to me to be no lawyer, but favorably spoken of as a man of literature; but I could not have formed such an idea of his want of legal knowledge as this transaction displays. I am, therefore, more inclined to ascribe his conduct to weakness than to any other cause.

You will perceive, from the whole of the proceedings, that energetic measures were unavoidable, that my authority was attempted to be set at naught, and my orders and decrees treated with contempt. I could not view Colonel Callava in any other light than that of a private individual, charged with violating the rights of others, and setting my authority at defiance. I could not distinguish him or his situation from that of Domingo Sousa, or of Fullarat, his steward. These, by Callava's orders, had treated my authority with contempt, and Callava had not the magnanimity to relieve them, by acknowledging the papers to be in his possession, even after positive proof was had of the fact that they were so. I did believe, and ever will believe, that just laws can make no distinction of privilege between the rich and the poor; and that when men of high standing attempt to trample upon the rights of the weak, they are the fittest objects for example and punishment. In general, the great can protect themselves; but the poor and humble require the arm and the shield of the law. Colonel Callava's powers having ceased here with the surrender of the country, it was only a display, and so considered by me, of pompous arrogance and ignorance, in his claiming the privileges of diplomacy, which, in fact, he never possessed; and his powers having ceased, his commission accomplished, the pretension which he set up was an insult to the weakest understanding. There are other and many complaints by the Spanish subjects, who remain here, of documents relating to private property being missing from the alcalde's office. If proof is had where they are, demands will be made, and I hope the precedent set will prevent the necessity of again exercising those painful measures to coerce their production. But, should such occur, I shall not shrink from my duty, however painful it may be to my feelings to exercise such authority for the security of those individuals, who, under the treaty, look to our Government for the protection of their rights.

I enclose a memorandum, marked No. 3, which ought to have accompanied my last communication to you, and which records an occurrence that took place after the closing of my despatches of the 30th of July, concluded the 14th instant, and at the moment of their departure. This communication I could not receive until the inventory of provisions, &c. agreeably to Callava's agreement, and the pledge of his secretary, with the proper receipt, was delivered.

Enclosed you will receive an abstract of my accounts up to the 14th of August. In the month of October you will receive the whole by the hands of Dr. J. C. Bronaugh, who has acted as my private secretary, with all the necessary vouchers for closing my accounts.

I have the honor to be, sir, with great consideration and respect, your most obedient servant,

ANDREW JACKSON, *Governor of the Floridas.*

P. S. I send you a newspaper containing an ordinance "for the better regulation of the harbor of Pensacola," and another, "regulating the fees of justices of the peace;" both of which have been passed since my last communication, and, from my ill health and great press of business, I send you through the paper enclosed.

Documents relating to the arrest of Domingo Sousa, Colonel José Callava, and Antoine Fullarat, enclosed in Governor Jackson's letter of the 26th August, 1821.

No. 1.

From H. M. Brackenridge, Alcalde, to His Excellency the Governor.

SIR: PENSACOLA, *August* 21, 1821.

I learn, from the most satisfactory evidence, that a number of documents relating to estates in this place, and to suits instituted here, are in the possession of an individual named Sousa. These papers properly belong to this office, but were not included in the inventory delivered by the late Governor. Some of the circumstances attending the affair are of a very peculiar nature; but as the necessity of obtaining possession of the documents is urgent, I must defer making a report respecting them to some other period. At present, I must request your excellency to authorize some one to make a regular demand of the said documents, and to ascertain precisely what they are.

I am, &c.

H. M. BRACKENRIDGE, *Alcalde.*

His Ex'cy Maj. Gen. ANDREW JACKSON, *Governor of the Floridas.*

No. 2.

His Excellency the Governor to Messrs. Walton, Brackenridge, and Miller.

GENTLEMEN: OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 21, 1821.

Having been officially informed that there are a number of papers or documents in the possession of an individual of the name of Domingo Sousa, of a public nature, and which belong to the office of the alcalde of this town, although not delivered with the other documents relating to private property, you are hereby authorized and instructed to proceed to the dwelling of the said Domingo Sousa, and to make a demand of all such papers or documents as may be in his possession. In case the said Sousa should refuse to exhibit and deliver the same, you will immediately report the fact to me in writing.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To GEORGE WALTON, *Secretary of West Florida,*
H. M. BRACKENRIDGE, *Alcalde of Pensacola, and*
JOHN MILLER, *Clerk of the County Court of Escambia.*

No. 3.

From the Commissioners, Messrs. Walton, Brackenridge, and Miller, to His Excellency the Governor.

SIR: PENSACOLA, *August* 22, 1821.

At an early hour yesterday morning we repaired to the dwelling of Domingo Sousa, and explained to him the object of our visit, and the authority with which we were clothed. He immediately produced two boxes con-

taining papers, declaring that they belonged to the military tribunal, and to the revenue of Spain. On examining the said papers, it appeared that, with a few exceptions, they related to courts-martial and to personal disputes between officers and soldiers, cognizable by the military tribunals. But the following papers we conceive to be of a very different nature: The proceedings relating to the estate of Nicolas Maria Vidal, formerly auditor of war of this province, and whose heirs reside in this place. They relate to property and claims in this country; and, whatever the Spanish law may be on the subject of the military privilege, by which the military courts have sole cognizance in all cases where persons of that profession are in any way interested, yet in this case the persons now interested have nothing to do with the Spanish Government. Another package contains the papers in the case of Peter Guilkes against Tomas Villaseca, which relates to real property that has passed into other hands. There are also papers in the case of Manuel Bonfay against Carlos de Ville, relating to a lot of ground in Pensacola; also, the proceedings between Carlos de Ville and Eugene Sierra, relating to real property here, and in which other parties are now interested. These are all the papers we conceive important to the inhabitants here, excepting some cases of admiralty jurisdiction, and one as late as 1819; but which appear to be principally copies, the originals having been sent to Havana.

After having examined the whole of the papers in the possession of the said Sousa, we made a demand of the foregoing, but he refused to deliver them, declaring that he was merely the servant of the late Governor Callava, who had placed them in his hands, and that, without an order from him, they could not be given up to us. We then made a formal demand, in writing, and which is annexed to this report; and the same evening we received his answer, hereto annexed.

We then prepared the annexed letter of the 22d, but, when presented to him by Colonel Miller and H. M. Brackenridge, he declined receiving it, stating that he had no control over the papers; that Colonel Callava was the person of whom they must be demanded; and, therefore, refused to receive any letter from them. He further stated, that he had communicated the demand to Colonel Callava, who told him to answer by simply stating that he was subordinate to his (Callava's) orders. He said that, in order to relieve himself from the responsibility of keeping the papers, he was about to deliver them to the late Governor.

GEORGE WALTON,
H. M. BRACKENRIDGE,
JOHN MILLER.

His Excellency ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 4.

From Messrs. Walton, Brackenridge, and Miller, to Mr. Sousa, referred to in the above report.

SIR: PENSACOLA, *August* 21, 1821.

We have this day been authorized and instructed by his excellency General Andrew Jackson, Governor of the Floridas, to require you to deliver up certain public documents, which no private individual has a right to keep, as they relate to the rights of persons holding or claiming property in this province. Among these papers, it is believed there are the documents relating to the estate of Don Nicolas Vidal, whose heirs are interested in the same; also the papers relating to a house and lot in Pensacola, which was the subject of a proceeding between Carlos de Ville and Eugene Sierra; also, a proceeding between Manuel Bonfay and Carlos de Ville, relating to a piece of ground in this place; and, also, the documents in the case of Peter Guilkes and Tomas Villaseca, relating to real property in Pensacola. In pursuance of our instructions, we therefore make a formal demand of the foregoing, and of all other papers which relate directly to the right of private property in West Florida, and in which the inhabitants thereof are interested.

GEORGE WALTON, *Secretary of West Florida.*
H. M. BRACKENRIDGE,
JOHN MILLER.

DOMINGO SOUSA.

No. 5.

From Mr. Sousa to Messrs. Walton, Brackenridge, and Miller, also referred to in their report.

[TRANSLATION.]

MESSRS. ALCALDE AND SECRETARIES: I am a Spanish officer, staying at present in Pensacola, and subject, by my commission, to the orders of the late Governor of this place, Don José Callava; consequently, I have not under my charge, in quality of a private individual of this town, any papers which I am bound to deliver to you in compliance with your request. It is a positive fact, that I have exercised the functions of assistant witness *(testigo de asistencia)* for the suits in the courts of war and revenue in Pensacola, and under the Spanish Government, and that there are in my safe keeping, boxed up, some of those papers intrusted to my care by the above-named Governor, for their preservation. This is all I have to communicate to you in answer to the letter which you have been pleased to address to me to-day.

God preserve you many years.

DOMINGO SOUSA.

A correct translation.

E. A. RUTLEDGE, *Tr. Sp. Language.*

No. 6.

From Messrs. Walton, Brackenridge, and Miller, to Mr. Sousa.

SIR: PENSACOLA, *August* 22, 1821.

Your note in reply to our demand of yesterday has been received. You are in the exercise of no civil functions under the existing Government. We, therefore, can only regard you as a private person. We do not claim any papers in your possession, or in that of any other, relating to the military tribunals, or to the revenue of the Spanish Government; but we are certain that no individual, no matter what office he may have held under the Spanish Government, has any right to retain possession of archives or documents which relate directly to the sovereignty of this province; and no reason can be given why such papers as concern property in this country, and

which may be necessary to establish titles or assert the rights of individuals, should be withheld from the officer now authorized to take charge of them.

We again make a positive demand of the papers mentioned in our note of yesterday, to wit: the documents in the case of Nicolas Maria Vidal; the proceedings between Carlos de Ville and Eugene Sierra; also, a proceeding between Manuel Bonfay and Carlos de Ville, and the documents in the case of Peter Guilkes and Tomas Villaseca. These papers are known to be in your possession, and we demand to know by whose authority, as no person whatever has any right to authorize you to detain them.

GEORGE WALTON,
H. M. BRACKENRIDGE,
JOHN MILLER.

Don Domingo Sousa.

Note.—This letter was handed to the above-named Domingo Sousa by the undersigned, and the said Sousa refused to receive the same.

H. M. BRACKENRIDGE,
JOHN MILLER.

No. 7.

From His Excellency the Governor to Messrs. Butler and Miller.

Office of the Executive of Florida, Pensacola, *August* 22, 1821.

It being made known to me by the report of Colonel George Walton, Secretary of West Florida, H. M. Brackenridge, alcalde of the city of Pensacola, and Colonel John Miller, clerk of the county court for the county of Escambia, duly authorized and appointed by me to make demand of and to receive the following documents and archives, claimed to appertain and belong to the following persons, as evidence of their real and personal rights, which are guarantied to them by and under the second article of the late treaty with Spain, and which are represented to be in the possession of Domingo Sousa, who states that these documents and papers have been placed in his charge and care by the late Governor of West Florida, Don José Callava, that is to say: 1st, the documents relating to the estate of Nicolas Maria Vidal; 2d, the documents in the proceedings between Carlos de Ville and Eugene Sierra; 3d, the documents in the case of Manuel Bonfay and Carlos de Ville; 4th, documents in the proceedings in the case of Peter Guilkes against Tomas Villaseca: Colonel Robert Butler, of the army of the United States, and Colonel John Miller, clerk of the county [court] of Escambia, are hereby commanded, forthwith, to proceed to seize the body of the said Domingo Sousa, together with the said papers, and bring him and them before me, at my office, immediately, to the end that he then and there answer such interrogatories as may be put to him; and to comply with such order and decree touching the said documents and records as the rights of the individuals, secured to them by and under the second article of the treaty with Spain, concluded at Washington, 22d February, 1819, and ratified on the corresponding day of 1821, may require, and the justice of the case demand.

Given under my hand, at Pensacola, this 22d day of August, 1821.

ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 8.

Return of Colonels Butler and Miller to the above.

Pensacola, *August* 22, 1821.

We have the honor to report, that we proceeded to the house of the within-named Domingo Sousa, and found that the papers referred to had been by him taken, through the aid of a negro, (as he reports,) to the house of Don José Callava, late Governor.

The body of Domingo Sousa is herewith presented to you.

We have the honor to be, very respectfully, your most obedient,

ROBERT BUTLER,
JOHN MILLER.

No. 9.

Examination of Domingo Sousa.

Office of the Executive of Florida, Pensacola, *August* 22, 1821.

Present: His Excellency the Governor.

Question 1. Were you not in possession, on yesterday and this morning, of the following papers: that is to say, the documents relating to the estate of Nicolas Maria Vidal?

Answer. Yes.

Question 2. Had you, or had you not, in the same manner, at the same time, in your possession, the papers in the case of Carlos de Ville and Eugene Sierra, relative to property in this province?

Answer. Yes.

Question 3. Had you, in your possession, in like manner and time, the proceedings in the case of Manuel Bonfay and Carlos de Ville, relating to property in this province?

Answer. Yes.

Question 4. Had you, in your possession, in like manner and time, the proceedings in the case of Peter Guilkes against Tomas Villaseca, relating to property in Pensacola?

Answer. Yes.

Question 5. Whether the documents and papers in all the above cases do not relate to private property in this province?

Answer. That the estate of Vidal is at Baton Rouge, but that the heirs are here.

Question 6. Is not the case of Carlos de Ville and Eugene Sierra on the subject of a piece of ground in this place?

Answer. Yes.

Question 7. Is not the case of Bonfay and De Ville relative to a piece of ground in this place?

Answer. It relates to the same piece as that of De Ville and Sierra.

Question 8. Is not the case of Guilkes and Villaseca in relation to property in this place?

Answer. That the cause related to a piece of property in Pensacola.

Question 9. When and by whom were these papers placed in your possession?

Answer. That those papers were placed in his possession at the time of the adoption of the constitution, when the civil functions were distributed to the alcalde; that this was better than a year ago.

Question 10. Did you ever act as civil alcalde in Pensacola?

Answer. No; that he was a clerk or witness *de asistencia.*

Question 11. Who was alcalde at the time of your obtaining possession of the papers?

Answer. Don José Norriega.

Question 12. Did not all papers appertaining to the rights of individuals, and relating to suits before the alcalde, belong to his office?

Answer. Yes, all that were of a civil nature; and all such have been delivered, but not the military papers.

Question 13. At what time this morning were the papers which had been demanded of you delivered by you, to whose order, and through what channel?

Answer. That, after the demand had been made by Colonel Walton, the alcalde, and Colonel Miller, now present, he went to Colonel Callava, and stated that he wished to free himself from the responsibility of keeping them, and that he this morning, at eleven o'clock, had them carried to Governor Callava's house by a negro belonging to Manuel Domingo, and there delivered to Fullarat, the major domo of the Governor.

Question 14. When you stated that you wished to free yourself from the responsibility of keeping the papers, what was the reply of Governor Callava?

Answer. He said nothing.

Question 15. Do you know that Governor Callava received possession of the papers?

Answer. He does not know positively whether the Governor has received them or not; that he went with the negro, and the papers were left at the house. There was no person there but the major domo, in whose charge they were left.

D. SOUSA.

No. 10.

Order to Colonel Brooke.

SIR: PENSACOLA, *August* 22, 1821.

You will furnish an officer, sergeant, corporal, and twenty men, and direct the officer to call on me by half-past eight o'clock for orders. They will have their arms and accoutrements complete, with twelve rounds of ammunition.

Respectfully, your most obedient,

ANDREW JACKSON, *Governor of the Floridas, &c.*

Col. GEO. M. BROOKE, *Commanding 4th Infantry.*

No. 11.

Order to Lieutenant Mountz.

SIR: PENSACOLA, *August* 22, 1821.

Should Colonel Callava and his steward refuse to deliver the documents which will be required of them by Colonel Butler and Doctor Bronaugh, and on the report of Colonel Butler to you of their refusal, you will immediately take the said Colonel Callava and his steward Fullarat into custody, and bring them before me, to answer such interrogatories as are required by the circumstances attending the case.

Very respectfully, your most obedient,

ANDREW JACKSON.

Lieutenant MOUNTZ, *Officer of the Guards.*

No. 12.

Order to Colonel Butler and Doctor Bronaugh.

OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 22, 1821.

It being made known to me, by the confession of Domingo Sousa, that the papers named in the petition of Henry M. Brackenridge, alcalde for the city of Pensacola, and which were demanded under my orders, as the property of private individuals, by Colonel George Walton, secretary for West Florida, Colonel John Miller, clerk of the county court of Escambia, and Henry M. Brackenridge, alcalde for the city of Pensacola, were, after said demand, in pursuance of my orders as aforesaid, was made, by the said Domingo Sousa and a negro man carried this day to the house of the late Governor, Don José Callava, and delivered the said documents and papers into the possession of his steward, named Fullarat:

Colonel Robert Butler, of the army of the United States, and Doctor James C. Bronaugh, accompanied by Henry M. Brackenridge, Esq., alcalde for the city of Pensacola, will wait upon Colonel Don José Callava, and his steward, named Fullarat, and demand from them the following papers, this day delivered to the said Fullarat at the house of the said Colonel Callava, by the said Domingo Sousa, that is to say: 1st. The documents and papers relating to the estate of Nicolas Maria Vidal. 2d. The documents in the proceedings between Carlos de Ville and Eugene Sierra. 3d. The documents and papers in the case of Manuel Bonfay and Carlos de Ville. 4th. Documents and papers on the proceedings in the case of Peter Guilkes against Tomas Villaseca. All which documents and papers are acknowledged to be the property of individuals, and appertaining to their rights, and which are secured to them by and under the second article of the treaty with Spain, concluded at the city of Washington on the 22d day of February, 1819, and ratified on the corresponding day of 1821, and must remain for the protection of the rights and property of the said individuals; and no officer of Spain can rightfully take them away, or keep them from the office of the duly appointed alcalde for the city of Pensacola. It is further ordered, that if the said late Governor, Don José Callava, or his steward Fullarat, when the above-described papers are demanded of them, should fail or refuse to deliver the same, that the said Don José Callava and his steward Fullarat be forthwith brought before me, at my office, then and there to answer such interrogatories as may be put to them of and concerning the premises, and to abide by and perform such order and decree touching the said documents and papers, (secured to them as aforesaid,) as the justice of the case may demand.

Given under my hand, at Pensacola, this 22d day of August, 1821.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To Colonel ROBERT BUTLER, of the Army of the United States, and Doctor JAMES C. BRONAUGH, in company with HENRY M. BRACKENRIDGE, to execute and return, and report thereon.

No. 13.

Report of Messrs. Butler and Bronaugh.

SIR: PENSACOLA, *August* 22, 1821.

Pursuant to your official order bearing this date, we proceeded to the house of Colonel Callava, who was absent; but, again returning to his house shortly after, we found him, accompanied by a number of Spanish officers clothed with their side arms, and Mr. John Innerarity, in the porch. The demand was formally made of the documents enumerated in your order, and peremptorily refused; when he was informed that his refusal would be considered as setting at defiance the authority exercised by you as Governor of the Floridas, in the execution of the laws; and they were again demanded, and the consequences of refusal on his part enumerated, but in which refusal he still persisted; and we were about taking our leave to prepare for the final execution of your order, when Colonel Callava declared that if we would furnish him with a copy of the memorandum, setting forth the documents required, he would deliver them to us; to which we assented.

The alcalde, H. M. Brackenridge, accordingly waited on him with a copy of the memorandum herewith accompanied, and informed him that he would call in two hours for the reception of the documents, as promised. We proceeded at the appointed time, and found the gate and front part of the house closed. The former we opened by removing a bar, and, on reaching the latter, a considerable stir seemed to be making in the house. We knocked several times without receiving any answer, when admittance was demanded in the name of the Governor in three instances; still without reply. The guard was then ordered to advance and form in front of the house, and part detached to the rear, when it was discovered that the back door was open, and several Spanish officers, with Mr. Innerarity, (who is one of your cabildo,) were in the porch. We inquired for Colonel Callava, to which we were answered they did not know where he was. Lights were procured and the rooms searched, when Colonel Callava was found in his bed, divested of his coat. Demand was then made of the documents, agreeably to his promise, and to our astonishment they were still refused, and several attempts made on his part to show that he was not amenable to the laws; to which he was answered that the Governor was, in the execution of the laws, bound to demand the papers, as they appertained to the rights and property of individuals resident in Pensacola, and that formal complaint had been made that they were improperly withheld, and that the Governor knew no distinction between Colonel Callava and any other man under his Government. We then proposed that Colonel Callava should deliver the papers, and he should have our receipt for them; which was also refused. We then again demanded them, reiterating our sentiments that his refusal would be viewed as an act of open mutiny to the civil authority exercised in the Floridas, and that he must expect the consequences. He persisted to refuse, and the officer of the guard was ordered to take him and his steward Fullarat into custody, and bring them before your excellency; which is now done. We would add, in conclusion, that Colonel Callava repeatedly asserted that he would not be taken out of his house alive, but he seemed to act without much difficulty when the guard was ordered to prime and load. A corporal and three men were detached to remain and guard the house of Colonel Callava, and to prevent the removal of the boxes which had contained the documents, and which Mr. Brackenridge recognised in the bed-room. From the relation in which Mr. Innerarity stands in this business, together with the interest taken on the side of Colonel Callava, and at the same time exercising the functions of one of the cabildo of this city, we deem it an indispensable duty to recommend that your excellency will fill his place in the council with a character who will manifest a proper respect for the dignity of the laws and you their Executive.

We have the honor to be, &c.

ROBERT BUTLER, *Col. U. S. Army.*
J. C. BRONAUGH.

His Excellency ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 14.

Memorandum referred to in the above report.

PENSACOLA, *August* 22, 1821.

Memorandum of the documents which have this day been demanded of Colonel José Callava, agreeably to the order of his excellency Major General Andrew Jackson, Governor of the Floridas, and which, on the demand of Colonel Robert Butler and J. C. Bronaugh, accompanied by H. M. Brackenridge, Colonel Callava promised to deliver to Colonel Butler, if they should be found in the boxes delivered to him by Domingo Sousa.

1. The papers relating to the estate of José Maria Vidal.
2. Proceedings in the case of Carlos de Ville and Eugene Sierra.
3. Proceedings in the case of Manuel Bonfay and Carlos de Ville.
4. Documents in the case of Peter Guilkes and Tomas Villaseca.

The whole of the above papers having relation to the rights of property in West Florida, and in which private individuals are interested.

H. M. BRACKENRIDGE, *Alcalde.*

No. 15.

Minutes of the examination of Colonel Callava and Fullarat.

OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 22, 1821.

Colonel José Callava being brought before Andrew Jackson, Governor of the Floridas, to answer certain interrogatories relative to documents and papers named in a schedule bearing this date, and which relate to the property and sovereignty of the Floridas, the following interrogatories were put to him, viz:

Question 1. Were, or were not, the papers mentioned in a schedule handed to you by H. M. Brackenridge, alcalde of the city of Pensacola, delivered by Domingo Sousa at your house, this day, to Antoine Fullarat, your major domo; and, if so, at what time of the day?

Answer. Dixo que yo protesto solemnemente contra el acto, que son las diez, y media de la noche, sacandole de su cama, donde se hallaba enfermo; que se acopla como comisario Española que es por el Gobierno Español, baxo el tratado recientemente celebrado con dicho Gobierno y el de los Estados Unidos por la cesion de las Floridas, cuya comision me ha sido confiado—here the Governor stopped Colonel Callava, and directed the following question to be put to him:

Did, or did not, Domingo Sousa deliver at your house this day the papers above mentioned; and, if so, where are those papers now? and answer this directly.

Answer. That he declines answering, except in the manner he considers proper, in his own language, and with his own hand.

The question being repeated, he answered that he was here as a commissioner, and could not answer in any other capacity. On which he was informed by the Governor that he could not view him as a commissioner, or in any other light than as a private individual, charged with refusing to surrender papers which belong to the public archives of this province, and of being connected with individuals charged with being about to secrete papers, and to carry them out of the country; by which the inhabitants thereof would be deprived of their evidence of property, and which, under the second article of the treaty with Spain, ought to have been delivered with the other papers placed in the charge of the alcalde for safe keeping. The question being again repeated, he refused to answer except in the manner before stated.

Interrogatories put to Antoine Fullarat.

Question 1. What is your name and age?

Answer. My name is Antoine Fullarat; I do not know my age.

Question 2. Did not Domingo Sousa deliver to you this day some papers in boxes at the house of Colonel José Callava?

Answer. Yes.

Question 3. Where are those papers now?

Answer. They are at the house of Colonel Callava.

Question 4. In whose possession are they?

Answer. They are now in Colonel Callava's house.

Question 5. At what time of this day were they delivered by Domingo Sousa?

Answer. He does not recollect.

Question 6. Are not you the major domo of Colonel Callava?

Answer. Yes.

I do hereby certify the foregoing to be a correct minute of the examination before Andrew Jackson, Governor of the Floridas, at which I acted as clerk and interpreter.

H. M. BRACKENRIDGE.

No. 16.

Order for the imprisonment of Domingo Sousa, Colonel José Callava, and Antoine Fullarat.

Office of the Executive of Florida, Pensacola, *August* 22, 1821.

West Florida, *Pensacola, ss.*

To the officer of the day.

You will take into custody and safely keep Domingo Sousa, until he produces, or causes to be produced and delivered, unto Henry M. Brackenridge, alcalde of Pensacola, the following documents and papers, to wit: Those relating to the estate of Don Nicolas Maria Vidal; also, the papers relating to a house and lot in Pensacola, which was the subject of a proceeding between Carlos de Ville and Eugene Sierra; also, the proceedings which took place between Manuel Bonfay and Carlos de Ville, relating to a piece of ground in this place; and, also, the documents in the case of Peter Guilkes and Tomas Villaseca, relating to real property in Pensacola; all which documents and papers appear to appertain to individuals and their rights, and for their benefit ought to be in the possession of Henry M. Brackenridge, alcalde for the city of Pensacola, and not to be taken away by the officers of Spain; and which documents and papers were seen by Colonel George Walton, Colonel John Miller, and Henry M. Brackenridge, alcalde, in the possession of the said Domingo Sousa, on the 21st instant, and demanded by the said alcalde to be delivered to him, the said alcalde, under the written order of the undersigned, given for that purpose, and the said documents and papers to be retained by the said alcalde for safe keeping: on which the said Domingo Sousa refused to deliver the same, but, in open violation of the above-recited order and demand, did convey the said documents and papers to the house of Colonel José Callava, late Spanish Governor of the province of West Florida, and left them in the hands of the said Colonel Callava's steward, by name Fullarat, in the dwelling-house of the said Colonel Callava. All which acts aforesaid of the said Domingo Sousa are in open contempt of the authority of the undersigned, as Governor of the Floridas, &c., and in open violation of the rights of the citizens, secured to them under the second article of the late treaty with Spain; for all which, and until he, the said Domingo Sousa, complies with the foregoing order, by delivering the aforesaid enumerated documents and papers, he is to stand committed to the calabouse.

Given under my hand this twenty-second day of August, eighteen hundred and twenty-one.

ANDREW JACKSON, *Governor of the Floridas, &c.*

West Florida, *Pensacola, ss.*

To Captain Dade, officer of the day.

You will take into custody and safely keep Colonel Don José Callava, and his steward Fullarat, until the documents and papers recited in the order annexed for the arrest of Domingo Sousa are produced and delivered unto Henry M. Brackenridge, alcalde of the city of Pensacola.

Given under my hand, this twenty-second day of August, eighteen hundred and twenty-one.

ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 17.

H. M. Brackenridge, Alcalde, to His Excellency the Governor.

Sir: Pensacola, *August* 23, 1821.

Having strong grounds to believe that the documents and papers claimed by me as appertaining to the archives of this province, and directly relating to the property and sovereignty of the same, are now in the house of Don José Callava, but enclosed in boxes, I beg leave to request that authority may be given to such persons as your excellency may appoint to open and examine the said boxes and report thereon. From the examination of Domingo Sousa and Antoine Fullarat, and the affidavit hereto annexed of Mercedes Vidal, there can be no doubt but that said documents were delivered in the boxes before mentioned to the said Callava, at his house, and are in his possession. The documents demanded are as follows:

1. Papers relating to the estate of Nicolas Maria Vidal.
2. Proceedings in the case of Carlos de Ville and Eugene Sierra.
3. Proceedings in the case of Manuel Bonfay and Carlos de Ville.
4. Documents in the case of Peter Guilkes and Tomas Villaseca.

H. M. BRACKENRIDGE, *Alcalde.*

No. 18.

Affidavit of Mercedes Vidal.

WEST FLORIDA.

Before me, H. M. Brackenridge, alcalde of the city of Pensacola, personally appeared Mercedes Vidal Padro, who, being of full age, and being duly sworn, deposeth and saith, that her father, Nicolas Maria Vidal, left her by will one of his heirs, and that he died about the year 1806, possessed of a large real and personal estate in Florida and Louisiana. The deponent further saith, that the will of her said father, together with the inventories of his real and personal estate, and all the papers relating thereto, were for several years missing from the public archives of Pensacola, having been by some person unknown withdrawn from the same; that repeated solicitations were made by her to the authorities then existing here to compel the restoration of the said papers and documents, as they were, and, she believes, still are, necessary to enable her to prosecute her claims under the said will; that a certain John Innerarity of this place, whom this deponent believes to be a debtor to the said estate in a large amount, was decreed to restore the said papers if in his possession; that the said papers were finally restored, and that a decree was passed against the said Innerarity to account with the deponent as one of the heirs of Nicolas Maria Vidal. The deponent further states that, a few days before the change of Governments, she demanded them of Colonel Callava, who informed her that he could not give them up, as he was obliged to take them to Havana. The deponent afterwards requested permission to make a copy of them; that this was granted by said Callava on condition that they should only be delivered by separate pieces or parcels, and that a confidential person should be found to copy them; but the deponent says that the expense of copying them exceeds her means, as they amount, in all, to several hundred pages of common writing paper. The deponent afterwards learned that the said papers were in the actual possession of Domingo Sousa, who acknowledged the same, and delivered three pieces to her for the purpose of being copied. The deponent further states that the said papers relate to property in this country and Louisiana, and were necessary in order to enable her to prosecute her claims under the will of her father.

MERCED. VIDAL.

Sworn and subscribed to before me this 23d day of August, 1821.

H. M. BRACKENRIDGE, *Alcalde.*

No. 19.

Search Warrant.

OFFICE OF THE EXECUTIVE OF FLORIDA,

WEST FLORIDA, *Pensacola, ss.* PENSACOLA, *August* 23, 1821.

Agreeably to the petition of H. M. Brackenridge, alcalde for the city of Pensacola, hereto annexed, and the affidavit of Mercedes Vidal, relating that she has reason to believe, from what Colonel José Callava has told her, that those papers would be taken to Havana: and whereas Domingo Sousa, in his declaration before me, the undersigned, on the 22d instant, declared that he, the said Domingo Sousa, in open violation and contempt of my order requiring that he should deliver the documents and papers named in the annexed petition of H. M. Brackenridge, alcalde for the city of Pensacola, had delivered them to Antoine Fullarat, the steward of Colonel José Callava, and in the house of the said Callava: and whereas an order was issued by the undersigned, on said declaration of the said Domingo Sousa, that a demand should be made to Colonel José Callava, and his steward Fullarat, that they deliver said papers, agreeably to a schedule delivered by Colonel Robert Butler, of the army of the United States, and Dr. J. C. Bronaugh, accompanied by the said alcalde for the city of Pensacola, who proceeded and made a demand of the aforesaid papers, which Colonel Callava refused to deliver, on which an order was made to bring the said Callava and Fullarat before me to answer such interrogatories as might be put to them, &c.: This order being executed, and the said parties before me, Colonel Callava having declined answering interrogatories put to him, except in his own way, and as commissioner of Spain for the delivery of West Florida and its dependencies, which the undersigned would not in his judicial capacity, nor could he, know him in any other than his individual capacity, brought before him on the complaint of his acts being injurious to the rights and property of individuals, and in open violation of the orders of the undersigned, and in contempt of his decrees. Fullarat, being interrogated, declared that he received from Domingo Sousa the papers alluded to, and that the said papers in boxes were in Colonel Callava's house:

Colonel George Walton, Secretary of West Florida, Colonel John Miller, clerk of the county court of Escambia, David Shannon, Esq., presiding justice of said court, and Thomas Brownjohn, Esq., accompanied by Henry M. Brackenridge, Esq., alcalde of the city of Pensacola, will forthwith proceed to the house of Colonel José Callava, and make search for said papers, breaking open said boxes; and if said papers, as mentioned in the annexed petition, are found therein, to take the same and bring them to the undersigned with this warrant, leaving all other papers in said boxes, secured in the same way as the said boxes are found, and report to me, in writing, how they have executed this warrant.

Given under my hand and private seal, (there being no seal of office,) at Pensacola, in West Florida, the twenty-third day of August, eighteen hundred and twenty-one.

ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 20.

Return of Messrs. Walton, Miller, Shannon, and Brownjohn to the above.

PENSACOLA, *August* 23, 1821.

In the execution of the above order, we, the undersigned, proceeded to the dwelling of Colonel Callava, and, having opened a box containing papers, found the documents enumerated in the above list; and after taking them out, again closed the said box, placing a seal upon the same. We now deliver into your excellency's possession the papers and documents as before enumerated.

GEORGE WALTON,
Secretary of West Florida.
JOHN MILLER,
D. SHANNON,
T. BROWNJOHN.

To His Ex'cy Gen. ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 21.

Order for the discharge of Colonel Callava, Domingo Sousa, and Antoine Fullarat.

OFFICE OF THE EXECUTIVE OF FLORIDA,

WEST FLORIDA, *Pensacola, ss.* PENSACOLA, *August* 23, 1821.

Application being made to the undersigned this 23d day of August, 1821, by H. M. Brackenridge, alcalde for the city of Pensacola, by petition, founded upon the affidavit of Mercedes Vidal, of the 23d of August, 1821, and on the declaration of Domingo Sousa and Antoine Fullarat, steward of Colonel Callava, that the first had delivered, and the latter received, at the house of Colonel José Callava, the papers found at the house of Domingo Sousa, and by the order of the undersigned commanded to be delivered, for the use of the individuals whose rights are involved and concerned, into the hands and possession of H. M. Brackenridge, Esq., alcalde for the city of Pensacola, for safe keeping, and that said papers were in the boxes as above delivered, and in the house of said Callava; and information being made to me by report of Colonel Robert Butler, Dr. J. C. Bronaugh, and the said H. M. Brackenridge, alcalde as aforesaid, that the said boxes were seen in the house of the said Callava on the evening of the 22d instant; and it being stated by the affidavit of Mercedes Vidal that the papers were about to be taken to Havana, and a warrant prayed to make search for the same; and whereas the said warrant was granted to Colonel George Walton, Secretary of West Florida, Colonel John Miller, clerk of the court for the county of Escambia, David Shannon, Esq., president of said court, and Thomas Brownjohn, Esq., accompanied by H. M. Brackenridge, alcalde for the city of Pensacola, to execute, and report in what manner they had executed the same, who made the following report thereon: "In the execution of the above order, we, the undersigned, proceeded to the dwelling of Colonel Callava, and, having opened a box containing papers, found the documents enumerated in the above list, [which accompanied the warrant,] and, after taking them out, again closed the said box, placing a seal upon the same. We now deliver into your excellency's possession the papers and documents, as before enumerated. Pensacola, August 23, 1821. George Walton, Secretary of West Florida, John Miiler, D. Shannon, T. Brownjohn. Addressed to his excellency General Andrew Jackson, Governor of the Floridas, &c." Whereupon, the undersigned ordered that said papers be and remain in the possession of Colonel George Walton, Secretary of West Florida, and by him to be delivered over to H. M. Brackenridge, alcalde for the city of Pensacola, for safe keeping, taking his receipt for the same:

The officer of the day over the guards of Pensacola (Captain Wager) will therefore discharge Domingo Sousa, Colonel José Callava, and Antoine Fullarat, Colonel Callava's steward, from the custody of the guard, make known to them that the papers (for the non-delivery of which, and contempt of the orders of the undersigned, they were confined) are in my custody, to be handed over to H. M. Brackenridge, Esq., alcalde for the city of Pensacola, for safe keeping, for the benefit of the individuals and their rights that may be concerned; making them subject to such costs as the said H. M. Brackenridge, alcalde for the city of Pensacola, may tax against them. Then conduct Colonel Callava to his house, examine if the two boxes of papers remain sealed, leave him in possession of them, dismiss the guards from his house, and report the same to the undersigned with this order.

Given under my hand, at Pensacola, this twenty-third day of August, eighteen hundred and twenty-one.

ANDREW JACKSON, *Governor of the Floridas, &c.*

No. 22.

Return of Captain Wager to the above.

SIR: PENSACOLA, *August* 24, 1821.

I have honor to report that your order of yesterday, directing the release of Domingo Sousa, Colonel José Callava, and Antoine Fullarat, has been complied with.

Immediately on the receipt of said order, I repaired to the guard at the calabouse; and, having communicated its contents to Colonel José Callava, I conducted him to his own house, where I examined two sealed boxes, said to contain papers. I further attended him in the examination of his own effects, with the safety of which he appeared satisfied. I then dismissed the guard from his house, and left him in peaceful possession of it.

I have the honor to be, sir, your obedient servant,

P. WAGER, *Capt. 4th Inf., and officer of the day.*

His Excellency ANDREW JACKSON, *Governor of Florida.*

No. 23.

H. M. Brackenridge's (alcalde) receipt to Colonel Walton for the documents above mentioned.

PENSACOLA, *August* 25, 1821.

Received of George Walton, Esq., Secretary of West Florida, the following documents belonging to the archives of this province, being the same obtained through proceedings instituted at my instance:

1. The papers in the case of Vidal.
2. In the case of Bonfay and Carlos de Ville.
3. In the case of Carlos de Ville and Sierra.
4. In the case of Peter Guilkes and Villaseca.

H. M. BRACKENRIDGE, *Alcalde for the city of Pensacola.*

A copy from the originals on file in my office.

GEORGE WALTON, *Secretary West Florida.*

OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 23, 1821.

Present, His Excellency the Governor:

The order for the discharge of Domingo Sousa, Colonel José Callava, and Antoine Fullarat, being under the consideration of his excellency, having been written, but not yet issued, Captain Wager, the officer of the day, presented to his excellency the following documents, to wit:

No. 1.

The United States to Lieutenant Mountz, of the 4th regiment of United States infantry, greeting:

You are hereby commanded that you forthwith have the body of José Callava, late Governor of the province of West Florida, now in your custody, as is said, together with the day and cause of his caption and detention, by whatever name he may be known, before the judge of the court of the United States for West Florida, and for that part of East Florida which lies westward of the cape, at his chambers, in the city of Pensacola, to do, receive, and submit to whatsoever the said judge shall consider in that behalf; and have you then and there this writ, with your doings thereon.

Witness, Eligius Fromentin, judge of our said court, this twenty-third day of August, in the year of our Lord eighteen hundred and twenty-one.

I allow this writ.

ELIGIUS FROMENTIN,
Judge of the U. S. for W. Florida, and for that part of E. Florida which lies westward of the cape.

[ENDORSED.]

I allow the writ on the other side.

ELIGIUS FROMENTIN,
Judge of the U. S. for W. Florida, and for that part of E. Florida which lies westward of the cape.

No 2.

From Lieutenant Mountz to His Excellency the Governor.

SIR: PENSACOLA, W. F., *August* 24, 1821.

I have the honor to state that the within paper from Judge Fromentin was handed to and served upon me, as officer of the guard stationed at the calabouse, on the 23d instant, by a person who I have reason to believe was Doctor Brosnaham, of this place, who stated that he served it as a friend, and who, on being informed that no notice would be taken of the within paper, retired.

Very respectfully, I have the honor to be, &c.

G. W. MOUNTZ, *Lt. 4th reg. U. S. Inf.*

To His Excellency ANDREW JACKSON, *Governor of the Floridas, &c.*

The within paper was handed, immediately on its receipt, to Captain Wager, officer of the day.

G. W. MOUNTZ, *Lieut. U. S. Army.*

Whereupon, it is ordered by his excellency that Captain Wager report to Mr. Fromentin that the prisoners were confined for an open contempt of his excellency's orders and decrees, and that he would keep them confined agreeably thereto, until released by the orders of his excellency the Governor. And his excellency issued the following further order, viz:

Eligius Fromentin, Esq. will forthwith be and appear before me, to show cause why he has attempted to interfere with my authority as Governor of the Floridas, exercising the powers of the Captain General and Intendant of the island of Cuba over the said provinces, and of the Governors of said provinces, respectively, in my judicial capacity as supreme judge over the same, and as chancellor thereof, having committed certain individuals charged with a combination to secrete, and with having attempted to secrete and carry out of the territories ceded to the United States the evidence of individual right to property within the said territories, which has been secured to each individual under the second article of the late treaty with Spain, and in open contempt of the orders and decrees made by me. And that the said Eligius Fromentin, Esq. be and appear before me, at my office, at five o'clock P. M., in Pensacola, to make known the above cause, and to abide by and perform such order and decree as the undersigned may of right deem proper to make of and concerning the same.

Given under my hand, at Pensacola, this 23d day of August, 1821.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To Colonel GEORGE WALTON, Secretary of West Florida, to make known and execute the above, and to furnish a copy of the above, (if required,) returning this original, and in writing making known how he has executed the same.

To which order, Colonel George Walton, Secretary of West Florida, made the following return, viz:

By virtue of the above order, I have summoned Eligius Fromentin, Esq. personally to appear at the office of his excellency Major General Andrew Jackson, at five o'clock this afternoon, and, at his request, have furnished the said Eligius Fromentin with a copy of the above order, certified under my hand, as Secretary of West Florida; and the said Eligius Fromentin, in answer to the said summons, declared his perfect willingness to obey this and every order of his excellency the Governor; but asserts that he is unable, through indisposition, to attend this afternoon, as above he is required.

GEORGE WALTON, *Secretary of West Florida.*

Whereupon, it is ordered by his excellency that further time, until to-morrow afternoon at three o'clock, be given to the said Eligius Fromentin to appear and show cause as above he is commanded.

OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 24, 1821.

Present, His Excellency the Governor:

Judge Fromentin, in obedience to the order of his excellency, appears, and acknowledges that he granted the writ of *habeas corpus* without the affidavit of any person, and that no affidavit was made before him; and that it was granted upon the *verbal* application of a number of individuals who made the application, (named Le Rud, Innerarity, Brosnaham, and Father Coleman;) and, upon being asked to whom he delivered the said writ of *habeas corpus* to be served upon the officer who had in custody Colonel Callava, he replied that he delivered it to one of the persons who made application for it, but to which he does not know.

ELIGIUS FROMENTIN.

The word *verbal* interlined in the original by Judge Fromentin.

GEORGE WALTON, *Secretary of West Florida.*

Whereupon, his excellency the Governor ordered that the said Eligius Fromentin be dismissed without day, &c.

A copy from the originals on file in my office.

GEORGE WALTON, *Secretary of West Florida.*

[Enclosure No. 2, in Governor Jackson's letter of 26th August, 1821.—2 in I.]

Mr. Brackenridge to Governor Jackson.

SIR: PENSACOLA, *August* 24, 1821.

The following are the facts supporting my application to your excellency in relation to papers which, as alcalde, and specially commissioned keeper of the archives delivered in virtue of the treaty with Spain, I conceived ought to be placed in my charge, and which no individual had a right to retain:

Shortly after my appointment, an application was made to me by a free quatroon woman of this place, who stated that she was one of the heirs of Nicolas Maria Vidal, formerly the auditor de guerra, or judge. She placed in my hands a number of original papers and decrees, which evidently could not be properly retained by any individual, but belonged to the archives. These papers were retained by me. On examining them, I found that they principally consisted of petitions on the part of the heirs of Vidal, praying the interposition of the existing authorities to compel John Innerarity to restore to the archives the papers relating to the estate of their deceased father, so as to enable them to substantiate their claims against the said Innerarity. These were followed by repeated decrees, but without effect—at least from aught that appears in their proceedings. From others of these documents, it would appear that they had been restored; various decrees in favor of the heirs had passed; but, since July, 1820, nothing seems to have been done, in consequence, as I have been informed, of the departure of the auditor, or judge. I did not find the papers in the office, and I did not know, until afterwards informed by Mercedes Vidal, where they were. As they related to property in this country, and were necessary for the establishment of the rights of its inhabitants, it seemed to me self-evident that they could only be lawfully in the possession of the Government, and that they might be taken wherever they could be found. About ten days ago, Mercedes Vidal informed me that they were in the hands of one Domingo Sousa, formerly a clerk in the office, but that they were under the control of the late Governor Callava, who had given her permission to copy them; but, as they consisted, like other Spanish documents, of the original papers stitched together, and were in separate pieces or unbound books, she could only be allowed to take one of them at a time. I told her to obtain one of them, and bring it to me, in order that I might be certain of the fact. As soon as this was done, and being well convinced of the truth of her story, I made my application to you of the 21st of August, conceiving that the papers must be restored, as no individual could possess them without the permission of the existing Government.

From the following abstract of the proceedings instituted by the heirs of Vidal for the restoration of those papers to the archives, your excellency will perceive with how much difficulty this object was obtained. On the 29th of August, 1817, a petition was presented to the Governor by Caroline Vidal, one of the heirs of Nicolas Maria Vidal, setting forth that, since the sale of her deceased father's effects at public auction, she was unacquainted with the situation of his estate, and praying that the papers relating to it might be delivered to her for this purpose, on her giving the proper receipt. On this, there is a decree by Mazot, then Governor, dated 1st of September, 1817, ordering the papers to be delivered to her, under her receipt. There then follows a certificate from the clerks, or witnesses *de asistencia*, of their having waited on John Innerarity to demand the said papers, and that they were informed by his book-keeper that he was at the river Perdido. The demand is made, it is said, in virtue of their having been delivered to him by the deceased Governor Zuniga.

On the 3d of the same month they again proceeded to the house of Innerarity, who repaired to the auditor's office, and prayed that eight or ten days might be allowed him, that he might search for them, as he did not know with certainty where his book-keeper had put them at the time of the prevailing reports that this place was about to be surprised by the insurgents. This appears to have been granted.

The next petition of Caroline Vidal is dated 1st of December, 1817, stating that, notwithstanding the various solicitations on her part for the delivery to her of the proceedings following the decease of her father, so that, by a sight of them, she might know what is justly due to her, without which she would not be able to do so, she again prays that they may be delivered to her on giving a receipt; and, if not in the public archives, that it be certified in whose possession they were. On this a decree was entered by Mazot, again requiring Innerarity to deliver the testamentary acts of Nicolas Maria Vidal. The clerk accordingly made the demand of Innerarity, who replied that he had not been able to find them, but believed that they had been sent to Mobile in a trunk, with other papers, about the time this place was threatened by the insurgents, and, if in his possession at all, they were at that place; but he was not certain whether he had not returned them to Don Francisco Gutiene de Arroyo.

The next petition of Caroline Vidal is dated the 28th of February, 1818, renewing her demand for the delivery of the testamentary papers, or acts of her father, enumerating the different evasive answers of Innerarity, and praying that if, in fact, they had been transmitted from Mobile to Havana by Arroyo, they might be reclaimed from the Intendant. This prayer is granted by Mazot, but does not appear to have produced any effect.

After this follows a petition by Mercedes Vidal, co-heiress of Nicolas Maria Vidal, setting forth the solicitations of her sister to compel Innerarity to restore the *testamentary* papers of her deceased father, in consequence of whose failure to do so the heirs had not been able to claim their rights under the will of their father. The petition contains these words: "If a private individual could be authorized to take away from the public archives papers of the greatest importance, and then excuse himself on the ground that they had been delivered to Peter or to John, and thus escape without any further trouble, nothing would be secure, and the laws of justice and society would be overturned;" and then praying that Innerarity be required, for the last time, to restore the papers, and that he be put in close confinement until he shall deliver the papers necessary to substantiate claims under an estate which, until now, the heirs thereof have been unable to make. Then follows the decree of Governor Callava, dated 31st March, 1819, that the petition pass to the auditor, that the proper order be taken thereon. Upon this, by order of the 5th of April, 1819, Innerarity is required to restore the papers, if in his possession; but this also appears to have been without effect.

The next petition of Mercedes Vidal prays that the following interrogatories may be put to Innerarity:

1st. Whether he is the depositary of the estate of the deceased Nicolas Maria Vidal, the petitioner's father?

2d. Whether sixteen thousand acres of land in the district of Baton Rouge were sold at public sale at that place, and for what price?

3d. Whether the executor named in due form by the said Nicolas Maria Vidal, Cristoval de Annas, protested against the sale as a nullity, and in derogation of the rights of the heirs?

4th. Whether, when the sixteen thousand acres were adjudged at public sale, Cristoval de Annas did not demand the preference in behalf of the minors?

5th. To whom did John Innerarity give an account of the deposite placed in his hands?

6th. For what reason did Innerarity take away the testamentary papers and inventories, and other papers belonging to the succession of the said Nicolas Maria Vidal; and if, on taking them out, he gave a receipt; and by whose order they were given?

Then follows the order of Callava, dated 17th May, 1819, that the petition pass to the assessor. On the 18th there is the further order of Callava that John Innerarity appear at the office of the auditor, at eleven o'clock of that day, to answer to such interrogatories as should be put to him touching the premises. He accordingly appeared, and said that, in the possession of neither the keeper of the archives, nor of any other person, is there a receipt showing in whose hands the documents claimed then were. If, in other proceedings, he had declared that he would look for them among his papers, it was from a belief that he had seen them in the possession of Francisco Arroyo, who used to come frequently to his house. That they might have been mingled with some of his own papers, and on that account he offered to make search for them among those in his house, as he had formerly done as to those he had at Mobile; but, not having found them, he hoped this would be considered sufficient. This is also accompanied by a formal writing from Innerarity, in the nature of a demurrer, setting forth that under the laws of Castile he is not bound to answer; as no litigant can, according to those laws, begin by propounding questions to the opposite party; that proofs should be brought against him, instead of compelling him to furnish evidence against himself. Then follows an order of Callava that it pass to the assessor. An order is then given to examine the book of receipts, to see to whom the papers were delivered; on which the clerks certify that, on examination of the book of receipts from 1813 until the time of making the search, no receipt could be found This application does not appear to have been effectual.

The next paper is a petition of considerable length by Mercedes Vidal, setting forth the manner in which the heirs of Vidal had for four years been kept out of their inheritance, in consequence of which they had been reduced to extreme poverty; the injustice they had experienced in the fraudulent sale of their estate in the district of Baton Rouge; and their unavailing efforts to obtain the testamentary papers of their deceased father, or to compel those to account who had their property in their hands. Upon this petition there is a decree of the auditor de guerra of the 25th of June, 1819, annulling, on legal grounds, the sale of the property at Baton Rouge, and decreeing that the heirs be put in possession thereof, signed by Governor Callava; and, in pursuance of this decree, it is certified by the clerks that they have delivered the original of this proceeding, in order that it may be carried into effect; on which follows a writing addressed by Callava to the judges of the district of Baton Rouge, stating that the sale of the estate of Vidal, in that district, to the prejudice of the interests of minors, has been set aside; but, as his jurisdiction does not extend there, he sends the original proceedings had in his tribunal, in order that the decrees therein may be carried into effect, dated the 26th of June, 1819. From none of the foregoing proceedings does it appear that the testamentary papers had, at this time, been returned.

The next document in order is the petition of Mercedes Vidal, setting forth her repeated solicitations, and those of her sister; the continued evasions of Innerarity; his perseverance in refusing to deliver up the testamentary papers of her deceased father; that, at length, forced by her continued petitions, and those of her sister, he had surrendered said papers, to all appearances complete. That, from positive data, on the inspection of those documents, it appeared that they were entitled to have certain specified proceedings under the will set aside as irregular and fraudulent; that property to a large amount, which had been left on deposite in the Ursuline convent in New Orleans, had been seized by Forbes and Innerarity, and that no account had been rendered by them of the same; that a large sum of money had been placed in deposite in their hands, for which they had not accounted. The prayer of the petitioner is, that the proceedings under the will be annulled; that the house of Forbes and Innerarity be required to account, &c.

The decree of the auditor, Suares, follows at considerable length, declaring that the proceedings under the will had been wholly irregular, and formed a confused mixture of one thing and another, a perfect labyrinth, which could only be ascribed to the malice of some persons, and the want of a litrado, or legal judge, to direct the parties. The irregularities are then detailed at large. The auditor then sets forth that, in order to avoid confusion, there should be two separate proceedings: one with respect to the demand of the heirs to annul what had been done under the will; and the other requiring the house of Forbes and Innerarity to account with the heirs. The first to consist of the former proceeding and this decree, and the documents on which they are founded, to be separated from the rest of the proceedings for this purpose; that, before proceeding to the annulling of the sale of the sixteen thousand acres of land at Baton Rouge, it would be proper to hear the party at whose instance the sale had been made, that is to say, Don John Forbes & Co., which company is at present represented by John Innerarity; and that the proceedings, with the previous instances in the name of the heirs, should be communicated to the latter. As to the account demanded of Innerarity, and which had been demanded of him ever since the year 1810, without ever having been obeyed, he is required within ten days to produce the same, exact and in due form, and, on failure thereof, to be subjected to what in such case would be exacted by justice; and that within the fifth day he place in the royal treasury the sums put in his possession in the character of a depositary, together with the sixteen hundred dollars mentioned in page sixty-five of the proceedings. The foregoing dictamen or decree is ordered to be carried into effect in all its parts. Signed Callava, 1st July, 1820.

The next and last petition of Mercedes Vidal sets forth the foregoing decree; that the time for the accomplishment of the same had elapsed; that nothing had been done by Innerarity to comply therewith. She therefore prays that execution may issue against the goods of Innerarity, to compel him to comply with the said decree; that, until the rights of the petitioner can be established, and until he shall exhibit an account of the effects sold in New Orleans, as expressed in the Governor's decree of the 1st of July, the property of said Innerarity be placed under an interdict. On this follows the decree of Callava of the 10th of July, 1820, granting the prayer of the foregoing petition.

This closes the proceedings; no further steps appear to have been taken since that time. There is a petition of Mercedes Vidal on the subject of the decree of the 10th, but no order has been taken on it.

I do hereby, in my official capacity as alcalde of Pensacola, and keeper of the archives delivered under the treaty, certify the foregoing to be a correct abstract of the proceedings in my office, at the instance of the heirs of Nicolas Maria Vidal, for the recovery of the testamentary papers of their deceased father, and which led to the late proceedings against Domingo Sousa, clerk of Don José Callava, and his steward Fullarat.

H. M. BRACKENRIDGE.

[Enclosure No. 3, in Governor Jackson's letter of the 26th August, 1821.—3 in I.]

Memorandum extracted from the record-book of Major General Jackson, &c.

We, the undersigned, do hereby certify that, at noon, on this day, 16th August, 1821, as General Jackson was about to forward his despatches to the Government of the United States, Captain B. Prieto, aid-de-camp to Don José Callava, late commissioner on the part of Spain for the delivery of West Florida, presented himself, in our presence, before General Jackson, as the bearer of a communication from said Spanish commissioner to General Jackson, which the latter refused to receive, without having previously delivered to him, in the form required, the certificate of receipt of provisions furnished by him to the Spanish troops for the voyage from this place to the Havana, and the transportation of civil officers, &c.; which provisions and transportation were not stipulated in the seventh article of the late treaty between Spain and the United States to be furnished by the latter. That General Jackson declared, as the reason of his refusal, that the above-mentioned certificate had been promised to be delivered, in proper form, with the solemn pledge of José Cruzat, secretary to the said commissioner, upon that gentleman's representing, on the morning of the 17th of July, that said commissioner, from sickness and extreme press of business, could not furnish the above certificate in time for the ceremony of giving possession; which promise and pledge had been disregarded and violated. We further certify that, upon General Jackson's refusal to receive the communication referred to, Captain Prieto withdrew, and a short time afterwards returned, stating that he had been instructed by Don José Callava to request of General Jackson to reconsider the subject, as it was one of great importance, and that he would be obliged, should General Jackson persist in his refusal, to report the circumstances to his Government. That General Jackson replied simply by a repetition of what he had said before, viz: that the sole condition on which he would receive the late Spanish commissioner's communication was the previous delivery, on his part, of the certificate in question, drawn up in the form which the tenor of the correspondence required; upon which delivery, he would receive any communication which Colonel Callava might make: when Captain Prieto took his leave.

EDWARD A. RUTLEDGE, *Acting Interpreter.*
LIEUT. ANDREW J. DONELSON.
ROBERT BUTLER, *Colonel U. S. Army.*

II.

Major General Jackson to the Secretary of State.

SIR: PENSACOLA, *September* 30, 1821.

I have not had the pleasure of receiving any letter from you since yours of the 20th ultimo, and, in compliance with your instructions therein, am preparing a report on the subjects alluded to, which shall be forwarded in due time.

I had hoped, when I last addressed you, that nothing would have occurred here, after the unpleasant affair of Callava, to compel me to notice the conduct of those Spanish officers who remained; that a decent regard for the laws and the chief magistracy of the country would have induced them to demean themselves peaceably during their temporary stay. But in this I have been mistaken, and, by a reference to the within proclamation and a newspaper of the 29th instant, you will see the step I have been compelled to take, and the course which has led to it.

You will find, over the signature of the "Spanish officers," a violation of that decency and respect which is due to me, as the supreme judicial tribunal of this country, and to my sworn interpreters.

I should have been unworthy the important and sacred trust reposed in me by the President of the United States, if I could, for a moment, have suffered the dignity and majesty of the laws to be thus outraged, in that of my person and my interpreters, with impunity. So long as they confined themselves to a justification of themselves, it was well; but the moment they attacked with their gross falsehoods the dignity of the court and its officers, it became my duty to act with promptness. I have taken this step, after mature reflection and deliberation, believing it absolutely necessary for the preservation of the peace, harmony, and good government of the country. It will not do to permit a band of Spanish officers to keep the public mind in a constant state of excitement and alarm, and thereby weaken that allegiance of the creoles of the country to the General Government, which is enjoined on them by my proclamation; and which, I have every reason to believe, they were disposed to yield, had it not been for the undue influence of these turbulent men, moved by others, who *work unseen.* To suffer them to remain here, after being aware of these things, and showing they defied my authority, considering themselves independent of my rule, and subordinate only to that of their chief, would have been highly improper, and could not have met the approbation of my Government. As long as I have the honor of commanding here, the Government and laws shall be respected; and all who deport themselves with becoming propriety shall receive every attention, urbanity, and politeness due them. Instead of Judge Fromentin aiding me in the administration of the Government, I have strong reasons for believing he is exciting the course that has been pursued by these Spanish officers.

I enclose, for your information and that of the President, my opinion and that of my legal associate on the question of my judicial jurisdiction and powers in the Floridas, and our decision on the case that gave rise to it. If I am correct in the construction of my judicial powers, (of which I have no doubt,) I should have been warranted in committing all concerned. I was advised to do so by those most friendly to the Government, but I thought it best to extend to them all the lenity in my power, and have only, in the first place, required them to leave this country, as they were bound to do by the seventh article of the treaty. All of which will more fully appear, having reference to my proclamation.

I am, sir, with sincere regard and respect, your most obedient servant,

ANDREW JACKSON.

The Hon. JOHN QUINCY ADAMS, *Secretary of State.*

No. 1.

PROCLAMATION.

By Major General ANDREW JACKSON, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and of the Intendant of the island of Cuba over the said provinces, and of the Governors of the said provinces, respectively:*

Whereas, by the seventh article of the treaty concluded between the United States and Spain on the 22d day of February, 1819, and duly ratified, it was stipulated that the "officers and troops of His Catholic Majesty, in the territories hereby ceded to the United States, shall be *withdrawn*, and possession of the places occupied by them

shall be given within six months after the ratification of the treaty, or sooner, if possible:" and whereas it has this day been made known to me that the following officers of His Catholic Majesty, to wit, Marcos de Villiers, Bernardo Prieto, Louis Gayarre, Civilo Lessassier, Arnaldo Guillemard, Carlos de Villiers, Pedro de Vegas, and Mariane Latady, and who, according to the said seventh article, ought to have withdrawn from the said ceded territory with the troops of His Catholic Majesty, have, without the permission of the existing authorities, contrary to the said seventh article, remained in this city and its vicinity: and whereas it has been made known to me that the said officers, acting in a distinct body, independent of and disowning even a temporary allegiance to the Government of the United States as existing in the Floridas, have been engaged in stirring up disaffection thereto, and in sowing discontent in the minds of the good people of this said province: and whereas it appears that they are the authors of the following false, scandalous, and indecent publication:

"In speaking of Colonel Callava's appearance before General Jackson, H. B. ought to have stated that none of the interrogatories and highly offensive accusations of the general were faithfully interpreted to Colonel Callava, any more than the replies of the latter to the former. It was therefore out of the power of our chief, not knowing what was said to him, to make the auditory understand how innocent he was of the foul charges with which his unsullied honor was endeavored to be stained. Such, in sum, are the observations we had to make on the statement of H. B., and we hope that he and the public will be convinced that we acted from no principle of pusillanimity; that if, on the one hand, *we shuddered at the violent proceedings exercised against our superior*, we knew also what was due to a Government which is on the most friendly footing with our own.

"We are, &c.

"THE SPANISH OFFICERS RESIDENT IN THIS PLACE."

and whereas the said publication is calculated to excite resistance to the existing Government of the Floridas, and to disturb the harmony, peace, and good order of the same, as well as to weaken the allegiance enjoined by my proclamation, heretofore published, and is entirely incompatible with any privileges which could have been extended to the said officers, even if permission had been expressly given them to remain in the said province, and, under existing circumstances, a gross abuse of the lenity and indulgence heretofore extended to them:

This is therefore to make known to the said officers to withdraw themselves, as they ought heretofore to have done, from the Floridas, agreeably to the said seventh article, on or before the third day of October next; after which day, if they or any of them shall be found within the Floridas, all officers, civil and military, are hereby required to arrest and secure them, so that they may be brought before me, to be dealt with according to law, for contempt and disobedience of this my proclamation.

Given at Pensacola, this twenty-ninth day of September, one thousand eight hundred and twenty-one, and of the independence of the United States the forty-sixth.

ANDREW JACKSON, *Governor of the Floridas, &c.*

By the Governor:

GEORGE WALTON, *Secretary of West Florida.*

No. 2.

THE HEIRS OF VIDAL *vs.* JOHN INNERARITY. } JUDICIAL OPINION.

A petition was filed in this case, praying the court to have John Innerarity cited to appear and show cause why the decrees of Don José Callava, late Governor of West Florida, should not be carried into execution. Upon the return day of the citation, John Innerarity, the defendant, appeared, and prayed time to prepare his defence, which was granted him. At the expiration of the time allowed, he, through his counsel, prayed for further time, which was also granted. The court having met on the day appointed for the hearing, and the case being called, Mr. Acre, of counsel for the defendant, filed a plea to the jurisdiction of the court, which brings up the question, not only whether this court can legally entertain the suit, but whether there is a competent tribunal in the country to try the case. In support of his plea, he took the following grounds: First, he conceded that the Governors of the Floridas acted in a judicial capacity, and had done so time out of mind, until the promulgation of the constitution of the Cortes of Spain, some time in 1820; and as the constitution of the Cortes was in force in Spain at the time that the sovereignty of Spain over the Floridas was ceded to the United States, it was a part of the law of the Floridas. By that constitution, the judicial power, before exercised by the Governors, was taken from them, and given to other tribunals; and, as a deduction from these premises, Governor Jackson could not sit as a court, only having the powers of the Governors of the Floridas, the Captain General of Cuba, and the Intendant, as limited and prescribed by the constitution of the Cortes, published some time in 1820. Mr. Brackenridge, on the part of the petitioners, contended that the Spanish Government, of which the judiciary is part, has ceased, although the laws and usages are still in force. The error of opinion on this subject, he said, arises from not distinguishing these things. The powers executed by the officers of Spain are retained, not the officers; and an entirely different distribution made of them, to which the President was authorized by the act of Congress. That the Spanish constitution is not in force here, because not promulgated until Spain had parted with the sovereignty, and because it merely provides a form of government; it is not, therefore, applicable to us. He contended, from the act of Congress, and the Governor's commission, it was, undoubtedly, the intention of the President to give the same powers as had formerly been exercised by Governor Claiborne in Louisiana, on taking possession of that country, under similar circumstances. The constitution of the Cortes, he said, must not be referred to, to ascertain the powers of the Captain General, Intendant, and Governors of the Floridas; for, in that case, he went on to show, that the country would be left without civil government of any kind. According to that constitution, the Captain General is only a military officer, and the Governors of the Floridas are military officers under him. As Intendant, he would have no power.

The very able and satisfactory discussion this question has undergone by the gentlemen of the bar, by which the court was not only delighted, but instructed, has stripped it, in a great measure, of its difficulty. It, however, remains one of the first importance to the rights of the people of this country, and, as such, has received the most anxious consideration and attention of the court. Judicial power is an important trust, its execution often painful, and it does not hold out sufficient attractions to cause it to be sought after, especially by those who are duly and truly impressed with its awful responsibilities. It now becomes necessary for the court to inquire whether there exists sufficient judicial power in this country, since the change of sovereignty, to carry into effect the decrees of the late Governor of West Florida. If there is, where is it vested? It was not seriously contended that jurisdiction did not rest somewhere; but the difficulty on the part of the defendant's counsel consisted in pointing out the

tribunal. By referring to the act of Congress entitled "An act to carry into effect the treaty between the United States and Spain," the second section of which is in these words, "*And be it further enacted*, That, until the end of the first session of the next Congress, unless provision for the temporary government of the said territories be sooner made by Congress, all the military, civil, and judicial powers exercised by the officers of the existing Government of the same territories shall be vested in such person and persons, and shall be exercised in such manner as the President of the United States shall direct, for the maintaining the inhabitants of said territories in the free enjoyment of their liberty, property, and religion; and the laws of the United States relating to the revenue and its collection, subject to the modification stipulated by the fifteenth article of said treaty, in favor of Spanish vessels and their cargoes, and the laws relating to the importation of persons of color, shall be extended to the said territories. And the President of the United States shall be, and he is hereby, authorized, within the term aforesaid, to establish such districts for the collection of the revenue, and during the recess of Congress to appoint such officers, whose commissions shall expire at the end of the next session of Congress, to enforce the said laws, as to him may seem expedient;" there is no stipulation in the treaty that the sovereignty of Spain over the Floridas should continue in force one moment after the signing of the treaty, and certainly not after the time limited by it for its ratification. In morals and good faith, the sovereignty was, from that time, in the United States *de jure*, and Spain had only the government *de facto*. The act of Congress to carry into effect the treaty had relation back to that time, as is fully expressed in the ratification, not only of Spain, but the United States; and the United States are only bound to maintain the inhabitants of the ceded country in the enjoyment of their liberty, property, and religion.

We will here read the commission given by the President to Major General Andrew Jackson, and see what powers it has pleased the President to invest him with; which commission is in the following words, viz:

"JAMES MONROE, *President of the United States of America, to all to whom these presents shall come, greeting:*

"Whereas the Congress of the United States, by an act passed on the third day of the present month, did provide that, until the end of the first session of the next Congress, unless provision be sooner made for the temporary government of the territories of East and West Florida, ceded by Spain to the United States by the treaty between the said parties concluded at Washington on the 22d day of February, 1819, all the military, civil, and judicial powers exercised by the officers of the existing government of the same shall be vested in such person and persons, and shall be exercised in such manner, as the President of the United States shall direct, for maintaining the inhabitants of said territories in the free enjoyment of their liberty, property, and religion: Now, know ye, that, reposing special trust and confidence in the integrity, patriotism, and abilities of Major General Andrew Jackson, I do, in virtue of the above-recited act, appoint him to exercise, within the said ceded territories, under such circumstances as have been, or may hereafter be, prescribed to him by my instructions, and by law, all the powers and authorities heretofore exercised by the Governor and Captain General and Intendant of Cuba, and by the Governors of East and West Florida, within the said provinces, respectively; and do authorize and empower him, the said Andrew Jackson, to execute and fulfil the duties of this present appointment according to law; and to have and to hold the same, with all its powers and privileges, until the end of the next session of Congress, unless provision be sooner made for the government of the said territories so ceded by Spain to the United States: *Provided, however, and it is the true intent and meaning of these presents*, That the said Andrew Jackson, or any person acting under him, or in the said territories, shall have no power or authority to lay or collect any new or additional taxes, or to grant or confirm to any person or persons whomsoever any title or claims to land within the same.

"In testimony whereof, I have caused these letters to be made patent, and the seal of the United States to be hereunto affixed. Given under my hand, at the city of Washington, the tenth day of March, A. D. one thousand eight hundred and twenty-one, and of the independence of the United States of America the forty-fifth.

"JAMES MONROE.

"By the President:

"JOHN QUINCY ADAMS."

From this commission we collect the fact that it was the will and intention of the President to invest Governor Jackson with all the civil, military, and judicial powers exercised by the officers of the Spanish Government over the Floridas before the change of sovereignty, as he was empowered by the second section of the act of Congress before recited, with such limitations, and subject to such instructions, as it might please the President from time to time to prescribe. The said powers, given as aforesaid, are limited only by the following instructions and reservations of the President, which are, that the Governor of the Floridas shall have no power or authority to lay or collect any new or additional taxes, or to grant or confirm to any person or persons whomsoever any title or claims to land within the same. From the exceptions themselves, we arrive at the conclusion that all the civil, military, and judicial powers are given, with this further exception—such parts of them as are conferred on others; for all the above powers are vested somewhere, being absolutely necessary to carry on the Government.

The argument of the defendant's counsel against the jurisdiction of this court is predicated on the supposition that the constitution published by the Cortes of Spain is in force in this country; and, if we can show that it is not, it totally fails. We will here give a succinct history of this constitution, and show that it is not in force.

Some time in the year 1812, Ferdinand VII., King of Spain, was a prisoner in France; the Cortes, during the King's exile, framed the constitution, and published it in Old Spain; some sections of Old Spain adopted, and others rejected it. But it never was promulgated in any of the transmarine provinces of Spain, or any decree under it, during the time of Ferdinand's absence, so far as we have been able to learn, after diligent research and inquiry. On the 4th day of May, 1814, Ferdinand VII., having previously returned to Spain, and assumed the royal functions, by a solemn decree promulgated over his whole empire, dissolved the Cortes, annulled all their decrees, and made it treason in his subjects, or any of them, to attempt to carry the constitution or decrees under it into effect. In this situation the Government of Spain remained at the conclusion of the treaty between the United States and Spain, signed by their respective plenipotentiaries on the 22d day of February, 1819. The ratification of this treaty was unaccountably delayed on the part of Spain till the 24th of October, 1820. By the sixteenth article of the treaty, it was to have been ratified in six months next after the 22d of February, 1819, viz: on the 22d of August, 1819, or sooner, if possible. And, in the ratification, Ferdinand VII., by the consent and authority of the General Cortes of the nation, declared that the ratification should be as valid and firm, and produce the same effects, as if it had been done within the determined period, viz: the time prescribed by the seventeenth article. This, of itself, is sufficient to exclude the idea that the constitution of the Cortes is in force in this country. If any thing else is wanting, we have the fact that the constitution of the Cortes was only promulgated in the island of Cuba some time in the month of January, 1821, (about three months after Spain had parted with the sovereignty of the Floridas;) and, if it was ever promulgated in these provinces, it must have been after that time, and long since Ferdinand VII., in ratifying the treaty by the consent and authority of the General Cortes of the nation, had parted with the sovereignty, &c.

It cannot be seriously contended by the defendant's counsel that any act of Spain, after the ratification of the treaty, could be considered in force in the country ceded, by virtue of the proclamation of the Executive of this country. Such a construction and suchdoctrine is incompatible with the sovereignty of the United States over the Floridas. But it is said that the proclamation declares that all the laws and municipal regulations of Spain are in force. It must be remembered that the first part of that section of the proclamation alluded to states that the government of Spain has ceased, and that of the United States has commenced; these words qualify those general words relied on, and limit them to mean only so far as is compatible with the change of sovereignty. As well might he contend that Spain can legislate at this time for the Floridas. Legislation, being one of the attributes of sovereignty, must exclusively belong to the sovereign power. Can it be seriously contended that the constitution of Spain is in force here, as one of the laws and municipal regulations, continued in force by the proclamation of the Governor, founded on the act of Congress to carry into effect the treaty? We have now clearly proved, we believe, that the constitution of the Cortes is not in force here. By the second section of the act just referred to, the President of the United States is authorized to have the civil, military, and judicial powers exercised in *such manner* as he may direct; for it cannot be contended that he has not authority to place the judicial power wherever he pleases.

We will now proceed to show that the President did not consider the constitution of the Cortes was in force in this country; and for which purpose, it is only necessary to refer to the President's instructions, contained in the Governor's commission; wherein he takes from him the power of granting or making concessions of lands, or confirming those previously made.

Now, if he considered the constitution of the Cortes in force in this country, to have given these instructions, or expressly to have limited his powers in these particulars, would have been useless and unnecessary, as the constitution of the Cortes took away from the Captain General, the Intendant, and Governors of provinces the power of granting lands; therefore, on conferring on Major General Jackson the commission of Governor of the Floridas, to exercise the powers of the Captain General and Intendant of the island of Cuba and Governor of the Floridas, he did not intend that those powers should be limited and prescribed by the constitution of the Cortes, but that he should exercise them as they were exercised on the 22d of February, 1819, the day on which the treaty was signed. We therefore think Governor Jackson has the power to carry into effect the decrees of the late Governor of the Floridas. The counsel for the defendant, in his very able and ingenious argument, suggested that, as the President had appointed a judge of the United States for West Florida, possibly his tribunal might have jurisdiction of this case. He admitted, however, that he could not have jurisdiction, unless it was positively given him by statute, or the express instructions of the President. From the commission read, and the deductions already made, it fully appears that the jurisdiction of this case has been conferred on the Governor, and cannot be presumed to be given to the judge. Having seen the commission of the judge, he is expressly required, by instructions contained in it, to consider himself as governed by the laws of the United States; and the inquiry now is, what laws of the United States are extended to the Floridas, taken in contradistinction to the Spanish laws in force here? From the second section of the act entitled "An act to carry into effect the treaty between the United States and Spain," before read, we find that only such laws as relate to the revenue and the importation of people of color are extended to the Floridas. And as these subjects have been expressly excepted, and taken out of the general powers of the Governor, it is fair to presume that these subjects, and the cases arising under the two laws of the United States expressly extended to this country, are alone the legitimate objects of the judge's jurisdiction, until the contrary be shown from any instructions he may have from the President of the United States. In short, the judge's jurisdiction is not defined by any act of Congress, and he can exercise no jurisdiction that is not expressly given him by the President's instructions.

In conclusion, we will add, there are technical objections to the plea filed in this case. In a plea to the jurisdiction of this court, it is necessary to show that there is another court in which effectual justice may be administered; the plea under consideration wants that requisite, which alone ought to be sufficient to warrant this court in taking jurisdiction, lest there might be a failure of justice. We are perfectly satisfied that this court have jurisdiction, and therefore overrule the plea, and order the defendant to proceed to show cause, if any he has, why the decree of Don José Callava, late Governor of West Florida, should not be carried into execution.

THE HEIRS OF VIDAL
vs.
JOHN INNERARITY.

The defendant in this case, on the rule to show cause, filed several reasons why the decree, as prayed for, should not be carried into effect. These reasons have been ably argued both on the side of the defendant and the petitioners.

It now becomes the duty of the court to pronounce its decree; but, before doing so, we will endeavor to give a succinct statement of all the proceedings in the case.

We find, on the records of the judicial tribunal to which this court has succeeded, a decree, which does not appear ever to have been complied with. The duty of a judge to carry into effect the decrees of his predecessor is clearly pointed out by the *partidas*. It is true this cannot be called a final decision or judgment of the matter in dispute between the parties; yet, as far as it goes, it is *res judicata*, (or thing judged by the competent tribunal,) and remains only to be carried into effect, although, after being carried into effect, something may still remain to be done before a final close to the proceedings. The decree must either be executed or rescinded; the latter can only take place after examining the grounds on which it was entered up; and that we have a right to do this, we think at least doubtful, and certainly would not, unless gross injustice or contradiction appeared on the face of the decree itself. If a decree wanting those substantial requisites known to all laws should be made, it would be a nullity: as if pronounced without a citation to the defendant, or his being before the court, such would be looked upon as no decree. And all decrees can be set aside on the ground of fraud, or where corruption is shown in obtaining them. But where the decree stands unrescinded, it must be executed. Such, also, is the English law of equity: a decree must be first obeyed and performed; as if it be for land, the land must be first given up; if it be for money, the money must be paid; if for evidences, the evidences must be brought in; and the like in other cases. (Cooper's Equity, page 90.)

The decree under consideration embraces three distinct subjects:

1st. The deposite admitted to have been intrusted to the house of Forbes & Co., which the defendant represents; and this deposite is declared by the decree not to have been legally and regularly accounted for.

2d. The land at Baton Rouge, sold at the instance of Forbes, and which the decree now declares to be left open between the parties as the subject-matter of a distinct suit.

3d. The sale of property at New Orleans; moneys said to have been received at Madrid and elsewhere, and not accounted for.

As to the first, it was a subject within the control of the court at any time; that is, to compel the restoration of the deposite, or to account for its disbursement. The law on this point is clear, taking it for granted that the deposite has been made, that the depositary is, *quoad hoc*, under the control of the court. If it be notified to the depositary *that it is the will and pleasure of the court that the deposite be brought into court*, it is all he can ask or require. It would be absurd to say that the court should institute a suit, make up the pleadings, join issue, &c. in such a case, and that, too, when the deposite was placed by the order of the court in the hands of the depositary for safe keeping, always subject to its order.

The court are of opinion that the certificate of the clerks of the office that the decree of the late court was made known to John Innerarity, the defendant, is sufficient evidence of the fact. Great stress was laid by the defendant's counsel on the circumstance that a part of the certificate is contradicted by inspection of the paper, viz: that the defendant has affixed his signature, as evidence of notice to him; when, in reality, he has not. But we say that the certificate ought not to be impeached on this ground, because it cannot deceive; and if they had in reality acted corruptly in office, they would not have certified that as a fact which the certificate itself disproves. The affixing the signature of the party notified does not appear to be an essential formality, and is more frequently dispensed with than required. The *substance is notice to the party;* and this we think is sufficiently proved by the certificate of the clerks. As respects the decree to make the deposite, we think the defendant had sufficient notice. That part of the decree relative to the land, from its nature, is not before the court; it amounts to nothing more than declaring the subject open for the parties to prosecute their claims according to law.

The second is merely a decree to account to the court for property belonging to the estate sold in New Orleans and elsewhere. The decree to account is, in most instances, granted as of course. It follows the plaintiff's petition, and we can see nothing irregular in giving the defendant notice of both at the same time, particularly as no injury could result to him from this course.

Again: even supposing all these formalities necessary, taking into view all the circumstances of the case, it is an act of comity due from one court to another to presume that all the necessary preliminary steps were taken before the decree was made, unless the contrary be made most clearly to appear, which the defendant has failed to do in this case. Knowing that, even where citations are necessary, it is a principle of law that appearance will do away the necessity of process, or cure all its defects, is it a violent presumption to suppose he did appear? We think not; and the law, by which the court is bound, would clearly presume the fact. The petition before the court would, of itself, be sufficient to ground a decree similar to the one which is prayed to be enforced. It is not alleged that an account has been rendered of the property seized, and sold by Forbes & Co. in New Orleans; and it appears by a former decree that Forbes was expressly ordered to raise the attachment he had laid on the property, and proceed to make sale of it, and render an account. But, independently of this view of the subject, we conceive that the defendant was before the court as a party interested in the settlement of the estate of Vidal. This is not the case of a lawsuit between A and B; the subject is the complete and final adjustment of the estate of a deceased person, to affect the interest of all in any way concerned, to wit, the creditors, heirs, executors, administrators, and depositary. According to the Spanish law, as well as the law of equity in the United States and England, the court will not suffer the matter to go out of their hands, and be finally at rest, until complete justice be done to all concerned.

The affairs of the estate do not appear to have been finally closed when the first petitions were presented by the heirs. Although the petitions of Caroline and Mercedes Vidal had, in the first instance, nothing in view but to coerce the production of the papers relative to the estate in the hands of the defendant, yet the object was evidently to compel him to account, if, on examination of the papers, there should be any thing due them; and, in one of the petitions presented for the production of the papers, interrogatories are put to John Innerarity, the defendant, touching the very matters for which the decrees following the petitions, subsequent to their production, are rendered. To these interrogatories the defendant puts in a plea, in the nature of a demurrer, and his counsel has taken great pains to show he was not bound to answer them. This is not the question. It is, whether, by appearing, he is not to be considered as before the court in the particular demand of the heirs, as well as in the testamentary proceedings in general.

The defendant's inexplicable conduct in keeping back the papers, and producing them at last on compulsion, with the excuse that they were discovered by a "most extraordinary accident," does not incline the court to make any very violent presumptions in his favor.

The defendant is in the situation of a party brought before a court of chancery on a bill of discovery; being once before the court, justice will be done the parties on a view of the facts disclosed. In the Spanish courts, as well as in our courts of equity, the remedy does not exclusively follow the prayer; but the court will give such relief, and make such decree, as the nature of the case and justice may require. Again: we are of opinion that the court could order or decree that the depositary should bring the deposite into court, without being cited to hear the *dictamen* ordering him to do so, and could inform him of it in any manner the court thought proper. It is also our opinion that the decree to account for the proceeds of the property intrusted to him by the court is *ex parte*, and did not require a citation to hear it, as, in the matters under consideration, he was acting in a trust confided to him by the court, and is in that respect to be considered and viewed in the light of an officer of the court.

The court, for its own satisfaction, has compared the decree before them with the testamentary proceedings to which it refers, and are satisfied that the judge's *dictamen* is, in the main, fully supported. That the testamentary proceedings have been irregular, is self-evident; a complete inventory of the whole estate was never made. Three of the creditors, of whom Forbes was the principal, administered on the property found in this place, and afterwards, on the order of the court, handed it over to the executor, who made sale of the same. No inventory or appraisement appears ever to have been made of the real estate, and nothing but a loose and imperfect one was made of the effects in New Orleans.

The land was seized and sold under a mortgage made to Arroyo, in a manner so evidently irregular that we would be warranted in saying that it was fraudulent. The same tribunal, a year afterwards, annulled the sale, and ordered the property to be sold a second time. By a decree of Don José Callava, late Governor of this province, the second sale is declared void and illegal; and, by the *dictamen* now under the consideration of the court, the subject is again opened, and Forbes and others are admitted to make defence.

The proceeds of the sales of personal property were drawn from the hands of Annas, the executor, on the petition of Forbes, and placed in the public treasury; and afterwards, on application of Forbes, drawn out of the treasury, and placed in the hands of Forbes & Co. in the character of a deposite.

The second sale of the real property at Baton Rouge was ordered at a meeting of the creditors, of which Forbes appears to have been the principal; and the money in deposite is said to have been appropriated, on an order of the court, to the payment of the debt due Arroyo, for which the lands were sold in the first instance; and the proceeds of the second sale were placed in the hands of Forbes & Co. as a deposite.

The decree on which we are now acting, whether it be considered as relating to the first or second deposite, declares that the disbursement of the sum deposited has not been accounted for in a satisfactory manner.

The Spanish tribunal has thought proper to review the whole of the proceedings in the testamentary affairs of Vidal. We take it for granted it had a right to do so. Whether this court would have acted in this manner, or proceeded in a different way, is not the question. The court will take up the record as they find it, and, unless the *dictamen* is glaringly unjust on the face of it, or void of all the essential formalities, it must be substantially enforced.

The testamentary affairs were not closed; and we find, from every part of the proceedings, the former tribunal considered itself at liberty to retrace its steps when supposed to be in error. But when decrees are made, they must be executed; for it cannot be supposed that a court could be guilty of so much levity as to make them to-day, only to be rescinded to-morrow. From the pains evidently taken by the judge in examining the grounds and making up his decree, it cannot be presumed, as intimated by the defendant's counsel, that he intended merely to amuse the plaintiffs, and that the approbation and signature of the Governor were obtained by *legerdemain;* this would cast a most gross imputation on the tribunals to which we have succeeded. The present case is one where the former tribunals have reviewed their own decrees; and is it for us to say that they had no right to do so, especially when we find that the same thing has been done in various instances in the progress of this testamentary proceeding? Although we might consider ourselves restrained from reviewing and re-examining their decrees, (except on the grounds before stated,) yet this is very different from saying they have no right to correct their own proceedings. We find them in the present case thus corrected, and are called upon to execute the last *dictamen.* We will do so substantially.

Therefore, it is ordered, adjudged, and decreed by the court, that John Innerarity, the defendant, produce exact accounts, supported by legal documents, within twenty days from this day, according to the decree of Suares and Callava, dated Pensacola, 30th of June, and 1st of July, 1820, before such auditors as this court shall appoint. And it is ordered, adjudged, and decreed, that the said Innerarity hypothecate, before the notary public of Pensacola, unincumbered real property situate in the city of Pensacola, to be valued at $8,500, within five days from this time, to secure the deposite and interest thereon, for the purpose of satisfying any final decree this court may pass against him on account of said deposite. And it is further ordered, adjudged, and decreed, that, in case the said Innerarity should fail to comply in giving the security ordered on the sixth day, the petitioners may have execution for the sum of $8,500. Said execution is first to run against the personal property of the said Innerarity; after that is exhausted, it may run against his real property; and, after that is exhausted, his body may be taken in execution.

And it is further ordered, adjudged, and decreed, that the said sum, or such part of it as may be made, shall be brought into court, and be subject to its further order; and that the execution be returnable in thirty days from the day it issues. And, lastly, it is further ordered, adjudged, and decreed, that the heirs of Vidal may prosecute their claims relative to the 16,000 acres of land, as authorized in the *dictamen* of Suares of the 30th of June, 1820, and confirmed on the 1st of July, 1820, by Callava.

JOHN C. MITCHELL.

Approved:

ANDREW JACKSON, *Governor of the Floridas, &c.*

To F. H. Nisbet, J. De la Rua, and William Davidson, Esqrs.

HEIRS OF VIDAL
vs.
JOHN INNERARITY.

WEST FLORIDA, EXECUTIVE CHAMBER, *September* 17, 1821.

In virtue of a decree this day rendered in the above case by Major General Andrew Jackson, Governor of the Floridas, &c. and John C. Mitchell, Esq., sitting as the supreme court of judicature in this province, you are hereby appointed auditors to arrange and settle the said estate; and you will appear before me at the Executive Chamber to take the requisite oath for the faithful discharge of the duties assigned you.

JOHN COPPINGER CONNOR, *Clerk of the Executive Court.*

SEPTEMBER 18, 1821.

The above-named auditors appeared before me this morning, and, having taken the oath prescribed, were considered as qualified to enter upon their duties.

The said auditors then appointed Edward A. Rutledge, Esq. as secretary to the board.

Test: JOHN COPPINGER CONNOR, *Clerk of the Executive Court.*

III.

Secretary of State to Governor Jackson.

SIR: DEPARTMENT OF STATE, WASHINGTON, *October* 26, 1821.

I have had the honor of receiving your letters of 30th July, 26th August, and 1st September, with their respective enclosures, which have been submitted to the consideration of the President of the United States.

I now enclose a copy of a letter which I have, by his direction, written to Judge Fromentin, informing him that it was understood and intended that his jurisdiction should be confined to the execution of the only laws of the United States which, by act of Congress, had been extended to the territories of Florida, namely: the laws relating to the revenue and its collection, and to the slave trade. In the execution of these laws, which are of a nature entirely distinct from those of Spain, operating in the provinces, the President is of opinion that he should be amenable only to the Government of the United States.

I enclose, also, translations of a letter from Mr. Salmon, the chargé des affaires of Spain, and of a statement by Colonel Callava, relative to the arrest and detention of his person, and of the forcible seizure and abduction, under your authority, of certain papers which were in his possession, with a copy of the answer given to the letter of Mr. Salmon. Before an ultimate answer shall be given to the Spanish minister upon this complaint, the President has thought it proper to transmit these documents to you, with the purpose of receiving any remarks, either in relation to the facts alleged, or to the principles asserted in them, which you may think the occasion requires.

Appreciating, as the President does, the sense of duty under which you felt yourself compelled to resort to these measures, and the objects of high and impartial justice to which they were in your estimation rendered indispensable, I am directed particularly to invite your attention to the following circumstances represented in these papers:

1. That Colonel Callava claimed as of right the immunities, with reference to his person, to his dwelling-house, and to his papers, which, by the customary laws of nations, belong to public commissioners appointed to negotiate or to execute treaty stipulations between nation and nation.

2. That you had transacted business with him in the capacity of a public commissioner as late as the 3d of August, three weeks after the day on which the surrender had been made of the territory.

3. That the papers finally seized by your orders had never been officially demanded, and that he had offered to deliver them, or give adequate security that they should be delivered, if they should prove to be of the description of papers stipulated by the treaty to be left in the territory.

4. That, at the time when he was forcibly brought before you, and required to submit to examination upon interrogatories, neither the questions asked of him, nor his answers, were correctly interpreted.

It is proper to apprize you that, in the opinion of the President, so far as Colonel Callava could justly claim the rights of a commissioner for the surrender of the territory, he was entitled to all the immunities which might be necessary for the execution of his trust, and which the laws of nations recognise as belonging to public ministers. As authority for this opinion, I refer you to Vattel, book 4, ch. 6, § 75, and ch. 9, § 125.

A different sentiment appearing, from your letter of the 26th August, to have been entertained by you, it would be satisfactory to learn upon what grounds it had been taken up; or, if the privileges incident to this immunity had in your view ceased, it is desirable to know the considerations upon which you had so deemed of them; the view taken of them in the answer to the note of Mr. Salmon admitting the right only in general terms, and inferring that they had ceased by the act of surrender, and of reasonable time for departure, as well as by the limitation of the time for the surrender stipulated in the treaty.

I shall reply as early as possible to the other subjects of your letter; and, in the mean while, have the honor to be, with great respect, sir, your very humble and obedient servant,

JOHN QUINCY ADAMS.

ANDREW JACKSON, Esq., *Governor of Florida.*

IV.

Governor Jackson to the Secretary of State.

SIR: NASHVILLE, *November* 13, 1821.

I arrived at this place on the 5th instant, and have deferred writing you until the present moment, indulging the expectation that I should in the mean time have received some communications of interest from the Floridas; in this calculation, however, I have been disappointed, in consequence of the irregularity of the mails between this and that place. There has been no arrival, bringing any thing of a later date than that of my departure from Pensacola.

From the National Intelligencer I have discovered that a publication has appeared in the Charleston Patriot, purporting to give the substance of a correspondence between Judge Fromentin and myself, with accompanying strictures upon the same; and stating that "detailed accounts of the whole affair," with copies of said papers, had been transmitted to Washington; that they "have been confided to individuals, and are circulated privately." On referring to my former communications, I do not find that a copy of that correspondence has been forwarded to the Department of State; and believing, as I do, from Judge Fromentin's disregard to truth, that he has secretly circulated it, without the accompanying certificates, for the purpose, if possible, of forestalling public opinion, I herewith enclose copies of all the documents touching the transaction, with a request that they may be laid before the President, and, should it be deemed necessary, to be communicated for the information of the Congress of the United States. This *exposé* furnishes a satisfactory view of the whole ground in dispute, and incontestably proves that Judge Fromentin has been guilty of wilfully and wickedly fabricating the most palpable falsehoods. The evidence of such unblushing depravity and corruption should be placed in the possession of the President, and, in strict justice, deserves to be exposed to the execration of the whole American people. When an officer of such high responsibility under the Federal Government manifests such baseness and obliquity of heart, it ought to excite our alarm, and stimulate the proper authority to apply the most speedy and efficient remedy.

When Judge Fromentin appeared before me, in obedience to the citation served upon him, and made what I conceived to be a sufficient apology for interfering with my jurisdiction, by issuing the writ of *habeas corpus*, and having explicitly and positively promised that he would not again do any act to impede the exercise of my prerogative, I was perfectly willing that the affair should here be put to rest, and, if possible, be buried in oblivion. With this view alone, I barely required his signature to so much of the proceedings between us as was absolutely necessary for my own justification, and to show that he had granted the writ without petition or affidavit, agreeably to law, and that he did not recollect to whom or to which of the applicants it had been delivered!

Although the judge, in the publication referred to, asserts that our interview and its results were the topics of conversation in the town of Pensacola for a week after they transpired, I can confidently state that they never did become the subject of remark where I was present, except on the evening subsequent to his discharge. On that occasion there appeared to be a universal concurrence of opinion that the judge's apology, as made in the presence of several respectable gentlemen, was a correct and prudent measure on his part, and that it was an act of leniency and forbearance on mine, in thus terminating this hasty and indecorous attempt to embarrass the administration of justice; inasmuch as the instructions and duty of the judge enjoined it upon him to co-operate with me in the administration of the Government, and in distributing justice equally to all. A general surprise was also expressed at the circumstance of his sympathies being exclusively enlisted for the relief of Colonel Callava! With respect to poor Domingo Sousa, and Fullarat, the steward, the law was to be permitted to take its course, and, although the servile instruments of Callava, they were to be left to their fate! For them, Judge Fromentin seems to have had no bowels of compassion. They might have perished, and rotted in prison, before he would have stepped forward, with the sanction of his authority, for their deliverance. The fact was, they had no wealth or influence, and the judge was not, consequently, clothed with the power to issue a writ of *habeas corpus* for their relief. Agreeably to his principles, the laws of the United States are only made for the punishment of the humble and pennyless; but, whenever opposed to wealth and power, they must either remain inoperative, or, if enforced, it must be done with great delicacy and respect. This course of proceeding may very well comport with the corrupt and inquisitorial system of former Spanish tribunals, but they are clearly and palpably unjust, and merit the unqualified reprobation of every honest and intelligent American. I can assure you that, so far as I have been enabled to collect an expression of public sentiment relative to the conduct of Judge Fromentin, it has evidently rendered him so odious and contemptible, that his name is only mentioned in genteel circles to be deprecated and despised. It is considered so flagrant and flagitious a departure from justice and propriety, as seriously to impair his standing, and rather to produce disaffection than inspire respect and confidence in the American authorities in Florida.

Situated as Judge Fromentin was, I did not anticipate that he would have had the hardihood and temerity to revive this transaction, and make it a subject of public investigation. Good sense, as well as the best policy, would certainly have dictated a very different procedure. After his concessions and open acknowledgments that he had acted hastily, and without a due consideration of the case, it could not have been expected that the most abandoned and profligate would have denied the facts, particularly when those declarations were made in the presence of several gentlemen of the most unimpeachable integrity. The man who could thus prostitute his signature for the propagation of such glaring and barefaced falsehoods evinces an effrontery almost without a parallel, and a destitution of principle very incompatible with the character of one selected to administer the laws as judge of the United States. Elevated as he was, I had hoped that I should meet with a manly feeling and lofty integrity corresponding with his honorable station; but I sincerely regret to say that he has displayed a want of honesty and candor only becoming an apostate priest, and which is enough to suffuse the cheek of depravity itself with a blush. I may, perhaps, express my indignation upon this subject with too much freedom. If the language is harsh, I am willing to acknowledge that it does not altogether become me, but I am not convinced that it is not merited in its application.

Upon a perusal of the whole correspondence and accompanying documents, and after a mature consideration of the subject, I am induced to believe that the President will be entirely satisfied of Judge Fromentin's having acted regardless of principle and duty, and that he is altogether unworthy of the confidence reposed in him as a judicial officer of the United States. To communicate the testimony necessary to establish this fact, I have been impelled by the imperative obligations which I feel myself bound to discharge in justice to myself and our common country.

With every assurance of respect and esteem, I am, &c.

ANDREW JACKSON, *Governor of the Floridas.*

P. S. Doctor Bronaugh will hand you several depositions and reports in the case of Callava, which I have forwarded in addition to those heretofore transmitted upon the same subject. It is my desire that they should be submitted to the President, and, if called for, to be laid before Congress. Altogether, they demonstrate the falsehood of Callava's statement, and show how little regard he had to truth in making it.

ANDREW JACKSON.

Ho J. Q. Adams, *Secretary of State.*

No. 1.

Judge Fromentin to Governor Jackson.

Sir: Pensacola, *September* 3, 1821.

I am informed that it is rumored in town that, in the interview between your excellency and myself, in the afternoon of the 24th ultimo, I had apologized to your excellency for issuing a writ of *habeas corpus* in the case of Colonel Callava. I hope your excellency will not hesitate in enabling me effectually to contradict that report.

Your excellency cannot have forgotten that, from the beginning to the end of the conversation, I insisted, not only on the right, but on the duty of a judge of the United States to grant that writ; and that, among other things, upon being questioned by your excellency whether I would order a writ of *habeas corpus* to be served upon the Captain General of the island of Cuba, I told you *no;* but that I would not hesitate, if the case should require it, and if I had the necessary jurisdiction, to issue one to be served on the President of the United States. To this you answered, that the President was only liable to impeachment; I added that I was confident that, in my place, you would have issued a writ of *habeas corpus.*

I have the honor to be, &c.

ELIG. FROMENTIN,
Judge of the U. S. for West Florida, &c.

His Excellency Governor A. Jackson.

No. 2.

Governor Jackson to Judge Fromentin.

Sir: Pensacola, Executive Chambers, *September* 3, 1821.

Your note, by Mr. Scott, has just been handed to me; and I am truly astonished at its contents, and, in answer, state, that when you appeared before me in the Executive Chamber on the 24th ultimo, you did then and there state, and acknowledge, that you had acted hastily, without due consideration, and without proper information as to the facts of the case, upon the importunities of John Innerarity and some other Spanish gentlemen; and that, had you been apprized that Colonel Callava had been committed by me for contempt of my authority, you certainly would not have interfered; and you further acknowledged that you had called upon me several times in a friendly way to advise with me as to your jurisdiction, and that I had always told you that it was my opinion you had no other jurisdiction, except as far as the laws of the United States had, by the act of Congress, been extended over these provinces; and that, when I showed you the powers which had been granted to me by the President of the United States, you declared that there was no necessity for your being here, and that you might as well return to New Orleans; and that I replied that you had jurisdiction over the revenue and the infraction of the laws of Congress prohibiting the importation of slaves. And you did then declare that, hereafter, you would in no way attempt to interfere with my authority.

There was likewise some conversation in relation to the powers of a judge of the United States to issue a writ of *habeas corpus* in the States, except in particular cases; and I stated to you that, if you were in the States, you would have no right to interfere in the manner which you had attempted here, and referred you to the laws of Congress. If this, sir, was not an apology, I know not what is. I received it as such, and dismissed you accordingly, under the citation by which you were brought before me to show cause, &c.

I am, sir, with due respect, &c.

ANDREW JACKSON, *Governor of the Floridas, &c.*

Eligius Fromentin, *Judge, &c.*

No. 3.

Judge Fromentin to Governor Jackson.

Sir: Pensacola, *September* 3, 1821.

If your excellency has been astonished at my letter, I may assure your excellency that I have been not less so at reading your answer. I "acknowledge that I had acted hastily, without due consideration, and without

proper information as to the facts of the case, upon the importunities of John Innerarity and some other Spanish gentlemen; and that, had I been apprized that Colonel Callava had been committed by you for contempt of your authority, I certainly would not have interfered!" Never, sir, never! my blood recoils at such a statement. Its last drop will flow before I subscribe to it.

Give me leave, sir, to put your excellency in mind that you began the conversation, and I could scarcely find time to place a word; nor did you hear me mention Mr. Innerarity's name, nor any other name, until your excellency asked me who were the persons that had applied for the writ; and then I mentioned Mr. Innerarity's name, with the names of the other gentlemen who, jointly with him, had applied for it. The conversation then turned on the verbal application for the writ, when Doctor Bronaugh entered, and reduced that part of it to writing. The extent of your powers was the next topic, and you read the act of Congress, and began to read one of your commissions. But neither then, nor at any time before, did your excellency favor me with an entire perusal of your several commissions.

On that occasion, as on every other preceding occasion, when our respective powers and duties were the subject of conversation, you insisted on my being confined to the two cases stated by your excellency; and, as that had already been referred to the President, it was unnecessary for me to insist.

It is most assuredly true that I said that I never had, nor ever would interfere with your authority; nor indeed, sir, the anthority of any other man. But, sir, does it follow that I am disposed to surrender the authority vested in me? Assuredly not. Legal authority is one thing; illegal authority is another thing. Upon that we differ. A higher tribunal than yours or mine must of course pronounce.

I have the honor to be your excellency's obedient servant,

ELIGIUS FROMENTIN.

His Excellency Governor ANDREW JACKSON.

No. 4.

Governor Jackson to Judge Fromentin.

SIR: PENSACOLA, *September* 3, 1821.

I have this moment received your second note of this day. The first excited my astonishment, it is true; but the second my indignation and contempt; for I did not suppose, until your note now before me furnished conclusive evidence, that you were capable of stating a wilful and deliberate falsehood. That you have done so in your note of this evening, I do assert, as the enclosed certificates of Dr. J. C. Bronaugh (who was directed by me to pay particular attention to our conversation) and Mr. Rutledge fully prove. That you have the hardihood to deny that, when you called at my house, I did not send for my book to the office containing the record of my commissions and instructions, and that I did not read the whole of them to you, shows that you are regardless of truth; and in this I do pronounce that you have stated another deliberate falsehood.

I have barely to add, that I recommend to you to keep within your legal jurisdiction and powers. Whilst you do this, all your proceedings will be supported, and all my aid given that may be necessary to carry them into effect; but when you attempt to transcend them, and interfere with my legitimate powers, recollect the admonition I gave you when before me on the 24th ultimo, and attend to it, or you will be treated and punished as you deserve, regardless of your boasts of blood flowing, &c., which pass by me as the fleeting breeze.

Here, sir, on this subject, our communication closes, as I am too much engaged to read yours.

I am, sir, yours, &c.

To ELIGIUS FROMENTIN, Esq. A. JACKSON.

No. 5.

SIR: PENSACOLA, *September* 3, 1821.

Agreeably to your request, I have the honor to state that I was present when the conversation took place between Judge Fromentin and yourself on the 24th ultimo, on the subject of his having issued a writ of *habeas corpus* in the case of Colonel Callava, and that I paid the most particular attention to every thing which occurred on that occasion, and that you have correctly stated the substance of that conversation in a letter of this date, which I copied, addressed to Judge Fromentin.

After some remarks made by you in relation to his improper and indecorous interference in a case where your authority was attempted to be set at defiance, and that, too, by force of arms, and while sitting in your judicial capacity treated with contempt, Judge Fromentin did acknowledge that he had acted hastily, without due consideration, and without a proper knowledge of the facts, and that he had issued the writ of *habeas corpus*, having been urged to it by a number of individuals; and, being requested to name them, mentioned Innerarity, La Rua, Brosnaham, and some others; and declared that, had he been informed that you had committed Colonel Callava for contempt of your authority, while sitting in your judicial capacity, the writ of *habeas corpus* would not have been issued; and that, for the future, he should in no way attempt to interfere with your authority and powers.

I have the honor to be, very respectfully, sir, your most obedient, humble servant,

J. C. BRONAUGH.

To His Excellency ANDREW JACKSON,
Governor of the Floridas, &c.

No. 6.

I have attentively read the foregoing certificate of Dr. J. C. Bronaugh, and, being present during the interview alluded to, do certify that it is minutely and substantially true.

ROBERT BUTLER.

No. 7.

SIR: PENSACOLA, *September* 3, 1821.

In compliance with your request that I would explain to you my understanding of that part of the conversation which took place between your excellency and Judge Fromentin, upon the appearance of the latter before you, agreeably to citation, on the 24th ultimo, relative to these points: whether Judge Fromentin did or did not say that, had he been aware of the circumstances of Colonel Callava's commitment, he would not have issued the writ of *habeas corpus* in his favor, as he had done; and whether he did or did not declare that, in the future exercise of his functions, he would carefully avoid interfering with the lawful subjects of your excellency's jurisdiction, I have the honor to state as follows: that I was present during the whole of the conversation; and, although

neither a retentive memory, nor particular attention paid at the time to the words used by Judge Fromentin, warrant me in referring to them, yet the impression which remains upon my mind, from the conversation above mentioned, is clearly this: that Judge Fromentin, after hearing the act of Congress, one of your excellency's commissions, and some other documents, read, endeavored, by adducing the peculiar circumstances under which the writ had been issued, to offer something equivalent to an apology for the course he had pursued, and gave your excellency distinctly to understand that he was determined not to interfere in future with any of the branches of your administration.

I have the honor to be, respectfully, sir, your excellency's most obedient servant,

E. A. RUTLEDGE.

To His Excellency ANDREW JACKSON,
Governor of the Floridas, &c.

No. 8.

NASHVILLE, *November* 12, 1821.

I certify that I was present when Eligius Fromentin, shortly after he had received his commission as judge in West Florida, called upon Andrew Jackson, Governor of the Floridas, &c. &c. with the view of consulting with him (as he stated) upon the nature and extent of the powers with which he (Fromentin) was clothed as judge of the United States. He expressed himself as being absolutely at a loss to discover what duties he had to perform, and desired that Governor Jackson would candidly advise him as to the course he ought to pursue. The Governor, in plain and friendly language, told him that the only United States laws extended to the Floridas by the act of Congress were the laws regulating the revenue and prohibiting the importation of slaves, and that he therefore believed his jurisdiction could reach no further than to cases arising under those laws. The Governor further told him that, if he could gather any light on the subject from a perusal of his commissions and instructions, they were at his service for perusal; and that, as the executive clerk was then busily engaged, if he would call on some future occasion, he would read him all his powers.

After this conversation Judge Fromentin retired, and accordingly called the next morning. Governor Jackson was at that time engaged, not in his house. The judge retired, and about one o'clock of the same day returned. After some conversation of the same purport with that before stated, the Governor requested me to go for the record book containing his commissions and letters of instructions. I returned with Mr. Connor, the executive clerk, who brought and handed the book to the Governor. The Governor then read his commissions and letters of instructions, and handed the same to Judge Fromentin, with permission to read.

The three commissions given by the President of the United States to Governor Jackson, and containing all his powers and instructions, were before Judge Fromentin, who, after expressing his satisfaction, having read, closed, and returned them, with some remarks which left no doubt upon my mind of his entire concurrence with the view taken of the subject by the Governor, left the room, saying that he "had as well be off to Orleans," there being little for him to do, or words to that effect.

The above detail gives only the substance of the conversation between the individuals named; the undersigned does not certify that he has given the precise language used by them.

ANDREW J. DONELSON, *2d Lieut. Eng. Corps.*

No. 9.

OFFICE OF THE EXECUTIVE OF FLORIDA,
PENSACOLA, *August* 23, 1821.

Present: His Excellency the Governor.

The order for the discharge of Colonel Don José Callava, Domingo Sousa, and Antoine Fullarat, being under the consideration of his excellency, the same being written, but not issued, Captain Wager, the officer of the day, presented to his excellency the following communication, viz:

SIR: PENSACOLA, W. F., *August* 24, 1821.

I have the honor to state that the within paper from Judge Fromentin was handed to and served upon me as officer of the guard stationed at the calabouse on the 23d instant, by a person who I have reason to believe was Dr. Brosnaham of this place, who stated that he served it as a friend, and who, on being informed that no notice would be taken of the within paper, retired.

Very respectfully, &c.

G. W. MOUNTZ, *Lieut. 4th U. S. Infantry.*

To His Excellency ANDREW JACKSON, *Governor of the Floridas, &c.*

The within paper was handed, immediately on its receipt, to Captain Wager, officer of the day.

G. W. MOUNTZ, *Lieut. 4th U. S. Infantry.*

The United States to Lieutenant G. W. Mountz, of the 4th regiment U. S. infantry, greeting:

You are hereby commanded that you forthwith have the body of José Callava, late Governor of the province of West Florida, now in your custody, as is said, together with the day and cause of his caption and detention, by whatever name he may be known, before the judge of the court of the United States for West Florida, and for that part of East Florida which lies westward of the cape, at his chambers in the city of Pensacola, to do, receive, and submit to whatever the said judge shall consider in that behalf; and have you then and there this writ, with your doings thereon.

Witness, Eligius Fromentin, judge of our said court, this twenty-third day of August, in the year of our Lord eighteen hundred and twenty-one.

I allow this writ:

ELIGIUS FROMENTIN,
Judge of the United States for West Florida, and for that part of East Florida which lies westward of the cape.

Whereupon, it was ordered by his excellency the Governor that Captain Wager report to Mr. Fromentin that the prisoners were confined for an open contempt of his excellency's orders and decrees, and that he would keep them confined, agreeably thereto, until released by his excellency's orders. And his excellency the Governor issued the following further order, viz:

Eligius Fromentin, Esq. will, forthwith, be and appear before me to show cause why he has attempted to interfere with my authority as Governor of the Floridas, exercising the powers of the Captain General and Intendant of the island of Cuba over the said provinces, and of the Governors of said provinces, respectively, in my judicial

capacity as supreme judge over the same, and as chancellor thereof; having committed certain individuals charged with a combination to secrete, and with having attempted to secrete and carry out of the territories ceded to the United States the evidence of individual right to property within the said territories, which has been secured to each individual under the second article of the late treaty with Spain, and in open contempt of the orders and decrees made by me; and that the said Eligius Fromentin, Esq. be and appear before me at my office, at 5 o'clock, P. M., in Pensacola, to make known the above cause, and to abide by and perform such order and decree as the undersigned may of right deem proper to make of and concerning the same.

Given under my hand, at Pensacola, this twenty-third day of August, 1821.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To Colonel GEORGE WALTON, Secretary of West Florida, to make known and execute the above, and to furnish a copy of the above, if required, returning this original, and in writing make known how he has executed the same.

Upon which order Colonel Walton made the following return, viz:

AUGUST 23, 1821.

By virtue of the above order, I have summoned Eligius Fromentin, Esq. personally to appear at the office of his excellency Major General Andrew Jackson at 5 o'clock this afternoon, and, at his request, have furnished the said Eligius Fromentin with a copy of the above order, certified under my hand as Secretary of West Florida; and the said Eligius Fromentin, in answer to the said summons, declared his perfect willingness to obey this and every other order of his excellency the Governor; but asserts that he is unable, through indisposition, to attend this afternoon, as above he is required.

GEORGE WALTON, *Secretary of West Florida.*

Whereupon, it is ordered by his excellency that further time, till to-morrow afternoon at 3 o'clock, be given to the said Eligius Fromentin to appear and show cause as above he is required.

OFFICE OF THE EXECUTIVE OF FLORIDA, PENSACOLA, *August* 24, 1821.

In obedience to the orders of his excellency the Governor, Judge Fromentin appears and acknowledges that he granted the writ of *habeas corpus* without the affidavit of any person, and that it was granted upon the *verbal* application of a number of individuals; and, upon being questioned as to the individuals who made the application, named La Rua, Innerarity, Brosnaham, and Father Coleman. Upon being asked to whom he delivered the writ to be served upon the officer who had in custody Colonel Callava, he replied that he delivered it to one of the persons who made application for it, but to which he does not know.

ELIGIUS FROMENTIN.

NOTE.—The word *verbal* interlined in the original by Judge Fromentin.

Whereupon it was ordered by his excellency that the said Eligius Fromentin be dismissed without day, &c.

V.—*Papers left at the Department of State by Dr. Bronaugh.*

No. 1.

Lieutenant Mountz to Governor Jackson.

SIR: PENSACOLA, *September* 24, 1821.

In compliance with your order of the 22d instant, I have the honor to make the following detail of facts which transpired on the night of the 22d of August ultimo, all of which came under my immediate observation: About seven o'clock on the evening above mentioned, I was detailed to take command of a guard of twenty men, with orders to report to your excellency, which I accordingly did; and, after receiving written instructions from you, proceeded, in company with Colonel Butler, Dr. Bronaugh, and Judge Brackenridge, to the house of Colonel Callava, the late Spanish Governor. On my arrival at the outer gate of his residence, I brought my guard to a halt; admittance was demanded by some one of the gentlemen above named, but no response was made; upon which the bolt or latch was removed, and we entered. When we reached the dwelling, admission was again asked for, in the name of the Governor; but no reply was made from within. A few minutes after this reiteration, some one stated that entrance might be gained at the other side of the house. I then marched my guard round, and took post in front of the house; Colonel Butler, &c. also went round and ascended the stairs to the piazza, where a number of persons were sitting. The darkness of the night prevented me from distinguishing who or what they were, there being no light, apparently, in the house. After a candle was procured, I was ordered, with my guard, into the house. Colonel Butler soon after informed me that Colonel Callava refused to deliver up the papers which your excellency demanded of him, and requested me to put the orders I had received into immediate execution. I accordingly told Colonel Callava, through Judge Brackenridge, that his refusal to comply with the aforesaid demand compelled me to consider him my prisoner. He replied, through the same organ, that he would go with me as a prisoner, but represented that he was very unwell, and that I would be accountable for taking him from his sick bed at that time of night. I rejoined that I had no discretion on the subject, being in the discharge of my official duties. He then dressed himself, and, after proffering me his sword and cane, (which I refused,) proceeded with me to your excellency's office, where I delivered him up. Before leaving the house, a corporal and three men were left, by order of Colonel Butler, to prevent any person from passing in or through the house. After the fulfilment of your excellency's order to convey Colonel Callava to the calabouse, the guard under my command was dismissed. Nothing indecorous or improper, on the part of the guard, or of any of the gentlemen commissioned by you, or of other persons, took place during the evening, to the best of my knowledge.

With respect to the occurrences of the succeeding day, (23d,) I have to state that I was officer of the guard, at the calabouse, on that day; and that, on the receipt of the order to release Colonel Callava, I handed it to his secretary, who, after conveying the contents to Colonel Callava, said that he wished Judge Fromentin to be sent for, in order that he might accompany him to his house, (for what purpose I know not.) He was told that the judge was sick, and could not come, but that some justice of the peace would answer as well. What reply he made to this, I am not able to say; he soon after left the prison in company with the officer of the day and a number of Spanish officers.

This statement comprises all the information on the subject which I am possessed of.

Given at Pensacola, West Florida, this 24th day of September, 1821.

Very respectfully, &c.

G. W. MOUNTZ, *Lieutenant United States Army.*

To His Excellency ANDREW JACKSON, *Governor of the Floridas, &c.*

True copy: J. C. BRONAUGH.

No. 2.

Captain Dade to Governor Jackson.

SIR: PENSACOLA, WEST FLORIDA, *September* 25, 1821.

In compliance with your request, made to me this morning through Colonel Walton, I have the honor to state, that, on the 22d ultimo, Domingo Sousa, a Spanish officer, was delivered to me, then the officer of the day, as a prisoner, by your excellency, with written instructions to keep him in custody until he should produce, or cause to be produced and delivered, to the alcalde, certain documents and papers therein enumerated. That I went with Domingo Sousa to see Colonel Callava, in whose possession he said the papers were, and to whom he wished to apply for them. We found him at the house of Colonel G. M. Brooke, in company with Mr. Innerarity and several Spanish officers. He was informed that Domingo Sousa was a prisoner in my custody; the instructions given me were produced, and his secretary, Lieutenant Cruzat, explained them. Colonel Callava, having directed Domingo Sousa to put on the uniform and surrender himself prisoner, said, as well as I could understand from Lieutenant Cruzat, that he (Domingo Sousa) was an officer acting under his orders, and that any papers your excellency might want must be required of him, as commissioner, when they should be delivered. I returned with Domingo Sousa to the Executive Office, and made report to your excellency.

I am, respectfully, your most obedient servant,

F. L. DADE, *Captain 4th Infantry.*

His Excellency ANDREW JACKSON.

A true copy: J. C. BRONAUGH.

No. 3.

Affidavits of Scott and Mitchell.

On the evening of the 22d of August, 1821, Mr. Scott and myself were walking on the public square, and, hearing Lieutenant Jackson (adjutant of the 4th regiment) order twenty men to be paraded immediately, with twenty rounds of ball cartridges, we were induced to go up to him and inquire what was the matter. He informed us that he was ordered to have the men before the Governor's house, to await his orders.

The soldiers were placed under the command of Lieutenant Mountz.

Mr. Scott and myself, after the men left the Governor's, followed them to Colonel Callava's; when the party arrived there, they found the gate fastened. It was opened by some one of the party—whom, we do not know. Some persons went up to the door, and shortly after the party were ordered up to the door of Callava's house, and admittance was demanded, after knocking very loud, but no answer was returned. Admittance was then demanded by authority of the Governor, (as we understood, in Spanish;) but not knowing the language, we cannot say any thing positive on this point; however, no answer was returned. Colonel Butler then ordered the door to be broken down; but, before the order was attempted to be executed, it was reported that the house was open on the other side; the party went round, and we saw on the portico several gentlemen dressed in Spanish uniform, with their side arms on. Colonel Butler asked in Spanish, through an interpreter, where Colonel Callava was; their answer, as translated into English, was, they did not know.

Candles were then ordered to be sent for; but, before they were brought, some of the party went into a room where a candle was burning, and brought it into what might be called the hall.

Colonel Butler then ordered Lieutenant Mountz to send up a party of his men with their bayonets; they, with others, went into the room from which the candle was taken, and Colonel Callava made his appearance with his coat off.

Colonel Butler and Dr. Bronaugh then stated, through the medium of an interpreter, (Judge Brackenridge,) that they came for the papers he had promised to deliver, and that they must have them, or take him before the Governor. Colonel Callava (as was interpreted) answered that they might murder him, but he would not leave his room alive; and as to the papers, they might break open the seals and boxes, and take them, but he would not give them up. Colonel Butler and Dr. Bronaugh refused to take them in this way, not having authority to do so, (as they said;) but told Colonel Callava that he might consider himself in duress, and give them up, and they would receipt for them. Some time was consumed in persuading Colonel Callava to comply; but he refused.

Colonel Butler then requested Colonel Callava to go with him to the Governor, stating that he did not wish (as we understood) to have his person outraged, and that he might consider force as applied; but Colonel Callava still refused, (as we understood,) declaring that he would not leave his room alive (as it was interpreted.)

It is but justice here to remark, that every indulgence and consideration was extended to Colonel Callava that the nature of the case could justify.

Colonel Butler then ordered Lieutenant Mountz up into the room, and reported to him that Colonel Callava had refused to deliver up the papers. On receiving the report, Lieutenant Mountz told Colonel Callava he was his prisoner, and must go with him to the Governor. Colonel Callava put on his coat and went. We did not see any of the enclosures torn down, nor did we hear either of the gentlemen of the commission say they would send Colonel Callava to jail.

ALEXANDER SCOTT, JUN.
J. C. MITCHELL.

WEST FLORIDA, *Pensacola, ss.*

Personally appeared before me, the undersigned, J. C. Mitchell and Alexander Scott, jun., who made oath that the above statement is true, to the best of their knowledge and belief.

H. M. BRACKENRIDGE, *Alcalde.*

True copy:

J. C. BRONAUGH.

Continuation of the statement of Alexander Scott, Jun. and John C. Mitchell.

Colonel Callava went with the party to the Executive Chamber, where we found Governor Jackson sitting in his judicial capacity. Colonel Callava was received with every mark of respect. Immediately on his entrance, the Governor requested him to be seated, and informed him that he had received official information that certain papers relative to the rights of individuals to property in this territory were seen in the possession of a certain Domingo Sousa, who had declared that he had delivered them into the hands of Fullarat, (his steward,) and that

it was incompatible with the treaty between Spain and the United States for any one to withhold from the American authorities any papers relating to the property of individuals in this Territory, or words to that effect.

Colonel Callava requested permission to write an answer in Spanish, which was granted by the Governor. Whereupon, Colonel Callava began to protest against the powers of the Governor to call upon him in this way, asserting what he considered his privileges as a Spanish commissioner, &c. (as we understood from the interpreter.) Governor Jackson then declared he would not recognise him in any other light than that of a private individual; and required him to answer whether the papers alluded to were, or were not, in his possession. Colonel Callava then requested that his secretary might be permitted to write down his answer, which was granted. He again commenced dictating a protest to his secretary, as we understood from the interpreter. Governor Jackson immediately declared that such a course was inadmissible, and that he must answer positively whether or not the aforementioned papers were in his possession. Colonel Callava positively refused to answer unless permitted to do so in his own way.

The Governor was then about to commence the examination of Fullarat, when Colonel Callava (as we understood from the interpreter) objected to his being examined, on account of his minority; the Spanish law requiring a person to be twenty-five years of age before he is *legalis homo;* which objection was overruled, and Fullarat, on his examination, admitted that boxes containing the aforementioned papers were delivered to him by Sousa, and were then in Colonel Callava's house.

The Governor then stated to Colonel Callava that he would send an officer, with such other person as Colonel Callava might designate, to bring the boxes containing the aforesaid papers, and that they could be taken out in his presence; which, after being done, he would dismiss the whole of them. But Colonel Callava refused.

The Governor then committed Colonel Callava, Sousa, and Fullarat to the common jail.

It is not true, as stated, that the Governor snatched away papers out of the hands of Colonel Callava.

ALEXANDER SCOTT, JUN.
JOHN C. MITCHELL.

WEST FLORIDA, *Pensacola, ss.*

Personally appeared before me, the undersigned, Alexander Scott, jun. and John C. Mitchell, who, after being duly sworn, declared the above statement to be true, in substance, to the best of their knowledge and belief.

H. M. BRACKENRIDGE, *Alcalde.*

A true copy: J. C. BRONAUGH.

No. 4.

Affidavit of John Coppinger Connor.

In compliance with the request of Major General Andrew Jackson, Governor of the Floridas, &c. &c. &c., I proceed to give my statement of facts as they occurred on the evening of the 22d of August last.

Being at that period engaged in the office of the Governor, I was present when Domingo Sousa was brought before him to answer for a contempt of his orders, in refusing to deliver up certain papers which had been demanded of him; and, on being interrogated, he stated that the papers in question had been handed over by him about eleven o'clock that morning to Fullarat, the major domo of Colonel Callava, at the colonel's house; that said papers related to property in this country and in Louisiana; and that the said papers were then in the house of Colonel Callava. The Governor told him that he would permit him to go to Callava's house, accompanied by Captain Dade, in whose custody he was, and that, if he procured and delivered the papers, he should be dismissed; otherwise, he must stand committed. He replied, that a Spanish officer could not be put in prison; when the Governor told him, with considerable warmth, that the papers he would have, and that he would commit Sousa, Callava, and all concerned, for seven years, or until the papers should be forthcoming. These occurrences took place in the forenoon of the 22d August.

I was not a witness to any thing which followed, until Colonel Callava was brought before the Governor, on the night of the 22d. About the hour of ten o'clock he appeared at the Executive Office, accompanied by his secretary, Mr. Cruzat, and several Spanish officers, in full uniform, with their side arms. A seat was handed to Colonel Callava opposite the Governor, who immediately informed him, through the interpreter, that he was brought before him on a charge of having in his possession certain papers which appertained to the rights of individuals, and which papers did of right belong to the office of the alcalde, and could not properly be held in the possession of any other person; and handed to Judge Brackenridge a written interrogatory to translate to Colonel Callava, which was in the following words: "Were, or were not, the papers mentioned in a schedule handed to you by H. M. Brackenridge, Esquire, alcalde for Pensacola, delivered at your house this day, by Domingo Sousa, to Antoine Fullarat, your major domo, &c.; if so, at what time of the day?" This question being put, Colonel Callava rose, looked at his watch, and for a moment addressed the audience; then (as was interpreted) asked permission to write his answer himself, which was granted; after writing two or three words, he asked that his secretary be allowed to write for him, his eyes being weak; which was granted. A gentleman near the Governor observed to him that Colonel Callava was dictating to his secretary a solemn protest against the whole proceedings as a violent measure, and stating that he was a commissioner, &c. He was stopped there, and told that such a course could not be permitted; that he was required to answer directly to the question put—yes or no. The Governor then asked Mr. Cruzat, the secretary, for the paper on which he had been writing, which was handed to him by Mr. C., (not violently snatched or wrested from him,) and the Governor passed it to the alcalde, the interpreter, to put the interrogatory again, and to demand an immediate and direct reply. But he positively refused to reply.

Fullarat was then interrogated, and fully corroborated the statement made in the morning by Sousa, and added that said papers were at that moment in the house of Callava.

The Governor, with considerable warmth, again demanded of Colonel Callava the delivery of the papers, stating, at the same time, that if he would acknowledge the papers to be in his possession, Fullarat and Sousa should be discharged. Colonel Callava objected to the testimony of Fullarat, saying he was a minor, and his servant; and, turning round, addressing the audience in a loud and earnest tone of voice, dwelt for some time on his right as commissioner, &c. When all this was explained to the Governor by the interpreter, he (the Governor) ordered that it should not be named again that he was a commissioner; that he was before the Governor as an individual charged with combining with others to secrete and carry away certain papers, which were the evidence of the right of property of individuals in this country, and which papers were alleged to have been stolen from the office of the alcalde, they having been missing from said office, and no receipt being on record there for them; that the papers he must and would have; and that, if Colonel Callava persisted in his refusal, it would be considered as a contempt of his authority sitting in his high judicial capacity, and that he must abide by the consequences which would result to him. The Governor several times cautioned and warned Coonel Callava of his situation, and called upon his

friends who were present to explain it to him. All efforts having been unavailing, and Colonel Callava still persisting in his refusal either to deliver the papers or to answer the interrogatories, except in his own way and as commissioner, after about two hours were spent, the Governor using every exertion to obtain the papers, but in vain, the Governor filled up a blank commitment, which he had drawn in case of necessity, and Colonel Callava, Domingo Sousa, and Antoine Fullarat were committed to the calabouse.

JOHN COPPINGER CONNOR.

PENSACOLA, *September* 22, 1821.

Signed and subscribed before me, this 3d October, 1821.

VI.

Governor Jackson to the Secretary of State.

SIR: NASHVILLE, *November* 22, 1821.

I have the honor to acknowledge the receipt of your letter of the 26th of October, with its several enclosures; and, pursuant to your request, I herewith submit to you the consideration which influenced me in the measures taken in relation to Colonel Don José Callava.

By the 2d article of the treaty, Spain was bound to deliver over, with the territories, &c., all archives and documents which relate directly to the property and sovereignty of said provinces; and, in the language of the treaty, "the said archives and documents *shall be left* with the commissioners or officers of the United States duly authorized to receive them."

On the 17th of July possession was delivered to me, by the Spanish commandant, Don José Callava, of the provinces, fortifications, &c., together with what he represented to be all the archives and public documents relating to the property and sovereignty of the soil, and which by the treaty he was bound to deliver.

On the 21st of August, I received a note from the alcalde of the city of Pensacola, in which he states, "I learn, from the most satisfactory evidence, that a number of documents relating to estates in this place, and to suits instituted here, are in the possession of an individual of the name of Domingo Sousa. These papers properly belong to this office, but were not included in the inventory delivered by the late Governor. Some of the circumstances attending the affair are of a peculiar nature; but as the necessity for obtaining possession of the documents is urgent, I must defer making a report respecting them to some other period. At present, I must request your excellency to authorize some one to make a regular demand of the said documents, and to ascertain precisely what they are."

Upon this information, I immediately issued a commission to my secretary, Colonel George Walton, and associated with him Henry M. Brackenridge and John Miller, Esqrs., directing them to proceed to the house of said Domingo Sousa, and to make a demand of such documents as ought to have been delivered under the treaty.

The demand being made by the commissioners, pursuant to their instructions from me, they returned, and delivered to me, in answer thereto, a letter from the said Domingo Sousa, in which he admits there are in his possession certain papers boxed up, which had been delivered to him for safe keeping by Colonel Callava.

The first effort to obtain from Sousa the papers sought for having failed, the application and demand was reiterated by the same gentlemen, under my order. They say to him, "We do not claim any papers in your possession, or that of any other, relating to the military tribunals, or to the revenue of the Spanish Government; but we are certain that no individual, no matter what office he may have held under the Spanish Government, has any right to retain possession of archives and documents which relate directly to the sovereignty and property of this province, &c.; and we again make a positive demand of the papers mentioned in our note of yesterday, to wit, the documents in the case of Don Nicolas Maria Vidal and Eugene Sierra; also, a proceeding against Manuel Bonfay and Carlos de Ville, and the documents in the case of Peter Guilkes and Tomas Villaseca. These papers are known to be in your possession, and we demand to know by whose authority, as no person has the right to authorize you to detain them."

Upon the second demand, the aforesaid commissioners reported to me that Domingo Sousa had exhibited to them certain boxes of papers for examination, and that, among them, were the papers before enumerated; papers by which the right of individuals (some of whom were orphans) to a property of great value in the Floridas could alone be established; papers which, being indispensable to the establishment of right and title to property in the Territory, ought to have been delivered over with the archives and public documents, as by the treaty Spain had stipulated, and the Spanish commandant was bound to do. Sousa, however, refused to deliver them, and returned them to the house and keeping of Colonel Callava, from whom he had received them. If the papers related to the property and sovereignty of the soil, Colonel Callava had no more right to detain them than had his subaltern Domingo Sousa. His functions having ceased by the delivery of the province, he stood, in relation to our Government, in the same capacity that any other *private* individual would have done. He owed the same obedience to the laws, and was subject to the same punishment for an infraction of them.

That I have never considered Colonel Callava as clothed with any diplomatic powers from the Government of Spain, is, as you have inferred from my letter, most certainly true; because he had not only never exhibited to me any credentials or testimonials vesting such powers in him, but, on the contrary, when I proposed to him a reciprocal exhibition of our respective authorities, he waived the ceremony. In a letter to me of the 19th of June, to which I refer you, he remarks: "I repeat the assurances I have made you in other communications, *of my being furnished with orders*, under the same treaty, to *evacuate* this province, *and give possession of it* to the commissioners or officers of the United States lawfully authorized to receive it." "Your excellency expresses also a wish that I would concur in fixing a day, as early as possible, and to suit the mutual convenience of both parties, for an interview and exhibition of our credentials. In reply, I have the honor to acquaint your excellency that in *your quality of commissioner* you may, when it suits your pleasure, and in the manner you may deem most expedient, exhibit *your credentials* to *me as the existing commandant of the province.* And I have already told your excellency that I am authorized to enter into arrangements for its being evacuated by His Catholic Majesty's troops, and delivered to your excellency, agreeably to the stipulations by our respective Governments."

From the foregoing extract, you will be convinced I never could have considered Colonel Callava as possessing any powers in regard to the treaty but such as he derived from the Captain General of the island of Cuba, and by virtue of his office of Governor of West Florida. Nor can you fail to draw the conclusion that Colonel Callava did not consider *himself* competent to the exercise of any other powers, duties, or privileges, under the treaty, than those enumerated in his letter to me, to wit, the evacuation of the province, and the surrender of it to the

American authorities; and even these he did not claim to exercise as *commissioner*, but says "you may exhibit your credentials to me *as the existing commandant of this province*," in which capacity "I am authorized to enter into arrangements for its being evacuated by His Catholic Majesty's troops, and surrendered agreeably to the stipulations of the treaty." It had been reported to me by Colonel Forbes, the American agent charged with the delivery of the royal order to the Captain General of Cuba, that he had arrived at Pensacola on the 9th of June, accompanied by Don Alva, the Spanish commissioner for delivering the provinces of East and West Florida to the American authorities appointed to receive them. This information I communicated to Colonel Callava; and, for the considerations growing out of it, I proposed to him, as I have before stated to you, a reciprocal exhibition and recognition of our respective credentials. This he declined, as you have seen. I then plainly foresaw that he wished to draw me into a delay of the time for the delivery of the country; for, if I had refused to recognise him as the agent authorized by the Captain General of Cuba to make the transfer, I must either have submitted to a tedious, embarrassing, and injurious procrastination of the surrender of the provinces to the United States, or have been driven to the necessity of taking it by force. And as there was no express stipulation for a formal delivery, I deemed it better to receive the territories of him, as the agent of Spain, acting under orders which he *professed* to have received, than to submit either to the delay which must otherwise have ensued, or to resort to force to obtain that for my Government which Spain was bound, by all good faith, under an existing treaty, to put into its possession amicably and without delay. Having viewed Colonel Callava, then, merely as an agent, invested with no other powers than a surrender of the province and a withdrawal of the Spanish forces, I regarded him, in the consummation of these duties, as entitled to all the privileges and immunities guarantied to such agents by the laws of nations; but, sir, the moment the surrender was made, and the soil and sovereignty of the territories became vested in the United States, my duties as commissioner ceased, and my functions as Governor commenced. He, too, having accomplished all that had been assigned him to do, was bound, by the express stipulations of the treaty, to have withdrawn himself from the ceded province. Neglecting so to do, no other privileges could appertain to him than such as attach to every individual.

"The faith of treaties," says Vattel, "is holy and sacred between nations, whose safety and repose it secures; and he who violates it, at the same time violates the laws of nations. And if the people are true to themselves, infamy will ever be the fate of him who violates his faith."

By the second article of the treaty which I have before quoted, all archives and documents relating to the property and sovereignty of the country ceded were to have been delivered with the territories. I would ask, then, were not the papers which were secreted and attempted to be carried away (and which were the cause of his imprisonment) of the description contemplated, and expressly provided by the treaty to have been delivered? Did they not appertain to the private property of the ceded country? Were they not in *themselves* private property? If so, was not the attempt to carry them away not only a flagrant violation of the treaty, but a larceny upon the individuals whose property they were, and from whom he was clandestinely taking and carrying them off? And, sir, as a proof that the papers were of the description contemplated by the treaty to be left in the province, and that Colonel Callava intended to carry them out of the country, permit me here to make an extract from the deposition of Mercedes Vidal Palao, taken before Henry M. Brackenridge, Esq., alcalde of the city of Pensacola. She testified "that her father, Nicolas Maria Vidal, left her by his will one of his heirs, and that he died about the year 1806 possessed of a large real and personal estate: that the will of her father, with the inventories of his real and personal estate, had been for several years missing from the public archives of Pensacola, having been by some person unknown withdrawn from the same: that repeated applications were made by her to the authorities then existing there to compel the restoration of the said papers and documents, as they were, and still are, necessary to enable her to prosecute her said claim under the said will: that the said papers were finally restored under a decree." The deponent further states that, "a few days before the change of government, she demanded them of Colonel Callava, who informed her *that he could not give them up, as he was obliged to take them to the Havana.*" The deponent further states that said papers relate to property in this country and in Louisiana.

Inasmuch as treaties contain promises that are perfect and reciprocal, if one of the contracting parties fail in his engagements, the other may constrain him to fulfil them. If this is a clear principle of national law, the right to imprison the Spanish agent would not be in the least affected by the termination or continuation of his immunities as agent; nor will the right of the United States to compel Spain to a faithful execution of the treaty be disputed. If, then, Spain was liable so to be coerced, how much more is he subject to such compulsion who is merely her agent; an agent, too, in whom we are bound to believe she reposed the most implicit confidence; one to whom she had intrusted, and from whom she expected, a faithful and honorable discharge of the high obligations she had assumed with the United States?

I have thus, sir, gone through the principal considerations which governed me in the imprisonment of Colonel Callava, and have added a few of the facts that made this course indispensable; from all of which you will perceive that, in all my intercourse with him, I have viewed him in no other (nor could I view him in any other) light than that of military agent of Spain, appointed by the Captain General of Cuba to deliver over the province, and all things appertaining thereto specified by the treaty to be delivered; which duty being complete, his immunities of exemption from the ordinary process of law immediately ceased. Admitting that he had received any diplomatic powers from his Government, his obstinate refusal to exhibit them precluded me from the possibility of appreciating them. Letters of credence are the instruments which authorize and establish a minister in his character; and, whether he be considered as minister or agent, he could only be received in the quality attributed to him in his credentials. "But," says Vattel, "a more particular protection is due to agents than to other foreigners or citizens, and some regard in consideration of the prince whom they serve." This regard was most punctiliously observed towards Colonel Callava, until the termination of his immunities as agent; after which, in his private capacity, he violated the treaty, the laws of nations, and the sacred privileges and rights of individuals entitled to the protection of the United States, and over whom I had been placed to administer the laws; to secure justice to whom it had now become indispensably necessary to punish him for his perfidiousness, and for his contempt of my judicial authority.

The time limited by the treaty for the delivery of the country, and the withdrawal of the Spanish officers and troops, had expired; and his pretence that he remained to await the decision of the two Governments in relation to the artillery, is a vile subterfuge, which claims no consideration or remark. His being permitted to remain was a mere act of courtesy, extended to him as a military officer of the Spanish Government.

In my letter to you of 26th August I remark, Colonel Callava's powers having ceased here with the surrender of the country, it was only a display (and so considered by me) of pompous arrogance and ignorance in his claiming the privileges of diplomacy, which in fact he never possessed; and his power having ceased, his commission accomplished, the pretence which he set up was an insult to the meanest understanding.

Having, as I hope, explained to your satisfaction that, at the time of Colonel Callava's imprisonment, he could claim no exemption from civil process by virtue of any commission he then held under the Spanish Government,

and believing, too, that I have clearly explained and proved to your satisfaction that he never did exhibit any credentials, which alone could have entitled him to the privileges and immunities of a commissioner, I shall proceed to explain some other points to which you have directed my attention. It is alleged by Colonel Callava, as well as by Mr. Salmon, that it was necessary Colonel Callava should continue in Pensacola, because the cannon belonging to the fortifications were reserved for future negotiation between the two Governments, and that, in the mean time, they were kept under his (Colonel Callava's) care. I would ask you, sir, how could Colonel Callava exercise any care or keeping over them? They had formally been delivered over to, and receipted for by me, and the Government of the United States made responsible to the Spanish Government for all that had been delivered, to await their respective decisions. Mr. Salmon, as well as Colonel Callava, has asserted what, in this respect, is not the fact. The language of Mr. Salmon, throughout, is exceptionable and insolent; but he claims this privilege, on this occasion, because "His Catholic Majesty had determined to give a new pledge, among many others, of his particular regard for the interests of the United States *in the permission which he has granted them of keeping in Mahon a deposite of provisions and naval stores, which they may introduce free of duties.*" Then, according to Mr. Salmon's rule of estimating favors, because His Catholic Majesty has granted this permission to the United States of introducing provisions and naval stores into Mahon *free of duties*, the United States ought, on her part, to have permitted His Catholic Majesty's officers to transport from without the United States any archives and documents which they might have chosen to secrete, *free of molestation.*

The allegation that I had, nineteen days before his imprisonment, written him a letter acknowledging his commissarial character, is unfounded, and cannot be sustained by any proofs he can adduce. I did write him a letter on the 3d of August, remonstrating against his conduct in withholding a receipt which he had previously solemnly stipulated to give; and which, according to his arrangement with me, was to have been given on the 17th of July, the day on which the province was surrendered to the United States. In consideration of his leaving the ordnance in the fortifications, I agreed to supply, and did supply, His Catholic Majesty's troops with provisions to subsist them to the Havana, and furnished transportation for their civil officers, families, and servants, and for the families and servants of the military officers; all which was not stipulated to be furnished by the treaty, but for which we were to pass mutual receipts, and leave them for the future settlement of our respective Governments. These receipts were to have been reciprocally interchanged on the 17th of July, as above; but on that day he pleaded indisposition, and, on his sacred pledge of honor, I indulged him until that indisposition should be removed. I repeatedly called on him, through Major Stanton, of the United States army, for a fulfilment of his agreement, (having on my part receipted for the cannon on the 17th of July.) I now ordered Doctor Bronaugh to accompany Major Stanton, and demand the receipt; and directed them to inform him, distinctly, if he did not then comply, I would report the same to my Government, and that the receipt I had given him for the ordnance should be considered null and void, inasmuch as the condition upon which it was given had failed by his refusal to receipt to me for the provisions and transportation furnished by the United States. I complained to him, in this letter of the 3d of August, of his signal breach of faith, in thus evading, on the plea of indisposition, the performance of a stipulated promise, which was to have been consummated on the 17th of July, before the surrender, "but which he afterwards refused to fulfil at all." I expostulated with him for his infidelity in thus violating his pledge of honor wantonly and corruptly, in first failing in, and afterwards refusing to perform, that which he was bound in honor and by the most sacred agreement to have performed, but which he was permitted to delay until his alleged ill health should be restored.

You will therefore clearly perceive, sir, that this letter merely refers to what was agreed to have been done on the morning of the 17th of July, whilst his official capacity as agent aforesaid existed, and not to any thing which occurred after that day.

It is alleged that I did not call officially upon Colonel Callava to deliver the papers; to this I would reply, that our official correspondence had, of necessity, ceased by the termination of his powers as agent, and by the expiration of the time limited by the treaty for the delivery of the country. Sitting as the representative of my Government in my judicial capacity, administering laws that know no distinction between the rich and poor, the great and ignoble, I could not extend to him any privileges or indulgence which the laws did not guaranty; nor could I debase my representative character, or the majesty of these laws, by such a condescension, to gratify the vanity of a Spaniard, charged with being engaged in a fraud upon the rights and property of individuals living within the immediate limits of my jurisdiction.

The misinterpretation of which he complains will be explained, by the documents submitted to you, to be a falsehood, invented and propagated by himself. Indeed, his protest throughout is a tissue of wilful and corrupt misrepresentations and falsehoods, and, being sworn to, are absolute and premeditated perjuries, of which I feel no hesitation in believing you will be thoroughly convinced by a perusal of the evidence already forwarded to you, and of that which accompanies this communication.

In conclusion, permit me to request you, sir, to call on Mr. Salmon for the *originals* of his *faithful* documents. If they appear in the form of affidavits sworn to, they are forgeries, or John Innerarity has perjured himself, as you will see from his deposition, which I have forwarded to you, and to which I would on this point particularly refer you.

With sentiments of sincere regard and esteem, I have the honor, sir, to be your obedient, humble servant,

ANDREW JACKSON, *Governor of the Floridas, &c.*

Hon. J. Q. Adams, *Secretary of State, Washington.*

No. 1.

Affidavit of H. M. Brackenridge.

About ten days after the delivery of this province, I was applied to by a free woman of color, of the name of Mercedes Vidal, natural daughter of Nicolas Vidal, formerly the auditor or judge at this place. She informed me that her father had made a will, leaving his real and personal estate to herself and sisters; that it consisted of lands at Baton Rouge, and moneys in the hands of John Innerarity, of this place, as the representative of the house of John Forbes & Co.; that the lands had been fraudulently and illegally sold, and that the money and personal property were unaccounted for. She at the same time placed in my hands a record of a proceeding to compel the restoration of the will and testamentary papers, which had been taken from the office some time before 1817, and were alleged to be in the hands of Innerarity, who, it appeared, had at length, after seven petitions, and many decrees, been compelled by the late Governor to restore them; which proceedings also contained two decrees, signed by Colonel Callava, annulling the sale of sixteen thousand acres of land at Baton Rouge, and ordering Innerarity to pay between $6,000 and $7,000 into the national treasury, being a deposite in his hands of money belonging to the estate. On inquiring of Mercedes Vidal by what means these papers had been taken out of the office, she

said it had been done by a friend of hers, in a clandestine manner; that, as the other papers would be taken away, she thought herself justifiable in doing so for her own security. On inquiring of the clerks who had been employed in the alcalde's office, they informed me that they did not know what had become of the testamentary proceedings, and could not tell in whose possession they were at that time; a few days after, I was informed by Mercedes Vidal they were in the possession of Colonel Callava, and that she had obtained permission to take them in separate pieces, in order to have them copied, but under the injunction that they should be placed in the hands of a confidential person. She accordingly obtained one of the pieces, and brought it to me; it contained the original will, the inventories and sales of the personal property. I then learned that they were not in the actual possession of Colonel Callava, but in the custody of a person of the name of Sousa, who had formerly been a clerk in the office. The first piece thus obtained was returned, and three others obtained from Sousa, and all exhibited to me, and a note taken of them. The latest proceedings were in 1810, on which there appeared a decree against the house of Forbes to pay a large sum of money in their hands as a deposite, which had not been complied with; but, from that time until 1817, nothing appeared to have been done. I was satisfied that the papers were such as ought to have been delivered under the second article; and the unexecuted decrees could produce no other conviction in my mind than that the papers were necessary to enable the heirs of Vidal to prosecute their right of property in this country.

Being at a loss myself what course to pursue, considering the connexion of Colonel Callava in the affair, I communicated it verbally to the Governor. He replied that, if I had sufficient proof to warrant it, an application made to him in writing should be attended to. On this I filed the petition, which will be seen by reference to the proceedings. The order was then issued to Colonel Walton, Colonel Miller, and myself, to proceed to the dwelling of Sousa, and to make a demand of the papers before mentioned, and of such others as ought to have been delivered to us under the treaty. We accordingly waited on him, and, when the demand was made, he appeared to be somewhat confused; declared that he had papers in his possession, but had no control over them, as he was the mere keeper of them for Colonel Callava. He produced two open boxes, which he permitted us to examine, with the exception of the papers enumerated in the list which was made by me; the boxes contained nothing but proceedings in courts-martial, trials of soldiers, &c., and a few unimportant admiralty proceedings, but without any thing else relating to the property of the province. A demand of the papers was then made in writing, on which Sousa refused, for the reasons before stated. According to our instructions, the refusal was reported to the Governor. In the evening of the same day, Sousa informed Colonel Miller that he had waited on Colonel Callava to receive his instructions; that he had been absent from town the greater part of the day. He then delivered us a note, signed by himself, in answer to our written demand, which note we presumed had been dictated by Colonel Callava. The order was then issued on the following day for the sequestration of the papers demanded of Sousa, but which in the mean time had been conveyed to the house of Colonel Callava.

According to the instructions to Colonel Butler and Colonel Miller, Domingo Sousa was summoned to appear before the Governor, to answer interrogatories. He accordingly accompanied us, and entered the office about one o'clock. The examination which appears in the proceedings took place, in which he acknowledged the fact of the papers having been taken to the house of Colonel Callava. The officer of the day, Captain Dade, who had the charge of the prison, was sent for, and ordered to take Sousa into custody, under a commitment; but he was instructed to treat him with every possible indulgence, and Sousa was permitted to go to Colonel Callava, in company with Captain Dade, and inform him of his situation; that if the papers were restored to him, he would be set at liberty on delivering them to such persons as the Governor should appoint. Sousa accordingly went, and returned with Captain Dade about three o'clock, who reported that they had found Colonel Callava dining at Colonel Brooke's; that Sousa had had an interview with him, the result of which was, that the papers would not be delivered to Sousa. The order directed to Colonel Butler and Dr. Bronaugh was then made out, and about half after four o'clock we proceeded to the house of Colonel Callava, which is situated a few doors below that of Colonel Brooke. We were informed that he was not at home; that he had not returned from the dinner party. We then proceeded down the street, and in about half an hour returned, when, on inquiry at the gate, we received the same answer as before. It was then determined that I should go to Colonel Brooke's, and request Colonel Callava to step to his house, as there were some gentlemen there who wished to speak to him on business of importance. I accordingly went, and found a number of gentlemen sitting in the dining room, and in the porch fronting the bay, after having risen from dinner; Mr. Cruzat, the Governor's secretary, was called out at my request, who immediately anticipated the object of my errand, and in a passionate manner called to Colonel Callava, who came instantly, and began with warmth to assert his rights as commissioner of Spain, and to talk of the laws of nations. They soon after withdrew, together with the Spanish officers. In the mean time, Colonel Butler and Dr. Bronaugh had come to the gate, and, on being invited by Colonel Brooke, stepped in, just as the Spanish officers and Colonel Callava were going out. After remaining in the yard but a few minutes, we all returned and proceeded to Colonel Callava's house, and entered the back porch, where these gentlemen had just had time to be seated. I introduced Colonel Butler to Colonel Callava, and, after some commonplace conversation, Colonel Butler then directed me to state the object of our visit. This was fully explained to him by me, in presence of his secretary and interpreter, and of Mr. Innerarity, all of whom were well acquainted with the Spanish and English languages, and who occasionally assisted. The utmost delicacy was observed by Colonel Butler, but Colonel Callava expressed himself in a very vehement and passionate manner, being naturally of a choleric temper. An hour, at least, was taken up in this conversation; every thing was fully explained; the written order from the Governor, containing a specification of the papers, the declarations of Sousa that they had been delivered to his steward, and repeated demands were made of them. He insisted on his alleged rights as commissioner; he said, if the papers were demanded of him in that capacity, or as late Governor, and by writing, he would reply. He said he did not know that the papers were in the boxes; that Sousa was only his servant in the affair; that he was responsible; that the papers were in his possession in the capacity of late Governor, and not as an individual.

After every effort was made, without success, to obtain the papers, the part of the order requiring him to appear before the Governor to answer interrogatories was explained. When this was made known, Mr. Innerarity exclaimed "the die is cast!" and Colonel Callava positively refused. He was told by Colonel Butler that his conduct would be considered as setting the authority of the Governor at defiance. He said that such was not his intention, but that he could not be proceeded against as a private individual. When we were about to withdraw, he said that, if Colonel Butler would deliver him a list of the documents, and they should be found in the boxes, they would be delivered. This was interpreted aloud by me to Colonel Butler and Dr. Bronaugh, and in the presence of the persons before mentioned; if there was any mistake, it most probably proceeded from Colonel Callava, who omitted to add the words he had so often repeated before, *if demanded of him as commissioner, or late Governor.* We then withdrew, and in about a quarter of an hour I returned with a list of the papers headed as appears in the proceedings. I found Colonel Callava surrounded by a number of his friends, making unusual preparations, packing up boxes; and he said to me, himself, that he was making out a protest against the proceedings, and taking such pre-

cautions as would be taken by a person who expected every thing he possessed would be forcibly carried away. He talked of his public and private correspondence, his papers, and effects, as if he thought he was about to be deprived of every thing. On presenting him the list, I informed him that nothing was wanted except the few papers therein specified, which could be found in ten minutes if in the boxes; that Colonel Butler and Dr. Bronaugh would return in two hours, and then expect to receive them. He said that the paper must be translated, and, if the demand was made of him as commissioner, and in a proper manner, he would give an answer. The list was left with him, and I reported the circumstance to the Governor.

About nine o'clock, accompanied by a guard, Colonel Butler, Dr. Bronaugh, and myself went to the house of Colonel Callava. Leaving the guard at the gate and in the street, we entered the garden in front of the house, after removing the bar by which the gate was fastened. The house was shut up; the door locked. On our entering the porch, we heard a bustle inside resembling the rattling of arms. Admittance was three times demanded by me in Spanish, but no answer was returned. I then went round, and discovered several persons in the porch on the side fronting the bay. The guard was ordered round, and formed in front of high steps which lead up to the porch; they had a short time before been ordered into the garden, and had been drawn up before the front door. On ascending the steps, inquiries were made for Colonel Callava; they all remained silent: on the question being repeated, it was observed by some one that he did not know. The only light was a candle burning in one of the rooms. Colonel Butler ordered a candle to be brought from some of the neighboring houses. After waiting fifteen minutes, it was resolved to enter the hall, and some one brought out the candle. Two or three of the soldiers were then ordered up; we then entered the room where the candle had been burning, and Colonel Callava rose from a bed, with his coat off, and expressed great surprise at our entering his house at that time of night. The papers were then demanded of him, as is stated in the report of Colonel Butler and Dr. Bronaugh. He persisted in the same reason which he had before repeatedly alleged. Every possible means was used to induce him to surrender the papers; the boxes containing them were in view, and he was told that if he would break them open we would take them. He was at length told, that, having refused to deliver the papers, he must go before the Governor, who was then sitting in his office and waiting our return. He at first said that he might be assassinated or murdered, but that he would not leave his house alive. Colonel Butler told him repeatedly that he might consider himself as taken forcibly from his house, and hoped he would not render it necessary to use actual force. It was impossible to have used greater delicacy to any one under similar circumstances. When the guard was at length ordered up, and the officer ordered to take him into custody, he consented to go; more than half an hour having passed from the time of our entering the house.

On entering the Governor's office, he was invited to take a seat, which he did at the table, fronting the Governor, while I was seated at one end of it, in the capacity of interpreter. The Governor then requested me to say to Colonel Callava that he was brought before him to answer interrogatories touching certain papers which had been delivered at his house by Domingo Sousa, in boxes, according to the confession of Sousa; and a list of the papers was read. This was fully and faithfully interpreted to him, in the presence of Mr. Rutledge and Mr. Cruzat, the secretary of Colonel Callava, both of whom understood the Spanish and English languages well. Colonel Callava on this rose, and, looking at his watch, said that it was then 10 o'clock; that at that hour he had been violently taken from his house; that he protested against the proceeding; that he was commissioner of Spain, and was not answerable as a private individual. When this was interpreted, the Governor declared that he would hear no protest against his authority while sitting in his judicial capacity; that he could not know him as commissioner; and then ordered me to propound the question set forth in the proceedings, and which he had just written. Colonel Callava repeated, in substance, what he had said before, but with more prolixity and warmth; after some time passed in this way, he said he would yield to compulsion, but would answer only in his own language, and in his own way. When this was granted, he began to write, and, after writing a few lines, complained that his eyes were weak, and requested that his secretary might write; which was granted. He then dictated to Mr. Cruzat something in the shape of a protest, as a preliminary, as I understood, to his answering the question. After writing five or six lines, it was observed by H. Bigelow, Esq., who happened to be standing near the Governor, that he was dictating a protest. The Governor, on this, with considerable warmth, striking on the table, and addressing himself to me, said, "Why do you not tell him, sir, that I will not permit him to protest?" and which was intended as a reprimand to me for suffering Colonel Callava to proceed in this way, when he was repeatedly told that such a course would not be allowed. Colonel Callava then stopped, and his secretary left off writing in the middle of a word. I was now called upon to put the interrogatory, and to say that none but a direct answer would be received. I called upon Mr. Cruzat to assist in interpreting, feeling great anxiety that there should be no misunderstanding, but he declined. The question was then repeated in the manner I have certified in the proceedings. It was fully and clearly explained to him. Much was said by way of enforcing the question on the one side, and of the objections on the other to answering, all of which I did not consider myself called on to explain; and, in fact, it was not possible: there was considerable warmth on both sides, and there was frequently not sufficient interval between what was said to enable me to convey more than the substance of what was thus spoken by way of argument, while much of it consisted of repetitions. When, at last, Colonel Callava found that he would not be permitted to answer in the manner he thought proper, he declined answering at all.

The steward, Fullarat, was then called up, and Colonel Callava objected to his being examined, on the ground that he was not of sufficient age. Some time was also employed with this examination; he answered that the boxes spoken of by Sousa had been delivered to him, and were then in Colonel Callava's house. The Governor, after the close of Fullarat's testimony, said, in a very deliberate and impressive manner, "that the papers had been seen in the possession of Sousa; that Sousa had acknowledged that they were delivered to the steward in the same boxes, and, by his declaration, were proved to be in Colonel Callava's house." The proof was therefore complete that the papers were in Colonel Callava's possession, and he was there called upon to deliver them: he was told that an officer would be sent with some one he should name, and bring the boxes; that he might open them in the presence of the Governor, and the papers specified surrendered.

This was distinctly made known to Callava by me; and the Governor called upon Callava's friends, among whom was Mr. Innerarity, and who were acquainted with both languages, to explain it well. I was occasionally assisted by Mr. Rutledge, and every pains was taken that this part of the subject should be clearly explained. His answer proved that he did understand it. He repeated what he had said before—that he could not deliver the papers unless demanded of him as commissioner, or late Governor; that they could not be in his hands as a private individual; that he could not say whether they were in his possession or not; enforcing the same positions with a variety of other reasons, and of which I interpreted as much as I could; among them, he said that he could only be tried by a *tribunal de residencia*, which, at first, I did not exactly comprehend, until explained by Mr. Innerarity, at my request, to mean a court specially appointed to try Governors of provinces, &c., not amenable to the ordinary tribunals. The Governor, in the same manner, enforced his demand of the papers by a variety of reasons; he observed, they were such papers as were contemplated by the second article of the treaty, which was

read to him; that it was his duty to see, for the safety of the inhabitants, and the protection of their rights, that all papers relating to the property of individuals should be left. The conversation, as is natural, was warm on both sides, and some expressions were softened by me in the interpretation, and others, tending only to irritate and provoke, omitted altogether. These were principally the appeals of Colonel Callava to the by-standers, which were frequent, loud, and inflammatory; and, on the part of the Governor, strong expressions against what he considered a combination between him and others to withdraw the evidences of the right of property required by individuals; which combination I understood, and so expressed it, to be between Colonel Callava, Sousa, and the steward Fullarat, but which seemed to excite some indignation, as he said "Sousa is my domestic, my servant; he is nothing in this business." The Governor did at one time remind him of the fact that the testamentary papers of Vidal had been, by his own decree, ordered to be restored to the office, whence, as he expressed it, "they had been *stolen*." As this expression had no allusion to Colonel Callava, and as I was not particularly called upon to interpret it, I supplied its place by a milder term. I considered the expression as dictated by a high sense of the injustice said to have been done the heirs of Vidal in withholding the papers, and as expressive of astonishment that Colonel Callava, who had compelled the restoration of those very papers to the office whence they had been taken, should think of carrying them out of the country after he had obtained possession of them. In the course of these remarks, the Governor reminded Colonel Callava of his having promised to deliver the papers if found in the boxes. Here Colonel Callava exclaimed "it is false!" meaning that he had never made any such promise, but which was mistaken by the by-standers. I stated that Colonel Callava denied the promise, and that it was possible that I might have misunderstood him, which drew from the Governor an expression of displeasure. In a strong tone of voice, he asked, "Why then, sir, were you not more cautious?"—words which proceeded only from the irritation of the moment, while he was almost sinking with fatigue. It was then midnight, and he had been sitting, with scarcely any interval, from ten or eleven o'clock in the forenoon. After the lapse of two hours the Governor rose from his seat, and called upon me distinctly to state that Colonel Callava must deliver the papers, or abide by the consequences; he, at the same time, called upon the friends of Colonel Callava who understood English to explain to him his situation. It was fully explained to him. This was several times repeated, and, at length, a blank commitment, which had been prepared in case of necessity, was signed, and Colonel Callava committed to prison. The next day I presented a petition to open the boxes and seize the papers, which was accordingly done, as will be seen by the reports.

H. M. BRACKENRIDGE.

Sworn and subscribed before me, this twenty-second October, 1821.

JOHN MILLER, *Mayor.*

No. 2.

Mr. Hannum's certificate.

I certify that I was in the alcalde's office on the evening of the 22d of August, when Colonel Callava, the late Spanish Governor of West Florida, was brought before General Andrew Jackson, the present Governor of the provinces of the Floridas. Colonel Callava entered the door, bowed, and took a seat which was handed to him, opposite to General Jackson, who was seated near a table used in the office. A short time after Colonel Callava had taken his seat, General Jackson stated to him, through his interpreter, Judge Brackenridge, the nature of the allegations exhibited against him, and requested him to answer the following interrogatory, viz: Were, or were not, the papers mentioned in a schedule handed to you by H. M. Brackenridge, alcalde of the city of Pensacola, delivered by Domingo Sousa at your house, this day, to Antoine Fullarat, your major domo; and, if so, at what time of the day? General Jackson informed Colonel Callava, through his interpreters, that those papers had been in the possession of Domingo Sousa, who had stated to Judge Brackenridge and others that he (Sousa) had delivered them, enclosed in a box, to the servant of Colonel Callava, at the colonel's house. Colonel Callava disclaimed the question at that time, and often afterwards, during the investigation, declaring that he was shielded by his diplomatic character as commissioner for the surrender of the country. General Jackson answered that his official functions had ceased, as all matters touching the surrender of the country were submitted to their respective Governments; and again put the interrogatory to him, but couched in a different phraseology from the first interrogatory. Colonel Callava then asked permission to write his answer, which was granted. He commenced writing, and wrote but a few words; he then asked permission for his secretary, Cruzat, to write for him, which was granted; Mr. Cruzat then took a seat on the left of Colonel Callava; the colonel began to dictate a protest. Mr. Cruzat had written but a few lines, when General Jackson discovered that he was protesting against the proceedings. General Jackson then informed him, through his interpreters, that the question put to him was a plain proposition, and that he must give a direct answer to it. A long altercation then ensued: the colonel claiming his privileges as commissioner; General Jackson denying his right to such protection. Being sensible, from the stubbornness manifested by Colonel Callava, that he was determined to resist the authority of General Jackson, and likewise being satisfied, from the known character of General Jackson, that the colonel would be compelled to bow to the law, I left the room before the colonel was committed, and before the examination of Sousa or Fullarat. I am certain that no paper was wrested from Colonel Callava during my stay in the room.

No. 3.

Affidavit of John Miller.

I do certify that I was present on the evening of the 22d of August last, when Colonel Callava was brought before the Governor for refusing to deliver up the testamentary papers of the estate of Vidal, and that I attended to the conversation that took place on that occasion. I distinctly recollect that it was stated by General Jackson, that if Colonel Callava would send a person with an officer, and bring the papers and deliver them up, he should be released. No such expressions as that Colonel Callava "might protest before God, if he pleased," I am confident, were used by General Jackson. No papers were wrested from the hands of Colonel Callava; and, though there was occasionally some warmth in the general's manner, it was such as would be very naturally excited by the circumstances of the transaction. Towards the close of the examination, General Jackson rose, and observed to some gentlemen near him, (I think Mr. Innerarity and Mr. Cruzat,) "Gentlemen, you understand English; tell Colonel Callava, if he does not deliver up the papers, I will send him to the calabouse."

Given under my hand, October 22, 1821. JOHN MILLER.

We were present during the whole of the above examination, and fully concur with Colonel John Miller in the facts contained in the above statement.

D. SHANNON,
F. H. NISBET.

October 22, 1821.

VII.

The Secretary of State to Governor Andrew Jackson.

SIR: DEPARTMENT OF STATE, *January* 1, 1822.

I have had the honor of receiving your letter of November 22, with its enclosures.

Translations are now transmitted to you, by direction of the President of the United States, of two letters received from the minister of Spain, the definitive answer to which will be deferred until I shall have the opportunity of receiving your reply to this letter, with any remarks which you may think proper to make on the letters of the minister. You will observe that, in that relating to the seizure of the papers at St. Augustine, he dwells with much earnestness on the agreement which had been made between Colonel Butler and the late Governor Coppinger concerning these papers. If that agreement was known to you at the time when you issued the order for demanding and securing the papers, will you have the goodness to state the particular grounds on which you judged it necessary to resort to compulsory measures for obtaining possession of them?

I have the honor to be, with great respect, sir, your very humble and obedient servant,

JOHN QUINCY ADAMS.

I.

The Secretary of State to Mr. Fromentin.

SIR: DEPARTMENT OF STATE, WASHINGTON, *June* 27, 1821.

The President having appointed you judge of the United States for West Florida, and that part of East Florida which lies westward of the cape, I have the pleasure, herewith, to transmit your commission, and to add the expression of my wish that the appointment should prove agreeable to you. In that case, it will be necessary for you to repair, with all convenient despatch, to Pensacola, to enter upon the duties of the office, there being reason to believe that the Spanish authorities will have delivered over the actual possession of both the Floridas to General Jackson before this communication reaches you; and, towards the organization of the temporary Government under his direction, it may be important that the judiciary department should be put into operation immediately.

I am, &c.

JOHN QUINCY ADAMS.

ELIGIUS FROMENTIN, Esq., *New Orleans.*

[Enclosure in I.]

JAMES MONROE, *President of the United States of America, to all who shall see these presents, greeting:*

Know ye, that, reposing special trust and confidence in the wisdom, uprightness, and learning of Eligius Fromentin, of Louisiana, I do appoint him judge of the United States for West Florida, and for that part of East Florida which lies westward of the cape, to reside at Pensacola; and do authorize and empower him to execute and fulfil the duties of that office, according to the constitution and laws of the United States; and to have and to hold the said office, with all the powers, privileges, and emoluments to the same of right appertaining unto him, the said Eligius Fromentin, during his good behavior, and until the end of the next session of the Senate of the United States, and no longer.

In testimony whereof, I have caused these letters to be made patent, and the seal of the United States to be hereunto affixed. Given under my hand, at the city of Washington, the eighteenth day of May, A. D. eighteen hundred and twenty-one, and of the independence of the United States of America the forty-fifth.

JAMES MONROE.

By the President:

JOHN QUINCY ADAMS.

II.

Mr. Fromentin to the Secretary of State.

SIR: PENSACOLA, *August* 12, 1821.

Having anticipated that it might be necessary for me to repair without delay to Pensacola immediately upon receiving my commission, I left New Orleans early in July for Pensacola, where I received yesterday, from New Orleans, my commission and your letter of the 27th of June last.

I thank you, sir, for the expression of your wish that the appointment may prove agreeable to me.

I am now ready to enter upon the duties of my office.

The attorney of the United States has not yet arrived; and the marshal has left this place for St. Augustine without appointing a deputy.

With great respect, I have the honor to be, sir, your most obedient servant,

ELIGIUS FROMENTIN.

The Honorable J. Q. ADAMS, *Secretary of State.*

III.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *August* 20, 1821.

The time which was to intervene between the moment when I received your letter of the 27th June last, and the moment when I was informed my answer should be deposited in the post office, was so short that I could not then touch upon the topic which is to be the subject of my present communication.

When I first was informed of my appointment as judge of the United States for West Florida, &c., I understood it to be an appointment to the office of a Territorial judge, with the additional jurisdiction vested in the judges of such Territories where no district court of the United States has been established by the act entitled "An act to extend jurisdiction in certain cases to the Territorial courts," passed March 3, 1805.

Upon receiving my commission and your letter of the 27th June last, I was rather confirmed in that opinion by the concluding paragraph in your letter, in the following words:

"And towards the organization of the temporary Government under his [General Jackson's] direction, it may be important that the judiciary department should be put into operation immediately." I may be mistaken, but it

seems to me that if the court to which I am appointed is to be confined, as General Jackson contends, to the revenue laws of the United States and to the act respecting people of color, it could hardly be denominated the judiciary department, with reference to the organization of the temporary Government under the direction of General Jackson. However, I deemed it my duty to communicate my commission and your letter to General Jackson, who communicated to me, in return, such parts of his several commissions as he conceives admit of a construction entirely at variance with that which I put upon my commission and your letter.

It was then already too late for me to urge any objections; the Territorial court, consisting of five judges, created by General Jackson, (the presiding judge of which, by the bye, is not of age, according to the Spanish law, which he administers, being only twenty-two years of age, and the law requiring, for that office, that he should be at least twenty-five years,) having been already in session one week before my commission reached me.

I told the general that I would write to you on the subject. He told me that he had either written to you already, or would write to you likewise. In the mean time, things must of course go on as I found them established on my arrival here, until I learn from you the precise intentions of the President respecting the extent of the powers vested in me. This representation, I beg you to believe, is not prompted on my part by the remotest desire of assuming a jurisdiction not intended to be given, but by a solemn obligation which I deemed to be imposed upon me, to inform you of the difficulties in which I am placed, and to desire you to transmit to me, as early as possible, the necessary information.

I have heard nothing of or from the marshal, or any deputy appointed, or to be appointed, by him, since the date of my last. I feel very uneasy on the subject, as the public service must necessarily suffer from the absence of that indispensable officer, there being no authority here by which the deficiency may be supplied.

The 27th section of the act of September 24, 1789, prescribes the amount and the mode of the security to be given by the marshal and his deputies, and the form of the oath to be taken by them; and, unless Judge Duval should now be in St. Augustine, to have those necessary forms complied with, I know not when I am to expect here a deputy marshal duly qualified. I say a deputy, because I understand that the marshal himself contemplates making St. Augustine the place of his habitual residence.

I took the oath of office before General Jackson. The attorney of the United States has not yet arrived.

I have the honor to be, &c.

ELIG. FROMENTIN.

Honorable J. Q. Adams, *Secretary of State.*

IV.

Judge Fromentin to the Secretary of State.

Sir: Pensacola, *August* 26, 1821.

At the same time at which this will be delivered to you, you will receive, no doubt, from General Jackson himself, a full detail of the outrage by him committed on the person of Colonel Callava. My unavailing efforts to have the colonel released only brought upon me a part of the same contumelious treatment. I am not sufficiently acquainted with all the circumstances attending the transaction to be able to give you a complete history of it. I will then confine myself to giving you an account of the conduct which I pursued, and which, now that passion has somewhat subsided, I think, upon mature reflection, is the only conduct which my duty permitted me to pursue.

Early in the morning of the 23d instant I was informed that Colonel Callava had been arrested the preceding night in his own house, and carried to jail. Soon after, my house was filled with people of all descriptions and languages. By degrees the crowd retired, and it was not until about eleven o'clock that Messrs. Lama, Innerarity, Dr. Brosnaham, and Father Coleman returned to my house. The first three applied to me for a writ of *habeas corpus.* I knew that it was in vain, having no marshal to execute my orders, to send an individual, who could have no authority to demand it, for a copy of the warrant in virtue of which Colonel Callava was detained; and that, as that copy would, and perhaps ought to have been refused by an officer of the army to that individual who could have no legal character to demand it, I could not, from an affidavit of a refusal to deliver the copy of the warrant under those circumstances, find myself more authorized after than before such a refusal to issue the writ; and, indeed, could a legal demand have been made with success, in the absence of a marshal, from an officer of the army? Could anybody have obtained from either General Jackson, or the officer in whose immediate custody Colonel Callava was, a copy of the warrant? It is enough to have a right to trample under foot every law, to place the officers charged with their execution in the impossibility of complying with the requisites of the law. Would not the same uncontrollable temper which manifested itself at the issuing of the writ, have manifested itself at the application for a copy of the warrant, which would have prevented the issuing of the writ, because nobody then could have been found to serve it? I felt anxious, sir, after the application was made to me, that the only judicial officer of the United States in West Florida, although with the consciousness of not being able to accomplish it, should do every thing in his power to liberate Colonel Callava from confinement. Is it fair to apply to me, under the most extraordinary circumstances of difficulty, the severity of the forms intended to be complied with in a state of undisturbed tranquillity?

Besides, there are no indispensably necessary formalities absolutely required previous to the granting of that writ. The form of it may vary a little, according to the laws of the several States. Some may require security for costs, if the writ should be improperly applied for; others may require security that the party in the act of bringing him before the judge shall not escape; others may require other things; but there is not, that I know of, any particular prerequisite commanded by the laws, or adopted by the courts of the United States, which, I believe, follow, in that respect, the particular forms prescribed by the laws of the State in which an application is made for the writ. I was then, in that respect, bound by no precedent, and I was forced to adopt the only mode which I had it in my power to pursue.

The common law, by allowing that particular writ to be served by anybody, and upon anybody, seemed to have anticipated the peculiar difficulties in which I was placed. The only question, then, for me to examine, after a formal, though verbal, application was made to me, was, whether I had a right to issue the writ. With that view I consulted my commission. I find myself there styled a judge of the United States, authorized and empowered to execute and fulfil the duties of that office according to the constitution and laws of the United States. I need not say that I consulted the constitution; but I consulted the acts of Congress, and, in the 14th connected with the 13th section of the act of September 24, 1789, I find that all the above-mentioned courts of the United States have a right to issue the writ of *habeas corpus*, and all other writs *not specially provided for by statute*, which may be necessary for the exercise of their respective jurisdiction, and agreeably to the principles and usages of law.

But again, says General Jackson, the writ of *habeas corpus* is not extended by law to this Territory, and I must confine myself to the jurisdiction given by the act of Congress in the only two cases mentioned in the act, to wit, the revenue laws, and the importation of people of color; and could not I, in return, ask General Jackson by what act of Congress grand juries, and, in criminal matters, petty juries, have been established in this Territory? The general has established them. He has done right; I thank him for it. But is it more necessary for the protection of the liberties of the people that they should be tried in criminal matters by a jury, than it is that they should have a remedy against the wild ravings of ungovernable tyranny? Let the events of the 22d, and I might add of the 23d and 24th days of this month, answer the question. God grant that before long a still more eloquent answer be not furnished to the question!

Yet, sir, determined as I was, as far as lay in my power, to endeavor to have justice done to Colonel Callava, I was not less determined to have justice done to the country. I feel as deeply as any American any attempt, on the part of the agents of foreign Governments, to disregard the rights of the United States. I once had an opportunity of expressing my opinion to you in writing on that very subject, and I may safely appeal to what I wrote then for a correct expression of what I must feel in every similar case; and, although I do not believe a word of what is attempted to be laid in the charge of Colonel Callava, yet, in consequence of the state of agitation in which the whole country was thrown, I deemed it a duty, under the discretionary power vested in all the judges, who have a right to grant the writ of *habeas corpus*, to require security; and I informed the friends of Colonel Callava, who applied to me for the writ, that I would, before setting Colonel Callava at liberty, require security for the production before me of the papers said to be in his possession. Security was offered to any amount. I mentioned forty thousand dollars—Colonel Callava himself in twenty thousand, and the two securities in ten thousand dollars each. Mr. Lama and Mr. Innerarity agreed to become securities. I then issued the writ marked No. 1, and delivered it, to be served on the officer who had the guard of the prison where Colonel Callava was confined, to Dr. Brosnaham, another of the friends of Colonel Callava, who had joined in applying for the writ. In the mean time, I prepared a rough draught of the recognizance, a copy of which is sent, marked No. 2. The rough draught of that recognizance was on my table when Colonel Walton came to bring me the order from General Jackson to be hereafter mentioned, and I gave it to him to read.

I was engaged in making some necessary alterations in the draught of that recognizance when I received, from the officer of the day, the letter marked No. 3, in answer to the writ I had issued. I dropped the unnecessary labor of putting the recognizance in a better shape. The soldier who brought me the letter of the officer of the day had scarcely left my house, when Colonel Walton entered it with the written order above alluded to, from General Jackson to me, marked No. 4. After some conversation with Colonel Walton, in the course of which I mentioned to him what I had done and intended to do in this business, I gave him to read, as before stated, the rough draught of the recognizance. I then desired him to furnish me with a certified copy of the written order which he had given me to read, and he agreed to call on me at 5 o'clock for my answer. He returned in about half an hour, and gave me the written copy I had applied for. In the mean time, having reflected on the strange message of General Jackson, I determined upon writing to him the letter, a copy of which accompanies this, marked No. 5. About 5 o'clock Colonel Walton returned, according to promise; and I gave him to read the letter which I had prepared in answer to the written communication of General Jackson. After reading it several times, he advised me not to send it, and observed that, as he himself knew that I was then suffering from a severe rheumatism, which prevented me from walking, he would state the fact in his return, and that I could thus further advise what I thought best to do. This letter was not, of course, sent to General Jackson. We had some further conversation; and, at parting, I told the colonel that, in the situation in which I was, nothing but force would compel me to leave my house.

The colonel made his return. I did not see him again that day; and, when night came, I anticipated a renewal of the scene of the day before, and prepared myself for the consequences; however, nobody came to disturb me. The next day, about noon, the colonel returned, and observed that both the general and myself must be desirous of making a report of this affair to the Government by the next mail; that there was no time to be lost; and that it was the general's wish that I should call at his office the next day, in the morning. After the colonel had withdrawn, I reflected that the state of things was now somewhat different from what it was the day before: a reason was assigned for my having an interview with the general, the force of which I felt; and, ultimately, a longer resistance would only end in affording General Jackson the scandalous triumph of once more trampling upon the laws of his country. I determined to go there that very afternoon; and accordingly, at about 4 o'clock, P. M., I went to the office of General Jackson. The conversation, as you may suppose, was nearly all on one side, not unmixed with threats of what he said he had a right to do for my having dared to interfere with his authority. He asked me whether I would dare to issue a writ to be served upon the Captain General of the island of Cuba? I told him no; but that, if the case should require it, and I had the necessary jurisdiction, I would issue one to be served upon the President of the United States. Ultimately, he wished to know the names of the persons who had applied for the writ of *habeas corpus*. I unhesitatingly told them to him. Then he wished to know whether they had made the usual affidavit, stating that they had been refused a copy of the warrant upon which Colonel Callava was confined. I told him no; that the application to me was a verbal one. General Jackson then required me to sign what I had just declared. I told him I was ready to do it, and I did it accordingly; Dr. Bronaugh, who was present at the conversation, having reduced that part of it to writing.

Much more was said by the general respecting the extent of his powers, the happy selection made of him by the President, the hope that no living man should ever in future be clothed with such extraordinary authority, how fortunate it was for the poor that a man of his feelings had been placed at the head of the Government, &c. &c. &c.; the whole intermixed with, or rather consisting altogether of, the most extravagant praises of himself, and the most savage and unmerited abuse of Colonel Callava and of myself, for doing my duty, in attempting to set him at liberty.

The first time the authority of General Jackson is contested, I should not be surprised if, to all the pompous titles by him enumerated in his order to me, marked No. 4, he should superadd that of grand inquisitor, and if, finding in my library many books formerly prohibited in Spain, and, among others, the constitution of the United States, he should send me to the stake.

I had taken the liberty, in the course of my conversation with him, to contest some of the powers he assumes as Governor and Intendant, &c.; of which legal powers, both previous to and since the adoption of the Spanish constitution, he appears to me not to have the remotest knowledge. As to the Spanish constitution, he will not hear of it, although it was solemnly sworn to here about sixteen months ago; nothing will do for him but the laws which were in force in Spain on the 19th of February, 1819. So that the first initiation of the inhabitants of Florida in the enjoyment of liberty must be by a retrograde step from a state of comparative liberty to a state of absolute slavery. I attempted to represent, but he would not let me go on; ultimately, I was permitted to depart without having suffered but in my feelings as an American.

The American flag, it is true—the flag of liberty—waves on our forts; a treacherous sign in Florida. Sir, the bohon upas tree of slavery overshadows our town.

Sir, it is reluctantly that I speak of a man whom I once delighted to honor; but I owe you the truth, and, painful as the task may be, I must discharge my duty.

I have the honor to be, with great respect, sir, your most obedient, humble servant,

ELIG. FROMENTIN.

Hon. JOHN Q. ADAMS, *Secretary of State.*

No. 1.

The United States to Lieutenant Mountz, of the 4th regiment United States infantry, greeting:

You are hereby commanded that you forthwith have the body of José Callava, late Governor of the province of West Florida, now in your custody, as is said, together with the day and cause of his caption and detention, by whatever name he may be known, before the judge of the court of the United States for West Florida, and for that part of East Florida which lies westward of the cape, at his chambers, in the city of Pensacola, to do, receive, and submit to whatsoever the said judge shall consider in that behalf; and have you then and there this writ, with your doings thereon.

Witness, Eligius Fromentin, judge of our said court, this twenty-third day of August, in the year of Lord eighteen hundred and twenty-one.

[Endorsed as follows:] I allow this writ.

ELIGIUS FROMENTIN,
Judge of the United States for West Florida, and that part of East Florida which lies westward of the cape.

No. 2.

José Callava, principal, acknowledges to owe to the Government of the Floridas the sum of $20,000, and ——, as sureties, acknowledge to owe, each of them, $10,000 of their estate, real and personal, to be levied to the use of the said Government, upon this condition: that, if the said José Callava shall personally be and appear before the judge of the United States for West Florida, and that part of East Florida which lies westward of the cape, whenever required so to do; and further, that the said José Callava shall not depart from the city of Pensacola without the leave of the said court, nor send away, remove, or otherwise dispose of, unknown to the said court, any papers now in his possession, which, by the late treaty between Spain and the United States, ought of right to be delivered to the United States, which said papers are represented to me now to be under seal in one or more boxes or trunks, with other papers in the house of the said Callava, then this recognizance shall be void; otherwise, it will remain in full force.

No. 3.

SIR: PENSACOLA, *August* 23, 1821.

Your writ of *habeas corpus*, demanding the body of Don José Callava, has been received and referred to his excellency the Governor, Andrew Jackson, by whose order he was confined, and who still directs that he be detained in confinement, until released by his orders.

I have the honor to be, &c.

P. WAGER, *Captain and officer of the day.*

Hon. Judge FROMENTIN.

No. 4.

Eligius Fromentin, Esq. will forthwith be and appear before me, to show cause why he has attempted to interfere with my authority as Governor of the Floridas, exercising the powers of the Captain General and Intendant of the island of Cuba over the said provinces, and of the Governors of said provinces, respectively, in my judicial capacity as supreme judge over the same, and as chancellor thereof; having committed certain individuals charged with a combination to secrete, and with having attempted to secrete and carry out of the territories ceded to the United States, the evidence of individual right to property within the said territories, which has been secured to each individual under the second article of the late treaty with Spain, and in open contempt of the orders and decrees made by me; and that the said Eligius Fromentin, Esq. be and appear before me, at my office, at five o'clock, P. M., in Pensacola, to make known the above cause, and to abide by and perform such order and decree as the undersigned may of right deem proper to make of and concerning the same.

Given under my hand, at Pensacola, this twenty-third day of August, eighteen hundred and twenty-one.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To Colonel GEORGE WALTON, Secretary of West Florida, to make known and execute the above, and to furnish a copy of the above, (if required,) returning this original, and in writing making known how he has executed the same.

A copy: GEORGE WALTON, *Secretary West Florida.*

No. 5.

SIR: PENSACOLA, *August* 23, 1821.

I would at all times have complied very willingly with any request of yours, although I am at present so much indisposed that I could not now have it in my power personally to wait upon you.

Of the nature and extent of your powers, you now are the best judge; nor do I pretend to interfere with your authority.

In granting the writ which was applied for this morning, I obeyed the duty which I conceived to be imposed upon me by the 14th taken in connexion with the 13th section of the act entitled "An act to establish the judicial courts of the United States," passed September 24th, 1789.

I have the honor to be, with respect, your most obedient, humble servant,

ELIGIUS FROMENTIN.

His Excellency Governor JACKSON.

V.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *August* 23, 1821.

I intended to have accompanied my last with written references to several elementary writers on the common law of England, in support of the principles by which I was governed in granting a writ of *habeas corpus* in the case of Colonel Callava. Upon reflection, I thought it best to refer to them all generally, and to refer at the same time to all the laws of the several States and Territories of the Union on the subject of issuing writs of *habeas corpus;* and, likewise, to the code of laws prepared by the authority of Congress for the District of Columbia.

Now, I might ask by which of those laws was my conduct to be regulated? None of the formalities required or advised by either the English or American writers on the subject is indispensable. Otherwise, the same invariable practice must, of necessity, prevail both in Great Britain and in all the States and Territories of the United States. None of them can be said to be even necessary, since either the one or the other of these formalities which may be required in England, in Massachusetts, or in Georgia, may not be requisite in Vermont, in New York, or in Kentucky. And is it for me, by prescribing any (no matter what) formality for the obtaining of this writ, which formality has not been prescribed by the United States, to pretend to abridge, or to encumber with any previous obligations, the right vested by the constitution in every citizen of the United States, to this invaluable writ? *The prescribing of those formalities is the right of legislative authority.* I took, and I was obliged to take, the common law writ of *habeas corpus*, naked and unencumbered with the restrictions which it has received, either from the often contradictory decisions of the several courts of justice in England, with which I have nothing to do, or from the statute law either in Great Britain or in the several States and Territories of the Union; none of which indubitably can be considered as applicable to the Floridas. My only duty, in which all the writers and the uniform practice of the United States and Great Britain agree, was, to see that no possible injury could result to the public from granting the writ; and against this I had amply provided, by requiring security for the production of the papers in the sum of forty thousand dollars. Further than that I could not go, without *usurping* an authority which was not delegated to me.

AUGUST 31, 1821.

Another part of my conduct may require a more detailed explanation than I could possibly give it in my last letter. I allude to the determination I took of repairing to the office of General Jackson. Sir, if General Jackson had been, or rather had professed himself to be, as I believe he is, only a military chief and an executive officer, I should have resisted his authority to the last. The worst then that could have happened would have been an imprisonment, more or less protracted, more or less severe. For that I was prepared. But, sir, be it remembered that General Jackson contends for unlimited powers. He is a Captain General; he is an Intendant; he is a Governor; he is a supreme judge; he is a chancellor; he is ——— what is he not? What he may claim a right to do, nobody knows; nobody can tell. And in all these multifarious characters, if he had been able to dissemble, like Tiberius, and had not dragged me before his own tribunal, I have little doubt but that, upon the slightest pretence, he would have transferred me before the tribunal of his own creation, not less his own; to which tribunal, contrary to all principles recognised by our Government, he assigned a jurisdiction extending to death, graciously, however, manifesting his tender mercies to the people of these provinces, by declaring, as he does in his ordinance published in the first number of the Floridian, that there shall be no execution for a capital offence until the warrant of the Governor be first had and obtained. Sir, that man must get rid of me in some way or other to make room for a Mr. Hayward, or Haywood, from Tennessee, whom he told me himself he had recommended to the President for the office which I now hold.

I understand that, with this view, a memorial has been sent by the last mail to the President, purporting to be signed by persons who call themselves members of the bar. What the precise purport of that memorial is, I know not. Of all the persons who profess themselves to be lawyers in this place, I know nobody even by name, but Mr. Brackenridge, with whom, for fifteen years, I have been on terms, if not of intimacy, at least of familiar acquaintance. Whether he has signed that memorial or not, I am not informed. But if he has, it affords an additional proof of what rapid progress the gangrene of the most abject slavery can make, even in a few hours, when the *vultus instantis tyranni*, by striking terror in every soul, compels men to do that which, under every other circumstance, they would hold most in abhorrence. Such are the inextricable mazes of the labyrinth in which tyranny involves itself, that, in order the better to conceal the bastard origin of this memorial, it is not improbable but the memorialists, agreeing in the main point with their master, were made there to hold a language somewhat at variance with what are generally known to be the opinions of the man under whose auspices I cannot doubt the memorial originated.

And now, sir, I have done with talking to you of myself on the subject of this detestable affair. I am sensible that I owe an apology for consuming so much of your time. Yet I could not have said less, in duty to the Government by which I was appointed, and in duty to myself. I now leave the case to the judgment of my country; and, anxious as I must feel for a favorable issue, I must be permitted to add, that I had rather fall in the cause which I defend, than triumph in that supported by my adversaries.

I have, &c.

ELIG. FROMENTIN.

N. B. When, in the line before the last of the third page of this letter,* I say that *I should have resisted his authority to the last*, I simply allude to my consenting to go to his office, under the circumstances detailed in my letter of the 26th ultimo, and not to any improper concessions, which I have never made, and never shall make.

SEPTEMBER 2, 1821.

Some less vague information, just obtained, of a report prevailing in town that I had apologized to General Jackson for issuing the writ of *habeas corpus* in the case of Colonel Callava, will necessitate, on my part, an application to General Jackson for a solemn denial of the atrocious charge. Of what may pass on the occasion, I will advise you by the next mail.

The following is a copy of the letter which I will send to General Jackson, as soon as I shall have closed the letters I intend to forward by this day's mail:

SIR: PENSACOLA, *September* 3, 1821.

I am informed that it is rumored in town that, in the interview between your excellency and myself, on the afternoon of the 24th ultimo, I had apologized to you for issuing a writ of *habeas corpus*, in the case of Colonel

*The fourth line of this letter *as printed*, (see above.)

Callava. I hope your excellency will not hesitate in enabling me effectually to contradict that report. Your excellency cannot have forgotten that, from the beginning to the end of the conversation, I insisted, not only on the right, but on the duty, of a judge of the United States to grant that writ; and that, among other things, upon being questioned by your excellency whether I would order a writ of *habeas corpus* to be served upon the Captain General of the island of Cuba, I told you no; but that I would not hesitate, if the case should require it, and if I had the necessary jurisdiction, to issue one to be served on the President of the United States. To this you answered, that the President of the United States was liable only to impeachment. I added, that I was confident that, in my place, you would have issued a writ of *habeas corpus*.

I have the honor to be, &c.

His Excellency Governor A. JACKSON.

VI.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *September* 6, 1821.

By the last mail I had the honor to forward to you a copy of the letter which I told you I contemplated addressing to General Jackson on the 3d instant. I sent it to him accordingly, a little after twelve o'clock, by Mr. Alexander Scott, jun. The verbal answer of General Jackson, as delivered to me in writing by Mr. Scott, is forwarded with the present, marked No. 1.

Before I proceed in the narrative, give me leave to submit a few observations on the statement made by Mr. Scott.

"He requested me," says Mr. Scott, "to inform you that the declaration which you signed, promising in future not to interfere with his authority, he deemed an ample apology."

Sir, I signed no such declaration, nor was I ever asked to sign any such thing; nor would I, if asked, have ever consented to sign it; the words "*in future*," which are here inserted, being intended, no doubt, to have a reference to the writ I had issued, which I never could have done, since I insisted on the contrary all the time, (as I hope to be able to prove by General Jackson himself,) both for the right and duty in me to issue the writ. Sir, if there be such a declaration in existence, it is a forgery. Yet a statement to the same effect was mentioned to me this morning, as having been made by a Mr. Connor, a gentleman in the family of General Jackson. I shudder at the bare suspicion of such a foul deed. But the fact having been mentioned by General Jackson himself, I could not help thus far, for the present, animadverting upon it.

I will at once take up the letter of General Jackson, (marked No. 2,) which is next in order. In that letter, I pass over all that relates to the general's opinion of the extent of my jurisdiction, &c., which has nothing to do with the question now before you.

The first thing which strikes me in this letter is not so much what is, as what is not in it. It forcibly puts me in mind of the passage of Tacitus, describing the funeral pomp of Junia: "*Præfulgebant Cassius atque Brutus eo ipso quod effigies eorum non videbantur.*" The first thing I looked for in that letter was an account of the pretended declaration, said to be signed by me, as the general himself told Mr. Scott not two hours before I received his own answer. There must be such a declaration, since he said so; and if there be, there is no need of any thing else. This must be damning proof. Why not state it? Why not tell me of it? Did this avowal escape the general prematurely, in an unguarded moment? Has not the time arrived yet to make use of it? Does he intend to keep it back, to fall upon me unawares, when I may be supposed not to be prepared to repel the charge? or has it found its way to Washington, in support of the memorial of the persons who call themselves members of the bar here? Or, after answering the holy purposes of the general, has a timely fear of discovery, owing, perhaps, to some blunder in the execution, (I wish I could add, perhaps a timely remorse,) led to the destruction of the precious document? What has become of it? It once was in existence, or else why did General Jackson mention it to Mr. Scott? Why did Mr. Connor mention it to another person? Where is it? I say again, where is it? General Jackson states in his letter that I then declared "that hereafter I would in no way interfere with his authority." That is something, to be sure, considering the effect he attempts to give to it, by the insertion of the potent *hereafter*, and by the constructive apology he derives from it afterwards. But, sir, how weak, how watery, compared with this more than fourth proof evidence signed by myself!

I now turn to the accusing part of General Jackson's letter. "I acknowledged that I had acted hastily, without due consideration, and without proper information as to the facts of the case."

Upon endeavoring to recollect the whole conversation, I think General Jackson, in his usual mild way, made use himself of those words, or some others to the same effect. But that I acknowledged the truth of those facts, remains to be proved; and I will prove the very reverse, by the evidence supplied by General Jackson himself.

"Upon the importunities of John Innerarity and some other Spanish gentlemen." But General Jackson forgets that he states himself, to me, in his note of the 25th, marked No. 3, that it was *expressed* by me that the writ was issued on the verbal *application*. A vast difference, general, between *application* and *importunities*.

And now let me pause a moment and consider. General Jackson insists that I must sign a declaration stating that I issued a writ of *habeas corpus* on a verbal application—a venial sin, under all possible circumstances, sir, in comparison with the atrocious crime. And he does not ask me, who am so submissive, so compliant, whom he could so easily frighten into an irresistible submission by the dread of confinement—he does not ask me to put the infamous sign of my henceforward infamous name to the revolting catalogue of crimes, which, thank God, have no existence but in General Jackson's own imagination.

Is it possible, sir—is it credible—that if I had made the concessions stated in General Jackson's letter, the general would not, under the malevolence towards me which he has betrayed in every part of his conduct since my arrival here, in the same proportion in which I myself evinced moderation—is it possible, I say, to believe that he would not have had that part of our conversation too reduced to writing by Dr. Bronaugh? and if he has not had it reduced to writing, under those circumstances, is it not a most irrefragable proof that such a conversation never passed? Another proof, of no less weight, is the statement made by Mr. Rutledge, a young gentleman who lives in General Jackson's family, who was present at the whole of the conversation, and yet does not state any of the facts above enumerated. [See Mr. Rutledge's letter to General Jackson, No. 4.]

"And that, had I been apprized that Colonel Callava had been committed by him for contempt of his authority, I certainly would not have interfered."

Sir, it was unnecessary for me to enter into a discussion as to the judicial authority of General Jackson; for, as I before observed, the case had already been referred to the President. But, without insisting upon that point, I contended that I had a right to interfere in the case here, at the same time that I granted I should have no right to

interfere if Governor Jackson, instead of being the Governor of a Territory, was the Governor of an independent State; but that, Governor as he was, Colonel Callava was, of course, detained a prisoner under color of the authority of the United States, and that, in that case, it was my right and duty to interfere.

But why do I say any thing myself on the subject? Sir, be so good as to turn to the last paragraph but one in General Jackson's first letter of the 3d September, marked No. 2. There you read as follows: "and I stated to you, that if you were in the States, you would have no right to interfere in the manner which you had attempted here; and referred you to the laws of Congress."

Sir, can there be a more ample confirmation of the truth of that part of the conversation above stated than those very words of General Jackson? for to what else than my own observations on the subject could those remarks of the general apply? But, sir, it is not all. Those words of General Jackson contain a positive admission that I had here the right to interfere, although I might not have had it in the States. What, sir! It was with his eyes open, and with the consciousness that I had the right to do what I did, that General Jackson rendered himself guilty of the many outrages offered to me in my official character! Oh, my country! Oh, the liberties of America!

Give me leave now, sir, to take a retrospective view of my letter to General Jackson, to which the one which I have just done analyzing is an answer; and what does it contain? A positive assertion on my part, that, from the beginning to the end of the conversation with General Jackson, I insisted both on the right and duty of a judge of the United States to grant that writ. Does General Jackson deny that fact in his letter, sir? Yet this cannot be true, if I held the language attributed to me by General Jackson. And we shall see, presently, in what style General Jackson answers, when General Jackson writes under the real or affected impression that the facts which he is going to refute are not true. Thus much, now, by anticipation, to confirm, by the silence of General Jackson, the truth of the facts contained in my first letter to him of the 3d instant, which I had the honor to send you by the last mail.

The next document in order is my second letter of the 3d September to General Jackson, marked No. 5, in reply to his answer. This letter contains scarcely any thing but a respectful denial of the charges made against me by General Jackson in his first letter of the same day, conveyed in as decorous language as my knowledge of it permitted me to use, and some further comparatively immaterial statements of facts, which sufficiently explain themselves, and require, of course, no comment from me. Let the letter speak for itself. I will only observe, that I sent this letter by Mr. Scott, within less than half an hour after receiving General Jackson's first letter of the 3d September; but, owing to General Jackson being otherwise engaged, Mr. Scott had no opportunity to have the letter delivered to him until between six and seven o'clock of the same day, P. M. The next morning, September the 4th, at about eight o'clock, A. M., I received, from the hand of Mr. Connor, above mentioned, the second letter of General Jackson, marked No. 6, dated September 3d, in answer to my second letter, which has drawn upon me the indignation and contempt of General Jackson. The indignation and contempt of General Jackson!

I beg pardon, sir, for the scandalous, indecorous, and disgusting scene which I am now compelled to open to your view. But, sir, because my enemy, like the swine, which delight in nothing as much as but filth, has thought it convenient to seek a refuge in the quagmire of Billingsgate abuse, shall I let go the hold I have of him? No, sir, covered with dirt, it is true, but nobly covered with dirt, which, coming in contact with such an enemy, I cannot protect myself from, I will still hold him—still drag him before the tribunal of his country—of his much injured country.

Sir, I must again beg pardon. I shudder at entering on the subject; but I must. I cannot help commenting upon every line—upon every word—of this most infamous document. The letter runs thus: "Sir, I have this moment received your second note of this day. The first created my astonishment, it is true; but the second my indignation and contempt. For I did not suppose, until your note now before me furnished the conclusive evidence, that you were capable of stating a wilful and deliberate falsehood."

What, sir! General Jackson, before he received my second note, did not suppose that I was capable of stating a wilful and deliberate falsehood! But, sir, what is my first letter, which did not create the indignation and contempt of General Jackson, but a wilful and deliberate falsehood, if the accusation contained against me in General Jackson's first letter be well founded? Is it possible, sir, that the man who, from the beginning of the conversation to the end, could have insisted upon his rights and duties as a judge of the United States, could have made the concessions stated in General Jackson's first letter? and, if the two statements are irreconcilable, why, after reading my first letter, did not General Jackson pour upon me the whole flood of his indignation and contempt? No; it was not until after he read my second letter that he thought me capable of stating a wilful and deliberate falsehood. Does it not then necessarily follow, sir, from General Jackson's own confession, that the facts stated in my first letter to him are true; and, if true, that the accusation against me by General Jackson must be ——? I will not, sir, out of respect to you, say what it must be. Let any honorable friend of General Jackson himself fill up the vacancy I have left.

Let us proceed: "That you have done so in your note of this evening, I do assert." I had, then, not done so in my note of the morning; otherwise, why does he not assert it likewise?

"—— as the enclosed certificates of Doctor J. C. Bronaugh (who was directed by me to pay strict attention to our conversation) and Mr. Rutledge fully prove."

If any thing was wanting to establish the spirit of personal hostility to me, with which the whole of this business was undertaken and managed by General Jackson, is there not an abundant proof of his motive afforded in the dishonorable confession he makes—he, too, acting, as he says, in the highest possible judicial capacity—that Doctor J. C. Bronaugh was directed by him to pay a strict attention to our conversation? For what purpose, sir? To state the truth impartially? Why, then, did he not give his directions to Doctor Bronaugh in my presence? Why did he not notify me, since he himself had taken one, to bring a second likewise? No, sir, I was not called upon to fight a fair duel. Assassination had been resolved on—assassination in the dark. I was to be entrapped; and an American general is the author of the foul deed. Have we, have the American people, become prematurely decrepit in the short space of a few lustres, during even the lifetime of the worthies; of many yet, thank God, of the worthies, who, by their arms in the field, or their labors in the cabinet, succeeded in erecting the stupendous fabric of our liberty, the sheet anchor of the liberties of the world—have we, I say, reached, already, the degenerate age of the Caligulas, of the Neros, of the Domitians, of the Heliogabaluses? Is the open profession of a spy—this most disgraceful of all professions—to receive amongst us the dishonorable honor of being publicly countenanced? Is any respect due to the testimony of a man who thus professes himself to be the tool of an employer, and that employer a supreme judge, and a chancellor sitting in his judicial capacity? Is our reputation, is our standing, is our liberty, to be placed at the disposal of men, who, although armed with unlimited authority, do not blush to descend to the low, mean, dirty artifices of the tyrants who, before them, have disgraced their age and country, and do not hesitate, unblushingly, to confess the disgraceful act? With that man, Doctor J. C. Bronaugh, I shall have nothing to do. I have nothing to say to him. The part which he descended to act is the best refutation of his testimony.

Yet, before I dismiss him, I cannot help observing how useless it was for General Jackson to have taken the trouble to direct that man to pay strict attention to our conversation; for the general himself seems no bad hand at recollecting. Both recollect very nearly the same thing; except, however, as to the word *importunities*, which is replaced in Doctor Bronaugh's letter by the words *urged by;* words, by the bye, of not exactly the same import, if I understand any thing of the English language. The entire conformity in the deposition of Doctor Bronaugh may, however, originate from the circumstance of his having, as he says, copied—not written, no, by no means—copied the answer of General Jackson to me; a new mode, to be sure, in our country; but (who knows?) perhaps a very good one for a witness to refresh his memory.

The next witness produced by General Jackson is Mr. Rutledge, to whose testimony, marked No. 4, I have already referred. Who can read Mr. Rutledge's letter to General Jackson, and not be struck with the hard struggle in the conscience of the honest young man? We see no such workings in the round statement of the first witness. It is true that Mr. Rutledge states "that I endeavored, by adducing the peculiar circumstances under which the writ had been issued, to offer something equivalent to an apology for the course I had pursued." Now, sir, I do believe that Mr. Rutledge has stated what he candidly believed was the truth; only Mr. Rutledge (and who in his situation might not have been similarly impressed?) makes use of the word *apology* for the word *justification*. What Mr. Rutledge alludes to, must be that part of the conversation in which General Jackson contended for the powers belonging to the Governor of an independent State; in which case, I freely confessed that if Colonel Callava had been confined by a State authority, I should have had no right to issue the writ; but that, in the present case, whether confined by the Captain General, or the Intendant, or the Governor, or, or, or, or, he still was confined by the authority of a person deriving his powers from the United States, and that, in that case, I had a right to interfere.

Mr. Rutledge further states "that I gave General Jackson distinctly to understand that I was determined not to interfere, in future, with any of the branches of his administration."

Sir, I have said so many times in answer to General Jackson, who (upon what ground God only knows, unless it be on the principle of the wolf in the well known fable of the wolf and the lamb,) has been complaining of my interfering with his authority ever since my arrival here, that I never had, never intended, and never would interfere with his authority; that, I dare say, Mr. Rutledge heard me say so again on that occasion. But, sir, Mr. Rutledge is mistaken when he adds the words *in future*, if he understands these words as having a reference to the course I had pursued in granting the writ of *habeas corpus* in the case of Colonel Callava.

And here, sir, ends the testimony triumphantly produced by General Jackson. I may be permitted here to ask, why Mr. Rutledge did not give testimony as to the other heads of accusation contained in General Jackson's letter? Mr. Rutledge states that he was present at the whole of the conversation. Strange, indeed, that he should make no mention of the "importunities of John Innerarity; of my having confessed that I had acted hastily, without due consideration, and without proper information as to the facts of the case."

Sir, although Mr. Rutledge may not boast a retentive memory; although he did not pay, at the time, a particular attention to the words I used; yet, if I had held such or similar language, it is impossible that Mr. Rutledge should not have recollected something of it. What, then, are we to think of his silence? That the language attributed to me, or any similar language, was never held by me.

It may, perhaps, be said (for what may not be said?) that Mr. Rutledge answered only such interrogatories as were put to him. But, sir, who put the interrogatories? Mr. Rutledge is not a witness for me. He is produced by General Jackson; and can it be believed that, if General Jackson had anticipated from Mr. Rutledge an answer favorable to his views, he would have abstained from putting the questions to him? No, sir. That he did not put them, is conclusive evidence that he could not expect that Mr. Rutledge would prove them; and, as far as Mr. Rutledge is silent upon those points, his testimony cannot be interpreted otherwise than as a positive denial of the charges made against me by General Jackson.

Parting respectfully from Mr. Rutledge, again, sir, I must sum up courage to follow General Jackson himself through the muddy road which he has selected; again, I beg pardon for quoting his indecorous language. But what can I do?

"That you have the hardihood to deny that, when you called by appointment at my house, I did not send for my book to the office containing the records of my commissions and instructions—" The man is mad: I never denied any such thing. "And that I did not read the whole of them to you, shows that you are regardless of truth; and in this I do pronounce that you have stated another deliberate falsehood."

It might be difficult to rebut such a charge, when attempted to be propped up by such a broad assertion. But, fortunately for me, before I could possibly anticipate any such difficulties as now exist between General Jackson and myself, and at a time, of course, when I could have no possible interest in dissembling the truth of a fact, by no means of any importance compared with the odious accusations of General Jackson, to wit: in my letter to you, sir, under the date of August the 20th—I say, that "General Jackson communicated to me such parts of his several commissions as he conceives admit of a construction entirely at variance with that which I put, both upon my commission and your letter." As to his instructions, I never thought of asking for a communication of them. Since that time no communication of the kind took place between us, until, as stated by Mr. Rutledge in his letter, in our interview on the 24th of August, in his office, he again read either part or the whole of one of his commissions. The fact, however, is comparatively of so little importance, that it is still more to be regretted that General Jackson should have indulged in such foul language on the occasion.

The last paragraph of General Jackson's letter needs not to be transcribed. I refer you to the copy of it which I enclose, marked No. 6. It requires but few comments. In that paragraph the general, for the first time, to my knowledge, speaks of his *legitimate* powers. Would to God he never had exceeded them! The whole country would not now be thrown into a state of confusion and anarchy, calculated to imprint indelible disgrace on the American name.

One or two more observations, sir, suggested by this last paragraph, and I wash my hands of all the impurities necessarily contracted by the indispensable obligation in which I was to hold any communication with General Jackson.

"Recollect," says he, "the admonitions I gave you," &c.—See his letter, No. 6. But, sir, to what purpose, I may ask, did the general give me the admonitions referred to, if it be true that I had apologized to him in the manner by him stated? Could the man who should have thus degraded himself by the humblest submission have required admonition? Sir, the uniform system of all tyrants before, whether republicans, emperors, kings, or generals, has been "*Parcere subjectis et debellare superbos.*" Who, then, is this Moloch, to be neither conquered by resistance, nor propitiated by compliance?

No, sir, the admonitions were necessary, in the opinion of General Jackson, because I could not be driven from the stand which I had taken. Had I been disposed to abandon it, sir, those admonitions would have been useless; and the best proof that I did neither act nor speak in the way in which General Jackson attempts to represent it, is, that he deemed those admonitions necessary. The truth is, sir, that, tyrant as he is, General Jackson, at the

very beginning of the conversation, before Doctor Bronaugh had joined us, had relieved me from any immediate apprehension of confinement, (if this apprehension could have had the effect of making me swerve from my duty,) by telling me that "if I had gone one step farther he would have committed me."

I appeal to Mr. Rutledge for the truth of this statement. What the general meant by saying if I had gone a step farther, I know not. I went as far as I could. He knew that I had no marshal, and that, of course, had I been so disposed, no attachment could have issued. But, be this as it may, I had the word of General Jackson that he was not, at that time, disposed to commit any outrage. To what purpose, then, could I have been induced to make concessions of a nature to disgrace me forever, when thereby I could obtain no additional certainty of relief which was not already secured by the word of General Jackson, if there be any security in the word of a tyrant? A tyrant, did I say? Sir, the word is disgraced by being coupled with that of General Jackson. The word *Jackson*, in future, shall be used instead of the word *tyrant*, whenever a correct idea shall be attempted to be conveyed of those portentous crimes, gratuitously committed, which throw in the shade the former crimes, prompted, at least, although not excused, by the passions of the Jacksons who have preceded him.

"Regardless," says General Jackson, in his last paragraph "of your boast of blood flowing," &c.

Perfectly in character, sir; what tiger, before General Jackson, was not regardless of blood flowing? and why not tiger Jackson, too?

I have emerged at last from the mire in which I was obliged to plunge in pursuit of General Jackson; and here, for the present, I must stop. I feel too much oppressed to go on, and, although uncertain whether my liberty will be spared to allow me time to finish this letter, I must rest a little from my fatigue, before I can resume the noble and erect attitude of a man walking on the plain road of honest truth, in the garb of becoming decency.

SEPTEMBER 8, 1821.

Give me leave now, sir, to recapitulate the material facts arising from the evidence which is under your eyes. I have myself no witness. My only defence is to be found in my very indictment. The only arms I have used have been forged by my enemies themselves. It is out of their own arsenal that I have been supplied with the only weapons for combatting their rage—very limited means of defence, sir, against such a powerful combination; yet, I still hope, not ineffectual. Sir, the outrage committed on the person of the former Governor had struck terror and dismay among the ancient population of Pensacola. "Is this," they said, (addressing me, when they assembled at my house early in the morning after the arrest of Colonel Callava,) "is this the liberty you promised to us? If our former Governor is thus treated, protected as he ought to be by his character and by his virtues, what are we to expect ourselves? Nothing remains for us to do but to leave a country where neither our liberty nor our property is respected, notwithstanding the solemn stipulations of a treaty."

Those, sir, are the very expressions by which both my ears and my heart were lacerated. The loudest consternation was, however, soon assuaged into a more dreadful silence still, by the fear of instant punishment. They were told that they had still a protector in me; that I had both the authority and the disposition to stop the Governor in his mad career of despotic frenzy. With what success I did it, you have seen. Under the impressions created by that state of things, in a newly acquired territory, I went to General Jackson's office, as I had before the honor of writing to you, in a spirit of conciliation. I carried with me my commission, which I showed him, and, by reference to the laws of the United States, I insisted, as above said, on the right of doing what I had done. I selected to go to his office an hour when I supposed that, not being expected, I would find him surrounded by fewer persons, and, of course, more disposed to listen to reason: for I knew it is principally when there is a crowd around him that, in order to show his superiority, General Jackson takes a particular pleasure in using the coarse, vulgar language, which is calculated, in his opinion, and in the opinion of his adherents, and of that class of spectators who, on those occasions, crowd around him, to bring into contempt the persons he addresses; and the higher the station of those persons, the coarser, of course, is the abuse. In any other part of the United States, the results from such an unbecoming course are comparatively innocuous. Things are soon there replaced upon a correct understanding. The case is vastly different here, for reasons too obvious to require a statement from me. I went, then, to General Jackson's. True, I did know, at that time, that Jackson was possessed of the infernal secret of causing the most poisonous waters to flow from the purest source.

In that character of a magician, he has exhibited against me a most atrocious charge. I think I have satisfied you that the evidence arising from his own letters entirely disproves the charge. If it cannot be said to be disproved by his first witness, (Dr. Bronaugh,) I am sure nobody can tell that the charge can receive any support from his parasite testimony. And as to Mr. Rutledge, silent with respect to the most important part of the accusation, he only gives an opinion as to what he conceives I intended to do. The very terms which he uses, "endeavored to offer something equivalent to an apology," proves that Mr. Rutledge, as I before hinted, used the word *apology* there instead of the word *justification*. A man may endeavor to justify; no endeavors are necessary to apologize.

There still remains, however, the bugbear of the declaration which General Jackson told Mr. Scott I had signed, promising in future not to interfere with his authority. Sir, on this occasion I can tell General Jackson, in the language of Shakspeare,

"Sir, spare your threats;
The bug which you would fright me with I seek."

Seek! I do seek it, indeed, sir. General Jackson said there was a document; one of his numerous secretaries said the same thing. Thousands, perhaps, have seen it. Everybody, sir, has seen it but myself; and shall I not be gratified by a sight of it? I have a right to demand it; and, if it be not produced, is there, sir, a name in the English language fit to be applied to the wretches who, despairing to conquer, have not blushed to resort to such vile arts to destroy a man who, in this whole business, can, so far as he himself is concerned, regret nothing except placing too much confidence in a man who, under his own signature, proclaims himself to be equally destitute of truth, of decency, of humanity, and of honor?

I have the honor, &c.

ELIGIUS FROMENTIN.

Hon. J. Q. ADAMS, *Secretary of State.*

No. 1.

SIR: PENSACOLA, *September* 3, 1821.

In answer to the communication from you to his excellency Andrew Jackson, he stated that he was then engaged, but would reply to it in due time.

He requested me, at the same time, to inform you that the declaration which you signed, promising in future not to interfere with his authority, he deemed an ample apology, you not having the right to issue the writ of *habeas corpus;* in doing which, you exempted yourself from that punishment which he would have inflicted on any private

individual attempting to oppose him in the exercise of his judicial functions. He further stated that your jurisdiction extended only to the revenue laws, and the laws prohibiting the importation of slaves, which you had admitted; and that, if you presumed to issue another writ of *habeas corpus*, contravening his decisions as supreme judge, he would instantly have you committed to prison; that he would not go beyond his province in the discharge of his duties, and was determined not to submit to that indecorous conduct of which you were guilty in issuing a writ in opposition to his authority, instead of aiding him in enforcing the laws.

I have the honor, &c.

ALEXANDER SCOTT, Jun.

The Hon. Eligius Fromentin.

No. 2.

Sir: Pensacola, Executive Chamber, *September* 3, 1821.

Your note, by Mr. Scott, has just been handed to me, and I am truly astonished at its contents; and, in answer, state, that when you appeared before me in the Executive Chamber, on the 24th ult., you did then and there state and acknowledge that you had acted hastily, without due consideration, and without proper information as to the facts of the case, upon the importunities of John Innerarity and some other Spanish gentlemen; and that, had you been apprized that Colonel Callava had been committed by me for contempt of my authority, you certainly would not have interfered. And you further acknowledged that you had called upon me several times, in a friendly way, to advise with me as to your jurisdiction, and that I had always told you that it was my opinion you had no other jurisdiction, except so far as the laws of the United States had, by the act of Congress, been extended over those provinces; and that, when I showed you the powers which had been granted to me by the President of the United States, you declared that there was no necessity for your being here, and that you might as well return to New Orleans; and that I replied that you had jurisdiction over the revenue, and the infraction of the laws of Congress prohibiting the importation of slaves. And you did then declare that, hereafter, you would in no way attempt to interfere with my authority.

There was likewise some conversation in relation to the powers of a judge of the United States to issue a writ of *habeas corpus* in the States, except in particular cases; and I stated to you that, if you were in the States, you would have no right to interfere in the manner which you had attempted here, and referred you to the laws of Congress.

If this was not an apology, I know not what is. I viewed it as such, and dismissed you accordingly, under the citation by which you were brought before me to show cause, &c.

I am, sir, with due respect, yours, &c.

ANDREW JACKSON, *Governor of the Floridas, &c.*

Eligius Fromentin, Esq., *Judge, &c.*

No. 3.

Executive Office, Pensacola, *August* 25, 1821.

Major General Andrew Jackson, &c., with compliments to E. Fromentin, Esq., informs him that, in looking over the memorandum of yesterday, the word " verbal" has been omitted in the same. It being expressed by you, and understood by me, that the writing issued by you, styled a writ of *habeas corpus*, in the case of the confinement of Colonel Don José Callava, for a contempt of my judicial orders and decree, was issued by you on the *verbal* application of sundry persons, without petition or affidavit in writing, that every thing may appear as it was transacted, Colonel Walton waits upon Judge Fromentin to ask him to insert in the said memorandum the word " verbal," in the proper place.

ANDREW JACKSON, *Governor of the Floridas, &c.*

E. Fromentin, Esq., *Judge of the U. S.*

No. 4.

Sir: Pensacola, *September* 3, 1821.

In compliance with your request that I would explain to you my understanding of that part of the conversation which took place between your excellency and Judge Fromentin, upon the appearance of the latter before you, agreeably to citation, on the 24th ultimo, relative to these points:

Whether Judge Fromentin did or did not say that, had he been aware of the circumstances of Colonel Callava's commitment, he would not have issued the writ of *habeas corpus* in his favor, as he had done? and whether he did or did not declare that, in the future exercise of his functions, he would carefully avoid interfering with the lawful subjects of your excellency's jurisdiction?—

I have the honor to state as follows: That I was present during the whole of the conversation, and, although neither a retentive memory nor a particular attention paid at the time to the *words* used by Judge Fromentin warrant me in referring to them, yet the impression which remains upon my mind, from the conversation above mentioned, is clearly this: that Judge Fromentin, after hearing the act of Congress, one of your excellency's commissions, and some other documents, read, endeavored, by adducing the peculiar circumstances under which the writ had been issued, to offer something equivalent to an apology for the course he had pursued, and gave your excellency distinctly to understand that he was determined not to interfere, in future, with any of the branches of your administration. I have, &c.

E. A. RUTLEDGE.

His Excellency Andrew Jackson, *Governor of the Floridas.*

No. 5.

Sir: Pensacola, *September* 3, 1821.

If your excellency has been astonished at my letter, I may assure your excellency that I have been no less so at reading your answer. I " acknowledge that I had acted hastily, without due consideration, and without proper information as to the facts of the case, upon the importunities of John Innerarity, and some other Spanish gentlemen; and that, had I been apprized that Colonel Callava had been committed by you for contempt of your authority, I certainly would not have interfered!" Never, sir, never! My blood recoils at such a statement; its last drop will flow before I subscribe to it. Give me leave to put your excellency in mind that you began the conversation, and I could scarcely find time to place a word. Nor did you hear me mention Mr. Innerarity's name, nor

any other name, until your excellency asked me who were the persons who had applied for the writ; and then I mentioned Mr. Innerarity's name, with the names of the other gentlemen who, jointly with him, had applied for it. The conversation then turned upon the *verbal* application for the writ, when Dr. Bronaugh entered, and reduced that part of it to writing. The extent of your powers was the next topic, and you read the act of Congress, and began to read one of your commissions; but neither then, nor at any time, did your excellency favor me with an entire perusal of your several commissions. On that occasion, as on every other preceding occasion, when our respective powers and duties were the subject of conversation, you insisted on my being confined to the two cases stated by your excellency; and as that had already been referred to the President, it was unnecessary for me to insist.

It is most assuredly true that I said that I never had nor ever would interfere with your authority, nor, indeed, sir, with the authority of any other man. But, sir, does it follow that I am disposed to surrender the authority vested in me? Assuredly not. Legal authority is one thing; illegal authority is another thing. Upon that we differ. A higher tribunal than yours or mine must of course pronounce.

I have the honor, &c.

ELIG. FROMENTIN.

His Excellency Governor ANDREW JACKSON.

No. 6.

SIR: PENSACOLA, *September* 3, 1821.

I have this moment received your second note of this day. The first excited my astonishment, it is true; but the second my indignation and contempt; for I did not suppose, until your note now before me furnished the conclusive evidence, that you were capable of stating a wilful and deliberate falsehood. That you have done so in your note of this evening, I do assert, as the enclosed certificates of Dr. J. C. Bronaugh (who was directed by me to pay strict attention to our conversation) and Mr. Rutledge fully prove. That you have had the hardihood to deny that, when you called by appointment at my house, I did not send for my book to the office containing the record of my commissions and instructions, and that I did not read the whole to you, shows that you are regardless of truth; and in this I do pronounce that you have stated another deliberate falsehood. I have barely to add, that I recommend to you to keep within your legal jurisdiction and powers. Whilst you do this, all your proceedings will be supported, and all my aid given that may be necessary to carry them into effect. But when you attempt to transcend them, and interfere with my legitimate powers, recollect the admonition I gave you when before me on the 24th ultimo, and attend to it; or you will be treated and punished as you may deserve, regardless of your boasts of blood flowing, &c., which pass by me as the fleeting breeze.

Here, sir, on this subject, our communication closes, as I am too much engaged to read yours.

I am, sir, &c.

ELIGIUS FROMENTIN, Esq. ANDREW JACKSON.

No. 7.

SIR: PENSACOLA, *September* 2, 1821.

Agreeably to your request, I have the honor to state that I was present when the conversation took place between Judge Fromentin and yourself, on the 24th ultimo, on the subject of his having issued a writ of *habeas corpus* in the case of Colonel Callava, and that I paid the most particular attention to every thing which occurred on that occasion; and that you have correctly stated the substance of that conversation in a letter of this date, which I copied, addressed to Judge Fromentin.

After some remarks made by you in relation to his improper and indecorous interference in a case where your authority had been attempted to be set at defiance, and that, too, by force of arms, and, while sitting in your judicial capacity, treated with contempt, Judge Fromentin did acknowledge that he had acted hastily, without due consideration, and without a proper knowledge of the facts; that he had issued the writ of *habeas corpus*, having been urged to it by a number of individuals; and, being requested to name them, mentioned Innerarity, La Rua, Brosnaham, and some others; and declared, had he been informed that you had committed Colonel Callava for contempt of your authority, while sitting in your judicial capacity, that the writ of *habeas corpus* would not have been issued; and that, for the future, he should in no way attempt to interfere with your authority or powers.

I am, sir, &c.

J. C. BRONAUGH.

His Excellency ANDREW JACKSON, *Governor of the Floridas.*

VII.

Mr. Fromentin to the Secretary of State.

SIR: PENSACOLA, *September* 8, 1821.

Owing to the departure of the mail from this place two days sooner than the regular mail day, of which I was not apprized until this evening, I am very reluctantly compelled to postpone until next week sending you the copies of the correspondence between General Jackson and myself on the subject of his most atrocious calumny. I am not certain that there has not been even forgery in this business. All I ask is a suspension of opinion until I may be heard; when I pledge myself that there shall not remain the least doubt of my being innocent of the crime of apologizing for issuing a writ of *habeas corpus.*

I have the honor to be, &c.

ELIG. FROMENTIN.

The Hon. JOHN QUINCY ADAMS, *Secretary of State.*

VIII.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *September* 21, 1821.

My situation and the situation of the country become more and more desperate every day. When, after receiving my commission, on the very day on which the pretended county court created by General Jackson adjourned, I wrote you that things, of course, would remain *in statu quo* until I should hear further from you, I was

under the impression that the court would not sit again for three months to come, and that it would be as easy in six weeks from the time when I wrote, when I expected your answer; and supposed, too, I should have a marshal to remedy the evil already done, with the co-operation of General Jackson himself, who, I believed then, honestly mistook the nature and extent of his powers, and for whose conviction only I wanted to hear further from you, under the hope of being able then to repair the mischief with as little scandal as possible: but the evil is making every day such rapid progress, that I am seriously alarmed at the immense number of suits, both civil and criminal, which are every day tried here, *coram non judice*. The county court holds adjourned sessions every month; and the general is engaged in hearing trials himself, more or less, every day. What his views are, I cannot tell; but I feel serious anxiety when I see him from the bench, which he has usurped, pressing indiscriminately into his service truth and untruth, fair and unfair. No American (much less one who once had such a reputation) could dare to trust his fame of honesty and sense upon the publication of such a rhapsody as was delivered the other day from the bench presided by General Jackson, and published in the Floridian of the 15th instant, under the head of "important judicial decision."

I was flattered a few days ago with the hope of being able at last to make an effort to put an end to this horrid state of things. A Mr. Saltonstall called upon me to inform me that he had been appointed a deputy marshal by Mr. Forbes. But, unfortunately, upon an examination of the documents, it does not appear that Mr. Forbes has given the security required by law, or taken the oath, &c.; so that, not being qualified himself, he cannot qualify anybody else. I recommended Mr. Saltonstall immediately to write to Mr. Forbes, and urge him to comply with the requisites of the law, and send me duly authenticated copies of the whole, accompanied with a new commission for Mr. Saltonstall. When this will arrive, I know not. But, upon reflection, what will it avail the public or me, in the present state of things? I can exercise no jurisdiction. The portion of the army here is under the orders of General Jackson. The *posse comitatus* would be inefficient. If my life was the only sacrifice to be risked, the law should be obeyed. But, under our government of laws and freedom, the most revolting system of inquisition prevails; and I am compelled to desire, as preferable to what exists here now, even the despotism of Algiers, Tunis, or Morocco. This place re-echoes with the most outrageous and impious vociferations, and that, too, from a place called a bench of justice, against everybody who will dare to question the supremacy of the Governor. I am credibly informed that commissions have been, or are to be, sent to New Orleans, in order to find out, by depositions there, the name of the writer here whose description of the scenes which have taken place at Pensacola does not exactly tally with the account given by the general and his friends. I write to you with a rope round my neck. I can afford protection to nobody here, much less to myself.

I have the honor to be, &c.

ELIG. FROMENTIN.

Hon. J. Q. ADAMS, *Secretary of State.*

The attorney of the United States has not yet arrived.

IX.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *October* 28, 1821.

I have the honor to send you, enclosed, some strictures upon the opinion delivered by the court presided by General Jackson, on the question of jurisdiction in the case of the heirs of Vidal *vs.* Innerarity. If I had animadverted upon every thing which is objectionable, without opinion, I should have been under the obligation of writing a book. I attached myself only to a few prominent parts of such gross absurdity and perversity as necessarily imposed upon me the duty of a few observations. The rest is so very, very despicable, that it must be left to refute itself.

You will receive, at the same time, an extract from some more copious notes which I have taken to answer such contingencies as future events may possibly create. In the mean time, this extract may not be useless, as it contains some more minute details of the motives of my conduct than I had it in my power to give in the hurry in which all my letters to you giving an account of the transactions here were written, immediately after they had taken place.

The blank left in the extract I send is filled up in the original notes by a narration, in all its essential parts, similar to what is contained in my former letters, and which I deem unnecessary to repeat here.

Allow me, in conclusion, to declare that, had I to go the same ground over again, I would again do what I have done. More than two months' reflections have confirmed me in the correctness of the course I pursued. I am desirous of the approbation of my country; but I am more desirous of the approbation of my conscience; and, turn things as they may, I have secured that approbation.

I have heard yet neither from the marshal nor from the attorney of the United States.

I have the honor to be, &c.

ELIGIUS FROMENTIN.

The Hon. J. Q. ADAMS, *Secretary of State.*

[EXTRACT.]

There is to be observed in the conduct of every man a motive of action, which may be called radical, and which, when correctly ascertained, gives to an accurate observer the key of actions apparently not to be accounted for by any known rules. This is strongly exemplified in the conduct of General Jackson. From the moment he was appointed Governor of the Floridas, he seems to have been entirely overpowered by the madly gratifying belief that he was to be then omnipotent. And, indeed, to hear him speak, and to test his speeches by his deeds, one would be apt to think that this omnipotency was the *sine qua non* condition of his condescending to accept of the office. Mr. Brackenridge told me, himself, that the general was raving when he first saw the list of appointments which had been made for both the Floridas. His resentment knew no bounds, and the gratification at his own appointment was lost for a while in the mortification he experienced at the non-appointment by the President of the characters he had recommended for the several offices in these provinces. He accordingly lost no time in taking such steps as could enable him, when the opportunity should offer, and when necessity, in his opinion, should require it, to secure to himself that absolute despotic authority for which he panted, entirely regardless of that portion of authority vested by the President in the officers who were, jointly with him, to administer, in its several branches, the Government under his direction. His advisers on the occasion, he himself told me, were H. M. Brackenridge and Abner L. Duncan, esquires—Abner L. Duncan, the friend and adviser of all the tyrants, be they who they may. The notorious Abner L. Duncan, who, in New Orleans, in 1807, advised General Wilkinson to a perjury, was pre-eminently entitled to become, in 1821, the adviser of the unconstitutional, iniquitous, and tyrannical measures but too faithfully pursued since by General Jackson. * * * *

The 22d day of August arrived. On that day I had been informed that the county court created by General Jackson was to meet again on the 1st of September, and, anticipating the fatal consequences necessarily to follow from the suits which were to be tried before that pretended tribunal, without any legal jurisdiction, not only for the parties themselves, but even for the judges and other officers of the court, and for the general himself, (all answerable to the parties in damages,) I had determined on that day again to call on General Jackson, once more to endeavor to open his eyes to the impropriety of the course which he had adopted, and which he seemed determined to pursue. The prevention, by all possible means in my power, of a continuance of usurpation pregnant with so many irremediable evils, scarcely left room in my mind for any other idea. Unable to administer justice myself, both because my jurisdiction was not acknowledged, and because the necessary officers of my court, through whom I might have attempted to enforce my jurisdiction, had not arrived, I thought it my most imperative duty, imposed by my commission, to neglect nothing at least that could put a stop to the scandalous and calamitous usurpation of my jurisdiction. The events of that day prevented my visiting General Jackson. I retired early to my house. In the night Colonel Callava is arrested: the next day I issue a writ of *habeas corpus* upon the application of some of his friends: the general refuses to permit it to be obeyed. All at once the volcano, where the jarring elements of an overwhelming destruction had been for some time working in silence, makes its eruption: the general sends me his celebrated order of the 23d of August: the constitution of the United States, the laws of Congress, the commissions of the President, are all trampled under foot. The revolution is complete; and the Jacksonian* Commonwealth, which till that time had tried to worm itself into a sort of a miserable hanging life on the walls of our town, is actually spewed into existence.

General Jackson has now crossed the Rubicon. The country was invaded—conquered. Whether the usurper be a foreigner or an officer of the commonwealth, does not alter the question, except so far only that, in the present instance, it makes the usurper more guilty. The flag of the United States, still permitted to wave here, and the uniform of the United States, still worn by the soldiers of the garrison under the orders of General Jackson, only add the crime of profanation to the crime of usurpation of the tyrant. But, although exercised in the name of the United States, still usurpation, still oppression, still tyranny, still terror, still Jacksonism, rule uncontrolled and uncontrollable over this ill-fated land.

Such were the circumstances in which I found myself placed when I was summoned, *in the name of the law*, to appear before General Jackson. And what law? And by what judges, and under what auspices, was the application of that law to be made? I confess it, I have no courage against the hangman. I knew that resistance was vain, and that it would be construed as rebellion, and perhaps treason. I was still haunted by the hope that, possibly, I might, by going, find an opportunity of exhibiting before his eyes, in glowing colors, the calamities likely to result to the people of this country, whom I still supposed he could not wish gratuitously to oppress, from the assumed jurisdiction of the county court created by him. This hope I must give up if I should absolutely refuse to go, and should suffer myself to be dragged there by force—the only alternative I had left; and yet, under the peculiar situation in which I was placed, the performance of that duty was almost the only thing for me to do, not to prove myself undeserving of the high office to which I had been appointed, not for the furtherance of my own views of self-dignity and importance, but for the good of the people, in the best possible way in which I could promote it; and if there was an occasion when the promotion of that good called for an abrogation of self, and for the severe and difficult obligation of fulfilling a hard duty, notwithstanding the obloquy which its performance might subject me to, this indubitably was the occasion. Better, however, be, than appear to be right. In order, then, to try to accomplish my object, I endeavored to steer a middle course. I did not go, in compliance with the order of General Jackson, on the day or on the hour appointed by him, sure as I was that I could obtain nothing from him when surrounded by a crowd. But the next day I determined to go at a time when, not being expected, I hoped I might find him alone. Vain hope! I ought to have recollected that the shark is never to be met with unaccompanied by its pilots.

But is it true that, correct as my motives and right as my conduct may be, still it wears the appearance of weakness? What! the man who issued the writ of *habeas corpus* in the case of Colonel Callava is a weak man! The man who entered the den of the ferocious Jackson with a determination, and who, in this most unequal conflict, did maintain all his rights, is a weak man! The man who, being informed, after more than a week, of the calumnies circulated against him by the minions of Jackson, applies to him for a prompt denial of the charges, is a weak man! The man who, struggling alone against a most unrelenting despotism for more than two months, has borne with becoming equanimity the (to him) honorable neglect of the men in office in Pensacola, from the highest to the lowest, each of whom, in the days of Jacksonian terrorism, strove to manifest his guilty zeal by becoming the willing executors (my ignorance had nearly betrayed me in writing the willing executioners) of the arbitrary will of their master, is a weak man! The man who, without the assistance of any of the officers of his court, in a small town where there could exist not even the protection of a public opinion; where none were to be seen but oppressors and oppressed; whose silent and impotent pity was the only comfort to be expected; and that town, too, at such a distance from the seat of Government, that, the possibility of preventing evil being entirely out of the question, he was left with no other but the desperate resource that possibly those evils might be revenged—the man, I say, who, thus situated, notwithstanding he is informed of the steps daily taken by the tyrant, by illegally, and I might say inquisitorially, screwing witnesses to find a pretence to accuse and destroy him, still remains at the post assigned to him by his commission, unprotected but by his courage and the strength he derives from a steady adherence to what he deems his duty—that man is a weak man! Well, be it so; my opponents are welcome to the reputation of courage, most nobly manifested in their unanimous support of the many acts of oppression and tyranny of their apostle, in the sacrifice they have made of their own sense of right and wrong, of their understanding, of their probity, of their virtue, of their independence, and, as far as their influence could go, (not far, thank God!) of the independence of their country, at the shrine of their idol. Each and all of these sacrifices required, indeed, a courage which I did not possess. Most noble, thrice noble, high-minded republicans; brave, generous, undaunted freemen; who have had the courage (a rare courage in America, I hope,) of dancing by the sound of the music of their chains; of ringing a whole night those chains in the ears of their master—a sweet music in the ears of a tyrant; of offering up libation after libation in honor of their deity.

Indignation recoils with horror at such prostitution. Thus, after Nero had assassinated his mother, he was called the savior of Rome; the brave of the day ran to kiss his parricidal hand, and all the people flocked to their temples to return thanks to their gods.

I am not unwilling to admit that, in the number of persons who joined in the dinner intended as a homage to General Jackson, there are some who enjoy, and probably deservedly, a reputation of honesty. Still it is beyond my weak understanding to comprehend that (to make use of the most indulgent expressions) indifference for injustice is not bordering upon cowardice and treason; still I cannot believe that it is not the duty of every honest

*Since the taking possession of Pensacola, all the play-bills were headed Jacksonian Commonwealth. I send one enclosed.

American to oppose and resist oppression, to execrate and unmask tyranny; and I never can be made to subscribe to the suicidal doctrine of an unhallowed alliance between allegiance and usurpation, any more than to the country-cidal right claimed by some, of remaining neutral between them.

Be it recollected that this man, still reeking with the blood of his victims, had snatched from me the sword of the law—the last outrage of despotism; putting on the garb of justice the better to disguise its tyranny. It is an abuse of words to contend that by going to his office under those circumstances I recognised his jurisdiction over me. As well might it be said that travellers yielding to superior force recognise the legality of the authority of the highway robbers by whom they have been plundered. This is not the case of a man abusing a power legal in itself for the purpose of committing an illegal act in a Government in other respects regular. This is the case of an entire subversion of the government prescribed by the Congress of the United States for these provinces. This is the usurpation of a man who recognises no authority but his own; and this authority has no limits but such as his rage, sometimes perhaps weary, but never satiated, prescribes to him.

What military chief, what executive officer, before General Jackson, ever dared to refuse to acknowledge the authority of the judges, whose mandate they sometimes have refused to obey? What military chief, before General Jackson, ever dared to assume the authority of those very judges, and to claim the right of judging his judge? The abuses of which those military chiefs, in a well-regulated community, could make themselves guilty, had limits, the extent of which might be calculated beforehand. But who will be bold enough to assign limits to the crimes of which General Jackson may render himself guilty?

Whenever a military chief acted the tyrant in the United States anterior to the tyranny exercised here by General Jackson, there existed an independent population, which secured an independent jury. But here, under General Jackson, there are independent judges! *There* was a bar, the greater number of the members of which, if not all, were independent. But *here!*—

This mention of the bar leads me naturally to a single reflection upon the conduct pursued here, with respect to me, by persons calling themselves (by what right I know not) members of the bar of Pensacola. Who they are, with the exception of one only, with whom I have been long acquainted, I know not. One of them, named H. Bigelow, the man who, I am informed, wrote and caused to be signed the petition to the President, has lately become one of a band of strolling players, and has left the country. What that man is, can easily be ascertained by that fact alone. What the others are, (not to travel out of the record,) is, I think, abundantly made out by their own conduct towards me; and I might say towards themselves, if they have any self-respect. Strange as it may appear, it is nevertheless true, that those men, (I speak of those who signed the petition,) one and all, have acknowledged and maintained the authority of General Jackson in these provinces as the supreme judge of the land; that they have argued causes before him, and before the court created by him; that the most absurd pretensions, the most extravagant doctrines, by which they conceived the supremacy of their patron could be supported, have been zealously maintained by them; that they, one and all, condemned me for issuing the writ of *habeas corpus* in the case of Colonel Callava. Supposing, then, that they were determined upon lodging a complaint against me, one would have believed that they should have denounced me for issuing the writ. Not at all. General Jackson takes that part of the business upon himself. His faithful auxiliaries, persuaded that it is better to have two strings to their bow, imagine another crime, and, apprehensive lest I may not be crushed by the accusation of usurpation, regardless of the reproach of disgraceful inconsistency to which they make themselves liable, they wheel about and admit, but only to answer their nefarious intentions, (ready, after accomplishing their guilty purpose, to return to their former idolatry,) that the judicial authority was actually vested in me, in order to accuse me of having acknowledged, as they say, that I had no right to issue the writ in question. What predominates in such conduct, whether knavery or stupidity, I am at a loss to determine.

Some strictures on a document published in the Floridian, at Pensacola, on the 15th of September, 1821, *under the head of "important judicial decision."*

The pretended important judicial decision which is the subject of the following strictures, having been delivered from the bench by a pretended court, of which General Jackson was president, I have inserted every where the name of General Jackson instead of the word "court."

I pass by unnoticed the long introduction, and what is given as the argument of counsel, in order to come at once to the reasoning of General Jackson.

He first refers to an act of Congress entitled "An act to carry into effect the treaty between the United States and Spain," which says "that all the military, civil, and judicial powers *exercised* by the officers of the *existing* Government shall be vested in such *person and persons*, and shall be exercised in such manner, as the President of the United States shall direct;" and he logically concludes, from the words of the act, "vested in *such person and persons*," that, of course, all the military, civil, and judicial powers are vested in *one* person. In support of this position he reads one of his commissions, in perfect conformity with the law. According to the words of that commission, the powers and authority given are to be exercised "under such circumstances as have been, or may hereafter be, prescribed to him by the instructions of the President, and by law." What the instructions of the President were, I, of course, do not know; but that those instructions tally perfectly with the law, I do not doubt; and what the law is, we have already seen. The whole of the powers cannot be accumulated on the same head. They are to be divided; they are to be vested in such *person* and *persons*, &c.

Now, to what powers and authority do the law and the commission given by the President refer? No doubt to those in existence at the time the law was passed, on the 3d March, 1821. And what were the powers and authority *exercised* by the officers of the *existing* Government of the Floridas on the 3d March, 1821, and likewise at the time of delivery of the country to the United States? Undoubtedly, the powers and authority arising under the laws originating in the Spanish constitution. "There is no stipulation in the treaty," says General Jackson, "that the sovereignty of Spain over the Floridas should continue in force one moment after the signing of the treaty, and certainly not after the time limited by it for its ratification. In morals and good faith, the sovereignty was from that time in the United States *de jure*, and Spain had only the government *de facto*."

What the general means here, I confess I do not very clearly understand. Does he mean to say that, from the 22d day of February, 1819, to the 17th day of July, 1821, when West Florida was taken possession of by the United States, no law made by the proper authority in Spain for the government of the Floridas could be enforced in the Floridas? This is quite a new doctrine; and if any thing can be more surprising still than the doctrine itself, it is the manner in which it is attempted to be supported. Granting, for the sake of argument, that the sovereignty, from the time of signing the treaty, was *de jure* in the United States, and that Spain had only the government *de facto*: is General Jackson now to learn that the authority which exercises the government *de facto* has a right to enact and to enforce laws for the country over which it exercises that government *de facto*? The United States claim the sovereignty in virtue of a treaty, not only signed, but duly ratified, over all that portion of West Florida

west of the Perdido, from 1803 till 1813. Was it ever contended that the Spanish laws enacted during that long period, which were applicable to that portion of West Florida, ought not to have obtained in that country, as long as that country remained under the government of Spain *de facto*, notwithstanding the government *de jure* had been for ten years vested in the United States?

"The act of Congress to carry into effect the treaty," says General Jackson, "has relation back to that time, as is fully expressed in the ratification not only of Spain but the United States; and the United States are only bound to maintain the inhabitants of the ceded country in the enjoyment of their liberty, property, and religion."

How the act of Congress has relation back to the time of signing the treaty, except by referring to the date at which it was signed for an identification of the instrument, I know not. The King of Spain, in the ratification made by him, more than fourteen months after it ought to have been ratified according to the 16th article of the treaty, was obliged to state, as he does, that "the present ratification should be as valid and firm, and produce the same effects, as if it had been done within the determined period." But what were the effects here alluded to to be produced? Indubitably, the cession of the country to the United States, under the clauses and conditions originally stipulated in the treaty.

But does the general mean that this late ratification must now have the effect of preventing the introduction in the Floridas of any law enacted by Spain posterior to the time when the treaty ought to have been ratified by Spain, after those laws had been actually introduced in the Floridas? Or does he mean that it must have the effect of having possession delivered to the United States on the 22d of August, 1819, although actual possession was not delivered until the 17th of July, 1821? This last position is more glaringly absurd, but not more so in reality, than the first. The general may make his choice. But, if his sentence has any meaning at all, I cannot guess at any other it can have.

General Jackson goes next into a long history to prove that the constitution of Spain is not in force in this country. If the general means that the Spanish constitution, as a political rule of government, is not now in force in this country, nobody will pretend to advance any thing to the contrary; but if he means to assert that the laws introduced under the Spanish constitution, as long as the Floridas remained under the government of Spain, were not introduced in the Floridas, no person in his senses can give assent to such a proposition. Everybody in the United States knows that, after the expiration of the time within which the treaty was to have been ratified, to wit, after the 22d day of August, 1819, no alteration whatever could have been made by the Spanish Government in the constitution and laws of the two Floridas. Did not the right of Spain to legislate again for those two provinces revive after the 22d day of August, 1819, when the treaty ceased in fact to have any existence at all, no matter by whose act this non-existence was produced? Can it be contended that, when there was no longer any obligation on the part of the United States to receive the Floridas on the conditions stipulated in a treaty which had ceased to be binding upon them, the two Floridas were to remain without any Government at all? or with a Government entirely at variance with the form of government devised by the Cortes for the Spanish empire, of which the Floridas were a part? General Jackson acknowledges that the treaty was ratified by Ferdinand VII. by the consent and authority of the General Cortes of the nation, requisite but for that clause of the Spanish constitution which prohibits the King of Spain, without the consent of the Cortes, from alienating, transferring, or exchanging any province, city, town, village, or indeed any portion whatever, be it ever so small, of the Spanish territory. And am I to be told that when the Cortes agreed to the alienation of the two provinces of Florida by the King of Spain, in favor of the United States, the constitution, in virtue of which the alienation took place, was not in force in the ceded territories, which had uniformly acknowledged and submitted to the several forms of government of Spain during the long protracted conflict for authority in that distracted kingdom? Am I to be told that the Cortes stipulated that the inhabitants of Florida, in order to make them more acceptable to the United States, should, previous to the cession of the country, be politically emasculated, that they should be disfranchised of all the rights which had been secured to them by the Spanish constitution, and delivered over to the United States, bound hand and foot, loaded with chains and fetters? Am I to be told that the United States themselves, in giving their agreement to the cession to themselves of the country, under the clause that the ratification on the part of Spain "should be as valid and firm, and produce the same effects, as if it had been done within the determined period," exulted in the triumphant idea that, although the people of the Floridas had been emancipated in the intermediate time, still they might receive and treat them as slaves; that they insisted, as an indispensable preparation for the admission of the Floridians into the grand family of American freemen, that they should first reassume the disgraceful badges of the slavery which they had thrown off? Such an idea could not germinate but in the head of a Jackson—I should have said in the heart, if a Jackson had a heart.

But General Jackson does not confine himself to reasoning on the subject. He likewise states facts in support of his opinion. Hear him.

"The constitution of the Cortes," says General Jackson, "was only promulgated in the island of Cuba some time in the month of January, 1821, about three months after Spain had parted with the sovereignty of the Floridas; and if it was ever promulgated in these provinces, it must have been after that time, and long since Ferdinand VII., in ratifying the treaty by the consent and authority of the General Cortes of the nation, had parted with the sovereignty."

A bold assertion this, indeed! and which I should not have expected even from General Jackson! It is the first, I am sure, and I hope it will be the last time, when an American judge, whether *de jure* or *de facto*, shall have stated from the bench facts positively the reverse of truth, and the falsity of which was known to him. For myself, I had repeatedly put him in mind of the time at which the Spanish constitution was sworn to, both in Havana and in Pensacola. What! in the hearing of the American people, an American judge dare to assert from the bench that it was only in the month of January, 1821, that the constitution of the Cortes was promulgated in the island of Cuba, when, by a reference to all the public papers of the day in the United States, it will be found that it was promulgated in the Havana on the 16th of April, 1820? The same constitution was duly promulgated and sworn to in Pensacola, in the midst of rejoicings and illuminations, which lasted from the 26th to the 29th of May, 1820. I have in my possession the proclamation of the Spanish constitution in the Havana, and an official copy of the oath administered here in Pensacola, to Governor Callava, on the 26th of May, 1820, when the Spanish constitution was promulgated here. Hundreds were ready to give testimony on these facts at the trial in which this opinion was delivered, but every application to introduce testimony on that subject was overruled; and in the hearing of thousands in Pensacola, who witnessed the celebration of that event on the days above stated, an American judge dares to assert from the bench, that, if the Spanish constitution was ever promulgated in Pensacola, it must have been after the month of January, 1821. Expressions are wanting to characterize such proceedings. Let us throw a veil over them. But what veil, of sufficiently impenetrable materials, can completely conceal from the public eye the turpitude of the unwarrantable assertion? And if it be not completely concealed, what mountain sufficiently high will the perpetrator of the unheard-of deed call upon to fall upon him, to hide him, to cover him, to protect him from the indignant wrath of the offended majesty of the American people?

Shocking, however, as the above is, still I wish the evidence against the usurper could stop here. But what are we to think, what are we to say, when, in addition to the above, notwithstanding the many attempts at reasoning the Spanish laws under the constitution out of existence in the Floridas; notwithstanding the positive assertion that the laws under the Spanish constitution are not in force here, we find that General Jackson himself has acknowledged that those very laws were in force here, and has made appointments to offices created by that very constitution? Under what authority but under the authority derived from the Spanish constitution has General Jackson appointed in Pensacola a mayor and aldermen? Under what authority but under the authority derived from the Spanish constitution has General Jackson an alcalde, and that alcalde, too, (Mr. Brackenridge,) the very champion who, in support of General Jackson's doctrine, contends that the Spanish constitution was never promulgated until Spain had parted with the sovereignty of the country? By referring to the date of the commissions of his predecessors in that office, Mr. Brackenridge might have ascertained very easily when the old form of government, and when the Spanish constitution in Pensacola, ceased. The (till now) pure white mantle of justice would shine still in all its lustre. It would not be, as it now is, sullied by a stain—and what a stain!

The last argument of General Jackson squares admirably with all that precedes. He grants that the President has appointed a judge for West Florida; but, says he, the judge is expressly required, by instructions contained in his commission, to consider himself as governed by the laws of the United States. Wonderful discovery, indeed! And what judge of the United States (except, however, General Jackson, who is to be governed by no law,) is not governed by the laws of the United States? Is not the act of Congress to carry into effect the treaty between the United States and Spain, under which the judge is appointed, a law of the United States? and, under that law, is not the judge of the United States for West Florida vested with a jurisdiction extending to all civil and criminal matters arising under the general provisions of that law, as well as with the jurisdiction specially given in the same act, in all cases of revenue and of importation of people of color?

The judge (says again the general) must show the instructions he may have from the President of the United States. The judge is not bound to show any instructions. The instructions of a judge are to be looked for in his commission. But, in the present case, General Jackson has not even the miserable resource of screening himself behind this feeble intrenchment. The judge showed to General Jackson the letter which he received from the Secretary of State at the same time with his commission; and what follows is an extract from that letter:

"It will be necessary for you to repair with all convenient despatch to Pensacola, to enter upon the duties of the office, there being reason to believe that the Spanish authorities will have delivered over the actual possession of both the Floridas to General Jackson before this commission reaches you; and, towards the *organization of the temporary government under his direction, it may be important that the judiciary department should be put into operation immediately.*"

Could any instructions connected with the commission of a judge be more positive, if a settled plan of usurpation had not previously been fixed upon? Here I stop; yet, before I part with General Jackson, let me heave a sigh—a heavy sigh. *Quantum mutatus ab illo!*

X.

Copy of a letter from the Secretary of State to Eligius Fromentin, dated

SIR: DEPARTMENT OF STATE, WASHINGTON, *October* 26, 1821.

I have had the honor of receiving your letters of the 20th, 26th, and 28th August, 6th, 8th, and 21st September, with their respective enclosures; all which have been submitted to the President of the United States.

I am directed by him to inform you that the laws of the United States relative to the revenue and its collection, and those relating to the slave trade, having been the only ones extended by act of Congress to the territories of Florida, it was to the execution only of them that your commission as judge of the United States was considered and intended to apply. The President thought the authority of Congress alone competent to extend other laws of the United States to the newly acquired territories; nor could he give to the judge a jurisdiction which could only be conferred by them. There being an essential difference between the nature of the powers heretofore exercised by the Spanish authorities in those provinces, which were continued in force by the act of the 3d of March last until the end of the next session of Congress, unless a temporary government should be sooner established over them, and of the laws of the United States, which were extended to those provinces by that law, the President considered it his duty to intrust the execution of each branch to officers specially appointed for the purpose. In the execution of those laws, in your judicial capacity, the Governor has been informed that you are considered amenable only to the Government of the United States.

In the different view which you have taken of the subject, he is persuaded that your motives and intentions were entirely pure, though he deeply regrets the collision of authority and misunderstanding which has arisen between the Governor of the Territory and you.

I have the honor to be, very respectfully, sir, your humble and obedient servant,

JOHN QUINCY ADAMS.

No. XI.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *November* 22, 1821.

Notwithstanding all my exertions, I could not obtain, until it was too late to have it forwarded by the last mail, a complete copy of the proceedings had in the case of the heirs of Vidal *vs.* Innerarity. I now send them, (24 numbers.)

Upon further reflection, I concluded that it was more proper for me to abstain from all observations on the subject; and I have, accordingly, confined myself to giving you a short, concise abstract from the Spanish records, to enable you to understand the case.

I will only add, how unaccountable it appears to me that the statement of the auditors appointed by General Jackson should be said to be unanimous, when that statement is accompanied by a protest signed by one of them; and how much more surprising still it is, that the judgment of the court themselves should be predicated upon the unanimous opinion of the auditors, in the very teeth of that protest; and more so, still, in the very face of the objections, whether right or wrong, made by Innerarity to the report of the auditors, and bottomed upon the disagreement of one of them; which said objections were overruled by the court.

I have deemed it unnecessary to have the proceedings copied, which have been published in nearly all the newspapers. I have the honor to be, &c.

ELIG. FROMENTIN.

Hon. J. Q. ADAMS, *Secretary of State.*

No 1.

DECREE.—*Let it be done as the Auditor thinks proper.*

AUDITOR'S OPINION.

Considering the character of a deposite in which this party (Innerarity) has the sum belonging to this meeting, and his not being able to claim any more than falls to his share, even were his objections to the account which has been drawn up entitled to weight, as also his inability to retain in his possession, under the motive he has stated, any other sum exceeding his credit: It is my opinion that you can grant him a month's time for the prolix and fruitless examination which he proposes; but on the previous condition that he makes a delivery of the two thousand six hundred and forty-five dollars and two bits, destined for the distribution amongst the other creditors, because he still remains in possession of the part which belongs to him, and because the tribunal has no legal authority to allow him, against the will of those, (the other creditors,) to continue in the enjoyment of a sum which can, by no title whatsoever, belong to him; much less when it is claimed by the rightful owners, and when he still retains it without having accounted for the proceeds of the effects remaining in New Orleans, the sale of which was intrusted to him by this same tribunal more than three years ago.

You will have the goodness to determine upon all this matter in the manner you think most regular.

CARLOS HERNANDEZ.

PENSACOLA, *November* 20, 1810.

Seeing that Mr. John Innerarity has not complied with the delivery which has been ordered from him, let the present be made known to him for his compliance; or, in defect thereof, let the present be brought back, that the proper order may be taken.

HERNANDEZ.

COLLET.

Passed November 26, 1810.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 2.

SIR: PENSACOLA, *June* 30, 1820.

In these proceedings, the forms of procedure in all testamentary judgments have not been followed, nor has the still more necessary step of having a meeting of the creditors been taken; but, by making a confused mixture of the one and the other, a perfect labyrinth has been formed of the testamentary acts of the late Mr. Nicolas Maria Vidal, late auditor of war of this province, and assessor general of this Government, which may result from the malice of some individuals, and, also, in a great measure, from the parties interested not having had any lawyer to direct them.

An inventory was not made, as soon as said auditor died, of all his goods, with the formality which ought to have been practised; both because his instituted heirs were minors, and also because a part of his creditors were absent. All the moveable effects and slaves that remained amongst the property of said deceased, being once sold by the executor, who was Cristoval de Armas, it was determined, by the decree passed on the 27th of August of the past year, (1806,) that a meeting should take place in the study of the assessor of the intendency, for the purpose of taking such steps as justice might direct with regard to the recognizance, legitimacy, and graduation of their respective credits, and on the other points on which this decree turns. But neither did such a meeting of the creditors take effect, nor was any other point discussed, at that time, than the alienation of the sixteen thousand arpents of land, situated at Baton Rouge, and that of the furniture, moveables, and other effects which Mr. Vidal, deceased, had in New Orleans, contained in twenty-seven boxes, which he had deposited in the convent of the Ursuline nuns in that city.

This proceeding was followed by sundry incidents, more or less legal, and more or less important to the estate, of which there is no occasion to make any mention for the present.

At this very time, when Cristoval de Armas had not relinquished his charge of executorship, he was ordered, by a decree of the 18th of September, 1806, and its concordat of the 20th of the same month and year, to deliver into the office of the Secretary of State the proceeds of the sales which he had made; which he did, accordingly, to the amount of four thousand one hundred and sixty-six dollars, in cash, as appears from the proceeding entered on leaf 78 of the third piece of this transaction; as, also, of one thousand six hundred and sixty-five dollars ninety-four cents, (6½ reals,) as an *abonare* of Mr. John Forbes & Co., the amount of various effects adjudged at the auction of the property of the late Mr. Vidal, aggregated at leaf 65; adding, that there remained in favor of the estate the debts of Mr. John Anthony Doneau and Mr. José Maria de Peña, by reason of the same adjudication.

At the instance of said Forbes it was determined, by the decree of the 7th of March, and its concordat of the 11th of the same month, in the year 1807, that the money belonging to this estate, which was found deposited in the treasury, should be transferred to the orders of the house of Forbes & Co. in the same quality of deposite, (Forbes's receipt $3,066 62½, as appears from the record above referred to.)

He was likewise authorized, by a decree of the 11th of September, in the year 1819, extending to leaf 128 of the above-recited third piece of these proceedings, to receive from Savino Perrin the amount of the adjudication of the sixteen thousand arpents of land, sold to him at vendue for the sum of four thousand one hundred and twenty-nine dollars eighty-seven cents, (six reals.)

Now, the heirs of Mr. Vidal establish, in their petition foregoing, the plea of nullity of the sale of the sixteen thousand arpents of land; and, on the other hand, pray that the house of Forbes & Co. render an account, within a peremptory term, of the sums which it has received of the credits which remained in favor of this estate at Madrid, and in the province of Antioch; as likewise of the proceeds of the furniture, moveables, and effects sold at New Orleans.

To avoid confounding and perplexing this transaction any more, I am of opinion that two separate suits be formed: one, on the nullity claimed by the heirs of the late Mr. Vidal; and the other, for the production, by the house of Forbes & Co., of the accounts, supported by documents, which is solicited on the part of the heirs.

The first ought to consist of the foregoing instance, and of the decision and decree which may be passed; of the documents contained between leaf 100 and 121 of the third piece of the testamentary proceedings, the comments of which were extracted for this purpose, except the taxation of costs found on leaf 111, being thus marked by the

assistant witnesses; of the testimony of the acts of the meeting, leaf 58 and 94, the proceeds of leaf 20 and of leaf 99, as well as of the instance of leaf 128; the decree following, and proceeding of the leaf 133 and of 153 of the above-recited third piece of this meeting or testament.

Before a resolution and provision is passed in justice, on the nullity of the sale of the sixteen thousand arpents of land adjudged at Baton Rouge, it will be proper to hear the party that ordered their sale, which was Messrs. John Forbes & Co., which company is at the present moment represented by Mr. Innerarity; and, therefore, it is my opinion that, the suit being once commenced, the latter gentleman be informed of the foregoing instance, made in the name of the heirs. As to what regards the account requested by the latter of Mr. John Innerarity, and which he was ordered to produce by the two acts, on the 9th March and 20th November, of the year 1810 past, without their ever having been carried into execution, I am of opinion that he be notified to produce, within the necessary and unproroguable term of ten days, the exact account, supported by documents, which is claimed of him, being warned previously of the consequences which, on the part of justice, will result in case of his failure to comply.

It is also my opinion that, until the legitimacy of the respective credits of the creditors, (who have presented accounts against the estate by mere private papers, which, in themselves, have no value in law,) be ascertained, he be likewise notified to deposite, within five days, in the national coffers, the sums above mentioned, placed to his orders in the character of a deposite, and the one thousand six hundred and sixty-five dollars ninety-four cents (6½ reals) of the *abonare* of leaf 65; and that, in the mean time, a proper suit be opened on the case, to begin with the testimony of the two *otro si*'s of the foregoing instance, and of this opinion, and the decree that may ensue.

NICOLAS SANTOS SUARES.

To His Excellency the GOVERNOR.

PENSACOLA, *July* 1, 1820.

I acquiesce in the opinion foregoing, and be it fulfilled in all its parts.

JOSE CALLAVA.

DOMINGO SOUSA.
JOSE CARO.

We this day, 3d July of the present year, notified Mr. Severino Palao, and his wife, of the foregoing decree; in proof of which notification, witness their signatures below, with our attestations.

SEVERINO PALAO,
MERCED. VIDAL.

DOMINGO SOUSA.
JOSE CARO.

On the same day we notified likewise Mr. John Innerarity; as an evidence of which he affixed his signature, which we attest.

DOMINGO SOUSA,
JOSE CARO.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 3.

To His Excellency Major General Andrew Jackson, exercising the powers of the Captain General and of the Intendant of the island of Cuba, and of the Governors of the provinces of the Floridas, respectively.

The petition of Mercedes Vidal Palao, lawful wife of Severino Palao, for herself, and in behalf of other heirs of Nicolas Maria Vidal, deceased, respectfully represents: That, by the annexed decrees of Don José Callava, late Governor of this province, a certain John Innerarity, of the house of John Forbes & Co., and which he represents, was ordered, within five days from the 1st of July, 1820, to place in the national treasury the sum of $4,163, in money, being a deposite placed in the hands of the said John Innerarity, and appertaining to the estate of the said Vidal; and it was also further decreed, that the additional sum of $1,665, the property of the said estate, and in the hands of the said Innerarity, should be deposited as above specified; and it was at the same time further decreed, that the said Innerarity should, in ten days from the said 1st day of July, produce an exact and documented account of certain goods belonging to the estate of the said Vidal, sold by the said Innerarity in the city of New Orleans.

Your petitioner further states, that, by another decree of the late Governor Callava, bearing date the 10th of July, 1820, the property of the said Innerarity, real and personal, was placed under an interdict, until the execution of the foregoing decrees.

But, notwithstanding the positive and imperious nature of the decrees above specified, the said Innerarity neither paid into the public treasury the amount above mentioned, nor has he exhibited an account of the sales of the property at New Orleans.

Your petitioner having reason to believe that the said Innerarity is about to withdraw his person and effects from the jurisdiction of this court, without answering the demands against him, she therefore prays that your excellency may cause the said Innerarity to appear before you, and show cause (if any he has) why the decrees of the late Governor, hereunto annexed, should not be carried into execution. And your petitioner further prays that the said Innerarity be held to give security for the faithful compliance with the decision of your excellency, or that of such tribunal as this case may be referred to.

And your petitioner will ever pray, &c.

MERCED. VIDAL.

WEST FLORIDA, PENSACOLA, EXECUTIVE OFFICE, *August* 28, 1821.

According to the prayer of the foregoing petition, let John Innerarity be cited to appear before me, at eleven o'clock to-morrow morning, to show cause (if any he has) why the decrees recited in the said petition should not be put in force against him.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To J. C. CRAIG, Esq.
Alguazil Mayor, or Sheriff, for the city of Pensacola and county of Escambia, to execute and return the same.

AUGUST 28, 1821.

Executed, by citing John Innerarity, and leaving a copy of the foregoing petition and citation.

J. C. CRAIG, *Alg. Mayor and Sheriff.*

EXECUTIVE CHAMBER, PENSACOLA, *November* 19, 1821.

The defendant in this cause having requested me to designate, in my certificate, the different handwritings in which it appears, I do hereby certify that the original petition in this cause appears to be in the handwriting of R. K. Call, one of the counsel for the plaintiff; and the order, in the handwriting of H. M. Brackenridge, the other counsel for the plaintiff; and it is signed by Governor Jackson, with his own hand.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court of West Florida.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court of West Florida.

No. 4.

Petition of Mercedes Vidal.

I, Mercedes Vidal, the lawful wife of Severino Palao, and heir legally constituted by her father, the late Don Nicolas Maria Vidal, lieutenant governor and auditor of war of this province, present myself, with due respect, before you, and state that, in August, one thousand eight hundred and seventeen, my sister Caroline, whose agent I am, filed several petitions in the tribunals of the then Governor of the place, Colonel José Mazot, to obtain the papers relating to the will of my above-named father, retained by Mr. John Innerarity; which petitions, when applied for by me in the tribunal of your excellency, in March, eighteen hundred and nineteen, had no other effect than a continued opposition, supported by malicious contradictions; until, at last, said Mr. John Innerarity, constrained by my petitions and your superior orders, delivered the documents aforesaid, in appearance complete, which we had so long desired in order to bring forward with positive data our right and most just claims, which evidently appear from their examination, and operate in our favor the following incontrovertible injuries:

On the eleventh leaf of the second bundle there appears a decree ordering the aforesaid Caroline Maria Salome, my sister, to choose a guardian *ad litem*, which was not effected, naming by a feigned notification Don José Peña, as it is evident from his signature not being affixed, as would have been the case in a real proceeding; and subsequently that tribunal, disregarding the preference of my mother with respect to my guardianship, named one for me of its own accord, in the said Peña; from which it appears that our representation was irregular and illegal.

At page 61 of the third book, the executor is deprived of the most honorable part of his trust, obliged as well by this violent procedure, as by having before and afterwards abused him, by asserting that he was settled in New Orleans, which I called to your excellency's attention, that, at that time, the inhabitants of the province of Louisiana had not been deprived of their privileges as Spanish subjects by His Majesty, but, on the contrary, favored their emigration, by presenting the greatest advantages to their interests; and, in fine, the creditors of my deceased father have assembled and have determined what was necessary and proper in relation to our inheritance, which is sixteen thousand acres of land in the district of Baton Rouge, in the terms expressed from page 113 to 123, maliciously asserting the estate of my deceased father to be insolvent, and in this way fraudulently charging it with his debts, although those from beyond sea are not properly authenticated, and remaining silent with respect to the sum (*abonare*) which the tenth clause of his will expresses.

Our persecutors, not yet satisfied with so many nullities, evade with the greatest subtlety the account to which they ought to be called for the safeguard of the minors, and that information so strongly recommended by law and necessity, and without which every thing will continue, as at present, to be done by our enemies, null: therefore, we pray that, on a view of the foregoing, as appears on the records, you will please to revoke and annul whatever may have been done in the aforesaid testamentary proceedings, and sale of the property of our before-mentioned father, and which in justice ought to be done, &c. Also, as soon as the executor (Armas) was deprived of the privilege of his office, to obtain this object, John Forbes renders himself liable to the various demands which he ought to have fulfilled, and they are those set forth in page 3 in book 7; for which reason we pray that John Forbes, and his representative John Innerarity, produce the proper discharges, admitting no excuses or evasions that may still further injure our inheritance, which from the beginning has been so unfortunate. Also, it having appeared on record that the said Forbes seized a deposite in the convent of the Ursulines, in New Orleans, consisting of twenty-four boxes of effects, and two jars of China ware, without having ever given any account of the proceeds, as is proved by the order at page 154 of No. 3 of said acts, it is therefore prayed that Forbes, or his representatives, exhibit an account of the distribution of its proceeds.

SEVERINO PALAO,
MERCED. VIDAL.

No. 5.

Petition of Mercedes Vidal.

SOR. GOVERNOR:

Mercedes Vidal, lawful wife of Severino Palao, in the proceedings which follow in the testamentary acts of her deceased father, Don Nicolas Maria Vidal, auditor of war, and former lieutenant governor of this province, before your excellency, with due respect, presents herself, and says that, by order of the first of the present month, your excellency was pleased to decree that John Innerarity make the deposite specified, in the national chest; the amount of the credits which were presented against the estate of her said father (by simple private papers, which in law have no avail whatever without the proper authentication,) be ascertained; and, also, to add to this deposite the one thousand six hundred and seventy-five dollars six and a half reals, the sum (*abonare*) set forth on page 65; but, as the fifth day fixed by your excellency for this effect was completed yesterday, the petitioner has not been informed that the said Innerarity has taken any step in the matter; and taking into view (with all respect be it said) his past conduct, exhibited in the decrees subsequently wrought at her instance, and that of her sister, Maria Salome, and whose premeditated ——— caused improper delays in her just demands, she prays and supplicates that your tribunal may judge it fit to issue an order of execution against the goods of the said John Innerarity, in those which may be

necessary for the accomplishment of what has been decreed, preferring, as far as possible, the moveable and personal property. Therefore, she prays that it may be ordered according to her petition; and that hers is just, &c. Also, in order to secure the rights of the petitioner, that all the property of the said John Innerarity be interdicted until the exhibition of the account, which he is bound to produce, of the effects sold in New Orleans, and reclamations beyond seas, as is expressed in the superior decree of your excellency, the first of the present month; and the petitioner prays that the same may accordingly be done.

PENSACOLA, *July* 10, 1820.

As to the principal subject of the petition, let John Innerarity be forced to comply with the same, as provided; and the other, let the prayer of the petitioner be executed, in case that Innerarity shall not perform what has been decreed.

[TRANSLATION.]

Petition of Severino Palao and Mercedes Vidal.

SOR. GOVERNOR: Mercedes Vidal, lawful wife of Severino Palao, in the proceedings which follow in the testamentary acts of her deceased father, Don Nicolas Maria Vidal, auditor of war, and former lieutenant governor of this province, before your excellency, with due respect, presents herself and says: That, by order of the 1st of July last past, at the 4th folio of the 2d parcel of her ulterior claims, your excellency was pleased to ordain that John Innerarity should present an exact and proved account, which he had formerly, in March and November of the year 1810, been ordered to give, depositing at the same time in the national chest the sums mentioned in the said order of your excellency of the 1st of the past month; which having been seen by John Innerarity, with the usual delay which he has always manifested in this business, doubtless (with due respect be it said) for the purpose of paralyzing it, as, unfortunately, he has succeeded in doing prior to my presenting the writing which corresponds to the 6th folio of the cited parcel, granting the interdict of the effects of Mr. Innerarity; upon which the superior decree issued of the 10th of the said July, which commands that, as the order has not been complied with by Mr. Innerarity, the said interdict to be of force; which, also, not having been complied with by Mr. Innerarity, all his effects are, as they ought to be, immediately interdicted. Wherefore, I pray that your excellency will be pleased to order, without delay, the constitutional acalde of this town, after being duly informed, not to permit the effects of Mr. Innerarity to be transferred or removed from this place, nor those that are in his power, belonging to Don John Forbes, until, as he ought, he fulfils what has been ordered, &c.

SEVERINO PALAO,
MERCEDES VIDAL.

PENSACOLA, *August* 11, 1820.

The petitioners, by Brackenridge and Call, their attorneys, further pray, that your excellency may cause the said Innerarity to appear before you, and show cause (if any he has) why the decrees of the late Governor, hereto annexed, should not be carried into execution, and such other further relief extended in the case as may accord with right and justice. And it is further prayed, that the foregoing petition be taken as part of the petition of Mercedes Vidal, and that a copy thereof be served on the said Innerarity.

BRACKENRIDGE & CALL, *Attorneys for the heirs.*

EXECUTIVE OFFICE, PENSACOLA, *August* 29, 1821.

The prayer of the above and within petition is granted.

ANDREW JACKSON, *Governor of the Floridas, &c.*

To J. C. CRAIG, Esq.,
Alguazil Mayor, or Sheriff, for the city of Pensacola and county of Escambia, to execute and return the same.

AUGUST 30, 1821.

Executed, by leaving a copy of this petition with John Innerarity.

J. C. CRAIG, *Sheriff.*

No. 7.

FLORIDAS, *Pensacola, ss.*

THE HEIRS OF NICOLAS MARIA VIDAL
vs.
JOHN INNERARITY.

EXECUTIVE CHAMBERS, *August* 29, 1821.

John Innerarity appeared this day at 11 o'clock A. M., agreeably to citation, before Major General Andrew Jackson, Governor of the Floridas, &c. and John C. Mitchell, Esq., (appointed by him to sit with him during the hearing of the case, in the room of Presiding Justice D. Shannon, Esq., who could not attend from indisposition;) and the said Innerarity, on being asked by the court to show cause (if any he had) why the decrees of the late Governor of West Florida, Don José Callava, against the said Innerarity, according to the petition of Mercedes Vidal, in behalf of herself and her sister Caroline Vidal, and other heirs of their deceased father, should not be carried into effect; when he, the said Innerarity, made answer that he objected to the petition of Mercedes Vidal, it being in the name of the wife, without the signature and consent of her husband, and, as such, that she had not the right to sue, &c. This objection was, for the present, overruled, on the ground that this suit had been instituted by the heirs of Nicolas Maria Vidal, deceased; that this petition was filed not to institute a suit, but merely to have carried into effect the decrees already made in their behalf, and which have not been carried into effect. That this petition of Mercedes Vidal has been filed, as well for her sister Caroline, whose agent she is, as for herself

and the other heirs of her deceased father; and, sitting as a court of chancery, we cannot permit the combination or laches of others to prejudice the heirs, particularly to prevent this decree from being carried into effect, to the prejudice of Caroline Vidal, one of the heirs legally represented by her sister. If this could have been taken advantage of, it ought to have been done before the decrees had been made, by plea in abatement; that it is now too late to make this objection, when one of the heirs is legally before the court, praying, as the other heirs have often done before, that these decrees may be carried into full effect; and particularly when the petition of Severino Palao (husband) and Mercedes Vidal, his wife, under date of the 11th of August, 1820, is presented to the court, and which has not been acted on, and which the counsel for the heirs of Nicolas Maria Vidal, deceased, (Henry M. Brackenridge and R. K. Call, Esqrs.,) pray may be received as an amendment to the petition of Mercedes Vidal, in behalf of herself and sister Caroline, and other heirs of Nicolas Maria Vidal, deceased; which amendment is granted. The said Innerarity then prayed the court for a continuance of this cause for a longer period of time, in order that he might make a full defence and objection, and show cause why the decrees against him should not be carried into effect; and, in compliance with the prayer of the said Innerarity, the court granted to him an extension of time to the sixth day of September next, at ten o'clock A. M., at the Executive Chambers, where this cause will again be heard, and to which day this cause stands continued. The said Innerarity then prayed that he might be suffered to take with him, for perusal and examination, the papers or books relating to this case, on his giving to the alcalde of the city of Pensacola (H. M. Brackenridge, Esq.) a proper receipt for the same, and for their return; (which papers or books are specified in the receipt;) and, the said Innerarity having executed such receipt, the court granted his prayer.

Done at the Executive Chambers, and in open court, the 29th August, 1821.

Test: JOHN COPPINGER CONNOR,
Clerk of the Executive Court.

No. 8.

Petition of John Innerarity.

May it please your Excellency:

Don Juan Innerarity, a Spanish citizen, and resident of Pensacola, reserving to himself the plea at law of *coram non judice*, and every other plea, special and general, *de jure*, under the ægis of your excellency's proclamation, in answer to the prayer of Messrs. Brackenridge and Call, subjoined as an *addendum* to the copy (which has been served on me) of a petition of Severino Palao and his wife, Mercedes Vidal, free people of color, purporting to be addressed to the late Governor of this province, Don José Callava, and to bear date so far back as the 11th of August, 1820, and without the slightest shadow of notarial or other evidence that the same was ever presented to the said ex-governor in his capacity of military judge, or in any other whatever, most respectfully represents: That the said Messrs. Brackenridge and Call have not legalized their representation as attorneys for the said Severino Palao and Mercedes Vidal, agreeably to the Spanish laws, contained in the laws of the Partidas, lex 10, tit. 5, p. 3, and in Febrero Adicionado, tom. 3, part 1, cap. 14, art. 15, which states that "no one can appear at law for another, unless under a power of attorney *in scriptis*, excepting in the following cases: the husband for the wife; the relation for the relations of the nearest consanguinity, as far as the fourth degree; or for his servant or kinsman; or by reason of the manumission of slaves, who can appear at law *ille pro illis*, without a power of attorney from the party interested, unless the latter should resist the proceedings. Heirs, also, who possess undivided property, and partners of a firm, can also appear at law, provided to their so appearing at law they shall previously give bond and security, under a penalty that the parties whom they represent shall consider as valid all that may be done and performed in the suit, and, if they should not adhere thereto, they and their securities shall pay to the contending party the penalty imposed on them; but the bond and security ought to be exacted previously to the showing cause, or to the reply in defence." Your exponent could cite several other orthodox authorities; but, as they are all to the same purport, he considers that it would be a work of supererogation.

Your petitioner, therefore, most respectfully begs that Messrs. Brackenridge and Call may qualify their representation *in forma legis*, by proper instruments *in scriptis*, and that the security required by the Spanish laws may be given, and notarial copies thereof annexed to the proceedings, giving to your petitioner a *traslado*, or sight of every thing had or done in the premises, on the ground that what is not done in proper legal form is not done at all in the eye of the law. With this evidence, and that of the eventual indemnity provided by law, your petitioner will then answer to the unfounded claim of the plaintiffs, and show cause why the interlocutory decrees referred to in your excellency's citation should not be enforced. All which he most respectfully submits, and claims the protection of the laws and of your excellency, as the guardian in your high capacity of superior political chief of the Floridas.

For the purposes which your petitioner will hereafter show, he begs leave to advert to the circumstance of the claimants' having affixed a date to their memorial, for which they have furnished no precedent in their other occult petitions; nor is it the *modus operandi* at law.

Rogo ut ante.

JOHN INNERARITY.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 9.

JOHN INNERARITY, *ads.* MERCEDES VIDAL.

Plea of John Innerarity.

And this defendant, by protestation, not confessing or acknowledging all or any of the matters and things in the petitioner's said petition contained to be true, in such manner and form as the same are therein alleged and set forth, for plea unto the said petition, saith: That this honorable court hath no jurisdiction of the subject-matter of said petition, and cannot lawfully take any cognizance thereof, nor pronounce any decree, or enter up any judgment in the premises, that will or can be binding or obligatory on the parties. All which matters and things this defendant is ready to aver, justify, maintain, and prove, and humbly prays judgment whether this honorable court will take further cognizance of the complaint in said petitioner's petition contained, and to be hence dismissed with his reasonable costs by him in this behalf sustained.

SAMUEL ACRE, *Attorney for the defendant.*

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 10.

Petition of John Innerarity.

To His Excellency Major General Andrew Jackson, exercising the powers of the Captain General and Intendant of the island of Cuba, and of the Governors of the provinces of the Floridas, respectively.

John Innerarity, on whom a rule has been served to show cause why the decrees recited in the petition of Mercedes Vidal should not be put in force against him, respectfully shows, by way of answer to said petition, and why the said decrees ought not to be enforced, that the said decrees have no operative force, and are not binding in law:

1. Because the said decrees are founded on a suit to which the said John Innerarity has never received any citation to appear, and of the institution and pendency of which he has never been notified, as required by law.

2. Because the said decrees themselves have never been notified to him after the making and entering up thereof, as required by the Spanish laws; and, therefore, for this reason, are null and void.

3. Because, by the laws of Spain, simple decrees are never final until they have progressed to the definitive sentence, three times solemnly adjudged in the manner prescribed by law, in the presence of the parties thereto, after due notification.

And the said John Innerarity further shows to this honorable court, that if the said decrees had been clothed with the necessary *legal* formalities, still, *in foro conscientiæ*, they ought not to be enforced:

1. Because the subject-matter of the suit in which they are entered up had, long previously thereto, to wit, in the year 1810, been settled and put at rest, by the competent tribunal, upon due examination and deliberate consideration, and after ample notice to all the parties interested or in anywise concerned therein.

2. Because all the deposites which have been made with Mr. John Forbes have been paid over to the proper persons appointed to receive them, under the orders or decrees of the proper tribunal; and because the particular deposites specified in the said decrees have, in truth and in fact, never been made.

3. Because the goods belonging to the estate of Vidal, in the said decrees alleged to have been sold by John Forbes in New Orleans, and of the sale whereof the said John Innerarity is by said decrees required to render an account, were not, in truth and in fact, sold by the said John Forbes, nor by the said John Innerarity, but were sold by the sheriff of the city of New Orleans, under a judgment of the superior court of the Territory of Orleans, as will more fully appear by the record of the said judgment herewith accompanying, marked A, and which the said John Innerarity prays may be received by this honorable court as a part of this his showing.

And, moreover, the said John Innerarity shows, that all the deposites which have been made with the said John Forbes, of moneys belonging to the estate of Vidal, were made with him in his own individual capacity, and not with the house of John Forbes & Co.; that he, the said John Innerarity, was, at the time of said transaction referred to in said decree, a minor, and not one of the firm of Forbes & Co., nor in anywise interested therein; hence not responsible, as he humbly conceives, for the liabilities (if any) of John Forbes, over whose conduct he had no control.

And the said John Innerarity further shows to this honorable court, that it is in his power to prove, if permitted, that the motives which led to the institution of the suit whereon said decrees are founded are dishonorable in the extreme, and that they spring from considerations involving the subversion of every moral principle; and hence, that said decrees ought not to be enforced in equity and good conscience, even if they had been invested with every requisite formality.

All which matters and things the said John Innerarity doth aver, and will prove, when and where to this honorable court it shall seem meet.

SAMUEL ACRE, *Attorney for John Innerarity.*

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 11.

Order to Auditors.

HEIRS OF VIDAL,
vs.
JOHN INNERARITY.

WEST FLORIDA, EXECUTIVE CHAMBER, *September* 17, 1821.

In virtue of a decree this day rendered in the above case by Major General Andrew Jackson, Governor of the Floridas, &c., and John C. Mitchell, Esq., sitting as the supreme court of judicature in this province, you are hereby appointed auditors to arrange and settle the accounts of said estate. And you will appear before me at the Executive Chamber, to take the requisite oath for the faithful discharge of the duties assigned you.

The auditors are expected to appoint their secretary, and (through him) to give due notice to the parties of the period when they will be prepared to enter upon the duties of their office.

The parties, respectively, are to lay before the said auditors a statement, in writing, of their demands or defence, or to appear before them, if they should be thereto required; and the said auditors to have power to call for and compel the production of books and papers, and to require the attendance of witnesses, if the same should be deemed necessary.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

To F. H. NISBET, J. DE LA RUA, and WM. DAVIDSON, Esqs.

FLORIDAS, *Pensacola, ss:*

THE HEIRS OF N. M. VIDAL,
vs.
JOHN INNERARITY.

EXECUTIVE CHAMBER, *September* 6, 1821.

This cause was brought up on the 29th day of August last, on citation served upon the defendant to attend and show cause (if any he had) why the decrees in favor of the heirs should not be carried into full effect. The

defendant, having made an objection, which was for the present overruled, prayed time to prepare his defence to this 6th day of September, which was granted him for that purpose. On the prayer of Mr. Acre, who appeared this day as the attorney for the defendant, for further time to prepare his defence, it was allowed him to Monday next, the 10th instant, at 9 o'clock, A. M.

ANDREW JACKSON,
Governor of the Floridas, &c.

Attest:

JOHN COPPINGER CONNOR,
Clerk of the Executive Court.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 12.

Statement presented to Auditors by Plaintiffs' Counsel.

Brackenridge and Call, attorneys for the heirs of Vidal against John Innerarity, submit the following statement, on behalf of the said heirs, to the auditors appointed by the Governor to adjust and settle the accounts of the estate:

John Forbes, with three others, administered on the estate at this place in June, 1806, and afterwards attached the effects at New Orleans for a debt due to his house.

Forbes became responsible for $1,600 purchased at the sale of effects at this place.

On the petition of Forbes, security was demanded of Armas, the executor; and from that time, we believe, *the proceedings will show that the estate was placed under the control of Forbes.*

The deposite was withdrawn from the treasury, and placed in the hands of Forbes; and the papers will clearly show that, as to his own debt, he always had more than its amount in his hands. The deposite in the treasury was transferred to him; and when this was applied to the payment of Arroyo's mortgage, the amount of sales at Baton Rouge was placed in his hands by way of deposite in its place. The whole proceeding shows great management, and clearly proves that the affairs of the estate were conducted pretty much at the will and pleasure of Forbes.

By a decree of September, 1806, he was ordered to raise the attachments laid on the effects in New Orleans, and proceed to make sale in the manner pointed out. With this decree he never complied. The property was sold by the sheriff, in pursuance of the improper and illegal seizure which had been made.

The last decree of 1810 recognises that of 1806, as does also that of 1820. This proves that he had never accounted, in a satisfactory manner, to the tribunal; and the probability is, that the record from New Orleans had been uniformly rejected. The property was no doubt sold at a sacrifice; the record can only furnish evidence that it was worth at least the amount there specified. They object to the allowance of any thing but a reasonable commission, and claim the balance, with interest from 1806. No other disbursements were, or could be, authorized by the court.

We refer the auditors to the decree of Governor Folch, in November, 1810. It is positive that Mr. Innerarity pay over to the court the amount then in his hands, having become a party, as the representative of the house of Forbes. No discretion of authority is given to make a distribution. This is evidently reserved by the court for itself.

An exact translation of that decree is important. Taken with the decree which follows, we are convinced that there can be no doubt of the intention of the courts that the money should be paid into the treasury. Any payments made afterwards by Innerarity were made in his own wrong, and unauthorized; and the receipt of individuals ought not to be allowed. Such appears to have been the decision of the auditor in 1820; for we cannot doubt that he refers to such when he speaks of *simple private papers.* That decree declares these papers to be inadmissible: they prove payments made in direct opposition to the decree. We therefore claim at *least* the balance remaining in the hands of Mr. Innerarity in 1810, with interest from that date, at 5 per cent.

In the account made by Leiba, there is said to be an error of $500 in favor of the estate. Domingo Sousa is acquainted with this fact. Errors of this kind can be corrected at any period.

We refer to the decree of the Governor, as confirming that of Suares. We object to the admission of any payments not expressly and specially sanctioned by the tribunals; and we contend that the record from New Orleans can prove nothing, excepting that the property sold for *at least* a certain amount, and may serve as evidence against the defendant as to its value.

The deposite in the hands of Mr. Innerarity is declared to be unaccounted for in 1820; as also the amount of property sold in New Orleans. The decree of 1820 required the payment of the deposite into the treasury as a preliminary to the settlement of the accounts; and that part of the decree which states that certain papers had been rejected shows that no credits were allowed, except those which *appear in the testamentary papers.* We object to all unauthorized payments, although it should appear that the debts have been recognised by the tribunal.

BRACKENRIDGE & CALL, *for the Plaintiffs.*

PENSACOLA, *September* 20, 1821.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

The counsel for the heirs of Vidal except to the report of the auditors appointed to adjust and settle the accounts of the estate, for the reasons following:

1st. Because, by a positive decree passed in November, 1810, John Innerarity was expressly ordered to pay over to the tribunal the balance, amounting to $2,645, then in his hands; and no authority was given him to pay to the creditors their dividends out of this sum. They were paid by Innerarity in his own wrong, and so it was decreed by Suares in 1820. The utmost he can claim from the *equity* of the court is the power to compel those whom he has paid to enter satisfaction on the judicial proceedings, and for which a reasonable time may be allowed.

2d. The record from New Orleans can serve but for one single purpose—to prove the value of the property sold. By a decree of September, 1806, Forbes was expressly ordered to raise the attachments, and dispose of the

effects by private sale. This decree appears to have been repeated several times in the course of the proceeding, without any alteration, down to 1810, and is also recognised by Suares, in 1820. An account of sales made in the manner *forbidden* by the tribunal, and a disposition of the proceeds in a manner never sanctioned, is no compliance with the decree of 1806. He is responsible for the whole amount, and with interest from the time of sale.

BRACKENRIDGE & CALL.

PENSACOLA, *October* 6, 1821.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 13.

Statement presented to the Auditors by John Innerarity.

To the Auditors appointed by the Supreme Judicial Court of West Florida for receiving and auditing the accounts against, and in favor of, the estate of the late N. M. Vidal.

John Innerarity, in obedience to the decree of the said court, submits the following statement of the deposites of moneys belonging to said estate, and of the sums paid to the creditors thereof, to whom the same were adjudged by the judicial contador, as the dividend to which they were respectively entitled out of the funds belonging to said estate, it having been previously ascertained to be insolvent, viz:

Amount of assets declared by the tribunal to be in our hands in November, 1810, of which sum we are ordered by the said tribunal to pay - - - - -		$2,645 2
To Euphrosyne Hisnard, as per her receipt herewith, - - -	$1,379 0	
To Terence Le Blanc, paid by our agent, W. Simpson, in New Orleans, -	209 2½	
To Miguel Eslava, paid by our house in Mobile, as per our books, - -	432 0	
To the clerks of the court, by order to pay Nicolet's dividend and costs, as per their receipt herewith, - - - - -	512 0½	
		2,532 3
		112 7
Amount recovered of the *sheriff* of New Orleans, - - -	$188 6	
Less, cost of record herewith, - - - -	5 3	
		183 3
Amount remaining in our hands as an offset against $453⅜ still due, as declared by the tribunal,		$296 2
By the above statement, it will be seen that the assets of the estate amounted to - -		$7,054 6½
The claims against it to - - - - - -		6,101 4
And that the creditors yet have a demand against the same for - - -		$953 2½

consequently, the estate having been unable to pay the accredited demands which had been allowed against it, there can possibly remain nothing for the legatees or heirs; and hence *they* have no demand against the house of Forbes. If there are any demands against that firm, it is the creditors alone who can make them. Let us examine how the matter stands with them. By the settlement of the estate in 1810, to each creditor was assigned by the judicial contador a dividend proportioned to his claim, and to the quantum of assets to meet the same; and, by a decree of the same year, found on the last page of the proceedings, this respondent, as agent of said house, was ordered to pay over the sum of $2,645⅜, the remainder of the deposite, to the creditors; which was done, as above shown, and by the papers herewith presented, and marked Nos. 1, 2, 3, 4, and 5.

It will be remarked that the decree above mentioned orders us to pay, after two months from the date thereof—not into the court, as Messrs. Brackenridge and Call supposed—but to pay the money, because the tribunal had no discretion over the claims of creditors in giving a longer time, (*no hoy arbitrio en este tribunal.*)

The claims of these creditors were satisfied, as by the receipt of E. Hisnard for the share or dividend allowed her, and that of the clerks of the court for the sums allowed the persons therein mentioned, amply appears. Mr. Forbes, being recognised as the attorney of Don Miguel Eslava, of Mobile, was authorized as such to retain his share or dividend in his own hands, and to settle with him when called upon; which was done, as will appear by an inspection of the original entries in our books.

The record from New Orleans shows how the property in that city belonging to Vidal's estate was disposed of. Mr. Forbes, perceiving that the estate in Florida was not sufficient to pay the debts, brought suits before the superior court of that Territory for the recovery of so much of his debt as the goods might cover, and thus acquired a preference over other creditors as to the value of those goods, he being the first who attached them; however, they not being sufficient to pay his claim against the estate, he came in for an equal dividend of the assets in Florida, which was allowed him in the settlement of the estate by the tribunal here.

The suit being brought in New Orleans for the recovery of a just debt, due by note of hand, this tribunal could have no control over the proceedings of the court there, nor direct in whose favor the judgment should be given; hence, the order referred to by Messrs. Brackenridge and Call has no weight; and, if Mr. Forbes recovered any thing from that source independent of the other creditors, it was a good fortune, procured by his diligence in discovering property in another jurisdiction, to whose courts he had applied for justice, as far as it could be obtained from the means within their power.

It will be remarked, that this suit was defended by the executor of the estate, who seems to have been satisfied with the judgment of the court; therefore, no blame can attach to the conduct of Mr. Forbes in this particular. He was in pursuit of his claims wherever he could find property, and, with all his art and industry, did not find enough to meet his demands; so that, so far from his firm having any thing in their hands belonging to the estate of Vidal, his legal and just claims against the same remain yet unsatisfied.

All whereof is respectfully submitted.

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 14.

To the Auditors appointed for the investigation of the accounts, &c. of the estate of Don Nicolas Maria Vidal.

GENTLEMEN:

In relation to the recognition and payment of the debts due to Eslava and Le Blanc, I beg leave to state, that the debt of $500 due to Eslava was first virtually recognised by the executor, Don Cristoval de Armas, as appears by the proceedings. In the various stages of those proceedings, Mr. Forbes was admitted by the tribunal as the representative of the said debt. It was further formally recognised at the judicial meeting of the creditors, and finally and definitively recognised by the tribunal itself, in the formation of the judicial account by the auditor appointed for the purpose, who assigned $432 as the *pro rata* share in the distribution of the assets. I repeat that Mr. Forbes acted throughout as the attorney of Eslava, and the proof of the payment is on the face of the books of John Forbes & Co. in the most authentic form; and regular mercantile books, agreeably to the Spanish laws, are admitted in all tribunals as *bona fide* evidence of the first grade.

The evidence of the payment of Le Blanc's debt, or the *pro rata* share assigned to him by the tribunal, (say $209 2½) is to be found in the books of the late William Simpson, a partner of John Forbes & Co., and who managed their establishment in New Orleans. I have not in my possession either the books or papers of the said Mr. Simpson; part of them are in New Orleans, and a part in Mobile. Had I had any anticipation of the present course of proceedings, I would have been prepared. A strong collateral proof of its payment is, that no other demand has been made of the same; and all that can be required of me is to satisfy the parties, if, by any remote contingency, we should be legally called on. Any thing beyond this would be travelling out of the record, and overstepping the rubicon of the law.

I have only further to observe, that, if any exceptions should be taken to any thing had or done touching the accounts of said estate, Messrs. Brackenridge and Call pledged themselves to my counsel, Mr. Samuel Acre, to afford me sufficient time to give him information thereof, so that he may come forward and set every thing in a legal point of view. He has also pledged himself immediately to come here, and would have remained but for his full conviction that every thing was in proper form. I doubt not that I shall be allowed the full benefit of Messrs. Brackenridge and Call's pledge, because it would be dealing very harshly with me to deprive me of the aid of my counsel, who was obliged to return on family affairs. He expressed his conviction that his return here would not be necessary, but, in the event of my giving him information of its being requisite, promised that he would come to my relief *instanter*.

One more observation, gentlemen, and I have done. You have borne testimony to the very regular and elegant manner in which the books of John Forbes & Co. appear to be kept. As to the basis of good faith on which the whole of the transactions rest, I flatter myself you cannot have a shadow of doubt. All which is most respectfully submitted by, gentlemen,

Your most obedient servant,

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

To the Auditors appointed by His Excellency the Governor to investigate the accounts of the estate of Don Nicolas Maria Vidal.

GENTLEMEN:

As it has recurred to my memory that some observation was incidentally made by your board in relation to the $200 paid to Mr. Livingston, it becomes my duty respectfully to state to you, that the said sum was paid by an order of court, on motion of Mr. Livingston that all the expenses, costs of court, and charges of office, should be paid, and deducted by the sheriff, and the nett proceeds delivered over by him. This was done accordingly, as appears by the sheriff's account; the balance ($188 75) was paid by him into the hands of Mr. William Simpson, the partner of Mr. Forbes, and the director of his house in New Orleans. Had it been otherwise, Mr. Livingston would have applied to Mr. Simpson for his fees, and not to the sheriff.

I again beg leave to impress on your attention that the sum in question was not paid by the volition or act of Mr. Forbes, because, in my humble opinion, here the line of distinction is to be drawn. Let us examine how Mr. Forbes would be affected by another construction of this transaction; *exempli gratia:* Suppose it be said Mr. Forbes shall have the benefit of what was received in New Orleans, which was - - - $188 6
But he shall bear Mr. Livingston's charges, - - - - - 200 0

Difference against Mr. Forbes, - - - - - - $11 2

Thus, instead of being benefited for all his trouble, or receiving any thing from this source, he would, by this *modus operandi*, actually sustain a loss of $11 2. Such a recovery would be an *Iricism*, and such a mode of procedure an inversion of all justice; but far be it from me, gentlemen, to interfere with your province, and still further to suppose that such a course could for a moment meet your sanction. Language has no sign or equivalent to characterize such an anomaly.

This mode of stating the case is so palpably obvious, that I have to beg your pardon for thus burning candles by daylight, gratuitously discussing intuitive truth which requires no illustration.

I have the honor to be, very respectfully, gentlemen, your most obedient servant,

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 15.

TERRITORY OF ORLEANS, *to wit:*

Be it remembered, that, on the 7th day of July, in the year of our Lord 1806, into the superior court for the Territory aforesaid, came John Forbes & Co., of Pensacola, in West Florida, by their attorney, Edward Livingston, and filed their petition in the words following, to wit:

To the honorable the Superior Court of the Territory of Orleans:

The petition of John Forbes & Co., of Pensacola, in West Florida, humbly showeth: That Nicolas Maria Vidal, late auditor of war in the province of West Florida, was, at the time of his death, indebted to your petitioners in the sum of $3,361 50, for money lent, and for goods, wares, and merchandise delivered to him in his lifetime, as appears by the annexed account and affidavit. And your petitioners show that they have not been able, in West Florida aforesaid, or elsewhere out of this Territory, to discover any assets sufficient to pay or secure their said debt, but that they have been informed, and verily believe, that sundry valuable effects belonging to the said Nicolas Maria Vidal were, previous to his departure from this place, deposited in the Ursuline convent, in this city, where the same now are. Your petitioners, therefore, humbly pray that the said effects may be seized and attached by the sheriff of the city and county of New Orleans, and that the same may be sold, according to law, to satisfy your petitioners' debt, with interest and costs. And your petitioners, &c.

EDW. LIVINGSTON, *Of counsel for plaintiffs.*

Edward Livingston, attorney in fact, by substitution of John Forbes & Co., being duly sworn, doth depose and say: That he has been informed, and verily believes, that there are in the convent in this city several trunks of effects belonging to the estate of the within-named Nicolas M. Vidal, under the care of Mrs. Xavier, the superior of the said convent.

EDW. LIVINGSTON.

Upon which said petition the following endorsement was made, to wit:

"Let an attachment issue accordingly. July 7, 1806."

"J. B. PREVOST."

Here follow the documents referred to in the foregoing petition:

Estate of Don Nicolas Maria Vidal, late auditor of war in this province, to John Forbes & Co. Dr.

1805.	December 14th.	For this sum lent him, - - - - -	$3,000 0
	June 18th.	For amount of sundry merchandise furnished him before his death, -	361 4
		Errors excepted:	$3,361 4

JOHN FORBES & Co.

Pensacola, *June* 18, 1806.

Before me, Don Vicente Folch y Juan, Governor General of His Majesty's province of West Florida, &c. personally appeared John Forbes, a partner in the house of John Forbes & Co., of this place, who, being duly sworn, by placing his hands on the holy Evangelists, deposeth and saith: That the above sum of $3,361 and 4 reals is truly and justly owing by the estate of the late Don Nicolas Maria Vidal to the said John Forbes & Co., as appears by their mercantile books, regularly kept. In testimony whereof, he signs these presents, before me and two assistant witnesses, (for want of a notary public, in Pensacola,) this 18th day of June, 1806.

VICENTE FOLCH.

Witnesses present:

Pablo Larin,
Fran. Xav. Navanno.

Know all men by these presents, that we, John Forbes & Co., of West Florida, merchants, have made, ordained, constituted, and appointed, and by these presents do ordain, make, constitute, and appoint, Mr. George Pollock, of New Orleans, merchant, our true and lawful attorney, for us, and in our name and stead, and to our use, to ask, demand, sue for, levy, recover, and receive all and every such sum and sums of money, debts, rents, goods, chattels, wares, dues, accounts, and other demands whatsoever, which now is, or are, or hereafter may become, due, owing, payable, or belonging to us, or detained from us, in any manner of ways or means whatsoever, by any person or persons residing or being in the district of New Orleans, or in Louisiana; and more especially to attach, sue for, and take into his possession, all property, real or personal, belonging to the estate of Don Nicolas Maria Vidal, deceased, and to hold the same for our account, or so much thereof as will pay the annexed account, with charges of attachment, or otherwise secure us; giving and granting unto the said attorney, by these presents, full and whole power, strength, and authority, in and about said premises, to have, use, and take all lawful ways and means in our name for the recovery thereof; and upon the receipt of any such debts, dues, or sums of money aforesaid, acquittances, or any other sufficient discharges, for us and in our name to make, seal, and, deliver, and, generally, all and every other act and acts, thing and things, device or devices in the law, whatsoever, needful and necessary to be done in and about the premises, for us and in our name to do, execute, and perform, as fully, largely, and amply, to all intents and purposes, as we might or could do, if we were then and there personally present, or as if the matter required more special authority than is herein given, and attorneys one or more under him, for the purposes aforesaid, to make and substitute, and again at pleasure to revoke and displace; hereby ratifying, allowing, and holding for firm, valid, and effectual, all and whatsoever our said attorney shall lawfully do or cause to be done in and about the premises, by virtue hereof. In witness whereof, we have hereunto set our hands and seal, at Pensacola, in West Florida, this 18th day of June, in the year of our Lord 1806.

JOHN FORBES & Co.

Sealed and delivered in the presence of
T. B. Mitchell,
R. P. Johnson.

On the day of the date hereof, before me, John Lyna, notary public for the Territory of Orleans, dwelling in the city of New Orleans, duly qualified and commissioned, personally appeared Thomas B. Mitchell, of Pensacola, in West Florida, who, being by me duly sworn according to law, did solemnly swear and say that he was present at the execution of the within letter of attorney; and that John Forbes, one of the firm of John Forbes & Co., of Pensacola aforesaid, executed the same; and that this appearer, along with R. P. Johnson, did then and there sign their names thereto as witnesses.

T. B. MITCHELL.

In testimony whereof, I have hereunto set my hand, with the said appearer, and have affixed my seal of office, this 24th day of June, A. D. 1806.

JOHN LYNA, *Notary Public.*

And afterwards, to wit: At a superior court held for the Territory of Orleans, at the principal, in the city of Orleans, on the 1st day of September, in the year of our Lord 1806:

On certificate of the sheriff, that the property attached in this case is of a perishable nature, it is "ordered that the same be sold, and the proceeds thereof retained until the further order of this court."

And afterwards, to wit: At a superior court held for the Territory of Orleans, at the principal, in the city of Orleans, on the 10th day of September, in the year of our Lord, 1806:

Ordered, that Messrs. Rodriguez and De la Rua be appointed, on behalf of the estate of Vidal, appraisers of the property attached, in conjunction with two others to be appointed on behalf of Forbes & Co. by the sheriff of the county of Orleans.

And afterwards, to wit: At a superior court held for the Territory of Orleans, at the principal, in the city of Orleans, on the 25th day of November, in the year of our Lord 1806:

On the motion of Mr. Livingston for the plaintiff, with consent of Mr. Rodriguez, of counsel for the executor of N. M. Vidal, it is ordered, "that the moneys received by the sheriff, on the attachment in the cause, be paid to the plaintiff's attorney; and, that after deducting the costs and expenses attending the suit, as well on the part of the plaintiff as the defendant, the balance be remitted to the proper officer of the Spanish Government, at Pensacola, having charge of the said succession."

I do hereby certify that the foregoing is a true copy of the original record on file in the clerk's office of the superior court for the Territory of Orleans.

In testimony whereof, I have hereunto set my hand and affixed the seal of my office, this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seven.

J. W. SMITH, *Clerk.*

No. 16.

George T. Ross in account with the estate of Nicolas Vidal.

Dr.					Cr.
	To amount of sale of property, -	$877 12½	1806. Dec. 29,	Cash paid Cristoval de Armas, by order of superior court, - -	$57 50
				Cash paid J. Rodriguez, by order of superior court, for services rendered N. Vidal and his estate, -	290 00
				Cash paid E. Livingston, - -	200 00
				Overcharge on sales, - -	15 00
				Sheriff's fees, including commission, advertisements, and storage, cartage, &c., - - - -	125 87½
				Balance, paid W. Simpson, Esq.,	188 75
		$877 12½			$877 12½

New Orleans, *September* 26, 1807.

I certify the above account to be just and true, and that the money paid J. Rodriguez was in consequence of an order from the superior court directed to me, and for services performed by him as an attorney.

GEO. T. ROSS, *Late Sheriff.*

GEO. T. ROSS, *Sheriff of Orleans.*
EDWARD LIVINGSTON.

NEW ORLEANS, *March* 24, 1807.

STATE OF LOUISIANA, *City of New Orleans:*

I, Greenbury Ridgely Stringer, notary public in and for the said city of New Orleans, duly commissioned, do hereby certify that I have this day carefully read and compared the foregoing written document with a certain original document purporting to be an account of sales by the late George T. Ross, as sheriff of New Orleans, dated March 24, 1807, recorded in my current register for this year at page 350, under date of this day; and that the foregoing is a true and faithful copy of the said original, recorded as aforesaid.

In faith whereof, I grant these presents under my notarial firm and seal, at New Orleans aforesaid, this 12th day of September, in the year one thousand eight hundred and twenty-one.

G. R. STRINGER, *Notary Public.*

I, the before-named Greenbury Ridgely Stringer, notary public, &c., do hereby further certify, that I was well acquainted with the late George T. Ross, of this city, and for some time sheriff of this parish; that the handwriting and signature of the said George T. Ross is well known to me; that I have examined the signature of "*George T. Ross, sheriff of Orleans,*" to the original recorded document, of which I have certified the foregoing to be a copy; and that I do verily believe the said signature to be the handwriting of the said late George T. Ross, deceased.

In testimony whereof, I grant these presents, under my notarial firm and seal, at the city of New Orleans, this twelfth day of September, one thousand eight hundred and twenty-one.

G. R. STRINGER, *Notary Public.*

UNITED STATES OF AMERICA, *State of Louisiana:*

By THOMAS BOLLING ROBERTSON, *Governor of the State of Louisiana:*

These are to certify, that G. R. Stringer, Esq., whose name is subscribed to the instrument of writing hereunto annexed, was, at the time of signing the same, and is now, a notary public in and for the city of New Orleans, duly qualified and commissioned.

Given at New Orleans, under my hand, and seal of the State, this thirteenth day of September, one thousand eight hundred and twenty-one, and of the independence of the United States the forty-sixth.

In the absence of the Governor,

P. DERBIGNY, *Secretary of State.*

No. 18.

The undersigned, auditors appointed by the supreme judicial court in the case of the heirs of Nicolas Maria Vidal against John Innerarity, as by commission bearing date September 17, 1821, to arrange and settle the accounts of said estate, respectfully report:

That, conceiving the end of their appointment could only be attained by a strict examination of every particular from the commencement of the proceedings, they have examined the documents throughout with great care and attention, and believe they have obtained a correct knowledge of every thing connected with the subject; and believing a detailed statement would be more satisfactory to the court than any other mode, they beg leave to submit the following as the result of their investigation:

Shortly after the decease of the testator, and before a will was known to exist, an inventory was taken of the effects in this place, which were deposited in a warehouse belonging to John Forbes & Co., and were afterwards sold by Cristoval de Armas, the executor. Upon a petition of John Forbes & Co., in behalf of themselves and others, De Armas was ordered to give security, or relinquish his trust.

Armas, upon relinquishing his control over the property, submitted the following account, which we find correct, and to embrace every thing up to the time it was made.

Amount of sales of property at auction,			$7,313 1
Amount of money found in house,	$224 4½		
Expended by Millan Carreras, in whose hands it was placed, for expenses of funeral, &c.	192 0		
		32 4½	
Omission in sales: two quires paper,		1 2	
			$7,346 7½
Paid for paper $2 and $3 4,	$5 4		
Crier and drummer at auction,	21 0		
Baker's bill,	6 0		
House rent,	33 2½		
McVoy, house carpenter, by order,	101 1		
Father Coleman,	30 0		
Francisco Joute, for corn,	50 0		
José de Clouet, for wood,	225 0		
Doctor Herrieda, assessor,	19 6		
Taylor, for articles at funeral,	3 3		
For hauling two loads,	6		
Verification of will,	19 4		
Commisions, 5 per cent. on amount received,	367 2½		
		912 5	
			$6,434 2½
Due from Casa Luenga, for goods at sale,	$292 0		
Due from La Peña,	85 7		
Due from J. Doneaud,	69 2		
Due from Vincent Folch,	77 0		
John Forbes & Co's. due bill, viz:			
Bought by them at sale,	$319 3		
Bought by Carrera, assumed by them,	670 0		
Bought by Arroyo,	507 2½		
Bought by Calderon,	159 1		
Paid by De Armas to La Peña, presumed included,	10 0		
	$1,665 6½		
Amount deposited in money,	4,166 0		
		$6,355 7½	
Retained by De Armas, under sanction of the tribunal,		78 3	
Amount retained by tribunal from deposites,		1,100 0	
First taxation of costs,	$913 3		
Second taxation of costs,	187 2		
Paid La Peña,	$97 0		
Due by him, per Armas's account,	$85 7		
Paid him by Armas, and included in Forbes's note,	10 0		
	95 7		
	1 1		
Paid J. Doneaud,	150 0		
Due by him, per Armas's account,	69 2		
	80 6		
		1,182 4	
Due tribunal for costs,		82 4	
In the hands of John Forbes & Co. received from the Royal Treasury, 14th March, 1807,		$3,066 5	
In the hands of John Forbes & Co. amount their due bill for purchases of effects at auction, and debts assumed by them, deducting $10 for La Peña,		1,655 6½	
In the hands of John Forbes & Co. amount sales three negroes,	$1,200 0		
Paid Millan Carrera by order of tribunal, he to refund should the estate prove insolvent,	500 0		
		700 0	
Paid Millan Carrera, proceeds of sales of land at Baton Rouge,		4,129 6½	
Due from Casa Luengo,	$292 0		
Due from Cristoval de Armas,	78 3		
In office of the secretary, amount due from Vincent Folch,	77 0		
		447	

In order to ascertain the proportion due to each creditor, it is necessary to add the amount paid Carrera as above, he being obliged to come in the same as the others,		500 0
Making the gross assets of the estate, at the time the former judicial account was formed,		$10,499 5
From this sum of 10,499 dollars and five-eighths must be deducted:		
Balance due the tribunal,	$82 2	
Charge for making out the accounts by De Leyva,	245 0	
Reserved for future costs,	70 7	
		398 1
		10,101 4
From this deduct amount of mortgage to Arroyo,		4,000 0
To be apportioned to creditors,		$6,101 4

Statement of demands against the estate, and dividends agreeably to the above.

John Forbes & Co.	$3,361 4	dividend	$2,907 2
Millan Carrera,	538 0	do.	465 2½
Miguel Eslava,	500 0	do.	432 0
Juan Lacoste,	44 1	do.	38 0
Manuel Garcia,	36 3	do.	31 3
Terencio Le Blanc,	242 0	do.	209 2½
Juan B. Nicolet,	600 0	do.	518 4
Cristoval de Armas,	138 6½	do.	121 0
Euphrosyne Hisnard,	1,590 0	do.	1,379 0
	$7,054 6½		$6,101 6
		Deficit,	953 0½

The above statements correspond with the judicial account formed in 1810, which is correct in every respect; and, although by it the estate appears insolvent, it is evident that it would not have been so had it not been burdened with so great an amount of costs, which, including the charge for the account and the $70 reserved, amount to $1,315 5; but even with the addition of the proceeds of the property in New Orleans, there was not sufficient to discharge the mortgage without the sale of the lands.

The amount of funds in the hands of Mr. John Innerarity, as the representative of John Forbes & Co. at the formation of the account in 1810, per statement on page 3 of this report,			$9,552 2
Amount of Arroyo's mortgage,	$4,000 0		
Amount of dividend on their claim, per statement page 4,	2,907 2		
		6,907 2	
		$2,645 0	
Paid Sousa and others acting under the authority of the tribunal:			
Dividend to Juan B. Nicolet,	$518 4		
Less, due from Casa Luengo,	292 0		
		226 4	
De Leyva's charge for account,	245 0		
Balance due the tribunal,	82 2		
Reservation for costs,	70 0		
	397 2		
Less V. Folch's account,	$77 0		
Amount overpaid Carrera in $500,	34 5½		
	111 5½	285 4½	
Paid Euphrosyne Hisnard, in full of her dividend		1,379 0	
			1,891 0½
			753 7½

Juan La Coste and Manuel Garcia, whose dividends together amount to $69 3, were paid, Mr. Innerarity represents, from the $70 reserved for future costs by the tribunal.

Cristoval de Armas was entitled to receive a dividend of $121, less $78 3, retained by him for his account on 2d page of this report, leaving $42 5, but received $57 50 in New Orleans; of course he was not entitled to this.

Amount of dividend to Miguel Eslava charged as paid by John Forbes & Co's house in Mobile, but no receipt produced,		432 0
Amount in hands of John Innerarity,		321 7½
Amount of dividend to Terencio Le Blanc, asserted to have been paid by Mr. Simpson, partner of John Forbes & Co. at New Orleans, not charged in Mr. Innerarity's book, and no receipt produced,		209 2½
Leaving unexpended of the $2,645, being amount of dividends to Cristoval de Armas, Manuel Garcia, and Juan La Coste, which were paid from other funds, as stated in last page,		112 5
The property attached in New Orleans was sold, per sheriff's account, submitted to the auditors by Mr. Innerarity, for	$877 12½	
Paid Cristoval de Armas, by order of the court,	$57 50	
Paid J. Rodriguez, by order of court, for services in behalf of estate, which should be allowed, as he is recognised by Armas in his account,	290 00	
Paid E. Livingston, Forbes's attorney,	200 00	
Paid sheriff's fees, &c.	125 87½	
Deducted for errors in sales,	15 00	
	688 37½	
		188 6

To this add the amount deducted from sales as paid Mr. Livingston, which appears to be his charge for suing out the attachment, and cannot be considered a charge against the estate, - 200 0

501 3

Making five hundred and one dollars and three-eighths, which the auditors unanimously find existing at this time in the hands of Mr. John Innerarity in his character of depositary, should the payments said to have been made to Eslava and Le Blanc be recognised as correct by the court.

But should the court determine the said payments to Eslava and Le Blanc to be illegal, or not properly substantiated, their accounts must be added, - - - - 641 2½

$1,142 5½

No charge is made in the account submitted by John Innerarity of five dollars and three-eighths paid for copy of record in respect to the property in New Orleans, which should be credited, and will reduce the amount absolutely stated against him to - - - - $496 0

And the provisional amount to - - - - - - $1,137 2½

Annexed to this report is a statement of the account, marked No. 1, in the form of an account current, showing the same balance of four hundred and ninety-six dollars. Also the account submitted by Mr. John Innerarity, which is an exact copy from the books of the house, marked No. 2, stating a balance against the estate, without including the payment said to have been made to Le Blanc of $677 5½. This difference arises from the whole debt against Vidal at the time of his decease remaining charged as a matter of course; and the omission to credit the $670 assumed by them for Carrera, which it appears they have not recovered, together with $100 short credited for sale of negroes, less some small items already credited to estate by Armas, and for which they no doubt accounted with him: all which will plainly appear by reference to statement marked No. 3, which, assuming the balance of $677 5½ as a basis, and charging, in addition to the foregoing items, the $200 paid E. Livingston in New Orleans, and the difference between the actual demand of Forbes & Co. and the dividend assigned them, produce the same balance in favor of the estate—four hundred and ninety-six dollars.

Although this sum exists in the hands of Mr. Innerarity, in favor of the estate, he is entitled to receive a proportion towards the payment of four hundred and fifty-four dollars and a quarter, the difference between the actual amount due the house of John Forbes & Co. and the dividend assigned them; and, in case the payments to Eslava and Le Blanc are not allowed him, then to retain the full sum of $454 25; as the amount, in that case, would be sufficient to pay the other creditors in full.

All which is respectfully submitted to the court.

F. H. NISBET.
W. DAVIDSON.
JUAN DE LA RUA.

PENSACOLA, *October* 6, 1821.

Test: EDWARD A. RUTLEDGE, *Secretary to the Board.*

Remarks of Mr. Juan De la Rua, one of the Auditors.

El abaxo firmado, uno de los auditores, en las diligencias de los herederos de Nicolas Ma. Vidal contra Juan Innerarity, respetuosamente expone: Que no obstante de que ha firmado el informe hecho, y que aparece en lo antecedente, difiere con los otros dos auditores en lo siguiente. En 1° lugar, en quanto á los creditos de Miguel Eslava y Terencio Le Blanc, los que halla á su juicio plenamente reconocidos, fundandose en lo que aparece en la 3a pieza, de f. 88, hta. 90, f. 133, f. 140, f. 147, hta. 152, y de f. 153, hta. la 154, todo de la misma pieza, mandandox por el ultimo decreto, que la distribucion se hiciese. En 2° lugar, que considera bien probado el pago hecho á Eslava por constar de los libros de comercio de la casa de los Señores. Forbes y Ca., no hallanda prueba de que se halla verificado el de la quota de Terencio Le Blanc. Que discierne ó descordo con los otros dos auditores en el cargo que se hare de los doscientos pesos pagodos á Livingston, segure aparece en la cuenta del sheriff de la Nueva Orleans, puis considera que arguellos justos dros que deban pagarsele deben abonarsele por cuenta de la sucesion, ignorando quales deban ser y por consiguiente quel deban ser el cargo ó abona contra uno y á favor del otro: rayado, discierne en rale.

No. 19.

Innerarity *vs.* Mercedes Vidal.

Plea of John Innerarity.

The said defendant respectfully represents, that, by a decree of your excellency, dated the 17th ultimo, (September,) he was allowed twenty days to furnish proofs in the said suit, which term does not expire until to-morrow, (Sunday, the 7th October;) and, as he hourly anxiously expects to receive material evidence from New Orleans, he throws himself on the justice of your excellency, not to debar him from receiving the full measure of the time granted him; praying your excellency to take into consideration the immense expense and trouble to which he has already been put in defending this suit. On Monday, the 8th, the defendant will, *Deo volente*, be ready to receive the *traslado* of the report of the auditors appointed by your excellency, agreeably to the Spanish laws guarantied to this province by your excellency's proclamation; and humbly craves that this plea may be admitted.

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

Innerarity *vs.* Mercedes Vidal. *Plea.*

The said defendant respectfully represents to this honorable tribunal, that, previous to the cession of these provinces, in all cases in which he was or might be concerned, he had a right of appeal; and he humbly hopes that this honorable court will not now deprive him of so sacred a right, by causing him now to appear and abide by the decision of the supreme court, *en dernier resort*, without his having been previously heard in a court of the first instance, agreeably to the Spanish laws, of which he claims the benefit under his excellency's guardianship; humbly craving that this plea may be admitted.

JOHN INNERARITY.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 20.

Petition of John Innerarity, with reference to laws.

May it please your Excellency: Pensacola, *October* 6, 1821.

John Innerarity, defendant in the suit brought against him by Mercedes Vidal, respectfully represents: That he was this day, at twelve o'clock, notified to appear before your excellency at five this afternoon, in order to hear the report of the auditors appointed by your excellency to investigate the accounts of the estate of Don Nicolas Maria Vidal. Placing the most sacred reliance on the guaranty contained in your excellency's proclamation when these provinces came under your ægis, he humbly hopes that your excellency will condescend to give him a *traslado* of the said report, agreeably to the Spanish laws, of which he annexes to this petition such authorities as are analogous, and as the short space of time allowed would permit him to translate. He trusts that all the benefits therein set forth may be extended to him; and, as he has already suffered great expense, loss, and trouble, from the estate of Vidal and this suit, he humbly hopes that your excellency will show towards him all the indulgence which the merits of the case may authorize. He fervently trusts that this appeal to the justice and impartiality of your excellency will be graciously received.

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

Translations referred to in the above petition.

Colon. tom. i. p. 323.

As soon as the auditors shall have signed their report, it is to be delivered to the secretary, *(escribano,)* who consecutively certifies its delivery by the auditors, and that it is the adjustment made by them of the assets or property of the deceased; which certificate is equivalent to the intervention of the secretary at its formation.

This certificate being subscribed, it is to be annexed to the records in continuity, and the judge consecutively orders a transfer *(traslado)* to be given to the parties interested, for the term of three days, in order that they may

make such allegations as they may deem expedient, under pain that, after the expiration of the said term, the report may be approved of, as far as conformable to law; and, after such expiration of the term of three days, which is to be given to each party interested, in order that they may avail themselves of the privilege granted to them, in case they make no allegation, or express their conformity, the judge proceeds to decree.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

Curia Felipica, page 402, arts. 40, 41, 45.

ARTICLE 40. When the accounts are made up, they must be presented to the judge, who is to order a transfer (*traslado*) of them to be given to the parties for their cognizance, in order that they may see and examine them within a certain and definite time, which he must signify to them; and after they are notified thereof, if they do not comply within the said term, after the expiration thereof the judge may approve and confirm them.

41. After the accounts are examined, within the term of examination, a transfer or sight is given to the parties, in order that, with a due knowledge of every thing relative to the case, they may follow up the proceedings in the ordinary courts until their conclusion. And it is to be observed, that the examinant or claimant of any losses on the face of the accounts, or what may be connected therewith, who is silent as to the other items, is to be held as having consented to the said items against which he has taken no exception, agreeably to the decision of Geneva and Escobas, who affirm that such is the rule.

45. After the accounts are reported on, and presented finally, the parties cannot reiterate the proceedings, or retract, unless they contain an error, and then only relative to that error, and nothing further.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court of West Florida.

No. 21.

INNERARITY, *vs.* MERCEDES VIDAL.

Exceptions to the report of the Auditors.

PENSACOLA, *October* 6, 1821.

John Innerarity, defendant in this suit, respectfully represents: That, inasmuch as the auditors appointed by your excellency to investigate the accounts of the estate of Don Nicolas M. Vidal, as contained in the Spanish records, and the books and documents in possession of this defendant, have disagreed among themselves in their report, he prays that your excellency will order and proceed therein agreeably to the Spanish laws, of which he annexes a translation (marked A) of the most orthodox quotations therefrom, as are applicable, and the rule of action in similar cases; begging and claiming always the undeniable privilege of the *traslado*, as laid down in the authorities in question, in order that he may furnish the umpire, or *texer en discordia*, (whether named by your excellency or elected by the said auditors,) with such further proofs and illustrations as he may deem necessary. All which is strictly conformable to law, *et in verbis legis non est recedendum.*

He therefore invokes your excellency as the guardian of the laws in your executive capacity.

JOHN INNERARITY.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

A.

Translations referred to in the above petition.

Curia Felipica, page 401, art. 36.

If there shall be any disagreement between the auditors, the judge shall name an umpire, who must give his opinion only as relates to the matter wherein they do not agree. And the parties concerned must be duly notified of the nomination, in order that they may lay before him such information as they may deem necessary. And, although both parties should concur and be satisfied with the nomination for settling the difference and contrariety between the auditors, he (*el texer en discordia*) ought to confine himself to the opinion of one or the other auditor, without making any deviation therefrom. But if he should be appointed by the judge, he may deviate from the opinion of either, because it is his duty to make his report agreeably to law.

The costs to the auditors and umpire must be paid equally by both parties, as well by the one as by the other; and the judge is to tax what he thinks reasonable.

Febrero, page 142, art. 34, tom. 4.

If it should appear that the contadors appointed do not agree in opinion, they can, according to law, be compelled to elect an umpire. Although there is no doubt of this, it has been thought proper, and it is the practice of the courts, for the judge to name one officially, in order to avoid the disputes which might accrue between them as to the election. And although two of the three should agree, yet the *traslado*, or transfer of the proceedings to the parties concerned, must not be omitted, in order that they may either consent or set forth their wrongs; and they must be heard in the ordinary courts, because the judge cannot proceed to pronounce summarily until the formalities of the law be complied with: because the parties must be heard fully; the proofs which they may produce must be weighed, in order to ascertain whether the wrongs on the grounds which they allege have any existence in reality. The judge can then pronounce sentence, from which an appeal may be taken within five days.

A true copy from the original on file in my office.

JOHN COPPINGER CONNOR,
Clerk of the Executive Court, West Florida.

No. 22.

Plea of John Innerarity.

May it please your Excellency:

PENSACOLA, MONDAY, *October* 8, 1821.

John Innerarity, defendant in the suit instituted against him by Mercedes Vidal, begs leave most respectfully to state, that the twenty days granted to said defendant for furnishing proofs to the auditors appointed by your ex-

cellency expire to-day, and the term of *traslado*, or transfer of the proceedings *in corpore*, for taking exceptions to the report of the said auditors, and showing the legality of the evidence furnished, or any other benefit granted by the laws, will consecutively commence so soon as your excellency may pass the necessary decree for this purpose. This is the uniform march, or *modus operandi*, of the Spanish law, as the defendant has shown from the latest and most orthodox authorities cited in the pleas and memorial presented to your excellency. That admirable code, the Laws of the Indies, states, also, (tom. 3, lex 1, tit. 16, under the head of "term for pronouncing sentence when every requisite is concluded,") that, when all the arguments are finally closed, and every formality complied with, the judge gives until six days to pronounce an interlocutory, and until twenty a definitive sentence. The defendant again entreats and implores that these sacred oracles may not be disregarded or overruled. These are the laws in which he has been nurtured. *Hic bonus esse.* They lead to safety and security. They are a pavilion in the time of danger, and the defendant's only refuge in the hour of need. Your excellency's proclamation solemnly guaranties the boon of the continuance of the Spanish laws; it is a pledge too precious to be parted with; it is the plank to which the defendant clings when he sees all the elements warring around him. It is his ark of safety, a sanctuary in the season of distress. He is now in that extremity. He has been told by your excellency that you sit as his judge in the first instance, and *en dernier resort, ne plus ultra*, without any other resource or means of redress, inasmuch as all power is combined in your excellency.

The defendant humbly hopes that he will be permitted to say, with all possible respect, that such a situation is critical, nay, awful indeed! It is without a solitary precedent in modern annals; at least, if they do furnish one, it is far beyond his ken, or the utmost range of his reading or experience. He is not even allowed time to call his counsel. He is, in a word, without hope, without confidence, except as to the justice of his exceptions to the report, which he will make if he is granted the privilege of the law; and, if not, then he must yield to force: in which case, he most respectfully begs that this may be considered as his reverential protest. It is under all these alarms, and under circumstances of far greater weight than any which he has hitherto mentioned, but which, through profound respect to your excellency, remain enshrined in his own bosom, that he most humbly approaches your excellency, fervently praying that this appeal may be graciously received.

JOHN INNERARITY.

THE HEIRS OF VIDAL, *vs.* JOHN INNERARITY. } No. 23.

The report of the auditors in this case displays great skill and judgment, and the court are highly satisfied with it. Although, in a strictly legal point of view, vouchers may have been received, and credits allowed, which could not be warranted by the strict letter of the law; yet, from the apparently great attention devoted by them to the subjects submitted to their investigation, and after examination of the report, it is believed by the court that substantial justice may be done by carrying it into effect, especially as the counsel for the plaintiffs have withdrawn their legal exceptions.

The auditors, in the first place, unanimously find a balance of $496 in the hands of the defendant as a deposite, and submit the question to the court whether there is sufficient evidence to allow the payments said to have been made to Eslava and Le Blanc; and if the court should be of opinion that there is not sufficient evidence, then the amount of $641 31 to be added to the sum of $496 absolutely found, making altogether the sum of $1,137 31.

The court are perfectly satisfied that there is not sufficient legal evidence to allow the payments said to have been made to Eslava and Le Blanc, and therefore adopt the provisional amount specified in the report, to wit, $1,137 31.

The court further adopt and allow that part of the report which states that, if the court do not allow the payments said to have been made to Eslava and Le Blanc, to suffer the defendant to retain in his hands the full sum of $454 25, it being the full amount of the balance due the house of Forbes & Co., as the amount, in that case, would be sufficient to pay all the creditors, which will leave a balance of $683 06. As to the exceptions of the defendant to the report, the court do not think them well taken. The first is, that the auditors did not allow the $200 paid to Mr. Livingston, as a fee for suing out an attachment against the effects of Vidal. The court are of opinion that the auditors acted rightly in not allowing this charge; for it appears that the attachment was taken out after the will was duly proved by De Armas, the executor, and, consequently, could not lie; which was virtually the decision of the court to which we have succeeded.

The other exception, that the auditors ought to have allowed the payments said to have been made to Eslava and Le Blanc, the court have already, in the first part of this opinion, disposed of.

To the amount of $683 06, is to be added legal interest, according to the laws of Spain, to wit, five per centum per annum, from the 20th day of November, 1810, the time that the money ought to have been paid over by Forbes & Co., in compliance with a decree of the Spanish tribunal of that date, making the sum of $1,027 19.

Therefore, it is ordered, adjudged, and decreed, that John Innerarity, the defendant, pay over to the alcalde of the city of Pensacola, in thirty days from this day, the said sum of $1,027 19, and, in case of his failure to comply, execution may issue at the expiration of said thirty days, and the money made to be paid over into the hands of the alcalde of the city of Pensacola. And it is further ordered, adjudged, and decreed, that the said alcalde must give public notice in the Floridian, for the term of sixty days, to the creditors of the estate of Vidal, deceased, to come forward, make known their claims, and receive the amount; and if no creditors should come forward within the time limited, or, after having come forward, fail legally to substantiate their claims, then the said alcalde is required to pay over the money in his hands to the heirs of Vidal.

Given under our hands, this 8th day of October, 1821, and of the independence of the United States the forty-sixth.

JOHN C. MITCHELL,
ANDREW JACKSON,
Governor of the Floridas, &c.

The court, being informed that H. Bigelow, Esq. is indisposed, appoint Mr. Shannon to tax the costs of the former and these proceedings, from the filing of the petitions of the heirs of Vidal in this court to this date; and that the defendant is hereby decreed to pay the same; and if he fails, after due notice in writing of the costs taxed, that execution issue for the same.

Given under our hands, at Pensacola, in the Executive Chamber, this 8th day of October, 1821.

JOHN C. MITCHELL,
ANDREW JACKSON,
Governor of the Floridas, &c.

Attest:

JOHN COPPINGER CONNOR,
Clerk of the Executive Court.

No. 24.

Extract from the Spanish records in the case of Vidal's estate.

On the 25th of May, 1806, Nicolas Maria Vidal, auditor of war in Pensacola, died suddenly. Colonel Folch, then Governor of the province, caused the necessary seals immediately to be affixed, inventories to be made, and all other requisite formalities to be practised as *ab intestato*, as no will was found among his papers.

On the 30th June of the same year, (1806,) Cristoval de Armas presented himself in Pensacola, and exhibited to the military tribunal a will of the deceased, made in New Orleans on the 4th of May, 1798, before Peter Pedesclang, notary public, in which he recognises and names as his natural heiresses, in the event of there being any thing to divide after the payment of his debts, four natural daughters: two of whom he had in Carthagena, one by a negro woman, and the other by a mulatto woman; and two in New Orleans, by a mulatto woman named Euphrosyne Hisnard. He names the said Cristoval his executor and administrator, with power to act without judicial intervention, and to sell his effects, realize his property, and pay his debts. This will was declared valid by the court in New Orleans, and also by the military tribunal of Pensacola, which accordingly granted letters of administration to the said Cristoval. He immediately proceeded to the appraisement and sale of the effects of the deceased, which were already inventoried. He examined, recognised, and declared valid all the notes and obligations of the deceased; as, also, the accounts against the estate presented by the different creditors; of all which the original Spanish proceedings contain the most detailed evidence.

On the 18th of September, 1806, Mr. J. Forbes petitioned, in his own name, and that of the other creditors, for the sale of sixteen thousand arpents of land situated in the district of Baton Rouge, declared in the will to be mortgaged to Francisco Gutierez de Arroyo, for the payment of $4,000, and, inasmuch as the said Cristoval resided in a foreign country, that he might be ordered to give security, or deposite the amount of the effects sold. After some time, Cristoval applied to the tribunal to be exonerated from the charge of executor, which was granted. The tribunal considered it useless to name another administrator, as it was then ascertained that the estate was insolvent. The creditors continued acting and petitioning, each in his own behalf, although the court had decreed a meeting of creditors to treat and determine on every thing relative to the estate.

A meeting afterwards took place, at the request of the representative of the minors, for the special purpose of treating of the sale of the lands at Baton Rouge. They had been previously sold for cash. But, on the urgent remonstrances of the representative of the minors, the tribunal decreed the nullity of the sale, and ordered that they should be sold in fractions, and at one year's credit. A new sale accordingly took place. During the interval carrying into effect the decision of the court, Arroyo petitioned that the mortgage which he held for $4,000 should be paid in preference to the other creditors; which was accordingly done out of the moneys in deposite, in order to release the lands from this encumbrance; and Arroyo, in consequence, cancelled the mortgage.

In the mean time, Mr. Simpson, the agent of Mr. Forbes in New Orleans, having discovered some property there belonging to Vidal, had recovered, by a decree of the superior court of the Territory of Orleans, (a foreign country, in 1806, with respect to Pensacola,) the sum of $188. When the lands were sold, and after the terms of credit had expired, Mr. Forbes, in the name of the creditors, solicited the tribunal in Pensacola to authorize him to claim and to receive the sums for which the lands had been sold, and he accordingly received $4,129, the total amount thereof; and this sum was deposited with him until the formation of the accounts of the assets, and the *pro rata* share was assigned to each of the creditors by the judicial accountant appointed by the tribunal.

By the order of the tribunal, and agreeably to the judicial account, the *pro rata* shares were paid to the creditors, in obedience to the decree marked No. 1, receipts given, and the business considered at an end. Mr. Forbes, it appears, had no more agency throughout than as one of the creditors and as depositary of the funds of an insolvent estate. He neither claimed nor received any commission.

Things remained in that situation until, it seems, some time in 1817, a petition was filed by one of the minors to recover the original papers.

On the 20th of June, 1820, another petition was filed, by Mercedes Vidal, in her own name, and as agent of her sister Caroline, impugning the proceedings of the tribunal by whose order the estate of Vidal had been settled, and requiring John Innerarity, as attorney of the former house of John Forbes & Co., to furnish a statement of the accounts, &c., as may be seen by a reference to the petition itself, and the decree accompanying it. This decree, although purporting to have been notified to, and even to be signed by, the said John Innerarity, has never been notified to him, and is not signed by him, as may be ascertained by consulting the document No. 2.

This petition was followed by another, at the foot of which we find a decree which has been permitted to lie dormant from the 11th of August, 1820, until the 29th of August, 1821, without ever being notified to either party. In the mean time, auditor Suares, who had rendered those decrees, returned himself the whole of the proceedings to be packed up with the other military papers, to be delivered to the superior military tribunal at Havana, under the custody and responsibility of the military Governor of this province, and then left this country. General Jackson, &c. *Cætera desunt. Utinam!*

XII.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *December* 2, 1821.

I have had the honor of receiving, last night, your letter of the 26th of October.

That the President is pleased to be persuaded that my motives and intentions were entirely pure, requires from me, as an individual, the most heartfelt gratitude. In any other official situation but that of a judge, my duty ought, perhaps, to be confined to the simple expression of that gratitude. But, under my present circumstances, I humbly presume that I may be permitted not to disregard the important obligations which I conceive devolve on me as judge of the United States for West Florida. The necessity of settling, as far as in my power lies, subject to the control of higher authority, the abstract principle of right or wrong, not less than a due regard for the individuals, both the old and new inhabitants of West Florida, whose rights to their liberty and property are guarantied by the treaty, and who are deprived, some of their liberty, others of their property, by what I conceive the arbitrary and unauthorized judgment of incompetent tribunals, calls upon me most imperiously again to enter into the most minute investigation of the organization of the several courts of justice, which have assumed in West Florida a jurisdiction which I deem illegal, whether that illegality proceeds from a misinterpretation of powers conferred by the President; or from the illegality of the powers themselves, although actually given by the President; or from the unconstitutionality in some of the provisions of the act itself, in virtue of which the President granted those powers.

My very high respect for the President and for yourself does not permit me to send you, this day, a hasty, indigested sketch, upon a question of so much importance to the people of this country, and, indeed, to the United

States at large, and in which it is now my misfortune to differ in opinion with men with whom it would be my pride at all times to agree. What my opinion now is, and the reasons upon which that opinion is grounded, I fairly and candidly stated *sparsim* in several of my preceding communications. What, after a thorough investigation of the whole subject, my opinion will be, I will likewise state with the same frankness; and, whatever may be the result of that re-examination, I hope it will be received with an indulgence equal to the very profound respect with which it is offered.

On the 29th ultimo, the United States ship Hornet, Captain Robert Henley, with her prize the brig Centinella, carrying sixteen guns, arrived at Pensacola. Captain Henley communicated to me all the circumstances connected with the capture by him of the brig Centinella, and of the brigantine La Pensée, a prize to the Centinella, having on board two hundred and forty Africans. Why I declined assuming jurisdiction in these cases, you will see by a reference to my letter to Captain Henley, written before I had the honor of receiving your letter of the 26th of October; a copy of which letter, together with a copy of the letter of Captain Henley to me, I have the honor of sending you, enclosed. My declining to assume jurisdiction in this case has created here not a little excitement. My doing too little now, as they think, has subjected me to the same acerbity of reproach as my doing too much, as they conceived, on another occasion; and, no wonder: although the cases are different, the motives for displeasure in both cases are the same.

I have the honor to be, with great respect, your most obedient, humble servant,

ELIG. FROMENTIN.

The Hon. JOHN QUINCY ADAMS, *Secretary of State.*

[Enclosure in XII.]

Mr. Fromentin to Captain Henley.

SIR: PENSACOLA, *December* 1, 1821.

In compliance with the desire expressed to me in your letter of this morning, I have no hesitation in giving you, in writing, the reasons by which I am induced to decline assuming jurisdiction in the case of the brig Centinella, a prize to the Hornet, and of the provisions on board of her.

The act of Congress for carrying into execution the treaty between the United States and Spain has extended to the territories of West Florida the laws of the United States relating to the revenue and its collection, and the laws relating to the *importation* of persons of color; by which word *importation*, I must understand importation within the limits of West Florida, and that part of East Florida which lies westward of the cape. This is not the crime for which the Centinella was captured by you, and brought in for adjudication. I understand from you that the captain and crew of the Centinella have been brought in by you as guilty of the crime of piracy, committed in or near Cumberland harbor, in the island of Cuba. Had the crime of piracy, connected with and inseparable from the act of importation of people of color, been committed within the limits of the jurisdiction assigned to me by my commission, the question would have been different; but it is not now necessary to examine that point. In the present case, I am satisfied that, under the provision of the act of Congress above recited, extending to the ceded territories the laws relating to the importation of persons of color, I have no jurisdiction.

How can I claim and assume jurisdiction in virtue of the Spanish laws declared to be still in force in this country, under the general judicial powers vested in me by the above-recited act, and by my commission under it? If no other consideration should induce me to hesitate, the summary mode of proceedings prescribed by the Spanish laws in cases of piracy does not agree with my idea of the obligations imposed upon a judge of the United States in a trial for a capital offence; and, under my full conviction that (the act of Congress to the contrary notwithstanding, by which the Spanish laws are maintained in force,) all the laws of Spain which are in manifest opposition with the security warranted to the accused by the constitution of the United States cannot be included in the catalogue of the Spanish laws remaining in force in this country, (because Congress, not having the right to pass laws abridging that security, cannot of course have the right to adopt or maintain those laws, not for half an hour, much less for months, in any part of a territory become a part of the United States,) I could not reconcile it to myself, under any circumstances, to apply the principles of the Spanish laws to the case of the Centinella and her crew. Besides, if ever I had jurisdiction, I could not now exercise it. There is in Pensacola neither a marshal nor attorney of the United States. What irresponsible officer, if the law did allow it, ought, or would be willing, to take it upon himself to secure one hundred and twenty men accused of a capital crime, in a place which does not afford the means of properly securing a dozen petty offenders?

Under these circumstances, I am of opinion that the Centinella ought to be sent, without delay, to New Orleans; that an express be sent immediately, either by land or by water, to Commodore Patterson, in New Orleans, to desire him to send down to the Balize a ship or steamboat, with a sufficient guard to receive the prisoners now on board the Centinella; or to send a sufficient number of men to man the Centinella, if she can be got over the bar; so that the officers and men of the Hornet, now on board of the Centinella, may be returned, without delay, on board of the Hornet. It will be necessary that either yourself, or some of the officers of the Hornet, thoroughly and legally acquainted with all the facts, should go at the same time with the Centinella to New Orleans, in order there to give the information to the attorney for the district of Louisiana, and to make the necessary affidavits, &c.

I have the honor to be, with great respect, sir, your most obedient, humble servant,

ELIG. FROMENTIN.

ROBERT HENLEY, Esq., *Of the U. S. ship Hornet.*

XIII.

Judge Fromentin to the Secretary of State.

SIR: PENSACOLA, *December* 9, 1821.

In compliance with the engagement in my last letter to you, dated the 2d instant, I have the honor of sending to you, enclosed, an exposition of my motives for still adhering to the construction I originally gave to the act for carrying into effect the treaty between the United States and Spain.

If, after the serious, and, I may fairly add, disinterested re-examination of this question, I have come still to a wrong conclusion, I ought not to dissemble from you my stubborn incapacity. I am unwilling to be valued more than I am worth. I will not add, either by unfounded pretensions, or by a system of studied concealment of the reasons by which I act, to the number of swindlers of reputation.

I have the honor to be, with great respect, sir, your obedient servant,

ELIGIUS FROMENTIN.

The Hon. J. Q. ADAMS, *Secretary of State.*

Exposition, &c.

In expounding a law, I deem it all-important to ascertain, if practicable, the motives of the Legislature in enacting it. This once done, the construction of the law is stripped of all its difficulties.

The act for carrying into effect the treaty between the United States and Spain does not admit, in its construction, of the slightest doubt. The Legislature itself declares, in the second section of the act, that it has created certain offices for maintaining the people of the ceded territories in the enjoyment of their liberty, property, and religion, in conformity with the clause in the sixth article of the treaty, which secures to those people the enjoyment of all the privileges, rights, and immunities of the citizens of the United States.

Now, where shall I look for those privileges, rights, and immunities? In the only place in which they are to be found—in the constitution of the United States. But here I am to be stopped at once. The constitution is not, I am to be told, extended in express terms to the Floridas; and it is not to be construed as being extended by implication. But does the act of Congress create, in express terms, the office of Captain General of the island of Cuba? Does it create that office even by implication? and, if it did, is it only the doctrine of oppression which is to be received, in a country under the Government of the United States, by implication? Are a Captain General of the island of Cuba, a Governor of the same island, an Intendant, a Supreme Judge, &c., with whose undefined duties and authority (that prolific nursery of despotism) no person in the United States, it seems, was acquainted, to be unblushingly smuggled into the Floridas under the auspices of the star-spangled banner? And when, in obedience to the imperious call made upon him by the same act, the valiant, the legitimate knight of American liberty, the bold asserter of American freedom, the writ of *habeas corpus*, presents himself, he is to be refused admittance! Away, away!—We know him not. Crucify! crucify!—Yes, sir, if in this most sacred cause, (sacred next to the cause of religion itself,) I may be allowed to use the words of the Scripture, "He came unto his own, and his own received him not."

Great, no doubt, and imposing, are the names of some by whom that doctrine is advocated. But still, both in my judicial capacity, and in my character of an American citizen, I must beg leave, most respectfully, but most unequivocally, to protest against the liberticidal doctrinal.

Sir, the Captain General and Governor of the island of Cuba had no duty to perform in the Floridas, except a sort of general honorary rather than efficient right of superintendence, in receiving, in their capacity of superior military officers, occasional reports from the Governors of the two provinces of Florida, and making their report accordingly to their Government; which general duty of superintendence, from the moment of the transfer of the Floridas, I humbly presume, necessarily devolved on the administration of the Federal Government. You, sir, in that respect, are the proper Captain General of the island of Cuba. This duty of superintendence, with the occasional obligation of appointing temporarily a Governor in either of the two provinces of Florida, in case of the death or other disability of either of the incumbents, constituted the whole of the authority of the Captain General and Governor of the island of Cuba over these provinces. Unless, then, it can be contended that the Captain General and Governor of Cuba was appointed for the purpose of enabling the Governor of the Floridas to report to himself as Captain General and Governor of the island of Cuba, or after his death to appoint another Governor in his place, it is impossible for me to conceive what we have to do here with a Captain General of the island of Cuba.

The duty of the Intendant of the island of Cuba is confined to the superintendence of the royal revenues, and to the management of the royal domains. But, in this same commission, which creates General Jackson Intendant of the island of Cuba, he is expressly prohibited from interfering with either the revenue or the dominions of the United States; thus, it seems, we have no more to do with the Intendant than with either the Captain General or Governor of the island of Cuba.

However, deriving, as General Jackson does, his high judicial authority from his title of Captain General of the island of Cuba, let us see how these pretensions agree with the Spanish law on the subject. Under the old form of government, the Captain General of Cuba was *ex officio* president of the *real audiencia*, sitting at Port Principe, in the island of Cuba, where, I believe, he never attended. But, if he had attended in his capacity as president, he only had the casting vote in case of an equal division of the judges, not less than fifty or sixty in number. But that right of presidency *ex officio* (a mere honorary right) did not vest in him, to be exercised singly, a particle of judicial authority in civil or criminal matters. Except when on that bench, he neither claimed nor exercised any judicial functions but in military matters, where he presided in the court of appeals in Havana. This, so far as respects the judicial functions of the Captain General and Governor of the island of Cuba, was the state of things under the old government of Spain. Things have been radically changed by the proclamation of the new constitution of Spain, in the spring of 1820, both in Havana and in Pensacola. Under the new constitution, both the Captain General and Governor of the island of Cuba, and the Governors of the two provinces of East and West Florida, who, with the assistance of the auditor of war, exercised, under the old form of government, each in their respective provinces, judicial functions, have been deprived of *all* judicial authority, except in military affairs; and those duties are now to be discharged by judges expressly to be appointed for that purpose. Upon what foundation, then, does General Jackson rest his claim to the high dignity of a supreme judge, a chancellor, &c.? which high offices, it seems he would give us to understand, have been smuggled in the same package with the Captain General and Governor of the island of Cuba.

It is, then, very evident that General Jackson, under his commission as Captain General, &c. of the island of Cuba, cannot claim and exercise in this country any judicial authority. This ought to be a sufficient answer to General Jackson himself, who, ostensibly at least, does not claim any judicial power but under his commission as Captain General of Cuba. But let us examine that question further, and see whether, under the act of Congress for carrying the treaty into effect, he cannot possibly be vested by the President, in virtue of an additional commission, which nobody has seen, with judicial powers.

The act for carrying the treaty into effect says that the "military, civil, and judicial powers shall be vested in such person and persons," &c. Let us then inquire, first, whether, under that law, he can be vested with the judicial authority; for if he cannot be, we must necessarily conclude that he is not: and if, notwithstanding under the law he could not be vested with those powers, still it should turn out that he was vested with them, the result would be the same: the appointment would be an illegal one, and, of course, null and void; and, in my judicial capacity, I should feel bound to resist it.

Now, then, was the civil power, as contradistinguished from the judicial power, vested in General Jackson? Most indubitably. You would laugh at me if I were seriously to ask whether the military power was vested in him—I mean whether he exercised it; for whether vested or not, if he exercised it, my argument holds equally good; the object of the act of Congress being to prohibit the exercise of those three powers by the same person. Whence it follows, evidently, that the judicial power could not be vested in him; or, if it was, it was vested improperly; and I deem it my duty to consider it as not vested at all.

So far, then, as respects any judicial powers exercised in the Floridas by General Jackson himself, I have no hesitation in pronouncing them—no matter in virtue of what commission he may contend he had a right to exercise those powers—a usurpation, not only not warranted, but expressly prohibited, by the act for carrying into effect the treaty between the United States and Spain.

Another question, and a most important one, is now to be examined. Is there in the law any authority, which, by the most far-fetched mode of reasoning, can be construed so as to vest in him, or to authorize the President to vest in him, legislative powers; and thus to authorize him to create courts of justice, to assign them a jurisdiction unknown in the country, and to give him the right to vest in others any judicial authority—any authority differing essentially from the authority *exercised* by the officers of the *existing* Government of the ceded territories?

Those rights, then, not being explicitly given, recourse must be had to this, in favor of oppression, only favorably-to-be-received doctrine of right by implication. Again we must draw upon this inexhaustible Captain General and Governor of Cuba, &c. &c. &c. &c. But even that resource fails. Neither under the old government of Spain, nor under the present Spanish constitution, has the Captain General, or any of his twin brother officers, all incorporated in the person of General Jackson, ever had the right of creating a court of justice. If, then, the right of creating a court of justice be not derived from the powers appertaining to the Captain General of Cuba, &c., whence is that right derived? Certainly not from the act of Congress, which, so far as respects judicial powers, vested in the President alone the right of appointing a judge, who is to be a different person from the civil and military officer or officers, and who is to exercise his duty in such manner as the President of the United States shall direct. Now, all this has been done. The President has done me the honor to appoint me, and in my commission he has prescribed the manner in which I am to execute my duty. The law is satisfied.

I have, I think, demonstrated above that the law did not authorize the President to confer any legislative powers upon General Jackson. On the other hand, (which, by the bye, would by no means alter the illegality of the trust,) those legislative powers assumed by General Jackson cannot be traced to even the illegitimate source of any legislative powers enjoyed either under the old government of Spain, or under the present Spanish constitution, by any of the many offices, the rights and duties of which General Jackson conceives did centre in him. The creation of this court, then, is an unwarranted assumption of undelegated powers; and the persons who pretend to sit as judges under the appointment of General Jackson are guilty of usurpation, and, under the laws by which this country is at present governed, responsible to the parties in damages.

There is, sir, a particular feature in this transaction, which, if I understand your letter correctly, strikes me, and I am sure must, upon reflection, strike both the President and yourself, as a most extraordinary one. When I first was informed that the President had done me the honor of conferring on me the appointment of judge of the United States for West Florida, I was induced to give to myself an account of the probable motives of the selection made of me; and, understanding that the Spanish laws were provisionally maintained, I came to the conclusion that the President had deemed it proper and convenient to select, for administering the Spanish laws in Pensacola, a judge from among the members of the bar of a country where the same laws, so far as they are not contrary to, or repugnant with, the constitution of the United States, are still in force, and who, of course, was supposed to be acquainted with those laws which he was to administer. An additional motive, perhaps, I thought, in appointing me (a stranger by birth) to that high office, in a country which, I am sure, it was the intention of the President to conciliate, might have been to satisfy the people of that country, by my example, that the promises held out to naturalized citizens by our free constitution were not vain and empty promises, but real substantial benefits and advantages, which the extreme liberality of our political institutions threw open to them as well as to the natives of the United States, from the moment that the Government of the United States, by taking possession of the Floridas, had recognised them as citizens of the free American republic.

Judge, then, sir, what must have been my astonishment, when I read in your letter that the general commission sent me is considered and intended to apply only to the execution of the laws respecting the revenue and the importation of people of color! and that the President considered it his duty to intrust the execution of the Spanish laws, declared to be still in force in this country, to officers specially appointed for that purpose! I am lost in amazement. What officers have been specially appointed for the purpose? None have been appointed by the President. General Jackson, I have proved, had not the right to appoint any; and yet now Pensacola exhibits the strange, very strange spectacle, indeed, of a court of unlimited jurisdiction in both civil and criminal matters; of a court without the assistance of a jury in civil matters; of a court without appeal—which court consists of three or four men, professedly not understanding a word of the language in which the laws which they are sworn to administer are written; men who have never before lived under the administration of those laws, and not prepared, by a previous education, to draw the information they are deficient in from the original sources in the Latin language, from which many of those laws are derived. Good and true men, sir, who indubitably mean well. But still, sir, suppose them angels: is not their ignorance of the language in which the laws are written an insuperable bar to their appointment? Only think, sir, of the Governors of Virginia and Massachusetts appointing as judges of a court of unlimited jurisdiction, without appeal, four Spaniards entirely unacquainted with the language in which the laws of Massachusetts and Virginia are written! Or, indeed, if this appears to you rather too shocking, suppose the Governor of Pennsylvania should appoint to administer the laws in Philadelphia four Germans from the county of Lancaster, who do not understand a word of the English language! You smile at the comparison; yet let the difference be pointed out. Is this justice, sir? Is it not, on the contrary, the prostration of all justice? There must be some misunderstanding. I cannot believe, sir, that the President or yourself can be acquainted with the facts which I have detailed. It cannot be, sir, that the administration of the Government of the United States can sanction such proceedings. The American people will shudder when they hear of it; and posterity, disposed always to believe almost every thing, will refuse to believe that. The more I reflect on the subject, the more I am bewildered; and yet, if General Jackson had a commission from the President authorizing him to act as he has done, how is it, since he thought proper to exhibit another commission, that that commission was not exhibited by him on the occasion of the celebrated question of jurisdiction in the case of the heirs of Vidal *vs.* Innerarity? Why, on that occasion, exhibit a commission under which he certainly can claim no part of the extraordinary judicial powers which he has exercised here? Why the many elaborate efforts to establish, by unavailing reasonings and by false facts, a jurisdiction, which even an illegal and unconstitutional commission, if he had exhibited it, would have established so as to answer, at all events, all his then purposes? Sir, has the generous zeal of the President betrayed him, in order to save a man who once * * * *, but who now, I fear, cannot be saved except by the sacrifice of the country, in now assuming upon himself a heavier responsibility than he has really incurred? I hope the suggestion may be forgiven. It would be the fanaticism of charity, and Mr. Monroe will pardon me for believing that he is capable of it.

The question, however, in any state of things, still recurs: Are the judicial powers exercised by General Jackson in West Florida, either by himself, or by persons appointed by him, (no matter from what source they spring,)

legal powers? To that question, after the most solemn and dispassionate examination of the case, my conscience answers—no. As long, then, as I shall be permitted to retain the commission with which I have been honored by the President, I must continue to consider myself as the only judge in Pensacola. Indeed, every appointment to a judicial office in West Florida, anterior to mine, derived from a commission for particular purposes from the President, I must consider as entirely superseded by my commission, which is expressed in the most general terms, and which commission is predicated upon an act of Congress, recognising in the Floridas the existence of a particular code of laws, which it would be strange, indeed, if a general and unlimited commission under that very act should not reach.

I hope, sir, my zealous examination of, and the earnest and free expression of my sentiments on, this question, will not be attributed by you to motives taking their impure source in committed or disappointed self-love. No, sir; self, I assure you, has never been further from me than, since I am in Pensacola, in almost every stage of this very extraordinary, and to me very disagreeable business; self would have dictated a line of conduct very different from the line I pursued. I consider this question only with reference to the rights secured to the people of this country by the treaty, and to the obligations assumed by the Government towards those people by the same treaty.

When I reflect that not less than one hundred suits, both civil and criminal, have been already tried—tried? no; I ought to have said decided—by the court appointed here by General Jackson, I am struck with terror at the rapidity of the torrent of endless litigation which is likely to overwhelm in a common ruin the honest citizens of this country, who have not been the victims of the other tyrannical measures pursued here by General Jackson. And can this be the accomplishment of the expectations held out by a law expressly passed for maintaining the inhabitants of the ceded territories in the free enjoyment of their liberty, property, and religion?

Sir, conscious, as from what precedes you must be sensible I am, that the President has no right to constitute a North court, such as existed in Great Britain under Charles I.; or a court of exchequer, which I do not conceive created by a law which I understand as giving (as is done every day) jurisdiction in matters of revenue to a court created for the general purposes of a court of justice in the United States; or a prevotal court, such as was occasionally established in France; and that the words of the section of the act, "and shall be exercised in such manner as the President of the United States shall direct," cannot relate but to the manner of exercising the given powers, not to the right of vesting those powers; that the words of the law are intended to prevent the continuation of possible abuses supposed to exist, not to create new and unheard of-abuses—that, for instance, with respect to the judiciary, if a practice had prevailed, as many persons supposed it still did, of taking the evidence of witnesses in private, the President should, under that clause of the law, direct it to be taken in open court; conscious, further, that if, *per impossibile*, the President could originally claim the right, under the words of the act I have quoted, of dividing the judicial duties to be performed, some by some under the Spanish laws, others by others under the two acts of Congress mentioned in the law, yet, after giving a general commission which embraces the constitution and the laws of the United States, (of which laws the act for carrying into effect the treaty between the United States and Spain, under which I am appointed, is one,) the President cannot have the right afterwards of abridging that jurisdiction—I am bound, and, of course, must here declare, with unfeigned and profound respect, my determination to maintain the right vested in me of administering here the laws of Spain, which, being neither in opposition to nor repugnant with the constitution of the United States, are still in force in the Floridas; and, under the powers thus vested in me, since the right is refused to introduce the writ of *habeas corpus* in the Floridas under the protection of the American, I will introduce it under the protection of the Spanish constitution.

Flectere si nequeo superos, Acheronta movebo. I regret it, sir—bitterly regret it; the Genius of American history will drop a tear in penning the page which is to record this singular political phenomenon. But if the people of the Floridas cannot be protected in their liberty and property, as of right they ought to be, by the constitution of our country—by the constitution of their country—they shall be protected, as far at least as my weak powers may avail them, by the constitution of Spain—by the constitution of their former country. Give me leave, sir, to refer you to the 11th section of the 172d article of the Spanish constitution; and further, among many others containing an analogous doctrine, to the articles 247, 251, 254, 287, 295, 299, 306, 312, and 371 of the same instrument.

By these several articles, sir, as fundamental laws still in force here, *mutatis mutandis*, test the conduct of General Jackson here; and, instead of making him simply a Captain General of the island of Cuba, &c., suppose him King of all the Spains, if you will; and even then he must be crushed under the ponderous weight of the loudly accusing authorities against his unprecedented despotism; and by the same authorities I must be supported in my strenuous exertions to screen the victims of his fury. And whether I used, in order to enforce my authority, the forms of what we call in the United States a writ of *habeas corpus*, or whether I issued any other order which a Spanish judge might have issued under similar circumstances, for the purpose of obtaining the same end, I feel, and I sincerely hope, sir, the President and yourself will, upon reconsideration, feel satisfied, likewise, that I have done every thing in my power to enforce obedience to the law, and that, in doing so, I have not gone beyond, but have kept myself strictly within, the limits of the legitimate authority intrusted to me by the President.

Sir, this communication being likely to close our correspondence on the subject of the difficulty between General Jackson and myself, (believing, as I do, that Congress will have legislated for the Floridas probably before this reaches you,) it may not be improper, perhaps, for me to add here a few observations in support and in vindication of the severe language I have been compelled to use in speaking of the conduct here of General Jackson. Sir, I am no miniature, no water-color painter. What I strongly feel, I must express strongly; and, accordingly, I reflect with pride on the strong expressions of gratitude which, in common with every American citizen, I bestowed on the achievements of General Jackson. Not one of the members with whom I had the honor to serve in the Senate of the United States will accuse me of having been deficient, so far as my feeble, very feeble, exertions and my vote could go, in the manifestation, in every possible shape and form, of the national gratitude to the man in particular under whose auspices the British had been obliged disgracefully to withdraw from the shores of invaded Louisiana.

When, on a later occasion, General Jackson made himself amenable to the severity of the laws of his country, for the perpetration of crimes—the forerunners of the crimes which he has since committed here—the measure of my gratitude to the conqueror at New Orleans was not yet exhausted. I rejoiced in my heart that the tribunal before which he was arraigned, and of which I was a member, could not, in my opinion, constitutionally take cognizance of the crimes with which he was charged; and thus, reconciling the imperious obligations of my conscience with the next to that imperious duty of my gratitude to the man who had rendered an essential service to my country, upon the ground of want of jurisdiction, I was found in the foremost ranks, and, if not among the ablest, I am sure among the most zealous, defenders of General Jackson.

Ever since, both in my public and private character, General Jackson's name was never pronounced by me but with the high respect his past services called for. I was proud to be associated with him in the pleasing and honorable task of initiating our new brethren of the Floridas into the enjoyment of the privileges, rights, and immunities of the citizens of the United States.

Even, sir, since my arrival in Pensacola, although a more intimate acquaintance with the man, whom I knew before principally from the rumors of fame, had, in a great measure, sunk the hero; notwithstanding I had heard his frequent imprecations, and his repeated determination to rule by the bayonet—by the bayonet!—a people the most devoted the most honest, the most inoffensive—of not one of whom, during his stay here, I venture to assert, he had the slightest reason to complain, and in point of numbers, too, the most insignificant; still, such was my blind infatuation, that, contrary to the dictates of my sounder judgment, my gratitude took the lead, and succeeded in persuading me that such language, improper as it was, was nothing more than the evaporating ebullitions of an overboiling temper, which never were to be followed by any dangerous results.

What, then, must have been the conduct of the man who, in spite of all those favorable prejudices, has wrested from me expressions of execration and abhorrence, which, upon now reviewing his acts, appear to me too feeble and too nerveless for the nefarious occasion! I hate tyrants in every shape; but I know of no words to express my detestation of an American tyrant. Sir, by my masters in the art of portrait painting, I have been taught that, in the delineation of characters, the writer ought to take into consideration not the acts only, but the motives, the occasion, the aggravating or extenuating circumstances, the provocation, the policy, the real or apparent necessity—in fact, all and each of the reasons by which men may be induced to act. All those circumstances, then, connected with the acts of General Jackson here, I took into consideration—his birth, his education, his pursuits, his civil and military employments, his long life under a republican Government, his glory—yes, sir, his glory; a noble, once, now the worst, very worst, feature in his character—his glory, which concatenated him with the glory of his country by an adamantine chain; well, even that adamantine chain of glory he has in sunder rent.

What consideration of comparatively frigid duty can check in his mad career the man who could not be checked by the glowing enthusiasm of his own noble deeds? I say nothing here of his former crimes; they would load the canvass, without adding to the effect of the picture. Those crimes, the disgustingly rich subject of another picture, themselves are without physiognomy alongside of the sacrilegious profanation of his own fame. And for what have these invaluable sacrifices been made? That he might play the tyrant over his fellow-citizens—his fellow citizens whose happiness had been intrusted to him by the President of the United States, whose happiness he had sworn to promote.

One word more, and I have done. The question now to be decided is not the insignificant and unimportant question of the difficulty between General Jackson and myself. It is a question of country or no country; constitution or no constitution; liberty or slavery. The despotism which attacks the liberty of one of the meanest of the inhabitants of this country, makes an attack upon the liberty of all. Every tyrant began his career by rendering eminent splendid services to his country. Cæsar had conquered the Gauls, subdued a part of Germany, and even pointed out Great Britain to the ambitious cupidity of his countrymen, before he turned his parricidal arm against Rome itself. I speak not this now with reference only to the present occasion. But, sir, tyrants beget tyrants. Beware!

N. B. It appears I was in error in stating the number of suits decided. From a reference to the docket of the court, it seems the whole number of suits filed is one hundred and twenty, of which between sixty and seventy only have been decided. Appeals, it seems, are still carried on before the acting Governor.

XIV.

Mr. Fromentin to the Secretary of State.

SIR: PENSACOLA, *December* 17, 1821.

I have the honor of sending you, enclosed, the opinion of Mr. Acre, the very able and upright counsel of Mr. Innerarity.

In my last communication to you, I made a mistake in stating the number of the judges who constitute the *real audiencia* at Fort Principe. Although I have no positive means here of ascertaining the real truth, yet, from information obtained since I wrote, I believe that I greatly exaggerated their number.

I omitted, likewise, to state that the Governor of Cuba, assisted by the auditor of war, enjoyed, under the old Government of Spain, the same judicial powers, to be exercised within the country under his immediate jurisdiction, which were enjoyed by the Governors of both East and West Florida.

This mistake of mine on one side, and omission on the other, do not, however, affect in any way my reasonings, nor the conclusions I have come to with respect to the jurisdiction of the Captain General and Governor of the island of Cuba, so far as the jurisdiction claimed by General Jackson here is concerned.

I have the honor to be, sir, with great respect, your most obedient servant,

ELIG. FROMENTIN.

The Hon. J. Q. ADAMS, *Secretary of State.*

[Enclosure in XIV.]

HEIRS OF VIDAL, *vs.* JOHN INNERARITY. } *In the Supreme Judicial Court of West Florida.*

OPINION.

At the request of the defendant, I have examined the report of the auditors, to whose investigation the merits of the above-entitled cause were submitted, and, having given the best consideration I am capable of, I now proceed to offer my views of the law on the points whereon the auditors have differed. The question thus made for the consideration of the court is, whether there is sufficient proof of the payment, by the house of Forbes, of the sums adjudged by the tribunal to Eslava and Le Blanc, as the dividends of the claims against the estate of Vidal. This question must be answered by the rules of evidence established by the laws of Spain, and recognised by her tribunals of justice. By that law, mercantile books, regularly kept, prove their contents, and are evidence of the claims of the merchant against his debtors to any amount, provided they appear to have been fairly kept, and contain in themselves nothing so suspicious as to counteract the *prima facie* evidence which the civil law, or law of Spain, declares them to be; and the courts of justice will always enter up judgment for the amount thus by them appearing to be due. In Louisiana, this rule of the civil law is modified and narrowed by statute, which requires that the merchant books should contain the *parafe* of the merchant on the margin of each page, made every Saturday night before a notary public, in order to make them evidence. And even by the common law, which is more strict in its rules than any other system of jurisprudence, the entries in the books of merchants can be proved by the clerk

who kept them; and, if he be dead, or beyond the jurisdiction of the court, proof of his handwriting is always admitted, and is conclusive as to the correctness of the entries, and to the truth of their contents. Testing the question made by the report of the auditors by the rules of evidence, either of the civil or the common law, how does it stand? It appears by the books of the house of Forbes, which, according to the civil or Spanish law, if regularly and fairly kept, prove the truth of their contents, that there are long accounts current, and to considerable amount, with Le Blanc and Eslava, and that these two gentlemen are credited by the amount of the dividends assigned them by the tribunal of 1810: hence, the claims of the house of Forbes against them are less by the amount of those sums put thus to their credit, and, consequently, they have received and have had the full benefit of those sums, inasmuch as they have gone to the lessening of the amount due by them to the house of Forbes. And if, at common law, they were sued by the house of Forbes for the amount of their accounts, proof of the handwriting of the clerk (if dead) who made the entries would be received, and judgment entered against them for the amount appearing to be due after deducting the credits; and if those credits would be allowed them in a suit brought on their account, it follows, as a natural consequence, that they have received the full benefit of those credits from the moment they were given; or, in other words, that the amounts with which they have been credited were paid to them the moment they were put as an offset against their debts. Therefore, in every point of view in which I have been able to consider this case, whether I test it by the rules of evidence acknowledged by the Spanish law, or by those recognised by the English law, my mind is led to the inevitable conclusion that there is sufficient and ample proof that the sums of money assigned to Eslava and Le Blanc, as the dividends of their claims against the estate of Vidal, have been paid to them, and that, therefore, they can have no claim against that estate for those dividends they have thus received; and, consequently, neither that estate, nor any one interested therein, can have any claim against the house of Forbes for these moneys. Such is certainly the law, and such, it is humbly conceived, ought to be the judgment of the court made upon this point by the auditors.

It will be remarked that all I have hitherto said is predicated on the supposition that the books containing the entries in question have been regularly kept. To ascertain this fact, (and it is an important one, as on it depends, I consider, the means of arriving at truth, and coming to a correct decision,) perhaps it might be proper to submit them to the inspection of intelligent merchants, and to receive their report as proof of the fact.

On the subject of the $200 paid to E. Livingston, of New Orleans, for professional services, my mind, on the first impression, was induced to concur with the report of the auditors, and to believe that it ought not to be allowed to the house of Forbes in the settlement of their accounts with the estate of Vidal, inasmuch as every client is responsible to his counsel for his conventional fees; but, on reflection and mature consideration of the matter, I am pretty well satisfied that, in this particular, I was mistaken, and am now inclined to think that this sum too must, according to law, be allowed. I am brought to this conclusion from the following facts and reasons arising thereon:

The suit instituted by Mr. Forbes was brought by attachment against the goods of Vidal, in New Orleans, in the State of Louisiana, where the civil law has been adopted; whereby the defendant, when judgment goes against him, is considered *in delicto*, *i. e.* in fault, and, therefore, is decreed to pay all the costs and charges which by that fault have been incurred in compelling him to do right; and the practice of the courts of Louisiana has uniformly been, I believe, in all suits against absentees, to appoint counsel to defend them, and, out of the proceeds of the property attached, to decree a sufficient sum for the payment of all the expenses incurred in the suit on both sides.

By the record in this case it appears that the sum paid to Mr. Livingston was paid to him by the sheriff, under an order by the court, out of the funds produced by the sale of the goods attached; and this order was, no doubt, entered in conformity to the practice of the court on similar occasions. If such is the law, and such the practice of the courts of Louisiana, it is evident that the payment of these $200 was an act of the court, over which Mr. Forbes had no control, and, therefore, he ought not now to be called on to pay, from his own funds, a sum of money which a court, having jurisdiction of the matter, had ordered to be paid by another party. The record of that cause imports absolute verity as to the facts contained in it, and the judgment of the court rendered on those facts cannot be inquired into by the tribunals of another jurisdiction. That judgment is, that the estate of Vidal should pay the charges, viz: $200, incurred in compelling it to pay its debts; and how can a court now, of a different jurisdiction, possessing no powers of review, reverse the judgment of that tribunal, and make a different order as to the subject-matter it had under consideration?

No judgment whatever can be legally given in this case in favor of the devisees of Vidal, (for they are not heirs, as erroneously called in their petition and proceedings in this case,) because, from the distribution of the assets of his estate, in 1810, as well as from the report of the auditors recently made, it is evident that the estate is insolvent, and, therefore, that nothing is left for the devisees, who can never take any thing in prejudice to the creditors; it being a maxim of law, as well as a very commonplace one of morals, that "a man must be just before he is generous;" in other words, he must pay his debts before he gives legacies; and if judgment cannot be given in favor of the devisees or petitioners, it is conceived that the cause cannot be taken up for the benefit of the creditors, because they have not asked it, and are fully satisfied, as is manifest from their putting in no claim. And it would be a strange anomaly, and a most singular phenomenon in jurisprudence, to see a court voluntarily and gratuitously pursuing the *fancied* interests and enforcing the *imaginary* claims of persons who have not said they have any, and who have certainly never asked its interference.

Having considered the report of the auditors, I proceed to offer some remarks on that part of the judgment of the court which decrees interest on the sum of $683 06, from the 20th November, 1810, on the supposition that, at that time, a final settlement of the estate of Vidal took place, and the house of Forbes was ordered to pay over the deposite in their hands, which the court supposes to be the sum above mentioned.

In decreeing interest, under the circumstances of the case, I am clearly of opinion that the court acted *unadvisedly*, and that a review of the facts, as they appear on record, would lead to a very different judgment.

The following statement of facts, verified by the record, will place the question of interest in a clear light:

In the year 1806, Don Nicolas M. Vidal, then late auditor of war of West Florida, leaving considerable of real and personal estate and many debts behind him, died in Pensacola.

By his will, he devised his property, after the payment of his debts, to two mulatto children, who are the present petitioners, styling themselves heirs.

His executor, Christoval de Armas, of New Orleans, sold his personal property, and, after the payment of mortgages on his real estate, there remained $2,645 25; which sum he having failed to give security for, as by law was required of executors residing out of the jurisdiction of the province, it was ordered by the tribunal, exercising the powers of a court of probates, to be deposited with the house of Forbes for safe keeping, for the benefit of the creditors, and until they should verify their claims against the estate.

A meeting of the creditors having been had, and the affairs of the estate deliberated on by them, the tribunal, in 1810, after having assigned to each one his dividend, ordered Mr. John Innerarity, the attorney of the house of

Forbes, to pay, within two months, to the creditors, the sums that had, by the judicial contador, been assigned to them as their dividends, viz:

To Euphrosyne Hisnard, - - - - - -	$1,379 00
To Terence Le Blanc, - - - - - -	209 31½
To the officers of the court, (collectively,) - - - -	512 06¼
To Miguel Eslava, - - - - - -	432 00
	$2,532 37¾

These sums, paid to the creditors according to the order of the court, deducted from the sum of $2,645 25 deposited, leave a balance in the hands of the house of Forbes of $112 87½; to which add the sum of $183 37½, received from New Orleans belonging to the estate, and the sum of $296 25 will remain of the deposite, against which the house of Forbes have a claim (which was allowed by the tribunal, in the distribution to the creditors, and which was a balance due on a note of hand given by Vidal to that house for borrowed money) amounting to $453 25; leaving a balance due by the estate to the house of Forbes of $157. Hence, there is neither principal nor interest belonging to the estate of Vidal in the hands of John Innerarity, the attorney of Forbes. And even if it were admitted that the sum of $645 25 was really in the hands of the defendant, as supposed by the court, it is evident that interest cannot be exacted on it, inasmuch as it is admitted to have been a deposite of the simple kind, which, being for the benefit of the depositor, and as a favor to him, does not draw interest until after a demand and refusal; and this sum belonging to creditors, who, if they have not received it, certainly have not demanded it, the court cannot, at the instance of third persons, having themselves no claim, decree interest to persons really entitled, who have not asked it.

It may be said that, if any injury has been done to the defendant, he is without remedy, and must submit to his fate, inasmuch as judgment has been entered, and the court cannot recall it. I answer that, though there is no court in this province having appellate powers, yet, as this is a tribunal acting under the forms of the civil law, and governed by the rules of practice, it is competent to the same court to review its own decisions. The same power which did the injury can repair the wrong. *Dissolvitur eodem ligamine quo ligatur.*

At common law, the court has control over its judgments during the term they are entered, and, if satisfied that complete justice has not been done in any cause tried during the session, the practice is to grant a new trial, and, on application to the discretion of the court, under such circumstances, has never been known to fail. And even if, after the end of the term, it is discovered that more complete justice would be attained by a new trial, though the court of common law cannot grant it, the same judge, exercising chancery powers, will, in his character of chancellor, award an injunction, and, on proof of the allegations of the bill, (reasons for a new trial,) will grant relief.

A court sitting under the authority of the civil law *has no terms; it is always open;* hence, it has the same control over its judgments, *at all times* before final execution, that a court of common law has during its terms. It also combines in its very constitution chancery and common law powers; so that a court thus constituted is competent to do whatever both courts, in the fullest exercise of their jurisdiction, could do. I therefore infer, from this view of the powers of the court, governed, as this is, by the rules of the civil or Spanish law, that there will be no hesitation in granting a rehearing. The petitioners cannot complain, because, if they are entitled to any thing, their right will not be diminished by justice being done; and, if they are entitled to nothing, they cannot, in common honesty, expect any thing. But, above all, when *justice* is the question, no technical questions, nor reasoning founded in fiction, should be suffered to impede her course; no considerations of *delicacy to predecessors* should restrain the hand that dispenses right. *Fiat justitia ruat cœlum.*

No. 1.

Adjutant General Robert Butler to José Coppinger, Governor of St. Augustine.

SIR: ST. AUGUSTINE, *May* 26, 1821.

I had the honor to inform you on the 24th instant of my arrival at this place, and of the powers with which I have been vested by the Government of the United States. It affords me much satisfaction to find, from the

short conversation I had on yesterday with your excellency, that our sentiments so well accord, and that our exertions will be mutual in affording every possible facility to a speedy and satisfactory termination of the official intercourse *anticipated* between us. In strict accordance with my instructions, it becomes necessary to ask officially of your excellency whether you have been furnished with any orders from the Governor General of Cuba authorizing the delivery of the province under your command to the commissioner appointed for its reception on the part of my Government. I beg leave to add, in conclusion, that I am prepared to commence the negotiation, and to comply with the stipulations of the treaty touching this subject in its full extent.

I have the honor, &c.

ROBERT BUTLER, *Adjutant General and Commissioner.*

To His Excellency JOSE COPPINGER, *Governor, &c., St. Augustine.*

No. 2.

The Governor of St. Augustine to Adjutant General Butler.

[TRANSLATION.]

ST. AUGUSTINE, FLORIDA, *May* 26, 1821.

In answer to the note of this date which you have been pleased to send me, I have to state that I am sincerely desirous that the business for which you have been appointed by your Government should be arranged in the most uniform and satisfactory manner to our Governments and to ourselves. I ratify, as I mentioned in our visit of yesterday, my being without the orders of my Government necessary to our treating on the delivery of this province, under my care, according to the treaty concluded by the United States and Spain; but which, while it impedes the opening a communication on the subject, can in nowise embarrass or straiten our individual relations. I will take the earliest opportunity of informing his excellency the Captain General of Cuba and the Floridas, on whom I immediately depend, of your arrival and mission, in order to the most speedy attention to your charge; assuring you, in the mean time, of the best wishes and attention within my power.

God preserve you many years.

JOSE COPPINGER.

By order of His Excellency:

GEORGE I. F. CLARKE.

ROBERT BUTLER, *Adj. Gen. and Com. U. S.*

No. 3.

[TRANSLATION.]

SIR: ST. AUGUSTINE, *June* 8, 1821.

I received yesterday despatches from his excellency the Captain General of the island of Cuba and the two Floridas, with competent orders to proceed to the delivery of this province to the commissioner authorized by the Government of the United States to receive it; and, as you have been pleased to inform me that you have come vested with that commission, I now give you notice of it, in order that the intended end may be accomplished.

Your obedient servant,

JOSE COPPINGER.

ROBERT BUTLER, *Adjutant General of the United States.*

No. 4.

Colonel Butler to the Governor of St. Augustine.

SIR: ST. AUGUSTINE, *June* 8, 1821.

I had the satisfaction to receive your note of this morning, in which you are pleased to inform me that you have received "competent orders" to arrange the delivery of this province to the commissioner authorized by the Government of the United States to receive it. As we now are the mutually declared authorities touching this business, and as, I presume, you are, as I am, satisfied in this official recognition, I shall at once conform to my instructions, by opening the subject generally, that no unnecessary delay may arise.

To enable me to comply with the provisions of the seventh article of the treaty lately ratified by our respective Governments, it becomes necessary to call on your excellency for a statement of the number of officers, both civil and military, and troops, for which I am to provide transportation to the Havana, and also to arrange the provisions for their subsistence; which, although not expressly mentioned in the treaty, yet the liberal construction which my Government is disposed to give to that instrument has induced the arrangement. It is desirable, also, to have a distinction drawn between those officers who have families and those who have not, as I feel disposed to afford as much comfort as possible, without departing from my instructions, in the arrangement of the transports. As this information is important to the immediate consummation of my preparatory duties, I hope you will give me early advices, to enable me to place myself subject to your wishes in the final arrangement.

To evince my respect for you personally, as well as officially, and feeling, as I do, every friendly disposition towards cultivating the happy understanding which exists between our respective Governments, I am induced to ask your excellency to embrace, in the form of a projet, 1st. *Your wishes* with regard to the manner and probable time of delivery of the province under your command; 2d. The subject islands dependant on said province; 3d. Public lots and squares; 4th. Public edifices; 5th. Fortifications, with their appendant defences; 6th. Barracks and other buildings, which are not private property; and, 7th. The archives and documents which relate directly to the property and sovereignty of said province, accompanied with a schedule of the property contained under the 2d, 3d, 4th, 5th, and 6th heads. The arrangements which may relate to the embarcation of our troops I shall leave out of view for the present, as I desire on this head to consult your wishes, in a conference, previous to entering of record and preliminaries touching that point; believing as I do that we can more satisfactorily meet each other's views by a conference than by written communications. As the projet which I have requested is, when complete, to be in the character of a general arrangement, destined to be passed for the information of our respective Governments, as an acquittal of the duties required of us, I feel the more solicitous that you should submit it, as the most particular evidence of the friendly disposition of the Government which I have the honor to represent.

I renew to your excellency the assurances of my distinguished consideration.

ROBERT BUTLER.

Governor COPPINGER.

No. 5.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

SIR: ST. AUGUSTINE, *June* 9, 1821.

Before satisfying each of the particulars contained in the note which, under date of yesterday, you did me the honor of sending me, I have thought it convenient to inform you, that, in the expedient that must be formed, to proceed to the delivery of the province under my charge, there must be inserted authentic copies of the treaty concluded between our respective Governments; of the royal schedule of the 24th of October last, that I have received for the delivery, and the rest of the orders appertaining to it; and likewise including that in which I am named and empowered by his excellency the Captain General of the island of Cuba and the two Floridas, in his name to make said delivery to the commissioner of the United States of America duly authorized to receive it; and although, individually, I am perfectly satisfied that you are the commissioner, notwithstanding, to proceed with all the circumspection requisite to so important a subject, I must, therefore, beg you to oblige me by sending the document in which you are authorized for said commission, a copy of which will be united to said documents, serving as preliminaries on the delivery and receipt, that will be done with all the solemnity possible. In the mean time, I shall communicate to you a knowledge of the other affairs which you demand, and always with the highest consideration and esteem for your person.

I have the honor to be, sir, your obedient servant,

JOSE COPPINGER.

ROBERT BUTLER, Esq., *Adjutant General U. S. Army.*

No. 6.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 10, 1821.

I have received your note of yesterday, in which you assign the reasons for not "satisfying each of the particulars" contained in my note of the 8th instant; and although it is believed, on my part, that a more summary mode would meet the views of my Government than what you deem necessary, growing out of your instructions, I readily acquiesce in the proposed arrangement, and have, therefore, herewith enclosed, for your satisfaction, my appointment as commissioner to arrange with your excellency the duties intrusted to our charge. In the mean time, I hope you will favor me with the information desired in the first part of my note of the 8th instant, relating to the arrangement of transports, at as early a period as may be convenient and proper.

With sentiments of great respect and esteem, I have the honor to be your obedient servant,

ROBERT BUTLER.

His Excellency JOSE COPPINGER, *Governor, &c., St. Augustine.*

No. 7.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

SIR: ST. AUGUSTINE, *June* 11, 1821.

I have received your note of the 10th instant, in which you enclose me your appointment as commissioner to receive, in the name of the United States of America, the province under my charge; and, although you have pointed out to me that it was believed, on your part, that a more summary mode than that I have proposed was the persuasion in which your Government was would be observed, I must remark, that, attending to what the treaty, royal schedule of delivery, orders of my Captain General, and the importance of the same affairs merit, I have thought the proposal the most analogical, and worthy to fill the objects, although I am disposed to rectify it in any of the parts that do not agree, or are unnecessary in the insinuated requisites. Coinciding with the ideas that you have manifested to me, it is my desire that our respective commissions be complied with as soon as possible; but, having received, at the same time with the orders for the delivery of this province, those that ought to have been communicated ere this, to prepare and facilitate said delivery, is therefore the cause that it cannot be executed in all its parts with that despatch we desire. On that account, I request your attention in respect to the advices and intelligence my Government has given me relative to the treaty, to make known to all the inhabitants of the country, as well that part stipulated in respect to them, as also the particular steps they have determined shall be taken for those who wish to emigrate to various parts of the Spanish dominions. The artillery, military stores, and ammunition, that are to be transported, is another of the important points, the operation of which demands some order and time in this particular, as well as others, which, although they are not of as much consequence, it is requisite to execute them. I therefore consider it necessary we should hold a private conference, a medium by which we can conciliate our respective opinions, and accelerate its brevity; for which occasion I reserve manifesting you my observations, that, united with those you may uniformly make, they can be formalized in a species of convention, that will point out, with exactitude, the method of the operation, and will deliver us from some difficulties that generally occur in such cases. In answer to the first particular of your note of the 8th instant, I enclose you a circumstantial account of the military force of this garrison, including the families belonging thereto; likewise another, of those employed in this place under the immediate dependency of the national finance, both one and the other, with their respective remarks, for the ends that may be thought necessary.

Before leaving this subject, rendering your Government the honor and justice it merits, I pay them the tribute of my sincere thanks for the liberal sense given to the seventh article of the treaty; generosity supplying the necessary provisions during the voyage of the officers, troops, and those persons employed in the finance; and to you, sir, for the frankness you have manifested, and which will, no doubt, shorten our future communications. As I have heretofore expressed, I think it proper there should be a personal interview, for arranging the embarcation of said artillery, military stores, and ammunition, and other particulars which I wish to communicate. We will then determine positively the day on which the delivery of the province under my charge can be effected, as all other calculations would be useless without such an antecedent agreement. In respect to the lots, squares, public edifices, fortifications, barracks, and other public property, with the documents and archives that appertain directly to the right and sovereignty of this province, you can immediately designate the person or persons that are to receive the invento-

ries, plans, &c., to prepare and devise the needful, for the purpose of advancing this operation, to the commandant of engineers of this city, for the delivery of each of the respective departments, and also the documents appertaining to individual property, and those alluding to the sovereignty of the province; for which I will give the competent order, when I am advised by you of those chosen for the purpose. To give you, as I wish, an exact account of the adjacent islands to this province, is almost beyond my power, for the want of a general map that delineates their positions, extension, and circumstances; but, with the exception of Amelia, which is in the possession of the United States, and *that* forming the harbor of this port, known by the name of St. Anastacia, on which is situated the look-out house, all the rest are nearly without population, as likewise the public lands. You will therefore have a knowledge of those to be taken possession of as Government property, under the impression there may be of their not being granted. I believe want of exactitude will suffer no difficulties to arise, seeing the good faith and long possession which the Spanish Government has had of them since the treaty concluded between her and Great Britain, at Versailles, the 19th September, 1783, in which no particular specification is made of said islands, nor is there any document relative to the affair. The plain and ingenuous manifestation with which I have tried to satisfy the particulars contained in your note of the 8th must convince you of the friendly disposition to fulfil the commission confided to me with that harmony and friendship which has until now guided us, and which, I am certain, will not be interrupted, as I have the greatest opinion of the amiable qualities which adorn you.

God preserve you many years.

JOSE COPPINGER.

COL. BUTLER, *Adjutant General Southern Division U. S. Army, and Commissioner &c.*

REMARKS.—No transport is required for the individuals belonging to the schooner Barbarita, the gunboats Zeloza and Ymutable, as well as those of the launch and custom-house boat, as they are to perform the voyage in the first three vessels. Moreover, that in the total of the persons employed contained in this return, there are some who, from sickness, cannot proceed with the expedition.

JOSE COPPINGER.

ST. AUGUSTINE, *June* 11, 1821.

No. 9.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, E. F., *June* 13, 1821.

Your note of the 11th instant, with the accompanying documents, I had the pleasure to receive last evening. The sentiments expressed therein have been duly examined and properly appreciated. The information contained in the schedules you have furnished will enable me to arrange the transports, I hope, satisfactorily. Permit

me to hope that you will give such instructions to the commandant of engineers as will authorize him to prepare an inventory of the lots, squares, public edifices, fortifications, barracks, and other public property comprehended in the cession, together with a plan of the respective towns or places, in which it is peculiarly desirable to have the public property designated by some color different from that owned by individuals, and to have attached their extent of limits. On the arrival of the officer whose functions embrace this duty, I shall immediately give him the necessary orders for their reception, of which I shall duly apprize you. I shall take occasion to designate, shortly, a suitable person to receive the archives and documents which relate directly to the property and sovereignty of this province, as authorized by you. It now becomes necessary to notice particularly that part of your excellency's note which relates to ordnance, military stores, &c.; and I regret that part of my note of the 8th seems not to have been understood wherein I made the expression "fortifications, with their appendant defences;" which was intended to convey distinctly to you that my Government considered the artillery in the fortifications appendant, and of right belonging to them, and embraced in the meaning and intention of the cession, and, therefore, to be left with them. I had fondly hoped that the same construction would have been given by our respective Governments to the treaty; but, from the tenor of your letter in relation to the artillery, it would appear that your instructions have rendered their removal necessary. Should *this be the case*, it becomes my duty to adhere strictly to the same system of construction, in every part of the treaty embraced by my instructions; and I therefore solicit the information, that I may adopt such measures as the subject requires. So soon as the foregoing point is disposed of, I shall immediately call on you to meet each other's views in conference, touching all the matters that will remain for discussion; and I must be permitted to assure you, that my hopes and expectations of a happy and speedy termination of our respective duties are not in the least diminished; and I renew to you the assurance of my most respectful consideration and great regard.

ROBERT BUTLER.

His Excellency JOSE COPPINGER, *Governor and Commissioner, &c., St. Augustine.*

No. 10.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *June* 14, 1821.

I have given the necessary orders to the commandant of engineers to prepare the inventories of the lots, squares, public edifices, fortifications, barracks, and the rest of the property appertaining to the nation, manifested to you in my note of the 11th instant, that you would of course, on your part, name the person to receive them; said commandant of engineers will deliver suitable plans, and in that of the town will be found delineated the lots and other public property, with the marks and explanations separately, (that detail which you desire;) as also will be ready for delivery the documents that have direct relation to the property and sovereignty of this province; for the particulars of which I refer you to my said note. After weighing the expression of your note of the 10th instant, which treats of the "fortifications with their dependencies, or appertaining defences," understood by me in the literal sense, was, that dependencies signified the exterior works of the fortification—magazines, and other similar works, such as the lines and palisades that unite the fortress of this city and surround it. For this reason I found no difficulty, and I took a cursory view of the expression; but having given rise to the manifestation that you have been pleased to make me, that your Government considered the artillery, ammunition, and ordnance stores that are in the fortifications appertaining to them by right, and that such effects are comprehended in the meaning of the cession, I must inform you that a contrary explanation has been given by my Government on this point; and you will therefore permit me to make some observations that will convince you, I am persuaded, of the rectitude of this judgment. By *fortification*, I understand the work that is raised to defend and enclose a certain space, the work consisting, in particular, of the edifice, but not in the arms, ammunition, and ordnance stores, in which each nation varies in its structures, tactics, and military laws. If it is an axiom that the fortifications want arms and ammunition for their defence, it is equally so that they want force for their management, as likewise the necessaries for their subsistence; by which, if the support of the question consists that the fortifications to be defended require the first, by this identical reason the second may be demanded, as there is as much propriety in the one as the other; whenever, without the reunion of these things, it will not be said that is a fortified point, and in a state of defence. Under a different aspect will the moveable and other furniture, then in use in the barracks and public buildings, be delivered with them. It is not reasonable that it should be so, as the lots, furniture of the troops, and other utensils that serve for the convenience and necessity of those that inhabit them, cannot be included in the delivery. It is observed between nations, that by the sale, cession, exchange, and conveyance of this class of property, is understood merely the buildings, unless it is stipulated decisively that in the sale, cession, &c., the furniture, with the rest of the moveable effects, is a part of the property; and it is very clear to infer that in the treaty, where it distinctly mentions the delivery of the fortifications, it is solely the material and immoveable parts, but not the goods and effects necessary for its defence. It is under this belief that the Spanish Government directs me to agree with the commissioners of the United States, in the mode of removing the troops, ammunition, baggage, &c.; from which I infer that the whole is to be executed at their charge. In conclusion, it is well known that, on the delivery of this province by Great Britain to Spain, the former withdrew all the above-mentioned effects, as being the practice in similar cases, unless stipulated for otherwise. I remain in the persuasion that what I have expressed will be sufficient, in order that the meaning and interpretation may be rectified, which you pointed out to me as the construction given by your Government to the expression in the treaty relative to the fortifications; and weighing, as I am assured you will, the essential part of this note, we may proceed to the points still depending, and conclude with mutual satisfaction our respective duties. God preserve you many years.

JOSE COPPINGER.

ROBERT BUTLER, Esq., *Adj. Gen. Southern Division and Commissioner for the U. S.*

No. 11.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 15, 1821.

Your note, under date of yesterday, in answer to mine of the 13th instant, has been handed to me this morning. I feel great satisfaction at your having given such general attention to the subjects contained in my note aforesaid. There are two points in your note which claim, on my part, explanation. The first relates to the fol-

lowing sentence, as given by you, in quotation from my note of the 10th, viz: "fortifications with their dependencies, or appertaining defences." As this is calculated to give impressions different from what was expressed, I beg to be excused for giving the annexed quotation from the copy in my possession bearing date the 8th, and not the 10th instant, and which is in the following words, viz: "fortifications, with their appendant defences." The second point relates to the expression in your excellency's note just received, and of which the following is a quotation: "That your Government considered the artillery, ammunition, and ordnance stores that are in the fortifications, appertaining to them by right, and that such effects are comprehended in the meaning of the cession." Opposed to which, I insert the following quotation from my note of the 13th instant, and to which you allude, viz: "That my Government considered the artillery in the fortifications appendant, and of right belonging to them, and embraced in the meaning and intention of the cession, and, therefore, to be left with them." From this expression, your excellency will certainly perceive that the United States laid no claim to the ammunition and ordnance stores. Could I think myself at liberty to enter into discussion on the merits of the construction which my Government has given to the treaty, in relation to the artillery, I flatter myself that I could convince you, satisfactorily, that the meaning and intention of the contracting parties were, that the artillery in the fortifications was appendant to, and should remain with them. Such would also appear to have been the impression of the Captain General of Cuba, from his order to you of the 5th ultimo, (a copy of which I have received from the United States commissioner, from Cuba,) in which he does not require the removal of the artillery; added to which, the total silence of the seventh article of the treaty on the subject of furnishing transportation for the artillery, ammunition, and ordnance stores, or even provisions for the subsistence of the troops on their passage. As I feel myself authorized to infer, from your note of the 14th instant, that you are determined to remove the artillery, it becomes my duty to enter my protest against the measure. But, before appending it to this communication, I would suggest that, should you feel authorized to form a different conclusion with regard to the artillery, and to determine to leave it, I will engage to furnish a reasonable proportion of transportation for the ammunition and ordnance stores; but, on the other hand, should you still determine to remove the artillery, I do hereby respectfully protest against the measure, and declare that I do not consider the United States bound to furnish either transportation or escort for the artillery, ammunition, and ordnance stores; and that they have, and will exercise, a claim on the Spanish Government, as well for the artillery so removed, as the provisions which they have procured for the subsistence of the Spanish troops from this to the Havana, should the same be made use of. As this point now remains for decision exclusively with you, and should that decision correspond with the sentiments contained in your last note, I consider it placed out of the pale of my duties, and subject to future discussion between our two respective Governments alone. I have to request that the public property at Amelia Island will also be embraced in the plans preparing by the commandant of engineers. I shall do myself the honor to call and confer with your excellency on to-morrow with respect to our further duties, and conclude with renewed assurances of personal esteem and great regard.

ROBERT BUTLER.

His Excellency Governor COPPINGER.

No. 12.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

SIR: ST. AUGUSTINE, *June* 16, 1821.

I had the honor of replying in my last note to yours of the 8th and 13th, (which last, through mistake, was referred to instead of that of the 10th,) on the same subjects of which you required an explanation in your note of yesterday. In my opinion, the expressions in your first two notes are synonymous, viz: "fortifications with their appertaining defences," or their "appendant defences;" and if by these you wish to give them different constructions, as you indicate to me in your last, it is clear that, on my part, the competent explanation given you fully in the note of the 14th was what I understood by such words; and having manifested to me the sense with which you wrote them, I consider that dwelling any longer on the subject would waste insensibly the time which ought to be dedicated to objects of more interest. You are aware that I am merely the executor of the orders that my Government communicates to me, which I must strictly follow. In my former, I mentioned fully that my opinion was, that, in the word *fortifications* in the treaty, the artillery and other moveables were not comprehended; and you maintained that, from the signification of that word, and the intention of the two contracting powers, the artillery in the fortifications was appendant, and of course belonged to your Government, which you endeavored to prove from the copy transmitted to you of an official letter from his excellency the Captain General to me, bearing date the 5th of May, in which he does not make any particular mention of the transportation of the artillery; and although it is so, I am sorry they have not likewise transmitted you copies of the remainder of his excellency's official correspondence. But should it not be so, I will not deprive you of a knowledge of the royal schedule of the 24th of October last, in which His Majesty positively orders that all the papers and effects that belong to the nation, and are not found comprehended or mentioned in the clause of the cession, shall be transported to other parts of the Spanish dominions; in which case I have considered the artillery. Notwithstanding, wishing to give you a proof of respect, and avoid protests and reclamations, I propose, and confirm myself, that the cannon mounted at present on the batteries of Fort St. Mark's and Matanzas, (the only permanent fortifications that exist in the province,) remain as they actually are, until our respective Governments make the explanation and agreement they may think proper; but you will provide the transports for the residue of the artillery, a larger number not being necessary for their defence in the change of Governments, as with it ceases all apprehension of any disturbance by land, and the lines being unnecessary on which some were mounted. I also offer to leave with you a moderate quantity of ammunition and ordnance stores for the use of said pieces, making of the whole an inventory, that the Spanish Government may be answered and satisfied should they determine its delivery; to which proposition I flatter myself you will consent. The commandant of engineers will deliver you the plan of Amelia, with the information that may exist relative to it. I am assured that, in the conference you mentioned, all the pending points will be more satisfactorily adjusted than is possible in our written communications, which are delayed in consequence of the necessity of their translation, and where it is to be apprehended that our respective expressions may not be conveyed exactly. I will have much satisfaction in repeating to you personally my respects, and I assure you, in the mean time, of my high consideration and esteem.

God preserve you many years.

JOSE COPPINGER.

ROBERT BUTLER, Esq. *Commissioner, &c.*

No. 13.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 18, 1821.

I received your note of the 16th instant, on that day, in answer to mine of the 15th. The promised translation was handed this morning. After duly examining the documents you were pleased to have me furnished with, in relation to the stores, artillery, &c., and after a careful examination of my instructions touching those points, I find that I cannot meet your proposition. While I sincerely regret the difficulties which we are, from our respective instructions, placed in, I feel extremely desirous to place the subject happily at rest between us, and therefore respectfully propose the following arrangement, in addition to that given in my note of the 15th; which is, that you will consent to leave all the artillery, with their implements and a proportion of ammunition, &c., for which I will give a corresponding receipt, placing the proper construction of the treaty in the hands of our respective Governments; and to facilitate, as much as possible, the contemplated exchange, I will engage to furnish transportation for the ammunition and stores, save that of the cannon balls, bombs, and grape shot, which you can have transported; and, in like manner, the transportation furnished on my part, as well as the provisions consumed on the voyage, and the ammunition which may be left with me, shall be subject to a similar adjustment, on the part of our respective Governments. Should your instructions, in conjunction with your sound judgment, authorize you to adopt this proposition, I shall be more than pleased, as I am constrained, from a sense of duty, to say that it is the only arrangement on this subject which I feel at liberty to enter into; but should your views not correspond with mine, whilst I regret the circumstance, I must refer you to the sentiments of my former note, in which is embodied my protest, for your final decision thereon. It is now proper that I should inform your excellency that the United States are prepared with escort, transport, provisions, and water, to accommodate the Spanish officers and troops to the Havana; and that I am prepared to enter immediately into the general arrangement for the reception of the province which you have been selected by your Government to deliver. I have designated Major Cross as a fit and proper person to receive the archives which relate to the sovereignty and individual property of the province; and Lieutenant Baird, of the corps of artillery, to receive the inventories, plans, &c., and to take possession of the islands dependant, public lots and squares, public edifices, and other buildings which are not private property; and have therefore to request that you will give the necessary orders in good time, as you were pleased to signify in your note of the 11th instant. I must advert for a moment to the expression in your last note which implies a waste of time in the explanations which I gave in my note of the 15th; with these sentiments I beg leave to differ, as I deem it an essential duty to correct misunderstandings or incorrect quotations on important subjects. I need not urge upon your excellency how desirable it is that the contemplated exchange should be speedily effected, as well on account of the situation of the troops lying off this city, as of the accumulating expense daily arising from our state of preparation under the treaty. Permit me to hope, however, that I may be furnished with your final decision on the subject of the artillery at as early an hour as possible.

ROBERT BUTLER.

Governor COPPINGER.

No. 14.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, EAST FLORIDA, *June* 19, 1821.

I have examined the contents of your excellency's letter of yesterday, and, in answer, I wish to inform you that, in order to facilitate the delivery, and give your excellency an unequivocal proof that it is my primary object, (as we cannot, consistently with our respective orders and instructions, agree on the term *fortification*, mentioned in the treaty,) we ought to adopt on our part a prudent and friendly position, at least until our Governments resolve on this point. If I comprehend your excellency's propositions, they are, that if I do not consent to leave all the artillery subject to the decision of our Governments, your excellency offers to transport, on your account, the ammunition and stores, excepting the articles cannon, bombs, balls, and grape shot, which will remain at mine; leaving subject, likewise, the transportation which your excellency offers, and the rations consumed on the voyage of said ammunition and stores, to superior determination; and the ammunition and implements of war that I leave to remain subject to the same determination. I agree that it should be so; and I suppose that your excellency calculates on there remaining in the Forts St. Mark's and Matanzas (the only existing points of permanent fortification) the artillery that for their defence are actually in battery, as your excellency proposes in your note of the 16th, and of the number and calibre of which a separate statement has been given. In this conception which I have formed of your excellency's proposition, I repeat my acquiescence; and as it is my wish that the aforementioned artillery, balls, &c. not comprehended among the articles that are to be left, should be carried and convoyed at the same time with the troops, I hope that your excellency will ratify the same, in the assurance that I will adopt the most prompt measures in order to the attainment of this effect. I am informed that all is prepared on the part of your excellency for the evacuation of the territory by the garrison under my charge, and that your excellency is in readiness to enter into the general arrangement for the receipt of the province; therefore, and that we may commence carrying the same into effect, your excellency can ordain Major Cross to apply to me for the delivery of the documents of the secretary's office of this Government, appertaining to the national property. As respects the delivery of the public archives, containing the records of individual property of this province, that will be delayed until various doubts that occur are cleared up; but they will not be removed until then, nor will I leave this place until all matters are regulated and concluded between us that demand my personal assistance. Lieutenant Baird, of the artillery, can likewise apply to me, that he may, with my intervention, commence receiving the inventories, plans, &c. from the engineer's department. Your excellency makes an observation that I cannot pass in silence. When an expression is understood, and there has been made thereon the explanation it requires, I consider the term of answering closed; and as my official letters of the 14th and 16th satisfy what your excellency presented in yours of the 15th, I consider that I was warranted, without infringing on delicacy, to say that detaining ourselves would sensibly delay time, and postpone matters of more importance. But if it offers any doubts, I am disposed to clear them up; and should there be none, your excellency will do me the justice to participate in my good wishes. From the moment I received the orders of my Government to act in this commission, I have been busy, and am incessantly busy, in its promotion. Your excellency knows that we are greatly in advance of the time allowed by the treaty for the evacuation; and although the situation of your troops stimulates my exertions, I could have wished the delay of their approach a few days longer, at least until our accordance could have fixed on a probable period in which their

coming on would have been more opportune; but, as it has not been so, I am disposed to give up the possession of the territory, by the evacuation of my troops, as early as possible, and which will be governed by the final resolution of your excellency on the artillery, if that is agreeable to what I have expressed in the beginning of this letter; and, in the mean time, I renew my particular respects and high consideration of your excellency.

God preserve you many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger:

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER,
Adjutant General of the Southern Division and Commissioner of the U. S.

No. 15.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 20, 1821.

I have received and examined the contents of your note bearing date yesterday, in answer to mine of the 18th. I find that your excellency has not comprehended my proposition as I could have wished. I proposed that you should leave *all the artillery*, and that I would furnish transport for the ammunition, stores, &c., except balls, bombs, and grape shot, which you could have transported. That part which relates to leaving, subject to the decision of our respective Governments, the cannon, implements thereto belonging, ammunition to be left with them, provisions for the voyage, and the transport to be furnished by me for the ammunition and stores, as expressed in my letter, seems to have been perfectly comprehended; and I now, with a view of putting to rest this embarrassing subject between us, ratify the construction given by you to the said proposition, in its full extent, which is comprehended as follows: The artillery (with their implements complete, and a reasonable proportion of fixed ammunition) as mounted on St. Mark's and Matanzas, and comprised in the statement handed by your aid-de-camp, as follows:

	Iron artillery.			*Brass mortars.*		*Brass howitzers.*
	24 prs.	16 prs.	8 prs.	11 inch.	7 inch.	7 inch.
St. Mark's,	10	11	0	1	1	2
Matanzas,	0	0	2	0	0	0

Making, in all, twenty-seven pieces to remain in battery. The provisions and transports for the stores, together with the ammunition to be left, are all to be subject to the amicable arrangement of our respective Governments; and I also ratify your expectation that the artillery, balls, &c. not comprehended to be left, and for which you furnish transportation, shall be considered under convoy, provided your excellency shall cause to be rendered to me an article signed by, and binding on, the captains of the vessels who will expect convoy, by which article the names of their vessels shall be given, and their agreement placing themselves under the orders of James Ramage, Esq., commanding the United States convoy, until their arrival and delivery at Havana. I shall give proper attention to the other subjects contained in your excellency's note aforesaid in good time, and do myself the pleasure to see you shortly, and confer with you about the archives of this province which relate to individual property. I beg leave to express to you, in conclusion, that my Government considers the transports employed on its part, for the fulfilment of the stipulations of the treaty, as being free from port charges or other duties, both at this place and Havana; for which I hope you will give me an assurance. I highly appreciate your intentions of delivering this province at as early a period as possible, and have only to regret the multiplicity of business which presses on you.

I renew to you the assurance of my great regard and high consideration.

ROBERT BUTLER.

His Excellency JOSE COPPINGER, *Governor and Commissioner.*

No. 16.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *June* 21, 1821.

It affords me much satisfaction to find that a final and friendly conventional termination is placed on the business of the artillery, ammunition, and other implements of war, until our Governments determine the question definitively. To-morrow will be commenced, on my part, the embarcation of the cannon, bombs, balls, and grape shot; and I hope your excellency will be pleased to inform me if you have in readiness the vessels that, on your part, are to transport the ammunition and implements that do not remain for the service of the twenty-seven pieces of artillery mounted on the forts, which were particularly mentioned in the statement handed by my adjutant, and expressed in your excellency's note of yesterday, that I may make the necessary dispositions for the most early and active steps in their delivery. I return thanks to your excellency for having acceded to my wishes in permitting the vessels freighted by me for the transportation of the cannon, bombs, &c. to be embodied in the expedition, and convoyed by the United States armed vessel commanded by James Ramage, Esq.; and for that purpose I will furnish your excellency, in due time, with the necessary notice, in order to have the same effected, according to the desire your excellency has expressed.

I have the pleasure of assuring your excellency that the vessels employed by the United States in the evacuation of this province will pay no duties whatever on their entrance into or departure from this port, and that they shall be furnished with pilots whenever wanted. But I cannot give you the same assurance with respect to the port of Havana, as I know not what may be the determination of that superior Government; but I am under the impression it will act with equal liberality. The visits of your excellency are very pleasing to me, and will be more so, as I contemplate, in personal conferences, better and more speedy adjustments of the remaining subjects, necessary to a happy conclusion of our commissions. Before closing this, permit me to request of your excellency information on the kind and quantity of provisions composing the rations that are to be supplied to the Spanish military and civil officers, and the troops, on the voyage, for the purpose of knowing what other articles they may provide themselves with for their better accommodation.

I reiterate to your excellency my sincere regard and particular esteem. God preserve you many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger:

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER, *Adj. Gen. Southern Division and Commissioner U. S.*

No. 17.

Colonel Butler to Major T. Cross, of the United States Army.

SIR: ST. AUGUSTINE, *June* 22, 1821.

I have selected you as a proper person to receive and receipt for the archives which relate to the sovereignty of this province, as comprised in the second article of the late treaty between the United States and Spain. Those relating to the property of individuals will not be demanded, as they are still a matter of discussion between the commissioners. You will therefore call on his excellency Don José Coppinger, Governor and commissioner, who will authorize a person to deliver the documents to you. A copy of your receipt will be submitted with the documents when received.

ROBERT BUTLER, *U. S. Commissioner.*

Major T. CROSS, *U. S. Army.*

No. 18.

Colonel Butler to Lieutenant Baird, of the United States Army.

SIR: ST. AUGUSTINE, *June* 22, 1821.

I have selected you to receive from the proper authority at this place the inventories, plans, &c. which relate to the subject islands of this province, and all public lots and squares, public edifices, and other buildings which are not private property. You will therefore wait on his excellency Don José Coppinger, Governor and Spanish commissioner, who will authorize an officer on his part to deliver them. You will pass a corresponding receipt therefor, (retaining a copy,) and hold the same subject to my order only.

ROBERT BUTLER, *U. S. Commissioner.*

Lieut. T. J. BAIRD, *U. S. Army.*

No. 19.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 22, 1821.

Before answering the particulars of your note of yesterday, I beg leave to inform you that I have given to Major Cross and Lieutenant Baird the necessary orders, as contemplated in your letter of the 19th, and they will wait on your excellency accordingly. In answering that part of your note aforesaid which relates to the archives or records of individual property, I take for granted that we understood each other in that, respectively, in our conference yesterday, and will remark, accordingly, that, as there appears some doubt on your part, you are desirous to await the decision of the Captain General of Cuba on the subject; at the same time, you are disposed to give me an official assurance that they shall not be removed from the province until such decision is received. Your motives cannot be otherwise than approved on my part; and as the Adeline schooner will return to this port from the Havana, a favorable opportunity offers for the conveyance of the Captain General's answer. You will permit me to hope that you will embody my sentiments, as expressed to you on that subject, in your letter to the Captain General, as I deem it of the utmost importance, for the security of the titles to the property owned by the inhabitants of this province, that the only evidence (which is the records) that will be recognised by my Government should remain a permanent basis of security to them in their possession. I will now take up the subject of your excellency's note of yesterday, and will inform you that the sloop Endeavor, of forty tons, has been procured for the purpose of affording additional accommodations to the families of the officers, and also to transport the ammunition and stores contemplated by our mutual understandings, and which I have deemed sufficient from the official estimate furnished me by your aid-de-camp, and which I had the honor, at your request, to send you yesterday for examination. The captain of this vessel will be instructed to report to you early on to-morrow, and take your orders. Enclosed, your excellency will find an estimate of the provisions to be furnished on my part, embracing also their kinds and component parts, which will afford you the information desired. You will also receive a memorandum of the accommodations afforded by the transports, and I am persuaded that you will discover the propriety of placing the military officers who have families on board the Meteor, as the accommodations are entirely private, each state room having a Venetian door, and unconnected with each other. The cabin accommodations of the sloop also afford much convenience, as you will readily perceive. As you were pleased to express yourself satisfied with these accommodations in our conversation yesterday, I shall be gratified to know that you continue so. It may be of some importance to the officer commanding the United States convoy to have completed at an early day the arrangements necessary for the government of the fleet. I hope you will afford the information on that head as soon as possible. After expressing my thanks for the exertions you are daily making to facilitate my wishes, I conclude with a hope that you will make a request of the Captain General that the transports shall enter Havana and disembark free of duties.

ROBERT BUTLER, *United States Commissioner.*

His Excellency Governor COPPINGER.

A.

[Documents enclosed in the foregoing communication.]

Memorandum of the transports provided for the removal of the Spanish authorities from St. Augustine to the Havana.

Ship Meteor, three hundred and seventy tons:

Cabin accommodations.

Six state rooms, with two single births in each,	- - - -	12 births.
One state room, with one single birth,	- - - -	1
Two state rooms, with six single births in each,	- - - -	12
	Total,	25

Accommodations between decks ample for four hundred men.

Sloop Endeavor, forty tons:

Cabin accommodations.

Ten births, including two state rooms,	- - - -	10
	Total,	35

Estimate of provisions for the subsistence of the Spanish officers and troops and their families, and the civil officers and their families, on the passage from St. Augustine to the Havana, reckoning a voyage of twenty days.

The Military.

		Rations.
16 officers, at 3 rations per day,	960	
5 ladies, at 2 rations per day,	200	
19 children, at 1 ration per day,	380	
	—	1,540
321 rank and file, at 1 ration per day,	6,420	
14 soldiers' wives, at 1 ration per day,	280	
29 soldiers' children, at 1 ration per day,	580	
	—	7,280

Civil Departments.

15 officers, at 3 rations per day,	900	
10 ladies, at 2 rations per day,	400	
52 children, at 1 ration per day,	1,040	
	—	2,340
34 laborers, seamen, &c., at 1 ration per day,	680	
15 women, at 1 ration per day,	300	
47 children, at 1 ration per day,	940	
17 convicts, at 1 ration per day,	340	
	—	2,260
Total,		13,420

Component parts of a ration.

¾ pound of hard bread,
¾ pound of pork,
1 gill of rum or whiskey,
4 quarts of vinegar,
12 quarts of pease or beans,
1½ pound of candles,
2 pounds of soap,
} to each 100 rations.

Total quantity of provisions.

2,910 pounds of pilot bread, for the officers, ladies, and their children,
7,155 pounds of ship bread,
10,565 pounds of pork,
319 gallons of whiskey,
134 gallons of vinegar,
50 bushels of beans,
196 pounds of candles,
268 pounds of soap.

The ship Meteor is bound by her charter-party to have on board eight thousand gallons of sweet water, and to furnish sufficient fuel for cooking on the voyage.

No. 20.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

SIR: ST. AUGUSTINE, *June* 23, 1821.

In answer to your esteemed note of yesterday, I assure your excellency, as I mentioned in my letter of the 19th, that until I receive the answer of my Government on the doubts arising on the delivery of the public archives relating to the individual property of the inhabitants of this province, and on which I have on this date written for information, they shall not be removed from this place, and they shall remain precisely as they are. I shall likewise remain here until this point is decided, as well as on that of the artillery, on which I have made my report; and, in the mean time, I will have formed an exact inventory of the documents contained in those archives. I will inform his excellency the Captain General of Cuba of the sentiments your excellency has expressed respecting the rights of the inhabitants holding property here; and I will likewise lay before him the question embraced in the last paragraph of your excellency's letter: whether the American transports entering the port of Havana shall be free of duties. I have noted the object to which your excellency has destined the sloop Endeavor, and will give orders that her loading shall be entered on as soon as possible; but the article of powder will be reserved until the last moment, in order to diminish the danger of accidents; and, for the same reason, it appears to me a matter of prudence that no other person should be entered on board of her than the necessary crew; and, that the families of the civil officers may not thereby be cramped in their accommodation, I will distribute them in the vessels freighted on my part for the transportation of the cannon, bombs, &c., if your excellency will have the goodness to cause them to be supplied with the rations, &c. for the voyage; and, with this view, I will give you timely notice of the distribution I may make. The conveniences of the Meteor will be appropriated to the military; but, as we have separately agreed, the colored troops will be shipped in the transports I have freighted, and for which I hope your excellency will be pleased to order rations to be in readiness for delivery, according to advice I shall communicate in proper time. I appreciate the statement that accompanied your letter for my information; and, adverting to that of rations, (which is calculated for a voyage of twenty days,) your excellency will pardon my making the observation that, in the present season of the year, they are frequently extended to thirty days, and more. Experience affords the example of vessels having to return here after being twenty-five days at sea; and, for this very reason, the packet schooner of this Government, (Barbarita,) when sailing to the Havana in these months, is supplied with rations for forty days. I have con-

ceived it proper to state these circumstances for your excellency's information. Annexed is a statement of the vessels for which I have solicited convoy, and which I transmit for the purpose your excellency has expressed; and I have much pleasure in assuring you of my particular respect and consideration.

God preserve your excellency many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger:

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER, *United States Commissioner.*

Statement of the vessels freighted by the Spanish Government of this place for the transportation of the cannons, balls, bombs, and grape shot to be removed to the Havana, and for which convoy is requested.

American schooner Adeline, Captain J. Israel.
American schooner Flor[illegible] Captain Charles Johnston.
American schooner Alex[illegible]der, Captain Silas Rogers.

JOSE COPPINGER.

ST. AUGUSTINE, EAST FLORIDA, *June* 23, 1821.

No. 21.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 26, [27,] 1821.

I received your esteemed note of the 23d, in answer to mine of the 22d. I was desirous to have a conversation with you previous to writing you again, and am thereby enabled to give you more satisfactory information touching some of the points contained in your last. The subject of the archives relating to individual property I consider perfectly understood between us, and will therefore remain silent on that head until you receive the further instructions of your Government in relation thereto. I return you my sincere thanks for your promise to communicate my sentiments on that subject to the Captain General, also my hopes that the American transports would be permitted to enter the Havana free of duties. I have thought it advisable to order an additional transport, fearing, from our late conversation, that the one furnished would not be sufficient, and also with a view of evidencing my wishes to render comfortable the families of the civil officers. You have been pleased to express your entire satisfaction with this arrangement, and that no more will be required of me. I shall pay the necessary regard to the suggestion made by your excellency on the subject of provisions, and shall use every means in my power to afford ample supplies to guard against accidents. In making my estimate, I was governed by the information of a number of sea captains, who all agreed that twenty days would be ample and liberal; but I hope I shall be able to correct the estimate, and afford you about thirty days' supply. The provisions will be turned over to your commissary by the commissary of the United States, and receipts required therefor; after which, the officer commanding the detachment can regulate the distribution to the different vessels as you may require. The understanding which now happily exists between us leaves me nothing further to communicate upon, except the preparation for the delivery, and the contemplated receipts to be passed between us on that subject; and I have only to request that you will fix upon some early day for the delivery, corresponding with your necessary convenience, and the assurances which you have been pleased to make me personally; and any suggestion which you may be pleased to make with respect to the manner, differing from our mutual understanding, shall be happily received, and duly considered.

ROBERT BUTLER.

His Excellency Don JOSE COPPINGER, *Governor and Commissioner, St. Augustine.*

No. 22.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

SIR: ST. AUGUSTINE, EAST FLORIDA, *June* 28, 1821.

With much esteem I received your excellency's note of yesterday, bearing testimony to the unanimity of our sentiments. You will do me a favor in directing the captains of the vessels you have freighted to transport the stores to come forward and receive their loading, as that part of the business is delayed, and a part of the effects are in waiting on the shore. It would be very pleasing to me to comply with your request in appointing a day for the exchange of flags, but I fear to adventure on my judgment, as that depends on the shipment of the artillery, which, although progressing as fast as possible, might be delayed by a change of weather, and other occurrences with the captains of the vessels might render our efforts abortive. However, I will not lose sight of that request; and, as soon as a farther progression will warrant a calculation, I will inform you of it. As we accord on all the other contents of your excellency's note, which I am answering, I shall use the freedom and friendly understanding that guide us in making known to your excellency the following: Having given to the officers of this garrison the necessary information of the number, quantity, and quality of the rations that you offer for their voyage, they have represented to me that those rations are not suitable to their situations, and they claim to be supplied as His Catholic Majesty has provided by the regulations of the 18th July, 1805, which allow a board gratuity of thirty days from this to the Havana, at two dollars per day, with the allowance of more, should it be required, but liable to no deduction should the expense be less; and this excludes the rations of the officers: they will only receive those stated for their wives and children, as they are equivalent to the allowance made by the Spanish Government for their families in similar cases. I therefore make this known to your excellency, in the hope that you will be pleased to inform me, should you have no objection to supply the officers with the gratuity they claim, founded in justice, in order to their immediately receiving the same from the person your excellency will inform me of; but, should it be otherwise, your excellency is informed that it does not suit them, for the reasons stated, to receive those rations, and they hold their right of claim on the Spanish Government for their board allowance provided in these cases. I present your excellency a reiteration of my particular respects and high consideration.

God preserve your excellency many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger:

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER,
Adjutant General and Commissioner of the United States.

No. 23.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *June* 29, 1821.

I have received your excellency's note of yesterday, in which you decline, for the present, appointing a day for the exchange of flags, and desire that the captains of the vessels I have freighted to transport the stores should be required to come forward to receive their loading, as that part of the business was delayed. I deem it necessary to remark to your excellency, that the sloop Endeavor was procured for that purpose, and required to report for your orders; and, in a conversation had with you some days since, you were pleased to remark, that, should this vessel not be sufficient to transport those stores, you would dispose of the overplus in your vessels. In a subsequent conversation, you were pleased to signify that one vessel would not be sufficient, and alleged that no passengers would go on board the Endeavor, in consequence of her loading being principally powder; upon which I informed you that I would procure another vessel to take the balance of the stores, and to accommodate passengers. I have procured the promised vessel, and she will be ready to receive her freight early in the morning. You are pleased to inform me that the shipment of the artillery, although progressing as fast as possible, might be delayed by a change of weather; and as I observe, also, that but few of your balls, &c. have been put on board of your vessels, I feel somewhat at a loss to understand how any delay could have arisen on my part. I have deemed the foregoing observations necessary to exonerate me from any imputation of neglect of duty on the part of my Government, which your note is calculated to warrant. In answer to that part of your excellency's note which relates to the allowance of a gratuity of thirty days, at two dollars per day, on the part of your Government to the officers, for their passage to the Havana, I can only remark that my instructions confine me to the furnishing provisions under certain conditions, and that those provisions will be placed in the possession of your commissary, subject to such disposition as you may think proper to make of them. I appreciate your excellency's promise to give me, as early as possible, the information required as to the day for the exchange of flags; and will remark, in conclusion, that the transport has again arrived off this harbor, with the troops destined to occupy this province.

I renew to your excellency my sentiments of great consideration and personal esteem.

ROBERT BUTLER.

His Excellency Don JOSE COPPINGER,
Governor and Commissioner.

No. 24.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, EAST FLORIDA, *June* 30, 1821.

I am satisfied that, on the part of your excellency, there has been no delay in making the arrangements relative to the transportation of the stores. The object of my observation on that point was, that your excellency would be pleased to notify the captains of the vessels you have freighted to appear and receive their cargoes, as a part of what they were to take was some days on the shore, ready for embarcation; for, although the captain of the sloop Endeavor did present himself immediately after your excellency gave me notice that he was freighted for that purpose, he told me that he had to grave his vessel's bottom before taking in her load. She has now a part of her load on board. But, although your excellency informed me of your having freighted another vessel on the 27th, as one was not sufficient to transport the whole, I do not yet know who the captain is, as he had not made his appearance this morning at ten o'clock. It is certain that I have still balls to ship; but this does not prevent going on, at the same time, with the shipment of the stores. This explanation will always show that neither on your part nor mine has there been any neglect in the prompt execution of our respective duties. When, in our conversations, we spoke of articles being shipped in my transports, it was under the impression that they would comprehend some small quantity, not adequate to the loading of another vessel, and which could be taken on board of my transports without inconvenience. Our official notes all terminated on this point, and to them reference may be had; but, in comprobation of my offer, I can cite to your excellency that a part of the equipage of the troops is already shipped in my transports.

It being my duty to attend to the representations of my officers respecting their non-admittance of the kind of rations your excellency proffers to them; as I must conceive, from the answer your excellency has been pleased to give me on the subject, that you have not the power of altering what you have offered, I have resolved leaving to my Government the right of claim on your Government, in this case, as it may judge proper, to supply the aforesaid officers with the table allowance the Spanish nation has provided for them; consequently, the proposed rations will not be received, and those to be received for the other classes should, it appears to me, be served out on the voyage by the person who may have them in charge for the American Government, excepting such as are to be distributed among my transports, which will be received by the commissary I will appoint, and who will apply to your excellency to that effect, with the necessary notice and instructions, immediately after your excellency shall have, as I hope, informed me of your accordance. According to the arrangements made, the troops that are to occupy this province being in front of this port, I expect that on the 8th or 10th the evacuation may be effected by mine, and the possession concluded that I am to deliver to your excellency, as the commissioner to receive the same. I am preparing the documents receptive by this important act; those of the other part of the possession being already realized, of which I wish to know if your excellency is satisfied. I am this moment informed that the last vessel which your excellency informed me of your having freighted, and of which I have made mention in the first part of this letter, has appeared, and is taking in her cargo. I ratify the distinguished conception and particular estimation I have of your excellency.

God preserve you many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger.

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER,
Adjutant General and Commissioner of the United States.

No. 25.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *July* 2, 1821.

I have received your note of the 30th ultimo. The observations you are pleased to make on the subject of the transports are satisfactory. As the officers of the Spanish Government refuse to receive the American rations, I deem it necessary to require that you will be pleased to furnish me with a report of the persons who are to sail, that will be entitled to receive rations, that I can have the quantity set apart, ready for the reception of your commissary, as the United States do not furnish a commissary but to their own troops or prisoners of war, and it will be therefore necessary that you authorize some officer to receive and receipt for the provisions on the part of your Government. I shall give you an expression of my sentiments in relation to the documents, of which you say the possession is already realized, as soon as I shall be enabled to have them translated, that I can understand them perfectly. I cannot omit the expression of my thanks to your excellency for having given the 10th instant as the longest period set apart for the exchange of flags, but still entertain great hopes that your business will be sooner completed, and thereby enable you to fulfil my wishes at an earlier day.

I have the honor to renew to your excellency the assurance of my great respect and distinguished consideration.

ROBERT BUTLER.

His Excellency Don JOSE COPPINGER,
Governor and Commissioner, St. Augustine.

No. 26.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *July* 3, 1821.

Your excellency informs me, in your official letter of yesterday, that your Government only supplies a commissary for the distribution of rations to its own troops and prisoners of war. Although I am not disposed to differ from your opinion, I would observe that the supplies your excellency provides for my troops may overrun or fall short, according to what may be the length of the voyage. Should they overrun, I do not know if it is the intention of your Government to reclaim the balance; should they fall short, it is a matter of course that the deficiency is to be made good to those who wanted; and it may occur that the convoy will have to seek a port and procure provisions to continue the voyage; consequently, I conclude that, as the American Government, on whose account the transportation is made, becomes the responsible party in either of the two latter cases, it ought to have the advantage in the event of the former. These reasons have induced me to believe that your excellency would furnish an issuing commissary to the completion of this engagement. But, if your excellency continue in the same opinion, I will appoint a person to wait on your excellency with the statement you call for, and take charge of the rations, leaving to my Government the right of claiming the deficiency that may arise from future contingencies. Should it be possible for me to abbreviate the arrangement for the exchange of flags, which I have intimated in my former letter, informing you of it will afford me much pleasure. I remain, with the highest personal esteem.

God preserve you many years.

JOSE COPPINGER.

By order of his excellency Don José Coppinger.

GEO. I. F. CLARKE.

His Excellency ROBERT BUTLER,
Adjutant General and Commissioner of the United States.

No. 27.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *July* 3, 1821.

That a more perfect understanding should exist between us, in relation to the archives which are embraced in the treaty of cession, and relating to individual property, is the object of this communication. I should, upon mature reflection, consider myself wanting in my duty to the inhabitants of this province, who are about to become citizens of my Government, if I withheld any statement in relation to the archives which might lead to the removal of any documents that would be of importance to their security, and which my Government considers included in the treaty. The following records are deemed indispensable to this object, viz: The royal or other orders, authorizing the Governors of this province to issue grants to individuals for lands, lots, or squares; the evidence of indemnity offered by Great Britain to her subjects who might leave their property in this province, and retire to her territory after the cession to Spain; the proclamation of the Spanish authorities, calling on those individuals to come forward and dispose of their property, or peaceably occupy it within certain periods, or the same would be confiscated, and the order of confiscation thereafter; the original records of all grants made in the province, either by His Catholic Majesty, the Captain General of Cuba, or the Governors of this province, respectively; the original records of all trials and decisions embracing individual property; and the original records relating to the execution of wills and administration of estates. The foregoing explanation is given to show you what I am bound to consider as the archives relating to individual property, and which are not to be removed from this place until the decision is had on the subject by our respective Governments; and I request that you will cause the Captain General to be furnished with a copy of this communication.

I have the honor to remain, with perfect respect and great consideration,

ROBERT BUTLER.

His Excellency Governor COPPINGER.

No. 28.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *July* 4, 1821.

The note your excellency was pleased to send me yesterday, in order to point out which are the records comprehended in the treaty of cession, and appertaining to private property, I have duly examined, and have to answer,

that, confining myself to a compliance with the treaty, and with the orders of my Government, their liberal sense is the only guide to my endeavor in the execution; and, when any doubts arise, I consult them with that frankness necessary to ascertain my course and warrant my responsibility. Thus actuated, I early informed your excellency with respect to the public archives in the *escribano's* office, or records bearing on private property of the inhabitants of this province—measures to which your excellency was pleased to accede. It now appears that your excellency advances pretensions to other documents, that I am sorry to say are, according to my conception, excluded from the delivery. I do not comprehend the ground on which you step your demand; therefore, and in order to report to my Government, by the earliest opportunity, that it may decide with yours on these points, and, at the same time, on those others in question, your excellency will excuse my not entering into particular observations on each of these. I have much pleasure in repeating to your excellency my constant esteem.

God preserve you many years.

JOSE COPPINGER.

By order of his excellency:

GEO. I. F. CLARKE.

ROBERT BUTLER, *Adjutant General and Commissioner.*

No. 29.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *July* 5, 1821.

I have read with attention your excellency's note of the 3d instant, and, in answer, have to remark, that you will please to appoint a commissary to receive the provisions from the commissary of the United States, and receipt for the same. As the transports are to be discharged at the Havana, the surplus provisions could not be reclaimed by the United States; hence, the supplies required by your excellency will be furnished, and remain subject to the decisions of our respective Governments, as heretofore stipulated between us. I desire to be furnished, as soon as possible, with the estimate, as I am making arrangements for the removal of the surplus provisions from the transport, and entering into the necessary preparations for the exchange on Tuesday next, as advised by you. I enclose you a form required by Captain Ramage for the execution of the three captains of vessels to be convoyed, and hope you will have it entered into without delay, as he is desirous to have his instructions prepared immediately. In answer to the note of yesterday which your excellency has done me the honor to address me, I beg leave to remark, that the only ground assumed on my part, in making the communication of the 3d instant, was, that of the faithful performance of my duty to my Government, and the individuals who are about to become citizens thereof; and I did not expect you to enter into particular observations on the subject of that letter, but I wished to give you timely information of what documents I considered to be the archives in our arrangement, and would be esteemed under the treaty sufficient to guaranty the possession of the inhabitants in their property; and that they might not be removed until the decision was had on the subject, when I could adopt such further amicable measures as are warranted by my instructions. If I comprehend your excellency aright, it is, that you will communicate a copy of that letter, as requested, to the Captain General of Cuba.

I have the honor to renew to your excellency the assurances of my great respect and high consideration.

ROBERT BUTLER.

His Excellency Don JOSE COPPINGER, *Governor and Commissioner.*

No. 30.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *July* 6, 1821.

I have appointed Don Juan José Robles, storekeeper general, to receive the rations from the commissary of the United States; and he has orders to present himself to your excellency, without delay, to receive your directions to the person who will deliver them. Annexed, you have minutes expressive of the daily allowance to be consumed on the voyage: your excellency will thereby see that the amount is less than should be expected from the statement I gave you of the garrison and civil officers, which arises from the military officers not receiving rations, and a part of the civil officers being unable to remove for the present. I am sorry that, at the conclusion of this business, we are not more on accord, as appears by your excellency's expression of yesterday: "*As the transports are to be discharged at the Havana, the surplus provisions cannot be reclaimed by the United States; therefore, the supplies required by your excellency will be delivered, and remain subject to the determination of our Governments, as has been stipulated between us.*" As to the first part of this position, your excellency will be at liberty to reclaim or leave the provisions that will become a surplus, should the voyage fall short of the thirty days mentioned in my letter of the 3d; but, as it relates to supplies, I have not called for any; I have only requested that there should be provided, on your part, the provisions necessary to meet the wants of the voyage, should it exceed thirty days; so that not receiving (and there will not be received) more rations than for the persons your excellency has spontaneously offered to supply, our Governments can only have to decide, relative to provisions, on those not received by my officers, and those your excellency will furnish the two sloops chartered on account of yours to transport the stores; and on this last article it was that we had our accordance. This I have stated in explanation of that part of your letter of yesterday that I have cited here.

I have made the communication, to which the note I have the honor of answering has reference, respecting the *archives*, and in the same manner that your excellency has been pleased to express in its two last paragraphs. As early as possible, I will transmit your excellency the documents to be executed by the captains of the vessels that go under convoy, as requested by James Ramage, Esq., as it is my intention to deliver your excellency possession of the territory on the 10th of this month. You will be pleased to arrange for the coming forward, to-morrow, of the detachments that are to receive Matanzas and the look-out house, to get the necessary orders, and pass to the occupancy of these said posts.

I remain yours, with the highest respect and consideration. God preserve you many years.

JOSE COPPINGER.

By order of his excellency:

GEO. I. F. CLARKE.

No. 31.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *July* 8, 1821.

Your letter, bearing date the 6th instant, with the documents therein referred to, I had the honor to receive yesterday. The gentleman appointed to receive the provisions by your excellency has presented himself, and the commissary of the United States has been furnished with the necessary orders to make the delivery. Your excellency has not understood my expression about the *supplies required by you;* it had allusion only to the provisions which your estimate would call for to subsist the troops to the Havana. Lieutenant Wells has been ordered to receive the look-out house, and Lieutenant Davidson the works at Matanzas, and they are required to present themselves to your excellency for this purpose. Your last note, relating to the detention of the American schooner Stamper, in consequence of her having slaves on board, was received yesterday, just as I had concluded a letter on that subject to the commanding officer of the Porpoise. I am happy to find that he has thought proper to release the vessel, under existing circumstances, as there was evidently no intention of fraud in bringing those servants, and the difficulty arose entirely from the ignorance of the law of 1818 governing the shipment of slaves.

I have the honor to be, with esteem, your excellency's most obedient servant,

ROBERT BUTLER.

His Excellency JOSE COPPINGER.

Governor Coppinger to Colonel Butler.

[TRANSLATION.]

ST. AUGUSTINE, *July* 8, 1821.

Your excellency will receive, herewith, the document executed by the captains of the vessels freighted by me, and requesting convoy of the United States vessel of war. This instrument is according to our understanding on this subject, and I hope you will be pleased to pass the information to James Ramage, Esq., commander of the convoy. I have made all the arrangements in order to verify the exchange of flags on the forenoon of the 10th instant, and to that effect my troops will embark to-morrow, leaving only the guards of the forts, parade, and magazine, which will be relieved by yours in the time, form, and number we have agreed on.

Permit me to request that the provisions for the voyage may be delivered to the commissary I have appointed, to-day, if possible. I reiterate to your excellency my particular consideration and respect.

God preserve your excellency many years.

JOSE COPPINGER.

His Excellency ROBERT BUTLER,
Commissioner of the United States.

No. 33.

Colonel Butler to Governor Coppinger.

SIR: ST. AUGUSTINE, *July* 9, 1821.

I have the pleasure to acknowledge the receipt of your excellency's letter of yesterday. The sentiments therein expressed have met with that attention which a corresponding zeal dictates. I had communicated to the officer commanding the troops to organize his guards for the relief of yours, to correspond as nearly as the customs of our service approach to your organization. Captain Ramage has received due notice, and I had given an early order for turning over the provisions. Your excellency will now permit me to tender you my gratulations at the prospect of the happy conclusion of our respective duties which to-morrow will afford us, in executing finally the important document of interchange of authority, and to assure you that I shall ever bear in mind the friendly manifestations you have been pleased to make me, since the commencement of our intercourse; and renew to you the expressions of my great respect and personal consideration.

ROBERT BUTLER.

His Excellency Don JOSE COPPINGER,
Governor and Commissioner.

No. 34.

Memorandum of the manner of occupying the Fortress of St. Mark, at St. Augustine.

ST. AUGUSTINE, *July* 6, 1821.

The Spanish troops (excepting the detachment left in the fort) to be embarked on Monday, the 9th instant, ready to cross the bar on the following day.

There will be a salute fired by the fort on Tuesday morning, on hoisting the Spanish flag. During the disembarcation of the American troops, the flag of the United States will be hoisted along with the Spanish flag, when the fort will again fire a salute. The American officer who delivers the flag to remain in the fort until its delivery. When the American troops are formed near the fort, the Spanish flag will be withdrawn under a salute; the guards will then be relieved, and the troops of Spain will march out, and, on passing the former, they will mutually salute; when the American troops will be marched into and occupy the fortress.

ROBERT BUTLER, *United States Commissioner.*

Approved:

JOSE COPPINGER.

No. 35.

ST. AUGUSTINE, EAST FLORIDA, *July* 13, 1821.

The foregoing are copies of the correspondence in my possession, which passed between the Spanish commissioner and myself, having relation to the reception and occupancy of East Florida, numbering from 1 to 34, inclusive.

ROBERT BUTLER, *United States Commissioner.*

No. 36.

Act of cession.

In the place of St. Augustine, and on the tenth day of July, eighteen hundred and twenty-one, Don José Coppinger, colonel of the national armies, and commissioner appointed by his excellency the Captain General of the island of Cuba to make a formal delivery of this said place and province of East Florida to the Government of the United States of America, by virtue of the treaty of cession concluded at Washington on the twenty-second of February, eighteen hundred and nineteen, and the royal schedule of delivery of the twenty-fourth of October, of the last year, annexed to the documents mentioned in the certificate, that form a heading to the instruments in testimony thereof; and the adjutant general of the southern division of said States, Colonel Don Robert Butler, duly authorized by the aforesaid Government to receive the same: We having had several conferences, in order to carry into effect our respective commissions, as will appear by our official communications, and having received by the latter the documents, inventories, and plans appertaining to the property and sovereignty of the Spanish nation, held in the province, and in its adjacent islands depending thereon, with the sites, public squares, vacant lands, public edifices, fortifications, and other works, not being private property, and the same having been preceded by the arrangements and formalities that, for the greater solemnity of this important act, they have judged proper; there has been verified, at four o'clock of the evening of this day, the complete and personal delivery of the fortifications, and all else of this aforesaid province, to the commissioner, officers, and troops of the United States; and, in consequence thereof, have embarked for the Havana the military and civil officers and Spanish troops, in the American transports provided for this purpose, the Spanish authorities having this moment ceased the exercise of their functions, and those appointed by the American Government having begun theirs; duly noting that we have transmitted to our Governments the doubts occurring whether the artillery ought to be comprehended in the fortifications, and if the public archives relating to private property ought to remain, and be delivered to the American Government, by virtue of the cession; and that there remain in the fortifications, until the aforesaid resolution is made, the artillery, munitions, and implements, specified in a particular inventory; awaiting, on these points, and the others appearing in question in our correspondence, the superior decision of our respective Governments, and which is to have, whatever may be the result, the most religious compliance at any time it may arrive, and in which the possession that at present appears given shall not serve as an obstacle.

In testimony of which, and that this may at all times serve as an expressive and formal receipt in this act, we, the subscribing commissioners, sign four instruments of this same tenor, in the English and Spanish languages, at the above-mentioned place, and said day, month, and year.

ROBERT BUTLER,
JOSE COPPINGER.

[Documents communicated with the President's message of 28th January, 1822.]

I.

Extract of a letter from Mr. Worthington, Secretary and acting Governor of East Florida, to the Secretary of State, dated

ST. AUGUSTINE, *October* 9, 1821.

I enclose you an account of my proceedings in the case of the archives and documents which I have seized here. The separation of the papers is not yet accomplished. I must confess I regarded the Spanish officers remaining here more as a matter of speculative intrigue and espionage than any thing else. Since this last blow, the ex-Governor, whom I look upon as no better than the general run of Spanish provincial governors, has taken his departure, and I suppose many discontented Spaniards will follow his example. He and myself had a little dispute about a man of the name of Ugarte, the particulars of which I will send on, lest the affair should be misrepresented, for I am conscious of being correct in the procedure.

No. 1.

Mr. Worthington to Mr. Entralgo.

SIR: ST. AUGUSTINE, *August* 29, 1821.

Having, on my arrival here, understood that you had exercised the office of alcalde and notary, and that a large portion of the public archives and private records of this province were under your safe keeping, I immediately endeavored to find out in what state this subject had been placed by our commissioner, Colonel Butler, on the cession of East Florida.

It seems that the subject had been referred by him and the ex-Governor, Colonel Coppinger, to the decision of the United States Government, at Washington, and the Captain General of the island of Cuba.

Whether this disposition by those two officers would be deemed a sufficient justification for me to consider this important matter out of my cognizance, until I should be specifically instructed on it, would be a question of not

much consequence, if no inconvenience in the mean time was suffered by the delay. But, as it is considered that much inconvenience does grow out of the present situation of the archives and records, placed as they are, I deem it my duty, as legally authorized to exercise the functions of the late Spanish Governor of East Florida, to request that all the archives, records, and documents, (within your control or knowledge,) by virtue of the treaty between the United States and Spain ceding these provinces, and according to the customs and usages of civilized nations, may, in good faith and perfect amity, be passed over from the officers of Spain to the proper civil officer of the United States.

On the receipt of your letter of the 22d, I was of opinion that your peculiar situation would render it necessary to appoint some person to the place of alcalde; and, on the 28th instant, I received a letter from Governor Jackson, at Pensacola, stating that the Spanish subjects had declined taking the oaths of office to the United States, fearing that would operate as a relinquishment of their rights as Spanish subjects, and that he had appointed Judge Brackenridge alcalde there, who had received the archives. Not doubting from your letter that you had taken the same ground, I appointed Edmund Law, Esq. as alcalde and notary; he is expected here every hour. In the mean time, my private secretary will take charge, in my name, of all the archives and documents which ought to pass over with this province, and will sign a proper receipt therefor.

You mentioned you had a claim on those documents. I presume nothing can be clearer than that you must look to the Spanish Government for indemnification. But if the United States are liable to pay you, the transferring by you of the archives and documents to the proper person cannot impair your claim; so that, taking the subject in every point of view, I cannot see how any of the public archives or documents could have been delayed to be given up. If I had been appointed to accept the cession, I should have declined taking the territory without the archives, documents, &c.

As the ex-Governor, Colonel Coppinger, though still in this city, may not consider himself as holding any of the archives and public documents, so as to be addressed officially, and as this letter is intended to embrace and refer to all the archives and public documents of every kind which are yet undelivered and may remain in the hands of any of the Spanish officers, I must request you, as late an officer under him, to communicate this to him *in extenso*, as it is presumed that both of the Governments, and their officers, are inclined to give every facility to the officers of each other in their power, regarding matter of substance rather than etiquette or matter of form.

Very respectfully,

W. G. D. WORTHINGTON,
Secretary and acting Governor of East Florida.

No. 2.

Mr. Entralgo to Mr. Worthington.

SIR: ST. AUGUSTINE, *September* 5, 1821.

It is an incontrovertible axiom of justice that, while any affair is pending before the cognizance and for the decision of a supreme tribunal, it ought not to be innovated upon; as a contrary course would be violent, improper, null, and of no effect. Under this idea, and considering what was expressed in your official note of the 29th of August last, which I received yesterday evening at 6 o'clock, wherein you appear to be aware that the doubts arising between the commissioners, Colonels José Coppinger and Robert Butler, respecting the delivery of the archives under my charge, have been referred to the Government of the United States, at Washington, and to his excellency the Captain General of the island of Cuba; I do not consider it in the power of any subaltern authority to deprive me of the possession of the said archives, particularly as I have no idea of carrying away or disposing of them during the deliberation of the supreme authorities; and as their remaining here cannot occasion any prejudice to the public, who are more interested in their preservation than the Government; and if the parties require copies, I am ready to certify them, on payment of my proper fees.

The precedent which you point out to me, of the receipt of the public archives by the Government of Pensacola, cannot be a rule that the same should be done here, because the parallel circumstances do not apply.

In Pensacola, the office had no head, nor was there any notary public. Here, I have received from Government public documents and registers, which archives and protocols I bought at public sale; consequently, I am the legal head of the office, and nothing can deprive me of the use and benefit thereof, until I have been first satisfactorily indemnified, because they are private property, which have no connexion with the archives and documents directly relating to the property and sovereignty of this province; which genuine and literal words, stated in the second article of the treaty of amity concluded at Washington on the 22d of February, 1819, must guide any one wishing to ascertain the facts

I trust, sir, that, from your well known judgment and deliberate consideration, and having in view what I have thus laid before you, you will be pleased to suspend all proceedings tending to deprive me of my property, until the decision of the supreme authorities, to whose cognizance have also been referred the representations which I have more extensively made upon this head, and until the receipt of the necessary papers containing their decision.

With every respect, I am, sir, your most obedient, humble servant,

JUAN DE ENTRALGO.

No. 3.

Mr. Worthington to Mr. Entralgo.

SIR: ST. AUGUSTINE, *September* 15, 1821.

I have thus long delayed noticing your letter of the 5th instant, under a hope that, ere this, a definitive arrangement might have closed the controversy concerning the office contemplated in General Jackson's 4th ordinance, section 8th, which has been held by you under the Spanish Government, and to which Mr. Edmund Law has been appointed, on the 28th ultimo, under a commission from General Jackson, acting as Governor of the Floridas, and with the powers of the Captain General of the island of Cuba. My letter of the 29th ultimo informed you of that fact, and I introduced Mr. Law as that officer, personally, to you, I think, on the 7th instant. You still not only retain the papers of that office, but exercise the functions and receive the fees you were accustomed to do under the Spanish Government, and this, too, after this territory has ceased to belong to the King of Spain; after it is organized under the sovereignty of the United States, and has become their property, where no person holds an office unless having first taken an oath to support the constitution of the United States; and after (in your letter of the 22d ult.) you had declined taking that oath; and after your knowing, both by letter from me, and verbally, that Mr. Law is the present person who fills that office, and, of course, you must, to every official purpose, be *functus officio* since his appointment. In your letter of the 5th to me, you set out with stating what you call an incontrovertible axiom of right, *(axioma inconcuso de derecho,)* which, though it is an abstract opinion, I think unsound, even as a general rule, much less as

being conclusive on the point in controversy. I look upon the commissioners, either to cede or receive the province of East Florida, not of higher authority than myself, appointed by the President as the secretary of the province, and by General Jackson, exercising the powers of the Captain General of the island of Cuba, vesting in me the powers of the late Spanish Governor of this province of East Florida. The commissioners, I presume, were neither appointed by the President nor by the King; so that, to support your "*axioma inconcuso*," you should have shown that, for the reference to bind absolutely the Governor of this province, it was properly made by an authority higher than his. At most, the commissioners and the Governor, even *quoad* that particular subject, are co-equal, and any matter of expediency growing out of it, affecting the welfare and happiness of the province, passes under the cognizance of the Governor.

Your expressions "*violento*," "*vicioso*," &c. were not warranted, either by my acts or writings, respecting you or the office, nor did I expect such from you; for, to do them justice, I have always esteemed politeness as a trait in the Spanish nation. But epithets of this sort are what I am neither in my public nor private character in the habit of receiving. You will therefore be pleased, if it be necessary to say any thing further to me, to dispense with that kind of language.

I, therefore, on the first point, (the matter of reference of the commissioners,) come to this conclusion: that, acting as the Governor of this province, whenever I deem it necessary for the good and interest of the people of this territory to make any order respecting the archives, documents, &c., even pending the reference, I have the power to do so; and am only responsible for that, as well as every other official act, to the President, the Governor of the Floridas, and the American people. Respect and delicacy towards the commissioners would make me not rashly or imprudently, I trust, interfere; but, should I feel it my duty, I will risk all responsibility.

Now, sir, as to the right of your retaining what you say you received from the Government—"public documents and registers, which archives and protocols," you say, you bought at public sale; that they are private property, and cannot be taken away from you without your being first satisfactorily indemnified.

I have no hesitation in saying that, according to the law of nations, and under the usages and customs of nations in their changes of property and sovereignty, it is a necessary incident to that sovereignty that the archives and documents in a country, which (though you may have bought the usufruct) are, in fact, the property of the community, must pass to the Government, to whom the sovereignty and property of the conquered or ceded territory passes. The second article says positively what shall pass—"archives and documents which relate directly to the property and sovereignty of the ceded provinces." It is not to be inferred that the intention of the parties who made the treaty was thereby to exclude all of the archives and documents which belong incidentally to that property and sovereignty, and which, according to the usages and customs of nations, as belonging to the people of the ceded territory, pass with it. The little trite legal maxim, *expressio unius est exclusio alterius*, cannot govern in construing compacts between nations, which are to be interpreted according to the broad and liberal rules of national law, and the just principles of natural justice.

I understand the archives and documents you hold are, for instance, the original grants for lands, &c., deeds from one individual to another, the original last wills and testaments of the inhabitants of this province, &c.; that they were lodged in your office by the owners of them, for your trouble in receiving and filing or recording which you received the legal fees, and gave copies to persons who required them, and received your charge for that service; that in the office you retained the originals; that, on the decease of your predecessor, the situation or the privilege which he held was, for the benefit of his family, set up to public sale; that you gave about $600 for it; that you have held it eight or nine years, and it is said to have yielded you from about $15,000 to $20,000, at the least, in that time; that now you decline giving it up, unless you are paid about $3,000 for it. If this statement be incorrect, I will, with great pleasure, on being truly informed, alter it to suit the real state of the facts. I have had it from persons who might be supposed to know, and on whose information and veracity I have great reliance.

Saying nothing against a Government setting up an office of profit, high trust, and confidence, of this kind, to public auction, (because independent nations have a right to manage their internal affairs, generally, in their own way,) and looking on your purchase of it perfectly fair and justifiable, I should think that the nation which first sells it to you, and then sells it from you, must be the one to indemnify you. For every person, either civil or military, who may have purchased a place or commission from a Government selling a province, which becomes extinguished or superseded by the administration of the Government purchasing, might, under this rule, claim an indemnity. The doctrine, I think, in the general, too monstrous for a moment to be tolerated, and I think your claim in the particular cannot be supported; because I look on those archives and documents not as your property, but as originals belonging to the community—to the individuals who lodged them with you, having paid you for the filing and recording, also for your certified copies; so that you took the office or the privilege subject to the chance of its being transferred by Spain to the United States; and, I suspect, the uncertainty and probable shortness when that event might take place was the cause of your purchasing it so low; therefore, not only the law, but the equity is against you.

These are my principal reasons why the archives and public documents should not remain in the hands of an officer of the nation who has sold. He is not like one of its own citizens, entirely amenable to the purchasing Government; indeed, he may be hostile to it. And although, for myself, I feel perfectly safe in confiding in your honor and integrity, while the archives and documents remain with you, yet, if this case of yours is to become a precedent in other negotiations of this kind, archives and documents might be withheld in the hands of public officers who might destroy, alter, or mutilate them; for instance, might falsify or antedate grants of lands, &c.

Another reason: on seeing the fees of office which have been charged under the Spanish Government, the United States Government might wish to increase or diminish them, so as to suit the state of things.

In less than twenty years the United States have purchased the whole of Louisiana, Florida, &c. His Britannic Majesty may, in less than that time, wish to sell the Canadas; or His Catholic Majesty, Cuba or Texas; or the United States may, before that time, possibly, retrocede some of its possessions to these Powers. I wish, therefore, whether those events ever occur or not, to enter this now as my solemn protest against the present case being considered as an acquiescence in the right of property of the archives and documents being retained by you, or your still receiving their usufruct, unless you had been specially appointed by our Government, or were still holding it under the construction of General Jackson's proclamation of the 1st of July. But this has been superseded by the appointment of Mr. Law; so that, on a retrocession, I should hold up my hand as much against an American holding over an office in this way as against an Englishman or Spaniard; for, although I have as high confidence in the integrity of an Englishman as any one, yet I would not afford a precedent of this kind.

The history of Lord Verulam, the high chancellor of England, shows that no rank nor talents can secure a man against malversation in office; which, if it happened to one whom Mr. Pope has called "the wisest, brightest, meanest of mankind," it is only discreet to avoid placing any one in the way of temptation. Having stated that the King of Spain, under the treaty of Washington, as necessarily incidental to the property and sovereignty of the Floridas, by the spirit of the treaty, under the usages and customs of nations, notwithstanding the apparent specifi-

cation in the second article, has passed over all archives and documents which are common property to the people of these provinces, and that those in your office are of that character, I will now show you that, by the law of nations, he had a right to do so.

It would be useless to make a parade of learning, by referring to a large list of writers who are uniform in this doctrine. Vattel happens to be on my desk. In his treatise on the Law of Nations, and applied to the conduct of nations and sovereigns, in book 1, chap. 21, sect. 262, he says, "That it is necessary that nations should treat and transact their affairs with validity; without which they could have no method of terminating them, and of placing themselves in a state of tranquillity; whence it follows that, when a nation has ceded any part of its property to another, the cession ought to be held as valid and irrevocable, as it is done in virtue of the *notion of property*. This principle cannot be shaken by any fundamental law, by means of which a nation might pretend to deprive itself of the power of alienating what belongs to itself; for this would be to forbid all contracts with other nations, or to pretend to deceive them. A nation, with such a law, ought never to treat of its property; if it is obliged to it by necessity, or determined to do it for its own advantage, it must renounce its fundamental law. It is seldom disputed that an entire nation may alienate what belongs to itself; but it is asked if its conductor, if its sovereign, has this power? The question may be determined by the fundamental laws, if the laws say nothing directly on this subject. This will be explained in our second principle.

"If the nation has conferred the full sovereignty on its conductor; if it has committed the care of it to him, and has, without reserve, given him the right of treating and contracting with other states, it is considered as having invested him with all the powers necessary to make a valid contract. The prince is then the organ of the nation; what he does, is reputed done by itself; and, though he is not the proprietor of the public property, his alienations are valid, as being duly authorized."

Now, sir, even if this peculiar custom of Spain, the considering this office that you hold private property, were a fundamental law of the kingdom, I conceive that the transfer by the sovereign, under this construction of the law of nations, would pass over to the United States, under the "notion of property," the archives and documents in it being of common use to, and the original property of, the inhabitants of the territory; unless, in the treaty, special mention had been made of them, and they had been excepted. If these archives and documents would have passed, under the custom of nations; if the words "which relate directly" had been omitted—the introduction of those words cannot alter the great rules of right and construction which exist amongst civilized, high-minded, and just nations, in the exposition of their contracts; otherwise, those words must be regarded as a matter of catch and legal quibble, fit for cunning and litigious individuals, and cannot be imputed to the Spanish sovereign, or to the Chevalier de Onis, who drew it up. Those words were to specify, pointedly, certain archives and documents, without excluding or abridging the right to others which may and ought to belong to the purchasing nation, as of primary or secondary importance to the citizens who are incorporated under the treaty. Even in our ordinary grants, deeds, muniments, &c. of title, &c. pass to the grantee, and the contract is construed most strictly against the grantor: this rule equally applies to nations. Admit, for a moment, that the archives and documents, or the office, is your private property; that you can do what you choose with it—and you may take it to the Havana, or the Pyrenees, and the citizens of this province would have to go there to investigate their titles, &c., and have foreign fees, charges, &c. entailed on them and their posterity. This is what neither the King of Spain nor this treaty could have intended. It would be a transfer surrounded with absurdity, and deficient in good faith, which I am not disposed to impute to His Catholic Majesty or his ministers. On the whole, as I told you on my first interview, I do not blame you, if you think yourself fairly entitled to remuneration, to get it; and I repeat, your own Government is, in my mind, the party you have to look to. What, I am sorry to say, I must differ with you in, is, that you should not have given up the archives and documents to the officer who has been appointed under the United States Government. Your claim neither against them nor Spain could be weakened in the least by that act. Indeed, I think it would have been placed in a higher and more favorable light; because you cannot, for a moment, think that either of those nations, after the archives passed over from you, would be less prompt and just towards you than if you held them fast in your own hands. Pass them over, make out your claim against either or both Governments, and I am certain justice will be done in the premises. If you are entitled to any thing, you will get it; if not, I presume you will not wish it. I assure you, so little doubt have I had on this subject, that, had you not been fairly in office, and the reference of the commissioners calling for some delay, as a matter of respect to them, and your being an isolated subject, in a manner completely within the power of our Government—therefore, any act of the Government against an individual might seem authoritative and domineering, perhaps unjust—I should have sent the officer, with a competent power, to have taken peaceable possession of those archives, documents, &c. Any thing which may clearly be your private property shall always be most religiously respected. As it is, I wish you to consider well what course you will take. I do not wish to prejudice your claim; indeed, any thing I can fairly do for you I shall, as the chief executive officer of this province, consider myself bound to do. But I shall deem it useless again to write to you on this matter. As you have not mentioned in yours of the 5th that you laid my letter, as requested, *in extenso*, before the ex-Governor, Colonel Coppinger, I presume you did not, and it is useless to repeat that request. Mr. Law, who hands you this, will receive your determination.

Yours, with all proper respect, &c.

W. G. D. WORTHINGTON,
Secretary and acting Governor of East Florida.

No. 4.

Commission to Messrs. Bell, Forbes, and Law.

GENTLEMEN: ST. AUGUSTINE, *October* 1, 1821.

I do myself the pleasure of appointing you, hereby, to the execution of the following delicate and important commission. You will, without delay, demand and receive from all and every of the subjects of the King of Spain, or other persons who are now here, all the remaining archives and documents which ought to have been transferred to the United States on the cession of this province, and which may be retained under any pretext whatever.

It is supposed that all the papers which shall properly come under your cognizance may be had on application to Colonel José Coppinger, late commissioner and Governor of this province, and his secretary, Mr. Aguilar; also, to Mr. Juan de Entralgo, late notary, register, &c.

To put you in full possession of this subject, I enclose you papers marked 1, 2, 3, 4, &c.

It is supposed there will be no refusal to deliver to you all the archives and documents contemplated by this order. Should there be, you are hereby authorized to summon sufficient force to your aid, by calling on the high sheriff, Captain Hanham, with the *posse comitatus*, or, if absolutely necessary, and in your opinion preferable, by requesting Colonel Eustis to send you a competent detachment from Fort St. Mark's.

You will keep and render a particular account of your proceedings, and I name to you Mr. John Bird and Mr. Anselm Gay as clerks to this commission. You are hereby further empowered to send for persons, papers, and proofs, to ascertain any facts you may deem necessary respecting said archives and documents, and to take declarations and affidavits on oath, as may be proper on this subject—

1. Of the archives and documents which were here at the time of the cession.
2. Those which may have been concealed or sent away.
3. Those which now are delivered over; and all such other and further matters and things touching the present service as in your sound discretion you may see fit.

At the same time, I wish this duty to be performed with promptness and effect; I wish every respect becoming the American character, I trust so truly famed for its sound regard both for public and private rights, and its pure love of justice, to be shown, in particular, to the late officers and subjects of His Catholic Majesty; and it is confiding so fully in your high official and private reputations, that I select you for this trust, and leave its execution so fully to your judgment and discretion.

Captain Bell having been here before and at the cession, and having exercised the functions of acting Governor of this province before my arrival, will be considered as president of this commission; Colonel Forbes, the marshal of the United States for the Floridas, and late commissioner to the Havana to receive those archives and documents, the second named; and Mr. Law, the present alcalde, will receive the archives and documents, agreeably to General Jackson's ordinance on the subject.

The artillery, munitions, and implements, mentioned in the *procès verbal* of the 10th July last, by Colonels Coppinger and Butler, are to remain as they are; but none of the archives and documents which you shall deem ought to have been delivered over with the province are to be further delayed.

You will, I am confident, be correct, cautious, and decided in the premises.

I have the honor to be, very respectfully, yours, &c.

W. G. D. WORTHINGTON,
Secretary and acting Governor of East Florida.

To JOHN R. BELL, JAMES G. FORBES, and EDMUND LAW, Esqs.

No. 5.

Report of the Commissioners.

SIR: ST. AUGUSTINE, *October* 4, 1821.

The undersigned commissioners, appointed by your letter bearing date the 1st of October, 1821, empowering them to demand of Colonel José Coppinger, late commissioner on the part of His Catholic Majesty to deliver the possession of East Florida to the commissioner on the part of the United States, and the archives and documents relating to the property and sovereignty of the province, and to demand of Juan Blas de Entralgo, late notary, a register, &c. of this province, the archives and records in his possession, having executed the commission intrusted to them, beg leave to submit the following report of their proceedings:

That, in pursuance of your instructions, the undersigned proceeded to the office of Don Juan B. de Entralgo, at 4 o'clock of yesterday: having entered, and finding the son of Don Entralgo alone in the office, a messenger was despatched for him; on his arrival, a formal demand was made for all the archives and records in his possession, relative to the property and sovereignty of the province. To this demand Don Entralgo replied that the papers were in his possession, and must there remain, until the question respecting them, submitted to the decision of the two Governments, should be determined, as agreed upon between Colonel Coppinger and Colonel Butler. And upon the undersigned informing Mr. Entralgo that their instruction was to take immediate possession of the archives and records in his possession, he replied that such an act would be considered by him as forcible, and against his consent. The undersigned then proceeded to take possession of the papers found in his office, excepting such as related to his private concerns, and, having put them in five boxes, requested Mr. Entralgo to put his seal upon them; which offer he declined. The boxes were then deposited in the public store for safe keeping.

In the mean time, one of the undersigned, accompanied by one of the secretaries to this commission and the sheriff of St. John's county, proceeded to the house of Colonel Coppinger, and made a similar demand, and received the same answer as given by Don Entralgo. A request was then made that Colonel Coppinger would be present when the papers in his possession should be taken; and was also requested to affix his seal to the boxes, together with one of the undersigned, there to remain until an examination of the papers should take place: both of which propositions were rejected by him. He continued to protest against all the proceedings of the undersigned, and refused to open the door of his office. The undersigned then proceeded, as the only alternative left them, to force open the door. They then took possession of the papers, amounting to six boxes, boxed them up, and deposited them in the public storehouse for safe keeping. In order to insure the safety of the papers, archives, and records, which the undersigned have taken possession of, a guard has been placed in front of the building in which they are deposited. Before closing this report, the undersigned further state, that letters have been addressed by them to Colonel Coppinger and Don Entralgo, offering to receive any communication that they might think proper to make. The former has informed them that he will make such communication, and the latter has replied that he has none to make.

All the papers will remain in the place where they are at present deposited, until the undersigned receive your instructions relative to them.

All which is respectfully submitted.

JOHN R. BELL,
J. G. FORBES,
EDMUND LAW.

W. G. D. WORTHINGTON, *Secretary and acting Governor, &c.*

No. 6.

Appointment of Secretaries.

GENTLEMEN: ST. AUGUSTINE, *October* 3, 1821.

I do myself the pleasure to appoint you as secretaries to the commission of the 1st instant, respecting the archives and documents. You will be pleased to attend the commissioners to-morrow morning at nine o'clock, and proceed to act agreeably to their instructions.

In this duty you are selected for your ability and trustworthiness.

Yours, respectfully,

W. G. D. WORTHINGTON,
Secretary and acting Governor of East Florida.

Judge FARQUHAR BETHUNE, Mr. PATRICK LYNCH, and Mr. WM. REYNOLDS.

II.

Extracts of a letter from Mr. Worthington, Secretary and acting Governor of East Florida, to the Secretary of State, dated

ST. AUGUSTINE, *December* 11, 1821.

I now enclose you the balance of the papers in the case of the archives, &c., as promised in my letter of the 4th instant, marked Nos. 9, 10 and 11.

As I have written officially to yourself and General Jackson on the proceedings had here respecting the archives and documents taken into our possession from the Spanish ex-Governor Colonel Coppinger, and the escribano Mr. Entralgo, it seems to me premature and improper to follow Colonel Coppinger's example, by publishing the correspondence, &c. in the newspapers. However, if it should be deemed necessary and proper, I have not a particle of doubt that our proceedings can be vindicated from every aspersion which he or any one else has attempted to cast on us.

No. 9.

Instructions to Secretaries.

GENTLEMEN: ST. AUGUSTINE, *October* 4, 1821.

In pursuance of the authority vested in you by the letter of appointment from the acting Governor of East Florida, bearing date the 3d instant, you will proceed to the examination of the papers and documents contained in the boxes deposited in the public store-room. The object of this examination is to separate those papers which clearly relate to the property of individual citizens of this province, or of the late Government thereof, from those which have no relation thereto, but are more properly the property of the late Government exclusively. Under the former description of papers and documents, it is deemed that the following are embraced, viz: The royal or other orders, authorizing the Governors of this province to issue grants to individuals for lands, lots, and squares; the evidence of indemnity offered by Great Britain to her subjects who might leave their property in the province, and retire to her territory after the cession to Spain; the proclamation of the Spanish authorities calling on all those individuals to come and dispose of their property, or peaceably occupy it within certain periods, or the same would be confiscated, and the order of confiscation thereafter; the original records of all grants made in the province, either by His Catholic Majesty, the Captain General of Cuba, or the Governor of this province, respectively; the original records relating to all trials and decisions embracing individual property, and the original records relating to the execution of wills and administration of estates; the records of transfers of property by individuals; the archives of the royal treasury, and of the treasurer of the province; the archives relating to the property or rights of the corporate authority of St. Augustine; and, in general, all papers and documents which clearly relate to and may serve to elucidate the rights of individuals, or of the late Government of Spain, and which are omitted to be here enumerated. You will make an inventory of all these papers, and will, in like manner, make an inventory of such papers as are not embraced within the scope of these instructions, which you will deposite in a separate box or boxes, and mark the same. After having executed the commission with which you are charged, you will report the result of your proceedings to the commissioners.

JOHN R. BELL,
JAMES G. FORBES,
EDMUND LAW.

To Messrs. BETHUNE, LYNCH, and REYNOLDS, *Secretaries, &c.*

No. 10.

Messrs. Bell and Forbes to Mr. Worthington, Secretary and acting Governor of East Florida.

SIR: ST. AUGUSTINE, *November* 5, 1821.

The undersigned commissioners, under your letter of appointment, dated the 1st of October, 1821, to take into possession the records and archives then in the hands of Colonel Coppinger and Don Juan B. de Entralgo, late Spanish Governor and escribano, in addition to the partial report of their proceedings, beg leave to submit the following, as a final report of their official conduct, and of the secretaries under them, appointed for the examination and separation of the said archives and records.

On the 5th of October, 1821, Farquhar Bethune, William Reynolds, and Patrick Lynch, Esqs., the secretaries alluded to above, attended, and were sworn faithfully to discharge the duties of their office. The tenor of the oath, and the other subsequent proceedings thereon, your excellency will find recorded in a book used for that purpose, and which accompanies this communication.

The undersigned continued to meet from day to day, for the completion of their commission, until the 23d of October, 1821, when the commission would have adjourned, having been informed by the secretaries that they had finished the examination, and would report thereon as soon as practicable; but a more ample examination of box No. 3 having been deemed expedient, the undersigned attended with the secretaries until the same was examined.

The undersigned have this day received from the secretaries above named a report of their proceedings, accompanied by registers, marked Nos. 2 and 3; which report and registers will be submitted to your excellency's inspection. By which report it appears that said secretaries have discharged the commission with which they were intrusted; and the register will show your excellency what papers are retained as coming within the purview of your instructions, as also those papers that are to be returned to the Spanish Government.

JOHN R. BELL,
J. G. FORBES.

W. G. D. WORTHINGTON, *Secretary and acting Governor, &c.*

No. 11.

Mr. Worthington to the commissioners.

GENTLEMEN: ST. AUGUSTINE, *November* 7, 1821.

I had the honor to receive your additional report of the 5th instant, on yesterday evening, on the subject of the records and archives; and I felicitate you on your conclusion of the difficult and laborious duties which it was deemed necessary to assign to you, which you so cheerfully undertook, and so faithfully have discharged. I have been an eyewitness of the open and assiduous manner in which you conducted the investigation; and I have no doubt, when the voluminous mass which you have transmitted shall be criticised, it will prove to be an honest and able examination.

Without detracting from the other commissioners, I must be permitted to pay a particular compliment to the president, who, during the whole tedious inquiry, while the epidemic raged in the city, with the utmost punctuality presided at the board. I know the various duties of Colonel Forbes, and the sickness of Mr. Law, prevented them giving such full attendance as they otherwise would have done. I am perfectly satisfied with them and the whole board. You will be pleased to present my respects to the secretaries, Messrs. Bethune, Gay, Lynch, and Reynolds, for the faithful discharge of their duties.

And now, gentlemen, I must be permitted to say, notwithstanding the clamor which has been raised, on a similar proceeding, respecting the archives at Pensacola, and even against the affair here, that you have conducted and finished this commission in a manner to challenge the approbation of every disinterested and honest American in this country, and I hope even of every unprejudiced Spaniard, who possesses one spark of true Castilian honor and sincerity.

With great respect, &c.

W. G. D. WORTHINGTON,
Secretary and acting Governor of East Florida.

To JOHN R. BELL, JAMES G. FORBES, and EDMUND LAW, Esqrs.

Letter from G. Walton, Secretary of West Florida, to the Secretary of State.

SIR: PENSACOLA, *October* 29, 1821.

Presuming that the President would be desirous to be informed of the state of affairs in this province, I have thought it advisable to communicate with the Department direct, not having yet heard of the arrival of the Governor at Nashville, for which place he set out on the 8th instant.

The Department is already fully informed of the disposition made by General Jackson previous to his departure. He was pleased to delegate to me the powers exercised by the former Governor of West Florida, accompanying my commission with a letter of instructions. Since his departure I have been in the exercise of those functions, and shall use my best exertions to justify the confidence of the President and the expectations of General Jackson.

Nothing suggests itself, at present, of sufficient importance to communicate. All things go on well, and the march of the Government is peaceable and undisturbed.

The excitement occasioned by measures deemed necessary by the Governor is subsiding, and, since the departure of the Spanish officers, there seems to be a much greater disposition on the part of the Spanish inhabitants to cultivate a friendly feeling. Nothing has been heard of General Jackson since he left Claiborne. By this time I think it probable that he has reached the State of Tennessee.

I have the honor to be, with great consideration, your obedient servant,

GEO. WALTON,
Secretary of West Florida, and acting Governor of the same.

JOHN QUINCY ADAMS, *Secretary of State.*

[The following additional documents, in relation to transactions in the Floridas, were subsequently laid before the House by the Committee on the Judiciary.]

SIR: DEPARTMENT OF STATE, WASHINGTON, *December* 22, 1821.

I have the honor to enclose, for the information of the committee, agreeably to the request contained in your letter of the 11th instant, the papers, of which a list is subjoined; to which will be added copies of other papers upon the same subject, (the establishment of a Government over the Floridas,) as soon as they can be prepared.

I am, with great respect, sir, your obedient and very humble servant,

JOHN QUINCY ADAMS.

JOHN SERGEANT, Esq., *Chairman of the Judiciary Committee H. R.*

General Jackson to the Secretary of State.

SIR: PENSACOLA, *July* 30, 1821.

I seize the first moment of leisure I have been able to obtain for more than a month to lay before you an account of the commission confided to me in relation to the Floridas, and also the measures adopted for their government until the will of the President be known.

In my letters from Blakely, of the 1st and 7th of May, (duplicates of which, with accompanying documents, have been forwarded,) I informed you of my arrival at that place; of my disappointment in not hearing from the Hornet; of my despatching Messrs. Brackenridge and Bronaugh with a letter to Governor Callava; and of my communication with Montpelier. I had with confidence calculated on the arrival of the Hornet by the 1st of May; and, from a knowledge of the habitual apathy of Spanish functionaries, I thought it advisable, even before the arrival of the Hornet, to announce my commission to the Spanish Governor of West Florida, and, after offering to exhibit the royal order and my commission for receiving the country, to ask information upon certain points which would tend to expedite and facilitate subsequent arrangements. From his letter, (which has also been forwarded,) it will be seen that he declined to comply with my request; but I am well satisfied that this early step had a favorable operation upon our subsequent transactions. It drew from him a promise that the surrender of the country should not be delayed by him, in case he should be the person commissioned for the purpose; and I think it not improbable that this measure had also some effect with the Captain General of Cuba. I had received intimation, both at New Orleans and at Blakely, that speculations were in contemplation, to accomplish which great pains would be taken by the parties concerned to delay the surrender of the ceded country; and, since that period, I have heard it frequently expressed as a matter of surprise that no attempt of the kind had been made, at least in this question.

On the return of Messrs. Bronaugh and Brackenridge, I proceeded to Montpelier, having been previously joined, by my aid-de-camp, Captain Call. On the 11th I again addressed a letter to the Governor of West Florida, which I despatched by Captain Call, who was instructed to remain at Pensacola until the arrival of the Hornet, (for I still confidently hoped this could not be delayed many days;) and also authorized Captain Call to make any pre-

liminary arrangements with the Governor, which he would be willing to enter into. In my letter to him of the 11th, after expressing my regret at his not considering himself authorized to give the information I had asked, I informed him that orders had been given to provide transportation for six hundred men, with supplies for their voyage; that the same was then ready, and would sail for Pensacola on the first notification of the receipt of the royal order at that place. In doing this, my intention was to deprive him of all excuse on the score of his not having had sufficient time to make his preparations for quitting the country. I had previously informed him of the assurances of the Spanish minister at Washington that no delay should be experienced in the surrender of the Floridas, and which I now took occasion to repeat. After stating the unpleasant situation in which the American troops were placed in the interior, I proceeded to inform him that two public vessels, the Shields and the Amelia, were then at anchor in Mobile bay, with supplies for Pensacola and St. Mark's, and proposed to make a deposite of the supplies intended for our troops at the former place; and also requested to be informed whether it would meet his wishes to have the troops of Spain brought from St. Mark's to Pensacola, as a preparatory measure to the surrender of the country, so that all the Spanish officers and soldiers might sail together under the same convoy. This was intended to render the evacuation more convenient and agreeable to them. I had begun to entertain serious doubts of the speedy arrival of the Hornet, and thought that, if a preliminary arrangement of this kind could be made, time might be saved. The Governor, in his reply of the 16th, consented to the proposal of making a deposite of the provisions for the American troops, approved of the proposal respecting the transportation of the troops from St. Mark's, but denied that he had any power to make any preliminary arrangement, or do any act connected with the surrender of the country, until he should have received orders from his superior. The vessels accordingly sailed for Pensacola, and the provisions were placed in deposite at that place. It may be well here to observe, that, at a subsequent period, the Governor thought proper to claim the benefit of the proposal to bring the Spanish troops to this place from St. Mark's, although not assented to when made, and which was acceded to by me from a wish to deal with him in the most liberal and generous manner, at the same time that I was determined to permit no idle and useless delay.

Nearly two weeks had elapsed after the departure of Captain Call without hearing a word of the Hornet. The anxiety which I experienced can be more readily imagined than expressed. Without speaking of my own situation, and that of my family, which was extremely uncomfortable, I began to entertain serious apprehensions that there was no intention to surrender the country before the 22d of August. During this painful state of suspense, many rumors were afloat, and how far well or ill-founded it was impossible for me to say. I was utterly unable to conjecture the cause of the delay of Colonel Forbes; it appeared to me that a few days would have sufficed for the transmission of the royal order to the Floridas; and I took it for granted that if any considerable delay was likely to be experienced in procuring the archives, a person could be left to receive them, in order to accomplish the more important object of obtaining immediate possession of the ceded territories. On an attentive examination of the stipulations of the treaty, I was satisfied, in my own mind, that the seventh article, relating to the transportation of the Spanish officers and troops, and the evacuation of *the places* occupied by them, was a different matter from the surrender of the sovereignty of the country, as stipulated under the second article of the treaty, and for which no specific time was appointed, and therefore to date from the exchange of ratifications. This construction was confirmed by the stipulations on the subject of duties, by which the twelve years' privilege granted to Spain was to commence three months after the ratification, and the provision (which, under a construction different from that I have given, would have been entirely unnecessary,) that the duties collected by the Spanish custom-house officers, from the time of the exchange of ratifications until the surrender, might be retained. The circumstances attending the treaty, although not appearing on the face of it, I was satisfied ought, in good conscience and in truth, to place the date of its ratification on the part of Spain as far back as October last. These were considerations which I kept in reserve, to be acted on only in case of the most urgent necessity, having set out with a determination to carry the treaty into effect, if possible, in harmony and good will. I was also determined, on the arrival of the royal order, to permit no useless delay, as I conceived that after this the termination of the business was left to Governor Callava and myself, (our respective Governments having confided it to us,) and I was determined that, on such event, nothing should be wanting on my part.

On the 20th Captain Call returned to Montpelier in company with Mr. Thompson, who brought me the first certain information of the Hornet. Mr. Thompson was the bearer of a letter from Colonel Forbes, (to which I refer you,) which, although far from being satisfactory, together with the assurances of Mr. Thompson that the Hornet would probably have sailed in a few days after his departure from Havana, served in some measure to remove the uneasiness I had experienced. I began to entertain a hope that the long-expected vessel might at last arrive. In anticipation of this event, I addressed a letter to Colonel Gadsden, who had shortly before reached Pensacola, and appointed him a confidential agent to reside at that place, and for the purposes expressed in my letter to him of the 21st of May, to which I refer you. Having occasion for the services of Colonel Gadsden near me, I transferred his powers to Captain Call, and was joined by the former at Montpelier. On the 22d I addressed a letter to Major Fanning, the officer commanding at Fort Gadsden, giving the necessary orders for the taking possession, and occupation of St. Mark's; to which I must also refer you, as more fully explanatory of the arrangements made with a view to that operation.

From this period until I addressed you my letter of the 30th of May, I remained at Montpelier, in the same uncertainty, and with unceasing solicitude. Reports reached me that Captain Read of the Hornet had fallen a victim to the climate of Havana, and that the greater part of the crew were unfit for duty. My letter of the 9th of June will show the painful anxiety which I felt during this period, not a little heightened by the bad state of my health. I prepared, in the mean time, an express, to be despatched to St. Augustine, with instructions to Colonel Butler, and wrote him the letter under date of the 2d of June, to give him the earliest information of events in this quarter. I was apprehensive that the vessels employed to transport the troops from East Florida would have arrived, and occasioned a heavy demurrage, as the same precautions could not well be taken there as in this quarter, where we were more convenient to the place at which the transports were to be procured.

I had almost given up all hope of the arrival of the Hornet, when, at last, I was informed by express that she had arrived at Pensacola on the evening of the 9th of June, after having been detained six weeks in Havana for reasons which to me still remain unaccounted for. A letter from Colonel Forbes was brought by the same express, informing me of his arrival at Pensacola, in company with Don Alba, a commissioner on the part of Spain. I refer you to this letter, and to my reply, dated the 11th. I could not but remark with some surprise that the order of the Captain General was for the delivery of West Florida to Colonel Forbes, as commissioner on the part of the United States: this was owing to a mistake, Colonel Forbes informs me, which, although discovered before the sailing of the Hornet, could not be corrected for the want of time. The length of time which elapsed from the date of the order and the sailing of the Hornet is a circumstance which, I must confess, I do not clearly understand. It is by no means accounted for by the delay in procuring the archives; all that could be procured were a few extracts from the treaty of 1783, between Spain and Great Britain, and which, I presume, is to be had in any common

library. The important papers relating to the grants of land in this country, as well as other documents directly relating to the Floridas, must still be the subject of negotiation between the respective Governments. I forbear to make any further remark on this head; but will refer you to my letter of the 11th, sent by express after my former letter had gone, and also to the communications of Colonel Forbes himself.

Without loss of time, I addressed the letter of the 12th to Governor Callava, having previously received his communication of the 10th, brought to me by Captain Call. I expressed my gratification at the promptitude with which he had imparted to me the information he had promised on the arrival of the Hornet, and was pleased with his frankness in waiving any advantage of the order being for the surrender of the country to Mr. Forbes. To meet what appeared liberal with equal liberality, I assented to his request that the Spanish troops should be brought from St. Mark's, to be embarked with those at this place. Captain Call, who had been authorized to make the arrangement for the evacuation of St. Mark's, had been met by the difficulty anticipated by you in relation to the construction of the treaty. The Spanish Governor required a receipt for the cannon and munitions of war left at St. Mark's, contending that the former were not included under the term "*fortification.*" To this proposal I acceded, according to the terms expressed in my letter of the 12th, in which I urged all the arguments which then suggested themselves to me, to prove the right of the United States under the second article of the treaty. I also brought into view the manner in which the seventh article was expressed, and the liberal construction placed upon it by the President, under a belief that a construction equally liberal would be placed by Spain on the one before mentioned; and finally referred him to Captain Call, to whom I had given, in my letter of the same date, authority to make a provisional arrangement, in case the Governor, after the reasons I had given, should persist in his construction of the treaty: this was, to receipt for the cannon on the forts, on condition that receipts should also be given for the transportation furnished for civil officers, servants, &c., and provisions, not provided for by the express letter of the seventh article; giving it, at the same time, to be distinctly understood, that the United States should, by no act of mine, be considered as abandoning their right to the cannon as part of the appendages of the forts. An inventory of the munitions of war embraced in their claim was to be taken, and the receipt to specify that they had been received with the forts, but claimed by the Spanish commissioner as not included in the cession, and to be held by the American agents, subject to any future disposition which might be made by the respective Governments; the Spanish commissioner to receipt for provisions, transportation of families of officers, civil officers, &c., in the same form; and the Governor was distinctly informed that, in case the Spanish Government insisted upon the delivery of the one, the United States would insist upon payment for the other. Captain Call was also instructed, in case this proposed arrangement should not prove satisfactory, to refuse transportation for every thing not literally included in the seventh article of the treaty; and at the same time to protest against the dismantling the forts, as an act on the Governor's own responsibility, and as a violation of the second article of the treaty. As an evidence of my desire to settle the business in the most satisfactory and amicable manner, Captain Call was instructed to comply with the Governor's request for transportation of two field-pieces from St. Mark's, and some ordnance stores. In the same letter, I informed the Governor of my intention to move in a few days into the vicinity of Pensacola. I also gave him to understand that the transports deemed necessary had been provided, and might shortly be expected in Pensacola.

On the 16th of June, after an unpleasant journey, on account of the unusual rains which had prevailed for a considerable time, I arrived at the house of Manuel Gonzales, distant fifteen miles from Pensacola, where I intended to await the arrival of the troops, and to remain until I had officially announced to the Governor my entrance into the Floridas for the purpose of receiving possession, as commissioner on the part of the United States. On the day of my arrival at Manuel's, I wrote to the Governor, by Colonel Gadsden, informing him of my arrival at that place, prepared to accomplish the object of my commission. I expressed a wish that a period as early as possible might be concluded on, to our mutual convenience, when we might meet, exhibit our credentials, officially recognise each other, and enter on the duties of our respective commissions. I stated that Colonel Gadsden was authorized by me to take charge of any communications from him, and to concert the arrangements connected with the proposition made. On the same evening, I received a long letter, dated on that day, from the Governor, in answer to mine on the subject of the construction of the treaty, with a few lines on the envelope, informing me that, but for his ill state of health, he would have done himself the pleasure of waiting on me in person. My reply, dated the 17th, contains a brief refutation of his reasoning, and an expression of my unwillingness to induce him to depart from the positive instructions which, he informed me, he had received. I concluded by observing, that, when I should have the pleasure of seeing him personally, I should hope to make an arrangement agreeably to the instructions given to Captain Call, and which he had communicated to him, and which will refer the subject of difference to be adjusted by our respective Governments.

The situation of the troops, now encamped near Manuel's, was inconvenient, on account of the distance from their supplies. There were many reasons strongly requiring that the American flag should be hoisted in Pensacola without delay: American vessels were arriving, and were expected to arrive, which had sailed from ports of the United States under the faith of the expected surrender, and which would be exposed to the payment of heavy duties, through the means of an arbitrary valuation: there had been a great increase of American population, and which was augmenting every day; and the state of things incident to a country so nearly on the point of being transferred forever to the dominion of another nation may be readily conceived: added to all this, the neglect of the police, which, I was informed, existed in Pensacola, and attention to which is so important to a place that must be indebted to this circumstance, perhaps, more than to any other, for its future growth. Under all these circumstances, I authorized Colonel Gadsden to make the proposition mentioned in his letter of the 18th, in the hope that it might possibly meet the approbation of Governor Callava, but without intending to insist upon it. From the other part of Colonel Gadsden's letter, it will be seen that it was my wish that a time and place might be designated at which we might meet, recognise each other, and enter on the business of our respective commissions. A misapprehension occurred on this subject, which was not explained until the close of our correspondence. Not receiving such communication as I thought I had a right to expect, and not being visited by the Governor, or any of his officers, I concluded to remain with my family where I was; and, as the Governor had officially recognised me as commissioner, I resolved to carry on the preparatory negotiation by means of my staff.

I received another letter from the Governor on the 19th, together with his letter to Colonel Gadsden. I refer you to my reply of the day following, in which I enter into a full and explicit statement of what I conceived to have been misunderstood. In the course of that communication, after enumerating some of the more urgent reasons on my part for obtaining a speedy delivery of West Florida, I requested him to state *in how many days after the arrival of the troops from St. Mark's he would be prepared to evacuate the Floridas.* I mentioned the circumstance of one of the transports, the Anna Maria, having arrived some time before; the Cora having, unfortunately, been cast away near the Balize, but that prompt measures had been taken to remedy the misfortune. In the same communication I informed the Governor of the appointment of Major Stanton to discharge the duties attendant on the transportation of the Spanish troops, and to concert the necessary measures for their comfort.

In the concluding observations of my letter, I regretted the existing difference respecting the construction of any articles of the treaty, the stipulations of which we were, in part, commissioned to execute. I received on the 22d the Governor's letter of that date, together with the one of the 20th, enclosing several propositions relating to preliminary arrangements for the surrender of the country and the fortifications of Barancas. In the letter of the 22d, he informed me that Don Alba was merely the bearer of despatches from the Captain General, and clothed with no official character in relation to the Floridas, and declared himself to be the commissioner. He waived the exhibition of my commission for the present, but requested an attested copy; which was accordingly sent. In reply to my request of appointing a day, after the arrival of the troops from St. Mark's, for the delivery of West Florida, he stated that, as soon as the garrison of Appalache should reach Pensacola, and the transports should be ready, he considered four, or six days at the utmost, as sufficient for the delivery of it, and the embarcation of the equipage, troops, and other individuals; whence he declared that I might now consider the time solicited by me to be fixed. The subject of the artillery was again touched upon in his letter, when I had flattered myself with a hope that it had been well understood and settled. The artillery and its appendages, he informed me, could not be submitted to any kind of compromise; such, at least, was the meaning given to the Spanish expressions—*no puedo sugitarlo á ningun cosa de compromiso.* Not a little surprised at what appeared to me little short of equivocation, on the receipt of it I experienced no small degree of mortification. I called upon Captain Call for his report whether he had not communicated to Governor Callava my instructions given him in relation to this subject; and, immediately upon receiving his report, (to which I beg leave to refer you,) I addressed to Governor Callava my communication of the 23d, in which I deemed it necessary to recapitulate what I had said on the subject of the construction of the second and seventh articles of the treaty; and, in order to prevent any future misunderstanding, I reduced the subject to these two distinct propositions:

1st. That an inventory of the cannon, munitions of war, &c., &c., belonging to the fortifications ceded, should be taken, and signed by the proper officers authorized to do so, with a remark that said cannon, ordnance, &c., were claimed by him, but left in my possession, subject to any future dispositions which might be made of them by our respective Governments.

2d. That an inventory of the transportation of families of officers and servants, and provisions placed on board of the transports for the supply of the troops on their voyage, should be made out and certified by him as furnished by me.

I observed that these were the propositions to which I had supposed he had assented, and that they corresponded with the instructions given to Captain Call. I had now hoped the subject was understood and at rest. In the Governor's reply of the 25th, he acknowledges himself to be well acquainted with the *tenor* of the *particulars* which it *embraces*, and particularly with that part which relates to the artillery; he declares that no mistake could have occurred in the account given by him to the minister of His Catholic Majesty at Washington; and in the concluding part of his letter he observes, that no objection or remark offers itself to giving me a certificate setting forth the number of persons transported, and of the provisions supplied them for their voyage.

A short correspondence, to which I refer you, had, at the same time, taken place respecting the transmission to St. Augustine of the necessary orders for the delivery of that place. I refer you, also, to my letter to Colonel Forbes, and his reply. The length to which this communication has already been unavoidably drawn out precludes me from making any remark at present on this business. This circumstance, however, added to the necessity of despatching Colonel Gadsden to St. Augustine; and preparatory to this, I prepared the letter to Colonel Butler, the commission to Mr. Worthington, and letter to that gentleman, with other documents referred to, and of which I gave an account in my letter to you of the 29th of June. In that letter you will perceive my understanding respecting the provisional arrangement, on the subject of the disputed articles of the treaty, clearly and fully expressed. I refer you to the correspondence between the Governor and myself previous to that date, and after the 25th. This tedious length of correspondence in settling so many matters of detail, as well as of greater importance, was what I had not expected, and, in the then state of my health, was extremely fatiguing. In my letter of the 26th, I expressed my satisfaction that we had not misunderstood each other on the subject of the artillery, &c. &c. By good fortune, when much at a loss for a mode of conveyance for Colonel Gadsden, the extraordinary rains having rendered the passage across the country almost impracticable, the United States schooner "Revenge" entered this port, and was instantly put in requisition for the service above mentioned. Mr. Forbes and Don Alba, or, rather, the Governor in his behalf, solicited a passage; but, on being informed that the vessel was extremely small, having but one birth, which the commander had given up to Colonel Gadsden, I could not consent. Colonel Forbes, however, embarked without my consent, knowledge, or approbation.

I refer you to my letter of the 1st of July for several preliminary arrangements proposed and acceded to respecting the preparation of the *procès verbal;* the ceremony to be observed in changing the flag; and the appointment of Messrs. Call, Bronaugh, and Brackenridge, to unite with the like number of persons to be appointed by the Governor, to examine and compare the inventories of archives and public buildings and property. Major Stanton had been appointed for the same service in relation to the artillery, and the taking of the inventory and receipt for the provisions and transportation of civil officers, &c.

By letter of the 3d of July, I communicated to the Governor the arrival of the ship "Lucy Ann," chartered in the room of the "Cora." I intimated that I hoped no delay would occur, on the arrival of the vessel from St. Mark's, of the embarcation of the Spanish troops, &c. on board the transports *then ready*, and the surrender of the country; that the vessels were under a heavy demurrage; and that I relied on his pledge that no unnecessary delay would be permitted on the arrival of the transports. The accident of the loss of the Cora, and the unusual detention of the vessels from St. Mark's, by contrary winds, had already given the Governor much longer time than he could possibly have calculated on when he gave me the pledge already mentioned. Every day which now passed was so much gained on the other side, and a heavy expense to the United States. Instead of three or four days, the usual voyage from St. Mark's to this place, the vessels were detained by adverse winds thirteen days, and at length arrived at Pensacola on the morning of the 9th of July. This event I communicated without loss of time to the Governor, by my letter of the 9th, and requested him to appoint a day for the delivery of West Florida, with the fortress of St. Mark, according to the agreement previously entered into between us. I had been unremitting in my endeavors, as I think will fully appear by the correspondence, to leave nothing unsettled on the arrival of the vessels from St. Mark's, so as to permit no possible excuse for delay; as the Hornet had been here a month already, owing to the unlooked-for loss of the Cora and the extraordinary prevalence of westerly winds, which prevented the arrival of the vessels just mentioned. For my correspondence with Major Fanning, I also refer to the accompanying documents. I also send you a copy of the order issued by me to Colonel Brooke, preparatory to the march of the troops to Galvez spring. My intention of moving to some convenient spot near Pensacola, immediately before taking possession of West Florida, had already been intimated to the Governor, and assented to. In answer to my request, the Governor, in his letter of the 10th, informed me that on the day following he would name a day, in conformity with his pledge. But on the day following, to my astonishment, he informed me, by his

letter of the 11th, that on Saturday the 14th he would inform me whether the surrender should be made on the Monday or Tuesday following—both of these days being beyond the latest period fixed upon for the delivery. I confess I could not but feel considerable irritation; for it seemed to me, that if I permitted him to disegard his pledge at will in one particular, there was no knowing what was next to follow. I was disappointed in what I had confidently expected, and, under these feelings, addressed him my letter of the 12th of July. The troops had marched the day before to Galvez spring, and were on that day joined by me at that place. To the Governor's letter of the 13th, and my reply of the same date, I must beg leave to refer you. I sincerely regretted the unpleasant feeling occasioned by the circumstance I have detailed; but I acted under a sense of duty and a firm conviction of the necessity of the course pursued. The Governor fixed upon the 17th as the day for the delivery, unequivocally, and without reserve; and in my letter of that date I advised you of my having obtained possession of West Florida.

I had reposed in the utmost confidence, after the friendly and satisfactory manner in which the delivery was made on the 17th, that the business was finally closed in the way I could have desired. But in this, I regret to say, I have been disappointed. On the day just mentioned, all papers, inventories, &c. were duly prepared for signature on either side, *excepting the inventory and receipt for provisions, &c. not expressly stipulated for under the seventh article of the treaty.* On the morning of the 17th Major Stanton informed me that he had been waited on by Mr. Cruzat, the Governor's secretary, who, on the part of the Governor, stated that, from ill health and press of business, he was not able to attend to the inventory at that time, and requested that it might be deferred, pledging himself that it should be made out in conformity with the agreement, and satisfactory to me. When this request was reported to me, I confess I was not a little surprised; and, in spite of the high opinion which my officers entertained of Governor Callava, and my own sincere wish to cherish the same opinion, the recollection of the conduct we have on so many occasions experienced from Spanish functionaries, and particularly the conduct of Governor Folk towards Messrs. Ellicot and Hawkins, rendered it impossible for me entirely to divest my mind of distrust. I had constantly cautioned those under my orders to be on their guard; and, on this occasion, I observed to Major Stanton, (who, it will be seen by the accompanying documents, had been fully instructed on the subject,) that if he could place confidence in the promises of the Governor and his secretary, I had no objection to the indulgence. After the Governor was restored to better health, and walking about the town, I urged Major Stanton to obtain the inventory and receipt, in order that I might close my communication to the Government. After a delay of some days, a receipt was presented to me, which, on being translated, I found, with indignation, to be *a simple acknowledgment that the transportation and provisions had been furnished by the United States, in compliance with the stipulations of the seventh article of the treaty.* I immediately informed Major Stanton that such a thing could not be received, and ordered him to call on Mr. Cruzat, and procure the kind of receipt agreed upon in our correspondence, and which he had pledged himself should be given. After a lapse of ten days, the note to Major Stanton from Mr. Cruzat was presented to me, in which I was informed that no other receipt than the one which the Governor chose to offer would be given. I immediately appointed Doctor Bronaugh to wait on Governor Callava, in company with Major Stanton, and demand a receipt in strict and literal conformity with my letter of the 23d of June, and assented to in his letter of the 25th. I refer you to the report of those gentlemen, by which it will be seen that he utterly refused. I then addressed him my letter of the 3d of August, declaring, in the most explicit manner, that, in consequence of his faithless conduct, the receipt given by me for the artillery is null and void, and that I should so report it to my Government—*the execution of the one being the consideration of the other.* The conduct of Governor Callava has mortified me exceedingly, especially as I had wished to think well of him, and as he had been uniformly represented to me as a frank, honorable soldier. I cannot but view his refusal, under the circumstances detailed, as a most base and flagrant breach of faith. To prove that there could have been no misunderstanding on the score of translation, I beg leave to refer you to the certificate of Messrs. Brackenridge and Rutledge.

I now proceed to lay before you the measures adopted by me for the government of East and West Florida in the best manner possible for the present. In this province, the Government, like every thing else, was in a state of dismemberment and neglect. The circumstance of being on the eve of a transfer to the United States occasions a total indifference and carelessness in the administration of all its branches. For a more minute account, I refer you to the report of Judge Brackenridge, and to the ordinances herewith sent. According to the Spanish scheme of municipal administration, there ought to have been an alcalde, a judge de partido, a fiscal, a cabildo, or corporation, and alguazils, or sheriffs, and constables. At Pensacola, none of these offices were filled, except that of the alcalde, who was the only civil provincial officer, properly speaking, in West Florida. To limp along in this maimed and imperfect state, seemed to me intolerable. On consultation with an eminent lawyer from Orleans, who was present at the change of government there, and also with Judge Brackenridge, a gentleman of high legal acquirements, who was in Louisiana some time after, I resolved, without going as far as I understood the Governor of that province had gone, to fill up those offices which I found vacant, and to make such alterations as seemed to me absolutely called for by the mere circumstance of the cessation of the government of Spain, and the extension of that of the United States over the country. The first ordinance establishes the corporation, to which this place under the Spanish constitution is entitled. The great accession of population, and the neglect of the police for the last two years, called for a body exclusively intrusted with its superintendence. Their powers conform to those which they would have possessed under the Spanish Government. The taxes which they are authorized to lay are such as have been usually paid. The board of health was peculiarly necessary, from the vital importance to this place to preserve its character for salubrity. The ordinance relating to the registering the names of those who may be desirous of claiming the benefit of the sixth article of the treaty was dictated, first, by the necessity of affording some evidence which could be used by those who were at once disposed to make their election and become citizens of the United States, and without which they would still be regarded as foreigners; and, secondly, by the impropriety, of which I had no little experience in Louisiana, of persons claiming exemption as foreigners, and the privileges of citizens, as it suited their convenience. The establishment of a county court, by adding four justices of the peace to the presiding judge, was with a view to the police of the county, as that of the city was intrusted to the corporation, and also for the trial of offences against the public peace and happiness. The presentments and trial by jury are both in the contemplation of the Spanish constitution, as well as that of the United States. The ordinance regulating the proceedings of the court in civil cases rather *makes known* the Spanish procedure than establishes any thing new to the Spanish law, excepting the pronouncing final judgment in public on set days, and requiring the witnesses to give evidence *viva voce*, when their attendance can be procured. The appointment of justices of the peace was so necessary a measure, particularly in the remote settlements, which are rapidly increasing, that it seems scarcely necessary to say any thing on the subject. It must be recollected that much the greater part of the population of this country are Americans; that the active commerce is carried on by Americans; and hence the necessity of assimilating the present institutions to something which they can understand, and of administering the laws by means of tribunals not altogether foreign to their habits and feelings. The distance from the seat of Government is a great inconvenience, as months must elapse before any suggested alterations can be approved and put in operation. I believe the alterations which I have made, unimportant as they are, strictly con-

form to my instructions, and are certainly indispensable, unless all civil government should be suspended for the present. Colonel Butler informs me that the municipal organization was more complete at St. Augustine; that, besides the alcalde, there were a judge and a cabildo, or corporation: but little change will therefore be necessary in that quarter. The commission under which I act does not define my powers; and, I assure you, I am not a little at a loss when left to collect them from the nature of the office. Judging from the practice in Spanish colonies, the Viceroy, or Captain General, possesses legislative as well as executive powers over the provinces placed under his government. O'Reilly, in Louisiana, of his own authority, introduced the Spanish law, and established tribunals exactly modelled after those of Spain. But, according to the decrees passed under the constitution, those officers are strictly confined to the exercise of military and executive or political power; and the Intendants are exclusively intrusted with the superintendence of the revenue and public property: the former is excepted by the act of Congress. In this uncertainty, I have contented myself with merely organizing a Government from the materials at hand, with as little change as possible; promulgating the same by way of ordinance, in order that the people may have some knowledge of the system to which they must conform. These ordinances I now transmit for the approval of the President.

From the report of Judge Brackenridge, it will be seen that the only public documents or archives delivered over are those which, in the first place, belong to the notarial office, consisting of transfers of land from individuals, powers of attorney, protests, wills, and other acts, which in Spanish countries appertain to the duties of notary. An inventory of the unbound books containing these acts is transmitted, giving the year and number of pages of each book. In pursuance of my directions, they were marked by Messrs. Call, Bronaugh, and Brackenridge, (who were appointed to compare them with the inventory,) with a letter of the alphabet, and signed, in order that they may be identified. In the second place, the archives of the alcalde's office, and which consist of the papers in suits, from the year 1781 down to the present time, and are very voluminous; but many of them, it is supposed, have been withdrawn or sent to Havana; and as there is not docket or book containing a record of these papers, being considered themselves as the records, it is extremely difficult to detect any fraud with respect to them. There are no original grants, surveys, maps, or even a plat of the city. It is well known that all these papers are at Havana, in the possession of the late Surveyor General Pintado, in whose transcripts of title-papers I do not think any reliance ought to be placed. Having the archives in his possession, he gives authenticated copies, and states himself, in these certificates, to be duly authorized to do so. From this shop it is probable that a number of such titles were transmitted to this country by the Hornet. I am confident that very extensive frauds have been attempted; this opinion is daily strengthened by observation, and I think it highly important that persons of integrity and intelligence should be appointed to sift them. The failure to obtain the archives at Havana will be seriously felt by the honest inhabitants of the country, and will call for more than usual vigilance and attention on the part of the Government to prevent frauds in *antedated titles*. The conduct of the Captain General in relation to the archives but too well confirms the opinion which I entertained of Spanish functionaries—at least so far as we have had any thing to do with them.

The report of Major Stanton, and the inventory of artillery, &c. receipted for, will show the value of those articles. Every thing, however worthless, has been brought forward, in order to swell that inventory to an imposing magnitude. I am well satisfied that, with the exception of two brass pieces at the Barancas, and two mortars and three howitzers, the cannon left with us is scarcely worth possessing. The artillery at St. Mark's is literally worthless; and I am of opinion that the value of the whole does not much exceed that of the extra transportation and the provisions which have been furnished, and not expressly stipulated for by the treaty. Major Stanton's report will also show the condition of the public buildings. The Government-house is in a ruinous state. I intended, at first, to occupy it myself; but, on examination, it was considered unsafe. It is a frame building, no way remarkable for its structure, and at present entirely out of repair, and in some parts rudely propped with unhewn timber. It has been taken by the officers for quarters, by which there has been a considerable saving to the Government. The block-houses were the most filthy and disgusting places imaginable; but, with some pains, they have been fitted up in such a manner as to afford quarters for the troops. The hospital, which is but a very ordinary building, was in a condition equally disgusting, but has been rendered fit for use by the exertions of the officers. The prison is in a tolerable state of repair, but is a very poor building: all the rest are uninhabitable. The barracks are said to have cost the British Government a large sum of money. The frame is still sound; the basement story is of brick; but the doors and windows have been torn off; the roof is decayed, and, in part, fallen in. Unless something be done in the course of a few months, it will be necessary to pull it down, as it will become a dangerous nuisance. The expense of repairing it will not be less than from $12,000 to $15,000. Proposals have been made to me by a Major Edwards to repair it at his own expense, on condition that he shall have the use of it for six years. The offer appears to me a very advantageous one to the United States; but, possessing no power to enter into it, I could do nothing more than to forward his proposals for the consideration of the President, with a request that an answer may be given as speedily as possible.

In my appointments to office, I was desirous of giving the preference, where I could, to the old inhabitants of the country. I found that but few were willing to accept any situation, from unwillingness to lose their rights as Spanish subjects; the greater part having been in some way or other connected with the Government, or having private claims which might be prejudiced by doing any act evincing their intention to become American citizens. Besides, it is said that strong inducements are held out by the Spanish Government to those who remove. The former alcalde was a half-pay officer, and, of course, could not be continued. The inhabitants, in general, I have found a sober, orderly, peaceable, and well-meaning people. I entertain a very favorable opinion of all the Spanish population, excepting of such as have been employed by the Government, which seems to have had every where the same corrupting influence over the minds and morals of those engaged in its administration.

I have confined myself, in this communication, to the subject of my commission for receiving the Floridas, and to the mere organization of the Government, reserving for a future and final communication the information which I may possess in relation to the country in general. The arrival of Colonel Butler from St. Augustine, and whose report is transmitted in another communication, has happily enabled me to close the business of my commission. This, I hope, has been done in such a manner as to meet the approbation of my Government.

I have the honor to be, sir, with great consideration and respect, your most obedient servant,

ANDREW JACKSON,

Commissioner for receiving the Floridas, and Governor of the same.

P. S.—AUGUST 14, 1821.—The foregoing communication was commenced on the day of its date, but was delayed several days, by inability to close the business of the inventory for the provisions, &c.; and after, by unavoidable causes.

A. J.

The Hon. J. Q. ADAMS, *Secretary of State.*

Report of Mr. Brackenridge to Governor Jackson.

SIR: PENSACOLA, *July* 26, 1821.

Besides the Governor of West Florida, there was but one provincial officer actually in the exercise of any civil functions: this was the *alcalde*, whose place you have appointed me to supply. The person in the exercise of this office, for reasons not necessary to state, could not be continued. I have taken pains to ascertain the duties of this office, but I assure you that it is with great difficulty I have been able to procure any thing of a certain and definite nature. I cannot speak positively with respect to the duties and powers peculiarly and exclusively belonging to the office, the extent to which its jurisdiction or authority reaches, or the changes or alterations made by the constitution, and decrees passed in pursuance of it. The alcalde here has acted as notary public; as chief of the police, he exercised a criminal jurisdiction, but of what nature I do not exactly know. He was superintendent and inspector of the prisons, and performed the duties of alguazil or sheriff. But, on more particular inquiry, I found that his judicial authority is confined to what is called the *conciliation*—an attempt at compromise, which the Spanish constitution positively requires before any suit can be instituted; and to cases of liquidated demands, to any amount, where the debt is confessed; and in which cases the alcalde has power to carry the judgment into execution, unless some question of law arise afterwards in the course of the proceedings, when he must stop. In all contested cases, and in all questions of law, the dictum of a judge, or *juez de letras*, is necessary to make a decision. There was formerly a *letrado*, or *auditor de guerra*, at this place, for the purpose; but there has been none here for some time past. By the decrees under the constitution, the office of *auditor* and that of *asesor* have been abolished, and a legal judge is contemplated, with an appeal to other tribunals. By the same decrees, the Viceroys, Captain General, and ultramarine commandants, are circumscribed to functions of a military and political nature, and the Intendant is confined to the collection and management of the revenue. Whether considered under the old or the new order of things, there existed a material deficiency in the organization of the civil government in this province, and especially in the judicial department. I have been able to procure but little information from my predecessor in office; what he said was summed up by the remark that I had more power than the Governor. In conversation with Colonel Callava, he informed me that the organization was defective; that he had solicited the appointment of ultramarine sub-delegate, as there was at this time no authority in the province to decide a law-suit; that he had obtained it; but, having some doubt on the score of the constitutionality of exercising civil and military functions, and considering the probability of a speedy transfer of the country, he had not thought it worth while to exercise it.

It is evident that the civil government cannot be administered, without filling up the offices which are vacant, without some modifications which the change of sovereignty and severance from Spain render unavoidable, and without establishing some offices to correspond with those contemplated by the Spanish system, but where *exactly* the same offices cannot be preserved.

In Spanish towns containing less than a thousand souls, all the civil functions of the place are generally discharged by an alcalde; where the population exceeds that number, the constitution gives a right to a cabildo or corporation, and mayor and aldermen, or corregidors and regidors. As Pensacola was the capital of the province, this circumstance alone entitled her to be considered a city. There formerly was a corporation here, but it has fallen into disuse—for what reason I do not know; but its members were elective, as the office of the alcalde has been since the constitution. To require an election under present circumstances, would be to require an impossibility, and would be the same thing as to say there shall be no civil government; for there is no proper officer *to hold* an election, and there is no way of ascertaining who would have a right to vote. I should think that the powers which, from accident, or other causes, have centred in the hands of the alcalde, may be distributed to other and such officers *as are in the contemplation of the Spanish frame of government*, or approximating to them as much as possible. To establish exactly the Spanish tribunals, cannot be done, for the reasons already stated, although I believe that no important deviation will be necessary; nor do I think it important, if the powers be substantially the same, that the *name* should be scrupulously retained, as, for instance, mayor for corregidor, sheriff for alguazil, and presiding justice for juez de letras. The Spanish constitution contemplates a number of tribunals which I am informed have been established by subsequent decrees, but with which I am not acquainted. There was no regular Spanish lawyer here, although a few of the military officers were acquainted with the routine, and were often employed in the management of causes, which was done by writings signed by the parties. As it is impossible for parties themselves to pursue the tedious routine of a Spanish law-suit, it will be necessary to license attorneys. I have said nothing of the appointment of justices of the peace on the rapidly increasing settlements of the Perdido, Escambia, Conecuh, Yellow Water, Choctawhatchie and Appalachicola, which, I presume, will be agreed on all hands to be absolutely necessary.

The establishment of a corporation in Pensacola, or rather its restoration, has been productive of the happiest effects. Peace, quietness, and order have taken the place of continual daily and nightly disturbance and disorder. The military force has been almost dispensed with, and its place supplied by civil officers. Attention to the health and comfort of the city has succeeded the total neglect with which these important considerations were treated for months before the change of sovereignty. For the police of the county, the keeping the roads and bridges in repair, licensing retailers, and for the trial of offences against the public safety and happiness, some tribunal is called for. The population of Pensacola, and of the country in general, has increased with very great rapidity; the Americans in this place already outnumber the Spaniards. It may, perhaps, admit of a question whether the constitution of the United States does not extend its authority over this country by the mere circumstance of its coming under the American Government, and ceasing to be a dependency of any other Power; and, if so, secures to the American citizen, when arrested for crimes or offences, an open and public trial by jury, to be confronted with his accuser and the witnesses brought to testify against him. I should think, moreover, that the article in the treaty of 1795, between the United States and Spain, if possessed of any meaning, is intended to secure some of these privileges to American citizens. I find no Spanish law which secures them to him, and, according *to the existing state of things, there is no tribunal here which has power to try him at all.* The power of the alcalde extends no further than to take the examination and the deposition of witnesses, to be sent to Havana for decision; or to conduct the *conciliation*, which is allowed in minor criminal as well as in civil cases. The only criminal records in my office are huge piles of papers containing every thing the parties chose to bring forward; one of these, which I examined, is a proceeding against a person charged with passing counterfeit notes, but who was never apprehended; the prosecution, however, went on, and his property was seized and sold for the costs. Another is the case of two negro men who killed a white man—one of a party, it is alleged, who attempted to kidnap them. One of the negroes was sold to pay the expense of the investigation, and one of the white men, a person of the name of McReynolds, *remained near two years in prison here without a trial*, and was let out by the Spanish alcalde on the morning of the delivery of the country. During the time that the temporary government was exercised by the officers of the United States army, some justices of the peace were appointed; but I find no record of any judicial proceeding during that period. Some cases of considerable importance were decided in a summary manner; but as

they could not be regularly followed up, from the want of the proper tribunals and officers, the circumstance has, in several instances, been productive of considerable inconvenience.

There is, properly speaking, no *trial* known to the Spanish judicial procedure. There is what is called the *diligencia*, or process; generally a mass of papers consisting of the writings of either party, accompanied by whatever he may think proper to exhibit in the progress of a cause, whether relevant or not, and with *ex parte* affidavits; so that very often the original points of dispute are lost sight of, and even the original parties. The bulk of these papers naturally increases in proportion to the amount in dispute, and the prospect of obtaining fees. The costs of court alone generally amount to from fifty to five hundred dollars. As no judgment is pronounced in open court, or counsel bound to take notice of such judgment, as well as of decrees and orders made in the course of a suit, these must be notified to the opposite party at very considerable expense. Suits commenced and carried on in this way can, of course, never be transferred to, or be acted on by, American courts, and which will certainly be established before many months. The mass of irrelevant matter, and the *ex parte* affidavits, will, of course, render it impossible to act on such records. But the mere mode of administering justice through the courts, the time, place, and manner, I should think, for the greater part, perfectly within their own control; at least within the control of the person or persons exercising supreme authority in the province. Every essential right of a party may be as well secured by a public trial and judgment, as by a private one by the judge in his closet; truth may be as well got at by evidence given *viva voce*, in presence of the parties, as by *ex parte* affidavits; parties can as well be informed of intermediate orders by their counsel, as by the witnesses *de asistencia* or a notary public. All these purposes are much more cheaply and simply obtained in Louisiana, by the practice adopted to supply the place of the Spanish, but closely modelled after it, and greatly pruned and simplified. Provided all the usual orders be taken, the form of entering them on record, if in two lines, where *thirty* are now used, does not seem to me objectionable. I believe that, without the alteration of any thing of importance, besides what has been mentioned, the proper and regular tribunals may be established to administer justice, civil and criminal, and by this means reconcile the difficulty of administering the government with the *existing authorities*, and of respecting every right which the citizen of the United States can justly claim as such under the constitution or treaty with Spain. Another, and a very obvious inconvenience of the present state of things, is, that the powers of the different officers, and the course to be pursued to obtain redress, *are unknown to the people.* I have endeavored, without success, to procure even the fee-bill. A person has been usually employed to tax the costs, for which he was entitled to two dollars. The *juez de letras*, according to the Spanish law, regulated his own charge for his order or decree, and, in one case in this office, it amounts to six hundred reals, or one hundred dollars!

The truth is, that, with respect to the nature of the tribunals and civil functionaries which ought to exist here, whether under the old or new order of things, according to the Spanish laws, and the exact mode of procedure in judicial proceedings, it is impossible to obtain any exact and safe information. Whatever the theory may be, the practice here, I believe, depended on the individual in power or office. To carry on the Government under present circumstances is out of the question; for some time past there has been, in fact, no Government; and the change in the state of society requires an immediate organization of some kind or other. What is wanted is a plain and simple mode of proceding, capable of being understood and made known; a tribunal before which a trial can be had, whether it be constituted of an alcalde, asesor, judge, letrado, or juez de letras.

On the subject of the archives delivered to me by the former alcalde, they consist of unbound books from the year 1781 until the present time, and contain nothing more than the transfers of property from one individual to another, protests, wills, mortgages, and powers of attorney; and which, strictly and properly, under the Spanish laws, belong to the office of notary. Excepting the extract of the treaty of 1783 between Spain and England, there is nothing in the office which belongs to the Department of State: there are not even the original grants made by the Spanish Government to individuals; all which are said to be in the Havana. These papers are, however, highly important to the inhabitants of the country; and, in order that they might be completely identified, over and above the inventory of the books furnished by the Spanish officers, Captain Call, Dr. Bronaugh, and myself, in pursuance of your instructions, numbered and lettered them, placing our signatures on each book, and making an inventory in this form, which remains in the office as a part of the records. The other papers delivered to me are, the processes or diligencias of law-suits; which are also important to the inhabitants of the country, but not to the Government of the United States. I am, with great respect, your most obedient servant,

H. M. BRACKENRIDGE.

P. S. Since writing the above, I have procured in MS., from a private gentleman, the decrees of the Cortes establishing the jurisdiction of alcalde, &c. How far am I to be governed by the Spanish laws in force before the constitution, or passed since that period? if the latter, to what period are those decrees to be considered as in force: to the time of ratifying the treaty, to the present time, or until the establishment of a Government by act of Congress? These questions cannot easily be answered. The Governor here still exercised the powers of admiralty judge—in virtue of what law I know not: it was the only judicial power he did exercise since the adoption of the constitution.

CHAPTER THIRD.

Of the constitutional alcalde of towns (pueblos) or villages.

ARTICLE 1. As the alcaldes of towns exercise the office of conciliator in the same, whatever any one has a right to demand of another before the judge of the district (*partido*) in civil cases, or for injuries, (*torts*,) he must present himself to the alcalde, who, with two arbitrators, (*hombres buenos*,) to be named by each party, shall hear the parties, and the reasons they may allege; and, after the opinion of the two thus associated, shall, within eight days, at furthest, award what may appear proper for the termination of the difference, without any further proceedings. This award shall, in effect, terminate the same, provided the parties be content therewith; and it shall be entered on a book to be kept by the alcalde for that purpose, to be called the *conciliatory determinations*, the alcalde, the arbitrators, and the parties signing the act; and to them the requisite certificate shall be given.

ART. 2. In case the parties do not agree, it shall be so entered on the same book, and the alcalde shall give to the party requesting it a certificate of the attempt at conciliation, and the failure thereof.

ART. 3. When any person residing in a different town shall be cited before the alcalde conciliator, the citation shall be made through the judge where he resides, requiring him to appear, by himself or attorney, within a reasonable time; and, not appearing, a certificate shall be given to the plaintiff, declaring that the attempt at conciliation had been made, and that it had failed through the default of the other party.

ART. 4. If the demand before the alcalde relate to the detention of the debtor's goods, when such debtor intends to withdraw them, or to the interdiction of some new work, or other matters of like urgency, and the plaintiff pray

the alcalde immediately to make a provisional order, to avoid the injury from delay, the alcalde may grant the same, and shall proceed immediately to the conciliation.

ART. 5. The alcaldes shall, moreover, take cognizance, in their respective towns, of civil demands to the amount of 500 reals as in Spain, and of $100 beyond seas; and of criminal cases relating to injuries (*torts*) and trivial faults, which merit no higher punishment than a reprimand or slight correction; one or the other being determined merely in a verbal manner. For this purpose, in the civil demand above mentioned, and in the criminal cases relating to injuries, the alcaldes shall also associate with them two good men named by each party, and, after hearing the plaintiff and defendant, and the opinions of the persons associated, they shall give, before the clerk, such sentence as may be proper, and from which there shall be no appeal; nor will any other formality be requisite than that of entering it briefly in a book to be kept for verbal judgments; the alcalde, arbitrators, and clerk signing the same.

ART. 6. The alcaldes of towns shall also take cognizance in all suits (*diligencias*) of a civil nature, until they shall reach the point of litigation or dispute (*el contenciosa*) between the parties, on which they are to be transmitted to the judge of the district, (*partido.*)

ART. 7. They may, in like manner, take cognizance in the first stage of such cases, which, although litigated, are of a very urgent nature, and do not afford an opportunity of resorting to the judge of the district, as the taking of inventories, the interposition to prevent the retracting in an undertaking, and the like; taking care to transmit them to the judge on the attainment of the object.

ART. 8. The alcaldes, in the case of the commission of any crime within their jurisdiction, as on finding any delinquent, should proceed officially to form the first proceedings of the examination and arrestation of the offenders, if there should appear to be any offence deserving corporal punishment; or, when apprehended *flagranti delicto*, they must give an account of them to the judge of the district, transmitting the proceedings to him, and placing the offenders at his disposal.

ART. 9. The alcaldes of the towns in which the district judge resides may and ought to take previous cognizance of such cases as are included in the provisions of the preceding articles, giving an account of them to the judge without delay, in order that the latter may continue the proceedings.

ART. 10. In all the suits to which the causes, civil as well as criminal, may give rise, the district judges cannot use other means to carry their judgments into execution than the alcaldes of the towns.

ART. 11. With regard to the government, economy, and police of the towns, the alcaldes will exercise the jurisdiction and powers which have heretofore been held by the ordinary alcaldes, taking always the constitution for their guide.

CHAPTER FOURTH.

Of the administration of justice in the first instance, (primera instancia,) before the formation of districts.

ARTICLE 1. Until the distribution of districts, provided for in the second chapter, be made and approved, and the letrados of the same be appointed by the Governor, all the causes and suits, both criminal and civil, will be prosecuted, in the first instance, before the letrado of royal nomination, the sub-delegates of ultramarine dominions, and the constitutional alcaldes of towns.

ART. 2. The letrados appointed by the King will be limited precisely to the exercise of jurisdiction over disputes respecting towns in which they have held it hitherto; and if in any of those towns they have exercised it previously with the alcaldes, the latter, with the letrados, will continue their authority to take cognizance of suits by anticipation.

ART. 3. In the other towns, in which there are no letrados, nor ultramarine delegates, the constitutional alcaldes will exercise the jurisdiction over disputes in the first instance, as the ordinary alcaldes have exercised it.

ART. 4. The alcaldes of the towns in which there is no letrado, nor ultramarine delegate, and in which the former have not exercised the jurisdiction previously with the latter, will take cognizance of disputes in no other cases but those mentioned in the fifth and eighth articles of chapter third.

ART. 5. The alcaldes, with an absolute inhibition of the letrados and ultramarine sub-delegates, will take cognizance of the government, economy, and police of the respective towns.

ART. 6. The constitutional alcaldes of the towns will, forthwith, enter on the functions of conciliators, agreeably to the provisions contained in the first four articles of the same third chapter; and no demand, civil or criminal, shall be admitted, in case of injuries, without the certificate of the method of conciliation having been tried, and that the parties would not agree thereto. The regency of the kingdom is hereby notified of the same, and required to make the necessary dispositions for carrying it into effect, &c.—" 1812."

On the restoration of the constitution, these, among other laws passed under it, were revived. The powers of the viceroys and commandants, or governors, have undergone a complete change, and, without being aided by other officers and tribunals, contemplated by the new order of things, it is impossible to carry on the civil administration according to the existing frame of Government. A cessation of the administration of justice for two months would be calculated to produce great mischief. The former Government did not scruple to use force when they thought proper, and paid just as much attention to the theory of their authority as they pleased.

The foregoing is all that is to be found in relation to the only tribunal existing in West Florida for the administration of justice. The alcalde is little more than an officer appointed to *introduce* the parties to the tribunal *capable* of deciding. And this tribunal is a connected part of a chain of tribunals, from which it cannot be separated without rendering it useless and incomplete. The appointment of a judge, according to the Spanish plan, is necessary. But the exact modes of introducing and following the suit are alone calculated for an unmixed Spanish population, and to be administered by Spaniards; for they are totally at variance with all American ideas. In criminal cases, it has no power whatever to try an offender.

H. M. BRACKENRIDGE.

His Excellency Major General ANDREW JACKSON, *Governor of the Floridas.*

PENSACOLA, *July* 18, 1821.

By Major General ANDREW JACKSON, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and of the Intendant of the island of Cuba over the said provinces, and of the Governor of the said provinces, respectively:*

That, with a view to the preservation of the good order and health of the town of Pensacola, I do ordain—

SECTION 1. That there shall be appointed by the Governor, annually, a chief officer, to be called the mayor, and six subordinate officers, to be called aldermen, who shall form a council, and have and exercise all the powers necessary to the good government of the said town.

SEC. 2. That the said mayor and council shall have power, by ordinance or otherwise, to impose fines and forfeitures for the infraction of their regulations, and to appoint such officers as they may deem necessary to enforce their ordinances, and to levy such taxes as may be necessary for the support of their town government.

SEC. 3. As the Christian Sabbath is observed throughout the civilized world, it is ordained that, in order to remove any doubts which might be entertained with respect to the powers of the mayor and council on this subject, the said mayor and council be authorized to make any regulation for the due observance thereof which they may deem proper.

SEC. 4. In order to remove all doubts on the subject of the limits of the said town of Pensacola and its dependencies, as well as the places under the immediate control of the mayor and council, all the fountain and springs from which the inhabitants are supplied with water, it is ordained that the incorporated limits of the said town shall be as follows: Bounded on the south and east by the harbor; on the west by the Western Lagoon, or Bayou Chicot; and on the north by a line running due east from Galvez spring to where such line intersects the Eastern or Texar Lagoon.

SEC. 5. That public gaming-houses, as well as public gaming of every description, (billiards alone excepted,) shall be, and the same hereby are, interdicted and prohibited, under the penalty of two hundred dollars for each conviction, and the forfeiture of all the apparatus or machinery used towards the commission of such offence, as well as all sums of money which may be seized by the police officer, or other person—one half to the use of the informer, and the other to the use of the town; and that each and every person so convicted shall be and stand committed to prison until the whole of said fine and costs be paid; and, moreover, until he shall have found good and sufficient security in the sum of five hundred dollars for his good behavior for and during the term of one year.

SEC. 6. That the mayor and aldermen, as is provided for in this ordinance, shall be known and called the City Council of Pensacola; and, in that name, may acquire and dispose of property for public uses, and sue and be sued, and plead and be impleaded, on all subjects relating to and connected with the said town and its dependencies.

SEC. 7. That all innkeepers, grocers, and all other retailers of liquors, are, by this ordinance, expressly prohibited from furnishing or selling any liquor or ardent spirits whatever to any soldier in the service of the United States of America, under the penalty of $19 for each offence; and to stand committed to the common jail until the said penalty, with costs, are paid.

ANDREW JACKSON.

By the Governor: R. K. CALL, *Acting Secretary of West Florida.*

An ordinance for the preservation of health in the city of Pensacola.

PENSACOLA, *July* 19, 1821.

By Major General ANDREW JACKSON, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and of the Intendant of the island of Cuba over the said provinces, and of the Governor of the said provinces, respectively.*

SECTION 1. That every vessel arriving between the first day of June and the last day of October in each year, from any port between the equator and thirty-three degrees of north latitude, shall be brought to at the Barancas, or at such other point as the board of health may direct, and there perform a quarantine of twenty-four hours at least, and as much longer as the health officer at the Barancas (or at such other point as the board of health may direct) and the board of health may deem necessary, not to exceed forty days.

SEC. 2. That there shall be established a lazaretto at the Barancas, or at such point as the board of health may direct, for the accommodation of the sick, under such regulations as the board of health may from time to time establish; and that, until the Government of the United States shall establish a public warehouse at such lazaretto, the cargoes, or such part thereof as the health officer and the collector of the port of Pensacola may deem necessary, shall be stored under the direction of the commanding officer of the troops at Barancas.

SEC. 3. That the quarantine limits shall be cannon shot range, or two miles, in a direction towards the harbor from Fort St. Carlos de Barancas, or at such point as the board of health may direct; and that any person or persons belonging to, or having had communication with, any vessel or vessels under quarantine, who shall pass those limits, without permission first had and obtained from the resident physician or health officer, shall forfeit and pay a sum not exceeding three hundred dollars, and be imprisoned in the common jail for a term not exceeding six months.

SEC. 4. That, for the more effectually guarding against the introduction of disease, there shall be established a board of health, which, for the present, shall consist of an officer to be appointed, and called the resident physician, and the mayor and aldermen of Pensacola, (over whom the resident physician shall preside,) who are by this ordinance authorized to make, and from time to time to alter, such laws and regulations as they may deem necessary to insure the health of the city.

SEC. 5. That there shall be a health officer appointed and stationed at the Barancas, or at such other point as the board of health may direct, whose duty it shall be to board every vessel bound inwards, to see that the provisions of this ordinance, and all such regulations as the board of health may make, are strictly complied with, and to report from time to time, as occasion may require, to the board of health.

SEC. 6. That such allowances shall be made to the resident physician and health officer (all their services included) as shall not exceed one dollar and one half for each person on board of each vessel, to be regulated and determined by the mayor of Pensacola, who is authorized to receive from every vessel, the cargo of which it may become necessary to land and store, such other and further sums as may be necessary to cover all expenses incident to the same.

ANDREW JACKSON.

By the Governor: R. K. CALL, *Acting Secretary of West Florida.*

An ordinance prescribing the mode of carrying into effect the sixth article of the treaty of amity, settlement of differences, and limits, between the United States of America and His Catholic Majesty.

PENSACOLA *July* 21, 1821.

By Major General ANDREW JACKSON, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and of the Intendant of the island of Cuba over the said provinces, and of the Governors of the said provinces, respectively.*

Whereas, by the sixth article of the said treaty, it is, amongst other things, provided, that, on the entrance of the ceded territories into the Union, the inhabitants thereof shall be "admitted to the enjoyment of the privileges,

rights, and immunities of the citizens of the United States:" Now, therefore, as well with a view to guard against impositions that may be practised by foreigners, as to secure to the inhabitants their free choice to become citizens, under the provisions of the said treaty:

SECTION 1. I do ordain that the mayor of the city of Pensacola, and such other persons as may be appointed for the purpose in any town or county in these provinces, shall open a register, and cause to be inscribed the name, age, and occupation of every free male inhabitant of such town or county, who may be desirous to profit by the provisions of the sixth article of the treaty as aforesaid in part recited: *Provided*, That the person or inhabitant who may thus desire to have his name inscribed shall first satisfy the mayor, or such other persons as may be appointed to open registers, that he was really an inhabitant of the ceded territory on the 17th day of July, 1821: *And provided, also*, That he will, of his own free will and accord, abjure all foreign allegiance, and take the oath of allegiance prescribed by the laws of the United States.

SEC. 2. That the said office of register shall continue open for and during the space of twelve months, when the same shall be closed, and a copy thereof transmitted, under the seal of the said mayor, or other persons appointed to open registers, to the secretaries of the said territories.

SEC. 3. That, from and after the period of the said register being so closed, no other free male inhabitant, above the age of twenty-one, and entitled to make his election as aforesaid, shall be, within the ceded territories, entitled to any of the rights, privileges, and immunities of a citizen of the United States, but shall, to all intents and purposes, be considered as a foreigner, and subject to the laws of the United States in relation to aliens.

SEC. 4. It shall be the duty of the heads of families within the said provinces, being desirous to profit by this act, to furnish the mayor, or such other persons as may be appointed to open registers, with the name and age of every free male member of his family; and the said mayor shall cause the same to be inscribed on the register, as before provided for.

SEC. 5. In order to guard the more effectually against impositions, as well as to give to the inhabitants the security which citizenship will afford them abroad, it is further ordained that the secretary or secretaries of the ceded territories grant to such inhabitants as may be desirous of receiving the same certificates of citizenship, he or they being first satisfied that the provisions of this ordinance shall have been complied with.

SEC. 6. The evidence upon which the secretary or secretaries shall proceed to grant certificates of citizenship shall be, a certificate of the clerk of the mayor, or such other persons as may be appointed to open registers, that the applicant has complied with the requisitions of this ordinance; upon the receipt of which, it shall be the duty of the secretary or secretaries to grant to all and every such applicant or applicants certificates of citizenship, for which the said clerk and secretary shall be entitled to one dollar each; and, for every name entered on the register, the mayor, or other persons authorized to open the same, shall be entitled to one dollar.

ANDREW JACKSON.

By the Governor:

R. K. CALL, *Acting Secretary of West Florida.*

PENSACOLA, *July* 21, 1821.

By Major General ANDREW JACKSON, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and of the Intendant of the island of Cuba over the same, and of the Governor of the said provinces, respectively.*

Whereas, from the extent of the ceded territories, it becomes necessary to make such divisions as will promote the convenience of the inhabitants, and the speedy execution of the laws; wherefore, and in virtue of the authority vested in me by the Government of the United States, I do ordain:

SECTION 1. That the said provinces be divided as follows: All the country lying between the rivers Perdido and Suwanee, with all the islands therein, shall form one county, to be called Escambia; all the country lying east of the Suwanee, and every part of the ceded territories not designated as belonging to the former county, shall form a county to be called St. John's.

SEC. 2. In each of said counties, and for the government thereof, there shall be established a court, to be designated a county court, and to be composed of five justices of the peace, any three of whom shall form a quorum; and the eldest, by appointment, to be president of said court, whose jurisdiction shall extend to all civil cases originating in the said county, where the matter in controversy shall exceed twenty dollars, and to all criminal cases; saving to the parties the right of appeal to the Governor in all cases above the sum of five dollars; and that there shall be no execution for a capital offence until the warrant of the Governor be first had and obtained.

SEC. 3. That the judicial proceedings, in all civil cases, shall be conducted, except as to the examination of witnesses, according to the course of the existing laws, or of the laws of Spain, and in criminal cases according to the course of the common law: that is, no person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury; and in all criminal cases the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the county wherein the crime shall have been committed; and to be informed of the nature and cause of the accusation, to be confronted with the witnesses against him, and to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

SEC. 4. There shall be a clerk appointed for each of said county courts, who shall receive for his services such compensation as the court for which he is appointed may, from time to time, and in each suit, tax or allow; and there shall also be a sheriff appointed to each county, to execute the process thereof, whose services shall be compensated by the court to which he is appointed in like manner as is provided for the clerk; and the said clerk and sheriff shall give bond to the presiding justice for the faithful discharge of their duties.

SEC. 5. Each county court shall hold quarterly sessions, and continue the same until all the business pending therein shall be disposed of; the first session to be held at Pensacola on the first Monday of August next, for the county of Escambia, and at St. Augustine on the second Monday of September next, for the county of St. John, with power to adjourn from time to time.

SEC. 6. There shall not be less than ten justices of the peace commissioned for each county, whose jurisdiction shall extend to all cases not exceeding fifty dollars, saving to the parties or suitors an appeal to the county court in all cases wherein the matter in dispute shall exceed the sum of twenty dollars; and shall also be authorized in all criminal cases to exact surety for good behavior, and to take recognizances, in cases bailable, for the appearance of the accused before the county courts.

Sec. 7. That the examination of all witnesses within the jurisdiction of the courts, except where their personal attendance cannot be procured, shall be conducted *viva voce*, and in open court; that the parties may conduct their suits in person, or by such counsel as they may choose: *Provided*, That the said counsel or counsellors shall have been duly licensed to practise in the courts of the said ceded territories by the Governor.

Sec. 8. The alcaldes shall continue to exercise the power of judges of probate, registers of wills, notaries public, and of justices of the peace, and such other powers appertaining to the said offices as have not been otherwise distributed; saving a right to appeal to the county courts in all cases.

Sec. 9. That the judges of the said county courts shall have power to impose such taxes upon the inhabitants of their counties, respectively, as, in their discretion, may be necessary to meet and defray the expenses which may be incurred in carrying this ordinance into effect.

Sec. 10. That the said county courts shall have and exercise the power of directing, by special *venire*, or otherwise, the summoning of all jurors, grand as well as petit.

Sec. 11. That the said courts shall have the power of creating and regulating their process and proceedings, from time to time, as they may deem necessary; and shall, as soon as convenient after their organization, prepare and report a fee-bill to the Governor for his approbation.

Sec. 12. That the said courts shall have and exercise the power, beyond the limits of Pensacola and St. Augustine, of granting and recalling licenses and commissions for innkeepers, retailers of liquors of every description, and keepers of billiard tables; and to require of them such surety as they may deem proper, and impose such price for each license as, in their opinion, may be reasonable.

Sec. 13. That it shall be the duty of said courts, in regulating their process and proceedings, to confine the parties strictly to the merits of their cause; and to cause all useless matter, as well as unnecessary form, to be expunged from the pleadings, at the expense of the party introducing the same, so that justice may be administered in the most simple, cheap, and speedy manner.

Sec. 14. In all criminal cases, the process and indictment shall be in the name of the United States; and there shall be appointed a prosecuting attorney for each of the said counties, who shall receive, in each case, a reasonable compensation, to be taxed by the court.

Sec. 15. That the police of the roads and bridges, without the limits of Pensacola and St. Augustine shall be under the immediate direction of the said county courts; the police of the cities to be exclusively confided to the mayor and aldermen.

ANDREW JACKSON.

By the Governor:

R. K. Call, *Acting Secretary of West Florida.*

An ordinance explanatory of the mode of proceeding in the county courts.

Pensacola, *July* 26, 1821.

By Major General Andrew Jackson, *Governor of the provinces of the Floridas, exercising the powers of the Captain General and Intendant of the island of Cuba, and of the Governor of said provinces, respectively.*

Section 1. All suits in the county courts of Escambia and St. John's shall be commenced by petition, setting forth, concisely, the nature of the demand or complaint, and praying such relief as may be suited to the circumstances of the case; the same to be filed by the clerk, and the suit to be entered on a docket to be kept for the purpose.

Sec. 2. A copy of the petition shall be made out by the clerk, and a citation to the adverse party annexed thereto, the form of which is to be settled by the presiding justice, and to be signed by the clerk, requiring the adverse party to appear at a day certain to answer to the complaint; and the said petition and citation to be served on him by the alguazil, who shall take such security as may be required according to the existing laws.

Sec. 3. That, in case the defendant shall not appear on the day to which he shall be cited, the court may enter judgment against him by default, in all cases where the demand is liquidated by proven account, by bond, note, or final judgment; but the same may be opened within three days, should the party appear and put in his answer; and, in the case of all other demands or complaints, the court shall proceed to hear testimony, assess damages, and render final judgment; but, in case the citation and petition be not served from inability to find the defendant, then the court to proceed in such case according to the manner pointed out by the existing laws.

Sec. 4. The substance of the judgment of the court, and the different orders taken in the progress of the suit, shall be briefly noted on the record, and signed by the presiding justice; and in all cases where orders or judgments shall be made or passed in open court, or where counsel have been employed, the notification of such judgments or orders to the parties shall be dispensed with.

Sec. 5. That if, on the day appointed, the defendant shall appear, by himself or counsel, he shall have three days to put in his answer, and such further time as the court may allow; and, in case of liquidated demands, he shall be required to put in such answer on oath.

Sec. 6. That, after final judgment, execution shall issue, without any further order, and the appraisement notice and sale shall proceed, as under the Spanish laws; all which to appear, in substance, on the record: the sale to be made by the alguazil, mayor, or sheriff.

Sec. 7. That all entries on the records shall be in English; but it shall be at the option of the parties to file their petitions and answers in English or Spanish; and in case that both or either of the parties shall be Spaniards, the writings served on them to be in both languages.

Sec. 8. That there shall be adjourned courts on the first Monday in every month for the trial of civil cases and signing judgments, and to which citations, executions, and other process may be made returnable; and the form of all such process to be settled by the presiding justice, following, as nearly as possible, the forms in use in Spanish tribunals.

Sec. 9. In all cases where either of the parties may require it, the testimony of the witnesses to be taken in writing at the trial, and the reasons on which the court shall have founded its decision to be entered on record.

Sec. 10. The papers or other documents on which the suit may be founded shall be filed with the petition, and either party may put interrogatories to the other, according to the usages in Spanish tribunals, and which the other party shall be bound to answer; otherwise, the matter therein to be taken *pro confesso.*

Sec. 11. The clerk shall have the power to issue summonses to compel the attendance of witnesses; but depositions to be read in evidence to be taken by the proper order of the presiding justice, with notice to the adverse party.

Sec. 12. The usual acts of conciliation, orders, and decrees, according to the Spanish practice at the commencement and in the progress of every suit, may be made by the presiding justice; but the trial and final judgment shall, in all cases, be pronounced in open court.

SEC. 13. That the following fees be received by the officers, and no other:

To the crier, for every cause,	$1 00
Sheriff, serving every citation,	1 50
Subpœna for each witness,	50
Attachment and return,	2 00
Keeping personal property and slaves, to be allowed by the court.	
Taking bond on seizures, and for security, in cases of liquidated demands,	1 00
Serving execution, and money paid without sale,	2 00
Execution against the property, none found,	1 00
Making sale and levying the debt, for the first one hundred dollars,	5 00
For all sums above that amount, per cent.,	2 50
Keeping and maintaining a prisoner in jail, for each day,	25
Whipping any person sentenced to that punishment,	1 00
Executing any condemned person,	10 00
Notaries public, for attesting all national acts,	1 50
Making the same, when required, for each one hundred words,	25
For copies with certificates,	12
Constables, serving State warrants, to be paid by the city or defendant,	50
Summoning witnesses,	50
Serving execution,	50
Selling property under execution,	1 00
Serving search warrant,	1 00
Serving attachment,	1 00
Translators, for each one hundred words,	25
Mileage, to be entitled for every mile necessarily travelled in the service of process,	6
Interpreter shall receive in every suit,	2 00
Clerk of the court, for every citation,	1 00
Entering every order,	50
Administering oath, and writing the same,	12
Filing petitions, interrogatories, answers, &c.,	20
Entering judgment,	1 00
Execution.	
Summons to witness,	50
Copies of all papers, each one hundred words,	25
Entering satisfaction on judgments,	50
Taking depositions,	25
Judges, for every order or decree out of court,	50
Trying cause and entering judgment, to each justice,	1 00
Prosecuting attorney, for every conviction,	5 00

ANDREW JACKSON.

By the Governor:

RICHARD K. CALL, *Acting Secretary of West Florida.*

Governor Jackson to the Secretary of State.

SIR: PENSACOLA.*

I have the pleasure to inform you that Colonel Butler reported to me his arrival here on the 8th instant, and that he had, on the 10th ultimo, agreeably to my instructions, received possession of East Florida and its dependencies, and that he had forwarded to you a full report of all his proceedings as commissioner for receiving possession of the same. You will find, from my instructions to him, that I had communicated to him the agreement with Don José Callava respecting the ordnance claimed by him as not appendages to the fortifications, and also as to the provisions and transportation of the civil officers; and the transportation of the families and servants of both the civil and military officers, all of which was well understood by the Spanish Governor and myself here, and which has been arranged, agreeably to my instructions, by and between Colonel Butler and Governor Coppinger, in the delivery of East Florida, and referred for a decision to our respective Governments.

I am happy to find that Colonel Butler has conducted himself in this whole transaction with his usual ability and prudence, and which I hope will meet with the approbation of the Government. Colonel Butler reports further to me that, before he left St. Augustine, he was confidently informed that Governor Coppinger, in the last six months, had been issuing grants. New grants are daily appearing here for lots laid out in the public square of the city of Pensacola, sold by Governor Mazot. Seeing this, I thought it my duty to order that no improvements should be erected in the public square until these rights were decided upon by our Government. Many of these lots have been enclosed; a circumstance injurious to both the health and beauty of the town, and to those who have heretofore purchased, as was believed, fronting the square.

There are many and flagrant frauds committed and committing with regard to grants for land; and it is believed that the reason why the archives were not delivered to our agent at the Havana, agreeably to the treaty, was to enable Don Victor Pintado, surveyor general of West Florida, and said to be of very loose morals, to fabricate certificates and grants to any that would pay him for it, and to keep secreted the old records that might lead to a discovery of the frauds. Since 1818, John Innerarity has obtained, as I am informed, two grants for ninety thousand arpents of land, located on the trace which I made in marching my troops from the Appalachicola to Pensacola in the year 1818, and on each side of said trace, and I am informed the grants bear date in 1817. There is now sufficient proof that these grants are antedated, if there were any tribunal legally to investigate them. I have again to suggest to the Government the necessity and propriety of appointing commissioners for the adjudication of the land claims in the Floridas, who should be men of good information, great integrity, and energy of character, or great frauds will be imposed upon our Government, and no land will be left by which to raise funds to meet the demands guarantied by the treaty to be paid to our citizens for spoliations committed by Spain. It behooves Congress to pass a law that will enable these commissioners to detect the many frauds that will be attempted.

My report will give you full information of the perfidy attempted to be practised upon me by the barefaced violation of the pledge and agreement of Don José Callava, which will, I trust, recoil upon himself and nation. I

*Not dated; received 10th September, 1821.

was well apprized of Spanish treachery and duplicity; but it is to be regretted that, although my quartermaster was frequently advised to beware of them, he could not believe that any man whose shoulders were adorned with epaulettes could be so base.

I have the honor to acknowledge the receipt of your letter of the 27th June, in answer to mine of the 24th April, and the 1st, 7th, 19th, and 30th of May. I have only to observe, that Major Stanton chartered the transports with drafts drew by me on you, and that his duplicate receipt was enclosed to you under cover of my letter of the 16th day of July last. Colonel Butler's arrival will put it in my power to make up my accounts to the 1st of August, a duplicate of which I will forward by mail to you, and in due time will send on the account and vouchers by Dr. Bronaugh; when I will endeavor to send on a further report of the state of this country and East Florida, with all other information that I may conceive it necessary for my Government to be informed of.

I closed the organization of the civil government here on the 27th ultimo, and on the 28th despatched an express to St. Augustine with the ordinances I thought it necessary to adopt. I found nothing here but an *alcalde*, who was a half-pay officer, and who could not retain the office without resigning his Spanish military commission, and taking the necessary oath of office under our Government. This he refused to do; and I prevailed upon Judge Brackenridge to accept this appointment. He has given great satisfaction to all, and particularly to the Spanish population of this place; and I can, with truth, say that as much order at present prevails in Pensacola as I ever saw in any town.

My health has not been good; my labors have been arduous; and my exposure to the heat in camp for some days very injurious to my constitution; but I hope a little leisure will restore me.

I am, sir, &c.

ANDREW JACKSON, *Governor of the Floridas, &c. &c.*

P. S. I herewith enclose to you the instructions I had forwarded by Colonel Gadsden to Colonel Butler, which reached him but a few hours before the delivery of East Florida, and after the colonel had closed his arrangements with Governor Coppinger; but I think it necessary to forward them, to show you at that early day the full understanding between Governor Callava and myself on the subject of the ordnance and the provisions, &c. &c. &c., furnished by me, and to be referred to our respective Governments.

Yours, respectfully, A. J.

Governor Jackson to the Secretary of State.

SIR: PENSACOLA, *October* 6, 1821.

I have received your letter of the 20th of August last, in answer to my several letters of the 16th, 17th, and 18th of July; which, you are pleased to inform me, you have transmitted to the President of the United States at Shannondale springs.

You request me to communicate to you, as early as possible, and as fully as may be in my power, such information as may serve to enlighten the inquiries of Congress on the different subjects which will require the attention of that body, in relation to the Floridas, at their next session.

After giving this important subject the attention which it merits, and referring to the various laws which you have been pleased to notice in your letter, I proceed to lay before you such information as I have been able to collect, and as I conceive to be within the scope of your inquiries, together with such reflections as suggest themselves to my mind.

As a subject of the first importance at the present juncture, I must refer you to my letter to the Secretary of War of the 17th instant. You will find, from that communication, that the Indians are spread over the whole of East, and part of West Florida. From the talk I have had with some of their chiefs, who visited me some time ago, and forwarded with the letter just mentioned, the places at present occupied by them have been ascertained with tolerable accuracy: that is, as far as the wandering habits of these people will permit them to be considered as occupying any place. For the greater part, these Indians consist of those who fled from the Upper Creeks in 1814, and, adhering to our enemies, continued at war with us until subdued in 1818; since which time they have remained in the Floridas. I am clearly of opinion that they ought to be ordered up to their old places of abode within the Creek nation, as they can have no rightful claim to lands or country within the Floridas. As to those who have been born and raised within the Floridas, it is absolutely necessary that they should be collected at one point, and secured in their settlements by act of Congress, in case they cannot be prevailed upon to unite with the Creek nation, to which they originally belonged: this latter course is very desirable for their own safety, as well as dictated to us by sound policy. They might be then completely protected by our Government; they may be provided for by an annuity, or by such other mode as Congress, in their wisdom, may devise, adequate to their wants, and to induce them to embrace an agricultural life. Should the Indians prefer continuing within the Floridas, it will be expedient, for the safety of our frontier on the seacoast, to concentrate them on the Appalachicola river, immediately adjoining the southern boundary of Georgia and Alabama, on both sides of the river, and downward, so as to include a sufficient area for them. By this means, a sufficient white population may be interposed between them and the seaboard, and afford a settlement strong enough to cover and protect St. Augustine and Pensacola, as well as the peninsula of Florida.

By referring to the talk already mentioned, you will see that the difficulty of collecting the native Indians of the Floridas to the point on the Appalachicola will not be great. They are rejoiced to hear that a country will be allowed them to live in at all—such have been their apprehensions of their future fate since the transfer of their country to the United States, excited, no doubt, by mischievous advisers; and they will be still more so to find that they will be fostered and protected by the American Government. I have been long impressed with the absurdity of entering into treaties with the Indian tribes residing within our territorial limits, subject to our jurisdiction, and to such laws as Congress may pass for their security, happiness, and safety. I therefore respectfully recommend to the consideration of the President, whether it will not be proper to suggest to Congress the propriety of laying off a tract of country for them, and fixing a boundary between them and the settlement of the whites. It is well known to me, from experience and observation, that more general justice can be done the Indians by the legislative provisions of Congress than by treaties; the poor can be better taken care of, and more equal justice done the whole. I have constantly observed that, in Indian treaties, the chiefs are fattened, and the common Indians left to starve. Another, and a very important reason for adopting the policy I have recommended, is, the great obstacle which will otherwise exist to the surveying and bringing the public lands into market; which, I presume, is intended to be done as speedily as possible.

The next subject which presents itself is the form of territorial government proper to be adopted for the Floridas. This must be, in a great measure, adapted to the geographical form and to the character of the soils. The

principal body of land capable of supporting a considerable population lies nearly east and west from the Choctawhatchie to the Alachua and St. John's, being about thirty miles in width by about three hundred in length, and partly in East, and partly in West Florida. The peninsula has been very little explored; but, from the best information I can obtain, I am inclined to think that, excepting immediately on the margin of the river St. John's, there is no extensive body of good land in any part of it, although it is possible that some good soil may be found in small quantities, in particular places: with these exceptions, the Floridas consist of pine woods and swamps. If the lower part of the peninsula were not, as I believe it to be, capable of supporting only a small population, the geographical shape of the Floridas would be extremely inconvenient; but as it is, there will only be a disproportion between the length and breadth, but not such as to render it unfit for our territorial government. Pensacola is at one of these extremes, and St. Augustine at the other. The centre of the future population of the Floridas will be somewhere about the Suwanee, which is a fine river, and flows through a country of good land. The Okefonoco swamp, repsented on the maps as near the heads of this river and of the Wachulla and St. Mark's, has no real existence, as was ascertained by me in 1818, when I marched through the country, and found the swamp, as represented, to be the Mickasuky pond, or lake, in the midst of a very healthy, fertile country, and which has been settling very rapidly. It may be well to observe, that the present maps only tend to deceive and mislead. Before Congress can enter upon the subject of a separation of the Floridas into two territories, the question of the location of the Indians must be settled. If they be concentrated at the point proposed, I would recommend that the Floridas be made but one territory; and I feel perfectly satisfied that, with such an arrangement, two or three years would give a sufficient population to the Floridas to form a State Government. Should a separation take place, this object will be long deferred, if not entirely defeated, and may produce the necessity of uniting West Florida to Alabama; which, if done, will, of course, occasion the annexation of East Florida to Georgia. The whole, if no subdivision take place, will, in a few years, constitute one of the most respectable States in this part of the Union; will exceed Louisiana in population, and rival it in wealth; but, if separated into two territories, the population of neither will suffice.

As far as I have been able to ascertain the wishes of the people of West Florida, they appear to be against the annexation to Alabama; and, from what I can learn, the same sentiment prevails in East Florida with respect to Georgia. The best interests of the Floridas, in my opinion, require that they should be united under one territorial government, with an eye to their speedy admission into the Union as a State: by this means, a great saving will be made to the United States in [not] maintaining two distinct territorial governments for an uncertain period of time. The vicinity of the Suwanee river possesses many advantages for the location of the seat of government: it is equally central to the country east of the St. John's, the Escambia, and Florida Point, over and above the advantages of being situated in the centre of a beautiful limestone country.

I am of opinion, taking into view the mixed population likely to exist here for some time, that the form of the territorial government ought to be simple and energetic. The territorial organization, in the first grade of government, adopted for the Louisiana Territory, with some alterations to suit local circumstances, may answer the purpose. The Spanish population forming but a small proportion, it is of very little importance to preserve any of their ancient laws and customs; the sooner they become American, the better.

The lands and the land titles of the Floridas require the most serious attention of Congress. It is a subject of the greatest importance to the Government, and ought to receive the earliest consideration. Whilst the honest grantee may be protected in his rights, the greatest pains should be taken to exclude the numerous fraudulent and antedated claims, founded on no possession at the time of issuing the grant or concession, and without any original record or survey in West Florida that has yet been discovered. Nearly all these grants commence in 1817, by petition to the Governor for an order of survey or location; and in every instance the other parts of the title are completed from 1818 to 1821. For some years past, from all I can learn, this has been a trading business with the officers of the Spanish Government, both here and at St. Augustine: the stranger was accosted in the streets, and offered a grant for a doubloon, or some trifle. The petition only has the appearance of being original, but, in most instances, in all probability, antedated; the other documents attached to it are only certified copies from the archives in the keeping of Pintado, the surveyor general at Havana, and who is even now making out official certificates of those papers to be evidence here—a kind of impudence and imposture at which Congress will, no doubt, be indignant. Before the year 1817, there was scarcely any such thing as a grant of land, excepting in the immediate vicinity of this place; and I presume that, in East Florida, the number was also very inconsiderable. They were made, I believe, merely with a view to the change of governments, and with no intention of settling. A provision similar to that contained in the 14th section of the act of the 20th December, 1803, declaring all incomplete grants not commenced before 1816, and not accompanied by settlement, as null and void, would at once put an end to the whole of the fraudulent grants. As to the enormous grants in different parts of the Floridas, it is not necessary for me to speak; but I am pretty certain that, if all are sanctioned, it will take a country twice as large as the Floridas to gratify them. The extract of a letter from Mr. Brown, a gentleman of respectability from Baltimore, herewith enclosed, will show that a grant has been made since the 24th of January, 1818, by the Captain General of Cuba, to Arredondo, for a large tract in the Alachua plains, and which, I have every reason to believe, is fraudulent. I would, therefore, recommend that Congress should declare void all grants for land not founded on actual possession before the 22d February, 1816; and, in like manner, declaring void all grants not bottomed on a concession regularly made agreeably to the Spanish law, and possession taken and continued, and improvements made thereon, in strict conformity to the Spanish regulation; making such exceptions as will secure his settlement, &c. to the individual who shall have had five years' continued possession prior to the 24th day of January, 1818. In referring to the numerous acts of Congress for the adjustment of the land titles in the different Territories, I find very little that is applicable at present to the Floridas, excepting the act of the 21st April, 1806; the first section of which defines that no grant shall be valid, unless founded on possession, commencing with and continued under the concession by the proper officer of Spain. The greatest difficulty appears to be in the establishment of a board of commissioners. A great variety of plans have been fallen upon. The first, consisting of three commissioners, secretary, register, and recorder, was found too expensive and dilatory: the last, adopted for the country east of the Mississippi, was too simple and too cheap; two districts were formed, and a single commissioner appointed to each, with a clerk, who was expected to discharge all the functions of recorder and translator. This may have answered a very good purpose in Mississippi and Alabama, but much more difficult and important legal questions will arise here; and I do not hesitate to say that the commissioners for the settlement of the land titles ought to be men of the first legal talents, of strict integrity, and, I would add, as an essential requisite, possessing no landed interest in the Floridas. Persons will be recommended *from this place*, who ought not to be appointed. There are but few titles which are clear of dispute; and where a man has bought a title under disputed circumstances, it is very natural that self-interest, and the interest of his friends, will have great weight in his mind, and precedents will be established to insure their validity. I do not go too far when I say that no person should be appointed who has bought a land claim in the Floridas. It cannot be too strongly impressed on the mind of the President, that men of talents and strict integrity, who have no interest in landed property in the Floridas, should be selected as commissioners to settle the land titles.

It is of great importance that the judiciary should be filled by men of first rate legal talents and unimpeached integrity, as much will depend upon those who are employed to lay the foundation of any system. Respectability will be given to the Government by appointing men possessing weight of character; they ought to be well acquainted with the civil law, and the maritime law, as well as the common law. The same court might have chancery powers given to it, on the plan of the circuit courts of the United States, and I think ought to be required to hold its terms more frequently than has been usual, or to hold adjourned courts from time to time, as business may require. I consider the judiciary as by far the most important branch of the territorial government: persons should be selected whose unexceptionable character will be a pledge that they will steer clear of the influence of corruption of any kind, or of partiality. To the high character of the distributors of justice from the bench will be attached that confidence, so indispensable in all well-regulated Governments. It is the purity of this branch of the administration which secures to the citizen the peaceful enjoyment of his constitutional rights and privileges, and awards a speedy punishment to those who violate the law and trample upon the rights of others.

I forward you printed copies of the ordinances, as they may perhaps contain some things deserving of being permanently incorporated in the act of Congress organizing the territorial government.

With high consideration and respect, I have the honor to be, sir, your most obedient servant,

ANDREW JACKSON,
Governor of the Floridas, &c. &c. &c.

P. S. I am just on the eve of departure for my residence in Tennessee, and will necessarily be absent from this Territory some time, but will make such arrangements as will enable me to return on the shortest notice, in case any thing should occur to render my presence necessary. W. G. D. Worthington, Esq., and Colonel George Walton, are respectively charged with the powers formerly exercised by the Governors of East and West Florida. I enclose a copy of an address (in a newspaper) to the inhabitants of the Floridas, which I thought proper to publish previous to my leaving the country.

ANDREW JACKSON.

The Hon. JOHN QUINCY ADAMS,
Secretary of State, Washington City.

SIR: PENSACOLA, *September* 17, 1821.

By last mail I received, enclosed to me by Captain Bell, commanding and executing the civil government at St. Augustine, the unauthorized talk held by Horatio Dexter and Mr. Wanton with what they are pleased to call the King of the Seminoles, and fifty-four of the principal Indians present. It appears that this talk with the Seminoles has been forwarded to some of the Departments, (whether to you, is not mentioned;) and were it not for its novelty, and the object, which appears obvious, I should not have troubled you with the transmission of such a paper, or with any comments upon it. The object of this unauthorized proceeding appears to me evidently to be, first, on the part of Dexter and Wanton, to obtrude themselves on the notice of the Government; and, secondly, to impress on the minds of the Indians *their absolute right to the country.* I have written to Mr. Worthington to seize these self-made Indian agents, and detain them until the instructions of the Government can be had. And this talk proves the necessity of Congress taking the subject up, and by law prescribing bounds to the Seminoles.

The exposed situation of the Floridas imperiously demands that their frontier upon the coast (if it may be so expressed) should be immediately inhabited by our white citizens. The Indians, at present, are scattered from Florida Point to the Choctawhatchie. If you attempt to concentrate or consolidate them at the Mickasuky pond, or Old Towns, you offend those that are situated on the Suwanee, in the Alachua plains, or on the peninsula. As they have been continually at war with the United States, until conquered in the spring of 1818, when they were ordered up above the Florida line, where the nation to which they originally belonged was willing to receive them, such a measure would reconcile all. This is what they expected, and what good policy and the safety of the Georgia frontier required. But this is what these unauthorized Indian agents, who offer their services to both parties, as I conceive, wish to prevent, and on which the Government ought seriously to reflect. The Government cannot turn the torrent of emigration to the Floridas without great expense; good policy and the safety of the frontier, in my opinion, require that the Government should promote emigration to this country, and hasten its admission as a State into the Union.

If the Indians be removed within the limits of the country assigned to the Creek nation, (of which the Seminoles are a part,) this object, on which the security of the southern borders so much depends, will be speedily attained. With what pretence of justice can those who fled from the Creek nation, and kept up an exterminating war on our frontier, until crushed by the arm of our Government in 1818, set up such claims? And is the safety of our frontier to be jeopardized by the complaints of a few Indians, excited by would-be Indian agents, and Indian treaty-makers, who compose flowery talks for them, and put words into their mouths they never conceived; and make Indian chiefs to suit their own views, and who were never heard of as such before? The greater part of the Indians now in the Floridas consist of those who fled in the manner already mentioned; and why should we hesitate to order them up at once, when the Executive Government, with the aid of Congress, can do ample justice by law, if necessary, to those who deserve it, by giving such equivalent as will enable them to settle their families in the upper country, and to cultivate their farms? Unless the Indians be consolidated at one point, where is the country that can be brought into market, from which the five millions are to be raised to meet the claims of our citizens under the late treaty with Spain?

I received, by last mail, a letter from Mr. Perrieres of the 14th May last, and another of the 10th of July. By the latter, he informs me he is about to proceed to the Havana, to inquire whether any treaties have been made with the Indians by Spain. Whether this be in pursuance of instructions from you, I am not advised; but surely the Government of the United States is competent to regulate the concerns of these Indians, and mete to them every justice to which they are entitled, and to make such regulations as the safety of the frontier may require, without reference to any treaty with Spain; and particularly when it is notorious that the greater part of those Indians, as already observed, fled from the Creek nation in 1813 and 1814, adhered to our enemies, and continued their warfare under the excitement of British agents and Spanish incendiaries, until the United States, from self-defence, were compelled to chastise and conquer them.

I have made inquiries for a proper character duly qualified to act as interpreter for Mr. Perrieres. It requires, as Mr. Perrieres does not speak English, that that interpreter should speak the English, Indian, and French languages. Such a one is difficult to be found; in short, I can hear of none but Mr. Hambly, and for him I have sent; but am informed he is with the Creek agent. I advised you in my last that the indisposition of Mrs. J. would compel me to travel with her, as soon as her health would permit, out of this southern climate; and this would prevent me from holding a treaty with the Indians; although, to speak candidly, I am determined never to be concerned in another. I do think it not only useless, but absurd, when Congress have the power to regulate all Indian concerns by act of Congress, and the arm of the Government is sufficiently strong to carry such regulations into effect.

More general justice can be done to the Indians in this way than by treaty. When the policy of treating with the Indians was first adopted, it was at a time when we found them thrown upon our hands by the treaty of 1783, without any provision being made for them; and at that time they were numerous and hostile, while the arm of the Government was too weak to enforce such regulations as justice and good policy required: hence the necessity of managing them by treaties. But this has passed away; the arm of Government is sufficient to protect them, and to carry into execution any measures called for by justice to them, or by the safety of our borders. Hence the absurdity of holding treaties with Indian tribes within our territorial limits, subject to our sovereignty and municipal regulations, and to whom, by legislation, every justice can be done, and the safety of our southern frontier perfectly secured.

These were some of the reasons that weighed upon my mind for addressing the Government on this subject the last spring, in hopes that I would be authorized by the Executive to have carried into full effect the orders I had given them in 1818, and which had been given after consulting the chiefs of the Creek nation, and finding it to be their wish and that they were willing to receive them. At that time many of them went up, and, I am informed, are now living happily there. I pray you to look at the map of the Floridas, and you will at one glance see that to locate them in the Floridas will greatly weaken your frontier, when, by removing them, you clear the southern borders of all Indians.

Since writing the foregoing, I have made inquiry respecting Dexter and Wanton, and am informed by a gentleman on whom, from his character and standing in society, every reliance can be placed, that those persons are profligate characters, and are and have been engaged in forming a settlement in the Alachua plains, under the grant of the Duke de Alagon, and it is said have obtained a grant from the Indians, by deed duly executed before witnesses, relinquishing to them all Indian claim to a large tract of country. From the bare reading of Dexter's letter, and the Indian talk, I was impressed with a belief that Messrs. Dexter and Wanton were just such characters as above described, and in whom no confidence ought to be placed, and who ought, as I have directed, to be sent beyond the Floridas. Nothing more clearly proves the imperious necessity of ordering those deluded Indians to the upper country, where they can be protected and made happy by the bounty and humanity of our Government.

I am sir, &c.

ANDREW JACKSON, *Governor of the Floridas.*

Hon. J. C. CALHOUN, *Secretary of War.*

SIR: ST. AUGUSTINE, *August* 14, 1821.

I have the honor to inform you that, on the 7th instant, the acting collector of this port seized the English schooner Oliander, Thomas Crowder, master, from Nassau, which had entered this port in violation of the navigation laws of the United States; having on board a quantity of salt, and four negroes registered as slaves, and shipped as seamen, in addition to two white men—a number too great for so small a vessel. The slaves are held in safe-keeping within the fort, and the circumstances reported to the Secretary of the Treasury.

On the 9th instant, J. S. Beers, Esq. exhibited to me his letter of appointment as postmaster for this place, and informed me that he had complied with the conditions, by giving bonds. He has entered upon the duties of his office, and the mail is carried by contract from this to St. Mary's, once a week, by the General Government.

On the 11th instant, J. Rodman, Esq., appointed collector of this port and district by the President of the United States, arrived, and produced satisfactory evidence of his appointment, and, having executed the necessary bonds, has commenced the discharge of his official duties. On the same evening, we were informed that Mr. Worthington, secretary of this province, had sailed, with his family, from Charleston, bound for this place, on the 5th instant. On the 9th, a vessel was seen off the harbor, which, from the wind blowing heavy at the time, was not able to enter the harbor, and passed off to the south. We are daily expecting him. Yesterday, Captain Hanham arrived, bearer of despatches from your excellency to Mr. Worthington, which are in my possession; and, as all persons in the province appear to be reconciled to the powers that be, I have thought proper not to promulgate the system of organization of civil and judicial officers directed to be carried into effect, as it will be better done by Mr. Worthington, and have a better effect, for from new officers new regulations will be expected. The commission for Mr. Forbes remains, for the same reason.

I enclose for your information a copy of a letter from Mr. Dexter, accompanied by a talk held with the Seminoles, who are, at this time, in a state of great uncertainty of what will be the course Government will pursue towards them. A person qualified and acquainted with the Indian character could make any reasonable terms with them; but, if there should be much greater delay, there will be a war between them and the Creeks; which, if sanctioned by Government, must end in the extermination of the Seminoles, or will drive them to great excesses on the inhabitants here; and will prevent, during the time, any white person from travelling in the interior of the country. They have already turned back persons who were going to survey lands. The sub-agent is of no use to them or the Government, from a want of knowledge of Indian character, and the policy of our Government towards them. Our troops are healthy.

Most respectfully, I am, sir, your obedient servant,

JNO. R. BELL,
Capt. Commdg. and Provl. Secretary of East Florida.

Major General ANDREW JACKSON, *Governor of the Floridas.*

SIR: ST. AUGUSTINE, *August* 12, 1821.

The enclosed is transcribed from a pencil copy, accidentally retained for my private satisfaction, and may, possibly, deviate slightly in language from the original, placed in the hands of a friend in South Carolina to be transmitted to the proper Department, and which, I hope, has long since reached its destination.

I have been extremely free and unreserved in my communication to you on this subject; and if my long acquaintance with and residence among the Indians, and the confidence they repose in me, can be useful to your Government, I trust it is needless to add that you may command my services in any manner, or to any extent. I do not assume too much in undertaking the same for Mr. Wanton.

I am, &c., &c.

HORATIO S. DEXTER.

Captain JNO. R. BELL, *Comdg. and Provl. Sec'y of East Florida.*

BROTHERS:

We have assembled to consult upon our situation with regard to our new brothers. We have heard that the King of Spain has sold all Florida to the Americans, and that the country of the Seminoles is included in the sale. Scarcely two years have passed away since we were informed that the whole of the same country was sold by the King of Spain to three of his warriors. Brothers, how is this? The King first sells a country to one man, and then sells the same to another; and, in both cases, without the consent of the real proprietors and inhabitants. The whole of this is a mystery to us, which we cannot understand. However, we are a foolish people, and look to you for an explanation of these things; and we ask you to tell us which sale will be good, (with our consent,) or if the King can sell our country as often as he pleases, without our consent? For more than a hundred summers has the Seminole warrior reposed in the cool shade of his live oak. The sun of a hundred winters has risen upon his ardent chase of the bear and deer; and no one has questioned his right, or disputed his range. How, then, can the Spaniards sell the country which they never dared to tread without our leave? We have a treaty, now in force, made with the English in the days of Governor Tonyng, by which we relinquished to them the country east of St. John's and the head of the St. Mary's, and north of the Mosquito. This is all the English ever claimed, or all the Spaniards or Americans ever could claim, according to our notions of justice. Brothers: we wish you to tell us whether the King of Spain has sold to the Americans our cattle and negroes, as well as our lands? Brothers: we wish you to tell us whether the big man, the father of the American people, is determined to deprive us of our lands, and give them to his own children? We have heard that he is a great warrior, and a good man, and would not suffer the King of Spain to sell America to another people. How, then, can he suppose we ought to submit to such an injury? The Great Spirit, the master of breath, gave one country to the Spaniards, another to the Americans, and another to us; we ought all to respect each other's rights, though our customs be different, and smoke the pipe in peace with each other. The Americans live in towns, where more than a thousand people run about, in a great hurry, over a small piece of land. The Seminole is of a wild and scattered race, that swims rivers, runs and jumps over logs, with the rifle in his hand, in pursuit of food—the whooping crane that builds its nest at night far from the spot where it dashed the dew from the grass and the flower in the morning. The Great Spirit is the author of this difference, and has given to the one as good a title to his hunting grounds as he has to the others their towns.

We cannot understand how the King, on the other side of the big water, can sell our country; or a big man, on this side, purchase it without our consent. As for your rights among us, in land, negroes, and cattle, they shall always be respected; but we wish you to understand we are desirous of living in quiet possession of our lands, and in peace with our new brothers, the Americans; and we think they ought to have the lands east of St. John's to the Spring Garden, and from the Mosquito north, but nothing more: the whole country was ours long ago, and we have parted only with a small portion. Brothers: we wish you to explain these things, and tell us how we shall act in the present circumstance; and hope the Americans will not treat us as the Spaniards have done; and inform us, also, when Captain Jackson will be here.

Reply of E. Wanton and H. S. Dexter.

We have listened to your talk with great patience, and will explain to you our thoughts on the subject, from an open heart and single tongue. The story you have heard is no lie. The Spanish King has twice sold your country: first, as you have long since been informed, to three of his warriors; and, lately, to the big man at Washington. As to the mode and manner the sale was effected, in both cases it was by signing the words "El Rey" on the corner of a sheet of paper. Which of these transactions may be the best, we do not pretend to judge. That both parties received titles from the King of Spain, is very well ascertained; and that both will make the most of their bargain, there is very little reason to doubt. It will be, therefore, necessary, if you desire to retain your lands, to take measures immediately. The great man at Washington, the President of the United States, was, probably, not well informed of your rights when he purchased Florida from the Spaniards; and, if they told him a lie, and made him believe they owned your lands, he may still change his opinion, and do you justice at the last. We advise you to send a talk to him; let it be a talk of peace; setting forth your rights, and showing your desire to live on good terms with the Americans. We advise you, also, to appoint some intelligent and faithful white man to represent your rights, and convey your wishes to the President. Should the President still not yield to the justice of your claims, but desire your lands, he will then either offer you a sum of money or land elsewhere. He may also consent to put his mark, with a pen, to paper, recognising your boundary lines established by Governor Tonyng, or some other boundary. The President has not purchased your negroes and cattle; do not give credit to such a story; it originates in a plan to cheat your people out of their property. We suppose that Captain Jackson will be in St. Augustine in about two moons; but his arrival ought not to give you uneasiness, as, we suppose, he means not to injure you. It is not in our power to inform you of the policy our father at Washington intends to pursue towards the Seminoles. We ought, however, to expect every thing favorable from a great Government, professing to act upon just principles, and motives friendly to the red people. We, however, advise you to make known your rights and wishes to the President, and propose to settle all your differences by a treaty. In this business we will cheerfully give you all the assistance in our power.

Answer.

BROTHERS:

We have listened to your talk, and approve of your advice. You have always told us the truth, and, therefore, we rely on your opinion. We give you the power to send a talk to the big man at Washington; and, also, to make a treaty with him, or appoint a good man to do so. Let it, however, be understood that we do not wish to dispose of our country, nor to be transported among strange tribes of Indians who may injure us.

The above is a talk delivered to E. Wanton and Horatio S. Dexter, on the 24th May, 1821, by Miconopy, king of the Seminole Indians, commonly called the Pond Governor; with the answer of E. Wanton and H. S. Dexter to the same. Fifty-four of the principal Indians present.

17th Congress.] No. 514. [1st Session.

BANKRUPTCIES UNDER THE ACT OF 1800.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 31st JANUARY, 1822.

To the House of Representatives: WASHINGTON, *January* 30, 1822.

In pursuance of a resolution of the House of Representatives of the 8th instant, I transmit to the House of Representatives a report from the Secretary of State, containing all the information procured by him in relation to commissions of bankruptcy in certain districts of the United States, under the act passed the 4th of April, 1800, "to establish a uniform system of bankruptcy in the United States."

JAMES MONROE.

DEPARTMENT OF STATE, *January* 30, 1822.

The Secretary of State, to whom has been referred a resolution of the House of Representatives of the 8th instant, requesting the President of the United States to cause to be laid before that House a statement of the whole number of commissions of bankruptcy which have been taken out in the districts of Virginia, Maryland, Pennsylvania, New York, and the District of Columbia, under the act passed the 4th day of April, 1800, "to establish a uniform system of bankruptcy in the United States;" the number of those cases in which a full settlement has been effected, with the dividends received by the creditors, and the amount of expenses under each commission; has the honor respectfully to submit to the President the accompanying reports from the clerks of these districts, respectively, containing all the information furnished by them upon the subject of the said resolution.

JOHN QUINCY ADAMS.

Mr. Jeffries, Clerk of the Court of the United States for the Virginia district, to the Secretary of State.

OFFICE OF THE CLERK OF THE COURT OF THE U. S.

SIR: FOR THE VIRGINIA DISTRICT, *January* 18, 1822.

Your letter of date January 11th, 1822, accompanied by a copy of a resolution of the House of Representatives of the United States, requesting of the President information as to cases arising under the act of April, 1800, to establish a system of bankruptcy, has been received. To see if I could comply with your request, I referred to the papers in this office relating to bankrupts' estates, and, on a little examination, I ascertained that I could not respond to the inquiries contained in the resolution. Commissions of bankruptcy, to the number of forty-five, appear, from papers and books filed, to have been issued. Whether there were more or not, appears to me to be uncertain; for the returns by the commissioner, in a majority of the cases, are incomplete; and not more, I think, than eighteen months, or two years ago at farthest, a gentleman, who had not, that I can discover, any thing to do in the business, deposited the proceedings of the commissioners acting in Richmond, and, at that time, said they had been lying in his house a long time: from which circumstances, I am induced to think that commissions have been issued, of which there is no evidence of any kind in this office. As to the other inquiries in the resolution, I am unable to give any answer, for want of full returns, as above stated.

If it should be thought proper to obtain such information as the papers and books already filed will afford, I would suggest the propriety of obtaining copies of them; as, to cull from them any such information as is sought for would consume much time, for which no compensation is allowed; and, besides, I think it is very probable I could not give the information in a manner which would be satisfactory to the President, yourself, or to myself.

I am, with very great respect, your most obedient servant,

RICHARD JEFFRIES.

The Hon. JOHN QUINCY ADAMS, *Secretary of State, Washington.*

Mr. Moore, Clerk of the Circuit Court of the United States for the district of Maryland, to the Secretary of State.

SIR: CIRCUIT COURT OFFICE, BALTIMORE, *January* 16, 1822.

I have the honor, in compliance with a resolution of the House of Representatives of the 8th instant, and your request, to inform you that, under the act of Congress passed on the 4th day of April, 1800, entitled "An act to establish a uniform system of bankruptcy in the United States," there were issued in this district fifty-eight commissions of bankruptcy; but what amount of dividends was paid to the creditors under those commissions, or the expenses attending them, I am unable to say; the commissioners never having returned their books or papers to this office.

I am, sir, very respectfully, your obedient servant,

PHILIP MOORE.

Hon. JOHN Q. ADAMS, *Secretary of State.*

The Clerk of the District Court of the United States for Pennsylvania to the Secretary of State.

SIR: PHILADELPHIA, *January* 18, 1822.

In compliance with your circular of the 11th instant, I transmit the enclosed statement of the whole number [208] of commissions of bankruptcy which have been taken out in the district of Pennsylvania, under the act passed the 4th day of April, 1800, "to establish a uniform system of bankruptcy throughout the United States," &c.;

And have the honor to be, with great consideration, your obedient servant.

D. CALDWELL,

Clerk District Court Eastern District Pennsylvania.

Hon. MR. ADAMS, *Secretary of State.*

The Clerk of the Southern District of New York to the Secretary of State.

DISTRICT CLERK'S OFFICE, U. S.

SIR: SOUTHERN DISTRICT OF NEW YORK, *January* 26, 1822.

I had the honor of receiving yours of the 11th instant, with a copy of a resolution of Congress. I have searched through all the bankrupt papers on file in this office. The number of commissions issued in the district of New York, from all the evidence in this office, under the act of Congress of April 4th, 1800, is 166. The commissions issued from April 4th, 1800, to July, 1802, are 95. During this period, I can only give you the number of commissions issued; no evidence is on file to enable me to comply with the other parts of the resolution for your information. From July, 1802, until the act was repealed, 71 commissions were issued. The abstract herewith enclosed will show the result of the commissions, as far as can be ascertained from the papers on file. From delicacy, I have not put down the names of the different bankrupts; but, should they be required, their names will be furnished. Enclosed, is the bill for the amount of office fees: they may be enclosed.

Respectfully, yours, &c.

JAMES DILL, *Clerk, &c.*

Hon. J. Q. ADAMS, *Secretary of State.*

Mr. Brent, Clerk of the Circuit Court of the United States for the County of Washington, in the District of Columbia, to the Secretary of State.

SIR: WASHINGTON, *January* 15, 1822.

In answer to your letter of the 11th instant, enclosing a resolution of the House of Representatives in relation to cases of bankruptcy, I have the honor to state, that all the proceedings filed in my office of the commissions of bankruptcy were destroyed in the Capitol, where my office was kept, when that building was burnt by the enemy in the month of August, 1814; and I am, therefore, unable to furnish the information required by the said resolution. I have the honor, &c.

WM. BRENT,

Hon. J. Q. ADAMS. *Clerk of Washington County, D. C.*

Mr. Lee, Clerk of the District Court of the District of Columbia, at Alexandria, to the Secretary of State.

A statement of the commissions of bankruptcy which have been issued from the district court of the United States for the District of Columbia, under the act of Congress of the 4th April, 1800, "*to establish a uniform system of bankruptcy in the United States.*"

[Fourteen commissions issued.]

In none of these cases has a *final* settlement been effected. In some, the commissioners have made a *partial dividend*; but, even in those cases, the clerk is unable to give the information required by the resolution of the House of Representatives, the proceedings of the commissioners not having been returned to his office.

EDMUND I. LEE,

JANUARY 16, 1822. *Clerk of the District Court D. C.*

17th CONGRESS.] No. 515. [1st SESSION.

UNIFORM SYSTEM OF BANKRUPTCY.

COMMUNICATED TO THE SENATE, FEBRUARY 8, 1822.

UNITED STATES OF AMERICA, *State of South Carolina:*

To the honorable the President and Members of the Senate of the United States: The memorial of the citizens of Charleston respectfully represents:

That your memorialists are of opinion that it is the duty of the citizens of this republic to submit to your honorable body, in Congress assembled, those great grievances under which they may at any time suffer, and which you alone can redress; they, therefore, crave leave to call your attention to the embarrassing situation both of creditors and debtors in this commercial nation. The extraordinary and anomalous spectacle has been for some time exhibited to the civilized world of a Government, whose chief support is derived from commerce, providing no laws to protect that system of credit which is the basis of mercantile prosperity. With full power, and, as your memorialists presume to think, under imperious obligations, to make a uniform system of bankruptcy, by which a single, simple, and consistent code shall regulate the various relations subsisting between debtor and creditor, the Government of the United States has, for years past, forborne to interfere; and has left the parties to those unjust, uncertain, incomplete, unequal, and conflicting regulations, which above twenty different States have made, and are continually modifying, changing, or repealing. To say nothing of the ruinous effects of these laws upon foreign commerce, in which we are all so deeply interested, the obstructions which are thus thrown upon our domestic intercourse are pregnant with consequences injurious to the welfare of the Union. The extent of our territory, the enterprising spirit of our citizens, our interests, and our necessities, give rise to a commerce between the States, which, if fairly conducted, would cement our yet happy alliance, and lead to an enviable prosperity. But can that commerce be fair, or prosperous, or lasting, where there is no uniform law to govern the relations of debtor and

creditor?—where a creditor of the south receives one measure of justice from his debtor in the west, another in the east, and a third in the north?—where he finds that the insolvent systems in these different quarters are discordant; and where dishonest preferences are given, by which he often sees property, which he had sold on a credit to his debtor, parcelled out among other creditors, real or fictitious, to the utter exclusion of himself; or where his debtor, sheltered by his State insolvent law, preserves his estate, and laughs him to scorn? If it were proposed to devise a scheme to destroy confidence between the citizens of the different States, to obstruct their commercial intercourse, to foment sectional animosities, and to weaken their union, none could, probably, have been invented by the most mischievous intellect to accomplish more effectually such baneful purposes than a neglect or refusal in the General Government to act under these powers, so especially delegated by the people. Your memorialists would point out to your honorable body the defects which exist in the respective insolvent laws of the States; but the details would not only be voluminous, but unnecessary. They deem it sufficient to say, (and they apprehend their assertion will not be denied,) that these laws are very distinct in their objects from bankrupt laws, are all defective in important particulars, and especially in those in which the excellence of a bankrupt system consists. They do not prevent unjust preferences; nor expedite the surrender of property; nor enforce the equal distribution of assets; nor relieve from future liability the property of the debtor who has fairly surrendered his effects: neither can the States pass any laws, were they so disposed, that could have this latter operation. In some of the States, (but it would be invidious to name them,) these insolvent laws appear to be calculated to promote fraud, by holding out encouragement to dishonesty; in others, to produce a species of bondage in the miserable debtor, from which death alone can relieve him. In a word, creditors, foreign and domestic, are as much the victims of these multifarious and unwise systems as the debtors themselves; and, if the Congress of the United States have the power to put an end to these evils, it is most earnestly and fervently desired that they would exercise it.

Your memorialists are aware that the interests of the various sections of the Union will produce a conflict of opinions upon the details of any bill which can be introduced for this purpose; and they are satisfied that in this, as in all other measures affecting the people of all the States, mutual concessions must be made, or nothing will be done. They do not imagine that human talents can devise any system which is perfect; but they feel a consoling confidence that the intelligence of your honorable body is fully equal to the enactment of such provisions on this subject as shall be most conducive to the general welfare. We have not only the experience of many of the European Governments, with their well-digested systems—particularly those of Scotland and England, where centuries have confirmed the importance of those parts which are salutary, and exposed such as were defective—but we have the experience which resulted from the short existence of the act of 1800. Unfortunately for this country, that act, instead of being judiciously amended, and gradually ripened into excellence, was prematurely torn from your statute book, at a moment when its benefits were beginning to be felt. With such lights, and a steady view to the welfare of the people, your memorialists trust much good, and but little evil, will result from your enactments. They presume not, therefore, to suggest any particulars whatsoever of a bill; but confine themselves within their legitimate province of making known their complaint, and petitioning for redress. They desire, however, to express their opinion on the power and obligation of your honorable body to pass this law, and on its importance to the country. They regard your power to act as both *full* and *exclusive*. It is *full:* for the grant of power to make a uniform system of bankruptcy comprises every thing which can be included in the terms, in their most general acceptation; consequently, should the act impair the obligation of contracts, or operate retrospectively, (which it must do, in order to be beneficial,) it would strictly conform to the meaning of the constitution. It is *exclusive:* for the States have expressly deprived themselves of the right to impair the obligation of contracts, which seems to be included in the power to pass a bankrupt law. It is impracticable, therefore, for the States to exercise this power; and it is essentially necessary to the prosperity of the commerce of the United States, and the happiness of a large proportion of the people, that it should be exercised. The framers of the constitution were of this opinion when they penned the clause in that instrument, and the several States when they sanctioned it. The language of Mr. Madison on the propriety of it was as follows: "The power of establishing uniform laws of bankruptcy is so essentially connected with the regulation of commerce, *and will prevent so many frauds* where the parties live, or their property may lie, or be removed into different States, that the expediency of it seems not likely to be drawn into question." As, then, your power is both full and exclusive, and the exercise of it not only expedient but necessary, your memorialists most respectfully submit to your honorable body, whether, having undertaken to fulfil the trusts with which you are clothed by the people who framed that constitution which has called you into existence, you can now decline acting.

Your memorialists do not observe, in the light in which they have been represented, the alleged evils resulting from the establishment of a bankrupt system. It is said that it cannot be equitably enforced, because it is radically unjust; that it will encourage extravagant speculation; be productive of frauds and perjuries; add to the criminal code, and impair our attachment to the laws. But why, it may be asked, cannot this system be as equitably enforced as any other part of the code of laws? Can there be any thing peculiarly iniquitous in a law whose primary objects are to protect the interests of the creditor, the future welfare of the honest debtor, the punishment of the fraudulent one, the equal distribution of an insolvent's assets, and the promotion of individual, commercial, and national prosperity? Have we really attained a more perfect commercial knowledge than the Dutch, French, Scotch, and English? Are we ourselves, in short, satisfied that State insolvent acts, confused in their provisions, and limited in their efficacy by the constitution, are sufficient for these purposes? Or, is public opinion audibly expressed in almost every commercial city of the Union on the necessity of the measure? That system, then, whose objects are so excellent, your memorialists trust, cannot, under the regulations of a wise Legislature, be inequitably enforced.

The argument which attempts to prove that this law, however constructed, will encourage extravagant speculation—inasmuch as the debtor, when he gains, makes his fortune, and, when he loses, only becomes a bankrupt, to begin again—overlooks the obvious consideration, that the difficulty of obtaining credit will be in the same ratio with the facility of procuring a discharge. It seems, also, to be forgotten that the most honest bankruptcy must be more or less injurious to the mercantile reputation of any individual, and will not, therefore, be carelessly incurred. That frauds and perjuries will be committed under any system, your memorialists freely admit. They are, unfortunately, the daily subjects of legal investigation and punishment in all your courts; and most of your laws are made to prevent their commission. But it is not observed that so many frauds can result from a proper bankrupt system, as from the respective insolvent laws, which afford peculiar facilities, both from their number and imperfections, to the accomplishment of nefarious schemes; and it is most manifest to your memorialists that the latter produce infinitely more injustice. It is true, the bankrupt act may be abused and converted into an instrument of fraud; but so may, and are, all other human laws, however perfect and however valuable.

If it were true that the establishment of this system would add to our criminal code, and, by deluging our country with blood and misery, impair our attachment to the Government, your memorialists certainly would deprecate the measure. But its sanctions must be prescribed by your own decree; and the wisdom of your honorable body will certainly impose no other punishments for the commission of frauds than those which the common feelings

of mankind can approve. This, so far from making a frightful addition to the criminal code, will, in many instances be less rigorous than State inflictions for similar offences against the insolvent laws. The experience of mankind points to moderate but certain punishments as best adapted to prevent crimes; and the wisdom of Congress will never subject so excellent a system to so fatal an objection.

Your memorialists cannot conclude without recalling to the recollection of your honorable body the great number of persons whose interests are most deeply involved in this matter. They do not now allude to the people of the Union, generally, though they are all remotely or immediately interested; nor to creditors whose fortunes are directly concerned; but to the thousands and tens of thousands of our wretched fellow-citizens, overwhelmed by debts that grind them to the earth, and whose only hope of release under heaven rests on Congress. These men are now deprived of all honest and open employment; the product of their industry (where industry is exerted) inures to the benefit of others, or is concealed from view. Their families are either miserably sustained by clandestine and immoral gains, or abandoned to want, ignorance, and vice; whilst the wretched parent drowns his despair in intemperance. To a Government that loves to watch over the happiness and virtue of the people, this view of the subject would suggest the most interesting considerations. Your memorialists can only thus hint at them; but, should your honorable body, contrary to their expectations, regard it as unmanly or unwise to yield to the voice of humanity, unless seconded by policy, they trust that, in this particular, they are in unison. The passage of the act will enable a majority of these miserable persons again, in the face of day, to resume their former industrious habits. They will once more feel a warm affection for their country; they will hasten to reform their morals, and to educate their offspring; and thus, by becoming useful and enterprising citizens, will relieve society from a weight which now oppresses it, and swell the coffers of the state. Surely, the political advantages which must thus result from this increase of active population are not to be despised.

Your memorialists have thus, as briefly as possible, laid before your honorable body their grievances, which are not peculiar, but are felt in every part of the Union. They submit the subject with this their earnest petition, that a uniform system of bankruptcy may be passed, in such form and manner as to the wisdom of Congress shall seem best calculated to promote the welfare and happiness of our beloved country.

And your petitioners will ever pray.

SAMUEL PICOLEAU,
J. N. CARDOZO,
JOSEPH JOHNSON,
JOHN D. HEATH,
ALEXANDER BLACK,
Committee:

JAMES HAMILTON, JUN.,
Intendant of the City of Charleston, and Chairman of the Meeting.

17th CONGRESS.] No. 516. [1st SESSION.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE SENATE, FEBRUARY 11, 1822.

Mr. SMITH, from the Committee on the Judiciary, to whom was referred the petition of Abel Pratt, made the following report:

That the petitioner sets forth in his petition that Phineas Pratt, his father, about the year 1800, invented a new and useful improvement in machines for making combs; that, afterwards, on the 5th of March, 1805, he obtained letters patent, securing to him the exclusive right thereto for the term of fourteen years; but that the said Phineas Pratt was too poor to carry on the manufacture of combs to any considerable extent; that afterwards, the said Phineas Pratt, by deed of assignment, bearing date the 25th day of March, 1808, for the consideration of the sum of $500, conveyed the said patent right to the petitioner, who is the son of the said Phineas Pratt. The petitioner then states this transfer to have been made as a sort of patrimony, as his father was unable to give him any pecuniary assistance. He also represents himself as being poor, and unable, for want of funds, and the scarcity of elephants, and the consequent high price they bore until lately, to profit by this machinery; and, therefore, prays that Congress may pass a law to extend to himself the patent right for another fourteen years.

Your committee are aware of no reason which would warrant them to recommend an extension of the patent to the petitioner. Want of funds for the purpose of extensive business is no novelty. It has been felt by all classes, in a greater or less degree, within the last fourteen years, and no one can plead an indemnity from its effects. The patentee has had all such indulgence as the Government has thought it prudent to extend to other patentees; and, if this patentee has had equal justice dealt out to him, it is all he ought to expect. The Government has granted no patent right for this machinery to any other person, by which the profits of the petitioner have been diminished or interrupted, or given him any other sort of pretext to complain. Your committee, therefore, beg leave to recommend the following resolution:

Resolved, That the prayer of the petitioner be not granted.

17th Congress.] No. 517. [1st Session.

VACCINATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 22, 1822.

Mr. Floyd made the following report:

The committee to whom was referred the resolution of the 6th instant, directing them to inquire whether it be necessary to make any modification of the law passed in the year 1813, entitled "An act to encourage vaccination," have had the same under consideration, and report:

That the committee have not deemed it necessary to report the various reflections which have presented themselves upon the subject of vaccination; but feel a confidence in the belief that the opinion heretofore entertained of its being a preventive of the small-pox is well founded, and believe it one of the greatest benefits bestowed upon the country, and one which ought to be cherished by every citizen of the republic.

They are aware that a disease, called by medical gentlemen varioloid, has, within a few years past, made its appearance in Europe; that it much resembles the small-pox; and, under similar circumstances, has been as fatal as that disease ever was. None are exempt from its influence; neither those who have had the small-pox, nor yet those who have been exposed to the influence of the vaccine; but it is gratifying to find that the weight of authority seems to favor a belief that all those exposed to the infection of the latter suffer much less than any others.

The committee have seen with pain and regret the occurrences which have lately transpired in the State of North Carolina, where the physicians in that part of the country believe the small-pox to exist. These occurrences were of such a character as to claim their attention, particularly as the United States' vaccine agent, appointed pursuant to the provisions of the act referred to in the resolution, seemed to create a doubt as to the efficacy of vaccine in the prevention of small-pox, and left the impression equivocal whether it was not his belief that it was the varioloid disease in North Carolina, produced by some change in the vaccine matter whilst on its way to a physician in that State, to whom he had sent it; or whether it had not assumed that character from the circumstance of the small-pox epidemic in the neighborhood from whence it was sent. They have forborne to remark upon that transaction, as the vaccine agent has since ascertained and acknowledged that it was the genuine small-pox matter he had sent to North Carolina, through his own mistake; which at once relieves the fears of those who doubt the efficacy of the cow-pox, (if there are any such,) and dissipates the mist which hung over the subject, in the opinion of all who did not doubt.

It is proper to remark, that the disease called varioloid seems to partake more of the character of small-pox than of vaccine; and that there is no fact within the scope of their inquiry to induce the committee to believe that vaccine ever has degenerated into varioloid. It is unquestionably true that instances have occurred where persons have taken the small-pox after having the vaccine; though such instances are as uncommon as it is for persons to take the small-pox a second time.

The tranquillity of settled belief has been disturbed by allusions to the difficulty of securing the continuance of genuine matter, though no doubt is entertained by your committee that proper attention will overcome every obstacle of that kind, eradicate every evil, and finally triumph over prejudice itself. Some reproach may have been brought upon vaccination, not, however, the result of any well-founded doubt as to its efficacy, but from the ignorance or carelessness of those who have used it; as it is well known that many benevolent persons throughout the community have taken upon themselves to vaccinate their friends and others, and, doubtless, have done much good; but if, in the progress of time, by want of care, the matter shall have become spurious, there is not adequate experience to detect the change, and, consequently, some risk of exposing the person to the small-pox; thereby bringing danger to the sufferer, and unjust reproach to the cow-pox. This kind of inoculation, done by every individual who feels charitably inclined, if with care, is not disapproved of; though the committee are decidedly of opinion that it would be much better to trust it to the judgment and care of the medical gentlemen of the country.

The committee have deemed it not irrelevant to state a few prominent facts in regard to the effects of these diseases in different countries, which will more clearly show the progress of opinion, and the advantages of vaccination. In the first place, it is proper to state that there is authority for estimating the deaths by the natural small-pox at one in six; and though a more intimate knowledge of that malady, together with any benefit arising from inoculation, may have put it more in the power of physicians to control it, yet, in Great Britain, where vaccination is less attended to than in some other European countries, fifty thousand persons are annually destroyed by it; but, even there, all agree the waste of human life has been lessened by vaccination. It not only secures the person from the small-pox, but greatly lessens the danger to be apprehended from the varioloid disease, as may be seen by reference to highly respectable authority, which states that, at Millau, in France, containing about eight thousand inhabitants, two hundred vaccinated persons took the varioloid disease, and every one recovered; whilst two hundred persons who had not been vaccinated were destroyed.

In Denmark, by the care which the Government has taken to cause the people to be vaccinated, the small-pox no longer exists. This remedy was introduced into that country about the year 1800, by laws which were vigilantly enforced. By these laws it was ordered that no person should be received at confirmation, admitted to any school, bound apprentice to any trade, or married, who had not been vaccinated, unless he had undergone the small-pox. A just idea may be formed of the benefits which have resulted to Denmark—a country where the preservation of human life is more the object of governmental care and solicitude than almost any other—when it is known that the city of Copenhagen alone, during the twelve years preceding the introduction of the vaccine, lost by the small-pox five thousand five hundred of its inhabitants. In the year 1805, not one death occurred in the whole Danish dominions from the small-pox. Prussia has made many wise regulations favorable to vaccination, which have produced highly beneficial results. Formerly, the small-pox was believed to destroy about forty thousand persons annually in that kingdom. In the year 1817, by this mild and entirely safe remedy, the deaths were reduced to two thousand nine hundred and forty; so that the proportion of deaths from small-pox to those from other causes had been reduced from one in seven down to one in one hundred and four.

It is believed that the principality of Anspach, in Bavaria, containing a population of 236,406 individuals, lost five hundred annually in 1797, 1798, and 1799; and in the year 1800 there perished one thousand six hundred and nine persons of that disease. But, so clear and distinct have been the effects of vaccination, that, from the year 1809 to the year 1819, only five cases have occurred, and not one death.

In France, prizes are given to the surgeons who have annually vaccinated the greatest number of persons.

In Lombardy, in the year 1808, in Milan, and Geneva, vaccination was believed to have extirpated the small-pox.

If the statements of intelligent travellers ought to be taken as evidence upon a subject of this kind, there can be no doubt that vaccination has operated the same beneficial effects in South America which it has done in Europe; and the journals of our own country bear testimony to its great and increasing good throughout the republic.

The committee have viewed with attention and concern the promulgation of opinions tending to lessen the just confidence of the community in the efficacy of vaccination, from the circumstance of there being present slight affections of the skin, ulceration, or vascular disease. They will not undertake to decide what may be the effect of diseases of this character upon the result of vaccination, when they have affected the constitution of the individual; but think it doing no violence to the opinions of those who have adopted such, to consider them as a class distinct from the mass of the community. They are inclined to believe that the constitution of the individual vaccinated, with other causes, may vary the appearance of the disease in some degree, but not to change its character. To do that, there would be partial causes, easily detected, and easily understood.

The committee, from all the reflection which they have been able to bestow upon the subject, are of opinion that no modification of the law is necessary, as its provisions put it amply within the power of those intrusted with the execution of it to punish abuses, where any exist. They, therefore, recommend the adoption of the following resolution:

Resolved, That the committee be discharged from the further consideration of the subject referred to them by the resolution of the 6th instant.

SIR: BALTIMORE, *February* 4, 1822.

From letters which I have received from Dr. Hunter, of Tarborough, in North Carolina, I am fully persuaded I have discovered the true cause of the deplorable events which have happened there; and I am now satisfied that they have originated from an accident, such as never occurred before, and there is no danger that the like will ever occur again.

I had a paper which contained some small-pox scabs, taken by myself from a person named Whitfield, about the 4th of October, 1821; and on this paper I had written carefully, to avoid accidents, that it contained the variolous or small-pox matter. But this paper was afterwards mislaid; and, after searching for it in vain, I had concluded it was lost, and supposed it might have been swept out of my office with other waste papers.

From the information, however, which I have received from Dr. Hunter, quoting the words I had written on it, I have no doubt but that the same identical paper I had lost, *containing the small-pox scabs, and marked as such*, was put up in Dr. Ward's letter, by some mistake or inadvertence, instead of the glasses of vaccine matter which I intended to send to him; and which, from his letter to me, I supposed he had received and used.

We may now, therefore, safely conclude that the injury done is of more limited extent than I feared. And every citizen of North Carolina has it in his power to be secured from it, if he will use the vaccine matter I have sent to them.

Dr. Hunter assures me that the vaccine matter obtained by him from this institution, and which he was using "in a general and extensive vaccination," when he wrote me, (19th ultimo,) "was such as he knew to be genuine."

I hope you will be so good as to make the contents of this letter known in the House of Representatives; and I will be happy to furnish you, or any committee of Congress who may be appointed to make inquiry on this subject, with every fact relating to it, which has, or may hereafter, come to my knowledge.

I have the honor to be, with great respect, your most obedient servant,

JAMES SMITH.

The Hon. SPEAKER *of the House of Representatives.*

[The following letter from Dr. Smith to Mr. Lloyd, of the Senate, was subsequently laid before the House.]

SIR: WASHINGTON, *April* 25, 1822.

The bill to repeal the law relative to vaccination being under your consideration, I beg leave to give the honorable Senate, through you, some information on this subject, that I hope will be acceptable to them. All the difficulties existing in regard to the vaccine agency have arisen, I can show, from a conspiracy or combination of certain professional interests and individual prejudices, which, taking advantage of the unfortunate accident that lately occurred in North Carolina, has made the most erroneous and unjust impressions on the public mind.

Many persons have been induced to believe that the vaccine agency has hitherto constituted a monopoly in my hands of the most odious kind. But the very reverse of this is the fact. My efforts have been always directed, with all the zeal I possess, to render vaccination universal, and to put it in the power of every family of the United States to have free access to this remedy at any time they might want it. The most liberal and enlightened of the faculty of medicine, to whom my plan to obtain these ends have been submitted, have approved of them, and lent me their aid that they might be carried into effect. But there are others, who prefer their own private interest to the public good; and these do not cease to cry down the vaccine agency, and they endeavor, by every means in their power, to prevent the free distribution of the vaccine matter, which I have been striving to effect. Now, if these last should succeed in their intention, the people will soon be obliged to pay well for the vaccine remedy when they can get it, and they will often have to do without it when they will most want it. If I had never discovered the *simple criterion* by which the efficacy of every vaccine process can be determined, without the necessity or expense of any professional attendance on those who are vaccinated, no prejudices, I believe, would ever have been raised by medical men against my vaccine agency. By the examination of the vaccine crusts, (and they can be sent to me by letter from any part of the United States,) I can decide as correctly on any case of vaccination as if I had been called in person, or had attended myself upon the individual vaccinated. This particular method of practice is founded upon a new discovery in vaccination, that does not appear to be at all known in Europe, and we have not yet had opportunity to develop it fully here. But, highly important and useful as is this method of practice, it threatens to cut off a source of profit from many practitioners, who regard vaccination only as business of professional gain. It does not serve as any excuse with these practitioners that for several years past I have made no charge for examining the vaccine crusts, or informing all those of their safety from the small-pox who have been perfectly vaccinated; they have lost their fees sometimes by my interference, and that is sufficient reason to support their determined hostility to my vaccine agency. That physicians should be well paid for all those efforts of mind and body which they make to relieve the sick and to preserve the public health, I do not deny. I am perfectly sensible of the value of their services, and well know that they have never been either duly appreciated or sufficiently well paid for. But this affords no justification to the views of those who wish to prevent the free distribution of the vaccine matter. The operation for the kine-pock is so simple, that any discreet person is fully competent to perform it, when furnished with genuine matter. Nay, I have known children who have per-

formed vaccination as effectually as any learned doctor could have performed it himself. The only difficulty that exists in this practice is, to determine whether the true vaccine process has been produced or not. Now, whenever you come to this part of the business, it is not unusual to find the same disagreement of opinion existing among physicians as is common with them upon almost every other occasion. The learned professor of the theory and practice of medicine in the University of Maryland (than whom no one, I believe, stands higher in the estimation of medical men,) yet denies that there is, or can be, any criterion by which the efficacy of the vaccine process can be determined, except by repeating the operation until no local inflammation can be produced by it. Now, according to this practice, the citizens of the United States could not expect to obtain any positive information whether they were secure from the small-pox or not, during their whole lives. If the professor, therefore, with all his experience in the use of the kine-pock, cannot determine the simple fact which every individual who submits to vaccination is most anxious to learn, how can it be expected that every doctor of every degree can determine it always with perfect accuracy? But it is impossible that physicians generally should ever obtain a sufficient practice to enable them either to preserve or select the vaccine matter for their own use; neither can they be expected to be able to decide the fact with invariable correctness, whether their operations are always perfect or not, by any other than the criterion I have pointed out, and which can only be made generally serviceable to the public by the establishment of vaccine agencies. But we have now scarcely obtained this knowledge of the kine-pock, and brought into active operation an agency to extend this blessing among our people, than prejudices and jealousies are cherished; falsehoods of every description are circulated; and headlong we rush, propelled by mere accident, to repeal the only law we have existing to encourage vaccination. Shall we not thus evince to the world that we are ready and willing to abandon all the ground we have gained? or that we are determined heedlessly to throw open our whole country for the special benefit of physicians only, who must all now, it is said, be taught at once, without any guide, to preserve and select the vaccine matter for their own use? If we adopt this course of proceeding, will not the same evils soon revert upon us that we experienced before the establishment of this agency, which was scarcely one year in operation until it corrected the mistakes that were prevalent in every direction, and banished spurious vaccination from almost every part of our country? But, "Down with the vaccine agency!" is the popular cry; and the people, it seems, must be left to chance for their protection from the small-pox.

The prevalence of small-pox in Baltimore, the seat of the vaccine agency, has been urged, with great plausibility, as one of their chief arguments against it; and it has been stated (with how much justice you shall see presently) "that my inability to extirpate the plague from the place of my residence affords sufficient reason for you to break up my institution entirely." I must, therefore, inform you that the small-pox, although it has ravaged both of the cities of New York and Philadelphia within this period, has never been suffered to become epidemic in Baltimore, since the enactment of the law of 1813 until the present time; and, on this occasion, its prevalence with us is to be ascribed much rather to the opposition which has been made to the vaccine agency, than to the agency itself. This hostility to the vaccine institution has not arisen from any danger that is attached to it, or from any injury or wrong that I have done; but, if the truth were known, it has originated, as I have already stated, from the opposite of these causes. The great excitement, therefore, that has been unwisely produced of late, will terminate, I fear, in an evil of much greater extent to the public than the accident which has given rise to it could ever have effected.

In the month of June, 1816, the small-pox was imported into Baltimore from Norfolk, and the affected person was suffered to lie in the midst of a dense population liable to take it, and unavoidably exposed to its influence. I was made acquainted with the first case of this plague as soon as it occurred, and I gave information of the fact immediately to the public. I supplied all concerned, at once, with a sufficiency of the vaccine matter, free of any charge; and we succeeded in extirpating the contagion without any difficulty. About five hundred persons were vaccinated in the affected neighborhood, in the course of a few days. One negro man, only, the slave of a gentleman residing on the Eastern Shore of Maryland, lost his life on this occasion.

In May, 1817, the small-pox was again introduced into Baltimore from Philadelphia; but it was kept in subjection in the same way, until it was extirpated again through the operation of this agency.

In October, 1818, the plague was introduced a third time into Baltimore from this city, and several persons lost their lives by it. The physician who had the first case under his care denied that it was a case of small-pox, and he took no proper precaution to prevent its infecting those who were exposed to the contagion. But genuine vaccine matter was furnished again, free of any cost, from this agency; and the prompt and decisive measures that were taken at my suggestion succeeded effectually; and the variolous plague was again banished from Baltimore in the course of a few weeks.

Now, it is morally certain that if the vaccine agency had not been established in Baltimore, (my place of residence,) the small-pox would have become epidemic there on each of these three occasions; and it would have proved, no doubt, as destructive then as it has been on this last occasion, when the necessary steps that should have been adopted were not taken in time to prevent it.

That the variolous pestilence, and its newly generated prototype the varioloid disease, have been lately suffered to become such severe scourges to the citizens of Baltimore, is not my fault; neither can any blame justly attach to the vaccine agency on this account. If I had known, within any reasonable time, that the small-pox had been imported into Baltimore on this last occasion, I would certainly have prevented any injury resulting from it; for I was on the spot, and perfectly well prepared; and nothing was more easy to be done, or more within the compass of common prudence and common honesty to accomplish.

It was on the 14th of August last that the contagion of our present epidemic was imported into Baltimore from Liverpool; but its existence was not made known to me as it should have been. I discovered it by mere accident, from the story of an old woman, who told me that the small-pox had been several weeks among us. This was about the last of September, when it was too late for any individual to interfere with any chance of success. The persons who had first propagated the contagion were in a narrow street, in a thickly inhabited part of the city, and *they were under the special care of the consulting physician of the board of health.* But he kept their cases carefully out of my view, as well as concealed from the public, to prevent alarm, or to serve, perhaps, the mercantile interests of the city; but certainly without either judgment, discretion, or good sense. No blame, therefore, should be attached to me, any more on this account than for the accident in North Carolina, over which I had no control. Before I heard of the existence of the small-pox in Baltimore on this occasion, its contagion had been propagated to a considerable extent, and its further progress could not be arrested without one general and simultaneous effort on the part of all the physicians of the city. To obtain this effort to be made without the loss of an hour, I had a circular printed, and sent the vaccine matter to every physician who I expected would use it. But they very generally discouraged my interference, and a few of them only could be induced to lend me any aid to accomplish that which was certainly within their power, if they had been inclined to extinguish the flame that had been just kindled among us. The late destructive prevalence of the small-pox in Baltimore, therefore, should not be ascribed in any way whatever to the vaccine agency. The blame should rather attach to those who are hostile to this agency, and who have left no means in their power untried to accomplish their determination to destroy it.

It has been further alleged against this agency in the House of Representatives, by a gentleman who is a stranger to me, (and I do not know on whose authority he has made the erroneous statement,) that I have drawn from the public something like forty-five thousand dollars by the vaccine agency. Now the fact is, as you will perceive by the document herewith submitted, *fully proven and authenticated*, that the whole sum of money I have received, on the account to which he has alluded, has amounted to no more than twenty-two thousand three hundred and thirty-seven dollars in upwards of four years! Out of this sum I have had to pay all the current expenses of the agency during these four years; which, in printing and stationary alone, to furnish proper directions for the popular use of the kine-pock, has amounted to more than all the fees I ever received for vaccine matter since the enactment of your law of 1813; a law which induced the citizens of the United States generally to believe that I was paid by Government for my services, when, in fact, it never made any such provision. Out of the above sum, likewise, (a part of which has been paid to me in donations, and must be returned to the donors,) I have supported twenty different special agents, who were employed and paid by me to serve those from whom I received it. These agents were furnished with horses, and they rendered six thousand seven hundred and fifty days' service, vaccinating and distributing the vaccine matter gratuitously for the use of the rich as well as the poor; and we have secured, I believe, more than one hundred thousand souls from the small-pox. It must be easy for you, therefore, to perceive, that it has not been "taxing the people at large for the profit of the agent of vaccination," as has been stated, that has occasioned all the clamor that has been raised against me. If those who have raised this clamor had vaccinated half the number of persons we have, they would have drawn from the people ten times the sum of money for their services; and when they had drawn it, they could not be said to have drawn too much for such services.

It is true that the law you are now about to repeal originated at my request; but it never contained the provisions I asked, and always declared were essentially necessary to make it answer the purposes for which I wished it. As the law itself, therefore, is defective, and we have no prospect, under the excitement and misapprehension that now prevail on this subject, to render it more perfect, I pray it may be repealed, that an end may be put to the prejudices and jealousies it seems to have so unreasonably and unjustly brought into existence. But, in taking this step, I would wish the Senate to act on it understandingly; and I wish they would direct an examination to be made of the documents I had prepared at the request of the select committee of the House of Representatives, who reported the bill before you, without allowing sufficient time to enable me to furnish them with the information they had asked from me. If these documents cannot serve any other purpose at this time, they will, I hope, satisfy the honorable Senate that I have not been a useless and slothful servant, or an unfaithful steward over the trust that has been reposed in me.

But it is my determination, under all the disadvantages I must encounter, that I will not relinquish an institution which I established many years before the enactment of the law of 1813, and that I have conducted with so much benefit to those with whom I have had constant intercourse. The genuine vaccine matter, therefore, shall be preserved and furnished as heretofore, to all those who may apply to me, attending to such regulations as I have or may hereafter establish, to enable me to serve them faithfully and punctually.

I will attend in person to give you any further information in my power respecting the vaccine agency, if requested.

I have the honor to be, with great respect, your obedient and humble servant,

JAMES SMITH.

Hon. EDWARD LLOYD, *In Senate.*

17th CONGRESS.] No. 518. [1st SESSION.

MEDALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 9, 1822.

Mr. POINSETT made the following report:

The Joint Committee on the Library of Congress, to whom was referred a letter from Mr. George W. Erving, announcing that he had transmitted to the Speaker of this House a collection of medals, coined in commemoration of some of the most important military successes of France, under its republican Government, and under that of Napoleon, as well as those marking less important epochs in the history of that empire; together with the only medals coined in that country relating to the events of our revolution; and requesting, through him, to present this collection to the library of Congress, have agreed to report:

That, from a letter addressed to the honorable Mr. Dickerson of the Senate, by the collector of the port of New York, it appears that the medals were shipped at Havre, on board the brig Factor, in the summer of 1819, bound to New York; which vessel has not since been heard of, and is supposed to have foundered at sea.

The loss of this very valuable collection of medals is the more to be regretted as there is reason to believe that the dies from which they were struck have been since destroyed, and these medals are now, therefore, extremely rare and costly.

The committee recommend that they be authorized to purchase for the library the medals struck in France relating to the events of our revolution, and which may still be bought at the mint in Paris.

The practice so general in Europe of multiplying medals struck in commemoration of great events, and of important epochs in the annals of a nation, ought, in the opinion of the committee, to be adopted in this country. This would enable the public libraries and individuals throughout the United States to acquire all the medals which have been struck in commemoration of events of our revolution, and of our late naval and military successes. They, therefore, recommend the adoption of the following joint resolution:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the director of the mint be, and he is hereby, instructed to cause a reasonable number of the medals commemorative of important events in the history of the United States, to be coined at such times as shall not interfere with the ordinary business of the mint, and to be sold at a price adequate to defray the expenses of coining.

17th Congress.] No. 519. [1st Session.

CONTESTED ELECTION OF JEREMIAH COSDEN, A REPRESENTATIVE FROM MARYLAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 11, 1822.

Mr. Sloan made the following report:

The Committee of Elections, to whom was referred the memorial of General Philip Reed, contesting the election of Jeremiah Cosden, who is returned as one of the representatives of the present Congress from the State of Maryland, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That the constitution of Maryland directs that the elections shall be by ballot; that every free white male citizen of the State, above twenty-one years of age, and no other, having resided twelve months within the State, and six months in the county, next preceding the election at which he offers to vote, shall have a right of suffrage in the election of delegates to the State Legislature; that the State is divided into districts for the purpose of electing representatives to Congress; that the sixth congressional district is composed of the counties of Harford, Cecil, and Kent. The election for representatives to the present Congress was held on the first Monday of October, 1820. At that election the memorialist and the sitting member were candidates, and, by the returns from the several counties in said district, as made to the Governor and Council, it appears that the memorialist and the sitting member had an equal number of votes, and that neither had the "greatest number of votes," as by the constitution of the State is required, in order to constitute an election. But it further appears, by an official statement of the proceedings of the Governor and Council, bearing date the 18th day of October, 1820, that, in conformity with what was considered to be the provisions of the law of Maryland, the Governor and Council "proceeded to decide between them which should be the representative; and the result was, that Jeremiah Cosden, Esq. was decided to be the representative for the said district." The committee are aware that, to question the right of the executive authority of Maryland to give full operation to the provisions of its election laws, will be considered as a measure of an important character. It is understood by the committee that the authority under which the Governor and Council acted is the act of the State of Maryland passed the 14th of December, 1790, chapter 16, section 13. This provision of the act, the committee believe, has been repealed by the act of the 2d of January, 1806. But they consider it unnecessary to enter into an argument on this point. The constitution of the United States, article 1, section 2, provides, that "the House of Representatives shall be composed of members chosen every second year by the *people* of the several States; and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature." Section 5, of the same article, provides, that "each House shall be the judge of the elections, returns, and qualifications of its own members." On the first Monday of October, 1820, in conformity with the law of Maryland, an election was held by the qualified electors of the sixth congressional district. On that day they either did, or did not, elect a member to Congress. None could be elected unless he received a greater number of votes than were given for any other candidate. The term *election* must mean the act of choosing, performed by the qualified electors, in conformity with the requisitions of the constitution and laws regulating the manner in which the choice shall be made. If, therefore, the legal electors, on the day appointed, should fail to make a choice, it is confidently believed that no other authority of the State can, at any other time, make good this defect. Let it be supposed that the electors should fail to attend an election; that, consequently, no election is held: would it then be contended that the executive authority could, by lot or otherwise, appoint a representative for such district in the Congress of the United States? This is a power which it is presumed none will contend does exist. Yet it is believed to be nothing more than that which has been exercised by the Governor and Council of Maryland, in the case under consideration. In this case, the electors assemble; they proceed to elect; they make no choice; they come to no constitutional result. It is asked, what is the difference between the two cases? The one would be an appointment, because no election had been held; the other, because no choice had been made. The committee, being of opinion that the power thus virtually exercised by the Governor and Council of Maryland, in appointing a representative to the Congress of the United States, being contrary to the express provisions of the constitution, and one which this House cannot sanction, have no hesitation in rejecting the official statement of the proceedings in the case as evidence of the right of the sitting member to a seat in this House.

Having disposed of this part of the subject referred to them, the committee proceeded to an examination of the claims of the memorialist, and the objections of the sitting member thereto. The memorialist alleges that, at the election district No. 1 in Kent county, at said election, two tickets or ballots were thrown away by the judges of the election, and not counted; which tickets were given for him, and ought to have been set down and counted to his poll. These tickets, it appears, were thrown away under an impression that they had been folded together with a fraudulent intention, previous to their being put into the ballot-box. On the part of the sitting member it was contended that, at Elkton, in Cecil county, two tickets, under similar circumstances, were thrown away, and not counted, which ought to have been added to his poll; and that, at the same district, the memorialist was allowed one vote on account of a ticket on which was the name of the memorialist, together with that of five other persons, without any other designation than that of "for Congress." It was also contended by the sitting member that sundry illegal votes had been given for the memorialist, which, if deducted from his poll, would give the sitting member a clear majority of votes in his favor. No charges of a want of integrity were made by either party against any of the officers who had been engaged in conducting the election. Some of the testimony exhibited to the committee had been taken previous to the meeting of Congress, and some has been taken since, under instructions given by the committee for the government of the parties. It was suggested to the parties by the committee, that it would be satisfactory to have the testimony of the judges and clerks of the election in district No. 1 of Kent county, respecting the double ticket thrown away; and such course was recommended as was thought fair and liberal, and best calculated to arrive at a full knowledge of all the principal facts in the case; and the memorialist departed in order to procure additional testimony. At this time it was understood by the committee that the sitting member rested his claim on the testimony he had already taken; but, a few days subsequently, having stated to the committee that he was apprized of other testimony in the case, and that it was his wish to obtain it, a letter was addressed to each of the parties, by the chairman of the committee, appointing the 10th of January, 1822, for the final hearing of the case by the committee, and requesting each to give the other five days' notice of the time and place of taking the additional testimony. The memorialist avers that he did not receive the notification of the

committee until it was too late for him to be prepared to take depositions of his witnesses, until the day appointed for the decision of the case; and that, on his way to Washington, he accidentally lost the testimony. Under these circumstances, the committee permitted the testimony to be taken a second time; and, inasmuch as the sitting member had not attended the taking of these depositions in the first instance, and did not object to them when presented on account of not having notice, the committee agreed to receive the testimony thus offered. They have been thus particular in detailing all the circumstances that occurred in the case since it came under their cognizance, because, although some of the testimony may be such as strictly might not be admissible in a court of law, yet, as there appeared to be every disposition on the part of both the gentlemen to waive all objections of form, and to pursue a course calculated to arrive at facts, the committee were disposed to be less rigid than under other circumstances they might have been disposed to act. In respect to all the other testimony, due notice has been given by each party, and they attended or not as they thought proper. In support of the claim of the memorialist, John C. Hynson, one of the judges of the election in district No. 1 of Kent county, states, that he took the tickets from the box; that two tickets were thrown away, on which was the name of General Philip Reed, for Congress; that those tickets were not counted, but rejected, under an impression that they were a double ticket, fraudulently put into the box; but that, after he had passed it out of his hands, he was impressed with a belief that it was not double; and that this impression was confirmed when, on counting out the whole of the ballots, two were wanting to make the number equal to the number of persons voting.

Doctor Beckington Scott, David Vickers, James Price, James Ringgold, James Eagle, jun., Darius Dunn, and John C. Hynson, jun., testify, that they were present at the opening of the ballot-box, and counting of the tickets, and that they were satisfied that the two tickets thrown away, and which had the name of General Philip Reed on them, were not double; and that the final counting of the votes, there being two ballots less than there were names of persons voting, confirmed them in their belief.

The deposition of Elijah Beck states that he was clerk of the election, but states nothing respecting any of the facts in the case.

William Scott, clerk of Kent county, certifies, under the official seal of said county, a copy of the poll-book of said election, which shows that three hundred and sixty-five persons voted at said election, and that only three hundred and sixty-three tickets were counted.

The deposition of Joseph Ireland states, that he acted as clerk of the election; that the judges drew from the box a double ticket and threw it away; that he saw it in Judge Hynson's hands; and that after the votes were counted, and the disagreement between them and the poll list was discovered, Judge Hynson still said it was a double ticket.

The sitting member produced the depositions of William Boulden and John Kean. They state that they acted at the election in district No. 2 in Cecil county, in 1820, the first as judge, the second as clerk; and that General Philip Reed was allowed one vote on account of a ticket which had four other names on it without any other designation than "for Congress." They also state that two tickets were thrown away on account of being doubled.

James Sewall, clerk of Cecil county, gives a certified copy of the ticket alluded to by Boulden and Kean, under the official seal of Cecil county.

The deposition of John Bradshaw states, that he was one of the judges of the election in district No. 1 of Kent county. That Judge Hynson drew from the box a ticket, which he said was double; the deponent observed that, if so, it ought to be destroyed, and it was thrown away. That after the counting was finished, two ballots were wanting to correspond with the book of polls. That he observed to Judge Hynson that perhaps it was a mistake as to the ticket destroyed being double, but he declared it was double, and that it sometimes did happen that the ballots and polls did not agree. Deponent states that he did not see any name on the ticket destroyed, not having it in his hands.

William Scott, clerk of Kent county, certifies, under the official seal of said county, that, during several years past, there has been a difference in some of the districts in said county between the number of names on the poll-books of election and the ballots counted out.

The law of Maryland in relation to this subject is, that "every voter shall deliver to the judge or judges of the election in which he offers to vote a ballot, on which shall be written or printed the name or names of the person or persons voted for, and the purpose for which the vote is given, plainly designated." This law further provides that, after the poll is closed, and whilst the ballots are opening and counting, "if upon opening any of the said ballots there be found any more names written or printed on any of them than there ought to be, or if any two or more of such ballots or papers be deceitfully folded together, or if the purpose for which the vote is given is not plainly designated as within directed, such ballots shall be rejected and not counted."

In support of the allegation of the sitting member, that sundry illegal votes had been given to the memorialist which ought to be deducted from his poll, he produced the depositions of Edward Brown, George Copper, James Coleman, Josiah Massey, and the official certificate of James Sewall, clerk of Cecil county. On the propriety of entering into an investigation of this kind, when elections are by ballot, the committee entertain serious doubt. True it is that the decisions of the House in the case of Kelly and Harris, and Easton and Scott, may be considered as establishing the principle; yet, it is believed that, when the circumstances attending those decisions are examined, it may be doubted whether they ought to be viewed as establishing a precedent which shall govern all future decisions. But as no desire is entertained to agitate this question at the present time, the testimony has been received and attentively examined, but decided to be insufficient to establish any of the facts contended for.

From a full, attentive, and deliberate examination of the case, in all its points and bearings, the committee are impelled to the conclusion, that the sitting member cannot, consistently with the constitution of the United States, be allowed to retain a seat in this House, under the proceedings of the Governor and Council of Maryland; that the testimony in relation to the two votes rejected in district No. 1. of Kent county, proves that these tickets were not fradulent, and that they ought to have been counted to the poll of the memorialist, for whom they were given; and that the vote allowed to him in district No. 2 in Cecil county ought to be deducted from his poll, as being clearly an illegal vote. Therefore, by adding to the poll of Philip Reed, the memorialist, two votes improperly rejected in Kent county, and deducting one therefrom, for that improperly allowed in Cecil county, he will have a majority of one vote over the sitting member.

The paper marked A is the answer of the sitting member to the prayer and arguments of the memorialist.

The following resolutions are submitted:

Resolved, That Jeremiah Cosden is not entitled to a seat in this House.

Resolved, That Philip Reed is entitled to a seat in this House.

A.

SIR: MARCH 7, 1822.

In the contested election between General Philip Reed and myself, as it may be presumed that all the testimony on both sides, intended to be produced, or which will now be received, has been submitted to the committee, it seems proper that I should offer a few remarks upon the subject. This would have been earlier done, but for the impression that a partial discussion would rather retard than expedite the ultimate determination. In replying to the petition or memorial of General Reed, I must beg permission to *invert* the order adopted by him. He claims a seat in the House of Representatives upon the ground that he had a legal majority of votes; and, *if such were the fact*, his claim would not be resisted; but I will examine this *fully*, as the second branch of the present inquiry. In the latter part of the memorial, the petitioner labors to show that the law of Maryland, under which the sitting member has been returned, is repugnant to the constitution of the United States, and therefore void. This law was passed in 1790, and not in 1791, as stated in the petition, about *two* years after the formation of the constitution of the United States, and by some of those very men who just before had sat in the convention which agreed to adopt that constitution. It, moreover, was passed for the *express, avowed purpose*, of carrying that constitution *into effect*, and giving it full operation in Maryland. This is declared to be the object of the law. (See the act itself, 1790, chap. 16.) It must then appear strange indeed, if, under these circumstances, the law shall be found to be at war with the constitution in one of its most *important* provisions. I *rather presume* the constitution was quite as well understood by the framers of this law as it is now; and I beg leave to add, that I further presume that there *then existed* quite as *little disposition* to violate the constitution, or the rights of the people, as at *this time*. Upon turning to the law, the following provision will be found in the first section thereof: "Whereas it is declared by the constitution of the United States that the House of Representatives, in the Congress of the United States, shall be composed of members chosen every second year by the people of the several States, that the electors in each State shall have the requisite qualifications of electors of the most numerous branch of the State Legislatures, &c.: In order, therefore, to carry the said constitution into effect, be it enacted," &c. It is presumed that this section will hardly be contended to be at variance with the constitution. And similar sentiments and language are to be found in the third and eighth sections of this same law. Yet, in the thirteenth section, it is provided "that, in case *two or more persons* shall have an equal number of votes, the Governor and Council shall determine, by lot, from the candidates, who shall be the representative." Are these several provisions inconsistent with each other? Can they not well stand together, and form parts of the same system of elections? The most rigid critic must admit that they may. Then they may as easily be reconciled to the constitution of the United States. And when it is asked, What are the rights of individual voters? and what are the powers of State Legislatures in relation to elections? this very law furnishes a strong and clear illustration. Every person entitled to a vote for delegates to a State Legislature, is also entitled to vote for a representative to Congress; and he has as high a security for the one right as the other. But, upon the presumption that all the voters of a given district have *exercised this right*, (and such is the presumption of law,) and a tie between two or more candidates is the consequence, then the State Legislature, under the power to regulate the *manner* of holding elections for representatives to Congress, may, if they think proper, provide by law for the determination of the tie, by lot, or otherwise. But, in such a case, the petitioner would object that the *choice* would not be *by the people*. Mr. Chairman, if we consult the phraseology of the constitution, we shall perceive that the idea of *representation* pervades every part of it; that the constitution itself, though it literally and in express terms is declared to be *ordained by the people*, is their act only, upon this principle. It commences by saying, "We, the people of the United States;" as if the people were personally assembled, and about to act together. It will be found, sir, that all acts done in the name of the people, or in virtue of authority derived from them, are truly and properly the acts of the people. The President of the United States, for the purposes of his appointment, is as truly and as literally a representative of the people, as a member of Congress. His election is not so immediately the act of the people, but still he is elected *by them*.

But, sir, the petitioner objects further, and asserts, respecting the first clause of the second article of the constitution, (already quoted,) that "the command here is *peremptory*," &c. Now, with submission, I must *insist* that here is *no* command at all, either *peremptory* or *not*. The clause contains a general *declaratory description* of the House of Representatives; but more general it could not well be; and, without forcing its manifest meaning, it cannot be regarded as an authority for any particular *mode* of election by the people. And we have seen that it is perfectly consistent with the law of Maryland, of which it is made a substantial part. Upon the principles of this law, no popular right is violated, no voter has any ground for complaint, nor have the Legislature of the State transcended their powers in its passage; for, I cannot subscribe to the doctrine of the petitioner, when he lays it down "that the constitution never *intended* that there should be any interference on the part of a State, as to the election of representatives to Congress, *further than is expressly declared*." Sir, the very reverse of this doctrine is the true one. The States may interfere in any and every case where they are not expressly, or by necessary implication, forbidden. The constitution is no grant of power *to* the States or *to* the people; it is a grant *by* them; and all powers not expressly or by necessary implication granted, are retained by them. Surely it cannot be necessary to press this subject further. But if this view of the subject should not meet the approbation of the committee and the House, and they should think the law unconstitutional and void, still the right of the petitioner to a seat is not established. He sets up a claim to a seat; and if in point of fact there was a tie, and the law of Maryland is void, then the petitioner has no more right to a seat than any other person in the community; and, if there was a tie, and the Maryland law is a valid one, then, too, is there an end of the question. The claim of the petitioner rests wholly upon the fact of his having a majority of legal votes; and unless he can prove this fact to the satisfaction of the committee and the House, he must fail: and, whatever opinion the committee and House may entertain of the law of Maryland, if it shall appear by proof that the sitting member had a legal majority of the votes, his seat will be confirmed as a matter of course. I will therefore proceed, Mr. Chairman, to an examination of the testimony which has been produced and laid before the committee, remarking that, in this as in all other cases of claim, the *onus probandi* lies upon the claimant. But the sitting member will go further; he will endeavor to show by proof that there was a legal majority of votes given in his favor, and that the majority is decidedly against the petitioner.

The petitioner rests his claim solely upon two tickets, *rejected by the judges as a double ticket*. He states that these tickets were single, and not double, and that they contained his name for Congress. Mr. Chairman, both these positions are denied positively; and the evidence is appealed to, with perfect confidence, to settle the question. The petitioner produces several affidavits, mentioned in his petition, to prove that in the first, or lower district of Kent county, at the time of counting out the ballots, one of the judges, Mr. John C. Hynson, the junior judge, drew from the ballot-box a ticket which, at the time, he declared to be a double ticket, from its size. He passed it (say these deponents) to John Bradshaw, the presiding judge, unopened. Mr. Bradshaw, they say, opened the ticket, and found it to be double, upon which it was rejected; but that each of those tickets contained the petitioner's name for Congress. The deponents further state that they were under the impression that these tickets were single,

and not double, as supposed by the judges; and that their impressions were confirmed, when, upon finally comparing the number of tickets with the number of the names of the voters upon the poll-book, there was a difference of two.

This is the amount of all the testimony produced by the petitioner which is in his favor. His witnesses contradict each other, and are contradicted by those produced by the sitting member, in so strong a manner, and to such extent, that only a few facts are left undisputed between them. It is, however, certain that Judge Hynson drew a ticket from the ballot-box of such unusual size as to induce him to remark, at the time, that, *from its size*, he supposed it must be double; that it was only from the size of the ticket, and not from any other visible appearance, he was induced to make this remark. The ticket was so folded together that no one present, not even the acute Dr. Beckington Scott, who observed it when it was first drawn from the box, could determine whether it was single or double, until it was opened. To this point the evidence is uncontradicted. There is no witness who denies this to be the character and description of the ticket. When the ticket was opened, it proved to be double, and was, very properly, rejected by the judges. All the witnesses concur in stating the rejection of this ticket as the *joint* act of the judges. There was no *dispute*—no *doubt* about it; not a dissenting voice—not even a whisper among the warmest friends of the petitioner. Thus far the evidence may be safely trusted, because it all agrees. The question then is, was this properly a double ticket? or did two separate tickets thus enfold themselves by chance? If the committee and the House believe this was a double ticket, then there is an end of the petitioner's claim, whatever names may have been written upon the tickets. If tickets be loosely folded when deposited in the ballot-box, by pressing them together with a stick, or quill, or by shaking the ballot-box itself, they may become partially enfolded in each other; but, in such a case, there can never be any difficulty in deciding, by *sober* judges, who possess common *eyesight*. But if a ticket, so folded as to answer the description of the ticket in question, be deposited in the ballot-box, none of these means, or any instrument of chance, will be sufficient to produce an *enclosure* of one ticket in another. The thing is, ordinarily speaking, impossible. It will be recollected that the judges acted upon oath in this case, and that, as to this matter, they fully and explicitly agreed. They signed a joint return, in conformity to this determination, which has become a public record. If either of them had felt the smallest doubt, or had been under the slightest impression that the ticket was improperly rejected, he was bound to communicate it to the other judges, and to rectify the mistake before the return was made. But, in point of fact, (for the proof of this is also uncontradicted,) Judge Hynson declared, after all the votes were counted out, and after the deficiency was discovered, "that he was certain that it was a double ticket, and could not be counted." This Judge Hynson also remarked, at the same time, "that he had acted as judge several years, and that the tickets counted out often disagreed with the book of polls." And I would refer to the certificate of the clerk of Kent county, which has been laid before the committee, for numerous instances, in different years. By this document, it will appear that the tickets counted out oftener *disagreed* with the book of polls than accorded with it. Sometimes there was a difference of one, at other times two, and three, &c.

This has been attempted to be explained by the deposition of Mr. Beck, produced by the petitioner, in a manner not a little singular, and to which I must request the attention of the committee. Mr. Beck states that it was the practice to throw away scattering votes, and not to count them; but that, in 1820, columns were raised for all scattering votes, &c. Mr. John C. Hynson is made to speak to the same effect. I say, is *made* to speak. I shall have occasion to notice this more fully hereafter. Mr. Chairman, what proposition is this? what is its character? Has it been the practice for the judges to violate their oath? When votes are counting out, how is it possible to tell, when a ticket is produced in favor of an individual, how many more he will obtain? And how can a judge know who is a candidate, except by the tickets as they appear?

But, sir, these gentlemen will admit that it was the practice to keep a column of *numbers*, if none was kept for scattering votes, and in this numerical column the number of the tickets was kept, independent of any or all the candidates. The object of keeping this numerical column was to ascertain, as far as possible, the correctness of the whole proceeding. But it is a fact that mistakes have frequently occurred in the hurry of an election. Names have been placed on the poll-book who did not vote, and others have been omitted who did vote. We have a very recent instance of a zealous and distinguished politician who voted, but his name, though as well known as any in the county, was not entered on the book. This is the true and natural solution of all the difficulty.

Only suppose, in the case before us, that one single name was entered upon the books by mistake, (a thing that happens every day, and in all bodies or assemblies of men,) and then we have additional proof that the ticket *was double*. And permit me to inquire whether this is not a much more probable supposition, than that the judges should be deceived as to a fact of so plain, so palpable, and so simple a character? Even a slight attention to the different depositions is sufficient to show that no claim can be raised upon such evidence. Whether Hynson, for example, opened the ticket in question, or whether it was passed to Bradshaw, and opened by him, is asserted and denied most positively by different witnesses. But all the testimony is calculated to demonstrate that the ticket was *truly a double one*. It then only remains to explain the disagreement between the poll-book and the tally; which, it is presumed, has been satisfactorily done.

The deposition of Judge Bradshaw is entitled to entire confidence: a gentleman of high respectable character, in every view of it, and a witness who has acted with the most perfect propriety throughout. When called upon, on the 2d of January last, to give testimony in presence of the petitioner and the sitting member, he *attended*, and coolly and deliberately stated the facts before them, in so clear and circumstantial a manner as to leave no doubt of his veracity.

It would give me pleasure to be able to indulge in similar remarks as to Mr. Hynson; but this gentleman, though called upon in the same manner, and requested to attend at the same time, and give his evidence in the presence of the parties, refused or neglected to do so. This is proved by the deposition of Morgan Brown, jun., who had requested the attendance of Mr. Hynson.

A letter was then sent to Mr. Hynson, by the sitting member, requesting him to state in writing his knowledge and recollection upon the subject. Mr. Hynson, it is confidently believed, received this letter, but took no notice of it. Afterwards, in the absence of the sitting member, on the 10th of January, it seems he gave a deposition to the petitioner, which the latter states he lost on his way to this city. Subsequent to this, on the 12th of February last, Mr. Hynson, it seems, made oath again for the petitioner, and, to guard against casualties, swore to two depositions, signing one, and not signing the other: the latter is endorsed "a duplicate," and is produced; the former, which was signed by him, as stated by the petitioner, is not produced. All this operation of making depositions and duplicate depositions, on the part of this witness, was in the absence of the sitting member. This witness had refused to attend, he had refused to put pen to paper, he had refused to utter a word when the sitting member could be present; but in his absence he voluntarily furnishes depositions and duplicates to the petitioner, to his full satisfaction; and, in the duplicate produced, Mr. Hynson is made to say that "the two votes or ballots were thrown away, and not counted to the polls of General Philip Reed, as the deponent was satisfied they should have been." And was this deponent really satisfied that two tickets were thrown away which ought to have been counted to the

poll of the petitioner? What! and he a judge, and say not one word about it, but declare publicly that the ticket was double and could not be counted! And all this, even after the whole of the tickets were counted out! Then to sign a return, under oath, which he knew was incorrect! Has Judge Bradshaw acted in this manner? I appeal to every bosom in which there may yet remain one solitary spark, one lingering trace of honorable feeling! From Judge Bradshaw's deposition, it appears that there must have been a mistake as to the names upon these tickets. He swears positively that he saw no name upon them; he only saw an eagle at the top, on the inside. Now, as this was a mark of that ticket upon which the petitioner generally run at that election, it may be that the bystanders who saw it might have inferred that the petitioner's name was upon it; for it must be remembered that the name of the petitioner was printed at the bottom of the tickets upon which it was printed at all, below the names of the county delegates; though in some instances it was stricken out, and the name of the sitting member inserted.

The deponents named in the memorial, or rather some of them, say that the double ticket had upon it "General Philip Reed, for Congress." I feel no disposition, Mr. Chairman, to cavil or to raise frivolous objections; but I hope to be pardoned for remarking, that here is a striking proof of the incorrectness of the recollection of these deponents. There were no printed tickets used at that election containing this inscription! And, to prove the fact, sir, I submit to the inspection of the committee the whole of the tickets of one entire district in that county, as they were taken from the ballot-box. The tickets are either stamped with an eagle at the top, or without one; but upon no one printed ticket can this superscription, inscription, or whatever you may please to call it, be found; yet these deponents use the same words, and in the same order precisely, and their words are carefully *marked*. What is the inference? These deponents saw what never existed! So much for these *ex parte* depositions!

I am much mistaken, Mr. Chairman, if these views of the subject do not satisfy the committee that the petitioner has wholly failed to establish his claim to the benefit of these tickets.

But, sir, be this as it may, I will now proceed to show that there was a decided majority *against him*. I have hitherto called the attention of the committee to the pretensions of the petitioner, and the allegations and proofs offered by him. Now I must claim the indulgence of the committee while I present a brief and condensed view of the pretensions, allegations, and proofs of the sitting member. First, it is in full proof that the petitioner was allowed by the judges of the Elkton district, in Cecil county, the benefit of a ticket containing *five names*, all for Congress. The ticket was carefully deposited with the clerk of Cecil county, by the judges; and a true copy, under his official seal, has been submitted to the committee, with the affidavits of the judges and clerk, stating that the petitioner was allowed *a vote* on account of that ticket.

The committee will observe that the judges, in this case, erred in a question of law, and not of fact; and that, upon every principle of law, and, indeed, of good sense, this ticket should have been rejected. By the election law of Maryland it was an absolute nullity. But, in the nature of things, it must be so, even if no positive statute existed upon the subject.

What would be done in the case of a ballot for a committee of seven, if, upon counting out, a ticket should be found with *ten* names upon it? or if, in balloting for a Speaker, a ticket should be found with two or three names upon it? We all know that such tickets must, upon the principles of reason and justice, be null and void. Mr. Chairman, I respectfully apprehend that it is altogether unnecessary to attempt further to illustrate or enforce this part of the subject, and feel the most entire confidence that the committee will deduct this ticket from the poll of the petitioner, to which it ought never to have been added.

I will next call the attention of the committee to a vote given to the petitioner in Kent county, by Theodore Burr. This man had no residence in Kent county at all, except merely going there and undertaking to build a bridge, and being actually in the county part of his time, on that account.

His residence (if he had any in Maryland) was in Cecil county, and not in Kent, where he voted. He had been sued in Cecil, as his proper county, (and, by the law of Maryland, a person must be sued in his proper county,) and prosecuted to judgment, and an execution had been issued and served upon his body, returnable, and was returned, to the April court of that county, in 1820. At that court Mr. Burr was committed to jail, where he remained until late in June or early in July. After this he went to Kent, and, on the 1st Monday of October, in that year, voted for the petitioner. The certificate of the clerk of Cecil county, already laid before the committee, the law of Maryland referred to, and the deposition of James Coleman, fully prove this statement. This man had nothing in Kent county deserving the name of residence at the October election; but, whatever he had, it was not of six months' previous continuance, as required by law to entitle him to a vote.

I will also ask the attention of the committee to the vote of Thomas Glanvill, given in Kent, for the petitioner. Glanvill had no residence. That he had no residence, is fully proved by George Copper; and that he voted for the petitioner, is proved by Morgan Brown, the present sheriff of Kent county. I refer to their depositions before the committee.

I will ask permission, Mr. Chairman, to present another case to the view of the committee.

Gideon Lusby voted for the petitioner, and was under age at the time. I refer to the deposition of Joseph Massey to prove this. Here, then, are *four votes* to be deducted from the poll of the petitioner, which will establish a decided majority against him. And it should not be forgotten that the depositions in these cases were not *ex parte*, but were taken in the presence of the petitioner, who *cross-examined* the witnesses. I am aware, however, Mr. Chairman, that objections may be made to this kind of testimony, and am prepared to support it, both upon principle and precedent. But no objection can properly now be made by the petitioner, because he entered into the evidence himself, by instituting a cross-examination; and it is believed that no serious difficulty can be raised by any one to this course of proceeding. It is as common as it is easy to make off-hand superficial objections to any thing.

What is the great difficulty in receiving this evidence? Sir, I have often felt surprised to hear the answer. It is said, by giving a man's declarations in evidence you make him a witness against himself! Surely, if a man of any understanding ever advanced this proposition, it must have been without consideration. Is it not a principle of general law that you can give a man's declarations or acknowledgments in evidence against him, both in civil and criminal cases? You cannot give a man's declarations in evidence *for him*, nor can you compel him to be a witness against himself; but if he, without compulsion, confess or declare a matter which may operate against him, either civilly or criminally, this may be properly given in evidence against him. I said this was a principle of *general*, but perhaps I might have said of *universal* law. Such a confession, it is true, may affect a *particeps criminis*, to a certain extent, or it may have a qualified effect upon one having an interest in the subject to which the confession or declaration relates; and certainly it ought to have these effects. Innumerable instances might be put to illustrate this principle, but I fear I shall be tedious. In the State of Maryland, two years ago, after much consideration, it was solemnly determined that this kind of evidence should be received and acted upon. Nor is it any answer to this case to call it a high-handed measure of party, &c.; for such was not its character. And only last winter, the General Assembly of Maryland issued a commission to three persons in Cecil county, authorizing

them to take testimony relative to illegal votes. But, Mr. Chairman, the principle has been sanctioned again and again by Congress; and, in addition to the cases heretofore named to the committee, I will, on the present occasion, only notice one; it is a case decided from Tennessee, in the 13th Congress: Thomas and Kelly. The circumstances of this case will be found applicable to the case before the committee. If I have been able to make myself understood by the committee, I presume there is a final end of the petitioner's claim. It is less substantial than the shadow of a shade.

Perhaps I owe an apology to the committee for the trouble I have given them in this case; but I trust they will credit me when I assure them that my prevailing wish has been, from the beginning, to render their investigation as easy and agreeable as possible. In the present communication I have deemed it advisable, for the sake of brevity, to omit a number of circumstances which are of some importance to the different views which might be taken of this case.

JEREMIAH COSDEN.

To the Honorable JOHN SLOAN, *Chairman of the Committee of Elections.*

17th CONGRESS.] No. 520. [1st SESSION.

WEIGHTS AND MEASURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 11, 1822.

Mr. LOWNDES, from the committee to whom had been referred "the report on weights and measures," made by the Secretary of State on the 22d of February, 1821, reported:

That so comprehensive a view has been given in the document referred to them of the origin and history of the measures and weights now in use in the United States, and so full an examination of the different proposals which have been made for their improvement, that they deem it scarcely necessary to do more than to submit the resolutions which they think it expedient that Congress should pass at this time. Their object is only to "render uniform and stable the measures and weights which we at present possess."

To effect this, they propose that the President shall cause application to be made to the English Government to allow models of the yard, the Winchester bushel, wine gallon, and pound, (avoirdupois,) to be procured from its offices. For the purpose of easy and perfect comparison, it may be well that the yard should be traced upon the rod of platina, in the possession of the Department of State, on which is traced the French metre. These models should be made with the utmost accuracy which the art and science of England can give, and, if satisfactory to Congress, should be declared the standard yard, bushel, liquid gallon, and pound, of the United States. There is some difference of opinion as to the material of which the standards shall be formed. The committee will not detain the House by a full exposition of the reasons which lead them to conclude that at least the standards of length and weight should be of platina, as the material on which time is found to produce the smallest change. The Secretary of State, who adopts an opposite opinion, has said that "the very extraordinary properties of platina, its unequalled specific gravity, its infusibility, its durability, its powers of resistance against all the ordinary agents of destruction and change, give it advantages and claims to employment as a primary standard for weights and measures and coins, to which no other substance in nature has equal pretensions. Should the fortunate period arrive when the improvement in the moral and political condition of man will admit of the introduction of one universal standard for the use of all mankind, it is hoped and believed that the platina metre will be that standard." But, if the immutability of platina recommend it so strongly as a standard for all nations, and all time, it can hardly be amiss to adopt it for the interval which may elapse before the universal adoption of a natural standard. This interval the Secretary and the committee may be willing to shorten, but it seems likely to last as long as diversities of laws and language among men. If the standard pound shall be of platina, it must, of course, be made equiponderant with the English pound *in vacuo*, and the same means must be used in making the models of weight which are intended for distribution among the States. The standards of measures of capacity must probably be of copper or brass, and the careful preservation of all the standards may be provided for in the law which shall establish them. The committee think it best that they should be kept in the Department of State, and used only to verify the models which may be issued under the authority of the Government.

The committee believe that, by distributing accurate copies of these standards among the States, the present inequality of weights and measures will be so far removed as to leave little practical inconvenience in that regard. They propose that the President shall cause to be procured such a number of copies or models of these standards of weight and measure, with their most convenient multiples and divisions, as may be necessary to allow one model of each standard to be lodged with the clerk of each district court of the United States, and one to be given to each State and Territory, to be disposed of as its Legislature may direct. The most convenient material for those copies will probably be copper or brass, but the determination of this question may best be referred to the authority which shall procure them.

It is believed that no other obligation will be required to enforce, on the part of the officers in the service of the United States, the use of weights and measures conformed to the standards established by law, than that which a sense of duty, and a dependance upon the Government for their continuance in office, must produce. The committee think it best that Congress, after providing the standards of weights and measures, and furnishing models of them to every State, should leave it to the laws of the several States to enforce their use by persons who are not in the service of the United States. In the custom-houses and land offices, the measures and weights may be provided from the same funds, and under the same authority, which have been hitherto employed. The committee suppose it necessary only to provide for such a distribution of models as may make it easy to verify the weights and measures which may be used either by public officers or in private transactions. It was proposed by a former committee of the House of Representatives, in a report made in January, 1819, that the relations between the different standards should be accurately ascertained and declared in the law which should establish them. It was

observed, that "the determination of the proportions between lineal measures and measures of capacity, and between both these and weights, may have some effect in enabling us to detect, without too difficult a process, the defects of measures of capacity, and possibly of weights, in common use. For this purpose it would perhaps be convenient to establish not merely the cubical contents of the common measures of capacity, but to fix determinate forms for all these, and dimensions whose correctness might be ascertained by the common measures of length." But the relations between the standards cannot be ascertained with that absolute certainty which should be exacted in a law fixing permanent standards. The calculation of the dimensions of vessels of capacity is found, even by the most practical artists, to be so uncertain that they rely entirely upon the trials by the weight of water which they contain. It is of some importance that the forms of measures of capacity which are used in commerce should be left to depend upon the material or the art which it is found most convenient in the different parts of our country to employ. And, in fine, those relations and dimensions which it is useful to know, will be ascertained by philosophical inquiry, and published in books of easy reference. Indeed, they have been so.

The committee have proposed to establish but one standard of weight. It will be necessary that accurate models of the grain and its usual multiples should be provided, to verify the weights which are used for the precious metals and for medicine. The law which shall establish the standard pound may declare the grain to be the seven thousandth part of the pound, as frequent and careful examination has shown it to be.

The committee submit the following resolutions:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be requested (if the consent of the Government of Great Britain shall be given thereto) to cause to be traced on a rod of platina the yard of the year 1601, which is kept in the British exchequer; to cause to be made of platina a pound, of the weight *in vacuo* of the English avoirdupois pound; and that he also cause to be made, of whatever material he shall deem best for standards of those measures, a vessel of the same capacity as the standard Winchester bushel, and also a vessel of the same capacity as the standard wine gallon of England.

Resolved, That the President be requested to cause to be made, for distribution among the States and Territories, and for the purpose of verifying the weights and measures used therein, models of the yard, on which shall be traced its divisions of feet and inches; models of the bushel, half-bushel, quarter-bushel or peck, thirty-second part of a bushel or quart; models of the wine gallon, of the wine quart and pint; models of the pound, half-pound, quarter-pound, of the sixteenth of a pound or ounce, of the seven thousandth part of a pound or grain; models of the pennyweight or twenty-four grains, of the scruple or twenty grains, and of the apothecaries' dram or sixty grains; models of the weight of twelve and a half pounds, of twenty-five pounds, of fifty pounds, and of one hundred pounds; that these models of weight and measure be formed with the utmost practical exactness from the weights and measures procured under the authority of the foregoing resolution; and that the number to be procured of each model shall not exceed ——.

17th Congress.] No. 521. [1st Session.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 12, 1822.

Mr. Butler, from the Committee on Agriculture, to whom was referred the petition of Anthony Dey and James Macdonald, reported:

The petition alleges that the said Macdonald, at the expense of the said Dey, has invented and constructed a new and useful machine for breaking and cleaning of hemp and flax in an unrotted state; and that the said Dey has discovered the means by which hemp and flax, after being cleaned in an unrotted state in their machine, may be bleached by a process hitherto unknown; that they believe their method of dressing hemp and flax is of very great importance to the agricultural interest of the country; and, therefore, ask an extension of the exclusive right to make, construct, use, and vend to others to be used, the said invention and discovery.

From the evidence adduced by the petitioners, it appears that they have invented a machine for breaking and cleaning hemp and flax in an unrotted state, which is different in its principles and construction from any machine that ever has been used for that purpose; and that the said Dey has also discovered a process, never before used, for bleaching hemp or flax after it has been dressed in an unrotted state; and, also, it appears, by the certificates of respectable gentlemen who have witnessed the operation of the machine, that it will, by the power of one horse, with the assistance of one man and three boys, separate the integument and wood from the fibrous part of the hemp and flax plants, and clean the same, at the rate of one pound in a fraction of time, even a minute, fit for bleaching.

The petitioners further assure us, from the operation of one machine by horse power, with the attendance of one man and three boys, from one thousand six hundred to two thousand pounds of unrotted hemp or flax may be cleaned in a day, yielding from four to five hundred pounds after it is bleached; and that, by the addition of another machine, which can be moved by the same horse, with the addition of one man and one boy more, from eight hundred to one thousand pounds may be cleaned at an expense not exceeding five dollars. And the committee are informed by Mr. Dey that one man can bleach three hundred and fifty pounds of hemp or flax, after it has been cleaned by their machine, in a day, at an expense of one dollar and seventy-five cents for the article which he uses in the process.

From these calculations, it appears that any quantity of unrotted hemp or flax, taken from the field where it is raised, may be broken, cleaned, and bleached, at a rate of less than two cents per pound, delivered in a bleached state; and, allowing one cent per pound for the plant as it comes from the field, the whole cost (except for the wear of the machine) in growing this valuable plant, and breaking, cleaning, and bleaching it, will be less than six cents per pound. The committee are not informed what the cost of hatcheling or combing it, (which is done after it is bleached,) and preparing it for the manufacturer, would be; but presume it will not exceed two cents per pound. If the information the committee have received and their calculations are correct, either hemp or flax may be raised, dressed, and prepared for the best manufacture, at an expense of eight cents, and not exceeding, in any case, ten cents per pound.

By the experiments of the petitioners and others, it is found that flax, dressed and hatcheled in the ordinary way, after it has been dew-rotted, yields nine pounds from one hundred pounds of the plant which has been rotted, being sixteen pounds less than is produced from one hundred pounds of unrotted flax, cleaned and bleached by the method which the petitioners have discovered. But no experiments have yet been made to determine the difference in the weight of the plant before and after it is rotted; therefore, it cannot now be ascertained how much will be saved, in quantity, by this method of breaking and cleaning it before it is rotted. It cannot, however, be doubted that the common process of rotting flax, especially by dew, destroys or injures many of its fibres, and, of course, the quality as well as the quantity must be, in some degree, diminished.

The committee have examined the machine, and have seen it operate, and believe it will prove one of the most important and valuable discoveries. The committee have also examined the hemp and flax which has been bleached in this new method and hatcheled, and find that the colored matter and harshness of the fibres are removed, and that the flax is rendered very white, and as soft and fine as silk. This method of bleaching hemp and flax, it is believed, will be of great value to the grower and manufacturer of these plants.

Considering hemp and flax among the most valuable plants which can be cultivated in this country, and believing there is an abundance of soil in every State in the Union which is well adapted to their culture and growth, the committee are highly pleased with the invention and discovery of the petitioners. If hemp and flax can be raised in this country as easily and as cheap as in any other, and these inventions should prove as valuable as the committee believe they may, the cultivation of these plants will engage the attention of a large portion of the agriculturists, and become exceedingly important to the United States. It may be seen by the statement of the Secretary of the Treasury of the quantity and value of merchandise imported, that, during the year ending on the 30th of September, 1821, 86,192 cwt. of hemp, valued at $510,489, (being about $120 per ton,) hempen goods of the value of $226,174, duck and sheeting of the value of $894,276, cordage of the value of $107,867, and linens, bleached and unbleached, of the value of $2,564,159, were imported into this country, amounting to $4,302,963; and that the whole value of the exports of domestic and foreign produce of the same kind amounted only to $822,976, leaving the value of $3,479,187 in the merchandise produced from the hemp and flax plants to be consumed in this country.

As the petitioners desire an extension of time and further protection than is secured by the patent law in its present form, and as it is the peculiar province of the Committee on the Judiciary to report any revision or amendment of that law which may be deemed necessary, your committee recommend the adoption of the following resolution:

Resolved, That the Committee on Agriculture be discharged from the further consideration of the petition of Anthony Dey and James McDonald, and that it be referred to the Committee on the Judiciary.

17th Congress.] No. 522. [1st Session.

NATURALIZATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 13, 1822.

Mr. Sergeant, from the Committee on the Judiciary, to whom was referred a resolution of the 14th February, instructing them to inquire into the expediency of permitting aliens, who resided within the limits and jurisdiction of the United States one year immediately preceding the declaration of the late war between the United States and Great Britain, and who have continued to reside within the same, to become citizens, without a compliance with the first condition specified in the first section of the act entitled "An act to establish a uniform rule of naturalization," approved April 14, 1802, reported:

That the condition proposed to be partially dispensed with by the resolution is that which requires an alien to make a declaration of his intention, on oath or affirmation, three years before the time of applying to be admitted to become a citizen of the United States. The condition is, in the opinion of the committee, a very reasonable one, and one with which it is easy to comply, in every case where the intention really exists. To dispense with it, is to commit a breach in the established system, and to make residence, without declared intention to become a citizen, sufficient to entitle a person to admission. This does not seem to the committee to be necessary or expedient, and they therefore offer the following resolution:

Resolved, That the committee be discharged from the further consideration of the subject.

17th Congress.] No. 523. [1st Session.

CITY OF WASHINGTON: COMMISSIONER OF PUBLIC BUILDINGS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 8, 1822.

Mr. Nelson, of Massachusetts, from the Committee on the Public Buildings, to whom was referred a resolution of the 2d April instant, directing an inquiry to be made "into the expediency of transferring the duties heretofore performed by the commissioner of the public buildings to the principal architect," reported:

That, by an act of Congress passed on the 16th day of July, 1790, the President of the United States was authorized to appoint, and keep in appointment so long as might be necessary, three commissioners, whose duty,

among other things, it was made, by the said act, (according to such plans as the President should approve,) to provide suitable buildings for the accommodation of Congress and of the President, and for the public offices of the Government of the United States. The office of the commissioners, created by the above-mentioned act, was abolished by an act of Congress passed on the 1st day of May, A. D. 1802; and the affairs of the city of Washington, which had been under the care and superintendence of the commissioners, were placed under the direction of a superintendent, appointed by, and acting under, the control of the President of the United States. The superintendent was invested with all the powers and charged with the performance of all the duties of the commissioners, by or in virtue of any act of Congress, or any act of the General Assembly of Maryland, or any deed or deeds of trust from the original proprietors of the lots in the said city, or in any other manner whatever. The salary of the superintendent was fixed, by the act of the 3d of March, 1803, at $1,200 per annum, besides contingent expenses.

By the act of April 29, 1816, the office of superintendent was abolished, and the President of the United States, by and with the consent of the Senate, was required to appoint one commissioner, who shall hold no other office under the authority of the United States; who is allowed a salary of $2,000, and who shall perform all the duties with which the three commissioners were charged, and the duties of the superintendent. It is the duty of the commissioner of the public buildings to select and appoint the architect, and all other agents engaged in the public buildings; to fix their compensation, to determine the number and description of workmen to be employed, and their pay; to provide and purchase materials, to inspect the plans and execution of the work, and to have the general regulation and superintendence of the whole. It is his duty to make all the disbursements of money, either on account of labor or materials; to procure regular vouchers for the same; and to account at the Treasury for all sums appropriated to objects within his department. It is also his duty, as superintendent of the city of Washington, to see that the plan and regulations are observed; to attend to the sale of public lots; to collect and account for the proceeds thereof; to make, under certain circumstances, streets through, and foot-ways in front of, the public grounds, and to have the care and management of those grounds. It is also understood that the United States are parties to several suits now depending to try the right to property in the city of Washington of a considerable amount, the care and management of which suits appertain to the commissioner of the public buildings. It may not be thought irrelevant here to refer to a report made by the commissioner of the public buildings to the House of Representatives during the present session, in relation to the public lands in the city of Washington, by which it appears, that " of the building lots there remain unsold about the number of 5,150, the reservations containing together 541 acres 1 rood and 29 perches, or 23,584,745 square feet, equal to 4,479½ standard lots; that the average price of the public lots heretofore sold is $180 per lot; and, at this valuation, the whole of the grounds belonging to the United States, in the city of Washington, amount to $1,733,310." There is no such officer created, by law, as an architect of the public buildings; but it is the duty of the commissioner of the public buildings to employ an architect, when necessary, as it is his duty likewise to employ all other necessary agents; and when the public buildings shall be completed, the services of an architect may be dispensed with. From the view which the committee have taken of the duties of commissioner of the public buildings, taking into consideration the quantity and value of the public property subject to his care and management, they cannot resist the impression that the office is a necessary one, that its duties are important, and that it is inexpedient to transfer them, as proposed by the resolution. The committee, however, being anxious to retrench the expenditure of the public money, where it may be done without a sacrifice of the public interest, and believing that the duties of the commissioner of the public buildings are less arduous than they formerly were, in consequence of the progress made towards the completion of the buildings, recommend a reduction of the salary of the commissioner to the sum of $1,500 per annum; and for that purpose have directed that a bill be reported.

17th Congress.] No. 524. [1st Session.

EXTRA PAY TO THE ATTORNEY GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 12, 1822.

Mr. Sergeant, from the Committee on the Judiciary, to whom was referred a message from the President of the United States, furnishing, in compliance with a resolution of the House, certain information relating to the amount of the public money paid to the Attorney General, over and above his salary fixed by law, since the 1st January, 1817, reported:

That the office of Attorney General was established by the act of the 24th September, 1789, and his duty defined to be, "to prosecute and conduct all suits in the Supreme Court in which the United States shall be concerned, and to give his advice and opinion upon questions of law, when required by the President of the United States, or when requested by the heads of any of the Departments, touching any matters that may concern their Departments."

The same act directs that he "shall receive such compensation as shall by law be provided."

By an act of the 23d September, 1789, the compensation of the Attorney General was fixed at $1,500 a year. It has been raised by successive acts of Congress, from time to time, as the increased labor and other just considerations seemed to require, and is now $3,500, which cannot be deemed more than a reasonable allowance, considering that the increased demand for the frequent legal aid of the Attorney General has made it necessary for him to reside at the seat of Government, and requires a much larger devotion of his time to the public service than was formerly called for.

From the act of 24th September, 1789, to the present time, no change has been made in the constitution of the office, or the definition of the duties which belong to it, nor is it believed that any such has been suggested; and it may therefore well be inferred that nothing has heretofore occurred to induce any one to suppose that a change was expedient; and the committee deem it fit to add, that they neither know nor have heard of any complaint that the office has not answered its purpose.

The appointments heretofore made, and the compensation heretofore and now allowed, have had reference only to the existing constitution of the office, and the duties belonging to it, as already stated.

It follows clearly that no Department of the Government has a right, nor ever has had a right, to call upon the Attorney General to perform any other duties; and it would be difficult to show that an officer is under a greater obligation than a private citizen to render gratuitous services to the Government, particularly where they are of a nature to be estimated and paid for.

In the extensive and interesting concerns of the nation, it will nevertheless happen, as it has already frequently happened, that the Government will have occasion for other or further legal aid than that which their officers are bound, or, in some cases, able to afford. Such occurrences are, in their nature, contingent, and they can only be provided for by the establishment of offices, and the appointment of officers, upon a scale to embrace every possible contingency, (with adequate salaries and emoluments,) which, if it be at all practicable, would be onerous and wasteful; or, by leaving to the executive officers of the Government the power of engaging such aid, from time to time, as the occasions may occur; exercising this very inconsiderable discretion under the same responsibility as belongs to their more important duties: the latter has been the practice of the Government.

Where such occasional aid can be afforded by the Attorney General without interference with his proper duties, (as in cases occurring at or near to the seat of Government,) there is no objection to his being employed upon the ordinary professional footing—of receiving a compensation for the service required. It was not the design of the office, as has already appeared, that he should render any other than the stated duties for the stated compensation or salary; and it was never understood or intended that the office was to deprive the officer of the right to employ his professional talents and learning for his own benefit, where that could be done without prejudice to the faithful performance of his stated duties. There is no good reason why the Attorney General should not, under the limitation just mentioned, be at liberty to engage in the general pursuits of the profession. Accordingly, such has been the usage, not only in the instance of the Attorney General of the United States, but, it is believed, of every State in the Union, to engage in private practice, abstaining only where it interfered with public duty.

In reviewing the past, then, the committee find nothing to disapprove. Where additional professional aid has been employed, it seems to have been necessary and proper, and not to have been compensated beyond a fair and reasonable amount. Where compensation has been allowed to the Attorney General, it has been for services rendered which did not belong to his office, which he was in no manner bound to perform, and for which, therefore, if he did perform them, he was entitled to be paid as any other professional man would be. And they think it fit to state, explicitly, that, in those instances where compensation has been allowed to the distinguished citizen who now fills the office, services have been faithfully rendered, well deserving what has been paid to him, and it certainly has not been greater than must have been paid to any other eminent lawyer.

In regard to the future, the committee can propose no other plan than that which has heretofore been adopted and approved. It seems to the committee to have well answered its purpose, and they perceive no good reason to fear that it will prove less effectual in future. They therefore offer the following resolution:

Resolved, That the committee be discharged from the further consideration of the subject.

To the House of Representatives of the United States: WASHINGTON, *April* 6, 1822.

In compliance with the resolution of the House of Representatives, requesting the President of the United States to cause to be furnished to that House certain information relating to the amount of public money paid to the Attorney General, over and above his salary fixed by law, since the 1st of January, 1817; specifying the time when paid, the particular services rendered, and the fund out of which such payments have been made; I transmit a paper marked A, containing the information desired. I transmit, also, a paper marked B, containing a statement of the sums paid to Attorney Generals of the United States prior to the 1st of January, 1817; and, in the paper marked C, a like statement of sums advanced to district attorneys for services not required of them by law. These latter documents being necessary to a full view of the subject, it is thought proper to comprise them in this communication.

By the act of the 24th of September, 1789, instituting the office of Attorney General, it was made his duty to prosecute and conduct all suits in the Supreme Court, in which the United States should be concerned; and to give his advice and opinion upon questions of law, when required by the President of the United States, or when requested by the head of any of the Departments, touching any matters that might concern their Departments. It will be seen, therefore, by the statement communicated, that no money whatever has been paid to the Attorney General for his services in that character, nor for any duty belonging to his office, beyond his salary, as fixed by law.

It will also be shown, by the documents communicated, that the construction given of the laws imposing duties on the Attorney General and district attorneys, has been invariably the same since the institution of the Government. On the same authority, it was thought that the compensation allowed to the present Attorney General, for certain services, considering their importance, and the time employed in rendering them, did not exceed, regarding precedents, what might fairly be claimed.

JAMES MONROE.

A.

A statement of the sums paid to William Wirt, Attorney General of the United States, beyond his salary, for services not required of him by law.

1818. Dec. 18,	On account of his professional services in the circuit court of the United States, at Baltimore, as additional counsel to the district attorney, in certain criminal prosecutions, at the suit of the United States, for various piracies and violations of our laws to preserve the neutral relations of the United States,* - -	$1,500
May,	On account of his professional services in the circuit court of the United States, at Baltimore, as additional counsel to the district attorney, in several criminal prosecutions for robbing of the mail,† - - - - - -	1,000
1820. June 7,	For drawing the answer of William Otis to the bill of Blake for the United States *vs.* William and John Otis, in the circuit court of Massachusetts, - -	50
1821. March,	For advice, and an argument, in the case of James Johnson, of Kentucky, which was referred to arbitrators, ‡ - - - - - -	400
April 9,	On account of his professional services in the Supreme Court, in the case of Anderson *vs.* Dunn, February term, 1821: employed by the Speaker of the House of Representatives, - - - - - - - -	500

TREASURY DEPARTMENT, *Register's Office, March* 20, 1822.

JOSEPH NOURSE, *Register.*

* Mr. Wirt observes, in this case, that he was detained, unavoidably, in Baltimore, upwards of thirty days, at his own expense.

† Mr. Wirt observes, in this case, that the trials were separately had, the detention and trouble very considerable, and Mr. W. at his own expense.

‡ Mr. Wirt observes, in this case, he was employed to furnish a written answer to two arguments, prepared for the arbitrators on the part of the Messrs. Johnson; and, also, to give a full argumentative view of the whole case, facts, and law, in behalf of the United States. The evidence was voluminous and complicated, the sum in controversy several hundred thousand dollars, and the labor much greater than would have been necessary in an argument to be delivered *ore tenus*, in the Supreme Court, while the compensation was much less than an individual would have had to pay for this service.

B.

A statement of the sums paid to the Attorney Generals of the United States, prior to the 1st of January, 1817, beyond their salary, for services not required of them by law.

Date of payment.	To whom paid.	For what services.	Amount.
1792. October 26,	Edmund Randolph,	For his expenses incurred attending a circuit court held at Yorktown, in Pennsylvania, by order of the President of the United States, - - - -	$54
1814. January 26,	William Pinkney,	For his fee in the case of the United States against Brown and others, - - - - - -	100

TREASURY DEPARTMENT, *Register's Office, March* 20, 1822.

JOSEPH NOURSE, *Register.*

C.

A statement of the sums paid to the District Attorneys of the United States, beyond their salary and fees of office, for services not required of them by law.

Date of payment.	To whom paid.	For what services.	Amount.
August 19, 1794,	Alexander Campbell,	Attorney for the district of Virginia, being for his compensation for attendance at Norfolk, eight days, in January last, in order to take depositions respecting the capture of a British vessel alleged to have been taken by a French privateer, - - - - -	$64 00
Feb. 18, 1795,	William Rawle, -	Attorney for the district of Pennsylvania, being the amount of compensation charged by him for sundry opinions and other services rendered to the Treasury Department from April, 1792, to May, 1794; and, also, for fees as attorney for the United States in various suits at law with individuals, - - - - - -	416 00
Feb. 20, 1795,	William Rawle, -	Being for his compensation and expenses attending the militia army against the insurgents, by order of the President,	608 83
March 4, 1796,	Alexander Campbell,	For his fees, as agreed with the Attorney General, for arguing the cause before the Supreme Court in February term, 1796, respecting the constitutionality of the act imposing duties on carriages, - - - - -	233 33
Nov. 10, 1796,	Richard Harrison, -	Attorney for the district of New York, for the fees and costs in a cause against Andrew Bostwick, and in two causes against the schooner La Vengeance, - - -	287 27
June 20, 1799,	David L. Barnes, -	Attorney for the district of Rhode Island, for his advice and extra services to the collectors of Newport and Providence in that State, - - - - -	50 00

STATEMENT C—Continued.

Date of payment.	To whom paid.	For what services.	Amount.
Feb. 17, 1803,	George Blake, -	Attorney for the district of Massachusetts, being the amount allowed him for extra services in defending, before the State court, a suit brought by Cabot and others against William Bingham, late agent of the United States at Martinique, - - - - -	$212 00
March 14, 1804,	Alexander J. Dallas,	Allowed him for his services as counsel to assist the Attorney General, on behalf of the United States, in the case respecting duties on sugar refined in the United States before the 30th of June, 1802, and not removed from the refineries previous to that day, - - -	300 00
March 19, 1805,	Alexander J. Dallas,	For his services as counsel on the part of the United States in the suit against the assignees of Peter Blight, -	500 00
Oct. 10, 1806,	Pierpont Edwards, -	Attorney for the district of Connecticut, for his fee as counsel in the cases of the United States *vs.* Samuel G. Ogden and William Smith, at a circuit court held for the district of New York, in April term, 1806, and at a special court held in said district on the 14th of July, 1806, -	500 00
May 14, 1808,	Walter Jones, jun. -	Attorney for the District of Columbia, for his services in the Supreme Court in the case of the United States against the schooner Betsey and Charlotte, William Yeaton claimant, - - - - -	200 00
Nov. 1, 1808,	Silas Lee, -	Attorney for the district of Maine, for thirty-six days' service, and expenses in assisting the collector of Passamaquoddy in the execution of the laws, &c., - -	450 00
Nov. 30, 1812,	Walter Jones, jun. -	For his services as judge advocate and recorder to the military court of inquiry convened at Fredericktown, from December, 1807, to 28th June, 1808, allowed by the Secretary of War, - - - -	800 00
Nov. 30, 1812,	Walter Jones, jun. -	For his services as judge advocate to a general court-martial at Fredericktown, for the trial of General Wilkinson, from 1st September to 28th December, 1811, allowed by the Secretary of War, - - -	2,000 00
January 1, 1813,	Alexander J. Dallas,	For his services as counsel for the United States in the case of the schooner Exchange, and ten other cases in the Supreme Court of the United States, February term, 1812, -	1,200 00
Dec. 8, 1815,	Alexander J. Dallas,	Being the amount of his account allowed by the Secretary of War for his professional services in the preparation of the specifications, in the arrangement of the evidence, and in all matters preparatory for General Hull's trial at Philadelphia in February, 1813, - - -	1,500 00
August 11, 1820,	Joseph McIlvaine, -	Attorney for the district of New Jersey, being for his legal services in an action of ejectment brought by Henry Gale against Major S. Babcock, for the recovery of the Pea Patch in the Delaware, - - -	206 28
August, 1821,	George Blake, -	Attorney for the district of Massachusetts, for payment made George Blake and Phineas Blair, for advice and attendance before the supreme court, in the county of Middlesex, on a writ of *habeas corpus* in the case of Sayre Canfield, a soldier claimed as a minor, October, 1816, -	20 00
August 13, 1821,	Chas. J. Ingersoll, -	Attorney for the district of Pennsylvania, for his professional services, rendered between the years 1815 and 1821, in the case of David Cook *vs.* Callender Irvine, as commissary general, - - - -	150 00

TREASURY DEPARTMENT, REGISTER'S OFFICE, *March* 20, 1822.

JOSEPH NOURSE, *Register*.

17th CONGRESS.] No. 525. [1st SESSION.

VACCINATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 13, 1822.

Mr. BURTON made the following report:

The committee appointed to inquire into the propriety of repealing the act of 1813 to encourage vaccination, and if, on inquiry, it shall seem proper to report a bill to that effect, have attentively and deliberately examined the subject, and submit the following report:

The recent unfortunate occurrences in the State of North Carolina having involved considerations of the utmost importance to society, and intimately connected with the dearest interests of humanity, your committee feel it to be due to the occasion to commence their remarks by a distinct and unequivocal declaration of their entire and unshaken confidence in the efficacy of the vaccine disease as a preventive of small-pox. In addition to the experience

of the most intelligent medical men in all parts of the world, the committee have the satisfaction to state that even the late unhappy accident in North Carolina has been attended by the consoling circumstance of another and a triumphant evidence of the virtues of vaccination.

The inquiry, therefore, appears to be very properly limited to the mere expediency of the existing law, which authorizes the appointment of an agent, from and to whom letters may be transmitted free of postage. While the committee would on no account offer a suggestion which could be construed to imply a doubt of the efficacy of vaccination, they conceive it may, nevertheless, be a question, whether the General Government can beneficially interpose for the furtherance of an object which seems in a peculiar manner to appertain to the municipal authorities in the several States, and which must, of necessity, be finally committed to the management and discretion of professional men possessing the confidence of the community. All our regulations for the preservation of the public health are questions of police, wisely committed to those who are immediately interested, and, therefore, most likely to adopt efficient measures for their own safety; and it is doubted whether Congress can, in any instance, devise a system which will not be more liable to abuses in its operations, and less subject to a prompt and salutary control, than such as may be adopted by the local authorities. The privilege of franking letters, conferred upon an individual for the purpose of enabling him to distribute the vaccine virus, and thereby to accumulate wealth, by levying contributions from all parts of the Union, affords an instance of monopoly as repugnant to the spirit of our political institutions as it is to the character of the medical profession, which, for public spirited and active benevolence, is too well established to require auxiliaries of this description in the performance of its duties. But another and more forcible objection presents itself. An establishment of this kind, under the authority of the General Government, naturally commands the attention of all portions of the country; and the numerous requisitions for the vaccine matter, from regions so extensive, must occasionally reduce any single agent to the necessity of either relinquishing the proffered fee, or of transmitting matter of doubtful character. Sub-agents must necessarily be employed to furnish a supply equal to the demand. Careless or incompetent assistants, guided more by cupidity than intelligence, may thus be instrumental in producing mischief, by the distribution of inert matter, or by the more fatal error of disseminating a pestilence instead of a prophylactic. That such unhappy mistakes may occur, is but too well attested by the recent events in North Carolina. The committee are therefore inclined to the belief, that any single agency for the whole Union must always be liable to similar objections, and from which they apprehend no institution, clothed with the character of a lucrative monopoly or privilege, can be entirely exempted. If, however, it should be deemed advisable for Congress to continue to aid in facilitating the distribution of vaccine matter, by the mode now in operation, the committee are of opinion that some of the evils to which they have adverted might be obviated by the appointment of two or more agents, judiciously located in our large cities in different quarters of the Union. But, after mature deliberation, they have come to the conclusion that it would be still better to commit the subject altogether to the local authorities, who, with the aid of professional men, will be more competent to the successful management of it, and to whom they believe it properly belongs. They therefore report the accompanying bill.

17th Congress.] No. 526. [1st Session.

ROADS AND CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 20, 1822.

Mr. Hemphill, from the Committee on Roads and Canals, reported:

That, after carefully examining the different resolutions and petitions submitted to them, they have thought it best to make a general report, embracing the several objects of reference.

The committee have already reported that they considered it expedient to have a certain section of the State of Maine explored, for the purpose of ascertaining, by survey, the proper route for a road, and whether it would be useful in a military point of view, from the Penobscot river, at or near Bangor, to some point in the eastern boundary of the State; and, also, in favor of a survey being made to ascertain whether it would be proper for the General Government to aid in the construction of a canal in the town of Gloucester, in Massachusetts, to connect the waters of Boston and Ipswich bay, in order to avoid the tedious and dangerous passage round Cape Ann.

The committee will bring the remaining cases referred to them into the view of the House.

The Legislature of the State of New York have passed the following resolution, which has been transmitted and referred:

"In Assembly, *April* 10, 1822.

"*Resolved*, (if the honorable the Senate concur herein,) That our Senators in Congress be instructed, and our Representatives requested, to call the attention of the National Government to the great importance and public utility of improving the navigation of the Hudson, so as to open a free communication and direct intercourse for vessels of all descriptions with the internal canal navigation of the State of New York."

The design of the resolution, as the committee understand, is, to remove sand-bars that exist in several places in the Hudson river, and impede its navigation by vessels over a certain size. To improve the navigation of the tide waters of this river would require an expense of about two hundred thousand dollars, and is believed to be practicable, either by the construction of piers and dams, in such places as may be proper to concentrate the current of the river, so as to give it, with the assistance of the engine called a mud turtle, where necessary, power sufficient to remove the bars, and to prevent future deposites; or avoiding them by a lateral canal, or a combination of both.

It appears to the committee to be an object, which, in an eminent degree, is deserving of the aid of the General Government, to perfect the navigation of this river, which exhibits the phenomenon of carrying its tide waters through a mountain, and is destined to communicate with such a range of lakes and fertile countries.

Resolutions of this House have been referred, instructing the committee to inquire whether it is expedient for the United States to give aid to the Delaware and Raritan Canal Company, and to the Chesapeake and Delaware Canal Company.

The advantages to be derived from these contemplated canals, as forming central links in the great line of inland navigation along the Atlantic coast, is apparent; they would afford a cheap transportation for merchandise and munitions of war, free from the dangers of storms and enemies: on this subject several committees have reported in favor of their great importance and public utility.

A resolution has been referred, instructing the committee to inquire into the expediency of appointing commissioners to examine and report as to the practicability and probable expense of connecting, by a canal, the Potomac and Youghiogeny rivers; and sundry petitions have been referred in pursuance of the same object, which state that these rivers approach each other within the short distance of two miles; and that springs and rivers which supply them are amply sufficient to furnish water on the summit level; and that the expense would be inconsiderable, compared with its great importance.

Petitions have also been referred, earnestly soliciting the attention of Congress to the navigation of the Potomac river. The petitions state that "this stream presents a direct communication from the seat of the General Government, and the tides of the ocean, to the gentle and unobstructed waters of the west: the portage across the Allegany mountain is about seventy miles, by the national road now completed. From Cumberland, on the Potomac, the commencement of this road, to the tides at the city of Washington, is the distance of one hundred and eighty-eight miles, by the river; and the total fall is seven hundred and fifteen feet, or near four feet in each mile; this fall, with the scanty supply of water in dry seasons, renders the natural channel impracticable for useful navigation; and, to remedy this defect, a canal and lock navigation must be resorted to for the whole distance. The expense to be incurred in completing this improvement, it can be easily ascertained, would not exceed two and a half millions of dollars, estimated at the ordinary cost of such works, where obstacles of equal or greater magnitude have been overcome."

The committee need not endeavor to enumerate the many and great advantages to be derived from a connexion of the river Potomac with the western waters; they will only observe, that the project becomes more elevated and interesting, when they consider the practicability of extending this inland navigation to the lakes; which, by means of the New York navigation and the proposed Atlantic canal, would form an island in the heart of the Union.

A memorial from the Legislature of the State of Alabama has been referred, praying aid of the General Government to connect some of their valuable streams. It states that the Alabama river commences, and becomes capable of a water transportation, within eight or eleven miles of a stream equally susceptible of being rendered navigable, and which empties into the Tennessee river; that the latter receives the tribute of several other streams, which take their rise and become navigable in the State of Virginia, passing through some of its most productive lands, and watering in their course the whole eastern section of the State of Tennessee; that the dividing ground separating these waters affords a favorable opportunity of connecting the waters of the Alabama with those of the Tennessee river; and that the distance required for the produce of Tennessee to reach a market on the seaboard would be reduced from nearly two thousand miles, to New Orleans, to six or seven hundred miles, to the Mobile.

The memorial likewise calls the attention of Congress to the communication of the Pensacola bay with that of Mobile.

On the important subject of the internal improvement of the country, the committee have adopted what they consider the only true plan, by reporting a bill to procure the necessary surveys, plans, and estimates, on the subject of roads and canals. This is a measure recommended by the able and valuable report of the Secretary of the Treasury of the 4th of April, 1808. The following are abtracts:

"As an important basis of the general system, an immediate authority might also be given to take the surveys and levels of the routes of the most important roads and canals which are contemplated; a work always useful, and by which the practicability and expense of the undertakings would be ascertained with much more correctness than in this report." "A moderate appropriation would be sufficient for those several objects."

The execution of this measure would present to Congress a full view of the subject, and enable them the better to decide on the propriety of engaging in these undertakings. It would lay the foundation of a well-digested and regular system, and it would not require any immediate demand on the treasury for a large amount. It is believed that fifteen or twenty thousand dollars would be sufficient; and the expenditure of this sum would be divided between three and four years, as it would consume that period to obtain the information.

For many reasons, the committee have supposed that the information could be more satisfactorily obtained by the corps of engineers than from any other source. They are a well-disciplined and organized body, and composed of the most capable of our scientific men; and it belongs peculiarly to the topographical corps to explore the country, and to give accurate knowledge of such parts as may be deemed necessary by actual surveys. In this manner, a similar corps has been employed in France, through which every necessary information, relating to the face of the country, is acquired, and deposited in what is called their military bureau.

The corps of engineers, with the assistance of two civil engineers, and the aid of others who can be detailed to do duty in that corps, are believed, by those best acquainted with the subject, to be sufficient. They proceed by a regular system, and report monthly. Young cadets, as they leave the Military Academy, can be employed. It will give them experience, and advance their usefulness to their country. It will render the science appertaining to the engineer department more perfect and extensive, and obviate the necessity of employing foreign engineers. There are farther inducements, as it respects economy: they are already in the employment of the Government, and can have no motive to delay the work. They can be actuated by no other than an honorable ambition to establish their own reputation, and to show that their institution is valuable to their country. It is the practice to allow them but $1 50 per diem beyond their usual compensation, which is merely to meet occasional expenses. The difference of expense in obtaining the information by the corps of engineers, or by commissioners and common surveyors, would be exceedingly great. The information, when obtained, would be valuable; for it cannot be otherwise than important to be acquainted with the capacities of the country for internal improvements. It would be useful to the States who have not the same economical means of acquiring it; and this part of the subject cannot be embarrassed by any constitutional question.

The commencement of internal improvements upon a large scale has generally been attended with difficulties, and improvidently delayed. The people of England, after having experienced their advantages, are astonished that such works had not been undertaken earlier. In the beginning of the reign of George III. the first charter to the Duke of Bridgewater was obtained, and his canal is said to yield £80,000 sterling per annum. The growth of canals became so rapid, that George III. lived to see a hundred completed during his reign; and it is a matter of surprise, now, that the Government suffered them to be carried on without a participation, which would have produced so much revenue.

In the authority from which the above is derived, it is stated that more than 2,400 miles of canalling have been completed, and that scarcely any district of country is more than fifteen miles from a water communication.

Nothing but the ardency of the most energetic minds could have overcome the opposing obstacles in the State of New York. By some, the project in the beginning was looked upon as romantic; they began without resources, relying upon the credit of the State, and, in the course of six years, will have completed 414 miles of canalling, which averages nearly a quarter of a mile for each working day, including the locks; the expense of the undertakings, it is now ascertained, will fall below the original estimates; the whole will not exceed five millions of dollars. The profits of these works, from what appears to be a reasonable calculation, will, in a few years, extinguish the expense of making the works, and afterwards leave an annual revenue to the State of more than a million of dollars. These works are of high importance to the nation; they show what can be done, and that a Government, with proper management, can execute great undertakings with despatch and economy: they have afforded, moreover, the most valuable experience in the science of engineering.

We must be convinced, from the example of other nations, that the natural advantages of this country will not remain unenjoyed forever; national improvements will at some time be prosecuted and perfected; but why should we be deprived of their eminent advantages by further delay?

It is said that the proper period has not arrived, and that we have neither resources nor constitutional power.

As to the time, we have opinions from different quarters that are entitled to our best respect.

In 1807 the attention of the Senate was directed to this subject, and it was in pursuance of a resolution of that body that the Secretary of the Treasury made his report. Able reports have been made in the Senate at different times, recommending some system of internal improvements.

In 1817 a bill passed both Houses of the Legislature on this subject, which was rejected by the President upon constitutional scruples.

The object of the bill was to set apart and pledge a fund for the construction of roads and canals, and improving the navigation of watercourses, in order to facilitate, promote, and give security to internal commerce among the several States, and to render more easy and less expensive the means and provisions necessary for the common defence. For this purpose the dividends from the shares belonging to Government in the Bank of the United States were to be pledged for twenty years during the charter, and the proportion of the moneys to be expended on the objects in each State was to be in the ratio of its representation in the most numerous branch of the National Legislature. Mr. Madison and the present Chief Magistrate both have recommended the subject of internal improvements to the attention of Congress, as an object of sufficient magnitude to produce a change in the constitution: neither suggested the idea that the subject was prematurely pressed upon the nation.

In 1818 the House of Representatives passed two resolutions, requiring the Secretary of the Treasury and Secretary of War to furnish information respecting internal improvements.

When we reflect on the influence to which such authorities are entitled, and see that the nation has increased to nearly ten millions, we think it ought to be admitted that the time has arrived when the national improvements ought to be commenced.

As to the resources, New York commenced her immense undertakings on the credit of the State; and it is believed that it would not, in a just comparison, be a greater undertaking for the Union to accomplish the most prominent objects of national improvements.

In relation to the resources, it ought to be considered how much the country would be benefited, and, in the casualty of a war, how much would be saved. Had the country been improved by roads and canals during the late war with England, a doubt can hardly be entertained that as much money would have been saved as would be sufficient to complete them. Similar events may occur again, and it would be wise to prepare for them; and especially so when the improvements, independent of this consideration, would be worth infinitely more to the country than the amount of their cost.

In the course of three or four years, which will be consumed in procuring the surveys and estimates under the proposed bill, our finances may be improved. But suppose no favorable change is produced, the improvements must be a work of time; and if it should be necessary to resort to loans, large sums would not be wanted at any one time; and if proper objects are selected in the beginning, a revenue will be coming in long before the whole is completed. A canal along the Atlantic coast, it is probable, would yield more than six per cent. immediately after its completion; the public expenditures would be spread over a period of perhaps twenty years; and if, during that time, the General Government, with the aid to be derived from incorporated companies, would expend twenty millions of dollars, the advantages to the country would be incalculable; and the revenue to be derived from the improvements, if it did not meet the interest of the capital expended, it cannot be expected that it would fall far short of it. In time, there can be no fear but that it would exceed the interest, and become a source of revenue to the Government.

Looking forward to the completion of the works, (say twenty years,) and supposing all the money to be borrowed, if we advert to the usual course of nature, we can perceive that the pension fund might be applied to the extinguishment of the debt. It would be passing the fund from an object of charity to one of permanent utility to the country.

We will suppose the last case, and the one which is most unfavorable. Suppose the debt, together with the improvements, go down to posterity; it would only create an obligation on those who would have the enjoyment of the improvements to pay the debt. There does not seem to be the same pressing obligation on us to pay off such a debt as in the case of most others.

If we are to wait until the public debt is paid off, the scheme of internal improvements may as well be abandoned at once. We have no good reason to expect a more favorable time to make a beginning.

As to the power, it is not customary in reports to enter into a minute discussion of constitutional points. The committee will not, therefore, take up the constitution to examine it. Enough, they think, has been done on the part of Government to preclude this question from further inquiry. Nothing can be more desirable to society than to arrive at a settled construction on the different parts of the constitution. Versatility on such questions would impair the character of the nation, and be detrimental to its interest. The committee will merely observe, that, in their opinion, Congress can possess no power except that which is derived through the constitution. Consent or contract cannot confer power; and, if Congress has no power to construct roads and canals, and maintain a control over them, it can have no power to purchase lands, or appropriate money for the purpose of making them; but it has been the constant practice to allow to the new States five per cent. of the nett proceeds arising from the sales of public lands, to be laid out in the construction of roads and canals. Three-fifths are generally to be expended within the States, and two-fifths are to be expended under the direction of Congress, in the making of roads leading to the States. From forty to fifty thousand dollars are annually expended in this manner.

In 1806 the President was authorized by Congress to open a road from Nashville, in the State of Tennessee, to Natchez. This road passes through a State, without asking consent. In 1809 the President was authorized to cause the canal of Carondelet, leading from Lake Pontchartrain, by way of the Bayou St. John, to the city of New Orleans, to be extended to the river Mississippi. The Cumberland road has cost $1,800,000, which exceeds the proceeds arising from the sales of public lands in that State more than $1,000,000. How is it possible to recon-

cile these acts with the idea that Congress possesses no power to construct roads and canals? If there should ever be a construction of the constitution dangerous to liberty, there will be an apology for repeated resistance; but when there has been a series of legislation in pursuance of a construction of the constitution which is calculated to promote the best interests of the country, it is not consistent with wisdom, or the peace and welfare of society, to disturb it.

In what age or nation has the power of improving a country been wilfully abused? Even the unsuccessful attempts at great undertakings have received the admiration of mankind. No power can be more safely placed in the hands of the representatives of the people; and it may be truly said, that, among the objects of a national character, which at intervals engage the patriotism and resources of a nation, none are more beneficial, and none so permanent, as the internal improvements of a country. While others, with the institutions that gave them birth, may be effaced even from remembrance by the flow of time, these will remain as lasting as the rivers they connect, to be enjoyed and admired as long as generations are permitted to exist.

The committee, upon the whole, do not deem it expedient to recommend the immediate prosecution of any work; they think that some well-digested system ought hereafter to be devised by Congress, which can be done with greater propriety when the surveys and estimates shall have been received, by virtue of the proposed bill already alluded to.

They therefore offer the following resolution:

Resolved, That it is inexpedient at present to authorize the expenditure of any money on any of the objects referred, except to carry into effect the bill reported, entitled "A bill to procure the necessary surveys, plans, and estimates on the subject of roads and canals."

17th CONGRESS.] No. 527. [1st SESSION.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 29, 1822.

Mr. SERGEANT, from the Committee on the Judiciary, to whom was referred the petition of Anthony Dey and James Macdonald, and the petition or remonstrance of David Melville, and also a report of the Committee on Agriculture, on the first-mentioned petition, reported:

That Messrs. Dey and Macdonald allege that the said Macdonald is the inventor of a new and useful machine for breaking and cleaning hemp and flax, of great public importance; which invention was prosecuted and perfected at the expense of the said Dey, who has on that account been permitted to have an interest therein. It is understood and believed, though not stated in the petition, that for this invention they have obtained a patent. On the ground chiefly of the great merit of the invention, and of a discovery by the said Dey of a process for bleaching hemp or flax, after being dressed in the said machine, (supposed also to have been patented,) they ask for an extension of the exclusive right, and for such protection in relation thereto as Congress may think just and proper. The petition does not state particularly what they wish, but the committee have understood from Mr. Dey that they desire to have the right to extend their exclusive privilege, on certain terms, beyond the period allowed by the existing law, and also to be enabled, in every case of infringement, to recover a large pecuniary penalty, instead of the damages heretofore given. They further ask for certain alterations in the general patent law, in order to render it more efficacious in favor of patentees, and they especially ask for a change in respect to costs.

The petitioner, David Melville, claims to be the prior inventor of a machine for breaking and dressing hemp and flax, which he has gradually improved at a great expense, until, as he asserts, his machine is entitled to a preference to any other ever offered to the public patronage. And he insists that the machine offered by Messrs. Dey and Macdonald embraces the principle, in part, of his invention; for proof of which he refers to the model in the Patent Office. He therefore remonstrates against the grant of any peculiar privileges to Dey and Macdonald.

Without entering at all into the consideration of the merits of the machines exhibited by Dey and Macdonald, which have been so favorably noticed by the Committee on Agriculture, they think it quite plain that, where there is a conflict of claims to the invention, Congress ought not to interfere between the contending claimants, but leave them to the proper judicial tribunals to adjust their respective pretensions. It would be obviously wrong to grant any privileges to one which are not at the same time granted to the other. It is needless, therefore, to inquire whether, under other circumstances, it might be fit and expedient to comply with such a request as that of Dey and Macdonald. The committee are not disposed to deny that cases may occur, where, from the magnitude of the invention, and other considerations of an extraordinary nature, it might be proper to grant extraordinary encouragement; but they suppose it to be an indispensable ground for the grant, that the invention should either be uncontested, or proved to be incontestable by a judicial decision.

As to the general patent law, the committee are well aware that patentees complain of it as inefficacious, and have been desirous of further and more powerful provisions in their favor. If the rights and interests of patentees were alone in question, and there could be but one patent for one invention, there would be little difficulty in affording adequate security; and it is believed that the error of the patentees (certainly a very natural one) is, that, strongly impressed with a sense of the justice of their own pretensions, they do not sufficiently estimate the rights and interests of the rest of the community, nor perhaps even the considerations which belong to conflicting claims of inventors. It is the duty of Congress, in legislating on the subject, to conciliate, if possible, all these views. In this spirit, the existing laws have been framed; and if, in some cases, they do not fully do justice to the patentees, it is also true that they sometimes give them advantages, to the prejudice of other citizens. These are evils incident to every general law. As far as is practicable, they ought to be remedied; but, where the remedy would introduce still greater evils, it is equally obvious that it ought not to be applied.

The committee do not perceive that any beneficial alteration can be made in the present law. They, therefore, offer the following resolution:

Resolved, That the petitioners have leave to withdraw their petitions.

17th Congress.] No. 528. [1st Session.

JONATHAN RUSSELL'S ACCOUNT OF CERTAIN PROCEEDINGS OF A MAJORITY OF THE AMERICAN MINISTERS WHO NEGOTIATED THE TREATY OF PEACE WITH GREAT BRITAIN AT GHENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 4 AND 8, 1822.

To the House of Representatives of the United States: WASHINGTON, *May* 4, 1822.

In compliance with a resolution of the House of Representatives of the 19th of April, requesting the President "to cause to be communicated to the House (if not injurious to the public interest) any letter which may have been received from Jonathan Russell, one of the ministers who concluded the treaty of Ghent, in conformity with the indications contained in his letter of 25th of December, 1814," I have to state that, having referred the resolution to the Secretary of State, and it appearing by a report from him that no such document had been deposited among the archives of the Department, I examined and found among my private papers a letter of that description, marked "private" by himself. I transmit a copy of the report of the Secretary of State, by which it appears that Mr. Russell, on being apprized that the document referred to by the resolution had not been deposited in the Department of State, delivered there a paper "purporting to be the duplicate of a letter written by him from Paris, on the 11th of February, 1815, to the then Secretary of State, to be communicated to the House, as the letter called for by their resolution."

On the perusal of the document called for, I find that it communicates a difference of opinion between Mr. Russell and a majority of his colleagues, in certain transactions which occurred in the negotiations at Ghent, touching interests which have been since satisfactorily adjusted by treaty between the United States and Great Britain. The view which Mr. Russell presents of his own conduct, and that of his colleagues, in those transactions, will, it is presumed, call from the two surviving members of that mission, who differed from him, a reply, containing their view of those transactions, and of the conduct of the parties in them, and who, should his letter be communicated to the House of Representatives, will also claim that their reply should be communicated in like manner by the Executive—a claim which, on the principle of equal justice, could not be resisted. The Secretary of State, one of the ministers referred to, has already expressed a desire that Mr. Russell's letter should be communicated, and that I would transmit at the same time a communication from him respecting it.

On full consideration of the subject, I have thought it would be improper for the Executive to communicate the letter called for, unless the House, on a knowledge of these circumstances, should desire it; in which case, the document called for shall be communicated, accompanied by a report from the Secretary of State, as above suggested. I have directed a copy to be delivered to Mr. Russell, to be disposed of as he may think proper, and have caused the original to be deposited in the Department of State, with instructions to deliver a copy to any person who may be interested.

JAMES MONROE.

DEPARTMENT OF STATE, WASHINGTON, *May* 3, 1822.

The Secretary of State, to whom was referred the resolution of the House of Representatives of the 19th ultimo, requesting the President "to cause to be communicated to the House (if not injurious to the public good) any letter or communication which may have been received from Jonathan Russell, esquire, one of the ministers of the United States who concluded the treaty of Ghent, after the signature of that treaty, and which was written in conformity to the indications contained in said minister's letter, dated at Ghent, 25th of December, 1814," has the honor of reporting to the President: That, until after the adoption of the said resolution by the House, there was upon the files of the Department of State no letter from Mr. Russell, of the description mentioned therein; but that Mr. Russell himself has since delivered at the Department a communication purporting to be the duplicate of a letter written by him from Paris, on the 11th of February, 1815, to the then Secretary of State, to be communicated to the House, as the letter called for by their resolution.

A copy of this paper is herewith submitted to the President.

JOHN QUINCY ADAMS.

To the House of Representatives: WASHINGTON, *May* 7, 1822.

In compliance with the resolution of the House of Representatives of the 7th of May, requesting the President of the United States "to communicate to that House the letter of Jonathan Russell, Esq., referred to in his message of the 4th instant, together with such communications as he may have received, relative thereto, from any of the other ministers of the United States who negotiated the treaty of Ghent," I herewith transmit a report from the Secretary of State, with the documents called for by that resolution.

JAMES MONROE.

DEPARTMENT OF STATE, WASHINGTON, *May* 7, 1822.

The Secretary of State has the honor of transmitting to the President of the United States his remarks upon the paper deposited at the Department of State on the 22d of last month, by Jonathan Russell, late one of the plenipotentiaries of the United States, at the negotiation of Ghent, to be communicated to the House of Representatives, as the letter called for by their resolution of the 19th of that month; and the Secretary of State respectfully requests that the President would transmit to the House of Representatives these remarks, together with the above-mentioned communication of Mr. Russell, on the renewal of the call therefor by the House.

JOHN QUINCY ADAMS.

Mr. Russell to the Secretary of State.

[PRIVATE.]

SIR: PARIS, *February* 11, 1815.

In conformity with the intimation contained in my letter of the 25th of December, I now have the honor to state to you the reasons which induced me to differ from a majority of my colleagues on the expediency of offering an article confirming the British right to the navigation of the Mississippi, and the right of the American people to take and cure fish in certain places within the British jurisdiction.

The proposition of such an article appeared to be inconsistent with our reasoning to prove its absolute inutility. According to this reasoning, no new stipulation was any more necessary, on the subject of such an article, than a new stipulation for the recognition of the sovereignty and independence of the United States.

The article proposed appeared also to be inconsistent with our instructions, as interpreted by us, which forbade us to suffer our right to the fisheries to be brought into discussion; for, it could not be believed that we were left free to stipulate on a subject which we were restrained from discussing, and that an argument, and not an agreement, was to be avoided. If our construction was indeed correct, it might not, perhaps, be difficult to show that we have not, in fact, completely refrained from the interdicted discussion.

At any rate, the proposal of the article in question was objectionable, inasmuch as it was incompatible with the principles asserted by a majority of the mission, and with the construction which this majority had adopted on that part of our instructions which related to the fisheries. If the majority were correct in these principles, and in this construction, it became us to act accordingly; if they were not correct, still it was unnecessary to add inconsistency to error.

I freely confess, however, that I did not accord with the majority, either in their view of the treaty of 1783, whence they derived their principles, or of our instructions; and that my great objection to proposing the article did not arise from an anxiety to reconcile our conduct with our reasoning and declarations.

I could not believe that the independence of the United States was derived from the treaty of 1783; that the recognition of that independence by Great Britain gave to this treaty any peculiar character; or that such character, supposing it existed, would necessarily render this treaty absolutely inseparable in its provisions, and make it one entire and indivisible whole, equally imperishable in all its parts, by any change which might occur in the relations between the contracting parties.

The independence of the United States rests upon those fundamental principles set forth and acted on by the American Congress, in the declaration of July, 1776, and not on any British grant in the treaty of 1783; and its era is dated accordingly.

The treaty of 1783 was merely a treaty of peace, and therefore subject to the same rules of construction as all other compacts of this nature. The recognition of the independence of the United States could not well have given to it a peculiar character, and excepted it from the operation of these rules. Such a recognition, expressed or implied, is always indispensable on the part of every nation with whom we form any treaty whatsoever. France, in the treaty of alliance, long before the year 1783, not only expressly recognised, but engaged effectually to maintain this independence; and yet this treaty, so far from being considered as possessing any mysterious peculiarity by which its existence was perpetuated, has, even without war, and although part of it contained words of perpetuity, and was unexecuted, long since entirely terminated.

Had the recognition of our independence by Great Britain given to the treaty of 1783 any peculiar character, (which it did not,) still that character could have properly extended to those provisions only which affected that independence. All those general rights, for instance, of jurisdiction, which appertained to the United States, in their quality as a nation, might, so far as that treaty was declaratory of them, have been embraced by such peculiarity, without necessarily extending its influence to mere special commercial liberties and privileges, or to provisions long since executed, not indispensably connected with national sovereignty, or necessarily resulting from it.

The liberty to take and cure fish within the exclusive jurisdiction of Great Britain was certainly not necessary to perfect the jurisdiction of the United States; and there is no reason to believe that such a liberty was intended to be raised to an equality with the general right of fishing within the common jurisdiction of all nations, which accrued to us as a member of the great national family. On the contrary, the distinction between the special liberty and the general right appears to have been well understood by the American ministers who negotiated the treaty of 1783, and to have been clearly marked by the very import of the terms which they employed. It would evidently have been unwise in them, however ingenious it may be in us, to exalt such a privilege to the rank of a sovereign right, and thereby to have assumed the unnecessary and inconvenient obligation of considering such a liberty to be an indispensable condition of our national existence, and thus rendering that existence as precarious as the liberty itself. They could not have considered a privilege which they expressly made to depend, to a very considerable extent, for its continuance, on events and private interests, as partaking of the character and entitled to the duration of the inherent properties of sovereignty. The settlement of the shores might at any time have been effected by the policy of the British Government, and would have made the assent of British subjects, under the influence of that policy, necessary to the continuance of a very considerable portion of that liberty. They could not have meant thus to place within the control of a foreign Government and its subjects an integral part, as we now affect to consider this privilege, of our national rights.

It is from this view of the subject that I have been constrained to believe that there was nothing in the treaty of 1783 which could essentially distinguish it from ordinary treaties, or rescue it, on account of any peculiarity of character, from the *jura belli*, or from the operation of those events on which the continuation or termination of such treaties depends. I was, in like manner, compelled to believe, if any such peculiarity belonged to those provisions in that treaty, which had an immediate connexion with our independence, that it did not necessarily affect the nature of the whole treaty, or attach to a privilege which had no analogy to such provisions, or any relation to that independence.

I know not, indeed, any treaty, or any article of a treaty, whatever may have been the subject to which it related, or the terms in which it was expressed, that has survived a war between the parties, without being specially renewed, by reference or recital, in the succeeding treaty of peace. I cannot, indeed, conceive of the possibility of such a treaty or such an article; for, however clear and strong the stipulations for perpetuity might be, these stipulations themselves would follow the fate of ordinary unexecuted engagements, and require, after a war, the declared assent of the parties for their revival.

We appear, in fact, not to have had an unqualified confidence in our construction of the treaty of 1783, or to have been willing to rest exclusively on its peculiar character our title to any of the rights mentioned in it, and much less our title to the fishing liberty in question. If hostilities could not affect that treaty, or abrogate its provisions, why did we permit the boundaries assigned by it to be brought into discussion, or stipulate for a restitution

of all places taken from us during the present war? If such restitution was secured by the mere operation of the treaty of 1783, why did we discover any solicitude for the *status ante bellum*, and not resist the principle of *uti possidetis* on that ground?

With regard to the fishing privilege, we distinctly stated to you in our letter of the 21st of December, that, "at the time of the treaty of 1783, it was no new grant, we having always before that time enjoyed it," and thus endeavored to derive our title to it from prescription. A title derived from immemorial usage, antecedent to 1783, could not well owe its origin or its validity to a compact concluded at that time; and we could, therefore, in this view of the subject, correctly say that this privilege was no new grant; that is, that our right to the exercise of it was totally independent of such compact. If we were well founded, however, in the assertion of our prescriptive title, it was quite unnecessary to attempt to give a kind of charmed existence to the treaty of 1783, and to extend its undefinable influence to every article of which it was composed, merely to preserve that title which we declared to be in no way derived from it, and which had existed, and of course could exist, without it.

It was rather unfortunate, too, for our argument against a severance of the provisions of that treaty, that we should have discovered ourselves a radical difference between them; making the fishing privilege depend on immemorial usage, and, of course, distinct in its nature and origin from the rights resulting from our independence.

We indeed throw some obscurity over this subject when we declare to you that this privilege was always enjoyed by us before the treaty of 1783, thence inferring that it was not granted by that treaty; and in the same sentence, and from the same fact, appear also to infer that it was not to be forfeited by war any more than any other of the rights of our independence; making it thus one of these rights, and, of course, according to our doctrine, dependant on that treaty. There might have been nothing incomprehensible in this mode of reasoning had the treaty recognised this privilege to be derived from prescription, and confirmed it on that ground. The treaty has, however, not the slightest allusion to the past, in reference to this privilege, but regards it only with a view to the future. The treaty, therefore, cannot be construed as supporting a pre-existing title, but as containing a grant entirely new. If we claim, therefore, under the treaty, we must renounce prescription; and if we claim from prescription, we can derive no aid from the treaty. If the treaty be imperishable in all its parts, the fishing privilege remains unimpaired without a recurrence to immemorial usage; and if our title to it be well founded on immemorial usage, the treaty may perish without affecting it. To have endeavored to support it on both grounds, implies that we had not entire confidence in either; and to have proposed a new article, indicates a distrust of both.

It is not, as I conceive, difficult to show that we cannot, indeed, derive a better title to this fishing privilege from prescription than from any indestructible quality of the treaty of 1783.

Prescription appears to me to be inapplicable to the parties and to the subject, and to be defective both in fact and effect. As to the parties: the immemorial enjoyment of a privilege within British jurisdiction, by British subjects, the inhabitants of British colonies, could not well be considered as evidence of a title to that privilege claimed by the citizens of an independent republic, residing within the exclusive jurisdiction of that republic. The people of the United States, as such, could have claimed no special privilege within the dominions of any foreign Power from immemorial usage, in 1783, when the longest duration of their own existence in that quality was little more, at the utmost, than the brief period of seven years, which is surely not beyond the memory of man, *(ultra memoriam hominis.)* The people of the United States had never, in fact, during that period, enjoyed the fishing privilege a moment; being effectually prevented therefrom by the existing state of hostilities. Nor could the inhabitants of the colonies originally constituting the United States, even in their colonial condition, acquire against their sovereign any right from long usage or mere lapse of time, *(nullum tempus regi occurrit.)* The British sovereign was always competent to regulate and restrain his colonies in their commerce and intercourse with each other, whenever and however he might think proper; and had he forbidden his subjects in the province of Massachusetts Bay to fish, and dry and cure fish, in the bays, harbors, and creeks of Labrador, (which, by the way, had not immemorially belonged to him,) it is not to be imagined that they would have conceived themselves discharged from the obligation of submitting, on account of any pretended right from immemorial usage. The fishing privilege, therefore, enjoyed by British subjects within British jurisdiction, could give no permanent and independent right to those subjects themselves, and, *à fortiori*, no such right to the citizens of the United States, claiming under a different estate and in a different capacity. Great Britain might, indeed, as well prescribe for the prerogatives of her sovereignty over us, as we for any of the privileges which we enjoyed as her subjects.

I do not think it necessary to inquire how far the practice of the people of Massachusetts was the practice of the whole original thirteen United States, or of the United States now, including Louisiana; or how far the immemorial usage of the people of Boston can establish a prescriptive right in the people of New Orleans. I trust I have said enough to show that prescription is inapplicable to the parties. It is also, I conceive, inapplicable to the subject.

Had the United States, as an independent nation, enjoyed from time immemorial the fishing privilege in question, still, from the nature of this privilege, no prescriptive right could have thence been established. A right to fish or to trade, or to do any other act or thing within the exclusive jurisdiction of a foreign state, is a simple power, a right of mere ability, *(jus meræ facultatis,)* depending on the will of such state, and is consequently imprescriptible. An independent title can be derived only from treaty.

I conceive, therefore, that our claim to the fishing privilege from immemorial usage is not only unsupported by the fact, but cannot, in effect, result from such usage.

I have, from this view of the subject, been led to conclude that the treaty of 1783, in relation to the fishing liberty, is abrogated by the war; that this liberty is totally destitute of support from prescription; and that we are consequently left without any title to it whatsoever; for I cannot prevail upon myself to seek for such a title in the relative situation of the parties at the time of negotiating the treaty of 1783, and contend, according to the insinuation contained in our letter to you of the 21st of December, that the jurisdiction of Great Britain over the colonies, assigned to her in America, was a grant from the United States; and that the United States, in making this grant, reserved to themselves the privilege in question. Such a pretension, however lofty, is so inconsistent with the circumstances of the case, and with any sober construction which can be given to that treaty, that I shall, I trust, be excused from seriously examining its validity.

Having thus stated some of the reasons which induced me to differ in opinion from a majority of my colleagues, relative to the character of the treaty of 1783, as well as with regard to every other foundation on which they were disposed to rest our title to the fishing privilege, I shall now proceed to explain the causes which influenced me to dissent from them in the interpretation of our instructions. These instructions forbade us to permit our rights to the trade beyond the Cape of Good Hope, to the fisheries, and to Louisiana, to be brought into discussion. I conceived that this prohibition extended to the general rights only, which affected our sovereignty, and resulted from it, and not to mere special liberties and privileges which had no relation to that sovereignty, either as to its nature or extent.

The right relating to the trade beyond the Cape of Good Hope was the right which belonged to us as an independent nation, in common with all other independent nations, and not the permission of trading to those parts of

the East Indies which were within the exclusive jurisdiction of Great Britain. In like manner, the right to the fisheries, contemplated by our instructions, was, I conceived, the right common to all nations to use the open sea for fishing as well as for navigation, and not to the liberty to fish and cure fish within the territorial limits of any foreign state. The right to Louisiana, which was not to be brought into discussion, was the right to the empire and domain of that region, and not to the right of excluding Great Britain from the navigation of the Mississippi.

How far we conformed to this instruction, with regard to the general right to Louisiana, it is not necessary for me here to inquire; but certainly the majority believed themselves permitted to offer a very explicit proposition with regard to the navigation of its principal river. I believed, with them, that we were so permitted, and that we were likewise permitted to offer a proposition relative to the fishing liberty, and, had the occasion required it, to make proposals concerning the trade to the British East Indies. I was persuaded that treating relative to these privileges, or discussing the obligation or expediency of granting or withholding them, respectively, violated in no way our instructions, or affected the general rights which we were forbidden to bring into discussion. Considering, therefore, the fishing liberty to be entirely at an end without a new stipulation for its revival, and believing that we were entirely free to discuss the terms and conditions of such a stipulation, I did not object to the article proposed by us because any article on the subject was unnecessary or contrary to our instructions; but I objected specially to that article because, by conceding in it the free navigation of the Mississippi, we offered, in my estimation, for the fishing privilege, a price much above its value.

In no view of the subject could I discover any analogy between the two objects; and the only reason for connecting them, and making them mutual equivalents for each other, appeared to be because they were both found in the treaty of 1783.

If that treaty was abrogated by the war, (as I consider it to have been,) any connexion between its parts must have ceased, and the liberty of navigating the Mississippi by British subjects must, at least, be completely at an end; for it will not, I trust, be attempted to continue it by a prescriptive title, or to consider it as a reservation made by the United States from any grant of sovereignty which, at the treaty of peace, they accorded to Great Britain. If, indeed, it was such a reservation, it must have been intended for our benefit, and, of course, could be no equivalent for the fishing privilege. If it is considered as a reservation made by Great Britain, it will reverse the facts assumed by us in relation to that privilege.

The third article of the treaty of 1783, respecting the fisheries, and the eighth article of that treaty, respecting the Mississippi, had not the slightest reference to each other, and were placed as remote the one from the other as the limits of that treaty could well admit. Whatever, therefore, was the cause of inserting the fishing liberty, whether it was a voluntary and gratuitous grant on the part of Great Britain, or extorted from her as a condition on which the peace depended, it could have had no relation to the free navigation of the Mississippi. Besides, the article relative to this river must, from the evident views of the parties at the time, from their supposed relations to each other, and from their known relations to a third Power, as to this river, have been considered of mutual and equal advantage, and furnished no subject for compensation or adjustment in any other provision of that treaty. Both parties believed that this river touched the territories of both, and that, of course, both had a right to its navigation. As Spain possessed both banks of this river, to a considerable distance from its mouth, and one of its banks nearly throughout its whole extent, both parties had an interest in uniting to prevent that Power from obstructing its navigation. Had not the article been intended to engage the parties in relation to Spain, they would, probably, have limited it to the navigation of the river as far as their own territories extended on it, and not have stipulated for this navigation to the ocean, which necessarily carried it through the exclusive territories of Spain.

If the circumstances had been, in fact, such as the parties at the time believed them to be, and with a view to which they acted; or had these circumstances subsequently experienced no radical change, Great Britain would have gained now no more than she would have granted by the revival of the article in relation to the Mississippi, and would not, any more than in 1783, have acknowledged any equivalent to be conferred by it for our liberty relative to the fisheries. The circumstances, however, assumed by the parties at the time, in relation to Great Britain, and from which her rights were deduced, have not only in part been discovered not to have existed, but those which did exist have been entirely changed by subsequent events. It has been ascertained that the territories assigned to Great Britain no where, in fact, reached the Mississippi; and the acquisition of Louisiana by the United States has forever removed the Spanish jurisdiction from that river. The whole consideration, therefore, on the part of Great Britain, whether derived from her territorial rights, or from her part of the reciprocal obligations relative to Spain, having entirely failed, our engagements entered into on account of that consideration may be fairly construed to have terminated with it.

In this view of the subject, Great Britain could have had no title to the navigation of the Mississippi, even if a war had not taken place between the parties. To renew, therefore, the claims of Great Britain under that article, subject to this construction, would be granting her nothing; and to renew that article independent of this construction, and without any reference to the circumstances that attended its origin, in 1783, or to the events which have since occurred in relation to it, would be granting her advantages not only entirely unilateral, as it relates to the article itself, but, as I believe, of much greater importance than any which we could derive from the liberty relative to the fisheries.

If the article which we offered merely intended to rescue the third and eighth articles of the treaty of 1783 from the operation of the present war, and to continue them precisely as they were immediately prior to this war, (the third article being then in full force, and the eighth article being no longer obligatory,) we should have attempted to exchange, like General Drummond, the dead for the living.

It is not surprising, therefore, that the British Government should, in suspecting such an intention, have rejected our proposition. I was opposed, however, to making the proposition, not only because I was convinced that it was offered with no such intention, but because I believed it would give to Great Britain the free navigation of the Mississippi, under circumstances, and evidently for an object, which would place it on very distinct grounds from those on which it was placed by the treaty of 1783.

The whole of the Mississippi being now exclusively within the acknowledged jurisdiction of the United States, a simple renewal of the British right to navigate it would place that right beyond the reach of the war, and of every other previous circumstance which might have impaired or terminated it; and the power to grant on our part being now complete, the right to enjoy on hers, under our grant, must be complete also.

It would be absurd to suppose that any thing impossible was intended, and that Great Britain was to be allowed to navigate the Mississippi precisely as she could have navigated it immediately after the treaty of 1783; as if her territories extended to it; and as if Spain was in entire possession of one of its banks and of a considerable portion of the other. The revival of the British right to navigate the Mississippi would be, under existing circumstances, a new and complete grant to her, measured by these circumstances, and thence embracing not only the entire freedom of the whole extent of that river, but the unrestrained access to it across our territories. If we did not intend this, we intended nothing which Great Britain could accept; and whatever else might have been intended, if not at

once rejected by her, would hereafter have been the subject of new and endless controversy. When, however, we connected the revival of the navigation of the Mississippi with the revival of the liberty of taking and curing fish within the British jurisdiction, (two things which never before had any relation to each other,) we evidently meant, if we acted in good faith, not only to concede as well as to obtain something, but also to be understood as conceding an equivalent for what we obtained. In thus offering the navigation of the Mississippi, and the access to it through our territories, as an equivalent for the fishing liberty, we not only placed both on ground entirely different from that in which they respectively stood in the treaty of 1783, and acted somewhat inconsistently with our own reasoning relative to the origin and immortality of the latter; but we offered to concede much more than we could hope to gain by the arrangement, with whatever view its comparative effects might be estimated.

From the year 1783 to the commencement of the present war, the actual advantages derived from the fishing privilege by the people of the United States were, according to the best information that I can obtain on the subject, very inconsiderable, and annually experiencing a voluntary diminution.

It was discovered that the obscurity and humidity of the atmosphere, owing to almost incessant fogs in the high northern latitudes, where this privilege was chiefly located, prevented the effectual curing of fish in those regions, and, consequently, lessened very much the value of the liberty of taking them there. By far the greatest part of the fish taken by our fishermen before the present war was caught in the open sea or upon our own coasts, and cured upon our own shores. This branch of the fisheries has been found to be inexhaustible, and has been pursued with so much more certainty and despatch than the privileged portion within the British jurisdiction, that it has not only been generally preferred by our fishermen, but would probably, on longer experience, have been almost universally used by them. It was to be believed, therefore, that a discontinuance of the privilege of taking and curing fish within the British jurisdiction would not at all diminish the aggregate quantity taken by the people of the United States, or very materially vary the details of the business. That part of the fisheries which would still have belonged to us as a nation (being exhaustless) would afford an ample field for all the capital and industry hitherto employed in the general business of fishing, or merchandise of fish; and on that field might the few fishermen who had hitherto used the liberty of taking and curing fish within the jurisdiction of Great Britain exert their skill and labor without any serious inconvenience. This liberty, liable, in a very considerable degree, by the terms in which it was granted, to be curtailed by the Government and subjects of a foreign state; already growing into voluntary disuse by our own citizens, on account of the difficulties inseparable from it; and absolutely incapable of extension, was totally unnecessary to us for subsistence or occupation, and afforded in no way any commercial facility or political advantage. This privilege, too, while it was thus of little or no utility to us, cost Great Britain literally nothing.

The free navigation of the Mississippi, with the necessary access to it, is a grant of a very different character. If it was not heretofore used by Great Britain, it was, perhaps, because she did not consider herself entitled to it, or because the circumstances of the moment suspended its practical utility. The treaty of 1783 stipulated for her the navigation of this river, under the presumption that her territories extended to it; and, of course, could not intend to give her an access to it through our territories. The British possessions to the westward of Lake Erie being almost entirely unsettled, rendered, perhaps, the free navigation of the Mississippi, for the moment, of little advantage to her, particularly as her right to reach it was at least equivocal, and as, by another treaty, she could carry on trade with our Indians.

This navigation might, indeed, for a long time to come, be of little use to her for all the legitimate purposes of transit and intercourse; but every change that could take place in this respect must increase its importance to her; while every change in the fishing liberty would be to the disadvantage of the United States.

The freedom of the Mississippi, however, is not to be estimated by the mere legitimate uses that would be made of it. The unrestrained and undefined access which would have been inferred from the article which we proposed, would have placed in the hands of Great Britain and her subjects all the facilities of communication with our own citizens, and with the Indians inhabiting the immense regions of our western territory. It is not in the nature of things that these facilities should not have been abused for unrighteous purposes. A vast field for contraband and intrigue would have been laid open, and our western territories would have been swarmed with British smugglers and British emissaries. The revenue would have been defrauded by the illicit introduction of English merchandise; and the lives of our citizens, and the security of a valuable portion of our country, exposed to Indian hostilities, excited by an uncontrolled British influence. If our instructions to guard against such an influence forbade us to renew the British liberty to trade with our Indians, we certainly violated the spirit of those instructions in offering the means of exercising that influence with still greater facility and effect than could result from that liberty.

What was there in the fishing liberty, either of gain to us, or loss to Great Britain, to warrant, in consideration of it, a grant to her of such means of fraud and annoyance? What justice or equality was there in exposing to all the horrors of savage warfare the unoffending citizens of an immense tract of territory, not at all benefited by the fishing privilege, merely to provide for the doubtful accommodation of a few fishermen, in a remote quarter, entirely exempt from the danger?

Such have been the reasons which induced me to differ from a majority of my colleagues with regard to the article in question, and which, I trust, will be thought sufficient at least to vindicate my motives.

The unfeigned respect which I feel for the integrity, talents, and judgment of those gentlemen would restrain me from opposing them on slight grounds; and a deference for their opinions makes me almost fear that I have erred in dissenting from them on the present occasion. I can but rejoice, however, that the article as proposed by us was rejected by Great Britain, whatever were her reasons for rejecting it: whether, as above suggested, she suspected some tacit reservation, or want of faith on our part; or supposed, from the price we at once bade for the fishing privilege, that we overrated its value, and might concede for it even more than the navigation of the Mississippi, with all its accessory advantages.

We are still at liberty to negotiate for that privilege in a treaty of commerce, should it be found expedient, and to offer for it an equivalent fair in its comparative value, and just in its relative effects. In any other way, I trust, we shall not consent to purchase its renewal.

I have the honor to be, with profound respect, sir, your faithful and obedient servant,

JONATHAN RUSSELL.

My argument to demonstrate the abrogation of the treaty of 1783 by the present war, and the consequent discontinuance of the fishing privilege, will, I trust, not be ascribed to any hostility to those who were interested in that privilege. I have been always ready, and am still ready, to make every sacrifice for the preservation of that privilege which its nature and utility can justify; but I have conscientiously believed that the free navigation of the Mississippi was pregnant with too much mischief to be offered indirectly, under our construction of the treaty, or directly, as a new equivalent for the liberty of taking and curing fish within the British jurisdiction.

We had three other ways of proceeding:

First. To contend for the indestructibility of the treaty of 1783; thence inferring the continuance of the fishing privilege, without saying any thing about the navigation of the Mississippi, which would have reserved our right of contesting this navigation on the grounds I have mentioned as specially applicable to it.

Secondly. To have considered the treaty at an end, and to have offered a reasonable equivalent (wherever it might be found) for the fishing privilege.

Thirdly. To have made this liberty a *sine quâ non* of peace, as embraced by the principle of *status ante bellum*.

To either of these propositions I would have assented; but I could not consent to grant or revive the British right to the navigation of the Mississippi in order to procure or preserve the fishing liberty.

[DUPLICATE.]

SIR: PARIS, *February* 11, 1815.

In conformity with the intimation contained in my letter of the 25th December, I have now the honor to state to you the reasons which induced me to differ from a majority of my colleagues on the expediency of offering an article confirming the British right to the navigation of the Mississippi, and the right of the American people to take and cure fish in certain places within the British jurisdiction.

The proposal of such an article appeared to be inconsistent with our reasoning to prove its absolute inutility.

According to this reasoning, no new stipulation was any more necessary, on the subject of such an article, than a new stipulation for the recognition of the sovereignty and independence of the United States.

The article proposed appeared, also, to be inconsistent with our instructions, as *interpreted* by *us*, which forbade us to suffer *our right to the fisheries* to be brought into discussion; for, it could not be believed that we were left free to *stipulate* on a subject which we were restrained from *discussing*, and that *an argument*, and not an *agreement*, was to be avoided.

If our construction was, indeed, correct, it might not, perhaps, be difficult to show that we have not, in fact, completely refrained from the interdicted discussion.

At any rate, the proposal of the article in question was objectionable, inasmuch as it was incompatible with the principles asserted by a majority of the mission, and with the construction which that majority had adopted on that part of our instructions which related to the fisheries. If the majority were correct in these principles and in this construction, it became us to act accordingly; if they were incorrect, still it was unnecessary to add inconsistency to error.

I freely confess, however, that I did not accord with the majority, either in their views of the treaty of 1783, whence they derive their principles, nor of our instructions; and that my great objection to proposing the article did not arise from an anxiety to reconcile our conduct with our reasoning and declarations.

I could not believe that the independence of the United States was derived from the treaty of 1783; that the recognition of that independence by Great Britain gave to this treaty any peculiar character; or that such character, supposing it existed, would necessarily render this treaty absolutely inseparable in its provisions, and make it one entire and indivisible whole, equally imperishable in all its parts, by any change which might occur in the relations between the contracting parties.

The independence of the United States rests upon those fundamental principles set forth and acted on by the American Congress in the declaration of July, 1776, and not on any British *grant* in the treaty of 1783; and its era is dated accordingly.

The treaty of 1783 was merely a *treaty of peace*, and therefore subject to the same rules of construction as all other compacts of this nature. The recognition of the independence of the United States could not well have given to it a peculiar character, and excepted it from the operation of these rules. Such a recognition, expressed or implied, is always indispensable on the part of every nation with whom we form any treaty whatsoever. France, in the treaty of alliance, long before the year 1783, not only expressly recognised, but engaged *effectually to maintain* this independence; and yet this treaty, so far from being considered as possessing any mysterious peculiarity by which its existence was perpetuated, has, even without war, and although a part of it contained words of *perpetuity* and was *unexecuted*, long since terminated.

Had the recognition of our independence by Great Britain given to the treaty of 1783 any peculiar character, (which it did not,) yet that character could have properly extended to those provisions only *which affected* that independence. All those general rights, for instance, of jurisdiction, which appertained to the United States in their quality as a nation, might, so far as that treaty was declaratory of them, have been embraced by that peculiarity, without *necessarily* extending its influence to mere special *liberties* and *privileges*, or to provisions *long since executed*, not indispensably connected with national sovereignty, nor necessarily resulting from it.

The liberty to take and cure fish within the exclusive *jurisdiction of Great Britain*, was certainly not necessary to perfect the *jurisdiction of the United States*. And there is no reason to believe that such a liberty was intended to be raised to an equality with the general right of fishing within the common jurisdiction of all nations, which accrued to us as a member of the great national family. On the contrary, the distinction between the special liberty and the general right appears to have been well understood by the American ministers who negotiated the treaty of 1783, and to have been clearly marked by the very import of the terms which they employed. It would evidently have been unwise in them, however ingenious it may be in us, to exalt such a privilege to the rank of a sovereign right, and thereby to have assumed the unnecessary and inconvenient obligation of considering such a liberty to be an indispensable condition of our national existence, and thus rendering that existence as precarious as the liberty itself. They could not have considered a privilege which they expressly made to depend, to a very considerable extent, for its continuance, on mere events and private interests, as partaking of the character and entitled to the duration of the inherent properties of sovereignty. The settlement of the shores might at any time have been effected by the policy of the British Government, and would have made the assent of British subjects, under the influence of that policy, necessary to the continuance of a very considerable portion of that privilege. They could not have meant thus to place within the control of a foreign Power and its subjects an *integral part*, as we now affect to consider this privilege, of our national rights.

It is from this view of the subject that I have been constrained to believe that there was nothing in the treaty of 1783 which could essentially distinguish it from ordinary treaties, or rescue it, on account of any peculiarity of character, from the *jura belli*, or from the operation of those events on which the continuance or termination of such treaties depends.

I was, in like manner, compelled to believe, if any such peculiarity belonged to those provisions in that treaty, which had an immediate connexion with our independence, that it did not necessarily affect the nature of the whole treaty, nor attach to a privilege which had no analogy to such provisions, nor any relation to that independence.

I know not, indeed, any treaty, nor any article of a treaty, whatever may have been the subject to which it related, or the terms in which it was expressed, that has survived a war between the parties, without being specially renewed, by reference or recital, in the succeeding treaty of peace. I cannot, indeed, conceive the possibility of such a treaty, or of such an article; for, however clear and strong the stipulations for perpetuity might be, these stipulations themselves would follow the fate of ordinary unexecuted engagements, and require, after a war, the declared assent of the parties for their revival.

We appear, in fact, not to have an unqualified confidence in our construction of the treaty of 1783, or to have been willing to rest exclusively on its peculiar character our title to any of the rights mentioned in it, and much less our title to the fishing privilege in question.

If hostilities could not affect that treaty, nor abrogate its provisions, why did we permit the boundaries assigned by it to be brought into discussion, or stipulate for a restoration of all places taken from us during the present war? If such a restitution was secured by the mere operation of the treaty of 1783, why did we discover any solicitude for the *status ante bellum*, and not resist the principle of *uti possidetis* on that ground?

With regard to the fishing privilege, we distinctly stated to you, in our letter of the 25th of December last, that, at the time of the treaty of 1783, it was *no new grant*, we having always before that time enjoyed it, and thus endeavored to derive our title to it from *prescription*. A title derived from immemorial usage, antecedent to 1783, could not well owe its origin or its validity to any compact concluded at that time; and we might, therefore, in this view of the subject, correctly say that this privilege was then no new grant; that is, that our right to the exercise of it was totally independent of such compact. If we were well founded, however, in the assertion of our prescriptive title, it was quite unnecessary for us to attempt to give a kind of charmed existence to the treaty of 1783, and to extend its indefinable influence to every article of which it was composed, merely to preserve that title which we declared to be in no way derived from it, and which had existed, and of course could exist, without it.

It was rather unfortunate, too, for our argument against the severance of the provisions of that treaty, that we should have discovered ourselves such a radical difference between them, making the fishing privilege to depend on immemorial usage, and of course distinct, in its nature and in its origin, from the rights resulting from our independence.

We indeed throw some obscurity over this subject, when we declare to you that this privilege was always enjoyed by us before the treaty of 1783, thence inferring that it was not granted by that treaty; and, in the same sentence, and from the same fact, appear also to infer that it was not to be forfeited by war, any more than *any other of the rights of independence;* making it thus one of those rights, and, of course, according to our doctrine, dependant on that treaty. There might have been nothing incomprehensible in this mode of reasoning, had the treaty recognised this privilege to be derived from prescription, and confirmed it on that ground. The treaty, however, has not the slightest allusion to the past, in reference to this privilege, but regards it only with a view to the future. The treaty cannot, therefore, be construed as supporting a pre-existing title, but as containing a grant entirely new. If we claim, therefore, under the treaty, we must renounce prescription; and if we claim from prescription, we can derive no aid from the treaty. If the treaty be imperishable in all its parts, the fishing privilege remains unimpaired, without a recurrence to immemorial usage; and if our title to it be well founded on immemorial usage, the treaty may perish without affecting it. To have endeavored to support it on both grounds, implies that we had not entire confidence in either; and to have proposed a new article, indicates a distrust of both.

It is not, as I conceive, difficult to show that we can, indeed, derive no better title to this fishing privilege from prescription, than from any indestructible quality of the treaty of 1783.

Prescription appears to be inapplicable to the *parties* and to the *subject*, and to be defective both in *fact* and *effect*.

As to the parties: the immemorial enjoyment of a privilege, within British jurisdiction, by British subjects, the inhabitants of British colonies, could not well be considered as evidence of a title to that privilege claimed by citizens of an independent republic, residing within the exclusive jurisdiction of that republic. The people of the United States, as such, could have claimed no special privilege within the dominions of any foreign Power, from immemorial usage, in 1783, when the longest duration of their own existence in that quality was little more, at the utmost, than the brief period of *seven* years, which is surely not beyond the memory of man, *(ultra memoriam hominis.)* The people of the United States had never, in fact, during that period, enjoyed the fishing privilege a moment, being effectually prevented therefrom by the existing state of hostilities. Nor could the inhabitants of the colonies, originally constituting the United States, even in their colonial condition, acquire against their sovereign any right from long usage, or the mere lapse of time, *(nullum tempus regi occurrit.)* The British sovereign was always competent to regulate or to restrain them in their commerce and intercourse with each other, whenever and however he might think proper. And had he forbidden his subjects in the province of Massachusetts Bay to fish, and to dry and cure fish, in the bays, harbors, and creeks of Labrador, (which, by the way, had *not immemorially belonged to him,)* it is not to be imagined that they would have conceived themselves discharged from the obligation of submitting, on account of any pretended right from immemorial usage.

The fishing privilege, therefore, enjoyed by British subjects within British jurisdiction, could give no permanent and independent right to those subjects themselves, and, *à fortiori*, no such right to the citizens of the United States, claiming under a *different estate* and in a different capacity. Great Britain might, indeed, as well prescribe for the prerogatives of her sovereignty over us, as we for any of the privileges which we enjoyed as her subjects.

I do not think it necessary to inquire how far the practice of the people of Massachusetts was the practice of the people of the whole original thirteen United States, or of the United States, now including Louisiana; or how far the immemorial usage of the people of Boston can establish a prescriptive right in the people of New Orleans. I trust I have said enough to show that prescription is *inapplicable to the parties.*

It is also, I conceive, inapplicable to the subject. Had the United States, as an independent nation, enjoyed from time immemorial the fishing privilege in question, still, from the nature of this privilege, no prescriptive right would have thence been established. A right to fish, or to trade, or to do any other thing, within the exclusive jurisdiction of a foreign state, is a *simple power*, a right *of mere ability, (jus meræ facultatis,)* depending on the will of such state, and, consequently, *imprescriptible.* An independent right can be derived only from treaty.

I conceive, therefore, that a claim to the fishing privilege from immemorial usuage is not only unsupported by the *fact*, but cannot, in *effect*, result from such usage.

I have, in this view of the subject, been led to conclude that the treaty of 1783, in relation to the fishing liberty, is abrogated by the war; and that this liberty is totally destitute of support from prescription; and, consequently, that we are left without any title to it whatsoever: for, I cannot prevail upon myself to seek for such a title in the relative situation of the parties at the time of negotiating the treaty of 1783, and contend, according to the insinuation contained in our letter to you of the 25th December last, that the jurisdiction of Great Britain over the colonies assigned to her, in America, was a grant of the United States; and that the United States, in making this grant, *reserved to themselves* the privilege in question. Such a pretension, however lofty, is so inconsistent with

the real circumstances of the case, and with any sober construction which can be given to that treaty, that I shall, I trust, be excused from seriously examining its validity.

Having thus stated some of the reasons which induced me to differ in opinion from a majority of my colleagues, relative to the character of the treaty of 1783, as well as with regard to every other foundation on which they were disposed inconsistently to rest our title to the fishing privilege, I shall now proceed to explain the reasons which influenced me to dissent from them in the interpretation of our instructions relative to that privilege.

These instructions forbade us to permit our *rights* to the *trade* beyond the *Cape of Good Hope*, to the *fisheries*, and to *Louisiana*, to be brought into discussion. I conceived that this prohibition extended to the general rights only, which affected our sovereignty and resulted from it; and not to the special liberties and privileges, which had no relation to that sovereignty, either as to its nature or extent.

The right relative to the trade beyond the Cape of Good Hope was the right which belonged to us as an independent nation, and not to the permission of trading to those parts of the East Indies which were within the exclusive jurisdiction of Great Britain. In like manner, the right to the fisheries, contemplated by our instructions, was, I conceive, the right to use the open sea for fishing as well as for navigation; and not the liberty to fish, and to cure fish, within the territorial limits of any foreign state. The right to Louisiana, which, by those instructions, was not to be brought into discussion, was the right to the empire and domain of that region, and not the right of excluding Great Britain from the free navigation of the Mississippi.

How far we conformed to this instruction, with regard to the general right to Louisiana, it is not necessary for me here to inquire; but, certainly, the majority believed themselves to be permitted (their own construction to the contrary notwithstanding) to offer a very explicit proposition, with regard to the navigation of its principal river. Now, this offer I considered, for the reasons just suggested, not to be a violation of the instructions in question, but I considered it to be against both the letter and the spirit of our other instructions of the 15th of April, 1813. By these instructions we were explicitly and implicitly directed "to avoid any stipulation which might restrain the United States from *excluding* the British traders from the navigation of the lakes and *rivers, exclusively within our own jurisdiction.*" This instruction applied with the greater force to the Mississippi, because, as it is believed, it was the *only river* to which it could apply.

While I believed, therefore, that we were permitted to offer a proposition, relative to the fishing liberty; and that, in treating concerning this liberty, or in discussing our claim to it, we in no way violated our instructions, nor affected the general rights which we were forbidden to bring into discussion; I did believe, and do still believe, that we were expressly and unequivocally forbidden to offer or to renew a stipulation for the free navigation, by the British, of the Mississippi—a river within our exclusive jurisdiction.

Considering, therefore, the fishing liberty to be entirely at an end, without a new stipulation for its revival, and believing that we were entirely free to discuss the terms and conditions of such a stipulation, I did not object to the article proposed by us because any article on the subject was unnecessary, or contrary to our instructions, but I objected specially to that article, because, by conceding in it to Great Britain the free navigation of the Mississippi, we not only directly violated our instructions, but we offered, in my estimation, a price *much above its value*, and which could not *justly* be given.

In no view of the subject could I discover any analogy or relation between the two objects; and the only reason for connecting them, and making them mutual equivalents for each other, appeared to be, because they were both found in the treaty of 1783. If that treaty was abrogated by the war, as I consider it to have been, any connexion between its parts must have ceased, and the liberty of navigating the Mississippi by British subjects must, at least, be completely at an end; for it will not, I trust, be attempted to continue it by a *prescriptive* title, or to consider it as a *reservation* made by the United States from any grant of sovereignty, which, at the treaty of peace, they accorded to Great Britain. If, indeed, it were such a reservation, it must have been intended for *our benefit;* and, of course, no equivalent for the fishing privilege, likewise for our benefit. If it is considered as a reservation made by Great Britain, it will reverse all the facts assumed by us in relation to that privilege.

The *third* article of the treaty of 1783, respecting the fisheries, and the *eighth* of that treaty, respecting the Mississippi, had not the slightest reference to each other, and were placed as remote the one from the other as the limits of that treaty could well admit. Whatever, therefore, might have been the cause of inserting the fishing liberty—whether it was a voluntary and gratuitous grant on the part of Great Britain, or extorted from her as a condition on which the peace depended—it could have had no relation with the free navigation of the Mississippi. Besides, the article relative to this river must, from the evident views of the parties at the time, from their relations to each other, and from their known relations to a third Power, have been considered of mutual and equal advantage, and furnished no subject for compensation or adjustment in any other provision of that treaty.

Both parties believed that this river touched the territories of both, and that, of course, both had a right to its navigation. As Spain possessed both banks of this river to a considerable distance from its mouth, and one of its banks nearly throughout its whole extent, both parties had an interest in uniting to prevent that Power from obstructing its navigation. Had not the article been intended to engage the parties in relation to Spain, they probably would have limited it to the navigation of the river, so far as their own territories extended on it, and not have stipulated for its navigation to the ocean, which necessarily carried it through the exclusive territories of Spain. If the circumstances had been, in fact, such as the parties at the time believed them to be, and with a view to which they acted, or had these circumstances subsequently experienced no radical change, Great Britain would have gained now no more than she would have granted by the renewal of the article in relation to the navigation of the Mississippi; and would not, any more than in 1783, have acknowledged any equivalent to be conferred by it, for our liberty relative to the fisheries. The circumstances, however, assumed by the parties at the time, in relation to Great Britain, and from which her rights were deduced, have not only in part been since discovered not to have existed, but those which did exist have been entirely changed by subsequent events.

It has been clearly ascertained that the territories assigned to Great Britain no where, in fact, reached the Mississippi; and the acquisition of Louisiana by the United States had forever removed the Spanish jurisdiction from that river. The whole consideration, therefore, on the part of Great Britain, whether derived from her territorial rights, or from her part of the reciprocal obligations relative to Spain, having entirely failed, our engagements entered into on account of that consideration may be fairly construed to have terminated with it.

In this view of the subject, Great Britain could have had no title to the navigation of the Mississippi, even if a war had not taken place between the parties. To renew, therefore, the claims of Great Britain, under that article, subject to this construction, would be granting her nothing; and, to renew that article independent of this construction, and without any reference to the circumstances that attended its origin in 1783, or to the events which have since occurred in relation to it, would be granting her advantages not only entirely *unilateral*, as relates to the article itself, but, as I believed, of much greater importance than any which we could derive from the liberty relative to the fisheries

If the article which we offered was merely intended to rescue the third and eighth articles of the treaty of 1783 from the operation of the present war, and to continue them precisely as they were immediately prior to this war, (the third article being then in full force, and the eighth article being no longer operative,) we should have attempted to exchange, like General Drummond, the dead for the living. It is not surprising, therefore, that the British Government, in suspecting such an intention, should have rejected our proposition.

I was opposed, however, to making the proposition, not only because I was convinced that it was made with no such intention, but because I believed it would give to Great Britain the free navigation of the Mississippi, under circumstances, and evidently for an object, which would place it on very distinct grounds from those on which it was placed by the treaty of 1783.

The whole of the Mississippi being now exclusively within the acknowledged jurisdiction of the United States, a simple renewal of the British right to navigate it would place that right beyond the reach of the war, and every other previous circumstance which might have impaired or terminated it; and the right to grant, on our part, being now complete, the right to enjoy, on the part of Great Britain, must be complete also. It would be absurd to suppose that any thing impossible was intended, and that Great Britain was to be allowed to navigate the Mississippi only as she would have navigated it immediately after the treaty of 1783, as if her territories extended to it, and as if Spain was in the entire possession of one of its banks, and of a considerable portion of the other.

The recognition of the British right to navigate the Mississippi would be, *under existing circumstances*, a new and complete grant to her, measured by these circumstances, and thence embracing not only the entire freedom of the whole extent of the river and its tributary waters, but unrestrained access to it across our territories. If we did not intend to offer this, we intended to offer nothing which Great Britain could accept; and whatever else we might have intended to offer, if not at once rejected by her, would at least have been hereafter the subject of new and endless controversy.

When, however, we connected the revival of the navigation of the Mississippi with the revival of the privilege of taking and curing fish within the British jurisdiction, (two things which never before had any relation to each other,) we evidently meant, if we acted with good faith, not only to concede, as well as to obtain something, but also to be understood as conceding an equivalent for what we obtained.

In thus offering the navigation of the Mississippi, and the access to it through our territories, as an equivalent for the fishing liberty, we not only placed both on ground entirely different from that on which they respectively stood in the treaty of 1783, and acted somewhat inconsistently with our own reasoning, relative to the origin and immortality of the latter, but we offered to concede *much more* than we could hope to gain by the arrangement.

From the year 1783 to the commencement of the present war, the actual advantages derived from the fishing privilege by the people of the United States were, according to the best information that we could obtain on the subject, very inconsiderable, and annually experiencing a voluntary diminution.

It was discovered that the obscurity and humidity of the atmosphere, owing to almost incessant fogs in the high northern latitudes, where this privilege was chiefly located, prevented the effectual curing of fish in those regions, and, consequently, lessened very much the value of the privilege of taking them there. By far the greatest part of the fish taken by our fishermen before the present war was taken in the open sea, or on our own coasts, and cured on our shores. This branch of the fisheries has been found to be inexhaustible, and has been pursued with so much more certainty and despatch than the privileged portion within British jurisdiction, that it has not only been generally preferred by our fishermen, but would, probably, on longer experience, have been almost universally used by them. It was to be believed, therefore, that a discontinuance of the privilege of taking and curing fish within the British jurisdiction would not at all diminish the aggregate quantity taken by the people of the United States, or vary materially the details of the business.

That part of the fisheries which would still belong to us as a nation (being exhaustless) would afford an ample field for all the capital and industry hitherto employed in the general business of fishing or merchandise of fish; and on that field might the few fishermen, who had hitherto used the liberty of taking and curing fish within the jurisdiction of Great Britain, exert their skill and labor without any serious inconvenience.

That liberty, liable, to a very considerable degree, by the terms in which it was granted, to be curtailed by the Government and subjects of a foreign state; already growing into voluntary disuse by our own citizens, on account of the difficulties inseparable from it, and absolutely incapable of extension; was totally unnecessary to us for subsistence or occupation, and afforded, in no honest way, either commercial facility or political advantage. This privilege, too, while it was thus of little and precarious utility to us, cost Great Britain literally *nothing*.

The free navigation of the Mississippi, with the necessary access to it, is a grant of a very different character. If it was not heretofore used by Great Britain, it was, perhaps, because she did not consider herself entitled to it, or because the circumstances of the moment suspended its practical utility. The treaty of 1783 stipulated for her the navigation of this river, under the presumption that her territories extended to it, and, of course, could not intend to give her access to it through our territories. The British possessions to the westward of Lake Erie being almost entirely unsettled, rendered, perhaps, the free navigation of the Mississippi, for the moment, of little advantage to her, particularly as her right to reach it was at least equivocal, and as, by another treaty, she could carry on trade with our Indians. This navigation might, indeed, for a long time to come, be of little use to her for all the *legitimate* purposes of transit and intercourse; but every change that could take place in this respect must increase its importance to her, while every change in the fishing liberty must be to the disadvantage of the United States.

The freedom of navigating the Mississippi, however, is not to be estimated by the mere legitimate uses that would be made of it. The unrestrained and undefined access, which would have been inferred from the article which we proposed, must have placed in the hands of Great Britain and her subjects all the facilities of communication with our own citizens, and with the Indians inhabiting the immense regions of our western territory. It is not in the nature of things that these facilities should not have been abused for unrighteous purposes. A vast field for contraband and for intrigue would have been laid open, and our western territories would have swarmed with British smugglers and British emissaries. The revenue would have been defrauded by the illicit introduction of English merchandise; and the lives of our citizens, and the security of a valuable portion of our country, would have been exposed to Indian hostility, excited by an uncontrolled British influence.

If our instructions of the 15th of April, 1813, already cited, forbade us, in order to guard against such an influence, to renew the treaty of 1794, "allowing the Northwest Company and British traders to carry on trade with the Indian tribes within our limits—a privilege the *pernicious* effects of which have been *most sensibly felt* in the present war"—we certainly violated the spirit of those instructions in offering the means of exercising that influence with still greater facility and effect than could result from that *privilege*.

What was there in the fishing liberty, either of gain to us or loss to Great Britain, to warrant, in consideration of it, a grant to her of such means of fraud and annoyance? What justice or equality was there, in exposing to all the horrors of savage warfare the unoffending citizens of an immense tract of territory, not at all, or but faintly,

benefited by the fishing privilege, merely to provide for the doubtful accommodation of a few fishermen, annually decreasing in number, in a remote quarter, and entirely exempt from the danger? Such have been the reasons which induced me to differ from a majority of my colleagues with regard to the article in question, and which, I trust, will be deemed sufficient, at least, to vindicate my motives.

The unfeigned respect which I feel for the integrity, talents, and judgment of those gentlemen, would restrain me from opposing them on slight grounds; and a deference for their opinions makes me almost fear that I have erred in dissenting from them on the present occasion. I can but rejoice, however, that the article, as proposed by us, was rejected by Great Britain, whatever were her reasons for rejecting it; whether, as above suggested, she might have suspected some tacit reservation, or want of faith, on our part; or supposed, from the price we at once bade for the fishing privilege, that we overrated its value, and might concede for it even more than the free navigation of the Mississippi, with all its accessory advantages.

Let me not, in any thing which I have said, be misunderstood. In judging on the interests of the great whole, I am not disposed to undervalue the interests of any of the constituent parts. No one can more highly appreciate than I do a branch of industry which not only adds to national wealth, but seems to create it. Nor can any one more warmly admire the usefulness and patriotism of those citizens who are engaged in it, and who have never ceased to deserve well of the republic. In times of peace they bring home, amidst conflicting elements, the treasures of the deep to enrich their country; and in times of war they contribute, by their skill and intrepidity, to her defence and glory. But, in our country, where all are equal, the essential security and prosperity of the many must be preferred to the convenience and minor interests of the few. In giving this preference, I will frankly confess I had to silence early prepossessions and local predilections, and to listen to the counsels of a more enlarged patriotism; and to this patriotism I dare appeal for my vindication, not only to those to whom I am officially responsible, but to those with whom I am more immediately connected in society, and whose interests may be considered to have been unfavorably affected by the views which I have deemed it to be my duty to adopt. I have always been willing to make any sacrifice for the fishing privilege which its nature or comparative importance could justify; but I conscientiously believe that the free navigation of the Mississippi, and the access to it which we *expressly offered*, were pregnant with too much mischief to be offered, indirectly, under our construction of the treaty, or directly, as they were in fact offered, as a new equivalent for the liberty of taking and drying fish within the British jurisdiction.

I will frankly avow, however, that my impressions were, and still are, that Great Britain, calculating on the success of the powerful expedition which she has sent against New Orleans, confidently expected that she would have become the mistress of Louisiana and all its waters; and that she did not, in this event, intend to abandon her conquest under the terms of the treaty of Ghent.

Her ministers had, almost from the commencement of the negotiation, not only affected to consider our acquisition of Louisiana as evidence of a spirit of aggrandizement, but insinuated a *defect* in our title to it. Expecting, therefore, to obtain the free navigation of the Mississippi for nothing, she would not consent to part even with the fishing liberty as an equivalent. If she be disappointed in her views on Louisiana, (and I trust in God and the valor of the West that she will be,) I shall not be surprised if, hereafter, she grants us the fishing privilege, which costs her absolutely nothing, without any extravagant equivalent whatever.

At any rate, we are still at liberty to negotiate for that privilege in a treaty of commerce, and to offer for it an equivalent, fair in its comparative value, and just in its relative effects; and to negotiate for it in this way is evidently more wise than to demand it as a *condition* of peace, or to offer for it a price beyond its worth, and which, however excessive, runs the hazard of being refused, merely by the operation of those unaccommodating passions which are inevitably engendered by a state of war.

I have the honor to be, with the most profound respect, sir, your faithful and obedient servant,

JONATHAN RUSSELL.

Hon. JAMES MONROE, *Secretary of State of the United States.*

A true copy of a paper left by Jonathan Russell, Esq. at the Department of State, 22d April, 1822, to be communicated to the House of Representatives of the United States.

J. Q. ADAMS, *Secretary of State.*

Remarks on a paper delivered by Mr. Jonathan Russell, at the Department of State, on the 22d of April, 1822, to be communicated to the House of Representatives, as the duplicate of a letter written by him at Paris, the 11th February, 1815, to the then Secretary of State, and as the letter called for by the resolution of the House of the 19th April, 1822.

The first remark that presents itself upon this *duplicate*, is, that it is not a copy of the letter really written by Mr. Russell, at Paris, on the 11th of February, 1815, to the Secretary of State, and received by him. The latter was marked "*private*," and, as such, was not upon the files of the Department of State; and, although of the same general purport and tenor with the so called duplicate, differed from it in several highly significant passages, of which the following parallel, extracted from the two papers, presents one example:

ORIGINAL.	DUPLICATE.
"How far we conformed to this instruction, with regard to the general right to Louisiana, it is not necessary for me here to inquire; but certainly the majority believed themselves permitted to offer a very explicit proposition, with regard to the navigation of its principal river. *I believed, with them, that we were so permitted*, and that we were, likewise, permitted to offer a proposition relative to the fishing liberty, and, had the occasion required it, to make proposals concerning the trade to the British East Indies. I was persuaded that treating relative to these privileges, or discussing the obligation or expediency of granting or withholding them, respectively, violated, in no way, our instructions, or affected the general rights which we were forbidden to bring into discussion."	"How far we conformed to this instruction, with regard to the general right to Louisiana, it is not necessary for me here to inquire; but certainly the majority believed themselves to be permitted (their own construction to the contrary notwithstanding) to offer a very explicit proposition, with regard to the navigation of its principal river. Now, this offer, I considered, for the reasons just suggested, not to be a violation of the instructions in question; but I considered it to be against both the letter and the spirit of our other instructions, of the 15th of April, 1813. By these instructions, we were explicitly and implicitly directed 'to avoid any stipulation which might restrain the United States from *excluding* the British traders from the navigation of the lakes and *rivers exclusively within our own jurisdiction.*' This instruction applied with the greater force to the Mississippi, because, as it is believed, it was the *only river* to which it could apply.

"While I believed, therefore, that we were permitted to offer a proposition relative to the fishing liberty, and that, in treating concerning this liberty, or in discussing our claim to it, we in no way violated our instructions, nor affected the general rights which we were forbidden to bring into discussion, I did believe, and do still believe, that we were expressly and unequivocally forbidden to offer, or to renew, a stipulation for the free navigation by the British of the Mississippi—a river within our exclusive jurisdiction."

It is here seen that, while in the original letter Mr. Russell did, with the majority of his colleagues, believe that we were permitted by our instructions to make the proposition with regard to the navigation of the Mississippi, as well as a proposition relative to the fishing liberty, he had, when writing the duplicate, brought himself to the belief, not only that we were not so permitted, but that he had, even at Ghent, considered it as a direct violation both of the letter and spirit of our explicit and implicit instructions of 15th April, 1813. The solution of this difference in the mind of Mr. Russell, between the writing of the original and the duplicate of his letter, may be found in this circumstance: The proposition relating to the navigation of the Mississippi and the fisheries was made to the British plenipotentiaries on the 1st of December, 1814. It had been discussed at the meetings of the American mission on the preceding 28th and 29th of November. On the 24th of that month the American plenipotentiaries had received a letter of instructions from the Secretary of State, dated 19th October, 1814, and containing the following passages:

"It has been judged proper to communicate to Congress so much of the instructions given to you by this Department as would show the terms on which you were authorized to make peace. These, as well as your communications, have been printed, and several copies are now forwarded to you, as it is believed they may be usefully disposed of in Europe. Should any circumstances have unexpectedly prolonged the negotiation, and you find the British commissioners disposed to agree to the *status ante bellum*, you will understand that you are authorized to make it the basis of a treaty."

Now, the *status ante bellum*, upon which we were thus expressly and unequivocally permitted to conclude a treaty, included not only the recognition of the entire treaty of peace of 1783, but the revival of the first ten articles of the treaty of 1794; not only the freedom to the British to navigate the Mississippi, but free ingress into our territories, and free trade with our Indians. And so entirely was that part of the instructions of 15th April, 1813, now cited by Mr. Russell, considered by the President as cancelled, that it was omitted from that copy which had been communicated to Congress of "so much of the instructions as would show the terms on which we were authorized to make peace," and of which several printed copies were thus forwarded to us. [See Wait's State Papers, vol. 9, pp. 339 and 358.]

It was scarcely possible that, within the compass of one week, Mr. Russell should have forgotten the receipt of the instruction of 19th October, 1814, fresh from Washington; nor at all possible that he should have considered us as then bound by the instruction of 15th April, 1813, to which, in his duplicate, he now so emphatically refers. The 11th of February, 1815, was yet so recent to the date of the conclusion of the treaty, that, in writing the original of his letter, the recollection of the new instructions of October, 1814, had doubtless not escaped him. But when the duplicate was written, other views had arisen; and their aspects are discovered in the aggravation of charges against the memory of a dead, and the character of living colleagues.

But whether the real sentiments of Mr. Russell at Paris, on the 11th of February, 1815, with regard to the transactions to which this passage relates, are to be taken as indicated in the original, or in the duplicate, certain it is that the vehement objections to the proposed article, which, in the *duplicate*, appear to have made so deep an impression on his mind, had as little been made known to his colleagues at the time of the discussions at Ghent, as they appear to have been to himself when writing the *original* of the same letter.

The proposal, to which the whole of Mr. Russell's letter, in both its various readings, relates, was made to the British plenipotentiaries, not by a majority, but by the whole of the American mission, including Mr. Russell, as may be seen by the protocol of the conference of the 1st December, 1814, and by the letter from the American to the British plenipotentiaries of 14th December, 1814. In that letter, already communicated to the House, the American plenipotentiaries, referring to the article in question, expressly say: "To such an article, which they viewed as merely declaratory, the undersigned had no objection, and have offered to accede;" and to that letter the name of Mr. Russell is subscribed.

At the time when the letter from Paris was written, or within a few days thereafter, all the colleagues, whose conduct it so severely censures in relation to measures to which Mr. Russell's sanction and signature stood equally pledged with their own, were at Paris, and in habits of almost daily intercourse with him. They little suspected the coloring which he was privately giving, without communication of it to them, of their conduct and opinions, to the head of the Government, by whom he and they had been jointly employed in a public trust of transcendent importance; or the uses to which this denunciation of them was afterwards to be turned.

Had the existence of this letter from Paris been, at the time when it was written, known to the majority of the mission, at whose proposal this offer had been made to that majority; who believed that the article was perfectly compatible with their instructions, consistent with the argument maintained by the mission, important for securing a very essential portion of the right to the fisheries, and in nowise affecting unfavorably the interest of any section of the Union, they would doubtless have felt that its contents called much more forcibly upon them to justify to their own Government themselves and their motives for making that proposal, than Mr. Russell could be called upon to justify himself for merely having been in the minority upon the question whether an article should be proposed, which he did actually concur in proposing, and which the adverse party had not thought worth accepting.

The writer of these remarks is not authorized to speak for his colleagues of the majority; one of whom is now alike beyond the reach of censure and panegyric; and the other, well able, when he shall meet this disclosure, to defend himself. But he believes of them, what he affirms of himself, that, had they entertained of the projected article, and of the argument maintained by the mission, the sentiments avowed in either of the variations of Mr. Russell's letter from Paris, no consideration would have induced them to concur in proposing it, or to subscribe their names to a paper declaring that they had no objection to it.

Still less, if possible, would they have thought it reconcileable with their duty to their country, had they entertained those sentiments, to have subscribed, on the 25th of December, 1814, the joint letter of the mission to the Secretary of State, already communicated to Congress, and on the same day to have written the separate and secret letter, fore-announcing that of 11th of February, 1815, from Paris.

Besides the memorable variation between the original and duplicate of the letter of 11th February, 1815, which has been exhibited in parallel passages extracted from them, there are others not less remarkable. In the

course of the *duplicate*, the total and unqualified abandonment of the *rights* of the poor fishermen is compensated by an eloquent panegyric upon their usefulness to the country, their hardy industry, their magnanimous enterprise, and their patriotic self-devotion. Little of this appears in the original; and that little, in the after-thought of a post-script. Towards the close of the *duplicate*, the spirit of prophecy takes possession of the writer. By his "trust in God and in the valor of the West," he foresees the victory of General Jackson at New Orleans; he foresees the convention between the United States and Great Britain of October, 1818. In the *original* there is no prophecy; no "trust in God, and in the valor of the West."

With all these varieties, the two copies of the letter form an elaborate and deeply meditated dissertation to prove:

1. That the treaty between the United States and Great Britain of 1783—the treaty which upon its face is a treaty of independence, a treaty of boundaries, a treaty of partition, as well as a treaty of peace—was, in his estimation, (all his signatures at Ghent to the contrary notwithstanding,) a mere treaty of peace, totally abrogated by the war of 1812.

2. That the same treaty was a treaty *sui generis*, consisting of two parts: one, of rights appertaining to sovereignty and independence; and the other, of special grants and privileges: of which the former were permanent, and the latter abrogated by the war.

3. That the principles assumed and the argument maintained by the majority of the Ghent mission, and to which he had subscribed his name in all the joint communications of the mission, as well to the British plenipotentiaries as to his own Government, were a mass of errors, inconsistencies, and absurdities.

4. That the offer to the British plenipotentiaries of a right to the British to navigate the Mississippi, was, in the opinion of the majority, and also in his own opinion, permitted by our instructions, and in no ways violated them.

5. That the same offer was directly contrary to the construction given by the majority to their instructions, and as he had always thought, and still thought, contrary to explicit and implicit, express and unqualified, prohibitions in those instructions.

6. That the offer of the right to navigate the Mississippi, as an equivalent for the fisheries, was the offer of an excessive price for a privilege worth little or nothing.

7. That, extravagant as that offer (to which he signed a letter declaring that he had no objection) was, it was rejected by the adverse party; because they thought it an offer of the dead for the living; or because they hoped to get still more for the worthless privilege; or because they expected to take and keep Louisiana, and thus get the navigation of the Mississippi for nothing; or because they were blinded by the unhappy passions incident to war: but that he *foresaw* that they would *hereafter* grant all the valuable part of the same worthless privilege for nothing.

8. That there was no sort of relation whatsoever between a privilege for the British to navigate in waters within our jurisdiction, and a privilege for us to fish in waters within British jurisdiction; because one of these privileges had been stipulated in the *third*, and the other in the *eighth* article of the treaty of 1783; and, therefore, that it was absurd to offer one as an equivalent for the other.

9. Lastly. That the offer to the British of the right to navigate the Mississippi was pregnant with mischief to the western country—to "*the unoffending citizens* of an immense tract of territory, not at all, or but faintly, benefited by the fishing privilege, merely to provide for the doubtful accommodation of a few fishermen, annually decreasing in number, in a remote quarter, and entirely exempt from the danger."

Upon most of these points, so far as argument is concerned, it might, upon the mere statement of Mr. Russell's positions, be left to his ingenuity to refute itself. His first and second points, with regard to the character of the treaty of 1783, considered as doctrines, are evidently inconsistent with each other. The variation between the original and duplicate of his letter upon the fourth and fifth points is something more than inconsistency, something more even than self-contradiction. The whole letter is a laborious tissue of misrepresentation of every part of its subject; of the conduct and sentiments of his colleagues who constituted the majority of the mission; and of his own conduct and sentiments in opposition to them. It substantially charges them with deliberate and wanton violation, in the face of his solemn warning, of the positive and unequivocal instructions of their Government, for the sake of sacrificing the interest, the peace, the comfortable existence of the whole western country, to the doubtful accommodation of a few eastern fishermen, and in support of a claim to which they had not the shadow of a right.

I say it is a tissue of misrepresentations of the subject, of the conduct and sentiments of his colleagues, and of his own conduct in opposition to them.

1. Of the subject. Mr. Russell represents the offer of an article, granting to the British the right of navigating the Mississippi as an equivalent for the grant of a fishing privilege in British jurisdiction, as if it had been a separate and insulated proposal of new grants in a distinct article, without reference to the state of the negotiation at the time when it was made, to the occasion upon which it was made, and to the considerations by which it was induced.

Mr. Russell represents the article as if offered under circumstances when it was by both parties acknowledged that the British had no claim to territory *to the Mississippi*. This is a direct and positive perversion of the whole statement of the subject.

Mr. Russell represents the offer of a right to navigate the Mississippi, and of access to it from the British territories, as general and unqualified; as giving access to British traders and British emissaries to every part of the western country, and to intercourse with all our Indians. The proposal was, of a limited access from a single spot of the British territory to the river, for the purpose of navigating the river with merchandise, upon which the duties of import should have been first paid.

In consequence of these misrepresentations, Mr. Russell brings in British smugglers, British emissaries, and all the horrors of Indian warfare, upon the western country, as necessary inferences from a proposal—not that which was made, but that into which it is distorted by his misrepresentations.

2. Of the conduct and sentiments of his colleagues.

Mr. Russell represents his colleagues as having deliberately, and against his declared opinion, violated both the letter and the spirit of their most explicit and implicit, express and unequivocal, instructions from their own Government. He charges them, also, with having violated their own construction of their instructions.

It is true that, in another reading of the same letter, purporting to have been written on the same day, he acquits them entirely of all violation of their instructions, and declares he had always been of that opinion.

Mr. Russell ascribes to his colleagues opinions which they never entertained, arguments which they never advanced, and doctrines which they not only would disclaim with indignation, but diametrically opposite to those which they did maintain. He imputes to them the opinion that the independence of the United States was derived only from the treaty of peace of 1783, and that all the rights stipulated by it, in favor of the people of the United States, were mere *grants* from the Crown of England. This was the British doctrine, which Mr. Russell well knew his colleagues rejected with disdain, but which he himself countenances, by maintaining the British side of the argument—that the fishing liberty, stipulated in the treaty of 1783, was abrogated, *ipso facto*, by the war of 1812.

He imputes to them, as an inconsistency with their other imputed opinion, that they rested their claim to the fishing privilege upon *prescription;* and this notwithstanding all the light of learning with which he had irradiated them, from the lucid sources of "*jus meræ facultatis;*" of "*ultra memoriam hominis;*" of "*nullum tempus regi occurrit;*" and of the imprescriptible character of fisheries. Of all this not one word was said at Ghent. The majority never asserted the right of the fishing privilege as resting upon the right of prescription; nor had they ever the benefit of Mr. Russell's learned labors to prove that it was not applicable to the subject.

3. Of his own conduct and sentiments in opposition to those of the majority of his colleagues.

The parallel passages from the original and duplicate of his letter remove all necessity for further proof of this. But that is not all. Throughout the letter, Mr. Russell holds himself forth as having been the intrepid and inflexible asserter and supporter of the rights of the West against the majority of his colleagues; as having, by a painful struggle, obtained a conquest over his early prejudices and local partialities; and enlarged his intellectual faculties and patriotism, to become the champion and vindicator of the interest of the West. Of all this, nothing was made known to his colleagues of the majority at Ghent. The article to which his letter conjures up such formidable objections was drawn up and proposed to the mission by a distinguished citizen of the western country. It was opposed by another citizen from the same section of the Union. Of the five members of the mission Mr. Russell was the person who took the least part in the discussion. He neither objected that it was contrary to our instructions; nor depreciated the value of the fisheries; nor painted the dangers of British smugglers and emissaries, or the horrors of Indian warfare, as impending over the *unoffending* inhabitants of the western country from the measure. He gave, it may be, a silent vote against proposing the article; and, when it was determined by the majority to propose it, concurred in proposing it; was present at the conferences with the British plenipotentiaries when it was proposed to and discussed with them, and heard from them the reasons which induced them to reject it; which reasons did not embrace one of those which he has so severely tasked his sagacity to devise for them, but, plainly and simply, because they said it was clogged with conditions which made it of no value to them, or, at least, not of value to induce them to concede that our fishing liberties within British jurisdiction should continue, in return: and he afterwards signed a letter to the British plenipotentiaries, together with all the other members of the mission, declaring that they had *no objection* to the article, considering it as merely declaratory.

If Mr. Russell had entertained at Ghent the sentiments relating to this measure disclosed in the duplicate, or even those avowed in the original of his letter, he is to account for it to his conscience and his country that he ever assented to it at all. He was not under the slightest obligation to assent to it. As an act of the majority, it would have been equally valid without his concurrence or signature as with it. More than one member of the mission, and on more than one occasion, signified his determination to decline signing the treaty, if particular measures, proposed by the British plenipotentiaries, should be acceded to by the majority. A refusal by any one member to concur in any measure upon which a majority were agreed, would at least have induced the majority to reconsider their vote, and in all probability to have cancelled it. In a case of such transcendent importance as this, of high interests, generous policy, humane and tender sympathies, wantonly to be sacrificed, in defiance of the most express and unqualified instructions, to the paltry purpose of accommodating a few fishermen, destitute of all claim of right, how could Mr. Russell sit patiently in conference with the British plenipotentiaries, and join in the offer of it to them? How could he subscribe his name to a letter declaring he had no objection to it? Had Mr. Russell dissented from this measure of the majority, and they had still persisted in it, he would doubtless have reported to his own Government the reasons of his dissent; his colleagues of the majority would in like manner have reported theirs; and the responsibility of each party would have rested, as it ought, upon their respective acts. To concur individually in the measure, to sign all the papers approving it, and then secretly to write to the Government a letter of censure, reproach, and misrepresentation, against it and those who proposed it, was indeed a shorter and easier process.

Mr. Russell, therefore, did not entertain or express at Ghent the opinions disclosed in his letter from Paris, and has been as unfortunate in the representation of his own conduct and sentiments as in that of the subject of his letter, and in that of the sentiments and conduct of his colleagues.

But there is a point of view more important than any regard to his conduct and sentiments in which his letter is yet to be considered. If there were any force in his argument against the measures, or any correctness in his statements against his colleagues, it is proper they should be sifted and examined.

Let us, therefore, examine the proposed article in both its parts: First, as relates to the fishing liberty for us; and, secondly, to the navigation of the Mississippi by the British. And in order to ascertain the propriety of the principles assumed, and of the measures adopted by the American commissioners, as now in question, let us premise the state of things as they existed, and the circumstances under which this proposal was offered.

By the third article of the treaty of 1783, it was agreed that the people of the United States should *continue* to enjoy the fisheries of Newfoundland and the Bay of St. Lawrence, and at all other places in the sea where the inhabitants of both countries *used at any time theretofore to fish;* and, also, that they should have certain fishing liberties on all the fishing coast within the British jurisdiction of Nova Scotia, Magdalen islands, and Labrador. The title by which the United States held those fishing rights and liberties was the same. It was the possessory use of the right, or, in Mr. Russell's more learned phrase, of the "*jus meræ facultatis,*" at any time theretofore as British subjects, and the acknowledgment by Great Britain of its *continuance* in the people of the United States after the treaty of separation. It was a national right; and, therefore, as much a *right*, though not so immediate an *interest*, to the people of Ohio and Kentucky—ay, and to the people of Louisiana, after they became a part of the people of the United States—as it was to the people of Massachusetts and Maine: the latter had always used it since they had been British colonists, and the coasts had been in British dominions. But, as the settlement of the colonies themselves had not been of time immemorial, it was not, and never was pretended to be, a title by prescription.

Such was the title of the United States to the fisheries—prior possession, and acknowledgment by the treaty of 1783.

The commissioners at Ghent had received from the Secretary of State a letter of instruction dated 25th of June, 1814, containing the following passage:

"Information has been received from a quarter deserving of attention, that the late events in France have produced such an effect on the British Government as to make it probable that a demand will be made at Gottenburg to *surrender our right to the fisheries*, to abandon all trade beyond the Cape of Good Hope, and to cede Louisiana to Spain. We cannot believe that such a demand will be made; should it be, you will, of course, treat it as it deserves. These rights must not be brought into discussion. If insisted on, your negotiations will cease."

Now, it is very true that a majority of the commissioners did construe these instructions to mean that the right to the fisheries was *not to be surrendered.* They did not subtilize, and refine, and inquire whether they could not surrender a part, and yet not bring the right into discussion; whether we might not give up a liberty, and yet retain a right; or whether it was an *argument* or an *agreement* that was forbidden. They understood that the fisheries *were not to be surrendered.*

The demand made by the British Government was first advanced in an artful and ensnaring form. It was by assuming the principle that the right had been forfeited by the war, and by notifying the American commissioners, as they did at the first conference, "that the British Government did not intend to *grant* to the United States, gratuitously, the privileges formerly granted by treaty to them—of fishing within the limits of the British sovereignty, and of using the shores of the British territories for purposes connected with the fisheries." Now, to obtain the *surrender* of thus much of the fisheries, all that the British plenipotentiaries could possibly desire was, that the American commissioners should acquiesce in the principle that the treaty of 1783 was abrogated by the war. Assent to this principle would have been surrender of the right. Mr. Russell, if we can make any thing of his argument, would have *assented* and surrendered, and comforted himself with the reflection that, as the right had not been brought into discussion, the instructions would not have been violated.

But, however clearly he expresses this opinion in his letter, and however painfully he endeavors to fortify it by argument, he never did disclose it to the same extent at Ghent. The only way in which it was possible to meet the notification of the British plenipotentiaries, without *surrendering* the rights which it jeopardized, was by denying the principle upon which it was founded. This was done by asserting the principle that the treaty of independence of 1783 was of that class of treaties, and the right in question of the character, which are not abrogated by a subsequent war; that the notification of the intention of the British Government not to *renew the grant* could not affect the right of the United States, which had not been forfeited by the war; and that, considering it as still in force, the United States needed no new grant from Great Britain to revive, nor any new article to confirm it.

This principle, I willingly admit, was assumed and advanced by the American commissioners at my suggestion. I believed it not only indispensably necessary to meet the insidious form in which the British demand of surrender had been put forth, but sound in itself, and maintainable on the most enlarged, humane, and generous principles of international law. It was asserted and maintained by the American plenipotentiaries at Ghent; and if, in the judgment of Mr. Russell, it suffered the fishing liberty to be brought into discussion, at least it did not *surrender the right.*

It was not acceded to by the British plenipotentiaries. Each party adhered to its asserted principle; and the treaty was concluded without settling the interest involved in it. Since that time, and after the original of Mr. Russell's letter of the 11th February, 1815, was written, the principle asserted by the American plenipotentiaries at Ghent has been still asserted and maintained through two long and arduous negotiations with Great Britain, and has passed the ordeal of minds of no inferior ability. It has terminated in a new and satisfactory arrangement of the great interest connected with it, and in a substantial admission of the principle asserted by the American plenipotentiaries at Ghent, by that convention of the 20th October, 1818, which, according to the *duplicate* of Mr. Russell's letter, he foresaw in February, 1815, even while writing his learned dissertation against the right which he had been instructed not to surrender, and the only principle by which it could be defended.

At this time, and after all the controversy through which the American principle was destined to pass, and has passed, I, without hesitation, reassert, in the face of my country, the principle which, in defence of the fishing liberties of this nation, was, at my suggestion, asserted by the American plenipotentiaries at Ghent.

I deem this reassertion of it the more important, because, by the publication, at this time, of Mr. Russell's letter, that plenipotentiary has not only disclaimed all his share in the first assertion of it, but has brought to bear all the faculties of his mind against it; while the American side of the argument, and the reasons by which it has been supported against arguments coinciding much with those of his letter, but advanced by British reasoners, are not before the public. The principle is yet important to great interests, and to the future welfare of this country.

When first suggested, it obtained the unanimous assent of the American mission. In their note of the 10th November, 1814, to the British plenipotentiaries, which accompanied their first projet of a treaty, they said, "in answer to the declaration made by the British plenipotentiaries respecting the fisheries, the undersigned, referring to what passed in the conference of the 9th August, can only state, that they are not authorized to bring into discussion any of the rights or liberties which the United States have heretofore enjoyed in relation thereto. From their nature, and from the peculiar character of the treaty of 1783, by which they were recognised, no further stipulation has been deemed necessary, by the Government of the United States, to entitle them to the full enjoyment of all of them." This paragraph was drawn up and proposed to the mission by the member with whom Mr. Russell concurred in objecting to the proposal of an article confirmative of the fishing liberties and navigation of the Mississippi, and as a substitute for it. The mission unanimously accepted it; and the fishing liberties being thus secured from *surrender*, no article relating to them or to the Mississippi was inserted in the projet sent to the British mission.

But one of the objects of the negotiation was to settle the boundary between the United States and the British dominions, from the northwest corner of the Lake of the Woods, westward. That boundary, by the treaty of 1783, had been stipulated to be "from the most northwestern point of the Lake of the Woods, on a *due west* course *to the river* Mississippi; and thence, down the middle of the Mississippi, to the thirty-first degree of north latitude;" while, by the eighth article of the same treaty, it had been stipulated that "the navigation of the river Mississippi, from its source to the ocean, should forever remain free and open to the subjects of Great Britain and the citizens of the United States."

The right of Great Britain and of the United States, at the time of the treaty of 1783, to make this stipulation with regard to the navigation of the Mississippi, might be, and afterwards was, questioned by Spain, then a possessor also of territories upon the same river, and indeed of both its banks from its mouth to a higher latitude than that thus stipulated as the boundary of the United States. But, as between Great Britain and the United States, there could, at the time of the conclusion of the treaty of 1783, be no possible question of the right of both to make the stipulation; the boundary line itself being in substance a concession of territory to the river, and down its middle to latitude thirty-one, which Great Britain was undoubtedly competent to make, and the United States to receive. Now, the United States having received the cession and the boundary, with the right to navigate the river, with the express condition that the navigation of the river should forever remain free and open to British subjects; and having expressly assented to that condition, without considering it as infringing upon any right of Spain; they could not, consistently with good faith, by acquiring afterwards the right of Spain, allege that this acquisition absolved them from the obligation of the prior engagement with Great Britain. There is, indeed, in Mr. Russell's letter, a hesitating argument to that effect; the odious character of which is but flimsily veiled by its subtlety. The United States had always insisted upon their right of navigating the Mississippi by force of the article of the treaty of 1783, and had obtained the acknowledgment of that right from Spain herself, many years before they acquired her territorial right by the purchase of Louisiana. With what front, then, could an American negotiator have said, after the latter period, to a British minister: You have no right to the navigation of the Mississippi; for although, on receiving from you a part of the river, we expressly stipulated that you should forever enjoy a right to its navigation, yet that engagement was a fraud upon the rights of Spain; and although, long before we had acquired these rights of Spain, she had acknowledged *our* right to navigate the river, founded upon

this very stipulation of which you now claim the benefit, yet I will now not acknowledge your right, founded on the same stipulation. Spain, no party to the compact between you and me, after controverting it as infringing upon her rights, finally acceded to its beneficial application to us, as compatible with those rights. But we, who made the compact with you, having now acquired the adverse rights of Spain, will not allow you the beneficial use of our own compact. We first swindled and then bullied Spain out of her rights, by this eighth article of the treaty of 1783; and now, having acquired ourselves those rights, we plead them for holding our engagement with you for a dead letter.

This, and nothing more or less than this, is the substance of Mr. Russell's argument to show that *perhaps* the United States were, by the acquisition of Louisiana, absolved from the obligation of the eighth article of the treaty of 1783, even before the war of 1812.

But, says Mr. Russell, the treaty of 1783 was made under a belief of both parties that it would leave Great Britain with a portion of territory upon the Mississippi, and *therefore* entitled to claim the right of navigating the river. But the boundary line of the treaty of 1783 was a line from the northwesternmost point of the Lake of the Woods, due west *to the Mississippi*. And after the treaty of 1783, but before the war of 1812, it had been found that a line due west from the northwest corner of the Lake of the Woods did not strike the Mississippi. Therefore, continues Mr. Russell, Great Britain could claim no *territorial* right to the navigation of the river; and therefore had no longer any claim to the benefit of the eighth article of the treaty of 1783.

To this it may be replied: First, that the British claim of right to navigate the Mississippi was not founded solely on the territory which it was believed they would retain upon that river, by the boundary west from the Lake of the Woods. The eighth article of the treaty of 1783 was a separate and distinct article, stipulating the right of both nations to navigate the river, without any reference to boundary or to territory. But the boundary, the territory, and the right to navigate the river, were all, in that treaty, cessions from Great Britain to the United States. And, had it even been the intention of both parties that Britain should cede the *whole* of her territories on the Mississippi, it was yet competent to her to reserve the right of navigating the river for her subjects, in common with the people of the United States; and competent for the United States to accept the cession, subject to that reservation. They did so, by the eighth article of the treaty. And, in this point of view, the British right of navigating the river within the American territory was precisely similar to the American liberty of fishing within the British territorial jurisdiction, reserved by the third article of the same treaty.

But, secondly, the discovery that a line due west from the northwesternmost corner of the Lake of the Woods would not strike the Mississippi, had *not* deprived Great Britain of all claim to territory upon that river, at the time of the negotiation at Ghent. The line described in the treaty was, from the northwesternmost point of the Lake of the Woods, "on a *due west* course to the river *Mississippi*." When it was found that a line *due west* did not touch the Mississippi, this boundary was annulled by the fact. It remained an unsettled boundary, to be adjusted by a new agreement. For this adjustment, the moral obligation of the parties was to adopt such a line as should approximate as near as possible to the intentions of both parties in agreeing upon the line for which it was to be substituted. For ascertaining this line, if the United States were entitled to the benefit of the words "on a due west course," Britain was equally entitled to the benefit of the words "to the river Mississippi." Both the demands stood on the same grounds. Before the war of 1812, three abortive attempts had been made by the parties to adjust this boundary. The first was by the treaty of 1794, when it was already conjectured, but not ascertained, that the line due west from the lake would not intersect the Mississippi. By the fourth article of the treaty of 1794, it was agreed that a joint survey should be made to ascertain the fact; and that if, on the result of that survey, it should appear that the west line would not intersect the river, the parties would proceed, "by amicable negotiation, to regulate the boundary line in that quarter, according to justice and mutual convenience, and in conformity to the intent of the treaty of 1783." This survey was never made. The second attempt to adjust the line was by the convention signed on the 12th of May, 1803, by Mr. King and Lord Hawkesbury; the fifth article of which, after reciting the same uncertainty whether a line drawn due west from the Lake of the Woods would intersect the Mississippi, provided that, instead of the said line, the boundary of the United States, in that quarter, should, and was declared to be, *the shortest line which could be drawn between the northwest point of the Lake of the Woods and the nearest source of the river Mississippi*. This convention not having been ratified, the third attempt at adjustment had been made in the negotiation of Mr. Monroe and Mr. Pinkney, of 1806 and 1807; at which an article had been proposed, and agreed to, that the line should be from the most northwestern point of the Lake of the Woods to the forty-ninth parallel of latitude; and from that point, due west, along and with the said parallel, *as far as the respective territories extend in that quarter*. And with that article was coupled another, as follows:

"It is agreed by the United States, that His Majesty's subjects shall have, at all times, free access from His Majesty's aforesaid territories, by land or inland navigation, into the aforesaid territories of the United States, to the river Mississippi, with the goods and effects of His Majesty's said subjects, in order to enjoy the benefit of the navigation of that river, as secured to them by the treaty of peace between His Majesty and the United States, and also by the third article of the treaty of amity, commerce, and navigation of 1794. And it is further agreed, that His Majesty's subjects shall, in like manner, and at all times, have free access to all the waters and rivers falling into the western side of the river Mississippi, and to the navigation of the said river."

This negotiation was suspended by a change of the British ministry, and was not afterwards resumed. But the following observations upon the two articles, contained in a letter from Mr. Madison to Messrs. Monroe and Pinkney, of the 30th July, 1807, show how far Mr. Jefferson, then President of the United States, had authorized those commissioners to accede to them:

"Access by land or inland navigation from the British territories, through the territory of the United States, to the river Mississippi, is not to be allowed to British subjects, with their goods or effects, unless such articles shall have paid all the duties, and be within all the custom-house regulations applicable to goods and effects of citizens of the United States. An access through the territory of the United States to the waters running into the *western side* of the Mississippi is, under no modification whatever, to be stipulated to British subjects."

Such, then, was the state of things, in relation to this interesting question, at the time when the war of 1812 broke out; and, at the negotiation of Ghent, the same question of boundary again occurred for adjustment. The right of the British to a line from the Lake of the Woods *to the Mississippi* had never been renounced; and at the last negotiation between the parties, four years after the United States had acquired Louisiana, and with it all the Spanish rights upon the Mississippi, the British Government, in assenting to take the forty-ninth parallel of latitude as a substitute for the line *to the Mississippi*, had expressly restipulated for the free navigation of the river, and free access to it from our territories: to both of which Messrs. Monroe and Pinkney had been explicitly authorized to accede.

Under this state of things, it had never been admitted by the British, nor could we maintain against them by argument even, that the Mississippi river was within our *exclusive* jurisdiction: for so long as they had a right by treaty to a line of boundary to that river, and consequently to territory upon it, they also had jurisdiction upon it;

nor, consequently, could the instructions of 15th April, 1813, had they even been still in full force, have restricted the American commissioners from making or receiving a proposition for continuing to the British the right of navigating the river, which they had enjoyed, without ever using it, from the time of the treaty of 1783, when the United States had received, by cession from them, the right of enjoying it jointly with them.

Bearing in mind this state of things, we are also to remember that, in the conference of 19th August, 1814, and in the letter of that date from the British to the American plenipotentiaries, (see Wait's State Papers, vol. 9, pp. 334, 338,) they had claimed a new northwestern boundary line from *Lake Superior* to the Mississippi, and the free navigation of that river. To this the American commissioners had answered, on the 24th of August, 1814: The undersigned perceive that the British Government "propose, without purpose specifically alleged, to draw the boundary line westward, not from the Lake of the Woods, *as it now is*, but from Lake Superior:" and they objected to it, as demanding a cession of territory.

The British plenipotentiaries, on the 4th September, 1814, replied:

"As the necessity for fixing some boundary for the northwestern frontier has been mutually acknowledged, a proposal for a discussion on that subject cannot be considered as a demand for a cession of territory, unless the United States are prepared to assert that there is no limit to their territories in that direction; and that, availing themselves of the geographical error upon which that part of the treaty of 1783 was formed, they will acknowledge no boundary whatever; then, unquestionably, any proposition to fix one, be it what it may, must be considered as demanding a large cession of territory from the United States.

"Is the American Government prepared to assert such an unlimited right, so contrary to the evident intention of the treaty itself? Or is His Majesty's Government to understand that the American plenipotentiaries are willing to acknowledge the boundary from the Lake of the Woods *to the Mississippi*, (the arrangement made by a convention in 1803, but not ratified,) as that by which their Government is ready to abide?

"The British plenipotentiaries are instructed to accept favorably such a proposition, or to discuss any other line of boundary which may be submitted for consideration."

I stop here for a moment to observe how instinctively, if the expression may be allowed, both the parties in this correspondence recur to the treaty of 1783, with a consciousness that it was yet in full force, as an appeal for either in support of its claims. The expression in the above American note applied to the boundary "as it now is;" the reference of the British note to the geographical error in the treaty of 1783, and their willingness to discuss the arrangement of 1803, (the shortest line from the Lake of the Woods to the Mississippi.) Both acknowledge the treaty of 1783 as the basis of all proposition and all argument, and as being yet in force for every thing which should not be otherwise provided for in the new treaty.

In their note of 21st October, 1814, the British commissioners said:

"On the subject of the fisheries, the undersigned expressed with so much frankness, at the conference already referred to, the views of their Government, that they consider any further observations on that topic as unnecessary at the present time.

"On the question of the boundary between the dominions of His Majesty and those of the United States, the undersigned are led to expect, from the discussion which this subject has already undergone, that the northwestern boundary, from the Lake of the Woods to the Mississippi, (the intended arrangement of 1803,) will be admitted without objection."

Thus stood the parties and the subject, when, on the 10th of November, 1814, the American plenipotentiaries sent the first projet of a treaty to the British commissioners. It contained no article relating either to the fisheries or to the Mississippi; but, in the note which accompanied it, to meet the notification twice given on the part of the British Government, that they did not intend to grant, without equivalent, the liberty of fishing within the British jurisdiction, the counter-notification, already noticed, was introduced, informing them that the American Government did not consider the fishing liberties as forfeited by the war, and that they would remain in full force, without needing any new grant to confirm them. At this stage of the negotiation, therefore, the American plenipotentiaries did actually pursue the first of those three *other* ways of proceeding, which Mr. Russell, in the postscript to the *original* of his letter of 11th February, 1815, says they might have taken, and to which he adds that he would have assented, namely: to contend for the continuance of the fishing privilege, notwithstanding the war, without saying any thing about the navigation of the Mississippi. It cannot but be surprising to find Mr. Russell, within three months after these events, writing privately to the Secretary of State, stating this as a course *other* than that which we had pursued, and that he would have assented to it if we had; when it was the very course that we did pursue, and he had assented to it. We did contend, not for the *indestructibility*, as Mr. Russell terms it, of the treaty of 1783; but that, from its peculiar character, it was not abrogated by the mere occurrence of war. We never maintained that the treaty of 1783 was indestructible or imperishable; but that the rights, liberties, and boundaries, acknowledged by it as belonging to us, were not abrogated by mere war. We never doubted, for example, that we might be compelled to stipulate a new boundary; but that would have been, not as a consequence of mere war, but the effect of conquest resulting from war. The difference between our principle and that of the British was, that they, considering the rights acknowledged as belonging to us by the treaty as mere *grants*, held them as annulled by war alone; while we, viewing them as rights existing before the treaty, and only acknowledged by it, could not admit them to be forfeited without our own assent. Britain might have recovered them by conquest; but that could not be consummated without our acquiescence, tacit or expressed. Mr. Russell, who assented to our principle, and asserted it with us, now says he always thought the British principle was the true one. If the American mission, at that trying time, had acted upon it, he never would have prophesied the convention of October, 1818.

The eighth article of the projet of a treaty, sent by the American commissioners on the 10th of November, offered the boundary which had been proposed in 1807, a line north or south to latitude 49°, and westward, on that parallel, as far as the territories of the two countries extended; and said nothing about the Mississippi. But when, on the 26th of November, the British plenipotentiaries returned the projet with their proposed amendments, they accepted the 49th parallel westward from the Lake of the Woods for the boundary, but with the following addition to the article: "And it is further agreed, the subjects of His Britannic Majesty shall at all times have access, from His Britannic Majesty's territories, by land or inland navigation, into the aforesaid territories of the United States to the river Mississippi, with their goods, effects, and merchandise; and that His Britannic Majesty's subjects shall have and enjoy the free navigation of the said river."

It was to meet this demand that, at the conference of the 1st of December, the American plenipotentiaries proposed to strike out all those words, and to substitute the amendment contained in the protocol of that conference, already communicated to Congress. It was thus that the relation which Mr. Russell, within three months afterwards, so singularly professes not to perceive between the fishing liberties and the Mississippi navigation, not only naturally arose, but forced itself upon the American plenipotentiaries. They had saved the fishing liberties from *surrender*, as they had been specially instructed to do, by asserting that the treaty of 1783 had not been abrogated *ipso facto* by the war. Two days before receiving this counter-projet, they had received from Washington a fresh

instruction, expressly authorizing them to conclude a treaty on the basis of the *status ante bellum*, including, of course, the fishing liberty on one side, and the navigation of the Mississippi on the other. They could not, therefore, consistently with those instructions, either reject this British demand, or abandon to surrender the fisheries. They offered, therefore, the amendment containing the renewed acknowledgment of both; and they said to the British plenipotentiaries: We have told you that we consider all the rights secured to us by the treaty of 1783 as still in force. What we demand, if you assent to it, we must yield in return. If, as we say, the treaty of 1783 is yet in force, you have the right of navigating the Mississippi, and we have the fishing rights and liberties unimpaired. If, as you say, the treaty is abrogated, how can you claim the right of navigating the Mississippi? You must admit the one, or not demand the other. We offer you the alternative of a new stipulated admission of both, or a total omission of both. We offer you, in application, the choice of our principle or of your own.

The British commissioners took the proposal for reference to their Government, by whom it was immediately rejected. But, to show how anxious they were to obtain from us the surrender of our fishing liberties, and how cheaply they valued the right of navigating the Mississippi, as one of the last expedients of negotiation they offered us an article, agreeing that, after the peace, the parties would further negotiate "respecting the terms, conditions, and regulations, under which the inhabitants of the United States" should again enjoy the fishing liberties, "*in consideration of a fair equivalent*, to be agreed upon between His Majesty and the said United States, and granted by the said United States for such liberty aforesaid;" and a reciprocal stipulation with regard to the British right of navigating the Mississippi. As the parties after the peace would have been just as competent further to negotiate on these points, if so disposed, without this article as with it, its only effect would have been a mutual *surrender*, on the American side, of the fishing liberties, and, on the British side, of the right to navigate the Mississippi; with this difference, that we should have surrendered, in direct violation of our instructions, a real, existing, practical liberty, which, even in the war of our independence, had been deemed of the highest importance, and at its close had been with infinite difficulty secured: a liberty, of which that portion of the Union whom it immediately concerns had been, from the time of the treaty of 1783, in the constant, real, and useful possession; while the British would have surrendered absolutely nothing—a right which, by inference from their own principle, was abrogated by the war; a right which, under the treaty of 1783, they had enjoyed for thirty years without ever using it; and which, in all human probability, never would have been of more beneficial use to the British nation, than would be, to the people of the United States, the right of navigating the Bridgewater canal or the Danube.

There was certainly an inconsistency, on the part of the British Government, in claiming a right to navigate the Mississippi, while asserting that the treaty of 1783 was abrogated by the war: and when pressed by us to say on what principle they claimed it without offering for it an equivalent, they said the equivalent was their acceptance of the forty-ninth parallel of latitude for the northwestern boundary, instead of the line to which they were entitled by the treaty of 1783—*to the Mississippi*. As they gave up the line to the river, they said they had a right to reserve its navigation, and access to it for that purpose. They had said the same thing to Messrs. Monroe and Pinkney in 1807; and the principle had been assented to by them, with the subsequent sanction of President Jefferson. Still, the whole argument leaned upon the continuing validity of the treaty of 1783; for the boundary line, as well as the Mississippi navigation, was null and void, if that treaty was abrogated. We replied to them, that, although we were willing to agree to the forty-ninth parallel of latitude for the boundary, and thought it of mutual interest that the line should be fixed, we were yet not tenacious of it: we could not agree to their article of mutual surrender, with a pledge of future negotiation; but we would consent to omit the boundary article itself, and leave the whole subject for future adjustment. And to this they finally agreed.

The advantage of this to us was, that we came out of the war without having *surrendered* the fishing liberties, as they had been enjoyed before, and stipulated at, the treaty of 1783. We were still free to maintain, and we did, after the conclusion of the peace, effectively maintain, the existence of the right, notwithstanding the intervening war. The British Government still insisted that the treaty of 1783 was abrogated by the war: but when called upon to show why then they treated the United States as an independent nation, and why, in the treaty of Ghent, they had agreed to four several commissions to ascertain boundaries, "according to the true intent and meaning of that same treaty of 1783," they finally answered, that they considered our independence, and the boundaries, as existing facts, like those of other nations, without reference to their origin. This left nothing but a dispute about words; for we applied the same principle to the fishing liberties of the third article, which they conceded with regard to the acknowledgment of independence and to the boundaries. They considered the whole treaty of 1783 as a British grant. We considered it as a British acknowledgment. They never drew the nice distinction, attempted by Mr. Russell, between a perishable and imperishable part of the treaty, or admitted that it consisted of rights which they could not, and of privileges which they could, resume without our consent. By their principle, they might have resumed the whole: and when they notified to us, at Ghent, that they did not intend to *grant* us again the fishing liberties within their exclusive jurisdiction, but that they meant to leave us the right of fishing in the open sea, they gave us distinctly enough to understand that they were treating us with magnanimity in not resuming the whole. There was, in truth, no difference in the principle; and Mr. Russell, in consulting his Vattel, to find that fishing rights were *jura meræ facultatis*, and therefore imprescriptible, ought to have seen what that writer very explicitly says—not that they were rights which could not be *acquired* by long usage, but rights which could not be *lost* by non-user. He ought also to have seen, what Vattel no less clearly lays down, that, although a nation may appropriate to itself a fishery upon its own coasts and within its own jurisdiction, yet, "if it has once acknowledged the common right of other nations to come and fish there, it can no longer exclude them from it; it has left that fishery in its primitive freedom, at least with respect to those who have been in possession of it." And he cites the herring fishery on the coast of England, as being common to them with other nations, because they had not appropriated it to themselves *from the beginning*.

In perusing the letter of Mr. Russell, whether original or duplicate, I cannot but reflect with gratitude to Providence upon the slender thread by which the rights of this nation to the fisheries were in fact suspended at the negotiation of Ghent. Positive and precise as our instructions were not to *surrender* them, if Mr. Russell had disclosed at Ghent the opinions avowed in either version of his letter; if he had so broadly asserted and so pertinaciously maintained his conviction of the utter worthlessness of the fisheries, in comparison with the exclusion of the British from a mere phantom of right to navigate the Mississippi, which they had always enjoyed without use, without benefit to themselves or injury to us; if he had so learnedly disserted to prove that the treaty of 1783 was totally and absolutely abrogated by the war; if he had so thoroughly inverted the real state of the question, and painted it in such glowing colors as a sacrifice of the deep, real interests of the West, to a shallow, imaginary interest of the East; if, with that perseverance which is the test of sincerity, he had refused to sign the proposal determined upon by the majority of his colleagues, and given them notice that he should transmit to his Government the vindication of himself and his motives for differing from them; and, above all, if another mind could have been found in the mission capable of concurring with him in those views, it would at least have required of the majority an inflexibility of fortitude, beyond that of any trial by which they were visited, to have persevered in their proposal. Had they concurred with him in his opinion of the total abrogation of the treaty of 1783, by the mere fact of the

war, the fisheries in the Gulf of St. Lawrence, on the coast of Labrador, and to an indefinite extent from the island of Newfoundland, were lost to the United States forever; or at least till the indignant energy of the nation should have recovered, by conquest, the rights thus surrendered to usurpation. In notifying to us that the British Government intended not to renew the grant of the fisheries within British jurisdiction, they had not said what extent they meant to give to these terms. They had said they did not mean to extend it to the right of the fisheries, generally, or *in the open seas*, enjoyed by all other nations. *(See letter of the American commissioners to the Secretary of State of the 12th August*, 1814. *Wait's State Papers, vol. 9, p. 321.)* But there was not wanting historical exposition of what Great Britain understood by her exclusive jurisdiction as applied to these fisheries. In the twelfth article of the treaty of Utrecht, by which Nova Scotia or Acadia had been ceded by France to Great Britain, the cession had been made "in such ample manner and form, that the subjects of the Most Christian King shall hereafter be excluded from all kind of fishing in the said seas, bays, and other places on the coast of Nova Scotia; that is to say, on those which lie towards the east, within THIRTY LEAGUES, beginning from the island commonly called Sable, inclusively, and thence along towards the southwest."

By the thirteenth article of the same treaty, French subjects were excluded from fishing on any other part of the coast of the island of Newfoundland than from Cape Bonavista northward, and thence westward to Point Riche. By the fifteenth article of the treaty of Utrecht, between Great Britain and Spain, certain rights of fishing *at* the island of Newfoundland had been reserved to the Guipuscoans, and other subjects of Spain; but in the eighteenth article of the treaty of peace between Great Britain and Spain, of 1763, His Catholic Majesty had desisted, "as well for himself as for his successors, from all pretension which he might have formed, in favor of the Guipuscoans and others his subjects, to the right of fishing IN THE NEIGHBORHOOD of the island of Newfoundland." In these several cases, it is apparent that Great Britain had asserted and maintained an exclusive and proprietary jurisdiction over the whole fishing grounds of the Grand Bank, as well as on the coast of North America, and in the Gulf of St. Lawrence. Nor are we without subsequent indications of what she would have considered as her exclusive jurisdiction, if a majority of the American commission at Ghent had been as ready, as Mr. Russell declares himself to have been, to subscribe to her doctrine, that all our fishing liberties had lost, by the war, every vestige of right; for, in the summer of 1815, the year after the conclusion of the peace, her armed vessels on the American coast warned all American fishing vessels not to approach within SIXTY MILES of the shores.

It was this incident which led to the negotiations which terminated in the convention of 20th October, 1818. In that instrument the United States have *renounced forever* that part of the fishing liberties which they had enjoyed, or claimed, in certain parts of the exclusive jurisdiction of British provinces, and within *three marine miles* of the shores. This privilege, without being of much use to our fishermen, had been found very inconvenient to the British; and, in return, we have acquired an enlarged liberty, both of fishing and drying fish, within the other parts of the British jurisdiction, *forever*. The first article of this convention affords a signal testimonial of the correctness of the principle assumed by the American plenipotentiaries at Ghent; for, by accepting the express renunciation by the United States of a small portion of the privilege in question, and by confirming and enlarging all the remainder of the privilege *forever*, the British Government have implicitly acknowledged that the liberties of the third article of the treaty of 1783 had *not* been abrogated by the war, and have given the final stroke to the opposite doctrine of Mr. Russell. That words of perpetuity, in a treaty, cannot give that character to the engagements it contains, is not indeed a new discovery in diplomatic history; but that truism has as little concern with this question, as the annulment of our treaty of 1778 with France, so aptly applied to it in his letter. It is not, therefore, the word *forever*, in this convention, which will secure to our fishermen, for all time, the liberties stipulated and recognised in it; but it was introduced by our negotiators, and admitted by those of Great Britain, as a warning that we shall never consider the liberties secured to us by it as abrogated by mere war. They may, if they please, in case of a war, consider the convention as abrogated, but the privileges as existing, without reference to their origin. But they and we, I trust, are forever admonished against the stratagem of demanding a surrender, in the form of notifying a forfeiture. They and we are aware, forever, that nothing but *our own renunciation* can deprive us of the right.

The second article of this same convention affords a demonstration equally decisive how utterly insignificant and worthless, in the estimation of the British Government, was this direfully dreaded navigation of the Mississippi. The article gives us the forty-ninth parallel of latitude for the boundary; and neither the navigation of the river, nor access to it, was even asked in return.

These are conclusive facts—facts appealing not to the prejudices or the jealousies, but to the sound sense and sober judgment of men. Without yielding at all to Mr. Russell in my "trust in God and the valor of the West," I have an equal trust in the same Divine Being as connected with the *justice* of the West. I have the most perfect and undoubting reliance that, to the clear-sighted intelligence of the western country, the gorgons, and hydras, and chimeras dire, of Mr. Russell's imagination, raised by incantation from the waters of the Mississippi, will sink as they rose, and be seen no more. Without professing to sacrifice any of those ties of duty and allegiance which bind me to the interest of my native State, I cannot allow Mr. Russell's claim to a special ardor for the welfare of the West to be superior to my own, or to that of the deceased or of the living colleague with whom I concurred, without mental reservation, in the measure subscribed to and denounced by Mr. Russell. We were all the ministers of the whole Union; and sure I am, that every member of the majority would have spurned with equal disdain the idea of sacrificing the interest of any one part of the Union to that of any other, and the uncandid purpose of awakening suspicions at the source of their common authority here against the patriotism and integrity of any one of his colleagues.

I shall conclude with a passing notice of the three alternatives, which, in the postscript to the original of his letter of 11th of February, 1815, he says we might have taken instead of that which, as he alleges, we, against his will, did do. "We had," says he, "three other ways of proceeding:

"1st. To contend for the indestructibility of the treaty of 1783; thence inferring the continuance of the fishing privilege, without saying any thing about the navigation of the Mississippi, which would have reserved our right of contesting this navigation on the grounds I have mentioned as specially applicable to it. 2. To have considered the treaty at an end, and to have offered a reasonable equivalent, *wherever it might be found*, for the fishing privilege. 3d. To have made this liberty a *sine quâ non* of peace, as embraced by the principle of *status ante bellum*.

"To either of these propositions" (he adds,) "I would have assented. But I could not consent to grant or revive the British right to the navigation of the Mississippi."

He could not consent! He did consent: see his name subscribed to the letter from the American to the British plenipotentiaries of 12th December, 1814—p. 44 of the message of 25th February last.

It is, indeed, painful to remark here, and throughout this letter of Mr. Russell, how little solicitude there is discoverable to preserve even the appearance of any coincidence between his real sentiments and his professions: half his letter is an argument in form to prove that the treaty of 1783 was abrogated by the war; yet he says he would have assented to contend for its *indestructibility*, so long as it applied only to the defence of the fisheries,

reserving his special grounds of objection to its being applied to the navigation of the Mississippi. I have shown that the indestructibility of the treaty of 1783 never was asserted by any of the American commissioners; but that the principle that it had not been abrogated by the war, and that none of the rights stipulated and recognised in it, as belonging to the people of the United States, could be abrogated, but by their own renunciation, was at first assumed in defence of the fisheries only, and without saying any thing of the Mississippi. When, therefore, the demand for the navigation of the Mississippi came from the British plenipotentiaries, Mr. Russell's special objections to the application of our principle, in favor of our demand, might have been urged. But what were these special objections? I have shown that they were our own wrong—fraud and extortion upon Spain, to justify perfidy to Great Britain. Mr. Russell never did allege these objections at Ghent: and, if he had, a majority of the American mission would assuredly have been ashamed to allege them to the British Government.

The second way of proceeding, to which Mr. Russell says he would have assented, was to consider the treaty of 1783 at an end, and offer for the fishing privilege a reasonable equivalent, *wherever it might be found.* And where would he have found it? He will not affirm that we had authority to offer any equivalent whatever; we had been specially instructed *not to surrender them.* He says he would have surrendered, and purchased them at a reasonable price again.

The third substitute, to which he says he would have assented, is the strangest of all. He says he would have made it a *sine quâ non* of peace, as embraced by the principle of *status ante bellum.*

A *sine quâ non* for the *status ante bellum!* And yet *he could not consent* to grant or revive the British right to the navigation of the Mississippi, in order to procure or preserve the fishing liberty; when the *status ante bellum* would have given them not only the whole treaty of 1783, but the permanent articles of the treaty of 1794; not only the navigation of the Mississippi, but unrestrained access to our territories and intercourse with our Indians.

I have shown that the most aggravated portion of Mr. Russell's charge against his colleagues of the majority—that of wilful violation of positive and unequivocal instructions, by a senseless offer to the British plenipotentiaries, sacrificing an important western to a trifling eastern interest—is not only utterly destitute of foundation, but that it was not even made; nay, more, that it was distinctly contradicted by the letter really written by Mr. Russell at Paris, on the 11th of February, 1815. Into Mr. Russell's motive for introducing it into the duplicate of that letter, delivered by himself at the Department of State, to be communicated to the House as the letter called for by their resolution, I shall not attempt to penetrate; having, as I trust, equally shown that the charges implied in the real letter are as groundless as their aggravations in the duplicate. The professions of unfeigned respect for the integrity, talents, and judgment of those colleagues whose conduct is, in the same letter, represented as so weak, absurd, and treacherous, I can, for my own part, neither accept nor reciprocate. To have been compelled to speak, as in these remarks I have done, of a person distinguished by the favor of his country, and with whom I had been associated in a service of high interest to this Union, has been among the most painful incidents of my life. In the defence of myself and my colleagues against imputations so groundless in themselves, at first so secretly set forth, and now so wantonly promulgated before the legislative assembly of the nation, it has been impossible entirely to separate the language of self-vindication from that of reproach. With Mr. Russell I can also rejoice that the proposal offered on the 1st of December, 1814, was rejected by the British Government; not because I believe it now, more than I did then, liable to any of the dangers and mischiefs so glaring in the vaticinations of Mr. Russell, but because both the interests to which it relates have since been adjusted in a manner still more satisfactory to the United States. I rejoice, too, that this adjustment has taken place before the publication of Mr. Russell's letter could have any possible influence in defeating or retarding it. The convention of 20th of October, 1818, is the refutation of all the doctrines of Mr. Russell's letter, to which there can be no reply. It has adjusted the fishing interest upon the principle asserted by the American mission at Ghent, but disclaimed by Mr. Russell. It has given us the boundary of latitude 49°, from the Lake of the Woods westward; and it has proved the total indifference of the British Government to the right of navigating the Mississippi, by their abandonment of their last claim to it, without asking an equivalent for its renunciation.

With regard to the magnitude of the fishing interest which was at stake during the negotiation at Ghent, I believe the views disclosed in Mr. Russell's letter as incorrect as the principles upon which he would have surrendered it. The notification of exclusion was from all fisheries within exclusive British jurisdiction. I have shown that, historically, Great Britain had asserted and maintained exclusive proprietary jurisdiction over the whole. Had we tamely acquiesced in her principle of forfeiture without renunciation, we should soon have found that her principle of exclusion embraced the whole. That a citizen of Massachusetts, acquainted with its colonial history, with the share that his countrymen had had in the *conquest* of a great part of these fisheries, with the deep and anxious interest in them taken by France, by Spain, by Great Britain, for centuries before the American revolution; acquainted with the negotiations of which they had been the knot, and the wars of which they had been the prize, between the three most powerful maritime nations of modern Europe; acquainted with the profound sensibility of the whole American Union, during the revolutionary war, to this interest, and with the inflexible energies by which it had been secured at its close; acquainted with the indissoluble links of attachment between it and the navigation, the navy, the maritime defence, the national spirit, and hardy enterprise of this great republic: that such a citizen, stimulated to the discharge of duty by a fresh instruction from his Government, given at the most trying period of the war, upon the very first rumor of an intention, on the part of Great Britain, to demand its surrender, *not to surrender it*—sooner to break off the negotiation than surrender it; that such a citizen, with the dying words of Lawrence, "Don't give up the ship," still vibrating on his ear, should describe this interest "as totally unnecessary for us for subsistence or occupation," and affording, "in no honest way, either commercial facility or political advantage," as "the doubtful accommodation of a few fishermen, annually decreasing in number," is as strange and unaccountable to me as that he should deliberately sit down, two months after the treaty was concluded, and write to his Government a cold-blooded dissertation to prove that there was nothing—absolutely nothing—in the principle upon which he and his colleagues had rested its future defence; and that he considered the fishing liberty "to be entirely at an end, without a new stipulation for its revival."

Such were not the sentiments of a majority of the American commissioners at Ghent; such were, particularly, not the sentiments of the writer of these remarks. He reflects, with extreme satisfaction, upon that deep and earnest regard for this interest manifested, at that time, by the Executive Government of the United States, in the positive and unqualified instruction of the 25th of June, 1814, to the commissioners, on no consideration whatever *to surrender the fisheries.* He rejoices that this instruction was implicitly obeyed; that the nation issued from the war with all its rights and liberties unimpaired, preserved as well from the artifices of diplomacy as from the force of preponderating power upon their element, the seas; and he trusts that the history of this transaction, in all its details, from the instruction *not to surrender the fisheries* to the conclusion of the convention of the 20th of October, 1818, will give solemn warning to the statesmen of this Union, in their conflicts with foreign Powers, through all future time, never to consider any of the liberties of this nation as abrogated by a war, or capable of being extinguished by any other agency than our own express renunciation.

JOHN QUINCY ADAMS.

MAY 3, 1822.

17th CONGRESS.] No. 529. [1st SESSION.

SLAVES IMPORTED BY AN INDIAN AGENT CONTRARY TO LAW.

COMMUNICATED TO THE SENATE, MAY 6, 1822.

To the Senate of the United States: WASHINGTON, *May* 6, 1822.

In compliance with a resolution of the Senate of the 26th of April, requesting the President of the United States "to communicate to the Senate the report of the Attorney General, relative to any persons (citizens of the United States) who have been charged with or suspected of introducing any slaves into the United States contrary to existing laws," I transmit, herewith, two reports from the Attorney General.

JAMES MONROE.

SIR: OFFICE OF THE ATTORNEY GENERAL U. S., *February* 2, 1820.

The slaves, to which Governor Clark alludes, having been imported prior to the act of 3d of March, 1819, do not fall within the sphere of the powers and duties assigned to the President by the first and second sections of this act. These slaves appear to have been introduced in the fall of 1817, or in the following winter; at which time, by the laws of the United States, they were subject to be disposed of by the laws of the several States. If they were not proceeded against under the State laws, I understand that proceedings may now be had against them under the fourth section of the act of Congress of March 3, 1819, which provides, "that when information shall be lodged with the attorney for the district of any State or Territory that any negro, &c. has been imported therein, *contrary to the provisions of the act* in such case made and provided, it shall be the duty of the attorney forthwith to commence a prosecution by information; and process will issue against the person charged with holding such negro, &c.; and if it shall be ascertained, by the verdict of a jury, that such negro, &c. has been brought in contrary to the true intent and meaning of the act, &c., then the court shall direct the marshal of the said district to take the said negro, &c. into his custody for safe-keeping, subject to the orders of the President," &c. I understand this section of the act of 1819 as applying to all negroes theretofore brought in against the provisions of any of the acts of Congress on the subject, who had not been disposed of previously by the State laws; and, consequently, that if these negroes are in this predicament, and are now in any State or Territory of the United States, proceeding may still be had against them under that section; but that the President has nothing to do with them until they shall, by the judgment of a court, be placed in the hands of the marshal, subject to the orders of the President; and that, when so placed in the marshal's hands, the President may order them, if he pleases, to the coast of Africa, under the spirit of the act in which this fourth section is found.

I think, also, that it is due both to the Government and General Mitchell that a prosecution should be instituted against him for the penalty given by the laws of the United States for the importation of slaves. Such a prosecution will give him an opportunity of acquitting himself, if innocent, and will inflict a just punishment on him, if guilty.

With respect to the propriety of submitting this case to Congress in their call for information as to the practices in evasion or violation of our slave laws, Governor Clark's communication appears to me to come directly within the object of the call, and, being derived from so respectable a source as the Governor of the State of Georgia, I cannot perceive with what propriety it can be withheld.

I have the honor, &c.

WM. WIRT.

The PRESIDENT OF THE UNITED STATES.

SIR: OFFICE OF THE ATTORNEY GENERAL U. S., *January* 21, 1821.

I proceeded on the 1st instant, according to appointment, to take up the case of General David B. Mitchell, the agent of the United States for Indian affairs at the Creek agency, under a charge from Governor Clark, of Georgia, that he was concerned in the unlawful importation of Africans, in breach of our laws, in the winter of 1817–'18; and have now the honor of reporting to you, according to your direction, my opinion both of the law and the facts of the case.

The only law of the United States which has any bearing on the conduct of General Mitchell is the act of Congress of the 2d of March, 1807, entitled "An act to prohibit the importation of slaves into any port *or place within the jurisdiction of the United States* from and after the 1st day of January, 1808." This act, after inflicting severe penalties on any who shall after that day import, or aid in importing, any negro, &c. to any port or place within the jurisdiction of the United States, with the view of selling them, or holding them to service or labor, proceeds to declare, among other things, in the fourth section, that "*neither the importer, nor any person or persons claiming from or under him, shall hold any right or title whatever to any negro, mulatto, or person of color, nor to the service or labor thereof, who may be imported or brought within the United States, or territories thereof*, in violation of this law; but the same shall remain subject to any regulations, not contravening the provisions of this act, which the Legislatures of the several States *or Territories* at any time *hereafter* may make for disposing of any such negro, mulatto, or person of color." This section of the act does not provide what shall be done with the persons thus imported, in case the Legislatures of the several States shall not *thereafter* have made any regulations for disposing of them; but the seventh section of the same act, after authorizing the seizures to be made by the armed vessels of the United States of any vessels with slaves on board that may be found hovering on the coast, and giving a moiety of the forfeiture to those who make the seizure, provides that, in order to entitle them to such moiety, the officers, &c. shall safely keep every negro, &c. found on board, &c., and shall deliver every such negro, &c. to such person or persons as shall be appointed by the respective States to receive the same; "*and if no such person or persons shall be appointed by the respective States, they shall deliver every such negro, &c. to the overseers of the poor of the port or place where such ship or vessel may be brought or found, and shall immediately transmit to the Governor or Chief Magistrate of the State an account of their proceedings, together with the number of such negroes, &c., and a descriptive list of the same, that he may give directions respecting such negroes*," &c. It is true that this directory provision is confined, in terms, to the *officers and men of the armed vessels of the United States* making seizures of slave vessels on the coast; yet, as it forms a part of the same act with the section before

in part quoted, and contains the only direction in the act as to what shall be done with negroes, &c. seized, where the State shall not by its laws have pointed out a person to receive them, it may be well considered as incorporated with the fourth section, as supplying its defects, and giving the rule of action in the analogous case of a seizure on land, so far as the direction could be carried into effect under the circumstances of such a case. For example, in the case of a seizure made in the Indian country, where no counties were yet organized, and where there were no overseers of the poor, that part of the direction which orders a delivery of the negroes to the overseers of the poor could not be carried into effect; but that part of it which requires an immediate report to the Governor of the State could have been carried into effect, and the direction ought *to be respected* as an expression of the purpose of Congress where the State had omitted to provide persons for the function in question. Yet this construction of the act is not so obvious or necessary as to attach guilt to any man who, having made a seizure by land, shall have omitted to adopt and act upon it. But the fourth section, taken by itself, and without any reference to the seventh, in divesting the importer of all title to the negroes, and subjecting them to be disposed of *according to the legal regulations of the State*, would seem very naturally to *advertise the seizer* that the Governor of the State, officially charged with the execution of the laws of the State, ought to be forthwith apprized of the seizure and its circumstances, that he might give direction respecting such negroes.

The act of Congress thus referring the disposal of slaves illicitly imported to the regulations which should *thereafter* be made by the Legislatures of the several States, leads us to inquire, in the next place, whether the Legislature of the State of Georgia, the theatre of the transactions under consideration, had made the regulations contemplated by the act of Congress.

The constitution of the State of Georgia of the year 1798 forbade the future importation of slaves from Africa or any foreign place after the 1st day of October following. There have been several prohibitory acts of the Legislature of that State, both before and since the act of Congress, under very severe penalties; some of them, enacted just before the occurrence under review, made the importation a penitentiary offence. But all these acts stopped at the infliction of the penalty, leaving the importer still in possession of the slaves. I can find no act of the Legislature of Georgia, in the volumes furnished from the Department of State, which connected itself with the act of Congress of 1807, by providing the regulations therein contemplated for the disposal of the negroes, &c. unlawfully introduced prior to the 19th December, 1817. On that day an act was passed "for disposing of any such negro, mulatto, or person of color, who has been, or may hereafter be, imported or brought into this State in violation of an act of the United States entitled "An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United States, from and after the 1st day of January, 1808." The first section of this act authorizes the Governor of the State "to appoint some fit and proper person to proceed to all such ports and places within this State, as have or may have held, or may hereafter hold, any such negroes, &c. as may have been, or hereafter may be seized or condemned under the above-recited act of Congress, and who may be subject to the control of this State; and the person so appointed shall have full power and authority to ask, demand, &c. all such negroes, &c., and to convey the same to Milledgeville, and place them under the immediate control of the Executive of this State." The second section of the act authorizes the Governor to make sale of such negroes, &c. in such manner as he may think best calculated for the interest of the State. The third section authorizes the Society of Colonization, &c. to anticipate the sale by a demand for the negroes, &c. to be transported to Africa, or any foreign place, on certain conditions, and requires the Governor to aid in promoting their benevolent views in such manner as he may deem expedient.

This act of the Legislature of Georgia has been objected to in its application to this case on several grounds:

1st. That the negroes, in the case under consideration, had been imported before the passage of the act.

The answer is, that the act expressly embraces previous importations.

2d. This feature of the act is objected to as *ex post facto*.

Answer. If the act inflicted any new penalty on the importer in a past case, or divested a previously vested right, the objection would be valid; but it inflicts no new penalty, and, indeed, no penalty whatever. It divests no previously vested right, because the act of Congress of 1807 had already declared that neither the importer, nor any one claiming under him, should hold any right or title whatsoever to negroes thus imported, nor to the service of them.

It is further objected, that the act of Georgia is inconsistent with the *policy* of the act of Congress.

The first answer to the objection is, that Congress, by the act of 1807, left it to the Legislatures of the States to make any regulations for disposing of any such negro, &c., not contravening the *provisions* of the act of Congress. Now, the act of Congress makes no *provision* as to the state or condition, whether of freedom or slavery, in which such negro should be left. It stops with divesting the importer, and those claiming under him, of all title; but the mode of disposing of the negroes, &c. is left, and properly left, to the absolute control of the State into whose bosom they have been illicitly imported: for it must have been considered that the State immediately affected by the importation was most capable of judging in what way the mischief could be best counteracted. Nor do I perceive that the act of Georgia can be justly charged with being inconsistent with the *policy* any more than with the *express provisions* of the act of Congress. The policy of the latter act was to prohibit the future importation of slaves. The means which it adopts for this purpose are the infliction of heavy penalties on the importer, and stripping him, and all claiming under him, of all title to the persons thus imported as slaves. If the State law was in conflict with either of these provisions, or instituted others calculated to encourage the importation, it would certainly be inconsistent both with the policy and provisions of the act of Congress. But the question as to the manner in which the negroes are to be disposed of, after they have been actually imported in violation of the law of Congress, is a question of self-defence, of self-preservation, which Congress submits entirely to the discretion of the State affected by it.

In further reply to the objection, it may be asked, what could the State do better than it has done? Should it have provided by law for exporting the persons thus introduced out of the United States and the territories thereof? Whither were they to be exported? There was, then, no place provided to which the State could send them. Should they have been turned loose as freemen in the State? The impolicy of such a course is too palpable to find an advocate in any one who is acquainted with the condition of the slaveholding States. Should they have been redelivered to the persons who had brought them in, under a bond to carry them out of the United States and out of the territories thereof? The inefficacy of such a measure has been set forth in a strong light in the several communications of General Mitchell, which are now before me; and I find myself unable to add a single illustration of the imbecility of such a course, in relation to the object of the act of Congress: I will barely suggest that, so far from aiding that object, it is among the happiest courses which could be devised to frustrate and defeat it.

I do not perceive that the act of Georgia is fairly liable to either of the objections which have been taken to it; nor do I perceive that the State could have adopted a better or a more liberal course (in relation to the slaves themselves) than the alternative regulations proposed by this act. If the Colonization Society would undertake to carry them out of the country to Africa, or any foreign place, the negroes were to be delivered to them for that purpose, and the Governor was required to aid in the execution of this benevolent purpose: if that society should

not apply, it remained for the State to look to its own safety, by placing them in that condition in which they would be the least likely to do mischief; and the State has done so, *according to their judgment;* to which alone they are remitted, by the act of Congress of 1807.

Before I leave the laws which bear on this subject, it is proper to advert to an act of the Legislature of Georgia, which was passed before Congress was authorized by the constitution to prohibit the importation of slaves; and to which I advert, not because it has, in my opinion, any fair relation to the question, according to the date, or the terms of the act, but because it has been assumed as an auxiliary guide in directing the conduct of General Mitchell in this case. I allude to the act of the Legislature of Georgia of the year 1796, entitled, "to organize the militia in the several new counties of this State;" by the third section of which it is enacted "that the officers of the militia in the first brigade, in the first division, shall be authorized and empowered, in their respective patrol districts, to apprehend any negro, mustee, or mulatto, freeman or freemen, slave or slaves, who shall hereafter arrive in any port of this State, from any of the West India or Bahama islands, and to keep such mustees, negroes, or mulattoes, in close and safe custody, until they can be examined before the corporation of Savannah, or any three justices of the peace for any of the counties lying in the said division, who are hereby authorized to cause such freeman or freemen, slave or slaves, to be exported at the expense of the importer or owner, which such importer or owner is hereby made liable for, as well as for the expense of apprehending or keeping such persons." I learn from the statements of General Mitchell, which are before me, that the officers of the first brigade, in the first division of the militia of Georgia, covered, in local residence, the whole extent of the seacoast of Georgia; and that this law, as its date and terms sufficiently indicate, was levelled at the brigands, whom the convulsions of St. Domingo had rendered objects of terror, not only in that island, but in all the neighboring countries.

That this act had no connexion with the act of Congress of 1807 is manifest from the following considerations, which, indeed, are so palpable that they scarcely require suggestion: 1st. That the act of Congress was certainly regarded by that body as the basis of a new system, to be reared under the federal constitution, for the prohibition of the whole slave trade, with which it was anticipated that the States would co-operate. Congress acted, as soon as it was at liberty to act, on this great subject; leaving much, however, to the future co-operation of the States to forward the grand object which they had in view: hence the language of the fourth section of the act of Congress of 1807, subjecting negroes imported in violation of it to such regulations as should be *thereafter* made by the several States. The State act under consideration was not *thereafter* made, but had passed more than ten years before the era of the prohibitory system under the constitution of the United States.

2d. The act of Congress of 1807 is an act universal in its operation against the importation of *all persons of color from Africa or elsewhere;* the State regulations, therefore, which it contemplated, were to be the regulations of commensurate extent: whereas, the act of Georgia under consideration grew out of a particular occasion; is confined in its terms to that occasion—to persons of color, imported or coming *from the West Indies and Bahama islands, exclusively;* and this act expired so completely with the transient events which produced it, that, I understand, it has been considered as obsolete for twenty years.

3d. It is to be further observed, that the *power to apprehend*, under this act of Georgia, is confined to the militia officers who covered the seacoast; and

4th. That the power to export is confined to the corporation of Savannah, or any three justices of the peace for the counties lying in the first division.

5th. That the exportation was to be, not out of the United States, or the territories thereof, but an exportation *simply out of the State of Georgia;* which, however, was to be at the expense of the importer or owner, "which such importer or owner was thereby expressly made liable for, as well as for the expense of apprehending and keeping such persons."

I think it perfectly clear that this act has no bearing on the case.

The results of this view of the law are—

1st. That, by the act of Congress of 1807, the importation of slaves from Africa or elsewhere into the United States, or any place within their jurisdiction, is prohibited under severe pecuniary penalties.

2d. That, by the same act, the importer, and all claiming under him, are declared to have no manner of title to the negroes imported, nor to their services.

3d. That, by the same act, it is left to the Legislatures of the States to regulate the manner in which the negroes thus imported are to be disposed of.

4th. That, by these two last provisions, it became the duty of every good citizen, who should be apprized of a breach of the law, to take prompt and immediate steps for the seizure of the negroes, and the information of the Governor of the State within which the seizure should be made, that he might give directions for disposing of the negroes.

5th. That the Legislature of Georgia had passed no act making the regulations contemplated by the law of Congress of 1807, until the act of the 19th December, 1817, before mentioned; to which act there is not, I conceive, any valid constitutional objection.

I come now to a much more difficult part of the subject—the facts of the case. The vast mass of documents, composed of affidavits, sometimes on notice, sometimes *ex parte;* of letters, hearsay statements, &c.; the irreconcilable contradictions among the witnesses; the host of certificates and affidavits, reciprocally assailing and supporting the character of these witnesses, render it next to an impossibility for me to come to an accurate conclusion on *all* the facts of the case. The great advantage of the trial of facts by a jury of a vicinage arises from their knowledge of the parties and their witnesses, and the opportunity they enjoy of observing the countenances and manners of those witnesses while delivering in their testimony *viva voce*. I have none of these advantages. I have no personal knowledge either of the accuser or the accused, or any one of the witnesses, on the one side or on the other; and have nothing to guide me but contradictory statements, or the statements made by the parties themselves. Since, however, it is your wish that I should proceed by the best lights that I have to express my opinion of the facts, I shall do so, with this consolation under this ungrateful duty: that if I shall, unwittingly, do injustice to the parties, or either of them, by the opinion I may form, the whole case will pass again under your own review, and the error can be corrected before it shall have inflicted a wound.

I will premise, however, that copies of the evidence originally sent on to the Departments of State and of War, composed, in part, of *ex parte* affidavits, letters, certificates, hearsay statements, &c., have been mutually furnished to the parties, with information that the evidence is not regular: this was done with the view to enable them to retake it more formally, if they should think proper to do so, and to give them an opportunity mutually to make such strictures as they pleased on the adversary proof. General Mitchell declines taking the proof over again, on two grounds: first, of the difficulty, if not impracticability, of taking it in better form, because of the dispersion of the witnesses, and the impossibility of commanding their attendance in this extrajudicial prodeeding, in which no process can issue to coerce them; and, secondly, because if Governor Clark, his accuser, wishes it, he can himself take the depositions of those witnesses (General Mitchell's) anew, and thus have all the benefit which he could have derived from an original cross-examination. These considerations appear to me to be just, and I believe it would

be in vain to wait in the hope of getting the testimony in better form. Taking the remarks of General Mitchell, therefore, as just, and giving them a reciprocal action, I shall consider the evidence on both sides as if all objections in regard to form were waived as to the original affidavits; noting as *ex parte* those only which have been since offered, so far as I can make the discrimination; and noting, also, as I state the documents, (through the whole of which we must necessarily travel,) any other legal objections which strike me to any reliance on them as proof.

It is proper to state, before I open these documents to you, that the questions which they seem to me to suggest for your consideration are these:

I. Has the conduct of General Mitchell, throughout this transaction, been consistent with our laws?

II. If inconsistent, is that inconsistency to be fairly and reasonably imputed to an innocent mistake of the laws, or to a wilful and conscious violation of them?

III. If the latter, what is the extent and character of his offence?

1st. Was he concerned as a partner in the original purchase and introduction of the Africans, either by the advance of money to aid in the purchase, or by an engagement to be responsible for a proportion of the capital to be advanced by the other partners; or by an engagement, in lieu of money, to render services by protecting the Africans at the agency, and facilitating their transfer to Alabama, or otherwise, for a proportion of the negroes, or any other part of the profits of the speculation?

2d. If there was no previous and specific arrangement as to time or terms, was there a previous general understanding between him and Bowen, or others, that if negroes should be brought to the agency, he would, for a reward, protect and give them a passport to the Alabama Territory, or place them in a situation to be sold?

3d. If there was no previous general understanding on the subject, did he, from improper motives, when the negroes were actually brought to the agency, connive at and aid in a breach of our laws, by protecting those negroes, and giving them a passport to Alabama?

I proceed now to the documents, and I shall first present those which appear to me to operate in support of the charge, and then those which go to repel it; interweaving, in the course of these statements, the remarks suggested by the parties, as well as those which occur to me as arising from them; and the objections to the documents themselves as proof.

In March, 1817, General Mitchell resigned the executive chair of the State of Georgia, and accepted the appointment of Indian agent at the Creek agency, as the successor of Colonel Hawkins; whereupon Captain John S. Thomas, a relation of General Mitchell by affinity, and Captain William S. Mitchell, the general's son, (both of whom are witnesses in this transaction,) went immediately to reside at the agency, and undertook to plant a small crop of corn for the agent. [See General Mitchell's letter to the Secretary of War, of date July 27, 1820.]

The salary of the office of a Governor of Georgia, at the time that General Mitchell resigned it, was $2,000 per annum. That of Indian agent at the same time was equal to that sum: but the Governor was elected for two years only; the agent was to hold during the pleasure of the President; that is, during good behavior. The salaries being equal, the inferior honor of the agency may be considered as fairly counterbalanced by its superior tenure; and I see nothing in this circumstance, in itself considered, to awaken just suspicion against a character previously fair. I make this remark, to exclude any inference from this step to the prejudice of General Mitchell.

Major JOHN LOVING states a conversation which he had with General Mitchell, to this effect: Loving informed the agent that he (Loving) was desirous of making a purchase of Africans at Amelia Island, or elsewhere, within the Floridas, provided the same could be done safely and legally. Upon these points the agent's opinion was requested; and he was further asked whether he would allow Africans to be introduced through the Indian country. The reply of the agent was, that he had been thinking of such purchase himself, and that Loving might bring any Africans whom he might purchase through the Indian country, with safety, *to the agency, where he* (the agent) *would protect them.* Loving having stated that he expected to make his residence at Fort Hawkins, the agent suggested that the negroes might be removed, if Loving wished it, to the reserve, where he (Mitchell) thought they might be disposed of to advantage. Their conversation then became more minute and detailed, and Loving was advised what route to travel. The witness says he took a memorandum of the route, but that, having lost or mislaid it, he cannot now trace all the points by which he was to pass; he recollects, however, that he was to start from Amelia Island, and *pass through the Creek country, by Barnard's, to the agency.*

THOMAS S. WOODWARD.—This is a statement not on oath, and the circumstances which it states are *hearsay* merely. The document, however, has been in the hands of General Mitchell, and has been the subject of some remarks by him, which will be noticed hereafter. Woodward states that some time, shortly after General Mitchell was appointed agent for Indian affairs, he (Woodward) was in company with Colonel Joseph Howard, a man of unblemished reputation, who asked the witness if he would go to East Florida or Amelia Island to purchase Africans. The witness replied that he did not wish to engage in a speculation of that sort, as the United States' laws and laws of Georgia did not tolerate such trade; and that, if he was willing to engage in such speculation, he had not the funds to commence with. Colonel Howard replied, that if the witness would go to that country, for that purpose, General D. B. Mitchell would furnish him with money, and draw a certain part of the profits, and that the negroes, if purchased, could be brought up through the Creek nation, by way of the agency, undiscovered, and then be disposed of to the best advantage; that this conversation occurred before the negroes were brought to the agency by Bowen. The witness adds to this statement, that while he was in Florida with General Jackson, Captain William S. Mitchell (I presume the agent's son before mentioned) stated to him that he had an aunt in the low country, that died and left him fifty negroes.

CHRISTIAN BREITHAUPT.—This is an *ex parte* affidavit, recently received, and which, therefore, General Mitchell has never seen. It is covered under a letter from Mr. Breithaupt to the Secretary of War, dated "Mount Vintage, South Carolina, 27th December, 1820;" on which the Secretary endorses, "I know Mr. Briethaupt well, and his statement is entitled to the fullest confidence." This witness states that in the month of August, 1817, a Mr. John Martin, who had made purchases for the deponent at the land sales held at Milledgeville, came to the deponent's house, in company with *Jared E. Groce;* that, in the course of the conversation, Groce congratulated the deponent on the great bargains he had got, and observed that he (Groce) knew, however, of a much better speculation, by which a fortune could be realized in a very short time; his words were, "it could be easily done with your means, and the services of a few such men as Martin." Deponent replied, that he supposed Groce to possess ample funds for the purpose. Groce answered in the negative, and said that *his connexion with the Erwins*, and *his settling in Alabama, together with his recent purchases*, had quite exhausted them, and that he was now upon borrowing: "but you (meaning the deponent) might, I know, procure the money, and *we* could do great business." The deponent then asked Groce what he had in view; that Groce appeared unwilling to disclose it, but, after a while, said to deponent, "Do you know what is carrying on in Amelia Island?" The deponent then answered that he could guess what he now meant by his speculations, to wit, the purchase of African negroes; that Groce smiled; the deponent then further observed, that an adventure of that nature was not only a violation of the laws, but also connected with great personal danger. To the latter, Groce replied, either that he knew of a plan, or that he could suggest one, by which

no danger was to be apprehended; the deponent thinks that the first was the expression made use of by Groce, and that the conversation here ended by the appearance of Mr. Martin or some other person.

This incident acquires significance and importance by the subsequent part of this case, and the prominent part which the same Jared E. Groce acted in it.

It is now proper, in the order of time, to introduce Captain William Bowen, the principal actor in this transaction. This gentleman had been for some time employed in the Indian Department by Colonel Hawkins, the immediate predecessor of General Mitchell, as we learn by General Mitchell's letter of the 25th December, 1817, to the Secretary of the Treasury. John S. Thomas says that he was well acquainted with Bowen. What had been the duration and extent of General Mitchell's previous acquaintance with him, we are not informed by General Mitchell; he does not speak of him, however, as a stranger. Captain Melvin, of the army, says, "How, or in what manner, Mr. Bowen was connected with the Creek agent, General Mitchell, it is not in my power to state; I have heard Mr. Bowen say that he had received, some time in 1817, ten thousand dollars from General Mitchell, for the purpose of purchasing goods for the Creek Indians; *goods said to amount to ten thousand dollars were distributed to the Creek Indians, at Fort Hawkins, some time in June or July*, 1817, *by the said Bowen.*" Thus far Captain Melvin; and General Mitchell, in his letter to the Secretary of War of the 27th of July, 1820, states, incidentally, that he had seen Bowen in the month of July, 1817.

In that same month (the same month in which Loving represents the conversation to have passed between General Mitchell and himself, and one month before the conversation between Groce and Breithaupt, in South Carolina,) Bowen says that he left Fort Hawkins, to visit his friends in South Carolina. Thence he passed to Augusta, (the residence of Andrew Erwin, the senior partner in the firm of Groce & Co., which Groce is the same *Jared E. Groce* just mentioned.) Thence Bowen passed to Savannah, the residence of James Erwin, the son of Andrew, and another member of the firm of Erwin, Groce, & Co. Here he learns, casually, that great speculations were to be made at Amelia Island, in sugar and coffee. Having been furnished with means, chiefly by the credit of James Erwin, to embark in those speculations, he proceeds to that island. Here he finds that the articles of sugar and coffee were higher than he expected, and he determines to return to the main. *By accident*, however, he is left by the vessel in which he had intended to embark; and, while he remains waiting for another conveyance, by another *casualty* (the arrival of a cargo of negroes in one of Commodore Aury's privateers) he is induced to change the subject of his speculation, and vests in the purchase of that cargo of negroes the funds which he had carried over to buy sugar and coffee. The negroes are delivered to him at a place agreed on, being about one hundred in number; he selects about sixty of the most prime and able ones, (having procured a place of lodging for the residue,) and sets out for the westward, following a small Indian trail leading from the direction of St. Augustine to Flint river, (which, according to the map, crosses that river at Barnard's.) He says that he became alarmed for the security of his property, and had determined to settle in West Florida. With this view he proceeds for fifteen days through the woods and wilderness, and strikes Flint river about sixty miles below the Creek agency, where he becomes alarmed again, by the intelligence of the Seminole war. He finds himself, moreover, pressed by the want of provisions—an event, it seems, not to have been anticipated in travelling through a wilderness with sixty Africans. In short, by the joint operation of alarm and famine, he is induced to carry the negroes to the Creek agency, where he arrives about the beginning of December; having travelled, by chance, over the exact route which Loving states General Mitchell to have indicated to him, so far as I can collect from the comparative descriptions.

In the facts that his original destination was West Florida, and that the resolution to carry them to the agency was, for the first time, taken at Flint river by the alarm and famine which pressed them at that point, Bowen is contradicted by one of the men hired to assist in the removal of the negroes. This witness states in his affidavit that, at the house of Charles Love, in East Florida, or close in the neighborhood of it, he found the negroes in possession of William Bowen and James Long; that he was employed by Long *to assist in carrying the negroes to the agency;* that they (Bowen, Long, and himself) with the negroes crossed the St. Mary's river at a ford called the Pine Log ford, and proceeded with the negroes *to the agency*, where they deposited the negroes at the lower end of General Mitchell's field, and where they built houses for the negroes, and put them to work: a step certainly not deficient in boldness, on the presumption that all this was done without any previous understanding with General Mitchell.

It seems that General Mitchell was not at the agency at the precise time of the arrival of these negroes, which is fixed by the witnesses at the first week in December. But he admits that he arrived at the agency on the 8th of that month, when he was informed of the arrival of the Africans; that he spent a night at the agency, and saw and conversed with Bowen on the subject. What was the nature of this conversation throughout, it will be more safe to learn from the acts of the parties than from their declarations. It was, certainly, not of a nature to excite any new alarm in the mind of Bowen, susceptible as he seems to have been of that emotion, nor to deter him from a repetition of the offence; for, having giving to Long five of the negroes as a reward for his assistance in carrying the gang to that place, he sets out to Amelia Island for the purpose of bringing on the residue of his purchase *to the agency:* a step which it is not in the nature of things to believe that he would have taken, unless he, at least, understood it to be authorized by General Mitchell. Bowen's statement, in his affidavit, is calculated to make the impression that the negroes, when purchased, were not delivered to him at Amelia Island, but somewhere on the main, and that, when he carried off the sixty before mentioned, the residue were left on the main. It seems, however, that they were in fact left on Amelia Island; and to Amelia Island he proceeded, taking with him, as assistants, the same John Oliphant already mentioned, and an Indian by the name of *Tobler.* They left Amelia Island with the last parcel of negroes, forty-two in number, and carried them up to St. Mary's river in a boat to Drummond's landing, in East Florida, where Bowen sold four of the negroes to Captain Drummond.

From this point it is understood that Bowen sent on the negroes by Tobler and Oliphant, not intending himself to accompany them any further, but to pass through the interior of Georgia, where he had business, and then to "proceed by way of Milledgeville and Fort Hawkins, to the agency, and meet the whole of the negroes." Before parting, however, with Tobler and his convoy, he addresses the following letter to General Mitchell, which was sent by Tobler:

DRUMMOND'S BLUFF, *December* 25, 1817.

I have got the balance of the stock that I had left on Amelia, (say forty-two,) and am just starting them under the care of Tobler. I believe I am narrowly watched, but think I have evaded discovery as yet. The risk of getting this lot through, I believe to be more—considerably more—than the first. A party was made up for the purpose of following me and Long, three days after we left St. Mary's river. Mr. Clark, the collector, was at his mills, and some person lodged information that they were gone up the river, and had crossed; he offered half to the inhabitants in that neighborhood to detect us. Since the people have learned that they would not have got any part for the detention of those last sent up, I am informed they are displeased with the collector for the imposition he endeavored to practise on them, in offering what he could not perform.

A detachment of soldiers has, for a month past, been stationed near Camp Pinckney, to guard the river and prevent smuggling.

On the 23d instant, the United States took possession of Amelia Island. I had left there on the 21st instant, but am informed they seized all the Africans they could find. There was a cargo of one hundred and sixty when I left the island, which had been run off to the main the night before the United States troops landed.

I cannot say how the other prize property fared. I go to Milledgeville *by Savannah*, and wish you to keep the negroes employed until I can come out to the agency.

I have directed Tobler to take charge of the horses and packs, &c., and to put the horses out in the cane swamp, and attend to them.

The channel through which Africans could be had being obstructed, they will rise considerably. Notwithstanding, excellent bargains could be had in the purchase of those that were run off to the main from Amelia.

I would make another purchase, but my other business is too much neglected to take the necessary time to accomplish the security of them.

Captain Thomas could have done well if he had come with me. Prime fellows were offered at Amelia at $250; ordinary, from $175 to $200.

I am, respectfully, your obedient servant,

WM. BOWEN.

Gen. D. B. MITCHELL, *Creek Agency*.

Besides this letter, Tobler was furnished with a bill of sale, purporting to have been executed on the 4th of December, 1817, at Camden county, in the State of Georgia, by one William Lane; by which, for the consideration of $12,600, Lane sold to Tobler, an Indian of the Creek nation, forty-two negroes, whose names are stated, and purporting to have been attested by William Drummond and John Smyth. Tobler was also instructed to claim the negroes as his own.

Shortly after Tobler and his party had separated from Bowen, they were met by two men, whose affidavits have been taken, and are in substance as follows:

LODOWICK ASHLEY states, that, about the 24th December, 1817, he set out from his residence for the low country, accompanied by Jason Brinson; that, on their way, about twelve miles this side of Trader's hill, (the affidavit being taken in Telfair county,) on St. Mary's river, on what is called Blackshear's road, on the 26th day of the same month, they met a white man by the name of Oliphant, and a Creek Indian called Tobler, who had with them upwards of forty negroes, which Tobler said belonged to him; that they proceeded on to the house of William Drummond, in East Florida, where they saw Bowen, and informed him that the negroes were taking a very hazardous route, as they would probably fall in with General Glasscock's army; upon which, Bowen offered to give the witness his choice of the negroes to go and assist in conducting them to Timothy Barnard's, or to the neighborhood of the agency. The witness observed that he should not like to be caught there with the negroes by General Mitchell; to which Bowen replied that he believed General Mitchell was his friend; and that, if the negroes were left or set down in the back part of the agent's field, it should entitle the witness to the negro before mentioned.

JASON BRINSON.—The affidavit of this witness supports that of Ashley in every material point: the final answer that he imputes to Bowen, for the purpose of overcoming Ashley's apprehensions of General Mitchell, is, "*that General Mitchell was his (Bowen's) friend.*" It is proper here to notice that Bowen has acknowledged the genuineness of the letter from Drummond's Bluff; and the manner of his acknowledgment is worthy of notice.

The original letter, having been lost by Tobler, came into the hands of Governor Clark, through the agency of one William Moore. On the 30th October, Governor Clark presented this letter to Bowen, in the presence of the three persons named in the margin,* and demanded to know of him whether the letter was his handwriting, and bore his signature? To which Bowen replied, "*It is useless for me to deny it, as my handwriting is so well known;*" which I understand to mean, "I would deny it, if I did not know that my handwriting could be so easily proved; but, since it can, it is useless for me to deny it." Governor Clark, however, considering the answer as evasive, pressed him by another interrogatory: "Are we to understand that you acknowledge this letter to be yours?" To which Bowen answered in the affirmative.

Bowen, in his affidavit, admits the correctness of the statement of his answers as given by the above-named witnesses; he states, also, that he was informed, at the time, that the object of the inquiry was not to injure him, but to ascertain General Mitchell's connexion in the affair; yet, anxious as he has since shown himself to repel the charge from General Mitchell, no solution of this incident then occurred to him to remove from that gentleman the suspicion which the letter was so well calculated to excite. Perceiving the bearing of the letter on General Mitchell, the confession of its genuineness is wrung from him with manifest reluctance; and he leaves it, for the present, to explain itself. The plausibility of the explanation which he afterwards offered will be considered in its proper place.

Before the arrival of the second parcel of negroes at the agency, and about the 20th December, 1817, Colonel Gideon Morgan, jun., of the State of Tennessee, being on his return home from Georgia, called at the agency, at the request of Andrew Erwin, of Augusta, for the purpose of inquiring, it seems, if there were any negroes there in which Mr. Erwin was interested, the said Andrew having been wholly ignorant of the previous operations of Bowen and his son James; and, if such should be found to be the fact, for the further purpose of removing the negroes to a place of more safety, or making such other disposition of them as *he* (Erwin, I presume,) thought most advantageous for the benefit of the purchasers. (Colonel Morgan's deposition is stated wholly in the first person; he never mentions himself in the third person; hence, I presume, that, by the relative *he*, in this sentence, Mr. Erwin is meant.) As Colonel Morgan's authority to act in the case, he was furnished by Mr. Erwin with a letter, in the name of Erwin, *Groce*, & Co., addressed to General Mitchell, which is annexed to Colonel Morgan's affidavit, and in which not a word is said of the negroes, or any intelligible allusion made to them. Colonel Morgan is there represented as "a gentleman of first-rate integrity, who visits Fort Hawkins and the *Alabama Territory on business.*" "Should he," says the letter, "have occasion for funds or any other services in your power, you will confer a singular favor on me by rendering him any service in your power. *We will accept his drafts at any sight for any sum he may think proper to draw on us for.*" Colonel Morgan, in passing Fort Hawkins, (which is understood as being about sixty miles from the agency,) fell in with General Gaines, from whom he received a letter of introduction to General Mitchell, couched in the following terms: "This will be handed to you by Colonel Gideon Morgan, who is desirous to travel the nearest and best route to the Cherokee nation. *He has applied to me for a passport;* instead of which, knowing him to be a man of sterling worth, I take the liberty to introduce him to you, and request you will be pleased to view him as my friend. Should he request a formal passport, I beg you will be pleased to give him one."

The character of Colonel Morgan is unimpeached. The hostility of General Gaines to these speculations meets us at every step. Yet here are the two letters which Colonel Morgan bore to the agency: that of Mr.

* S. Rochwell, Z. Lamar, and L. Atkinson.

Erwin, representing him as proceeding to *Alabama Territory* on business; and that of General Gaines, which represents him as requiring a guide and passport to travel by the nearest and best route to the *Cherokee nation.* Colonel Morgan, in his affidavit, represents himself as going home from Georgia to Tennessee, and as having called at the agency, at the request of Mr. Erwin, on the business before mentioned. That General Gaines took from Colonel Morgan himself his intended destination, is unquestionable; that his letter is merely such a one as the standing of Colonel Morgan justified, appears equally undeniable; and that General Gaines, so far from countenancing, counteracted this transaction in every stage of it, is so far from being denied by General Mitchell, that he seems to have been involved in a perpetual and rather irritated defence of himself against the charges of General Gaines, because of the suggestions of the latter gentleman, that he appeared either to be participating or conniving at this breach of our laws. I am at a loss, therefore, to apprehend the fairness of the following passage in a letter from General Mitchell to the Secretary of War, under date of the 3d of February, 1818: "The truth, however, is, that so far from the negroes having been brought here by speculators, they were claimed by gentlemen of respectability, *some of whom* came to me with letters of introduction from the general himself, couched in the strongest terms of friendship." The documents before me show no letters of introduction from General Gaines to the agent, save only in the single case of Colonel Morgan; and it does not appear that this gentleman claimed the negroes as his own.

That Colonel Morgan showed the letter of Andrew Erwin, in the name of Erwin, *Groce*, & Co., to General Mitchell, cannot be doubted, because it constituted (according to appearances, at least) the only authority which Colonel Morgan had to interfere with the negroes. Yet it is admitted by General Mitchell that he was willing to have delivered the negroes to Colonel Morgan. Colonel Morgan verifies the same fact. And it is very clear that neither bond nor security to carry them out of the United States was contemplated to be required of Colonel Morgan as the condition of their delivery. He finally declined, however, to have any thing to do with them; and why he did so, is very conceivable.

The engagement in the letter of Erwin, *Groce*, & Co. that *they* would pay *at any sight* the drafts of Colonel Morgan in favor of General Mitchell, *to any amount*, is certainly calculated to suggest inquiries which it would not be easy to answer satisfactorily. In a case, however, so pregnant with remark, it would be a work equally endless and useless to comment on every topic that presents itself.

The fact of the introduction of such a number of native Africans at the agency, the mysterious and clandestine manner in which they had been introduced, and the circumstance of their being fed and supported at the expense of the agent, and protected by his authority, were calculated to excite suspicion and inquiry, and did excite them. It became necessary for General Mitchell to take some step to remove these suspicions, and to vindicate to the Government his official purity; and both he and his assistants, Captain Thomas and Captain Mitchell, were soon heard to say that he had reported the negroes to the Government, with the view of taking their orders in the case. This report was a letter written by General Mitchell to the Secretary of the Treasury of the United States, of which an extract has been furnished by General Mitchell. It bears date on the 25th of December, 1817, the same day on which Bowen wrote his letter from Drummond's Bluff to General Mitchell, and consequently before the arrival of the second parcel of negroes at the agency. In this letter, General Mitchell says, "A certain Captain Bowen, who had been for some time employed by Colonel Hawkins in the Indian Department, is now engaged *with some mercantile houses in Augusta and Savannah*, and, as their agent, has purchased *somewhere on the St. Mary's* a SMALL parcel of African negroes, and during my absence carried them to the *neighborhood* of the agency, on their way *to the Alabama Territory.*" After commenting on the imperfection of the laws in restraint of the evil, he proceeds to say, "I told Captain Bowen I suspected him of being the importer; *upon which he immediately produced a bill of sale for them, duly executed in Camden county*, and solemnly affirmed that the bill of sale was made and executed *by the agent and part owner of a privateer, and were actually delivered to him in that part of Georgia.* Under these circumstances, I felt *I had no other course but to order him to carry them out of the United States;* and when I reflected upon the facility with which such an order could be evaded, by just carrying them over the Spanish line, and re-introducing them; and believing, too, that the negroes were actually intended for the use of the parties interested, *who, I have no doubt, are large land-holders on the Alabama* by purchase at the recent sales, and not for sale, I declined detaining them." After returning to the insufficiency of the laws, he proceeds: "My knowledge of the fact that the Government had determined to suppress the present proceedings at Amelia Island, and thereby prevent *the occurrence of* THE OFFENCE, *had* some weight with me in the present case. If, in your opinion, the subject-matter of this letter, or any part of it, be of sufficient importance to be presented for the consideration of the President or the Secretary of War, you may so use it; in which case, I shall hope for a communication of the opinion that may be formed of the facts stated, and for such instruction as may be thought proper for the government of my conduct;" that is, for the government of his conduct in any *future* case that might occur; for, as to the present case, the whole letter represents it as one which had been already disposed of. It could never, I think, be inferred, from the structure of this letter, that the negroes were yet at the agency. General Mitchell does not state what he *intended* to do, but what *he had actually done.* He says, indeed, that on his arrival at the agency, which was soon after the arrival of Captain Bowen and the negroes, he immediately ordered that they should not be removed *until he had time to look* into the subject; an order, by the by, which was wholly unnecessary, if the general's witness, Bowen, is to be believed. The general did then look into the subject; he states his reflections and recollections of the laws of Georgia and of the United States; the result of which was, to use his own words, "I felt that *I had* no other course but to order him to carry them out of the United States;" then, after stating some other considerations, he winds up the sentence by saying, "*I declined detaining them.*" Who could infer from this statement that the negroes were yet detained at the agency, and that Bowen, so far from having gone to carry them out of the United States, had, to General Mitchell's knowledge while he was writing this letter, gone back to the seaboard for another parcel to add to them? Yet such are the facts; and I am sorry to be obliged to add, that this letter, from its apparent want of ingenuousness, is calculated rather to thicken than to dispel the suspicions which antecedent facts had unavoidably excited.

This letter proves that General Mitchell, at the time of writing it, knew—

1st. That those *Africans* had been unlawfully brought into the United States, and that Bowen's tale of the purchase in Camden county, from the owner of a privateer who had brought them in, even if true, would not have altered the case. He must, consequently, have known that, under the act of Congress of 1807, neither Bowen, nor those for whom he acted, nor any person claiming under them, could have any right or title whatever to those negroes or to their services.

2d. That certain mercantile houses in Savannah and Augusta were interested in them; and, if Bowen had not previously informed him, the letter from Erwin, *Groce*, & Co. by Colonel Morgan, and the visit of that gentleman to the agency, could not have left him in ignorance of the fact that the house of Erwin, *Groce*, & Co. was one, at least, of those houses.

3d. He knew that these Africans were intended for *Alabama*, and to be settled on the lands of those gentlemen in that Territory.

4th. General Mitchell must have known that to carry them to Alabama was as clear a violation of the act of Congress as to carry them into any one of the United States; for General Mitchell is a man not only of uncommon intelligence and acuteness, but, as it appears by these documents, a lawyer by profession; and his talents, which are manifest, leave no doubt that he was a lawyer of distinction.

5th. That he had come to the conclusion to deliver them up to Bowen to be carried out of the United States, and this without any such bond as was afterwards required.

6th. That, under the exporting act of Georgia of 1796, *he* was not the person authorized to take the bond and act in the case, for this is his account of the mode of proceeding under that law: "The negroes are reported to *the Executive* of the State, with a view to their being sent out of the United States; to do this, *the Executive* orders them delivered to some one who will give bond, with security, for their exportation."

Not long after the date of this letter, and in the early part of January, 1818, Tobler and Oliphant arrived with the second parcel of the Africans; and, on the 28th of that month, General Mitchell delivered forty-seven of the negroes *to William Bowen and Jared E. Groce*, with the following passport:

CREEK AGENCY, *January* 28, 1818.

Captain William Bowen having brought to the Creek agency, some time since, forty-seven African negroes, which I had detained until time was afforded to inquire into *the circumstances of their transportation through the Creek nation;* and the said Bowen having *now* produced to me a bill of sale for the said negroes, duly executed in Camden county, Georgia, and *asserting* that the said negroes were purchased in that part of Georgia, and *intended for settlement in the Alabama Territory, and not for sale;* and, in order to remove all difficulty or cause of *further detention*, has this day entered into bond, with *Jared E. Groce* as his security, binding themselves to carry the said negroes out of the States:

I have therefore caused the said forty-seven negroes to be delivered to the said William Bowen and the said Jared E. Groce, *for the purpose aforesaid*, and, by these presents, grant them, or either of them, permission to proceed through such parts of the Creek nation as may be necessary, and *which they may find convenient*, in conveying the said negroes out of the United States.

D. B. MITCHELL, *Agent Indian Affairs.*

The bond is not among the documents; but it is a nullity, because General Mitchell had no authority, nor even the color of authority, to take such a bond; and, even if it had been a valid bond, the act of taking the negroes "out of the United States" into the Alabama *Territory* would have been no breach of its condition, if the terms of the bond comport with those of the passport. Indeed, I consider the passport, according to the fair and candid construction of its recital, to authorize, and to have been intended to authorize, a removal of the negroes to *the Alabama Territory*. It is proper here to state, that this step was not taken by General Mitchell on a vague recollection of the laws which related to the case; for, in his letter to Governor Rabun, of the 13th of February, 1818, he says that, *previous to doing it*, he examined the act of Congress and the laws of Georgia with some attention: the slightest attention to which, I should have supposed, would have convinced a man of ordinary mind that the whole proceeding was irregular and illegal.

It is worthy of remark, that forty-seven of the Africans only were delivered to Bowen and Groce, (or rather to Groce, for Bowen did not proceed with them towards the Alabama,) leaving still at the agency the forty-two brought by Tobler: if, to this latter number, you add the five which had been delivered to Long, and carried away by him, as before stated, you will perceive that just one-half of the whole number that had been brought to the agency were now carried away by Groce. Connect this fact with another, stated by Andrew Erwin on his cross-examination, that, when his son advanced to Bowen the funds which were invested in the purchase of those Africans, "he has been informed by James Erwin that he had received from Bowen *individual notes for about half of the amount*," and you have the interest of Erwin, Groce, & Co. fixed at one-half the number of the Africans: thus coinciding with the number taken away by Groce. *Whose these individual notes were*, we are not informed; James Erwin says nothing about them, and Andrew says no more than I have quoted.

It is proper here to call your attention to other documents which bear on the question of General Mitchell's interest in those negroes.

JOHN LAMBERT.—This witness states that he was in the employment of General Mitchell, at the agency, as a gardener, from March, 1817, to the latter part of December of the same year; he states the arrival of the Africans; he does not know who owned them, but he fed them with General Mitchell's provisions, by order of Captain Mitchell (the son.) He further states that he understood from General Mitchell, Captain Mitchell, Doctor Long, William Bowen, and others, that there was a division made of said negroes among them, and a part of which was said to be General Mitchell's; which part was distinguished from the others by a piece of yellow ferret or tape tied in their hair, and were sent to one Michael Elliott's, about two miles from the agency, and afterwards returned back to the agency, and there remained when the deponent left the place.

JOHN OLIPHANT.—This is the same witness and the same affidavit before adverted to in relation to another point. He states that General Mitchell and Captain Bowen frequently came to see the negroes after the second drove arrived; that, some time after, the witness discovered that thirty or thirty-five of said negroes had a red flannel string tied around their wrists, which, the witness understood, was to distinguish General Mitchell's from Mr. Bowen's; that, some time after this, a gentleman they called Mr. Groce came and took away those that had not the red string on: these remained, and were kept at work on General Mitchell's plantation until they were taken by McQueen McIntosh, &c.

You will observe that these witnesses cannot be referring to the same designation. The occurrence to which Lambert refers must have taken place before the arrival of the second parcel of negroes; that of Oliphant, afterwards; besides, the color of the badge and the mode of wearing it are different.

Oliphant further states, "that Mr. Bowen paid him for all his services in bringing the negroes to the agency, and that General Mitchell paid him for his attention in taking care of them and issuing to them their provisions."

HENRY WALKER.—This is an extract of a letter from Mr. Walker to Governor Clark, and, consequently, is not such evidence as would be received in a court of law.

I do not observe that this paper has been in the hands of General Mitchell; and, to crown all its imperfections, the facts which it professes to state are hearsay merely. The character of the writer, however, is sustained by gentlemen high in office; and as the document will necessarily pass under your eyes, it is within the sphere of the duty which I understand to be assigned to me to notice it in this report, intended only for your use.

The letter is dated 7th of June, 1820, and the writer states that he understands General Mitchell intends taking, or has already taken, the testimony of certain persons in the Creek nation, to exculpate himself from the charge which

is now exhibited against him; and, in order that Governor Clark might have an opportunity of availing himself of evidence in the same place, he thinks proper to make the communication. He then states as follows:

"Whilst I was at the late talk on the Chattahoochie, I held a conversation with Mr. Doyle, marshal of the nation, on the subject of the African business, in which he informed me that the accusation against General Mitchell was, to his knowledge, true; and that the money which the Creeks ought to have received through the agent was paid by the agent for the Africans.

"General McIntosh and Doyle have both informed me that the agent solicited them to buy the negroes whilst they were stationed at the agency; that they refused to do it unless he would make titles; *he* said *he* would not do it *himself*, but that *Captain Bowen would*."

McQueen McIntosh, the surveyor of the district of Brunswick and port of Darien, in Georgia, having been informed that these Africans were at the agency, proceeded to that place with a view of seizing them. He arrived four days after Groce had set out with his gang; pursued, and overtook them about *twenty miles to the westward of Fort Mitchell, on the road to the Alabama Territory*. Groce claimed the negroes as his, and was, thereupon, made a prisoner by McIntosh.

On his way back to the agency, he was deserted by a man of the name of Langham, who had promised to assist him as an escort, but who perfidiously hurried on to the agency for the purpose of giving notice of McIntosh's approach and intention, and enabling those who had charge of the negroes there to put them out of the way. Several days previous to McIntosh's arrival, Captain Melvin, of the fourth infantry, states that he had observed fifteen of the Africans (the choicest of those brought to the agency by Bowen) building huts and clearing land at the agency, the plantation of General Mitchell; on the night of McIntosh's return to the agency, these fifteen were removed and secreted in the woods by William B. Mitchell, the assistant agent. McIntosh states that Captain Melvin accompanied him to the negro houses of General Mitchell, about one mile and a half from the residence of the agent, where they found fifteen Africans which, from the severity of the cold, were suffered by him to remain in those houses; that, on their return to the agency, he informed Captain Mitchell of the seizure of the fifteen Africans, who replied that *it was well*. Captain Mitchell, at that time, gave no other information of any other Africans. On their return to the negro houses next morning for the fifteen Africans who had been seized the evening before, they received information, *from the negroes*, that General Mitchell's overseer had the night before supplied a great many Africans with provisions, and taken them into the woods; that Captain Melvin and himself fell upon their trail, *and found about fifteen in the woods*, who tried to make their escape, but were apprehended, and the whole thirty were brought to the agency; Captain Mitchell then delivered up eleven small Africans (children, I presume) from the huts in the yard. Captain Mitchell also followed McIntosh, after he had proceeded about a mile and a half from the agency, on his return to Georgia, stating that he had left two or three more of the Africans behind, and that if he would send back for them they should be delivered; which McIntosh declined.

McIntosh further states, that the whole number of Africans seized at the agency was forty-one instead of fifteen, the number reported to him by Colonel Brearley, which last was the number given to the colonel by the agent. That Colonel Brearley also informed him that General Mitchell claimed a portion of the Africans that had been left at the agency. The negroes thus seized by McQueen McIntosh were carried and delivered to the collector of the port of Darien, and some proceedings seem to have been had against them in the courts at Savannah; of what kind I cannot state, no copy of the record having been furnished to me.

William Moore's *affidavit and letters*.—If this witness is to be believed, there is an end to this question; the guilt of General Mitchell is placed beyond doubt. This man was a public blacksmith at the agency, and seems to have been (at least it may be believed) of some trust and confidence there. He states that, having been requested by Captain Mitchell, the son, to search the general's desk for some letters from Arbuthnot, which the general was anxious to bring to the city of Washington, he found, in his search, two letters from Bowen to General Mitchell; of which, under a sense of public duty, he made copies and handed them to Governor Clark. He swears that the originals were in the handwriting of William Bowen, and he believes are now in the possession of General Mitchell, if not destroyed by him, or some other person at his request. These letters are as follows:

Milledgeville, *March* 7, 1818.

Mr. Groce arrived here last evening on his way to the Alabama, and leaves this morning by the upper route. I am happy to state that Mr. Groce has succeeded in bridling his tongue, in some measure; he appears sensible of the importance of being less communicative to the inquisitive. He averred to me last night, by many protestations, that he never will, in any court, divulge any thing to the prejudice of any party; and further states that he would go to all lengths to serve any of the party concerned, and requested me to name to you his wish that you would signify your belief that he was not concerned in the introduction. From the very eccentric character of Mr. Groce, it would probably be well to indulge him in this particular; as I fear nothing but from his apparent anxiety to convince the public by explanations of his innocence. A letter from you stating to him your belief that he was merely a bondsman for the removal of the ——— would satisfy him. He states that if the party will justify him, he will not stop at any thing [in] the justification of the others. Mr. Andrew or James Erwin will be here this day, and I shall be able to hear on what footing the affair stands in Savannah. I cannot understand Mr. Groce's explanation any more than if he were speaking Congo. However, I have it from Mr. Groce that he has employed Mr. W. S. Bullock for an advocate. Mr. Groce presented himself to the district attorney, and has been released with a certificate that libel has been lodged against him for the illegal introduction of slaves.

I learned yesterday that the Governor has received a letter from the district attorney, informing him that the negroes would be libelled on the part of the United States. It seems that the Governor has written to the collector at Darien, wishing to know his opinion of the propriety of having the * * * libelled in behalf of the State of Georgia, or letting them be libelled by McIntosh in behalf of the United States; the collector informed him it was his opinion that the best method, for the present, was to libel in behalf of the United States, prosecute Mr. Groce, and force him into explanation of other discoveries. This I have mentioned to Mr. Groce, who swears that a court shall never draw from him any thing detrimental to the character or interest of any one whatever.

I find that it will be most prudent to humor the capricious notions of that consummate fool, to secure, or rather prove, his silence on the affairs.

I have never dreaded any thing but his imprudence; however, I hope he will now stick to what he has promised.

I am, very respectfully, your obedient servant,

WILLIAM BOWEN.

Gen. D. B. Mitchell, *Creek Agency*.

Milledgeville, *March* 23, 1818.

I wrote you last mail respecting the bills of sale, and for your opinion of the best probable means of conducting the affair. I have procrastinated my departure to Savannah to hear from you. It appears to me best that the last

parcel should be claimed by me from a right of purchase from Tobler; his right could be made from a purchase in Camden county, or from East Florida, as the case may be thought most safe: in the case of Tobler's claim, if he does not claim from a purchase in Camden, they cannot prove that they ever were in the State of Georgia.

Captain Thomas speaks of going to Savannah with me; and if I can get the whole on board, I can make some apparent arrangement with him for the twenty-eight of yours. I should be very glad to hear from you as soon as possible, and, if no immediate chance offers, perhaps Brady could come in again, and bear your advice. Several of the attorneys who have attended court here have expressed their opinions that the property could not be lost, nor be kept from me. Very little is said of the matter at all, and it seems to have died away since your publication.

I remain, with much regard, your most obedient servant,

W. BOWEN.

Gen. D. B. MITCHELL, *Creek Agency.*

It is only necessary to add to these letters, at present, that the character of Moore is supported by a host of witnesses, some of whom hold the most respectable offices in the State, and, among the rest, by Governor Clark himself; while, on the other hand, he is represented as among the basest of characters; and affidavits have been taken to support the representation, which will be hereafter referred to.

Thus far the circumstances which appear to me as going to support the accusation.

I turn now to the evidence in defence; and, as explanatory of it, will give an epitome of General Mitchell's several communications on the subject, for the purpose of showing what he admits and what he denies, and, consequently, the points to which his evidence is applied. As I proceed with this analysis, I propose, in order to prevent the necessity of returning to these communications again, to suggest any circumstances which strike me as inconsistent with the claim of entire innocence on the part of the agent.

I have already presented the substance of the agent's communication of the 25th December, 1817, and noted my objections to it.

The next communication of the agent is a letter to the Secretary of War, under date from the Creek agency, the 3d February, 1818, and, consequently, written before McIntosh's seizure of the negroes, but after the parcel under Groce had left the agency. In this letter the agent enters into a defence against several accusations which had been lodged against him by General Gaines with the Governor of Georgia, and which had been published in the Milledgeville Gazette, of the 27th January, 1818. Among others, he takes up the subject of the Africans thus: "As to the African negroes, of which the general speaks, I have already communicated the facts in relation to them to the Secretary of the Treasury."

This alludes to the letter of the 25th December, on which I have already commented, and which I think it manifest did not contain a communication of the facts. Among other things, the letter was written before the arrival of the second parcel of negroes; and this, being a new fact, having occurred since the date of that letter, but before the date of this which we are now examining, ought to have found a place in this. Let us see if it does. The letter proceeds, "and, in addition to that communication, *have now only to add*, that after I had made that communication, and *on the most mature reflection and consideration of the act of Congress, and the law of Georgia, I deemed it best to require the party claiming the negroes, before I permitted their removal, to give bond and security to carry them out of the United States; because that is the course pursued under the law of Georgia, and appeared to me to be the proper course.*"

There is nothing here, you perceive, of the parcel which had arrived after the communication to the Secretary of the Treasury.

There is nothing said of the forty odd negroes which yet remained; but the statement is calculated (like that to the Secretary of the Treasury) to convey the idea that all the negroes which had arrived at the agency at the time of its date had been sent off out of the United States, and the sequel of the statement tends to confirm this idea. The letter proceeds: "*The scarcity of provisions* at this place made their detention extremely inconvenient, *and hence I became anxious for their removal;* otherwise, I should have delayed acting in the case until I had received the orders of Government. The negroes having been here, however, and my taking no care to explain their situation to every one I saw, left room for conjecture; and the general sees in this case an organized system of opposition to himself, and consequently to the public service. The truth, however, is, that so far from these negroes having been brought here by speculators, they were claimed by gentlemen of respectability, some of whom came to me with letters of introduction from the general himself, couched in the strongest terms of friendship. I do not know that the general was apprized of the object for which those gentlemen visited the agency, but I mention the fact for two reasons: first, to show that the general is entirely in error when he asserts that negroes have been recently carried to the agency by speculators, by whom a spirit of opposition is excited to his measures, injurious to the public service; and, secondly, *because it is my desire that you should know every material fact which takes place here;* and *the fact* in this case really is, that the negroes, it appears, are the property of some respectable gentlemen, purchased by an agent for their use, and not one of them for sale, and *were intended for settlement on the Alabama, but will now, I am confident, be carried beyond the limits of the United States.*"

This is the whole of the agent's letter of the 3d February which relates to this case, and on which I think it my duty to remark:

1st. That the *scarcity of provisions* is a new motive for permitting the departure of the negroes, which finds no place in the agent's letter of the 25th December;

2d That the course of proceeding under the law of Georgia, as described in this letter, is radically different from the account given of it in the letter of the 25th December. In this last-mentioned letter the course is represented to be, "to report the negroes to *the Executive of the State;* the *Executive* then gives the order for their exportation, and takes the bond," &c.

3d. That every consideration urged for permitting the departure of the negroes applies to them *all;* and the letter gives the impression that *all* had gone, which is a material variance from the facts of the case.

4th. That the general here expresses his confident belief that the negroes, although originally intended for Alabama, would now be carried out of the United States: the fair meaning of which is, that they would not be carried to Alabama, while his passport authorized them to be carried to that Territory.

But the great objection to the communication is, that it omits to state the material facts which had occurred since the date of the letter of the 25th December, and before the date of the letter under consideration, to wit, the arrival of the second parcel of Africans, under the direction of Bowen; and this, too, after he had had an interview with Bowen on the arrival of the first parcel; and, secondly, the fact that, at the date of the last letter, nearly one-half of the Africans still remained at the agency. It is difficult to conceive that General Mitchell was not aware that these were among the most suspicious facts in the case. They ought, therefore, to have been promptly and frankly stated and accounted for. The total omission to notice them, and, what is worse, the giving an aspect to the case, in both these communications, calculated to keep them out of view, and to make an erroneous impression on the Government as to the true state of the case, is, to say the least of it, extremely unfortunate.

Will it be said that, although General Mitchell, in stating, in this last letter, the exportation of these people, uses and repeats the terms "the negroes," which are equally applicable to them all, yet, inasmuch as he refers to his letter of the 25th of December to the Secretary of the Treasury, he must be considered as alluding to the negroes therein mentioned? The answer is, that even if this were a fair view of the case, (which it certainly is not,) General Mitchell was then bound to state, as a new and substantive set of facts, the arrival of the second parcel, the detention of that parcel, and the reason which existed for the discrimination he had made. Charity, and even credulity, cannot suppose that he thought these immaterial facts, more especially after the sample he has given us of what he thought *material* in relation to the respectable gentleman who had come to claim these negroes bringing letters of introduction from General Gaines.

The next communication is to the Secretary of War, and bears date, Creek agency, 18th February, 1818. In this letter he gives a very acrimonious account of the proceedings of Mr. McIntosh and Captain Melvin, and says that, if they had seized only those which had been given up on bond and security, under the impression of that being an unauthorized proceeding, he should not have complained, although he should have conceived their conduct unwarrantable: "but to seize by force those in my possession, *regularly reported to the Government, and the commanding officer (Colonel Brearley) duly notified of the fact*, and even of the fact, too, of the official opinion of the district attorney being required in the case, and assured by me that they should not be removed upon any terms until that opinion was received, *or the Government should order the course to be taken*, I can find no apology for their conduct."

This is the first official intimation from the agent of the fact that any portion of the negroes had been detained at the agency; yet he speaks of them as having been *regularly reported to the Government.* I should have thought, from the statement, that some communication had been made by the agent to the Government, other than those that I have already brought to your view, were it not that he himself, in his letters to the Secretary of War, of the 25th March, 1818, and 27th July, 1820, refers to all the communications which he had made to the Government on this subject, and notices none other of prior date to this under consideration, save only his letters of the 25th December, 1817, to the Secretary of the Treasury, and of the 3d February, 1818, to the Secretary of War; and in neither of these, as I have shown, is there any communication of the fact *that any negroes had been detained at the agency.* That he alludes in this statement to his letter of the 25th December, 1817, as constituting the regular report to the Government, I collect from the assertion which accompanies it—"and the commanding officer duly notified of the fact." The commanding officer was Colonel Brearley; and General Mitchell has proved by his son, Captain Mitchell, that on the 20th or 21st of the month of December, 1817, the general returned to Georgia, accompanied by Captain Thomas and the witness, to spend Christmas with his family: that at Fort Hawkins he fell in with Colonel Brearley, whom the agent informed of the Africans being at the agency, and of *his intention to detain them, and report the case* to the Government; and the witness adds, that he knows a letter was written to the Secretary of the Treasury on *Christmas day*, reporting the negroes, and that he had since seen the Secretary's answer. The letter of the 25th December, then, is the letter relied on to authorize the assertion that the negroes detained at the agency had been regularly reported to the Government; whereas, this letter states that *he had not detained them*, but had ordered Bowen to carry them out of the United States. Besides, the letter of the 25th December could not possibly have had any allusion to the negroes which had been detained; for their arrival at the agency occurred after the date of that letter; the letter expressly related to the negroes brought thither by Bowen himself, and for which *he then showed a bill of sale to himself.* This was the parcel, according to the description in the passport, which had been delivered to Groce; whereas the last parcel, and consequently that which was detained, was covered by a bill of sale to Tobler, the Indian. This representation of General Mitchell, that he had reported to the Government the negroes detained at the agency at the time of McIntosh's seizure, is so boldly made, when he must have known, or at least supposed, that his communications were here to confront him, that charity might have imputed the statement to a want of recollection, but for the discovery of the fact that the general keeps copies of his correspondence. In relation to his letter of the 25th December, I have nothing before me except the extract furnished by himself, the original having been misplaced; so that if it contained any thing beyond this extract which would have justified the statement in question, (and which extract was furnished to the Department of War, for the information of that Department as to what the general had done,) the omission to insert it is unfortunate. It is not conceivable, however, that this is the case.

Before I leave this letter of the 18th February, it is proper to remark, that although we have it here officially announced for the first time that a part of the negroes had been delivered up on bond to Groce, and the residue detained at the agency, no reason is yet given for the discrimination; much less is any thing said of the fact of their having been introduced in separate parcels, and the last parcel after the agent had had an interview with Bowen.

"It is now insinuated," says General Mitchell, in this letter, "as an excuse for this flagrant contempt, that I am interested in the negroes; and as evidence of the fact, that I have fed them and had them at work; and that, whilst on their way to this place, they were seen by some one in the possession of Indians, who said they were taking them to the agency, and a variety of other surmises equally futile."

This word *surmises* is loosely used in this place; for the circumstances of feeding them, and having some of them at work, together with the acts of distributing articles of clothing among them, and administering medicine to the sick, are immediately admitted by the general himself; and as to the fact of their being met in the possession of an Indian, who was bringing them to the agency, under the superior authority of Bowen, and who, in fact, did bring them there, it is in proof, and is not controverted. These were not *surmises*, therefore, but *facts;* and yet facts which of themselves (so far as feeding, &c. go) are futile, as to fixing any degree of guilt on General Mitchell. The most innocent and honorable man, on whom such a body of helpless human beings had been lawlessly thrown, would have acted in the same way while they were necessarily in his care. I think, therefore, that no importance is to be attached to these facts of feeding, clothing, &c., while the negroes were necessarily at the agency.

In this same letter, we meet with General Mitchell's first denial of the charges against him—the first, at least, communicated to this Government; it is in these words: "Sir, I assure you, upon my honor, I had no interest whatever, directly or indirectly, *in the purchase or introduction of those negroes;* neither had I any knowledge or information of *the intention of the parties interested to bring them here, until their actual arrival.*" On first reading this document, I was transiently struck with the special form of this denial, as not covering the whole case: I dismissed it, however, as a subtlety which ought not to be permitted to enter into the judicial consideration of such a subject, fraught with such serious and affecting personal considerations; and should have probably thought of it no more, but for the perpetual recurrence of the same form of expression, not only in the general's other communications, but in the affidavits of his witnesses. A coincidence of expression so singular, among so many various minds of different orders, naturally excited me to attend to the terms; and I perceived, at once, that the truth of the assertion that General Mitchell had nothing to do with the original *purchase or introduction* of these Africans, and that he was even *ignorant of the intention of the parties to bring them to the agency*, until their actual arrival there,

was perfectly compatible with a guilty connexion formed with Bowen after the arrival of the first parcel, and with that connivance which General Gaines had charged on him; and, pursuing this train of thought, it appeared to me, that although there were circumstances tending to the belief of *a previous general understanding*, at least, between Bowen and Mitchell, yet the evidence was much more strong to establish the probability of a *subsequent connexion*. It is not necessary to stop, for the purpose of bringing together the instances in which this same form of expression recurs in the letters of General Mitchell and the affidavits of his witnesses; they will present themselves as we go along; and if, at least, you shall think the criticism more ingenious and severe than solid, you will easily throw it out of your consideration of the case.

The next communication of General Mitchell is a letter of the 19th February, 1818, addressed to the Secretary of the Treasury, as I learn by reference; which, however, is not before me.

On the 25th March, 1818, the agent addressed another letter to the Secretary of War, in which he answers various charges that had been preferred against him by General Jackson, and, among others, this charge of the African negroes. In this, he goes into a statement as to those delivered to Groce; censures Colonel Brearley for certain misstatements which he charges him to have made on the subject; and this the more severely, because he says Colonel Brearley was fully informed of all his proceedings, and, among other things, of his having declined bonding any more after the forty-seven, "*in consequence of understanding that there was some difference of opinion as to the proper course to be pursued with regard to them.*" This is the first explanation of the cause why the last parcel was detained; but as they were in his possession when the first parcel was delivered to Groce, we are yet to be informed why they were not delivered at the same time.

This passage, however, calls up a still more serious question: *when* did this difference of opinion occur, and when was it made known to General Mitchell? When he wrote to the Secretary of War on the 3d February, he suggests no such difference of opinion; he represents the case as quite an easy one, and gives an impression that the whole of the negroes had been sent out of the United States. It was only four, or at the most five days afterwards, that they were seized by Mr. McIntosh; for the general's letter to his son on this subject, annexed to the affidavit of the son, bears date on the 8th of February. This difference of opinion, then, which had changed the general's course as to the negroes, must have occurred and been made known to him between the 3d and 8th of February; of which there is no evidence in the case, and, I fear, no probability in fact. Even in his letter of the 18th, he does not place the past detention of these negroes on any such difference of opinion as this, but on the ground of his having reported the case to the Government, (by his letter of the 25th December,) and his waiting their orders, or the opinion of the district attorney.

In the letter now under consideration (25th March, 1818,) the agent says to the Secretary of War: "Permit me to reiterate the assurance already given you, that I not only had no interest *in the purchase of these negroes*, but *was entirely ignorant of the purchase and introduction of them*, until brought to the agency."

In General Mitchell's letter of the 28th April, 1818, to the Secretary of the Treasury, (of which an extract furnished by the general is before me,) he takes no notice of the detention of a part of these negroes at the agency, nor of any such difference of opinion as that which he assigns in his letter of the 25th of March to the Secretary of War; on the contrary, he vindicates the course taken in bonding and sending out the negroes as the only course, as to the propriety of which he speaks of no opposing opinions.

In this letter he also says: "As to the purchase and introduction of those negroes, I give you my solemn assurance that I had neither knowledge of, nor participation in, either."

Here the communications of General Mitchell end, until the charge was revived by Governor Clark, and presented in such a form as made it the duty of the Government to examine it by evidence. A judicial investigation of the subject had now been barred by the act of limitation of the United States. An attempt was made to institute such a trial before the circuit court of the United States in Georgia, but was stopped at the threshold by the court, on the ground of the bar by the act of limitation. The grand jury, however, took up the subject on general grounds, and founded a presentment upon it. The Legislature of the State, too, expressed its indignation at the illicit continuance of the slave trade, in a report, which, together with the presentment of the grand jury before mentioned, and the sentence of the court, have been communicated by Governor Clark, and are now before me. The Government, desirous in a case so deeply interesting to the country on one hand, and to the individual, one of the officers of Government, thus accused, on the other, required that the facts should be presented in the form of affidavits, taken on notice: a direction which was so imperfectly executed, that it was repeated; and, in the mean time, both the Governor of Georgia and General Mitchell were mutually furnished with copies of the evidence which had been communicated by the other.

The first communication of General Mitchell with which I meet in this new series is his letter to the Secretary of War, dated the 27th July, 1820. This letter accompanied the general's original evidence, and comments on that and on the accusing evidence.

On the fourth page of this letter he makes the first communication to the Government (with which I have met) of *the separate parcels* of Africans brought in by Bowen, in succession. He again admits the interview with Bowen on the arrival of the first parcel, but says that he remained only one night at the agency, "consequently, had no time or opportunity to make any arrangement with him on the subject." What General Mitchell is represented as having said to Loving, was quite enough, and could have been said in a very few moments. He proceeds: "Neither did he know that I had seized the first parcel of his negroes, until the arrival of the last parcel, when I informed him of the fact, and detained the whole;" that is to say, that General Mitchell had seized the first parcel, but kept Bowen in ignorance of that fact until the arrival of the last parcel, which was about the first week in January, when he informed him of the fact, and detained the whole. This statement is supported by the evidence of Captain Bowen, Captain Mitchell, and Captain Thomas; but is perfectly irreconcilable with the agent's letter of the 25th December to the Secretary of the Treasury, in which he represents himself *as having declined to detain any of them*, but having ordered Bowen to take the whole of them out of the United States.

In the course of this letter, General Mitchell comments on the evidence furnished by Governor Clark; and before I take up the general's own evidence, in order, I think it proper to state what he has said in regard to the first two witnesses presented in support of the charge—Loving and Woodward.

In regard to Loving, he says, in substance, that he has no recollection of any such conversation as Mr. L. relates; that Mr. Loving was a stranger; and that it is very improbable that he would have given advice to a stranger, which he would not have given to one of his own family. He states, also, that he has heard from a gentleman of veracity, that the very conversation which he represents himself to have had with him, (Mitchell,) he had with that gentleman, *who replied precisely in the language which Loving has attributed to the general:* and the general leaves it to any man of sense to determine whether it be reasonable that he would have held such a conversation with a stranger. Who this gentleman of veracity is, we are not informed by General Mitchell; we learn, however, from the affidavit of A. Erwin, that it was Captain Thomas, one of the general's assistants at the agency, as we have seen; and Mr. Erwin further states, that on his suggesting the probability of this mistake to Loving,

he had appeared much mortified, and expressed his regret at having given this information. The whole of which statement Loving flatly denies in a subsequent affidavit, and declares to be a falsehood, destitute of all foundation.

But these remarks of General Mitchell suggest the following reflections: why should every man of sense pronounce it improbable that he should have held such a conversation, or given such advice to a stranger? There can be but one answer, so far as I perceive, which is, that the advice was criminal, or the course advised illegal; for, if neither, there can be no reason why General Mitchell should not have held such a conversation with a stranger as soon as with any other. General Mitchell, then, was aware, in July, 1817, of the criminality or illegality of this course; and yet *his acts* with regard to Bowen, and the Africans imported by him, are *substantially* in unison with the conversation which is imputed to him by Loving.

Again: is it probable that, in a case of so much importance, Loving should have mistaken Captain Thomas for the agent? and, still more, is it probable that Thomas should have rendered the very answers which Loving attributes to Mitchell; that Thomas should have advised Loving to bring Africans to the agency, and that *he (Thomas) would protect them there, and give facilities for their sale at the reserve, &c.?* more especially when we are told by Thomas himself that the agent (whose power at the agency was sovereign) had uniformly advised him to have nothing to do with such a business, *for that those who did would not only involve themselves in trouble, but would also destroy their reputation.* The assumption of these answers by Captain Thomas may be an evidence of gallant self-devotion in behalf of a friend: but I confess that the statement surpasses my credulity. Loving's character is most respectably supported; and if his evidence required any extrinsic circumstances to render it probable, those circumstances would, I think, be found in the conduct of the agent himself, in the affair of Captain Bowen.

With respect to the evidence of T. Woodward, which, as you will recollect, is a hearsay statement only from Colonel Howard, General Mitchell observes, that as Mr. Woodward is of respectable family and connexions, and some of them his particular friends, he will just observe, that Colonel Joseph Howard, from whom he says he had his information, is living on the Alabama, and is certainly better evidence than Mr. Woodward; he thinks that Colonel Howard will not support the statement of the witness, as to bringing Africans into the United States in violation of law. "I have no doubt," says he, "but that I have had conversations with many upon this subject; for, at one time, it was much spoken of, and some have reduced it to practice, while others, *like myself*, have only talked of it."

Mr. Woodward's statement of Colonel Howard's conversation is no evidence which would be received in a court of judicature, had it even been on oath. Not being even on oath, it ought not to have been offered. Why the affidavit of Colonel Howard has not been taken on either side, I am unable to conceive. General Mitchell was not bound to take it; and yet it is a matter of surprise to me that, knowing the residence of the witness, his high standing, and the use which had been made of his alleged conversation, the just sensibility which General Mitchell seems to feel for his own character had not impelled him to call on Colonel Howard to rescue him from this imputation.

The words which I have quoted from General Mitchell, above, seem to me to mean, in their fair and obvious sense, that General Mitchell had *at one time* talked of embarking in the business. They are used in relation to the conversation which Woodward, on the report of Colonel Howard, imputes to him—a conversation which implies his disposition, after his acceptance of the agency, to engage in such an enterprise, and to furnish funds for it. At this time, too, he had reason to believe that the affidavit of Colonel Howard might be taken against him, and how it would result was yet uncertain.

It was provident, therefore, to anticipate any result of such an affidavit by an explanation; the words are to be construed in reference to the occasion and circumstances in which they are used. When, therefore, he says "I have no doubt but that I have had conversations with many persons upon this subject; for, at one time, it was much spoken of, and some have reduced it to practice; *while others, like myself, have only talked of it*," I understand him to mean "while others, like myself, only talked of doing it:" which amounts to an admission that he had at one time talked of doing it, and is substantially all that either Woodward or Loving states.

I proceed to General Mitchell's testimony, in the order in which he has offered it.

William Bowen's affidavit.—He left Fort Hawkins, where he had resided for some time, in July, 1817; went to South Carolina to visit his friends; after a short time proceeded by Augusta to Savannah; here he entered into a mercantile partnership with Stanterbry & Thorn, in a store to be kept by Bowen in Milledgeville. Having selected his goods, and while employed in forwarding them, he was informed by a friend of the great speculations which were to be made in sugar and coffee at Amelia Island, and determines to procrastinate the opening of goods in Milledgeville till he could visit Amelia Island, which he does. Disappointed in the price of sugar and coffee, and having been left by the vessel in which he intended to return to the main, he is detained in the island; and, during his detention, a cargo of negroes arrives in one of Aury's privateers, which he purchases with funds furnished wholly by the credit of Erwin & Co., and Stanterbry & Thorn. He then details his journey with the first parcel of these negroes to the agency, where he is received by Captain Thomas, who advises him to proceed on his route before the arrival of General Mitchell, who, if he found the negroes there, would probably interfere with them; but this he told Thomas was impossible, as the negroes were worn down with cold, fatigue, and hunger, and could not move till their strength was recruited and he could procure better transportation; besides, he told him he had left a number of the smallest ones behind, *more exposed than he had expected.*

Finally, having arranged with Thomas to supply provisions for the first parcel, he returns for the second: (not a word of his interview with General Mitchell; it is obvious that this is kept studiously out of sight.) He then proceeds to detail his operations with the second parcel of negroes; admits that he wrote the letter from Drummond's Bluff, but this was without the consent or knowledge of General Mitchell. It was purely to secure the passage of the property, should it meet with difficulty. He never intended, after the arrival of the negroes at the agency, for that letter to be produced or delivered to the agent, and had instructed the bearer to destroy it on his arrival. On seeing the bearer of it, after the negroes had arrived, he asked him for the letter, and was answered that it was lost in the woods; and, thinking the letter would never be found, he was satisfied. On his arrival at the agency, he was informed by General Mitchell that he would detain the negroes until he could be better satisfied with the circumstances of their transportation through the Creek nation. He *then* informed General Mitchell that he had purchased the negroes in Camden, and intended going westward with them. (General Mitchell, in his letter of the 25th December, 1817, to the Secretary of the Treasury, says that Bowen gave him this information at *their first interview*—that is, on the arrival of the first parcel—and showed him the bill of sale.) General Mitchell declared that he should detain the negroes *until he could hear from the Government on the subject.* Finally, *Jared E. Groce* came to the agency, with a letter of introduction to Bowen from James Erwin; and Groce, as the agent of Erwin & Co., and for the purpose of securing the $25,000 which they had advanced, entered into bond with Bowen to carry out of the United States as many of the negroes as he wished, who were to be under his control as collateral security to the Erwins. A selection of forty-seven was made out of the whole parcel, and delivered to Groce on bond, as

already stated. Bowen returned to Georgia to procure security for bonding the rest, which was superseded by the seizure made by McIntosh. He then states what was done with the negroes after their seizure, which is irrelevant to our inquiry. He then avers that General Mitchell never had any knowledge of *the purchase or introduction of these negroes into the United States*, that he paid not one cent towards the purchase, that the whole sum was raised through the aid of the before-mentioned firm, and *that General Mitchell knew nothing about it until the negroes were taken to the agency and reported by him to the Government;* that, but for the interference of General Mitchell, he would probably have had his property safe in *West Florida, where it was intended that they should be carried.* "Any imputation, therefore," says Bowen, "that General Mitchell was concerned with me in the *purchase and introduction* of that property, is *mere conjecture.*"

Before I proceed to the cross-examination of this witness, I will remark, that, long before the taking of this deposition, not only the letter from Drummond's Bluff, but the two letters purporting to have been written by Bowen to General Mitchell, from Milledgeville, had been before the public, and had produced considerable excitement. The last two letters, if genuine, placed the guilt of General Mitchell beyond all doubt, and were consequently resisted by the general and his friends, by every means which they could command. The general had denied on oath that he had ever seen such letters; his son, Captain Mitchell, had denied on oath that he had ever given Moore that direction to search his father's desk for letters from Arbuthnot, from which the discovery was alleged to have proceeded; and both Captain Mitchell and the general's clerk, Imlay Vanscriver, had sworn that they had never seen such letters in the general's desk, or elsewhere, and that they must have seen them if they had been there. Bowen had denied the authenticity of the letters *in a handbill*, which is annexed to his affidavit, and declared them base fabrications. The reputation of William Moore, the alleged discoverer of these letters, was assailed with great vehemence; he was accused of having forged an order for money from one Timothy Barnard, of having forged a bill of sale from Tobler for the last parcel of negroes, and having attempted to suborn witnesses to attest it. *But still the oath of Bowen denying that he had written these letters was wanting.* When, therefore, in the body of the affidavit before me, his mind was called to this subject by his admission of the letter from Drummond's Bluff, it is surprising that he did not avail himself of the same solemn occasion to do justice to himself and General Mitchell, by denying the last two letters, which he had already denied in his published handbill. This, however, he does not do: he says not one word of these letters in the body of his affidavit, which is the whole of his voluntary statement; and, to increase the suspicion arising from this circumstance, when, on his cross-examination, he is directly interrogated as to these letters, he twice evades the question altogether, and each time so exactly in the same words, that it is extremely difficult for the most candid man to resist the conviction that the evasion, as well as the form of it, was premeditated and settled.

He is asked by Governor Clark, Did you not write the letter, or one similar to it, of the 7th March, 1818, to the agent, General D. B. Mitchell, which was published in the Journal some time since, and which William Moore states he copied? &c.

The answer is: "*I have already denied the authenticity of that letter, and I consider Moore a forger.*"

He is then asked, Did you not write the letter of the 23d March, 1818? &c.

His answer is: "*I have also denied the authenticity of that letter, and I answer as above.*"

It was true he had already denied the authenticity of those letters, but not on oath; it was in a handbill; and it might be true that he considered Moore a forger, in regard to the two acts of forgery already mentioned, of which he had been publicly accused—the order from Barnard, and the bill of sale from Tobler. Were Bowen now to state on oath that he did write those letters, he could not be convicted of perjury on the strength of those answers, for he has not here denied them on oath, nor has he said any thing at all incompatible with the fact that he did write them.

Are these the terms which would have been used by any man who was in truth innocent of the charge of having written those letters? For my own part, the evasion appears to me so gross and palpable, and withal so *studied*, that I consider it as very little short of a confession that he did write the letters.

On his cross-examination he states that he did "once give General Mitchell a certificate that he was not concerned *in the purchase or introduction of these negroes into the United States.*"

He is asked, "Do you not know that the agent expressed himself in a way *from which you inferred his permission to convey the second gang of Africans to the agency?*"

The answer is: "He never expressed *any approbation to me.*" Here is another evasion; the question was not as to the expression *of approbation.* In the rest of his cross-examination he states, in substance, that he does not know that General Mitchell claims any part of the Africans that had been brought to the agency *in his own right.* He never had any conversation with General Mitchell as to the profits to be made or speculations in Africans, *previous to his taking the Africans to the agency.* General Mitchell might have been apprized of Long's taking off the five negroes, for aught he knows. The witness refuses to answer a question concerning Jared E. Groce, (which stands connected with the authenticity of one of the last of the letters before mentioned,) on the ground that it relates to *his and Groce's private affairs.*

In answer to General Mitchell, he states the interview which he had with the Governor, at the time of his confessing that he wrote the letter from Drummond's Bluff. He understood from his excellency, and probably from some of the other gentlemen, that the object of the inquiry was not to injure him, as most of them were friendly to him, but to ascertain General Mitchell's connexion in the affair. He does not recollect that any particular promise was made him.

He says, on further examination, that General Mitchell did not know from *him* that he intended to carry the second gang of Africans to the agency in the winter of 1817–'18.

Being asked whether the agent, or some one for him, did not purchase *or come to an understanding with him* for some of the Africans?

He answers: "The agent did not purchase any of me; I had many offers, by sundry persons, to sell, but not for the express *use*, or implied *use, as I understand*, of General Mitchell. I invariably declined selling any of them to any one."

Andrew Erwin's affidavit.—This is a very long and verbose affidavit; to give you an idea of it, although the witness knows nothing personally of the guilt or innocence of General Mitchell, five folio pages of the affidavit are employed in giving us a history of the oscillations of the witness's mind as to General Mitchell's guilt. The number of these vibrations, and the causes which produced them, are detailed with a minuteness and prolixity rather amusing than instructive; until, at last, the witness, *on the representations of General Mitchell and Captain Bowen*, settles down in the conviction that the general was entirely innocent "of any concern, interest, or participation *in the purchase or introduction* of the negroes alluded to." According to this witness, Groce also is innocent; not only innocent, but it seems Mr. Erwin had some difficulty in appeasing the virtuous indignation of Mr. Groce upon the discovery that his partners had been concerned in a breach of the laws. "I convinced him, I believe," says the witness, with the utmost apparent simplicity, "of my innocence in any such trade." To make sure work of it, however, he sent

or wrote for his son, James Erwin, to Savannah, to explain the true situation of the business. James Erwin then came to Augusta; and, while there, Mr. Groce returned, and *James Erwin* then expressed *his* innocence in the business, as above. This Mr. Groce, whose moral delicacy the Messrs. Erwin manifested so much solicitude to soothe, is the same Jared E. Groce whose conversation with Mr. Breithaupt has been already detailed. Andrew Erwin swears *in the most positive manner*, to use his own words, "that Jared E. Groce had no interest in the property," (meaning the negroes.) Why, then, did Andrew Erwin, in his letter to General Mitchell by Colonel Morgan, bind the firm of Erwin, *Groce*, & Co. to any amount, without limit, which Colonel Morgan might choose to draw for, in his negotiations with regard to negroes?

Will it be said that when he wrote that letter he was ignorant of the fact that Mr. Groce was not interested? But we are told that there were two firms: Erwin, Groce, & Co., at Augusta, in which Mr. Groce *was* interested; and Erwin & Co., *at Savannah*, in which Mr. Groce was not interested; and Andrew Erwin does not profess to have been ignorant, when he wrote the letter, that the funds had been advanced by Erwin & Co. at Savannah, in which Mr. Groce was not interested. By what right, then, did he use the name of *Groce* in that letter? The circumstance is calculated to infuse a strong suspicion that the witness knows more on this subject than he has thought proper to disclose. His guilt or innocence, however, is not the question, except so far as it may affect his credit as a witness. His primary object, and what may be called the business of his affidavit, is to exculpate himself from any charge of being involved in this business; and, in this point of view, it is unfortunate for Mr. Erwin that, in a case so deeply affecting his character, he has not preserved the letter from *a Mr. Thomas*, who now resides near Milledgeville, (then, *perhaps, near the agency*,) from whom he received his first intelligence on this subject, nor any copy of his letter in reply, and that the original answer also has been lost by Mr. Thomas.

The only facts material to General Mitchell which this witness states are: 1. The fact that the whole purchase money for the negroes was advanced by Erwin & Co., and, consequently, that General Mitchell is innocent of having made any pecuniary contribution to the purchase. 2. The circumstances which he states to impugn the credit of Loving, to which I have already adverted. With respect to the first, however, he admits that for one-half of the advance individual notes were placed in the hands of his son; these notes were *anonymously* mentioned. Why they are so, is not explained: there may be some motive of mercantile delicacy in the case; but, without mentioning names, it would have been easy to have said that no note in which General Mitchell's name appeared was among them; and, in a case like this, it would have been better to have done so, even if the caution had been over abundant.

James Erwin's affadavit.—This witness supports the statements of Bowen as to the partnership with Stanterbry & Thorn, as to the information which carried Bowen to Amelia Island, and as to the fact that all the funds were furnished by Erwin & Co. He gives also his letter of instructions to Bowen, the first sentence of which is, "*Buy all and every thing you are sure of making money on.*" He supports Bowen in the assertion that the funds sent were vested in negroes; and *before the sale was closed he was consulted by the vendor as to the authority of Bowen to draw on him for the amount. That he assured the vendor Bowen's bill would be good. And, from the impossibility of communicating even by express with General Mitchell, &c., as well as from Bowen's private, confidential, and positive communications*, he is confident that General Mitchell had no knowledge of *the purchase and introduction of those negroes.*

Joseph Thorn's affadavit.—In strict accordance with James Erwin, he also is of opinion, for the reasons he gives, that it is impossible General Mitchell could have had any knowledge or interest whatsoever *in the purchase or introduction* of those negroes into the United States.

Colonel G. Morgan's affadavit.—The effect of this evidence has been, as to all substantial points, before stated. This witness states that "*from the best information he could get at the agency*," with what he had been told by James Erwin and his father—James Erwin's advancing money to Bowen—as well as from a knowledge of their situation at that time, it is his opinion, decidedly, that General Mitchell had no interest, directly or indirectly, in the *purchase, ownership, and introduction of those African negroes.*"

John S. Thomas's affadavit.—He supports all the statements of Bowen, Andrew Erwin, and General Mitchell, which could be supposed to fall within the sphere of his observation, and gives it as his decided conviction that General Mitchell not only had no interest or concern in *the purchase or introduction of the negroes*, but was entirely ignorant of both. He then states the advice which General Mitchell had given him, to have nothing to do with the purchase of Africans, &c., "for those who did would not only experience pecuniary loss, but destroy their reputation:" sound advice, which proves that General Mitchell was aware of the illegality and disrepute of such proceedings.

This John S. Thomas is the Captain Thomas who belonged to General Mitchell's family at the agency. The deposition opens with saying, "Being called upon by the Governor of Georgia, by authority, as he states, from the Secretary of State," &c., importing that the evidence has been given in the presence and under the superintendence of the Governor. This appears not to have been the fact. It is certified by H. Allen, who signs himself J. I. C.; that on the 6th March, 1820, having been called upon, by one of the Secretaries of the Executive Department of Georgia, to attend at the Executive Chamber in the State-house, for the purpose of taking some depositions, John Sherwood Thomas was called, and, appearing, refused to be qualified, or to give evidence in regard to his knowledge of the participation of the Indian agent, D. B. Mitchell, in the illicit introduction of Africans into the United States, as he said, "*on account of some communication or writing, made by himself to one of the parties, which he wished first to secure.*"

It is here proper to give General Mitchell's view of this subject of Captain Thomas's reluctance to give evidence in the case; it is in these words: "The Governor, I understand, has resorted to various expedients to justify his conduct to Captain Thomas; and, among the rest, has obstinately charged him with refusing to give his testimony; but if Captain Thomas would *condescend* to make a statement of the facts as they really occurred, it would cover the Governor with shame and confusion, if he is capable of feeling either the one or the other. *But Captain Thomas is diffident and unassuming;* and the Governor presuming upon that, and an intimacy of long standing between himself and the family of Captain Thomas, he thought he could manage the captain as he pleased, by dictating to him the testimony he should give. His first effort was to draw from the captain a declaration that he knew nothing about my transactions with the Africans; but, finding that he was not to be surprised into an assertion of a falsehood, he then changed his tone, *and endeavored to dragoon him into his measures.* The integrity of Captain Thomas, however, baffled all the arts of his excellency, and he then thought it necessary to throw a shade over his testimony."

I have before had occasion, sir, to call your attention to the extreme inconveniencies under which strangers to the witnesses must labor in deciding any question of fact, depending on their characters. How impossible would it be to infer this *diffidence and want of assumption* in the character of Captain Thomas from the following statement:

EXECUTIVE OFFICE, GEORGIA, MILLEDGEVILLE, *April* 3, 1820.

We, whose names are hereunto annexed, do hereby certify, that on this day, about 3 o'clock P. M., Captain John S. Thomas entered the Executive Office, and inquired of his excellency Governor Clark if he had understood him (Thomas) to have said, when summoned to testify at the Executive Office, some time since, [pointing back to the time mentioned by Mr. Allen,] that he declined to give evidence, *then*, from having some paper or document of some kind in the hands of General Mitchell? The Governor replied that he (Thomas) *had* declined, alleging that "he had a paper in the hands of one of the parties, which he wished first to withdraw, as it might injure him," and that the Governor understood from his (Captain Thomas's) expression that the paper spoken of was in the hands of Mitchell. Thomas then rejoined, that he did not think the Governor was right; that he thought he had been mistaken; that he did not state or intend to be understood that it was in *Mitchell's hands*, but in the hands *of one of the parties interested.* Some conversation then ensued, and the Governor then mentioned that he (Thomas) had promised again to call at a particular day and give his evidence, and had failed to do it. This was *rudely* denied by Thomas, and re-asserted by the Governor; and, *on Thomas's assuming an insolent tone and manner*, the Governor inquired if he had come to the office with an intention to insult him, and, if that was his intention, he (the Governor) wished him to retire. After *some further insolent deportment*, he said he (Thomas) *would retire;* and, on doing so, exclaimed, in a loud and menacing tone, "*by the eternal God, I will have satisfaction out of you one day or other.*"

In witness whereof, we have hereunto set our signatures.

DANIEL HUGHES,
WILLIAM F. STEELE.

WILLIAM S. MITCHELL's affidavit.—This witness declares his conviction of the innocence of the agent; and I hope he is sincere. It is the evidence of a son in relation to his father. The document will be before you; and I forbear further comment.

JAMES MOSS's affidavit.—Was at the agency at the time of the arrival of the Africans; had frequent conversations with Bowen, Long, and Captain Mitchell, and from none of them was induced to believe that General Mitchell was, in any way, engaged in the *purchase or introduction of the negroes into the State.* He impugns the credit of John Lambert, a witness on the other side, because he had spoken, ignorantly, from hearsay; and because Lambert told him there were things put into his affidavit that he did not consent to have put in it, &c.

JOHN BINION's affidavit.—He was a captain of cavalry on the Flint river, stationed at the agency in January, 1818. Observing the Africans at the agency, he asked General Mitchell if they were for sale; to which he replied that they were not, *for he had put his thumb upon them;* meaning thereby, as he explained, that the agent had taken them into his possession, *and reported them to the Government*, and that, consequently, he would permit no sale of them.

COLONEL BREARLEY's affidavit.—This witness is neutral; he knows that the Africans were at the agency; but he *knows* nothing of General Mitchell's guilt or innocence.

MCQUEEN MCINTOSH.—This purports to be an original letter from Mr. McIntosh; to whom addressed does not appear; at the foot of it is this statement: "This letter, and the extract from McIntosh's report which I have quoted, were sent to me by a friend.—D. B. M."

The letter expresses McIntosh's opinion that he was entitled to one-half of the negroes seized. The motives of McIntosh in making the seizure are foreign to the question of the agent's guilt.

JOHN OLIPHANT's affidavit.—This is the same witness whose evidence has been exhibited in support of the charge. This affidavit is subsequent to the former; and the witness here complains that the magistrates on the former occasion would not insert that he had denied the explanation of the red strings *upon the negroes, &c.*

THOMAS RODNEY's affidavit.—The witness was employed about the agency. About the day before General Mitchell's departure to spend Christmas with his family, (the Christmas of 1817,) General Mitchell called the witness, and directed that, during his absence, the witness should have an eye upon the Africans; *that they had been brought in contrary to law, and that witness must not suffer any one to touch the negroes during his absence, for that he meant to report them to Government, and they must remain for further orders, &c.*

Let this testimony offered by General Mitchell be compared with his letter to the Secretary of the Treasury, written a few days afterwards, to wit, on Christmas day.

GEORGE STERISON's affidavit.—This witness charges William Moore with an attempt to suborn him as a witness to a bill of sale from Tobler, &c.

JAMES THOMPSON's affidavit.—To the same effect. This man is said by Governor Clark to be a discharged convict from the Pennsylvania penitentiary; and this to the knowledge of General Mitchell when he took his testimony, which I do not understand the general as denying.

TIMOTHY BARNARD's affidavit.—The witness accuses William Moore of forging an order for money in his name; and states that Moore and Mr. Humphreys (a justice of peace of the State of Georgia) had endeavored to prevail upon him to swear to the contrary, and he believes would forge an affidavit in his name to that effect.

The counter-affidavit, with the statement of Mr. Humphreys, will be found among the papers furnished by Governor Clark, and by him numbered 17.

WILLIAM S. MITCHELL and IMLAY VANSCRIVER's affidavits.—I have already given the effect of these papers; their tendency is to show that Moore could not have found in General Mitchell's desk the two letters from Bowen, of which he professes to have furnished copies.

LODOWICK ASHLEY's affidavit.—Immaterial. A copy of a deposition in an admiralty proceeding, concerning these negroes, in the name of Miguel de Castro, against ninety-four African negroes. The proceeding must have been fictitious. The affidavit is not substantially variant from that formerly presented from the same witness.

I have thus endeavored to extract from this vast mass of communications and documents all the facts which appear to me to be material. In the laborious operation, however, of examining upwards of seventy separate documents, and some of them very long, and then comparing them together throughout, and of connecting and combining the circumstances, dissevered and scattered as they are through such a dark and extensive wilderness, some important circumstances may have escaped me, and I may have thought some important which you may deem inconsiderable. It will be of some assistance to you, however, to have had the case broken, even in this imperfect manner; and any errors that I may have committed will be easily corrected in your own examination of it.

You must, I take it for granted, have been struck with the force of the three letters alleged to have been written by Bowen to General Mitchell: that from Drummond's Bluff, and the two from Milledgeville. It will be proper, therefore, to examine the grounds on which the probability or improbability of those documents rests; and the answers that have been given to them by the parties interested.

1. *Letter from Drummond's Bluff.*—On the 2d November, 1819, when Bowen made his acknowledgment to Governor Clark that he had written this letter, no solution of it favorable to the innocence of General Mitchell

occurred to him; for, if it had, the solicitude which he has uniformly discovered to defend General Mitchell, even at his own expense, can leave no doubt that he would have suggested it.

On the 4th November, 1819, when he published his handbill, he says: "The letter wrote at Drummond's Bluff was written by me: I wrote it *without the consent or knowledge of General Mitchell:*" but still *no reason for writing it* is mentioned. As this handbill was intended for the express purpose of vindicating General Mitchell, this was the time, and this the occasion, that he should have given an explanation *of the purpose*, consistent with General Mitchell's innocence, if he could. Bowen is obviously a shrewd and acute man; and he knew that the world would not be satisfied with being told that he wrote that letter without the knowledge or consent of General Mitchell. This was saying nothing, for it was never pretended that General Mitchell was at Drummond's Bluff on the 25th December, 1817, to know or consent to the writing of that letter; nor was it at all material to the question of a guilty connexion between Bowen and Mitchell that General Mitchell should have consented, by anticipation, to the writing of such a letter; or that the arrangement which occasioned it (to wit, the sending on the last parcel by Tobler) should have been made and provided for before Bowen left the agency. When Bowen, therefore, was stating in his handbill that he wrote that letter without General Mitchell's knowledge or consent, he could not but know that the next question which would occur, at once, to every inquiring mind, would be, "Why, then, did you write it?" and this question it was material for him to have answered in this handbill—at least if any satisfactory answer was at hand. Such an omission, on such an occasion, justifies the conclusion that he had no answer at hand, but that one was yet to be sought for.

On the 5th day of June, 1820, when he gave his deposition, he could think of no better solution of this difficulty than "that it was *purely to secure the passage of the property, should it meet with difficulty.*" To this it is answered, and with a force which, I confess, I cannot resist, that the letter is not at all adapted to that purpose; it is, as you will perceive on referring to it, an open avowal that the negroes were smuggled in from Amelia Island, and states Bowen's apprehensions that they would be seized before they could be carried through to the agency. Suppose Tobler and his party to have been stopped, under a suspicion that the Africans had been smuggled in: would the production of that letter, which confessed the very fact of smuggling, have removed the suspicion? Is it not manifest that its production, instead of insuring protection, would have insured the seizure of the whole party? Had Bowen been devising a letter for the purpose he mentions, he has sense enough to have devised a very different one from this. There are in this letter a minuteness of confidential details, and a friendly familiarity of speculation and advice, exactly adapted to the supposed relation between Bowen and Mitchell, but totally unadapted and most flagrantly hostile to the purpose avowed.

Besides, Tobler was furnished with a bill of sale for the negroes to himself. For what was this intended? Surely, *to protect them* in his own right, if he should meet with difficulty. Thus he was doubly armed; the only misfortune being, that the one weapon was at direct war with the other, and that they reciprocally destroyed the effect of both: for while the bill of sale affirmed the negroes to be Tobler's, the letter showed them to be Bowen's.

Bowen further affirms that he never intended this letter to be delivered to General Mitchell, and that he so directed the bearer. "Why, then, did he write it?" The purpose he assigns is incredible; and no other is suggested.

I have no doubt that the letter was intended to be delivered to General Mitchell, because I can conceive no other rational purpose for which such a letter, attending to all its parts, could have been written. "I go to Milledgeville, by Savannah, *and wish you to keep the negroes employed until I can come out to the agency.* I have directed *Tobler to take charge of the horses and packs, &c., and to put the horses out in the cane swamp, and attend to them.*" Was this request not intended to reach General Mitchell? Why, then, was it inserted? It was not necessary to the purpose of protection; unless, indeed, we could be so credulous as to suppose that, by arguing a familiarity and understanding with General Mitchell, it would act as a protection. It was from white men, however, and citizens of the United States, that interruption was expected; it was from men, too, as the letter shows, whose suspicions were already broad awake as to the violation of our slave laws that was going on in that quarter of the Union, and who were determined to suppress it; with such men, a letter couched in these terms, had it been written by General Mitchell himself, instead of Bowen, would have afforded no protection, but, on the contrary, would have insured a seizure.

It appears to me impossible for credulity itself to scan the terms of this letter, and to doubt that it was written and sent with the intention of being delivered to General Mitchell; for it seems to me that there is no other conceivable purpose within the scope of human invention for which it could have been written. On the moment we reach this conclusion, there is only one further question: would Bowen, or any other man in his senses, have sent such a letter to General Mitchell, without any apology, or the semblance of apology, for so doing, but, on the contrary, with the air of easy and familiar friendship and confidence, unless authorized to do so by the footing on which he knew himself to stand with that gentleman, without a perfect understanding with him beforehand? And if this question must, from the nature of things, be answered in the negative, the inquiry is at an end; the fact of a guilty understanding and connexion between Bowen and the agent is established.

It is true this letter did not reach its place of destination. It was not delivered to General Mitchell, because both the letter and bill of sale were lost by Tobler—lost, I presume, before he had an opportunity of delivering the letter. I presume so, because as it is clear to my understanding that the letter could have been written for no other purpose than to be delivered, I can conceive no reason why it should not have been delivered if an opportunity had occurred of doing so. That those papers were lost before such opportunity occurred, is rendered highly probable by the following circumstances: Bowen's affidavit is calculated to give the impression that, after parting with Tobler and the negroes at Drummond's Bluff, he had never seen them again until after their arrival at the agency; that the negroes arrived before him; and that he found them there on his arrival. It is true he does not say this explicitly; such, however, is the fair inference from his narrative. But he does say explicitly that his inquiries of Tobler for the letter were made after the negroes had arrived at the agency. Now, it is important to observe, that John Oliphant, the witness, states, that after landing the negroes in Camden county, about six miles below Camp Pinckney, they proceeded about sixteen miles on Blackshear's road, "where Mr. Bowen left us about midnight, and did not join us again *until we got within a few days' travel of the agency.*" In confirmation of this statement, General Mitchell in his communication to the Secretary of War implies, and Captain Mitchell in his affidavit expressly states, that Bowen did arrive *with* the second parcel of negroes.

Now, if Bowen was so desirous that the letter from Drummond's Bluff should not be seen by the agent, would it not have been natural for him to have demanded it immediately upon his joining the party *within a few days' travel of the agency?* Nay, if it *had* been intended to *be delivered to the agent*, yet inasmuch as the necessity of its delivery had been superseded by Bowen's personal presence, and more particularly as the letter was full of danger both to himself and General Mitchell, can it be believed that he would not have demanded and destroyed it immediately on rejoining the party? Can it be believed that he would have travelled for several days with the party towards the agency, leaving to Tobler, an Indian, (addicted, it seems, to habits of intoxication,) the custody of

a paper which it was no longer necessary to preserve, while every moment of its existence was big with danger both to his friend and himself? And if, with all these means of prevention, he *did* permit Tobler to continue in possession of that letter—nay, to carry it to the agency—can it be believed that he felt all the solicitude he professes to keep this letter from the knowledge of the agent? To me, the only natural and probable course seems to be, that, whether the letter was originally intended for General Mitchell's eye, or not, Bowen should have demanded the letter immediately on rejoining the party, a few days' journey from the agency. I believe that if he deemed it necessary to demand it at all, he must have demanded it there, and that he *there* received the answer that it was lost, and consequently that no opportunity ever was afforded of delivering the letter: hence the weight which General Mitchell attaches to its non-delivery is destroyed; and the solution of this difficult problem, which Bowen has labored to extract from the hypothesis that Tobler had arrived before him, and had not delivered the letter, according to his order not to deliver it, is dissipated. Indeed, if the letter had been lost after the arrival at the agency, and among the usual haunts of the Indians and white people at that place, it is difficult to conceive how Mr. Bowen could have regained his composure and satisfaction at such a discovery, on the supposition that it would never be found. Such a supposition, and such an effect from it, would be natural enough, if the letter had been lost in the wilderness, before he joined the party, and several days' journey from the agency; but they are both extremely unnatural and improbable, in relation to the loss of such a document happening at the agency, among the dwellings of the people, where there was every probability, and almost certainty, that it would be found. Finally, if this paper was lost at the agency, after the continued opportunity which Bowen had had, for several days, of preventing such an accident, I repeat it, that he must give up all pretensions *to any concern* from its meeting the eye of the agent.

You will observe that Moore does not profess to have been, himself, the finder of this letter. He received it, together with Tobler's bill of sale, from an Indian woman by the name of Mary. When and where Mary found it, or from whom she received it, we are not informed. Moore's impression is, that it *was* lost by Tobler, *at the agency*. Be it so: of one thing we are certain, that Bowen wrote the letter; and there is no rational doubt that it was originally written with the intention of being delivered to General Mitchell. We are certain of another thing: that if the letter reached the agency in the charge of Tobler, it was because Bowen felt no solicitude about its fate.

2. The letters of the 7th and 23d March, from Milledgeville, are next to be considered. Notwithstanding the strong negative proof furnished by General Mitchell, these letters carry with them an internal proof of their own genuineness, which, when compared with the acknowledged letter from Drummond's Bluff, with the other circumstances in the case, and with General Mitchell's whole conduct throughout, it is very difficult to resist; and when to these violent presumptions we add Bowen's abrupt evasions of Governor Clark's interrogatories on this subject, (so much like the cowardly flinching of a guilty conscience, and so utterly unlike the intrepid openness of conscious innocence,) I confess that I have little doubt that the letters were written by Bowen. Governor Clark's remarks on these letters are well worthy your attention.

The results of this examination are—

1st. That there is no proof that General Mitchell made any pecuniary advance for the purchase of these negroes.

2d. That there is no proof that he had any personal agency in the purchase or introduction of them.

3d. That there is no proof that he had any knowledge of this specific purchase and introduction, until the negroes arrived at the agency.

4th. But that there is presumptive proof that there was a *previous general understanding*, at least, between Bowen and him, on which Bowen founded his whole plan of operations in regard to those negroes.

These circumstances are—

1st. The conversations imputed to General Mitchell by the witnesses Loving and Woodward, and the conversation of Groce with Breithaupt, as explained by subsequent acts.

2d. The connexion of General Mitchell with Bowen in the distribution of the $10,000 worth of goods at Fort Hawkins in July, 1817, mentioned by Captain Melvin; and the fact that, in this *very month*, (when, too, General Mitchell acknowledges that he had seen him,) Bowen set out on the expedition which terminated in the purchase of the negroes.

3d. The fact of his taking the negroes to the agency.

4th. His reception there, which was just such as the conversations related by Loving and Woodward, and that related by Breithaupt as being held by him with Groce, made it natural to expect; for Bowen, so far from being molested for what he had done, is permitted to return to Amelia Island, and repeat the offence.

5th. General Mitchell's whole conduct in the affair, which is in strict consonance with those conversations, and with the hypothesis of such a previous understanding with Bowen.

But, let it be admitted *that there was no such previous understanding*, and that General Mitchell not only had no concern of any kind *in the purchase and introduction of those negroes*, but that he was *wholly ignorant of their purchase and introduction until their arrival at the agency;* yet,

6th. His conduct *after their arrival at the agency* is, in my opinion, utterly inconsistent with the supposition of his innocence.

General Mitchell admits, in his letter of the 25th December, 1817, that he was fully apprized of the solicitude of this Government to suppress the African slave trade; and if his witness, Thomas, is to be believed, he was also perfectly aware both of the danger and disrepute of having any thing to do with such a business. He must, in the nature of things, have been perfectly apprized of the odium which was attached to it, not only in Georgia, but in every other part of the Union, among respectable men.

Thus informed, let us inquire how it would have been natural for a man of common intelligence and of ordinary pride of character to have acted when, on the 8th December, 1817, he discovered that Bowen had dared to intrude himself into the agency with half a hundred of smuggled African negroes—a measure so directly and inevitably calculated to throw upon the agent public suspicion and infamy? Would not his indignation have been excited to the highest pitch at such an act of audacity? and must he not have seen that nothing could save him from the consequences of such a step but the most prompt and vigorous measures of resistance? Would he not *instantaneously* have seized the culprit, and given him up to the laws of his country? Would he not have immediately given up the negroes to the Governor of the State, within whose constitutional limits and jurisdiction the agency was established? And would he not, forthwith, have forwarded a *full and fair* report of *the whole case* to the Government, whose officer he was? Such, it seems to me, would certainly have been the course of any man, even of common intelligence and prudence, so circumstanced; and *this* for *his own sake*, putting aside every incentive of patriotism; for such a course would have repelled every suspicion which the presumption of Bowen was calculated to throw upon him, and have placed his purity beyond the reach of question.

How different was the course pursued by General Mitchell! Intelligent, proud of character, and energetic as he seems to be, instead of arresting Bowen, he permits him to return to Amelia Island, and repeat the offence, by bringing another cargo of Africans to the agency. Instead of handing over the negroes to the Executive of the

State, he makes no communication of facts whatever (so far as the proofs speak) to that Executive, until after the seizure by McIntosh; and to his own Government (whom he was bound by his duty to keep correctly informed) he writes only the letters of December 25, 1817, and February 3, 1818: both of which are calculated to mislead the Government as to the true state of the case; for both keep out of view the double importation by Bowen; both represent the negroes as being all gone; from neither could the Government infer that there was any case actually pending at the agency on which their counsel was asked, for both letters treat the case as if finally disposed of; nor was there any disclosure of the important fact that nearly one-half of the negroes were yet at the agency, until the explosion produced by McIntosh rendered longer concealment impossible, and robbed the subsequent disclosure on the part of the agent of all pretensions to merit.

But what is worse: while the Government was thus kept in the dark, General Mitchell, under color of an obsolete law of Georgia, wholly inapplicable to the case, and which, if it had been in full force and vigor, and also applicable, he well knew gave *him* no power to act, gives up to Groce one-half of these Africans, with a passport which authorized him to carry them to the place for which he knew (as appears by his communications) that they had been orginally purchased: thus lending the authority of his office to aid in the consummation of a conscious breach of the laws.

The other half are detained at the agency. Why? Because, says Mitchell, he was waiting the orders of the Government, (when he had reported no case calling for any orders;) because, says Bowen, it was necessary for him (Bowen) to go back to Georgia, and get other security to bond this parcel too. Between them, however, there the negroes remained until they were seized by McQueen McIntosh.

That General Mitchell should suffer the agency under his command to be made a place of rendezvous for smuggled African negroes; that he should make the Government no fair report of the case; that he should co-operate with the violators of the law in the execution of their purpose, and *that* under so flimsy a pretext as the law of Georgia of 1796; that he should reduce himself to the degrading necessity of obtaining from the culprit, whom he ought, in the first instance, to have seized and dragged to punishment, *a certificate that he (Mitchell) had no concern in the affair*, as Bowen states he did; and that he should do all this without reward, and from an innocent mistake of the law, would certainly be a very charitable conclusion; but, as it would also, in my opinion, be a very irrational one, especially in regard to a man of General Mitchell's superior understanding, I am constrained to adopt the conclusion (painful as it is) *that General Mitchell is guilty of having prostituted his power, as agent for Indian affairs at the Creek agency, to the purpose of aiding and assisting in a conscious breach of the act of Congress of* 1807, *in prohibition of the slave trade—and this from mercenary motives.*

I have the honor to remain, sir, most respectfully, your obedient servant,

WILLIAM WIRT.

The PRESIDENT OF THE UNITED STATES.

17th CONGRESS.] No. 530. [1st SESSION.

NAVIGATION OF THE POTOMAC RIVER ABOVE TIDE WATER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 7, 1822.

Mr. KENT made the following report:

The Committee on the District of Columbia, to whom were referred sundry memorials from the inhabitants of Pennsylvania, Maryland, and Virginia, praying the aid of the Federal Government towards the improvement of the navigation of the river Potomac, have, according to order, attentively considered the object of the memorialists, and beg leave to submit to the House of Representatives, in relation thereto, the following report:

That, by the concurrent acts of the Legislatures of Maryland and Virginia, a company was incorporated in the year 1784, on the recommendation of General George Washington, for the improvement of the navigation of the river Potomac and its principal branches above tide water. The seventeenth and eighteenth sections of this act prescribed the conditions upon which the tolls granted to the company should be exacted, and a limitation to the duration of their charter. By a supplementary act, those conditions were modified; and the period limited for the completion of the navigation of the river in the mode prescribed has been, from time to time, extended by subsequent laws of Maryland and Virginia.

No legal inquiry has ever been regularly executed, so far as your committee are informed, in order to ascertain whether the "Potomac Company have complied with the terms of their charter." After the expenditure of their subscribed stock to the amount of $311,555, of the tolls of more than twenty years' collection, and of the further sum of $174,000, borrowed by the company of the State of Maryland, of the banks of the District of Columbia, and of private individuals, it is universally acknowledged that the navigation of the river is most defective.

In all this period the stockholders have received but one inconsiderable dividend; and their stock will not command in the market (where, however, it is seldom found) a moiety of its nominal value.

It is, in fine, now ascertained that, without further and very considerable aid from the States immediately interested in the navigation of the Potomac, or from the General Government, the great object sought to be attained by the improvement of that navigation, a commercial intercourse through this channel between the western and Atlantic States, will be entirely defeated.

Will the Congress of the United States interpose? and have they the power to prevent a result so deplorable?

A hasty survey of the general map of the United States, and a brief recurrence to the theory and policy of the Federal Government, with their practical illustration by the structure of the Cumberland road, would seem almost to supersede the necessity of any comment from your committee on the importance of the navigation of the Potomac, or the power of Congress to provide for its improvement.

One of its southern branches, itself a considerable river, rises to the southwest of Staunton, in Virginia, and is capable of connecting, by a navigable canal, the geographical centre of that State (in territory the largest of the Union) with the market towns of the District of Columbia. Emptying into the Potomac above the chief obstruc-

tions of its navigation, the Shenandoah, like those navigable streams which descend from the northwest through the limestone valleys of Maryland and Pennsylvania, depends for an outlet to the ocean on the improvement of the navigation of the main river to a considerable distance above tide water. These branches, when the stem shall have been improved, are capable of affording, with the Potomac, an internal water communication exceeding in extent six hundred and fifty miles.

The value of this navigation to the ample and fruitful territory washed by the tide or drained by the tributary streams of this noble river—a territory comprehending four counties of Pennsylvania, seven of Maryland, and eighteen of Virginia, exceeding in extent and population some of the largest States of the Union—should not be disregarded. It sinks, however, into comparative insignificance when this river is contemplated as a necessary link of the shortest chain of communication between the Atlantic and western States. The enlightened policy which seated the Federal Government on the banks of the Potomac indicates its peculiar adaptation to this purpose; and nature has facilitated its accomplishment by a rupture of the many ranges of lofty mountains, including even the great ridge of the Allegany, in the direction which such a purpose requires. It is no longer questionable but that the head waters of the Ohio may be mingled with those of the Potomac by a tunnel or subterraneal canal not exceeding two miles in extent; and the produce of the soil and industry of the West, after ascending the Youghiogeny, find a safe and commodious channel thence to the valley of Savage creek, and, through it, the north branch, and the main river, to the Chesapeake and the Atlantic.

The patriotism which exults in the approaching connexion of the Hudson with the northern lakes; in the efforts of the Carolinas and Virginia to unite, by short portages, the sources of the Santee and Pedee with those of the Tennessee, and of the Roanoke and James rivers with the Great Kenawha, cannot but regard this central river of the Union with peculiar interest.

Notwithstanding all its claims to general favor, the Potomac is, however, exposed to the serious disadvantage of being, throughout its whole course, the common boundary of States whose enterprise and resources are attracted to other objects of internal improvement, some or all of which are rivals of this; and all its markets, once the property of those States, are, by the cession of the District of Columbia to the General Government, confided to the exclusive guardianship of Congress.

With an almost boundless authority over the District of Columbia, the Government of the United States acquired new, urgent, and daily increasing interests in the navigation of the Potomac.

In the rapid improvement, and consequent security of the seat of the Federal Government from foreign danger, are involved not only the preservation of the property and lives of its inhabitants, the accommodation and comfort of its numerous public functionaries, but, in no small degree, the national character and honor. The most deplorable calamity of the late war would, doubtless, have been averted had the Capitol of the United States been encompassed by the dense population of a large city—by such a population as would unquestionably succeed the contemplated improvement of the navigation of the Potomac. And if sordid views may be allowed to mingle with considerations of such inestimable consequence, it may be added that, with the growth of the numbers and opulence of a great commercial emporium, would of necessity arise a corresponding appreciation of the value of all the disposable public lands in the city of Washington, consisting of more than five thousand vacant lots, and now computed at near two millions of dollars, and it is not unreasonable to suppose that their value would be quadrupled by a prospect of their early occupation and improvement.

Your committee are aware that this calculation may be—indeed, has been—impugned, by referring to the value of the commodities which have hitherto descended the Potomac. The very origin of this report, in the present imperfect and hazardous navigation of the river, suggests an *answer* to this objection. It may be corroborated by another: the tolls of a single turnpike, in length but thirty-four miles, leading to the town of Alexandria, have exceeded in one year twenty-five thousand dollars, or very near a fourth of the annual interest of a sum sufficient to complete the navigation of the Potomac from its tide water to the Cumberland road. This great and costly work, itself so honorable to the wisdom and beneficence of the United States, awaits this improvement to yield all that it has promised to the Union.

If the relative expense of transportation by land and by water be properly estimated, the completion of a canal from the tide to Cumberland would have the effect of approximating the seat of Government to within a few miles of the Allegany; while the extension of this canal, at some future period, would occasion that formidable barrier to disappear in the intercourse of the eastern and western States. It is by such a canal that your committee propose to supply the place of the present defective navigation of the Potomac. As this river affords the shortest water line of communication between the tide of the sea and the eastern base of the Allegany; so is its current the most rapid, when compared with that of the other great rivers which have their sources in this chain of mountains. Wherever the science of civil engineering has been long and successfully applied to inland navigation, your committee are assured that the use of the natural beds of wide and rapid rivers has been superseded by a resort to navigable canals, extending along their margin, and fed by their currents until met by the tide. Without a recourse to this expedient, the ascent of the Potomac by a loaded boat cannot be overcome, it is believed, at an expense less than that which attends the transportation of equal burdens over like distances along the ordinary roads of the adjacent country. The consequence must be, that every downward cargo is chargeable with double freight, exclusive of insurance against the repeated hazard to the boat, and the lives of those who guide it, of total destruction.

From a navigation so impeded and so dangerous, all bulky commodities are of necessity excluded; and yet it is from the transportation of such articles that the chief part of the revenue of any canal is derived. In the table of tolls annexed to this report, it is apparent that the entire estimate of the commodities which ascend the Potomac, although they comprise a greater value in less bulk, bears but a very small proportion to the amount of those which descend the river; while these must be regarded as of very inconsiderable value, when compared with the numerous and diversified productions of the extensive and fertile country which should find its market on the banks of this river.

Can it be owing to any other cause than the defective navigation of the Potomac that the buildings of Washington are cemented with the lime of Rhode Island, and warmed in winter with the mineral coal of James river? The last is dug and raised at much cost, transported twelve miles over land to the port of shipment, and thence conveyed by a circuitous navigation of five hundred more to the District of Columbia. The former is calcined by a fuel of a value enhanced by its scarcity and its vicinity to a market in which it is applied to various uses; and it is afterwards transported even further than the latter, with the superior hazard of the sea, augmented not a little by the peculiar character of the commodity itself. What would be the tolls upon the transportation of these necessary and bulky commodities, beds of which, inexhaustible in quantity and excellent in quality, are found in the vicinity of each other near the surface of the earth, and on the very margin of the Potomac, if a navigable canal connected Cumberland with Washington? and how rapidly would the demand for them increase with the progress of the population and wealth of the markets of the Chesapeake? The consumption of salt, by which the East would pay, in part, for these valuable minerals of the West, in the extensive grazing country of the Allegany and its parallel

ridges, would give increased activity and profit to this intercourse. In the channel of communication between the works of Onondaga and the waters of the Ohio, this heavy commodity is now subjected to a most circuitous water conveyance, by vessels of different capacities and draughts, and that transportation itself is interrupted by several portages.

Iron every where abounds, and copper has already been found in the mountains drained by the Potomac. Their valleys yield luxuriant crops of hemp and flax; and the forests of oak and pine, which climb their summits, are destined, it is to be hoped, to supply future navies with the means of raising the blockade of the Chesapeake.

It was by this channel of intercourse, imperfect as it now is, that, during the late war, Louisiana supplied the Atlantic States with sugar; Tennessee with cotton; and Kentucky with saltpetre, that necessary material of defence. Were this communication as perfect as it can be rendered, an enemy who should succeed in closing the mouth of the Mississippi, in order to paralyze the industry of the West, would have also to win from the fleets of the Union the possession of the Chesapeake. Through this channel, in case of war with a formidable naval Power, the West would not only supply the East with the valuable products of the Mississippi, but make its return for the wines of Africa and the various manufactures of Europe and Asia in the cloths of Steubenville and the cutlery and glass of Pittsburg. Should such a war be as extensively conducted on land as on the ocean, the cost of the contemplated canal would be saved by the United States in a single campaign.

Your committee are aware that other channels of communication across the Allegany may be greatly improved, and rendered tributary to the general welfare of the United States, both in peace and war: in the latter, by the additional security which they would afford to the commerce of the interior, and by the vigor which they would impart to all the operations of the Federal Government for the common defence. On the other hand, it will readily be conceded, notwithstanding the preference which may be given, by local interests, to other objects of internal improvement, that whatever facilitates the commercial, social, and political connexion between the remote extremes and the seat of the General Government of so vast a republic as the United States, must have the same propitious influence as would result, were it otherwise practicable, from contracting the extent of its territory, without reducing the number, impairing the wealth, or abridging the comfort and happiness of its people. To all the friends of liberty in America, who regard the State Governments as essential parts of a republican system, erected on a scale so broad as to create alarm for its duration, or who, with no less truth, regard the union of those States as the bond alike of their freedom and independence, *every measure* which has the effect of diminishing the extent of the one, while it multiplies and strengthens the ties of the other, must be viewed with earnest solicitude.

But another inquiry remains: has Congress the power to insure its success?

So numerous and so various are the benefits accruing to every nation from inland navigation; so urgently have the United States been invoked, by the character and genius of their institutions, to diffuse their advantages over a territory which nature has eminently fitted to receive them, that a former Congress sanctioned by their voice a system of internal improvement co-extensive with the wants of the nation.

Your committee are not unmindful of the impediment which arrested the progress of that system, and could not expect success in their present effort, in behalf of one of its objects, if the propositions which they are about to submit to the House of Representatives were liable to similar objections. The committee have studiously sought to guard against their application, and confidently hope that they will be found to have succeeded.

Two proposals have already been offered to the House, in the course of the present session of Congress, by the Committee on Roads and Canals, in relation to the Potomac. Neither of them interferes with the plan for the improvement of the navigation of that river which this committee have presumed to recommend. One of them, embraced by a resolution for the appointment of commissioners to survey the route and estimate the expense of a navigable canal, seems to your committee to be, in a great degree, superseded by the annexed report of the principal engineer of Virginia to the Board of Public Works of that State; and as an incorporated company already exists, with ample authority to make the contemplated improvement, there does not remain any apparent necessity of waiting for the prosecution of this work until a more extensive system of internal improvement be devised by Congress.

The committee simply recommend the combination of the proceeds of sales of the public property in the city of Washington, which, according to the original plan of the city, was designed to be sold, with such sums of money as the Legislatures of Maryland and Virginia, and the citizens of those and of the adjacent States, may voluntarily subscribe, for the purpose of extending a navigable canal from the foot of the Little Falls of the Potomac to the commencement of the Cumberland road. They propose to annex to this public and private subscription the condition that the Potomac Company shall previously assent, with the approbation of the Legislatures of Maryland and Virginia, to such alterations of their present charter as will admit the United States, those States themselves already interested in the stock of the company, and the new subscribers, to participate, on fair and equitable principles, in their future revenue. These alterations would, among other obvious effects, provide for the payment of the debts of the company, and for the reduction of the nominal, by some liberal reference to the actual, value of their present stock.

In order to obviate the necessity of selling the public lots in the city of Washington before the contemplated improvement of the navigation and commerce of the District of Columbia shall have caused the anticipated appreciation of their value, as well as to complete the canal in the shortest possible time, without drawing immediately for large sums upon the public treasury, the States of Maryland and Virginia, and the individual subscribers of new stock, your committee propose that the United States shall borrow, on the public faith, and a specific pledge of all the public lots reserved for sale, a sum, receivable in semi-annual instalments, sufficient to complete the entire work in three years from the date of the first instalment.

Referring to the annexed report of the chief engineer of Virginia, and computing the total cost of the contemplated canal at two millions and a half of dollars, your committee recommend that an amount of stock in the capital of the company, not exceeding half a million, be reserved to pay the debts of the Potomac Company, and to reimburse the present stockholders, including the States of Maryland and Virginia; and that the above loan be limited to two millions of dollars, and applied to defray the expense of the additional works required to complete the canal.

Your committee have reason to believe that two millions of United States stock, bearing an interest of four per cent., payable semi-annually, and irredeemable for twenty-eight years, could be sold in Europe or America at par. To provide for the payment of the interest, and the final reimbursement of the principal of this debt, it is proposed that the United States shall subscribe one million of dollars to the stock of the Potomac Company, on the conditions already suggested, the States of Maryland and Virginia six hundred thousand dollars, and individuals the remaining four hundred thousand; that, on the stock thus subscribed, there shall be charged an annuity, for twenty-eight years, of six per cent. per annum, payable semi-annually; four per cent. of which shall be applicable to the payment of the interest on the two million loan, and two per cent. to the creation of a sinking fund, to be invested, from time to time, as received, in productive stock, in order to provide for the redemption of the principal of the loan at the expiration of twenty-eight years.

Such is the scheme which the committee presume to recommend for extricating the Potomac Company from their present embarrassments, and accomplishing a work which, unassisted, they cannot effect, although of inestimable importance to the public.

Complicated as this scheme may at first appear, it involves in its prosecution the exercise of no other powers on the part of Congress than, first, the power of selling the public lots in the city of Washington, which were acquired expressly for sale; secondly, that of borrowing money on the public faith, and a specific pledge for its repayment; and, lastly, the application of the public treasure to an object of general welfare, or the investment of it in the stock of an incorporated company, expected to yield an annual income.

The committee will not swell this report, already too far extended, by arguments to demonstrate that all these powers are vested by the constitution in the Congress of the United States, either expressly, or by natural implication. They involve neither the incorporation of a private company, nor the condemnation of the lands of individuals, within the territory of any State for national purposes. They do not extend the jurisdiction of the General Government over the persons or property of the citizen, nor purpose to derive, from the assent of any one or more States, any power which has not been granted to the Federal Government by the people of the United States.

Your committee forbear to answer all the objections which this, like any other plan of internal improvement, may be expected to encounter. They are contented to set against such objections some of its peculiar advantages: that, connected with the Cumberland road, it will complete a great national object, calculated to perpetuate the Union, and to promote the prosperity and glory of the United States; that, while it accomplishes this object in the short compass of three years, its cost will be distributed over the revenue of eight-and-twenty; that this cost will be greatly reduced by the credit which enables the American Government to negotiate its loans at so low a rate of interest as four per cent.; that, by the completion of the entire work in so short a period, that loss of interest on unproductive stock, which most canal companies have encountered, and which, in some similar enterprises, has exceeded the principal of their stock, will be prevented; that if the dividends of the Potomac Company shall, after the completion of the canal, yield six per cent. per annum to the stockholders, they will, from that moment, have nothing further to pay for their stock; and after the lapse of twenty-eight years, or possibly a shorter period, they will be found to have paid but nine per cent. of its par value, for a property which, in all human probability, will have more than doubled that value. One of the most prominent and best features, perhaps, of this plan, for accomplishing an object of general welfare, is, that it combines in its execution private with public wealth, and thus effects such a co-operation of individual interest with public good, as will insure, in the original construction as well as the subsequent repairs of the canal, vigilance, economy, and fidelity in all the disbursements of money—qualities so often required in vain in the expenditure of public money on public account.

Should the loan, on which this plan eventually depends, be negotiated abroad, it will be because it leaves for more profitable application, in America, the sum which it is designed to withdraw from other channels of wealth and enterprise. If it charge a debt upon posterity, it must be again repeated, that it is to complete a work as durable as that Union to which the people of America must look, now and hereafter, for the security of all their political and social happiness. Your committee submit the following resolution:

Resolved, That the Committee on the District of Columbia be instructed to report a bill in conformity with the principles contained in the preceding report.

17th Congress.] No. 531. [2d Session.

NUMBER OF CLERKS AND MESSENGERS EMPLOYED IN THE EXECUTIVE DEPARTMENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 3, 1822.

DEPARTMENT OF STATE.

DEPARTMENT OF STATE, WASHINGTON, *December* 2, 1822.

The Secretary of State, in compliance with a resolution of the House of Representatives of the United States, of the 16th of April last, has the honor of reporting to the House that the number of officers and messengers retained in the Department of State is as follows:

One chief clerk, nine clerks, one messenger, one assistant messenger, one laborer, two watchmen.

At the Patent Office.—One superintendent, one clerk, one messenger.

There has been employed, since the 23d of August last, at a compensation of two dollars a day, an artist for repairing and keeping in preservation the models of the Patent Office. The wages of this workman have hitherto been paid from the fund of the contingent expenses of the Department. A copy of the letter from the Superintendent of the Patent Office, urging the permanent employment of such a workman, is herewith respectfully submitted.

That none of these are unnecessary or inefficient, nor engaged in other pursuits or professions in nowise relating to the public service, excepting as follows:

The chief clerk and one of the other clerks in the Department are owners of farms in the neighborhood of the city, which are cultivated under their directions, and to which they occasionally resort in person to pass the Sunday.

Andrew T. McCormick, one of the clerks in the Department, is a clergyman, and officiates in that capacity to a religious society in the city.

The Secretary of State is unable to suggest an organization of the Department more efficient or more economical.

All which is respectfully submitted.

JOHN QUINCY ADAMS.

Hon. P. P. BARBOUR, *Speaker of the House of Representatives.*

Mr. Thornton to Mr. Adams.

SIR: DEPARTMENT OF STATE, PATENT OFFICE, *August* 21, 1822.

The models of the inventions that have been deposited in my office have been so much injured by the daily examination of individuals, that they require frequent repairs; and it would be better to engage a good workman by the year, at a reasonable compensation monthly, than to engage a person to repair particular models; for many of the models belong now to the public, the patents having expired, and these are kept for the use of the nation, serving not only as patterns from which many of the ingenious derive great advantages, but they also tend to prevent impositions, and the grant of patents or exclusive privileges, by showing what has been done before.

If the good and the immense benefits that have arisen from the protection of genius by this institution be duly considered, too much cannot be done for the protection of this office and its concerns; but, when we consider that, even with the trivial fees of office now received, such a return is annually made as not only to pay every expense, but to make a handsome return into the treasury, the reasonable calls made by this office for the necessary support of its establishment will, I hope, be thought justifiable; and, if the honorable the Secretary of State should concur in this opinion, and admit the propriety of such an engagement, I would take the liberty of recommending Mr. Keller, who is a very worthy, honest, and industrious man, a very ingenious and excellent workman, with a large family of helpless children.

I am, sir, with the highest respect and consideration, yours, &c.

WILLIAM THORNTON.

Hon. JOHN QUINCY ADAMS, *Secretary of State of the United States.*

DEPARTMENT OF STATE, WASHINGTON, *December* 3, 1822.

The Secretary of State being directed, in compliance with a resolution of the House of Representatives, of the 7th of May last, to report to the House, on this day, the number of active and well qualified clerks and accountants that will be necessary to perform the duties of their respective offices in the Department of State, by requiring a reasonably constant and diligent attention to business, has the honor of stating, that the number of clerks employed in the Department of State, by the act of Congress of the 20th of April, 1818, has, by constant experience since that time, been found inadequate to perform the duties devolving upon the Department; insomuch that there has been a necessity for the employment, almost uninterrupted, of one person, and occasionally of several persons, for extra copying and translating of papers for the Department, or to be laid before Congress. Notice of this necessity has been given to Congress at the commencement of every session, in the estimates of appropriations for the expenditures of the Department; and the appropriations have been made, accordingly, from session to session.

The persons employed in the Department of State as clerks or accountants are all active and well qualified for the performance of the duties respectively assigned to them. The practice of attending to business has not been confined to the hours from nine o'clock in the morning to three in the afternoon. One or more of the clerks is, throughout the year, in attendance till five or six in the afternoon, before which the offices of the Department are scarcely ever closed. Occasional absences for a few days are indulged in turn to all, and it sometimes happens that a temporary disqualification for active service is occasioned by illness. In the course of the last two years, the officers of the Department have shared in the general unhealthiness of the autumnal seasons; and a large proportion of them have at one period been disabled from the performance of their ordinary duties by severe indisposition at the same time. The business of the Department is otherwise performed with as much assiduity as a vigilant exaction of regular duty can insure.

All which is respectfully submitted.

JOHN QUINCY ADAMS.

Hon. P. P. BARBOUR, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT.

SIR: TREASURY DEPARTMENT, *December* 2, 1822.

In obedience to a resolution of the House of Representatives of the 16th of April last, requiring, among other things, the Secretary of the Treasury to report to the House, on the first day of the next session, the number of officers and messengers retained in the Treasury Department; and whether any of them are unnecessary, inefficient, or engaged in other pursuits or professions in nowise relating to the public service; and, also, whether a more efficient, as well as a more economical, organization of the Department cannot be adopted; I have the honor to submit the annexed reports of the several officers in the Treasury Department, which state the number of clerks and messengers employed at this time in their respective offices. From these reports, it appears that the officers employed are efficient and necessary for the correct and prompt discharge of the duties required of them.

The number of those officers employed in pursuits and professions in nowise relating to the public service is also stated.

In the office of the Secretary of the Treasury, seven clerks, a messenger, and assistant messenger, are employed, under the provisions of the act of the 20th April, 1818. They are all efficient, and necessary for the correct and prompt discharge of the duties of the office, and are not engaged in any pursuit or profession in nowise relating to the public service.

The change made in the organization of the Treasury, War, and Navy Departments, by the act of the 7th of May last, has greatly increased the labor of the clerks of this office. It has been found indispensably necessary to employ an additional clerk to keep the accounts of the appropriations of the War Department, and make out and record all warrants necessary for the disbursement of those appropriations. It is my duty, therefore, to submit to the House the propriety of authorizing the employment of an additional clerk, with a salary of $1,150.

The present organization of the officers in the Treasury Department is simple; no change in that organization is believed to be necessary. There are but two modes of economizing their expenses: the first is, the reduction of the salaries allowed by law to the officers employed; the second, the reduction of the number of those officers.

It is believed that it will be impolitic to reduce their salaries. They are now not more than sufficient for the support of the officers, and are considered not more than a fair equivalent for the services required of them. It is believed that a reduction of the number will be found to be practicable in some of the offices. This, however, will

depend more upon the character and conduct of the principal officers of the Department than upon legislative enactments.

It is proper to state, that, since the adjournment of Congress in May last, the Third Auditor has dispensed with the services of five clerks in his office, by which a saving of $5,250 has been effected.

I remain, with respect, your most obedient servant,

WILLIAM H. CRAWFORD.

Hon. P. P. BARBOUR, *Speaker of the House of Representatives.*

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *November* 27, 1822.

I had the honor to receive your communication of yesterday, enclosing a copy of a resolution of the House of Representatives, dated the 16th of April last; in relation to which you request me to state whether any of the officers now employed in this office are unnecessary, inefficient, or engaged in other pursuits in nowise relating to the public service; and to furnish such other information, within the terms of the resolution, as it might be in my power to give.

In reply, I take leave to state, that there are fifteen clerks, and a messenger and assistant messenger, employed in this office; that I do not consider any of them inefficient; that, except one of the clerks, who has been a justice of the peace since the year 1809, none of them are employed in any pursuits or professions other than those connected with the public service; and that the number employed has hitherto been considered absolutely necessary to a correct and expeditious discharge of the multifarious duties of the office, which (it may be added) have been recently increased under the provisions of the act of 7th of May last, further to amend the several acts relative to the Treasury, War, and Navy Departments; according to which the Secretary of the Treasury is required to issue warrants, in detail, for all moneys for the use of the War and Navy Departments; which warrants are countersigned by me, and entered, in this office, in two distinct and separate sets of books, under the different heads of appropriations, as required by law.

With considerations of high respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. WILLIAM H. CRAWFORD.

SIR: TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, *November* 28, 1822.

In reply to your note of the 26th instant, received yesterday, relative to the officers employed in this office, I have the honor to state, that the office contains eight clerks and one messenger, all efficient and necessary for the due discharge of the public business; and that none of them are engaged in "other pursuits or professions in nowise relating to the public service," except E. Reynolds and J. N. Moulder, who are justices of the peace.

Very respectfully, sir, your most obedient servant,

RICHARD CUTTS.

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

SIR: TREASURY DEPARTMENT, AUDITOR'S OFFICE, *November* 27, 1822.

In compliance with the request contained in your letter of the 26th instant, I have the honor to state, that there are now employed in this office twelve clerks and one messenger, of whom none are deemed by me unnecessary or inefficient; nor do I know or believe that any of them are "engaged in other pursuits or professions in nowise relating to the public service."

I have the honor to be, &c.

R. HARRISON.

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

SIR: TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *November* 27, 1822.

In reply to the letter you did me the honor to write me, under date of the 26th instant, requesting me "to state whether any of the clerks now employed in this office are unnecessary, inefficient, or engaged in any other pursuits in nowise relating to the public service," I have the honor to observe, that I do not see, in the present state of the business of the office, how any of them can be dispensed with; and, as to their talents and industry, the work done in the office proves they are not wanting in either.

In relation to any pursuits they may be engaged in, other than those appertaining to their public vocation, I have thought it my duty to take a declaration from each, which I have the honor to enclose, and which I know to be correct.

I have the honor to be, &c.

WILLIAM LEE.

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

List of Clerks employed in the Office of the Second Auditor.

James Eakin, first clerk, engaged in no business but that of the office.

Clerks.—John Wells, engaged in no business but that of a clerk; John Peters, do.; Samuel Lewis, do.; William Stewart, do.; Richard M. Boyer, do.; Ignatius Boone, do.; Robert Ellis, do.; Andrew C. Mitchell, do.; William Mechlin, do.; Richard B. Maury, do.; Leonard Mackall, as a notary public, but to that vocation he gives no time until after office hours; Andrew Kirk, engaged in no business but that of a clerk; Brook Mackall, do.

Messenger.—Samuel Hoot, engaged in no business but that of messenger.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *November* 27, 1822.

WILLIAM LEE, *Auditor.*

SIR: TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *November* 26, 1822.

I have the honor to acknowledge the receipt of your letter of this day's date, enclosing the copy of a resolution of the House of Representatives of the 16th of April last, and requesting me to state whether any of the officers now employed in this office are unnecessary, inefficient, or engaged in other pursuits or professions in nowise relating to the public service; and, if any of them are comprehended within the above description, to state their number; and also intimating that any other information within the terms of the resolution, which it is in my power to furnish, would be acceptable.

I have, accordingly, to state, that all the officers now employed in this office are necessary to the discharge of its duties; that none are inefficient; and that four of them are engaged in pursuits or professions in nowise relating to the public service, as will appear by the enclosed list of officers and messengers employed in the office.

In regard to the more economical organization of the office, alluded to in the resolution, I have to state, that the business relating to the old unsettled accounts having so far diminished as to authorize a reduction of the number of clerks employed in this office, I availed myself of the occasion to dispense with the services of five of them, and they were accordingly discharged in July and August last: thus effecting a reduction of the annual expense of this office from $28,600, as authorized by the act of the 20th of April, 1818, to $23,350, the amount estimated for the next year, and beyond which, in my opinion, no further reduction can at present be made, consistent with the prompt and efficient discharge of the duties of this office.

With great respect, I have the honor to be your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. W. H. CRAWFORD, *Secretary of the Treasury.*

List of Officers and Messengers now employed in the Office of the Third Auditor of the Treasury.

Peter Hagner, auditor, engaged in no other pursuit or profession; James Thompson, chief clerk, engaged in no other pursuit or profession, except being a bank director.

Clerks.—John Abbot, engaged in no other pursuit or profession; Charles Vinson, do; Richard Burgess, do., except being a partner in a line of stages from Georgetown to Baltimore, conducted by an agent; Edward S. Lewis, engaged in no other pursuit or profession, except being a member of the city council; Christopher Andrews, engaged in no other pursuit or profession; Robert Read, do.; James Kincaid, do.; Henry Whetcroft, do., except being a notary public; William Cook, engaged in no other pursuit or profession; William Ramsay, do.; Bennet Clements, do.; Thomas Gunton, do.; Henry C. Matthews, do.; John Compton, do.; James Davidson, do.; Marcus Latimer, do.; Samuel B. Goddard, do.; James Montgomery, do.; William S. Wilkins, do.

Messengers.—William Lenman, engaged in no other pursuit or profession; Thomas Dove, assistant, do.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *November* 26, 1822.

PETER HAGNER, *Auditor.*

SIR: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *November* 28, 1822.

I have the honor to enclose, herewith, a list of the clerks employed in this office; and to state that there are not more than are necessary, but that the business requires some more aid to complete the examination and settlement of the old accounts, which I have not been able fully to accomplish.

I have noted on the list answers to the other inquiries in your letter of the day before yesterday.

I have the honor to be, with great respect, sir, your obedient servant,

CONSTANT FREEMAN, *Fourth Auditor.*

The Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

A list of the Clerks and Messenger employed in the Office of the Fourth Auditor of the Treasury, showing their efficiency and pursuits, agreeably to a resolution of the House of Representatives of the United States, passed April 16, 1822.

Thomas H. Gilliss, chief clerk, commenced in 1798; George Macdaniel, clerk, commenced in 1799; Joseph Mechlin, clerk, commenced in 1799; John Macdaniel, clerk, commenced in 1800; Henry Forrest, clerk, commenced in 1800; James H. Handy, clerk, commenced in 1814; John B. Martin, clerk, commenced in 1816; George Gilliss, clerk, commenced in 1817. These gentlemen are efficient, and have no business or employment but their clerkship.

Ezekiel Macdaniel, clerk, commenced in 1806, is justice of the peace for the county of Washington, D. C.; Robert Getty, clerk, commenced in 1813, is clerk of the market in Georgetown, D. C.; William W. Clagett, clerk, commenced in 1808, is partner in the house of Robert Kirby & Co., merchants, Georgetown, D. C.; James Cassin, clerk, commenced in 1816, is concerned in business with which I am not fully acquainted. These gentlemen are also efficient clerks; their private business does not interfere with their duties in this office. John Craven, clerk, commenced in 1799, is eighty-one years of age; he has been one of the best clerks in the office, but age has impaired his strength; he is, however, now one of the most attentive, and does all in his power. Thomas J. Sutherland, messenger, commenced in 1799.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *November* 28, 1822.

CONSTANT FREEMAN, *Fourth Auditor.*

SIR: GENERAL LAND OFFICE, *November* 28, 1822.

In answer to your letter and the resolution of Congress which it enclosed, I have the honor to state, that, from the short time I have been in the Land Office, it has not been possible for me to become perfectly acquainted with the detailed duties of all the clerks engaged. Without this knowledge, I cannot so safely determine on their qualifications to discharge the duties assigned them. A very short time will enable me to speak with confidence on this subject. At present, I can only remark, that, so far as my personal observations have extended, (and they have been unremitting since I have been in the office,) I find some of the clerks more efficient than others, but I might do injustice by saying that any of them are inefficient. Nothing but a want of the proper means shall prevent me from giving efficiency, where it may be wanting, to every part of this office.

There are twenty-three clerks engaged in the Land Office, and, from the great increase of labor under the late law granting relief to purchasers of the public lands, the number cannot be lessened, at present, without prejudice to the public service. There is one messenger attached to the office, who, in my opinion, is both necessary and efficient.

Two of the clerks engaged in this office have professions unconnected with their duties as clerks. I refer to the Rev. Daniel Baker and the Rev. Joseph S. Collins. The former, I understand, was employed by my predecessor, with the condition that every Saturday should be allowed him to make suitable preparations for the discharge of his ministerial duties; the profession of the latter in no respect interferes with his duties in the office. In justice to Mr. Baker, I would remark, that I have found him very attentive to his duties, and well qualified to perform them.

F. C. De Krafft, who is one of the clerks in this office, is a surveyor for the corporation of this city; but I am informed that this business takes but little time, and does not require his absence during office hours.

Alexander Estep, who is also a clerk in the office, lives on a farm, and superintends its cultivation, though this does not interfere with his attendance at the office during the hours which have been assigned for business. I believe none of the other gentlemen employed in this office are engaged in any pursuit or profession unconnected with their public duties.

As I have so recently entered upon the duties of this office, it will not be expected that I should suggest any changes in its organization. I, however, expect that some retrenchment in expenditure may be made, to accomplish which legislative aid will not be necessary.

Very respectfully, your obedient servant,

JOHN McLEAN.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

Sir: Treasury Department, Fifth Auditor's Office, *November* 28, 1822.

I have the honor to state, in compliance with your letter of the 26th instant, and the resolution of the House of Representatives of the 16th April last, which was enclosed, that there are employed in this office twelve clerks, besides a messenger; that all the former are necessarily and usefully employed in adjusting, under the supervision of the Auditor, the accounts emanating from the Department of State and the General Post Office; in attending to the business of the late Commissioner of the Revenue, including the light-house establishment; and in keeping the docket, and copying and recording the correspondence arising out of the business of the agent of the Treasury, now of great magnitude and importance. It is not known that any of them are engaged in pursuits distinct from their official duties.

With great respect, I am, sir, your obedient servant,

S. PLEASONTON, *Auditor.*

The Hon. W. H. Crawford, *Secretary of the Treasury.*

Sir: Treasury Department, Treasurer's Office, *November* 28, 1822.

In obedience to your instructions of the 26th instant, I have the honor to state to you that none of the officers now employed in my office are either unnecessary or inefficient; nor do I know or believe that any of them are engaged in pursuits not relating to the public service, other than their ordinary family concerns, which do not at all interfere with their official duties. It does not occur to me that I can furnish any other information within the terms of the resolution of the House of Representatives of the 16th of April last.

I have the honor to be, most respectfully, sir, your obedient servant,

TH. T. TUCKER, *Treasurer of the United States.*

Hon. W. H. Crawford, *Secretary of the Treasury.*

Sir: Treasury Department, Register's Office, *November* 28, 1822.

I had the honor of receiving your letter, transmitting the resolution of the House of Representatives of 16th April last, in relation to clerks; and I beg leave to state the following division of the records of this office, and the number of clerks employed therein:

Four clerks are employed on the accounts of the revenues of the United States, including those of the collectors of the customs; of the internal revenues in their final settlement; of the Land Office; and of the General Post Office.

Five clerks are employed in the various books and accounts relating to the accounts of the general appropriations of public moneys made by law, and of the expenditures under these appropriations; the receipts of moneys into the Treasury, and keeping the personal accounts. To this branch of the records, a law of the last session of Congress requires additional entries of every payment made by the Treasurer in the War and Navy Departments: this arrangement took place on the 1st of July last.

The accounts of the General Loan Office books, and the accounts on the books of the Treasury, containing the credits to individuals, including the unclaimed dividends, employ two clerks.

Two clerks are employed on the books and records of the commerce of the United States, (an arrangement of a recent date,) under the sanction of a law of Congress: these relate to the importation and exportation of foreign or domestic articles, and of foreign and domestic tonnage; the statistical tables whereof are, by law, laid annually before Congress.

Four clerks are employed on the marine records, pursuant to the acts of Congress of the years 1792 and 1793, in relation to the recording, registering, enrolling, and licensing of ships and vessels of the United States. Those acts are respectfully referred to, in regard to the numerous records arising out of them at the Treasury, and the consequent correspondence with the collectors of the customs.

Two clerks are employed on miscellaneous records, in preparing statements for Congress; they answer the inquiries having a relation to the old Government books, (which are entire,) and records in part preserved, in relation to those books; and the keeping of the accounts of the contingent expenses of the several offices of the Treasury Department.

Two clerks are employed occasionally in copying accounts prepared with the formalities of law for suit. One of them has exclusively the charge of the fire-proof records, and keeps the registers of the accounts passed by the First Comptroller of the Treasury, embracing the accounts settled by the First and Fifth Auditors.

The Register begs leave to observe, that it is a rule to keep the records, as nearly as possible, fully up; and that, when additional business requires more time than is usually devoted, the clerks are engaged in finishing their business at all hours; and, in cases of sickness or indispensable absence, their business is, notwithstanding, kept up by one or more of the other clerks in the class to which it may apply.

He, therefore, respectfully states that, from the best view he can take, it does not appear to the Register that, with the additional duties arising under the afore-mentioned recently passed acts of Congress, the business can be conducted with less than twenty-one clerks. Those employed are all efficient; without other professions, excepting one who is a notary public, one who is a minister of the Gospel, and one who, although connected in trade, the activities thereof are devolved upon his son.

I have the honor to be, sir, with great respect, your obedient, humble servant,

JOSEPH NOURSE.

Hon. W. H. CRAWFORD, *Secretary of the Treasury.*

DEPARTMENT OF WAR.

SIR: DEPARTMENT OF WAR, *December* 2, 1822.

In compliance with the resolution of the House of Representatives of the 16th April, 1822, directing "that the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, and the Postmaster General, be required to report to this House, on the first day of the next session, the number of officers and messengers retained in their respective Departments; and whether any of them, and, if any, how many of them, are unnecessary, inefficient, or engaged in other pursuits or professions in nowise relating to the public service; and, also, whether they cannot adopt a more efficient, as well as a more economical, organization of their respective Departments;" I have the honor to report, that there are employed in this Department thirty-four clerks and four messengers, viz:

In the War Office proper.—C. Vandeventer, chief clerk; Lewis Edwards, Gideon Davis, Samuel S. Hamilton, John P. Fenner, clerks; and William Markward and Francis Datcher, messengers.

In the Bounty Land Office.—Nathaniel Cutting, William M. Stewart, Edward Stevens, Hezekiah Miller, and John E. Frost.

In the Pension Office.—James L. Edwards, William Gordon, William Hickey, Ebenezer Stout, John H. Henshaw, Francis Wright, Thomas B. Addison, David Henley, and Benjamin L. Beall.

In the Engineer Department.—G. T. Rhodes, George Bibby.

In the Ordnance Department.—John Morton, William Riddal, and Reuben Burdine.

In the Paymaster General's Office.—Nathaniel Fry, Andrew Ramsey, clerks; Jacob Brodback, messenger.

In the Office of Commissary General of Purchases.—Timothy Bangor, James Irvine, Robinson R. Moore, clerks; John Willmer, messenger.

In the Surgeon General's Office.—James Lovell.

In the Office of Commissary General of Subsistence.—Charles G. Wilcox, John Mitchell.

In the Adjutant General's Office.—Brooke Williams, John M. Hepburn.

The duties in the Bounty Land and Pension Offices having decreased within the present year, by the examination and settlement of claims, it is found that one clerk in the former, whose particular duties have nearly expired, can be dispensed with after the present year, and two in the latter, at the end of the present session of Congress; and, consequently, the estimates for the ensuing year have been made for only four clerks in the Bounty Land Office, and seven in the Pension Office, after the first quarter.

The only inefficient clerk in the Department is Colonel Henley, who is seventy-four years of age, and has been in the service of the United States, except an interval of twelve years, from the year 1775 up to the present day. He filled several offices in the staff during the Revolution; was aid-de-camp to Lord Stirling; at one period commanded the *elite* of the army, and has subsequently occupied several important stations under the Government. From his age he is incapable of performing the duties of a clerk, but, from his recollection of revolutionary events, he is useful in the examination of revolutionary claims.

Of the clerks and messengers employed in the Department, there are none "engaged in other pursuits or professions," with the exception of Gideon Davis, a clerk, who has a bookstore in Georgetown, conducted principally by an agent.

"A more efficient or economical organization" of the Department, it is believed, cannot be adopted.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. PHILIP P. BARBOUR, *Speaker of the House of Representatives.*

NAVY DEPARTMENT.

SIR: NAVY DEPARTMENT, *December* 2, 1822.

In compliance with a resolution of the House of Representatives, passed on the 7th day of May last, I have the honor to report to you, that six active and well-qualified clerks, devoting a reasonably constant and diligent attention to business, are necessary to perform the duties of this Department.

Enclosed is a report from the Commissioners of the Navy, stating the number of clerks necessary to perform the duties of their office.

I have the honor to be, with very great respect, sir, your most obedient servant,

SMITH THOMPSON.

The Hon. the SPEAKER *of the House of Representatives.*

SIR: NAVY COMMISSIONERS' OFFICE, *November* 25, 1822.

Upon that branch of the resolution of the House of Representatives of the 7th May, 1822, which calls for a report as to the "number of active and well-qualified clerks and accountants that will be necessary to perform

the duties of their respective offices and departments, by requiring a reasonably constant and diligent attention to business," the Commissioners of the Navy have the honor to report, that a reasonably constant and diligent attention to business has ever been required of the clerks in their office, and that, to perform the duties of the office, six clerks and one draughtsman have been, and continue to be, in their opinion, necessary.

I have the honor to be, with great respect, sir, your most obedient servant,

JNO. RODGERS.

To the Hon. SMITH THOMPSON, *Secretary of the Navy.*

SIR: NAVY DEPARTMENT, *December* 2, 1822.

In conformity to the resolution of the House of Representatives, passed on the 16th day of April, 1822, requiring information as to the number, efficiency, &c. of the officers and messengers retained in the respective Departments, I have the honor to report, that six clerks, a messenger, and assistant messenger, are retained in this Department; and that none of them are unnecessary, inefficient, or engaged in other pursuits or professions than the public service.

As regards the present organization of the Navy Department, I am not aware of any mode by which it could be rendered more efficient or economical.

Enclosed is a similar report from the Navy Commissioners.

I am, most respectfully, sir, your obedient servant,

SMITH THOMPSON.

The Hon. the SPEAKER *of the House of Representatives.*

SIR: NAVY COMMISSIONERS' OFFICE, *November* 25, 1822.

Upon the subject of the resolution of the House of Representatives of the 16th April, 1822, calling for information with regard to "the number of officers and messengers" retained, "and whether any of them, and, if any, how many of them, are unnecessary, inefficient, or engaged in other pursuits or professions in nowise relating to the public service," the Commissioners of the Navy have the honor to report, that there are retained in the office under their charge one secretary to the board, six clerks, one draughtsman, and one messenger; that none of these are unnecessary or inefficient; and that none of them are engaged in other pursuits or professions which interfere with their public duties.

With regard to the last branch of the resolution, "whether they cannot adopt a more efficient, as well as a more economical organization of their respective Departments:" as the Commissioners' Office is an appendage to one of the Departments referred to, it is not, it is presumed, expected of them to express any opinion. So far as regards the office immediately under their charge, they would respectfully observe, that the principle upon which it has been organized appears to them efficient and economical.

I have the honor to be, with great respect, sir, your most obedient servant,

JNO. RODGERS.

To the Hon. SMITH THOMPSON, *Secretary of the Navy.*

POST OFFICE DEPARTMENT.

SIR: GENERAL POST OFFICE, *December* 2, 1822.

I have the honor to enclose a report made in pursuance of a resolution of the House of Representatives, passed on the 16th April, 1822.

I have the honor to be, very respectfully, your obedient servant,

R. J. MEIGS, JUN.

Hon. PHILIP P. BARBOUR, *Speaker of the House of Representatives.*

POST OFFICE DEPARTMENT, *December* 2, 1822.

The Postmaster General, in compliance with a resolution of the House of Representatives passed on the 16th April, 1822, respectfully reports:

That there are two Assistant Postmasters General, one chief clerk, twenty-two clerks, one messenger, and one assistant messenger, employed in the General Post Office; all of whom are necessary and efficient. The senior Assistant Postmaster General is president of a bank, but the meetings of the board are not held during office hours, and it does not in the least interfere with the public duties. One clerk is minister of one of the Baptist congregations in this city, and one other clerk accommodates members of Congress with board during the session.

The Postmaster General does not perceive that any advantageous or economical change can be made in the organization of his office, excepting by the employment of two additional clerks.

The number now authorized to be employed was founded on the duties required to be performed in 1817. These have greatly increased since that time: this will appear from the various acts of Congress establishing new post roads, and the reports made by this office to Congress of the number of post offices and number of miles of post roads. In the year 1817, the whole number of post offices was three thousand four hundred and fifty-nine, and they now amount to nearly five thousand three hundred; and the number of miles of post roads was then fifty-two thousand six hundred and eighty-nine, and they are now estimated at upwards of eighty-four thousand. The number of post offices being so much increased, greatly increases the labor of the office; each having to render four accounts in a year, which are increased by the balances to be collected, &c. The numbers of contracts to be made, superintended, and paid for, &c. are increased in a greater proportion. In consequence of this, notwithstanding occasional help has been employed, and great industry exerted in the office, the business cannot be kept up so well as is desirable.

An account of the amount of occasional clerk hire is herewith transmitted, and it is hoped that it may be provided for.

All of which is respectfully transmitted.

R. J. MEIGS, JUN.

An account of expenditure by the Postmaster General for extra clerk hire, viz:

Horace H. Edwards,	$300 00
Henry P. Wilcox,	250 00
Robert H. Ward,	87 79
Alexander Dyer,	25 00
John McLeod,	150 00
John Lathrop,	416 43
Joseph Haskell, October 1st, 1819, to April 1st, 1821,	1,200 00
Samuel Fitzhugh, May 15th to October 1st, 1821,	300 00
Josiah F. Caldwell, October 26th to December 1st, 1818,	97 21
Thomas B. Dyer, W. G. Eliot, J. Suter, and A. Dyer,	100 00
Thomas McLeod, July 1st to December 31st, 1822,	300 00
B. S. A. Low, September 1st, 1821, to April 20th, 1822,	255 55
	$3,481 98

R. J. MEIGS, JUN.

POST OFFICE DEPARTMENT, *December* 2, 1822.

17th CONGRESS.] No. 532. [2d SESSION.

MEDALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 19, 1822.

Mr. ALEXANDER SMYTH, from the Joint Library Committee, to whom was referred the letter of George W. Erving, Esq. accompanying a collection of medals, reported:

That they have had the same under consideration, and recommend the adoption of the following resolution:

Resolved, That the Speaker be directed to express to George W. Erving, Esq. the thanks of this House for the liberal donation of French and American medals made by him to Congress, for the use of the national library.

SIR: BOSTON, *July* 4, 1822.

The letter which I had the honor to address to you on the 4th July, 1819, and which Mr. Lowndes was so obliging as to take charge of and deliver, was intended to have been accompanied by the collection of medals therein referred to, but this was unfortunately lost on board the ship "Factor" bound to New York; of which accident it appears that the House was duly informed by its committee. As soon as I heard of it, I endeavored to procure a duplicate of the collection, and succeeded a few days before I left Paris, in April last. This, together with the medals which have been struck at Paris to commemorate some principal events of, and men distinguished in, our Revolution, I take the liberty, through you, sir, of herewith sending and offering to Congress for the use of the national library.

With sentiments of the highest respect, sir, your most obedient servant,

GEORGE W. ERVING.

To the Hon. the SPEAKER *of the House of Representatives.*

P. S. A printed catalogue of the French medals is enclosed in the case which contains them. The American medals are but five, proper, viz: One of General Washington at the siege of Boston; one of Doctor Franklin; one of Paul Jones; two of the battle of the Cowpens. To these I have thought it well to add Columbus and Kosciusko, taken from the collection of illustrious men deceased, now publishing in the French mint. G. W. E.

NOTE.—Those marked thus (*) were ordered by the Government, and designed and executed under the direction of M. Denon.

17th Congress.] No. 533. [2d Session.

MARYLAND IN [FAVOR OF THE NAVY AND INTERNAL IMPROVEMENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 3, 1823.

Whereas the State of Maryland is, in a peculiar degree, dependant on that aid and protection, to secure which was the great object of the confederation of these United States; and especially is exposed, from its vast extent of navigable waters, and the geographical position of the city of Baltimore, to the attacks of a maritime enemy, who, as has been demonstrated by the events of the late war, can harass our citizens, plunder and destroy our property, possess themselves of our territory, and prevent our necessary transactions, so far as a large proportion of our citizens are affected: And whereas exemption from such danger to the lives, and exposure of the fortunes of our citizens, can only be secured to us by the liberal application of those means which the good people of the United States have placed at the disposal of the Government of the Union for the common defence and general welfare; and it is not only the soundest policy, but the best dictate of prudent economy, to use the period when a general peace, and the ordinary resources of our country, afford opportunity to the Government to provide for the defects in our system which a state of war has disclosed, and to be prepared against a recurrence of injuries which may be repeated at a moment impossible, by any political calculation, to be anticipated: And whereas it is at all times the duty of the citizens of a free Government to deliberate on the policy and measures of those to whom they have confided the administration of their political concerns, and, on occasions when contrariety of opinion is entertained on matters vitally affecting their best interests, to express their sentiments with candor and firmness:

We, the members of the Senate and House of Delegates, acting as the representatives of the people of Maryland, and influenced by a belief that it is highly expedient, in the present situation of our political concerns, to announce the opinions and wishes of the people of this State, in relation to such measures of the Government of the United States as have in view the better security of our country against the approaches of a hostile maritime force, do, therefore,

Resolve, That we cordially approve the efforts of the General Government to foster our navy, and to cause a progressive increase of this means of defence, which experience has taught us to regard as necessary to our protection, and to the maintenance of that high and dignified character which has exalted our country amongst the nations of the earth. That we cordially approve of every effort of the General Government to extend and perfect a system of defence by fortifications, highly useful in other places, and essentially necessary to the waters of the Chesapeake and its tributary rivers.

And whereas, from the relative position of this State and those vast sources of successful enterprise and wealth, (the rivers Potomac and Susquehannah,) as well as from the relation of our largest city to an extensive district of inland country, it is of the utmost importance to our citizens that a system of internal improvement should be vigorously pursued: *Therefore, we do further resolve*, That we will highly approbate, and zealously co-operate with the General Government in the adoption of such measures as will afford our country the facilities and advantages which nature has placed in our control, and which a wise policy should induce us to improve.

Resolved, That a copy of the foregoing preamble and resolutions be forwarded by the Executive to each of our Senators and Representatives in Congress, with a request that they will co-operate in the promotion of the measures which, in the sense of the Legislature, are best calculated for the interests of the Union at large, and especially of this State.

By order: WILLIAM KILTY, *Clerk.*

SENATE OF MARYLAND, *December Session*, 1822.

I hereby certify that the above is a true copy of the resolutions, the original of which passed both branches of the Legislature at its present session, unanimously.

WILLIAM KILTY, *Clerk Senate of Maryland.*

True copy from the original on file in the Executive Department of the State of Maryland.

NINIAN PINKNEY, *Clerk of the Council.*

17th Congress.] No. 534. [2d Session.

MILITARY ROAD FROM PLATTSBURG TO SACKETT'S HARBOR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1823.

SIR: DEPARTMENT OF WAR, *January* 21, 1823.

Pursuant to a resolution of the House of Representatives of the 15th instant, directing the Secretary of War "to communicate to this House what progress has been made towards the completion of the military road leading from Plattsburg to Sackett's Harbor, in the State of New York; how much of said road remains unfinished; the probable expense of completing the same; and, also, any information in his possession showing the importance of said road in a military point of view;" I have the honor to transmit, herewith, a report of Major General Brown, which furnishes the information required.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. P. P. BARBOUR, *Speaker of the House of Representatives.*

SIR: HEAD-QUARTERS OF THE ARMY, *January* 20, 1823.

In obedience to your orders of the 17th instant, relative to "the military road leading from Plattsburg to Sackett's Harbor, in the State of New York," I have the honor to make the following report, commencing with a statement of "the importance of said road in a military point of view."

In case of war against the Canadas, Plattsburg and Sackett's Harbor must be the principal depots of the United States for the Ontario, St. Lawrence, and Champlain frontiers. At those points the military resources of the country can be most conveniently assembled, and from them most effectually directed against the Canadian territories. To avoid in a future war the embarrassments of the last, it is conceived necessary that we should possess the power of conveying these resources, through internal channels, to any point of the river St. Lawrence on our own border.

For this purpose the road from Plattsburg was commenced, with the intention of extending it to French Mills, on the Salmon river, which empties into the waters of the St. Lawrence. The road from Sackett's Harbor was commenced with the same object, and was intended to be extended to Morristown, on the St. Lawrence. It was foreseen that the natural growth of the country between French Mills and Morristown would soon complete the connexion without external aid. By means of this communication, the land forces on the two lakes (Ontario and Champlain) may be promptly united at any point on our St. Lawrence border, and thrown at once upon the possessions of the enemy. On the possession of this power a vigorous prosecution of hostilities must essentially depend. Besides the advantage of being able to penetrate the Canadas in this direction, at any point which we may select, we may also, by occupying a point which shall command the navigation of the river, cut off the water communication between the two provinces, and force the enemy to convey his troops and munitions through an inland channel, with great increase of expense, delay, and uncertainty. His operations in the upper province would be embarrassed in a like proportion, and this part of his possessions would be more speedily reduced.

It is to be observed that the communication proposed to be opened between the St. Lawrence frontier and the interior of the country can only be effected by roads to Plattsburg and Sackett's Harbor, as a right line drawn from any point on this frontier to Albany passes over a country so rough, marshy, and sterile, as to be almost uninhabitable.

From Plattsburg to French Mills, about twenty miles of road have been completed. The remainder is opened, but requires to be cleared of stumps and stones, and to be so formed as to carry off water.

From Sackett's Harbor to Morristown, about twenty miles have been completed. The remainder is opened, but requires to be cleared and formed in the same manner.

As both the roads lead through a level country, avoiding mountains and rivers, and even considerable hills, and as on both the great obstructions have already been removed, the expense of completing them will arise from the extra compensation allowed to soldiers, when employed, and the hire of oxen. It is estimated that they may be completed in two seasons, and that the expenditure in each season would not exceed $3,500.

From indications already given, there can be no doubt that the natural efforts of the country between French Mills and Morristown will in a few years perfect the communication, and secure those facilities for making a vigorous application of our military powers in war, which were the object of the Government in commencing the work.

I have the honor to be, sir, your obedient servant,

JACOB BROWN.

Hon. J. C. CALHOUN, *Secretary of War.*

17th CONGRESS.] No. 535. [2d SESSION.

NAVIGATION OF THE POTOMAC RIVER ABOVE TIDE WATER.

COMMUNICATED TO THE SENATE, JANUARY 27, 1823.

SIR: IN COUNCIL, ANNAPOLIS, *January* 24, 1823.

In pursuance of a resolution of the General Assembly of Maryland, we have the honor to send to you, enclosed, a copy of the report of the commissioners appointed by the Executives of Maryland and Virginia to survey the river Potomac, and have respectfully to ask that you will lay the same before the Senate of the United States, over which you preside.

We have the honor to be, with great respect, your obedient servant,

SAMUEL STEVENS, JUN.

The Hon. the PRESIDENT *of the Senate of the United States.*

To His Excellency the Governor of Maryland:

The commissioners appointed by the law of Virginia, and the resolutions of Maryland, of the year 1821, jointly to examine the affairs of the Potomac Company, the state of the navigation of the river Potomac, its susceptibility of improvement, and to make report whether the said company had complied with the terms of its charter granted by the two States, and its ability to comply within a reasonable time, and whether any, and what, aid should be given to the said company, and what would be the best means of effecting an improvement in the navigation of the said river, report:

That, in compliance with the injunctions of the two States, they did assemble in Georgetown, on the 2d day of July last, and commenced the discharge of their duties by examining the affairs of the Potomac Company; and it appears the company had not only expended the whole of the dividing stock, but have incurred heavy debts, which their present resources can never enable them to discharge; nor is it reasonable to expect, in such circumstances, that they can ever effect the objects of their incorporation. A succinct statement of the accounts, debts, receipts, and expenditures of the said company, is hereto annexed, marked A.

The provisions and special conditions of the charter and laws of the two States then occupied their attention, previous to the examination of the works which had been executed under the direction, and at the expense, of this company, on the river. From the best consideration which they could give the subject, it appears to the commissioners that the Potomac Company have failed to comply with the terms and conditions of the acts of their incorporation.

An abstract of the charter, and the laws relative to that subject, are herewith presented, marked B. It will be there seen that the right to take tolls, and all other privileges, were granted them on condition that the navigation of the river should be completed within a given specified time, which has been variously extended by subsequent laws, and finally expired, under the Maryland law, on the 1st of January, 1813; and, under that of Virginia, on the 1st January, 1820: that the navigation required to be effected was such as should "render the river well capable of being navigated, in dry seasons, by vessels drawing one foot water:" that, upon an application by the Potomac Company to the Legislature of Virginia, in 1802, for an exposition of the words "dry seasons," that Legislature declared that those words, as used in the charter, were to be intended and understood "all seasons;" an interpretation of which the correctness cannot be well questioned. From an actual measurement of the depth of the river by the commissioners, it was ascertained that, at the time of their examination of it, there was not a sufficient depth of water for the navigation of boats drawing even six inches. It is true that, at their session of 1802, the Maryland Legislature passed a law, founded upon the idea that the Potomac Company had accomplished the object of their incorporation, confirming to that company all the rights and privileges conditionally granted in the charter. But it is extremely apparent that to absolve from an obligation requires equal or paramount power to that which imposed it; and, of course, neither Virginia nor Maryland could, singly, release a condition which the Potomac Company had bound themselves to both to perform. The act of the Maryland Legislature can, therefore, only be considered as nugatory; and, indeed, that Legislature itself seems so to have considered it; for, in the year 1809, seven years after the passage of the confirmatory act, it passed another law, extending to that company the time of completing the navigation of the river. The commissioners, upon full consultation, do not deem it prudent or expedient to give further aid to the Potomac Company; the only alternative, therefore, that remains, is, to divest them of their charter, and adopt some more effectual mode of improving the navigation of the river. Nor can this procedure be regarded as harsh, when duly considered; the law and justice of it, it is presumed, have been made manifest. Will it be an injury to the stockholders? Look at the exposition of their affairs, furnished by the company itself; see the annual amount of their tolls; and, in the present defective state of the navigation, which they have no means of improving, can it ever be increased? Deduct from it the expense of repairs and contingencies, as salaries to clerks and toll-gatherers, and then compare it with the amount of their debts, or even the annual interest of those debts; and visionary indeed must be that man who can expect ever to draw a cent of profit from such stock, with such resources. Can such debts ever be redeemed? The fact is, the Potomac Company are precisely in the situation of all other chartered companies who fail in their undertakings: their expected profits have eventuated in loss and disappointment.

It is due, however, to that company, to state, that, although the errors under which they labored in the principles and practice of improvements in navigation have been great, and have caused a useless expenditure of large sums, still they acted with the best lights heretofore possessed by the best informed persons in our States. They have not only expended the whole of their original stock in attempts to improve the river, but nearly all their tolls, with the exception of their necessary annual expenses, have been appropriated to the same purpose. And this failure to accomplish the objects of their incorporation may be fairly attributed to a want of information on the subject at the very early period of our existence as a nation when that company was formed.

The journal of notes made by the commissioners of the condition of the navigation and depth of water, taken from day to day, as they descended the river, is hereto annexed, marked C; from which it will be seen that the river, to Goose creek, which has been ascertained to be one hundred and fifty-seven miles long, is in no section of ten miles at all navigable, in low water, by loaded boats of any kind or dimensions; and, for more than eighty miles, obstructions from shallows, sufficient to stop a skiff, are to be met with, on an average division of that distance, every half mile.

The present state of the navigation.

It has been stated, and is believed by many persons, that the river Potomac, in its present condition, is navigable nearly half the year. The Potomac Company are required to give a low water navigation, of a foot deep, throughout the year. This circumstance, and the idea entertained of the possibility of confining the waters in the bed of the river to narrow sluices, have confirmed this opinion. The commissioners have given a minute examination to this branch of the duties imposed upon them, and satisfied themselves, from their own observations, and the most careful inquiries, that no such blessing is enjoyed by the fertile districts through which the river flows.

The floods and freshets give the only navigation at present used. They occur, usually, from the 1st September to the 20th June; variously, however, in various years. And it so happens that, although boats are known in some years to pass down through each of the months intervening between these dates, yet, in consequence of the ice during winter, and the short continuance of a flood giving navigable water, the average duration of the boating time, in a course of many years, does not much, if at all, exceed eight or ten days passable water for full-loaded boats, late in the year, and from twenty-five to thirty-five days in the spring of the year; making the whole time when produce and goods can be stream-borne, in the course of one entire common year, from thirty-three to forty-five days. The duration of this period necessarily increases as you approach the Great Falls, and decreases as you ascend to the head of the river. The evils attending the present state of the navigation lessen the benefits which might be supposed to be derived from even this short period. They chiefly consist in its uncertainty and dependance on the vicissitudes of the seasons; in the great rapidity of the current of the river, in consequence of the great fall or inclination of its plane, in proportion to its length; in its dangerous character, arising from the wildness of the torrent, and the suddenness of its courses and meanders—having worn its devious way, in the lapse of ages, through countless ridges of rocks and mountains; and in consequence of huge fragments of rocks and large loose stones, the remains of the wasted mountains, scattered thickly, and in some places rising over the entire bed of the river, and leaving no passage for loaded boats, impelled by the rapid and impetuous current, but what may be found by warping and winding, with the utmost exertion of strength, agility, and watchfulness, on the part of the crew, through a most irregular course. By these dangers many boats and cargoes are destroyed. The uncertainty and the shortness of the duration of the floods are the very worst features in the character of this navigation. This uncertainty frequently occasions the most ruinous disappointments to the farmers, millers, and merchants. The expected rains are often denied; and the consequence frequently is, that contracts cannot be complied with, which occasions loss and ruin. Sometimes, a small rise and deceitful appearances induce a collection of the scattered crews of the boatmen from the mountains, and a general shipment of produce; by the time they have descended forty or fifty miles down the river, a fall in the water takes place; the boats are compelled to stop, and their storage,

increased expenses, neglect of agents, and natural causes, waste the profits or damage the produce of all concerned. This chiefly occurs in the upper part of the river. Sometimes, the rains come on sooner than they are expected, and the rise and fall of the river succeed each other before the farmers are prepared to make their shipments; then the crops lie on hand till next year, subject to all the inconveniences and losses accompanying such circumstances. And when the floods are most propitious, and the navigation is the best, under existing circumstances, the usual consequence is, that the produce of immense districts of country, among the most fertile in the Union, is all forced into market at one time, and a capital, which might be sufficient to give better prices if the merchant had time to receive the proceeds of one investment before he made a second, is found inadequate to give a fair price to all, under such disadvantages. Thus, the farmer has frequently no alternative left but to sacrifice the fruits of his year's labor. The expenses are already too great, and the produce will bear no additional cost or risk of shipping farther; and to carry it home again, is impossible; for, sometimes, even the boat which brought it down cannot be floated back empty. It is surely to be lamented that, wretched as is this navigation, it is the sole dependance of a vast extent of country, which, in spite of its fertility, and the value of its inexhaustible minerals of the most useful kind, is most evidently drooping and suffering for want of a ready market for its productions, without which stimulus it is impossible for its agriculture to flourish, or its natural resources to be developed.

Bad, indeed, as is the navigation above described, still this conveyance is preferred, by all who can avail themselves of it, to land carriage. With all its uncertainties and risks, it is found cheaper by all the farmers and millers than maintaining supernumerary horses throughout the year for the purpose of carrying produce to market. If additional proof were required, a stronger cannot be adduced than this very circumstance of the immense superiority of navigation over land carriage. If navigation, encumbered with so many risks and uncertainties and unavoidable expenses, is still preferred, by all who can avail themselves of it, to the usual land carriage, assisted by improved roads to all the seaports; and if this, the worst and dearest of all kinds of navigation, does yet give an increased value to the lands contiguous to it over those whose sole reliance is in the turnpike, what may we not reasonably calculate will be the still further increased value of the lands afforded by a safe and constant still-water navigation?

Sluice navigation.

As what has been called sluice navigation has been the kind adopted by the Potomac Company, and the one on which so large a part of their funds has been expended, it may be necessary to give an explanation, drawn from actual observation of what has been done and tried for many years, of this kind of work on the Potomac.

The sluices on this river are of three kinds: the first, which are chiefly found in the upper part of the river, are channels formed by low wells; the second are channels formed by excavating the rocky bottom of the river; the third kind, which are yet used, and have been of service to the navigation in high water, are channels opened near the banks of the river, around the rapids and small falls in the current, as at Harper's Ferry, Payne's Falls, &c., to avoid the great force of the torrent in mid stream, in such situations, and with the view of giving the boatmen a land path on the bank, on which by a rope they may drag the boat up the stream, when the violence of the current is too great to be overcome by setting poles. These channels, though used, are of very imperfect and temporary construction, the bottoms of no one of them being graduated. They are certainly too imperfect to be called canals, although such is their common appellation. The two first of these kinds of sluices are formed on erroneous principles, and have failed to render any service to the navigation of the river. The errors in the first, requiring detail, will be presently explained. The errors in the second kind, or in excavating channels in the bottom of the stream, consist in attempting on a long line of a stream, inclining all the way in its whole length, to regulate the depth by partial cutting or deepening the bottom. Unless you bring water to a level the whole length of the line of its stream, any partial cutting or deepening in spots along the line so inclined only serves to transpose a shallow a little further up the line, or to make hollow basins of no service. And in a river where the chief failure in its navigation arises from the too long and too frequent deficiency of depth of water necessary for boating, owing to the great inclination of the plane of its stream and to its consequent rapid discharge of water, if you smooth the plane by removing all obstructions, the rapidity will of course be increased, and the sooner will the deficiency in the depth be felt. The low dam or walling plan of improvement, though the opposite in its effect to the one described, and not so radically erroneous on the general principles, is no less so in its application to such a river as the Potomac. To make this manifest, some detail of the circumstances in which they are used and placed is necessary. The ruins of this kind of work are to be seen some distance above Cumberland, (not, however, reaching to Savage river,) and extend, at greater or less intervals, to where the general depth of water is considerably increased, becoming more and more rare as the water is more abundant. They consist in low dams, running across from shore to shore, elevated about eighteen inches or two feet from the bottom, and made of rounded stone, picked up out of the bed of the river, of a size that a man can conveniently handle, the greater part not larger than a man's head, and raised on a broad basis of from ten to twenty feet in width. This transverse low wall or dam is usually connected with two walls about the same height, but built on a narrower basis of from six to eight feet placed parallel to each other and to the shores, at the distance of twenty feet from each other; through which passage, by a gap in the transverse dam, it is intended to force the current of the river, and to deepen the water by collecting it into this artificial channel. The number of these transverse walls, connected, as stated, with twenty feet sluices on the river, is very great, but it was not thought necessary to count them.

Indeed, in such a state of ruin were the greater part of them found, that they were difficult to be distinguished from the numerous fish dams found along the whole course of the river. A few, but enough of them, were in a sufficient state of preservation to be examined, and to afford the means of ascertaining how far they were calculated to answer the ends intended. The commissioners are not prepared to say what might be the effect of this kind of walling on other rivers, but they are well assured that the river Potomac cannot be usefully confined by such contrivances, even if they were made in the best manner of which that kind of walling is susceptible. The bottom of this river, which forms the drain of a mountainous region of such wide extent, is very unequal in its level, and abounds in shallows and basins, according to its obduracy or softness, and to the increased or diminished force of the current; sometimes weakened by expanding in widened plains, or in the formation of islands; sometimes increased by contraction between mountains and rocky banks; and, above all, by its flowing so rapidly, in consequence of the greatness of its fall compared to its length. The result from such circumstances, on this kind of work, situated in the bed of such a river, is, that these walls cannot be made sufficiently permanent; and, if they could, so very many of them would be required to attain even a trifling depth, that the benefit would be infinitely too dear, or an absolute waste of money. These walls, from their nature, cannot be tight; but if they could be made so, and the whole body of the water in such a river could be confined to a channel of twenty feet, the velocity of the current rushing through these short channels, with full room to spread after it has passed, would be increased in proportion to its confinement; and the whole volume of water in the river, in the summer and dry seasons, especially above the south branch, would not be sufficient to give the depth required by boats of sufficient size to be useful in transportation. Where the quantity of water in this river is much increased by the larger tributaries, in order to give eighteen inches depth, (and less would

be of no use,) it would be necessary to continue the parallel walls much further than they have ever yet been attempted, so as to give them a length sufficient to reach over the whole extent of continued shallows, which were found, in places, to cover three and four miles. The effect of lengthening the sluice walls would be, in some measure, to lessen the velocity, and, of course, to increase the depth of the current; but the evils are much too great to be usefully remedied by the small effects which could be produced by these means, even if it were practicable to give durability to walls so built and so placed. Walls of this kind, when drawn so long, and winding and bending as would be necessary to follow the course of the current, would be objectionable for other reasons, independent of the increased cost and increased liability to destruction; such as the extreme difficulty of guiding a boat with sufficient accuracy in these narrow confined torrents so as to prevent her striking and bilging against or over the side walls in descending;* and, in ascending them, her progress would be very much retarded by the increased force of the current consequent on its confinement. Now, on the supposition of a large proportion of the distance being so confined, many weeks would be added to the length of time consumed in a trip to and from market, already inconveniently long. In some places capstans would be required to be placed on the banks, to overcome the opposing power of the current. For these reasons, and from the experience already had of the perishable nature and trifling utility of this sort of work, it appears that it would be idle to attempt any thing in future of this kind.

Lock and dam navigation.

Another mode is, by some, relied upon to improve the navigation of this river, in consequence of its supposed greater cheapness than a canal, properly so called; and consists in deepening the water in the bed of the river sufficiently for the purposes of navigation, by high dams, of large stone and solid construction, with a lock or two locks to each dam, and a short canal, for the purposes of descending and ascending each level.

This mode has many and great inconveniences inseparable from it; the most important objection to it is, the greater expensiveness of the kind of navigation which alone it affords; that is, in boats managed by men, instead of boats drawn by a horse. Besides this general objection, many reasons may be adduced to show why it cannot be advantageously adopted on the Potomac river: the general width of this river is too great, the fall is also too considerable, and the alluvial margins which alternate from the right to the left bank of the river, the whole length of its course to tide water, and which vary, in elevation, from fifteen to thirty feet, would, in high water, without enormous expense, form insecure abutments to the dams; this kind of margin, being formed of loose earth, of comparatively recent formation, would, when obstructions are placed in the bed of the river, be liable to be forced and washed away at the extremities of the dams; the dams themselves, although ever so solidly built, would require frequent repairs. The fall in the river, from Cumberland to tide water, being about five hundred and thirty-seven feet, would require about fifty-three dams, as the banks would not admit of a greater elevation being given to the dams than ten feet, without great risk of damaging the marginal property, and of increasing the liability to frequent injuries to the dams themselves.† Each dam would require a lock of the same lift as the dam, and also an entering canal, with a guard-lock of considerable elevation, to be used in high water. Add to these the danger of being thrown by the current over the dams, however judiciously located below the guard-lock, and the inconveniences which would arise in high water: taking all these disadvantageous circumstances into the account, consider the number of dams, locks, &c., and their great length, from one hundred to eight hundred yards, and the necessary solidity required in their construction, and then calculate the other incidental expenses, the whole amount would be nearly equal to the cost of a regular canal, and the advantages would be infinitely less. Upon a full view of the different plans, therefore, it cannot for a moment be doubted but that the adoption of a regular canal out of the river, though following its ravine, will be the most useful and durable improvement, and, when the advantages and cost of each mode are relatively considered, incomparably the cheapest. The canal which, under all circumstances, the commissioners have thought best calculated to suit the localities of Potomac river, on which our estimates are founded, is one thirty feet wide at top, twenty feet at bottom, and three feet deep; the earth to be thrown out next the river to form a tow-path, elevated two feet or thereabouts above the level of the water in the canal, and the track of the tow-path to be ten feet wide. The level of the canal to be generally elevated above the highest floods, except when it is found necessary to take in a supply of water from the river, or to pass expensive ground along a rocky shore. Thirty feet, it is supposed, is the necessary width to admit the passage of two boats of sufficient size to carry twenty-five tons, and to admit of a small platform on the bow of the boat, sufficient to take a horse in upon, (as that in two places would be necessary, where it has been found expedient to cross the river, by means of a dam, to avoid too expensive cutting or walling.) In order to ascertain the practicability and cost of this plan, the commissioners have had the assistance of the late engineer of the State of Virginia, on whose sound practical judgment and knowledge entire reliance may be placed, more especially after the test his estimates have undergone on that part of the James river where part of the canal he had designed has been completed.‡ And it has been there found that contractors and undertakers in sufficient number can be obtained, from various parts of the United States, to undertake the works at the estimated cost, whenever the States think proper to authorize the cutting of a canal. The report and calculations on this plan, made from Mr. Moore's field notes, by Mr. Isaac Briggs, who has been appointed his successor, as far as we proceeded before the adjournment occasioned by the serious sickness of the greater part of the commissioners, and of the engineer and surveyors, (that is, about half a mile below Goose creek, and since to tide water,) are herewith presented, and show the utmost probable cost of such a canal for that distance; plats of the courses of the river and canal will likewise accompany the plan and calculations, and all be hereto annexed.

The commissioners have endeavored, in their examination of the manner and costs of improving this river, to take as complete a view of the subject as circumstances would permit, so as to present to the Legislature such a representation as would enable them, without losing sight of the ulterior advantages which must grow out of a canal so located, and out of the consequent future ramifications and extension of which it will necessarily be the parent, as to be able to show, not only the entire cost of the undertaking as far as the national road at Cumberland, but the cost of so much as may now appear within the limits of the ways and means of the two States. With this view, they directed the engineer, in the outset, to make his calculations of the surveyed route in sections, so as to show the whole costs of each section, from one important point to another, along its whole course. This they supposed would place the commencement of this great work completely within the reach of the resources of the States, as, whether the canal commenced for the present at Cumberland, and descended the river where the greatest obstruc-

* The greater part of the wrecks which of late years have occurred, according to information, along the rivers, were in consequence of the boats being dashed against the sluice walls.

† Lock and dam is the kind of navigation adopted on the Schuylkill river, but that is a small, narrow river, with high banks; and much damage, it is said, has been done to marginal property in consequence of the dam.

‡ Mr. Isaac Briggs, the present engineer, was himself a contractor for the cutting of a part of the James river canal, which has been completed, and can, experimentally, attest their correctness.

tions to navigation are found, as far as Williamsport, or at tide waters, and ascended the river, every section, when completed, would add to the value of the commerce and soil of the States, and therefrom something would at once be received in tolls. The level and survey of the whole course being once ascertained and decided, any part of the work likely to afford the greatest benefit and profit might be completed in such a manner as to be united with the remainder, without addition of cost, or any derangement of the plan. This partial cutting in sections would enable the States to keep their expenditures within reasonable bounds, and to guard against the necessity of oppressive burdens; at the same time that they would lay the foundation of an improvement, which, when extended across the mountains, and completed, it is no vain boast to say will be of greater importance than any other of which the topography of the United States is susceptible.

The territorial feature of the United States which is most important to all our relations, political, commercial, and social, is the extensive range of mountainous region which divides the rivers falling into the Mississippi from those which fall into the Atlantic ocean. It forms a wall of separation between the West and East, and the difficulties it presents has diverted the western commerce from the nearest seaports, and caused its general current to seek distant outlets around its southern and northern extremities. Such, however, is the wise arrangement of Providence, that, where the evils resulting from this great barrier operate most severely, (that is, nearest to its centre,) it has placed the remedy within our reach. Of all the rivers which reciprocally drain the lands beyond and on this side the mountains, the Ohio on the one side, and the Potomac on the other, extend their ramifications, of which any use can be made, nearest to the summit and level of the dividing ridge. Such, also, is the favorable shape of the mountains at this point, where these waters approach nearest, that its flattened surface forms extensive and luxuriant meadows, called glades. A well known operation of the laws of nature, at this elevated point, at all times many degrees cooler than the surrounding air, condenses the vapors and attracts the clouds rising on either side of the mountains, so that these elevated plains or glades in the driest seasons are copiously supplied with water, and afford rich and abundant pasturage, when all the valleys below them are parched with drought. Deep creek is a western stream falling into Youghiogeny, which forms in these glades, and is situated at that point from which the commissioners commenced their measurement, within two hundred and four feet of the summit of the dividing ridge; and can be brought by a cut within two miles of a branch of Savage river, called Crabtree run, at the junction of its branches at Swan's old mill, on this side of the mountains. Deep creek is a copious stream, with the banks nearly perpendicular, running through the soft earth of the glades, and was, in the season when they examined it, (supposed to be the driest which has occurred within the memory of most men living,) from three to four feet deep, and from nine to twelve feet wide, with a current of about one mile and a half to the hour. There is a narrow pass* in a ridge of the glades, through which Deep creek makes its way; where, by erecting a dam fifteen or twenty feet high, and not more than forty or fifty yards long, these meadows may be inundated, and an immense pond may be formed equal at least to three or four miles in length, and half a mile in breadth. This reservoir, it is believed, would furnish sufficient water for locks, and a canal, if carried through the dividing ridge by a tunnel two miles long, to descend and ascend both sides of the mountains, to the Monongahela on the west, and to Savage river on the east, especially when recruited, as you descend, by Big Youghiogeny on the west side, and by Crabtree on the east side, respectively. The fact was not ascertained, but, from the position of the sources of Little Youghiogeny, it is believed they might easily be conveyed into the same reservoir.†

Sufficient attention has not heretofore been paid to the invaluable supply of water afforded at this elevated point, by the principles of attraction and condensation. Whenever mountains present a flattened surface near or at their summit, of any extent, sufficient to prevent the rapid waste of water which steeps occasion, they generally possess all the qualities of the best meadow land. Mr. Gallatin, in his masterly report on the roads and canals of the United States, has entirely overlooked the consequences of this operation of natural causes at this point; and asserts, from the supposed absence of such a reservoir, the impracticability of uniting the western and eastern waters. His words are these: "The impracticability arises from the principle of lock navigation, which, in order to effect the ascent, requires a greater supply of water in proportion to the height to be ascended, whilst the supply of water becomes less in the same proportion." "Nor does (says he) the chain of mountains through the whole extent, where it divides the Atlantic from the western rivers, afford a single pond, lake, or natural reservoir." In this assertion, happily for posterity, this eminent statesman is substantially mistaken; and it is highly satisfactory to know that this grand desideratum can be found, and that whenever the resources of the nation are deemed sufficient to undertake the magnificent labor of perforating the great barriers of the East and West by the short tunnel required, water will not be found wanting for canalling purposes. The want of the necessary supply of water is the main consideration; and next, whether the objects to be attained are worth the expenditure required. Mr. Gallatin, in another part of this report, justly remarks: "Nor should the plan, on account of its magnitude, be thought chimerical; for the elevation, and other natural obstacles of intervening ground, or want of a sufficient supply of water, and not distance, are the only insuperable impediments to an artificial navigation."‡

The route for a canal from Cumberland to the Monongahela, across the mountains, and its practicability, are so intimately connected with the canal at present contemplated, that it necessarily blends itself with every view of the subject. It was for this reason that the work was commenced at Deep creek, the better to judge of its practicability and of the reasonableness of the consequences expected to arise from opening the canal navigation, as far as now recommended. The sections across the mountains to the States of Virginia and Maryland would at present, undoubtedly, be an undertaking beyond their ordinary means. But to the States of Ohio, Kentucky, Pennsylvania, Virginia, and Maryland, who are all immediately concerned, it might not prove so, and certainly not to the United

*Called Hoophole ridge.

†These glades, and this slowly gliding stream, were to us surprising objects, elevated as they are, and situated among the spurs or lateral ribs of the Little Back Bone mountains, which have but a small rise above these natural meadows, and exhibited to the eye, fatigued with the severity and rudeness of the face of nature, in the tedious ascent to their elevated plains, an appearance no less delightful than unexpected, of an open level country, clothed with flowers and rich verdure, intersected with gently rising hillocks, crowned with trees, not thick or impervious to the sight, nor continued along the combs of these low hills, but detached in clumps, presenting the pleasing delusion of an improved and ornamented country.

‡ The following extract from Mr. Hamilton Fulton's report to the Board of Public Works of North Carolina, for the year 1821, page 22, will give you an idea of the operation of locks on canals, and of a new method of *saving the waste of water*, so precious at great elevations, by means of basins, or ponds, arranged in a particular manner, where many locks are necessary to surmount considerable elevations. Mr. H. Fulton is an engineer of celebrity, induced by North Carolina to come to this country from England. Extract: "Although I do not approve of more locks than one being built at one place, yet the work, &c. Double, treble, quadruple, &c. chains of locks cause much detention and waste of water, as the following examples will show, viz: If a boat has entered the upper lock for the purpose of descending, no other boat can ascend until she has got out of the lowest lock, and *vice versa*. If a boat ascends immediately after one has descended, as many back falls of water must be drawn from the summit as there are locks in the chain; and if a descending boat succeeds the ascending one, the whole of the water is lost except one lock full. Thus an ascending and descending boat, in a chain of six locks, will draw off six locks full of water from the summit; while an ascending and descending boat passing through six single locks, *with ponds of sufficient capacity* between each, will draw off only *one lock full* from the summit.

States, who are no less deeply interested in its accomplishment, upon political considerations involving our dearest interests of internal strength and security in war, of commerce and revenue, and the preservation of the Union. Of its practicability it is believed little doubt can exist, as the necessary supply of water can be found. The costs of the lockage and tunnel are the only real obstacles. When the practicability of a line of canal is ascertained, where a doubt can at all exist as to the relative preponderance, it is the province of prudence, previous to the adoption of an expensive plan of improvement, to weigh in the scale of computation the cost and labor against the advantages expected to be derived therefrom. The cost of the section of a canal from Cumberland to Monongahela, although it will, whenever the estimate is made, be found comparatively much greater than on lower levels, yet will fall far short of what an inexperienced public have heretofore imagined. But, on the other hand, who will undertake to enumerate the advantage and growing profits on the trade of the only canal which is practicable between the waters of the Ohio and the Chesapeake? It is only necessary to see the unequalled location of the central route; the length of the barrier of mountains which it would sever; the boundless region of the northwestern States and Territories; and the extent, literally unparalleled on the globe, of the already connected inland navigation by means of the great lakes and colossal rivers to be united with the Potomac, and to consider the greater distance and expense of getting to and from other markets on our seaboard, to be entirely satisfied that, in a country increasing in population, wealth, and the knowledge of political economy, like ours, the object to be attained, in a pecuniary point of view alone, is beyond calculation; and it affords the most ample guaranty for the interest and capital that may be invested to complete it, whatever may be the amount of such investment; and cannot fail, moreover, to be a vast and always increasing source of revenue hereafter, either to the States through which it will pass, or to the United States, whichever may undertake it. The paramount and primordial claim of this route to public attention is evinced by the location of the national road, and also of the seat of Government, and no less so by the early date of the charter of the Potomac Company, immediately after the peace establishing our independence. This last circumstance shows it to have been the very first object of this nature which engrossed the attention of Virginia and Maryland, when we had scarcely drawn the first breath of emancipation. The manuscript calculations of our Washington, who was the father of this company, show that, in his mind, the western trade and the improvement of the Potomac were always intimately connected. He makes the difference between the route from Detroit, on Lake Erie, by way of Fort Pitt (now Pittsburg) and Fort Cumberland, to Alexandria, and that to New York, in distance four hundred and ninety-six miles, or upwards of five hundred miles to tide water, in favor of the former.* This grand speculation of this great man, drawing the commerce of the lakes and the northwestern territories to Alexandria, requires only the union of the waters of the Ohio and the Potomac, in order to be realized; and, with daily increasing experience, and a full sense of the rapid advance in the value of the great prize, it cannot fail ere long to be begun and completed. It is supposed, when the nature of a voyage from the States north of Ohio to New Orleans, or to New York, is contrasted with a voyage to Washington on the Potomac, on the supposition of the navigation being perfected across the mountains, that in many respects the advantages will be so considerable in favor of Washington, that it will, in most instances, be preferred. This preference over New Orleans will arise from the down-stream navigation of the rivers emptying into the Ohio; in the gentle current of the Ohio, compared with the rapid stream of the Mississippi, taking into view the time, labor, and expense of returning, as well as going to market on each route; and the effect of the climate of New Orleans in damaging flour, and bacon, and all vegetable and animal productions, and its dangerous influence on more northern constitutions, as also the very great difficulty and length of time it requires for ships to get up from sea to that city. Over New York, the advantages will consist in the shorter distance, and the necessity of navigating the lakes in vessels of a different construction from those used in rivers and on canals, requiring a change of hands, navigators, and the repeated removal of cargo from the one kind to the other; while the owner of a boat will be able to go and come all the way to Washington, in most instances, with a crew of his own neighborhood: add to these reasons the circumstance of the New York canal being closed one month longer by ice every year than a canal on the Potomac, and the superiority of this route will be manifest.†

General advantages of canal or still-water navigation.

On a canal such as is now proposed, a boat carrying twenty-five tons burden will be enabled to go up the river course with the same facility she goes down; the navigation on the canal will be always good, except when it is closed by ice. The present condition of the navigation of the Potomac river has been explained, and the difference in these important respects is too glaring to require additional comment.

The usual load of a wagon on our turnpikes is stated at three tons; a boat, one man, a boy, and a horse will be equal for transportation, then, to more than eight wagons, eight men, and forty horses, each travelling at the same rate of distance in equal time. A calculation is hereto annexed, marked D, which shows that, taking into view the daily expenses, interest on outfit and wear of the wagons, men, and horses required to transport twenty-five tons, and the same expenses, interest, and wear of a boat, man, boy, and horse, required to bear the same

* *Manuscript calculation of General Washington.*

From Detroit, by the route through Fort Pitt and Fort Cumberland:

To Alexandria,	607 miles.
Richmond,	840 "
Philadelphia,	741 "
Albany,	943 "
New York,	1,103 "

† The comparison of the distances and difficulties now existing between New York and Washington, on the route from Pittsburg to both, is stated as follows:

Pittsburg to Brownsville, by stream,	60 miles.
Brownsville to Cumberland, turnpike,	72 "
Cumberland to Georgetown, by stream,	188 "
	320
Pittsburg, up the Allegany, to Waterford,	160 "
Portage to French creek,	14 "
French creek to the canal, by the lake,	90 "
Down the canal and Hudson to New York,	520 "
	784
	320
Difference in favor of Washington,	464 "

There are fifty-eight miles less portage to New York; but, to balance this, there are one hundred miles more up stream, and ninety miles more lake navigation.

burden on a canal, the transportation by land carriage is twenty times greater than by canal. It may well, then, be stated "that the public would be great gainers were they to lay out upon the making of every mile of canal twenty times as much as they expend upon a mile of turnpike road; while a mile of canal is often made at less expense than a mile of road." Though, commonly, it has cost on recent work in this country something more per mile, this excess has rarely exceeded a third of the cost of a mile of turnpike—locks, culverts, &c. all considered. To show how the tolls may be increased for the benefit of a canal company, while the freight is still lessened very considerably, an example given by the late Mr. Robert Fulton is so strongly stated and clearly illustrated, that we cannot do better than insert it verbatim: "By the Lancaster turnpike, from Philadelphia to the Susquehannah at Columbia, is seventy-four miles; on it, from Columbia to Philadelphia, a barrel of flour (say 2 cwt.) pays one dollar carriage; a broad-wheeled wagon carries thirty barrels of three tons, and pays for turnpike three dollars; thus, for each ton carried, the turnpike company receives only one dollar: the making of the road cost $444,000, or on an average of $6,000 a mile. I will now suppose a canal to have been cut from Philadelphia to Columbia, and, with its winding, to make one hundred miles, at $15,000 a mile; or, for the whole, $1,500,000. On such a canal, one man, one boy, and one horse would convey twenty-five tons twenty miles a day, on which the following would be the expenses: a man, one dollar; a horse, one dollar; a boy, fifty-cents; tolls for repairing canal, one dollar; tolls for passing locks, &c., one dollar and fifty cents; interest on the wear of a boat, fifty-cents; sum total, five dollars: this is equal to twenty cents a ton for twenty miles, and no more than one dollar a ton for one hundred miles, instead of ten dollars, paid by the road; consequently, for each ton carried from Columbia to Philadelphia on the canal, the company might take a toll of *six dollars* instead of *one*, which is now got by the road, and then the flour would arrive at Philadelphia for *seven dollars* a ton instead of *ten*, which it now pays. The ton of merchandise taken from Philadelphia back to Columbia would also pay three dollars less than it now pays.

"Suppose that exactly the number of tons would move on the canal that are now transported by the road; again, let it be supposed that at one dollar a ton the turnpike company gain five per cent. per annum on their capital of $444,000, or $22,200; consequently, 22,200 tons must be carried, which, at *six dollars a ton* to the canal company, would give $133,200 a year—eight and a half per cent. for the capital of $1,500,000."

In order to see the immediate effect of cutting a canal from tide water to Cumberland, it is necessary to ascertain the amount of tolls now taken on the roads leading from and through those districts of country which will avail themselves of the cheaper conveyance by canal, as from Leesburg to Alexandria and Georgetown, and from Uniontown, by Hagerstown, Boonsborough, Fredericktown, &c. to Baltimore and Georgetown; the tolls now taken on these roads, and also at the Great Falls of Potomac, may be five or six times increased in amount on the canal, and still, in consequence of the great saving in freight, as above stated and exemplified, the cost of transportation to the owner of the produce or goods will be greatly cheaper than it now is by the road.

But by far the greater part of the toll received on canals generally, and likewise on this canal, will accrue on those articles which are too bulky to be transported to any considerable distance by roads or the present navigation. The use of these necessary although cheap articles is now almost wholly denied to a large inland population, and the benefits of such as the interior affords excluded from the seaboard; among these are fuel, the materials for building, and certain articles of food and domestic use; to wit, coals, cordwood and charcoal, lime, slate, marble, iron, timber, potter's earth, tanner's bark, Indian corn, oats, barley, salt beef, pork, cider, fruit, tar, turpentine, &c. The supply of these articles, to be obtained from the banks of the Potomac and its branches, is literally inexhaustible, for which there will be a growing demand. These will constitute articles entirely new to the commerce between the interior and seaboard.

The chief articles at present exchanged by the interior with the seaboard are flour, hemp, flax, wool, bacon, lard, whiskey, tobacco, ginseng, tallow, beeswax, pearl ashes, live cattle, hogs, and horses; for the productions of which will be created a market altogether new; and those of the seaboard and of commerce, for which the demand will increase, in consequence of opening a canal, are, plaster of Paris, salt, fish oil, fish, all the other productions of the rivers, and every kind of foreign merchandise.

The fisheries on the rivers emptying into the Chesapeake will be doubled in value; the coasting trade of the Chesapeake will be increased; ship building will be promoted; and, in fine, the States will feel the beneficial effects of such an improvement in every quarter and extremity of their territory.

The article coal, which is found in such profusion in the vicinity of the north branch of Potomac, of a quality equal to the best Liverpool coal, in the event of the completion of the canal, may be afforded in Georgetown at twenty cents, making full allowance for freight and tolls, at the same rates as paid by grain and more valuable articles; and if, on such cheap bulky articles, of the first necessity, the freight and tolls are ratably lowered, as would be politic and reasonable, it may be furnished at sixteen cents, or less. The price may be thus ascertained: Supposing a ton, or 2,240 pounds, to pay one cent freight, and one cent toll per mile; and where the pits are eight or ten miles removed from navigation, as is the case of those near Cumberland, and the coal will have to be carried that distance to the canal in wagons, the price will be—

For wagoning one bushel ten miles,	6	cents.
Price of digging one bushel,	2	"
Freight for one hundred and ninety miles,	6	"
Tolls for same distance,	6	"
	20	"

But, supposing the tolls and freight on articles of this kind reduced one-third, as may well be done, with a view to extend the market, the price might be stated at sixteen cents.

The price of coal has varied of late in the seaports from twenty-five to thirty-seven and a half cents per bushel. In Europe, the existence of abundant coal mines is supposed alone sufficient inducement for cutting a canal, so many are the uses and so immense is the consumption of this article, when it can be obtained on moderate terms. Fuel enters so largely into the price of every article manufactured, that on its cheapness depends, in a measure, the success of numerous establishments, which, at first view, seem to have no connexion with it; and in all articles wrought by fire and steam, it is the principal ingredient of price in our country. Even the productions of agriculture will be increased by a reduction in the price of coal; the whole of the wood reserved for fuel in the rich valleys along the Potomac and its branches would be cleared, and the land brought into cultivation. Nor would the beneficial effect here end, but would be felt throughout the borders of the Chesapeake.

Slate banks of excellent quality for roofing are found in still greater abundance than coal, and more of them immediately on the banks of the river; so that, if facilities for transportation were carried to the quarries, which might be opened, slate for roofing could, it is believed, be furnished as cheap as the best shingles.

The immense banks of iron ore which are yet unopened along the river, on account of the limited demand, would, if iron could be transported more cheaply, and the price of fuel were considerably reduced, be another resource

added to the wealth of the States, and afford considerable tonnage to the canal. The lime which is now furnished in our seaports, and which principally supplies the demand for this most useful article in architecture and agriculture, is brought from Rhode Island; this would afford a new source of industry and of profit to our citizens, now engrossed by our more active neighbors.

Such will be the creation of new sources of wealth and population, and such are some of the prominent benefits to be derived from this canal. Within the last sixty years England has quadrupled her wealth and political importance; and this rise in her fortunes dates with the operation of her canals, commenced within that period. Holland, the Netherlands, the valley of Lombardy, and China, are yet more striking instances of the immense increase of the power and population of territories in consequence chiefly of canals. When we look at the advantages of the now contemplated canal, its immediate operation on the value of the lands of the South Branch and Shenandoah, and the whole valley of the Potomac, cannot fail to strike the intelligent observer; the mountainous counties of Hampshire and Allegany will, in consequence of the value and abundance of their minerals, become the most important counties in either State, and the points on which the lever will rest that is to advance and extend the manufactures, commerce, and agriculture of the most distant ramifications of the Chesapeake. Cumberland will become the entrepot of the merchandise commerce of the West, and, at no distant date, a thoroughfare for the greatest commerce of the Union. Baltimore being already established, and possessing enterprise and capital, will have it in her power for many years, if not forever, to enjoy the larger share of these new created fountains of wealth; nothing will be wanting to insure this but to add a short link to this great internal trade by a canal from Bladensburgh, or the head of the Eastern Branch of the Potomac, to the Patapsco at Elkridge. The distance between these two points in a straight line cannot exceed eighteen miles, and the route of a canal would not probably be more than twenty-five miles; the elevation on this route above the tide is not great, and the upper part of the Patapsco and other important streams might, there is reason to believe, furnish the supply of water required for the light level; if this be the case, (and there is little doubt of it,) the cost of this work would not be great. Or, if it should accord more with the wishes and interests of the Baltimoreans to branch the canal at a higher point on the Potomac, let provision be made for trying the practicability of a branch from the foot of the Catoctin mountain, or any point below it, to Baltimore.

Probable profits of this canal.

Taking the average tonnage of the boats which have passed through the locks in the years 1819, 1820, and 1821, from the official document furnished by the Potomac Company, it is 11,815 tons each year; supposing ten barrels of flour equal to a ton, and computing the whole produce in flour, the amount which has descended the river each year is a quantity of produce equal to 118,000 barrels of flour.

If such is the quantity transported on the river in its present imperfect state of navigation, it is not extravagant to suppose that four barrels of flour are now carried by land for one which is transported by water, and which, when the canal is completed, will seek that cheaper conveyance; this would make an additional amount of 472,000 barrels. The inhabitants of the counties of Hardy, Pendleton, and a large part of Hampshire, in Virginia, and of a considerable portion of Allegany, in Maryland, and of Bedford, in Pennsylvania, are exclusively devoted to grazing; if the facilities of transportation were afforded them by a canal, they would either slaughter their cattle at home, and send down the beef and pork, or would turn their attention to the more profitable pursuits of agriculture; from these counties we may then fairly calculate on the addition of 200,000 barrels. The establishment of a canal will, without doubt, draw commerce from the counties of Franklin, in Pennsylvania, and Shenandoah, Rockingham, and a large part of Augusta, in Virginia; for which we may confidently add 250,000 barrels. From respectable authority we learn that, in the year 1821, 400,000 barrels of flour were made in the four southwestern counties of Pennsylvania, all of which would seek a market by way of the national road and contemplated canal; add to this 160,000 barrels from the State of Ohio, and the counties of Ohio, Brooke, Preston, Harrison, &c., in Virginia, and the aggregate amount is 1,600,000 barrels. The toll, as now established on the Potomac, is twenty-two cents per barrel for the longer distance, and eleven cents for the shorter; the medium may then be stated at fifteen cents; the tolls then upon 1,000,000 barrels would amount to $240,000; the estimated cost of the canal is $1,578,954; upon which, the sum of $240,000 gives fifteen per cent. per annum profit, and an excess sufficient for annual expenses.

In this calculation, the tolls on the ascending commerce, consisting of plaster of Paris, salt, fish in barrels, and foreign merchandise required for the interior, are not enumerated; they, it is supposed, will amount to a third of the sum of the descending toll. Nor is any allowance made for the tolls on the new articles which will be added to the descending trade, viz: coal, lime, lumber, Indian corn, &c; so that if any doubt can exist concerning the increase of tolls in the proportions above stated, this additional source of tonnage will insure the profit of fifteen per cent. per annum. But there is yet stronger assurance of gaining at least this amount of profit, when it is considered how much this rate of toll assumed may be increased, and still leave the freight considerably cheaper than it now is, as is so clearly apparent from Mr. Fulton's statement already cited.

Ways and means.

From Cumberland to tide water is one hundred and eighty-five miles. The cost of a canal for one hundred and eighty-two miles of that distance is ascertained to be $1,578,954; for the remaining three miles, the canal at the *Little Falls*, when enlarged, may be used. This sum, divided between the two States, will give $789,477, to be furnished by each. It is proposed that the money should be raised by a loan for sixteen or twenty years, which could probably be effected at four per cent. per annum; but, for the greater certainty, let it be calculated at six per cent. As soon as the loan shall be determined upon, let books be opened, under the direction of the States, for the subscription of stock by individuals at such places as the Legislatures shall deem expedient; each individual to be entitled to the stock he subscribes for, upon condition of his paying annually to the State the interest on the amount, until the annual profits of the canal shall be adequate to an extinguishment of a part of the loan and a discharge of the annual interest.* Of whatever portion of the stock that shall not be subscribed for by individuals, the States themselves shall be considered as holders. The probable nett profits of the canal, when completed, upon a moderate and sober calculation, have already been estimated at fifteen per cent. upon the whole capital required to construct it; whenever the canal shall be finished, let these profits be exclusively appropriated to the payment of the interest and redemption of the loan; and even should these profits yield only ten, instead of fifteen per cent., they would be amply sufficient to liquidate the whole debt in less than sixteen years; so that, in order to accomplish this important object, each State would only have to pay for five years (within which time it is supposed the canal might be finished) the interest on $789,000, or on so much thereof as shall remain after deducting the amount of individual subscription.

* So that a subscriber, say for $100, would, in the event of the completion of the canal within five years, as calculated, and its yielding a per centum sufficient to discharge the principal and interest on $1,500,000 in sixteen years, have to advance, in all, only $30, and then would be entitled to hold $100 in stock; and, in any event, the subscriber could never be called on for more than $6 per annum.

But should it be deemed by the Legislatures inexpedient to raise so large a sum by loan, it is submitted to their wisdom, in order to test the accuracy of the above scheme, whether it would not be an object of great public utility to make those sections of the canal between Harper's Ferry and tide water; and whether it would be a measure forbidden by the suggestions of the strictest prudence to borrow a sum sufficient for their completion. The amount required would be $560,127; but take this sum, and divide it between the States, let the foregoing plan be adopted, and then the payment of the interest for two years (within which period the canal could certainly be effected) on $280,063, or so much of that sum as should not be taken by individual subscription, would be the only burden to the States, or, in fact, only half the interest for the first year, as it would be only necessary to borrow money according to the annual expenditure.

It is probable that local jealousies, which are so natural to the mass of mankind, and which have, since the first dawn of civilization, been found in array and opposition to all the internal improvements of nations, and to canals, the greatest of all others, will, on this occasion, have to be combatted: these arise from the supposed effect canals have to injure existing markets by increasing rivals, and by lessening the value of the productions of those portions of territory already enjoying the exclusive benefit of those markets. These jealousies, however, have, in every country where canals have been introduced, been proved, by experience, to be ill founded; for so great is the dependance of each part on the condition of the rest, and so intimate is the general connexion in a nation, that even the favored few, so far from being injured, have been benefited by the general prosperity; population, commerce, and consumption have invariably kept pace with increase of productions; and the uniform consequence has been a general increase of power, wealth, and civilization.

MOSES T. HUNTER,
WM. T. T. MASON,
WM. NAYLOR,
ATHANS. FENWICK,
ELIE WILLIAMS.

SIR: GEORGETOWN, D. C., *July* 5, 1822.

As joint commissioners, appointed by the States of Maryland and Virginia to report the situation and condition of the affairs of the Potomac Company, the amount and character of the debts due by the said company, and its receipts and expenditures: we respectfully request your attention to the subjoined subjects of inquiry, and ask that you will do us the favor to answer them, so far as your archives may enable you, and as speedily as your convenience will permit.

We remain, most respectfully, yours,

ELIE WILLIAMS,
ATHA. FENWICK,
WM. NAYLOR,
WM. T. T. MASON,
MOSES T. HUNTER.

General JOHN MASON, *President of the Potomac Company.*

1st. The number of shares of the capital or dividing stock, and the amount.

2d. The number of shares held by the States of Maryland and Virginia, and by individuals, respectively.

3d. The whole sum expended on the works, from the commencement of the operations of the company up to the 1st of January, 1822; stating, as far as practicable, the amount expended on the original construction of the works, and the amount expended in repairs.

4th. The amount of the debts due from the company on the 1st of January, 1822; showing to whom due, when contracted, and including principal and interest.

5th. The amount of tolls received in each year, from the 1st of August, 1799, up to the 1st August, 1821, together with the number of boats and tonnage employed, and the produce and merchandise transported during that period, with an estimate of the value of the same.

6th. The mode of expending the annual tolls, giving as *particular* an account as is practicable.

GENTLEMEN: OFFICE OF THE POTOMAC COMPANY, GEORGETOWN, *December* 20, 1822.

By instruction from the board of directors of the Potomac Company, I have the honor to make the following communication:

The letter you were pleased to address to me on the 5th of July last, requesting information relative to the affairs of the Potomac Company, was received soon after its date, and the requisite statements have been for some time prepared; but it was thought best to retain them until you should hold another meeting in this town, for the facility of giving explanations, should it be found necessary: they are transmitted, herewith, made up to the 1st of August last. This period has been taken, because, as it accorded with the date of the annual returns, prepared according to the practice for the general meeting of the company, it presented the means of more certainly fixing the sums, &c. As it is later than that designated by you, it is hoped it will not be objectionable.

The paper No. 1 furnishes answers to 1st, 2d, 3d, and 4th queries, put by you in relation to the number, the amount, and the proprietorship of the shares, to the expenditures, and to the debts of the company. As to the 3d query, no separate accounts having been kept for these items, it has been found impossible to distinguish the amount expended in the original construction of the works from the amount expended in the repairs; and further, it is proper to remark, that, although the whole sum of the expenditures is correctly stated at $729,387 29, there has been actually laid out, of money other than that produced by the profits of the works, no more than the sum of $511,349 62; since, as will be seen by the note at the foot of paper No. 2, the sum of $216,949 60, received for tolls, supplied so much of the expenditure.

The paper No. 2 gives, in detail, the information required by the 5th query, as to the tolls received, the boats employed, and the produce and merchandise transported; by which it will be perceived that, since the first use of the navigation, in 1800, by means of the works of the company, (to speak in round numbers,) upwards of $220,000 have been received for tolls; a mass of produce and merchandise has been transported on the river, equal in value to more than $9,300,000, (as one article of which, 1,135,000 barrels of flour have been water-borne to market;) and that for the last fifteen years, on an average, 720 boats have been annually employed on the river.

The paper No. 3 exhibits the manner in which the tolls of the last year were expended, and is intended as a practical reply to your 6th query, inasmuch as they have in each year been applied to the objects there described, in greater or less proportion.

Very respectfully, I have the honor to be, gentlemen, your obedient servant,

J. MASON.

To ELIE WILLIAMS, *and others,*
Joint commissioners on the part of the States of Virginia and Maryland, &c.

A.—No. 1.

Answers to the 1st, 2d, 3d, and 4th queries of the Potomac Commissioners.

	No. of shares.	Amount.
1st. Capital, or dividing stock, at £100 sterling, - - - -	700	$311,111 11
2d. Shares held by the State of Virginia, - - - - -	120	53,333 33⅓
Shares held by the State of Maryland, - - - - -	220	97,777 77⅔
Shares held by individuals, - - - - -	360	160,000 00
	700	311,111 11
3d. Total amount expended from the commencement in 1784 to August 1, 1822, including original improvements, repairs, interest paid on borrowed money, expenses of collecting tolls, &c., - - - - - -	-	$729,387 29
4th. Debts due by the company to 1st August, 1822, including interest—		
To subscribers to Monocacy loan, contracted 1803, - - -	-	3,876 49
To subscribers to Shenandoah loan, contracted 1812, - - -	-	4,698 77
To subscribers to Antietam loan, contracted 1812, - - - -	-	17,026 33
To subscribers to Cumberland loan, contracted 1813, - - -	-	7,642 12
State of Maryland, 1814, - - - - - -	-	39,950 00
Banks of the District of Columbia, including interest, whereof $55,955 17 was contracted between the years 1803 and 1816, and the remainder in 1816, 1817, and 1818,	-	101,192 88
Sundry persons, - - - - - - -	-	1,500 00
		$175,886 59

NOTE.—Although $311,111 11, as above stated, is really the sum of the capital stock or dividing capital, the amount of $336,551 10 was actually paid in; the difference, $25,439 99, was sunk to the profit of the present stockholders by the sale of delinquent shares.

J. MOORE, JUN., *Treasurer.*

No. 2.

Table showing the amount of the tolls received by the Potomac Company in each year, from the 1st of August, 1799, to the 1st of August, 1822, together with the number of boats and the tonnage employed, and the produce and merchandise transported, with the estimated value of the same, during that period.

Years.	Boats.	Tonnage.	Barrels of flour.	Barrels of whiskey.	Hhds. tobacco.	Tons of iron.	Other articles of produce, estimated.	Sundry return of goods, estimated.	Amount of tolls received.	Total estimated value.
1800	296	1,643	16,584	84	25	-	$2,950 00	$7,851 00	$2,138 58	$129,414 00

J. MOORE, JUN. *Treasurer of Potomac Company.*

*Of the whole sum received for tolls, only one dividend to the stockholders was ever made, to wit, in the year 1802 of $3,890. This, with $1,088 07 in hand, subtracted, shows the remainder, to wit, $216,949 60, was, from time to time, as it came in, expended in the works of the company.

No. 3.

General statement of disbursements made by the Treasurer of the Potomac Company, from the 1st day of August, 1821, to the 1st day of August, 1822.

Cash paid mechanics and laborers employed in repairs and improvements, - - - -		$2,989 09¼
" for materials for repairs and improvements, - - - -		711 98¾
" for hire, provisions, and clothing for yearly hands to attend the locks, - -		346 77
" for salaries to treasurer and two toll-gatherers, - - - -		1,700 00
" towards principal and interest of debt, - - - - -		5,276 45½
" for contingencies, - - - - - - -		201 04¾
		$11,225 35¼

J. MOORE, JUN. *Treasurer.*

B.

Abstract of the laws of Maryland and Virginia, relative to the Potomac Company.

Charter granted by the States, conjointly, in 1784; navigation to be improved from tide water to the highest practicable point on the north branch, so as in dry seasons to permit the passage of boats drawing 12 inches water; at or near the Great Falls, canal to be made 25 feet wide, 4 feet deep, and locks, if necessary, 80 feet long and 16 feet wide, to convey vessels and rafts drawing 4 feet water; the company bound to begin the work within one year after its formation, and to complete the improvement of the navigation from Cumberland to the Great Falls within three years, and from the Great Falls to tide water within ten years, under the penalty of forfeiture of charter.

MARYLAND LAWS.

1785, chapter 3—Canal at Great Falls, depth reduced from 4 to 2 feet; spaces between the locks, if any, to be 4 feet.

1786, ch. 2—Time of completing navigation from Great Falls to Cumberland extended to the 17th November, 1790.

1790—Time further extended for improving navigation from Great Falls to Cumberland until 1st January, 1795, and liberty given to apply capital and tolls in improving branches of Potomac above Seneca Falls.

1794, ch. 29—Extends time of completing navigation to 1st January, 1798.

1796, ch. 19—Authorizes the contracting of the locks from 16 to 14 feet in breadth.

1797, ch. 93—Authorizes the receipts of tolls, as if the locks at the Great Falls were complete, on condition that the company, free of costs, carry all produce that may be brought to the inclined plane, which is stated to be constructed from the lower end of the canal to the surface of the river below the Great Falls, down and up the said plane, at their own risk. This law further provides for the extension of the time for the completion of the navigation until 1st of January, 1803.

1802, ch. 84—Declares the object contemplated in the establishment of the company to be completed, confirms the right to tolls, and authorizes the contraction of the locks from 14 feet to 12 feet in breadth.

1809, ch. 193—Further time of ten years given for completing the navigation of Potomac, to be computed from the expiration of the term already granted, viz: 1st January, 1803.

VIRGINIA LAWS.

1785, ch. 4, sec. 2—Company permitted to reduce the depth in canals, at the Great and Little Falls, from 4 to 2 feet water, at the least, in dry seasons, and if the locks have spaces between them, such spaces to be 4 feet deep.

1786—Time until the 17th of November, 1790, for completing navigation between Great Falls and Cumberland.

1790—Further time given of three years, from the 16th of December, 1790; and the company authorized to apply capital and tolls to the improvement of the branches above Seneca.

November 21, 1791—Right to improve the branches above Seneca forfeited, unless the company proceeded within twelve months from that date.

November 23, 1793—Time given for completing the navigation from the Great Falls up, until 1st January, 1795.

December 12, 1794—Time given for a similar purpose until 1st of January, 1797.

December 26, 1795—Authorizes contraction of the locks at the Great Falls to 12 feet.

December 1, 1796—Gives further time of four years, to be computed from the expiration of the time already given; locks may be contracted to a space not less than 14 feet.

January 24, 1798—Recites that considerable improvements have been made, and authorizes the receipt of tolls before the completion of the navigation to tide water; and the further time of two years is given, to be computed from the expiration of the period already given.

January 27, 1803—Recites that the locks at the Great Falls are only 12 feet wide, instead of 14, but declares them sufficient. This act also explains the phrase "*dry seasons*," as used in the 17th section of the law for extending the navigation, declaring it to mean "*all seasons*," so far as relates to the navigation from Fort Cumberland to tide water. Commissioners are also appointed by this act to review the works upon the river, &c.; they, however, never acted. Further time of three years is also given for the completion of the navigation of the river.

January 24, 1806—Further time of five years given for the like purpose.

The above laws are to be found in the 2d vol. Revised Code, old edition; appendix, No. 2, p. 12—22.

January 11, 1811—Further time of three years given.

February 18, 1817—Further time of three years, to be computed from 1st January, 1817.

[NOTE.—There are no other laws in Maryland and Virginia, so far as we have been able to ascertain, relating to the kind of navigation required, and the time within which it was to be completed.]

C.

THURSDAY MORNING, *August* 8, 1822.

Moved from the confluence of the north and south branches of the Potomac; good water a short distance; to Old Town Falls, upwards of two hundred yards long, water in best channel, at the upper end, seven inches deep; at lower end five inches; very narrow channel, and crooked; the water good a small distance, then a shoal fifty yards long, six inches water; passing a short distance of good water, enter a shoal above Taylor's, extending to the mouth of Town creek; through this shoal the commissioners' boats, (drawing under five inches water,) pursuing the best channel, rubbed, and were dragged by men wading nearly the whole way through; at the mouth of Town creek, wing-dams and chute in the middle of the river; water six inches deep in the chute. Good water to Malcomb's Island, but difficult navigation among scattered rocks appearing above the surface; then commences a shoal, in which the boats rub, and pass with difficulty a wing-dam and narrow chute; then better water, twelve to fifteen inches, to O'Neil's bottom; Young Malcomb, the tenant; here the boats moored for the night.

FRIDAY MORNING, *August* 9.

Moved at eight o'clock; good water; passed Malcomb's Island and mouth of little Cape Capon, two perches wide; good water continues to Coxe's Falls at Coxe's Island. Along this island are three rapids extending upwards of a mile, through which the boats rubbed the whole way, except about a hundred yards between each rapid, where the water was from two to three feet deep, with high rocks appearing on the surface, which rendered the navigation precarious; the lower rapid more gradual than the other two, but longer, and shoal the whole way; boats rub and stick on the shoal; then good water, still current from two to four feet deep for one mile, to the Devil's Nose, a rapid above Colonel Greenwell's house; at this rapid are wing-dams, a narrow and shallow chute, and crooked channel, making the navigation difficult; then good water one hundred yards to Greenwell's ripples, one hundred yards long, where the channel is crooked and shallow; the boats rub most of the way through; to Greenwell's second ripples, one hundred yards long, boats rub through; then better water to a reef of rocks nearly crossing the river, leaving a narrow channel where the river is not more than ten paces wide; then good water, still narrow, to John Mitchell's bottom, except a reef of rocks, where there is a small fall; then good water from five to twenty feet deep opposite McDonald's, on Virginia side; then water good, half a mile, to Mitchell's rapids, half a mile long, in which are six reefs across the river; narrow, very crooked, and difficult channels, the boats rubbing at each reef; the rapids end nearly opposite Boxwell's, the tenant of John Mitchell, where the boats moored for the night.

AUGUST 10.

Moved from Boxwell's; for two hundred yards good water, then encountered small falls or ledges of rocks quite across the river, three hundred yards in extent; the water from three to eight inches deep; good water for near a quarter of a mile; then, for the next mile, occasional ripples; water four inches, along which the boats were dragged; between the ripples, water good; came to Swede's Falls, half a mile in extent, the boats frequently rubbing, and with difficulty passing over them; good water a short distance, then difficult navigation for near half a mile, from the prodigious number of rocks peering above the surface; the water between them twelve inches. Travelling by land as difficult as the navigation.

AUGUST 12.

Moved from N. Abel's ripples, where, for some distance above and below, there are large rocks standing two or three feet above the surface of the water, and so numerous that the passage between them is very intricate, by which it was necessary to cross and recross from shore to shore, to avoid them, sometimes hanging upon the ripples, where there was not four inches water. These ripples continued a considerable distance, the boatmen having frequently to get out, and lift and drag the boat over them. Immediately above the Tumbling Dam Falls, there is a shallow bar, affording only four inches. At these falls, there is, among many others, one perpendicular pitch, apparently of eighteen inches, and exactly in the boat channel. Besides these natural obstructions, there are here and at many other places artificial ones, made by building fish dams in the river, in shameful violation of law. Below the Bar Falls the boat hung and rubbed for a long distance, in water not more than from three to four inches deep; and, before we could pass, the boatmen were under the necessity of going into the water, and clearing the channel by throwing out the stones. Good water for one mile and a half, with some short interruptions. Afterwards came to another long ripple, where the boat hung for a long time, notwithstanding all the exertions of the men. The water is not more than three inches deep.

TUESDAY, *August* 13.

Started from Neal's. Commissioners' boat supposed to draw about seven inches water; good water for a short distance, then grounded on a ledge of rock running across the bed of the river; two hundred yards lower down, ledges occur again, and form the bottom, for several hundred yards, on which we occasionally rubbed, without stopping; further on, grounded on small gravel; boatmen had to jump out and drag for near fifty yards; water varying in depth from eight to ten and twelve inches among gravel; pushed on for fifty yards further, water very little deeper, when again we had to drag, water eight inches between and off the stones; had to clear the stone out of the course of the boat; a little lower down measured the depth of water on both sides of the boat, and found five inches on one side and six on the other; shoal continued for ten or fifteen yards, then moved on among scattered stone, almost continually rubbing for some yards, when we grounded again; water nine inches and a half among the stones; course crooked, and boat touched for one hundred yards further; then passed a fish dam, firmly cemented with sand and gravel, running across the river; then good water for a quarter of a mile, then rubbed over a ridge of rock into water interspersed with large stone, on which we could not avoid rubbing frequently; then good water for some one hundred yards, when we grounded on a reef; again good water for a short distance; grounded again on a reef; then passed a small rapid, rubbing all the way, about thirty yards.

P. M.—For one hundred yards good water, then frequently rubbed, and twice stopped, on large stone, which covered the bed of the river; good water for two or three hundred yards; river filled with scattered stone, rising twelve or eighteen inches above water; then water good for a short distance; then our course was interrupted by a fish dam and broken sluice, the boatmen obliged to throw stones out of the way; further down, grounded on stone, abounding here in the bed of the river.

Nearly abreast of Mr. Tidball's house a reef crosses the river, and caused a small fall, five or six inches, over which we passed without difficulty; a reef, with a similar fall, just below the above, obliged the boatmen to shove and lift the boat over; further down passed another reef, on which we touched a sluice made through it, misplaced and not used; then reached a gradual fall, on which grounded, and passed with difficulty, having to clear a passage; then a few yards of deep water; then rubbed for many yards; again a space of good water; then grounded on large gravel, and dragged for some distance; then floated a little; then dragged again twenty yards, into a few yards

passable water; then dragged again into water which continued good for near half a mile; then rubbed again on small gravel; floated a little, then rubbed on large gravel, and soon stopped on a rapid, about one hundred yards above Lantz's house and island; dragged over with difficulty; then good water to Lantz's, where we stopped for the night.

WEDNESDAY MORNING, *August* 14.

Moved from Lantz's on shoal water; boats rub frequently, and with difficulty pass the small openings in ledges of rock across the river; these openings lying in zigzag line, render them very difficult of access; the boats rub hard at most of the passes; these cliffs and shoals extend upwards of a mile around the head of Washington's bottom; then good water half a mile; then ledges of rocks, rising to the surface in three feet water, with narrow shoal passes, rendering the navigation difficult, extending upwards of half a mile; then shoal water from shore to shore, about three-quarters of a mile past Dimmit's Island; at one place, boats could not pass until stones were removed to make a small channel; the impediments through this shoal can only be overcome by swelling the water by a dam; then good water three-quarters of a mile to O'Queen's; then shoal water, boats rub, and were dragged a mile; then good water to the Burnt Mill Falls; here is a wing-dam twelve or fifteen inches high, turning the water to the Maryland shore, working a small grist-mill owned by Thomas King; fall at the mill three feet and a half; a rapid shoal extends near two hundred yards from the upper end of the wing-dam, and ending nearly opposite the mill; then good water two hundred yards, to a point opposite to Marshall's house, on the Virginia shore, where the boats moored for the night.

THURSDAY MORNING, *August* 15.

Moved from Marshall's; good water continues half a mile, to a ripple below the mouth of Fifteen Mile creek; at this ripple three-quarters of the width of the river is bare, one hundred and fifty yards distance, leaving a narrow, crooked, and shallow channel, through which the boats rub; then good water about one hundred yards; then a ripple one hundred yards, through which the boats rub nearly the whole way; then the water deepens to three feet, with scattered rocks near the surface a quarter of a mile; then a ripple, a wing-dam, and chute, very shallow; then good water one hundred yards; then appear ledges of rocks across the river, six in number, about equal distance from each other, and extending one hundred and fifty yards down the river; boats rub through the narrow passes in these ledges; then good water by the Man of War rock, opposite Matthew Engle's; then a short reach of good water to Willet's Falls, or long canal; through these falls the boats were dragged with great difficulty; after passing them, enter on water with ledges of rocks across the river, there, and below, where shoal water extends across the river a considerable distance, passing Sidling Hill creek, and to Ferree's; no loaded boat drawing eight inches water could pass. The boat moored opposite Ferree's for the night.

FRIDAY, *August* 16.

Shoal and difficult water, by ledges of rocks and ripples, past Big Capon, and to the upper end of Ridout's bottom; then good water one hundred yards; then shoals, ledges of rock, boats passing through the narrows and crooked openings, one among rocks four feet above water; the only pass very narrow, and close to the Virginia shore; then variable water to John Roby's; then good water to Leopard's mill, worked by the river water, under a fall of three feet and a half; then variable water, the greater part shoal, to the mouth of Little Branch, below Mr. Summers's.

AUGUST 17.

Moved from nearly opposite Mr. Summers's, living on the Maryland side, and five and a half miles above Hancock; good water a short distance; then passed a reef of rocks with a fall of near three feet, extending quite across the river, and about fifty yards in width, the boat rubbing part of the way, and dragged about ten yards by the men; the water from five to ten inches; then one mile and a half of water, from twenty inches to three feet; then one hundred and fifty yards of ripple, the water upwards of twelve inches, but large stones rising above the surface, so numerous as to render it very difficult for the boat to pass along; then one-half or three-quarters of a mile of good water; then a ripple a quarter of a mile in length, above Round Hill, water from six to twelve inches; good water a short distance, then another ripple; through a canal below Round Hill, water about seven inches, except through the chute of the canal, where the boat grounded; then good water to Hancock, with the exception of two ripples, about a mile above the mouth of Little Tonoloway, the one fifty, the other thirty yards long, the water from six to ten inches deep; the boat rubbed part of the way, and twice grounded; moored at the mouth of Little Tonoloway.

AUGUST 18.

Sunday, 19th, 20th, and 21st, lay at the mouth of Little Tonoloway, whilst the levellers went back to Cape Capon, to survey the route from thence to Hancock, on the Virginia shore.

AUGUST 22.

Set off with the boats from the mouth of Tonoloway; a few perches of good water at first; then three ledges of slate rock across the river, two opposite Hancock, and one just below, on all which we rubbed between them; a few perches good water; then good water to the lower end of Donovan Island, where another ridge crosses, at which there is a fish dam, and fall of nine or ten inches, and difficult crossing; good water opposite the mouth of the Warm Spring run, (bath;) a little good water; then a shoal, and reef of slate and gravel; grounded; then good water; touched another reef; passable water fifty yards; then large stone, so close as to prevent passing without rubbing; then grounded in nine inches water, on a shoal and fish dam; eight inches water, stone so close as to allow an uninterrupted passage; some passable water to the upper end of Yate's Island; then grounding, rubbing, and touching abreast of the island. Big Tonoloway enters just above this island; for half a mile bad water, five or six inches only; bad water, and two more ledges of slate, with five inches water on them, above the widow Row's or Beven's Island; tolerable water abreast of island for three hundred yards.

AUGUST 23.

Moved from opposite Dr. Jacques's house, where the canal crosses from Virginia to Maryland. Good water for one hundred and fifty yards; then shoal begins opposite Jacques's Island, water from five to eight inches; boats rubbed for eighty yards, and then grounded, and hands had to open channel by removing the gravel and stones; not three inches water; boats lifted over with handspikes; after this, water deepens to about ten inches or a foot, filled with large loose stones, which impede the navigation, and caused the boats twice to get fast; good water begins below fish dam, opposite lower end of Jacques's Island, and continues to about one hundred yards below upper point of Miller's Island, about half a mile, where begins a shoal, at a fish dam, where hands had to make a channel, by removing stones, &c.: for twenty yards water at four to six inches, then increases to nine, but interrupted by stones and rocks for about fifty yards; then shoal from ten to four inches, for distance to Licking, say one mile and a half; men out again, and making channel between upper and lower point of Miller's Island, and repeatedly aground on ledges between this island and Licking. Moored at mouth of Licking.

AUGUST 24.

Moved from mouth of Licking; good water for one hundred yards, to a fish dam; then rapid, and full of big rocks; boats fast from six to eight inches; water then good for one hundred and fifty yards, to another dam below, which is a rapid of short continuance; then water sufficiently deep, but bed very rocky for eighty yards, boat rubbing on the rocks. Here a line of large rocks reaches nearly across the river; boats fast among them. Deep water from this, for fifty yards; then shoal, and boats fast upon a bed of large stone; then rocky bottom, but good water for eighty yards, to a fish dam, boat occasionally touching on the large stones; several ledges here across the river, upon one of which boat got fast; below this, deep water, with slate ledges, upon which boat repeatedly got fast; this kind of water and bed continues for one mile and a half; in this distance, a bed of moss across the river extends for half a mile; good water through it, but full of rocks. This water extends to the Elm spring, on the Maryland side; a shoal then begins, and continues for upwards of half a mile; boats fast, and lifted over with great labor; men obliged to open channel by removing stone, &c.; this shoal extends to Cherry run, on Virginia side, with the exception of about fifty yards just above fish dam, which is a rapid for a few yards, and then good water for one mile and a half to Johnson's Falls, nearly opposite Back creek, on Virginia side, where we moored for the night.

SUNDAY, *August* 25.

The boats lay-to, and the party rested.

MONDAY MORNING, *August* 26.

Moved from Johnson's Falls; shoal water to Garrison's Falls, one mile and a half; here are high ledges of rocks, extending across the river, and only one narrow pass for boats; then good water—the Fiddle-strings, so called from four ledges of rocks near each other appearing above water, extending across the river; the boats passed the ripple with great difficulty, there being no passage affording sufficient water; the boats were lifted and dragged over, by doubling the crews, and were more than an hour in moving less than one hundred yards; then good water to Claycomb's ripples; then shoal from shore to shore, to Pott's spring, boats rubbing; then good water to Prather's saw-mill, made by his mill-dam; then shoal one-fourth of a mile; whole distance from the Fiddle-strings four miles and a quarter to Prather's, where boats moored for the night.

TUESDAY MORNING, *August* 27.

Moved from Prather's on good water, passing Charle's mill, at the mouth of the Big Spring run, half a mile; good water continues to Barkman's fish dam, raised in a shoal part of the river, extending a quarter of a mile; here the boats passed with great difficulty, being dragged and forced over the shoals by doubling the crews in several places, and by making little channels, by moving the stones in the way; the water is then better for a small distance, (say a quarter of a mile,) which reaches another shoal, called Tryal fish dam, (a very appropriate name, as it sufficiently tried the strength and skill of the men in lifting and dragging,) the boats rubbing the whole distance of two hundred yards and upwards; the water then became deeper for a short distance, then very shoal to Middle-calf's Island, and some distance along it; the water then good to the mouth of Little Conococheague, at Middle-calf's; then becomes shoal, passing two islands known by the name of Buzzard Islands, and then, on passing Hawk's Island, the whole of the distance, the water very shoal; the boats were got over with great difficulty, and by doubling the crews, one mile and a half; the water then becomes deeper; the boats, after passing a quarter of a mile, put in for the night.

AUGUST 28.

Left the upper end of a high ridge of rocks on the Virginia shore, about five miles and a half above Williamsport; for two miles the water eight or ten feet, the boatmen using their oars the whole distance; the next mile the water varying from four feet to eighteen inches; then a mile of about one foot water; moored for the night about one mile and a half above Williamsport.

AUGUST 29.

Left the station one mile and a half above Williamsport, the river being wider than at any place above; the boats rubbed on the gravel a great part of the way to Williamsport, where we were detained four hours by the hands going on shore. From Williamsport to the place called Falling Waters, on the Virginia side, the boats often stuck fast, and were only got along by lifting and dragging them by main force.

AUGUST 30.

Started from the Falling Waters; water good; velocity of the current diminishing, general depth increasing, and the navigation less frequently interrupted by reefs and shallows; in the space to Hadley's rock, about two miles and a half, a fish dam on a gravel bank, and two ledges of limestone rising near the surface, are the only difficulties, but were passed with a rub; the bed of the river for the above space is uniformly limestone rock. Opposite Lefebre's house it rises, and forms the bank of the river, on the Virginia side, for fifty yards; at Hadley's, the rock displays itself on the shore for more than a quarter of a mile, on the Maryland side. A fish dam and ripple, on which we grounded, just below Hadley's; then good water till we passed the mouth of Opecon, when we grounded on Opecon ripples, where there is another fish dam, and water about nine inches deep; then a little good water; then grounded again on Opecon ripples; moved on a little, then rubbed hard again, then better water. For three-quarters of a mile above Opecon, rocky shore on the Maryland side; just below, the rocks approach the shore on the Virginia side, and continue for one mile and a quarter. Another fish dam obstructs the navigation in Opecon ripples, and then three narrow reefs of limestone rock; below this last dam crossed the river, on which there is not more than six or seven inches water; then deep water to Sprigg's mill, where we stopped for the night; considerable fall in the water in the space occupied by Opecon ripples. Here Boyd went home for a day, and party rested on Saturday and Sunday.

SEPTEMBER 2.

Started from Newcomer's; good water for a mile and a half; cliffs on Maryland side for quarter part of the way; a ledge of limestone extends nearly across the river, just below Galloway's mill, but does not interrupt the navigation; water very deep, out of the reach of the pole; water good to Millit's spring, except about two hundred yards of shoal water.

SEPTEMBER 3.

Left Millit's spring; good water for three-quarters of a mile; then pass the fish dam; then good water for one-half a mile; then another fish dam; good water, but intersected by big rocks and ledges; then Hog river ripple continues about a mile, wing-dam made by Potomac Company about midway; then ripples; boat fast on a ledge of rocks in five inches water; good water for a mile, then fast on a bed of rocks at Zuck's fish dam; water variable, passing three fish dams to the head of Ground's ripples, two miles. Boats moored at Spong's landing for the night.

SEPTEMBER 4.

Moved from Ground's ripples; shoal water a short distance; boats rub at one place on a ledge of rocks; the navigation interrupted by ledges of rocks ranging with the current, where is a fall of three or four feet in a quarter of a mile; narrow passes through those ledges; then good water to Chapline's; then shoal a short distance; then good water to Shepherdstown.

THURSDAY, *September* 5.

Moved from Shepherdstown, on good water, half a mile; then shoal from shore to shore; ledges of rock, with few passes for boats; very difficult navigation; the channel shoal and winding; boats rub, and are dragged in many places through this shoal, which extends a mile and a half; then good water to the Antietam Forge ripples; a narrow ledge of rocks across the river, with but one shallow and narrow pass; the fall in this ledge about a foot; then good water to Coon's, where the boats put in for the night.

FRIDAY, *September* 6.

Set off from Coon's, two miles below the Antietam iron works, with a fine sheet of deep water; one-fourth mile below this, river bends suddenly to the west, is wide, and too deep for poling; at Reynolds's mill, river bends to the south; at the bend, a rocky island, on the Maryland side, and rocky on the Virginia side; water deep to the end of the island, where a ledge of limestone crosses the river obliquely. Here we enter the Cow Ring sluice, on the Virginia side; this sluice is formed in the most approved manner, by the assistance of nature, and a ledge of rocks, so situated as to throw the collected water of the river into the sluice. With this advantage, (the greatest that can be obtained by wing-dams,) you have the increased rapidity of the current to surmount, which is so great as to require a capstan, which is placed at the head of the sluice, by which a boat is drawn up slowly, and with much labor; the force of the current is, moreover, so great, as to dislodge the stones on the walls, and even large ones, flat and well placed, making frequent repairs necessary—so that sluice navigation, under the most favorable circumstances, is a miserable shift. Below this sluice, water deep, little current, river bends to the south; one mile and three-quarters below the sluice is an extensive hill, on the Virginia side, colored with the oxyde of iron: in it, a considerable excavation for ore; this bank furnishes ore to the Antietam iron works; ore said to require mixing; below the sluice, water deep; river broad; river bends S. W.; in the bend a cliff of rocks approaches to the shore opposite Keep Trice's old furnace; a large ore bank on the Maryland side, and the Virginia banks show signs of ore; below the furnace, Virginia side high; rocky shore; the river without obstacle until you reach the head of the canal (as it is called) on the Maryland side, which we found closed by a dam, two feet high, made to enable the public works to continue in operation during the extreme lowness of the water at this season. To surmount this obstacle, by agreement with the superintendent at Harper's Ferry, (Mr. Stubblefield,) we passed over to the canal race of the public works, and had our boats drawn out on a carriage into the river, near the ferry, crossing without any interruption of our work. At the head of the long canal (so called) a rapid commences, and the bed of the river is uniformly covered with fixed rock and huge stones, projecting three and four feet above the present level of the river, presenting an aspect terrific to the beholder, and dangerous to the navigator; this appearance and state of the river continues to the ferry, a distance, on the Maryland side, of about two miles; the fall, in that space, ascertained to be twenty-seven feet.

To improve the navigation through this rapid, the Potomac Company have constructed, at great expense, partial channels on the Maryland side—three in number: the first with a tolerably level bottom, clear course, eighteen or twenty feet wide; and the two others with very unequal bottoms and irregular courses, affording an imperfect and dangerous navigation in high water, but now two feet above the level of the water; along the whole course of these rough passage-ways, a broad wall, at the foot of the Rocky Mountain, which here binds the river, is used for a tow-path, along which boats are dragged up. The boat stopped this night at the head of the long canal, and next morning the boats were hauled over into the river.

SEPTEMBER 7.

Started from Harper's Ferry, and ran through "the spout," which is extremely rapid and rocky for a distance of three hundred yards or more, among dangerous rocks, making a very crooked passage, and must be a most hazardous navigation at any time, and cannot be improved but at an expense which would make a good independent canal for the same distance. For the last three miles, and apparently for some miles ahead, it would astonish the beholder, at low water, to be told that the river could be navigated at any time, so numerous, so large, and so prominent are the rocks covering the whole bed of the river. The imperfect channel, called a canal, made by the Potomac Company, being at this time entirely dry in the run, (this day,) but especially through that part of the river called "the spout," our boats struck very hard against many of the rocks; and, had not our boats been very tight, they must have been wrecked. The boats put in opposite Mr. Weaver's meadow for the night.

SEPTEMBER 8.

Being Sunday, boats lay-to till September 9th; then moved, passed the mouth of Pleasant Valley, at Weaver's mill, on rough and shoal water, amidst rocks from three to six feet high, from shore to shore; the passes between the rocks very narrow and irregular, making it necessary to traverse the river from side to side to gain the passes. This rugged bed in the river continues above a mile, with considerable fall at different places: one called the Devil's Elbow, at Pane's Falls, opposite Pane's Island, between which and the Maryland shore is wall work, made by the Potomac Company as a channel for boats, but which channel is now dry. Below this, enter Dever's mill-dam, formed of brush and stone obliquely in the river, to throw the water to the Maryland shore. This dam is much complained of by boatmen navigating the river, and was found to prevent our boats passing through the best channel, and turned them at a right angle to the middle of the river; the boats rubbed frequently on the narrow passes between the rocks, which continued, with less fall in the river, to Philpot's or Payne's ripple, a mile and a half. Here we were clear of the south mountain, a rocky shore on Virginia side, from Harper's Ferry. The water then variable, interspersed with rocks, and principally shoal to Berlin, and a mile below it, where the boats put in for the night.

TUESDAY, *September* 10.

Mr. Naylor, jun., employed to take meanders of the river, brought on that work from Cumberland to a stake in Caspar W. Weaver's meadow, which he reached on the evening of Saturday, the 7th inst.; and declining, from indisposition, to progress any further with that work, it became necessary to employ another surveyor in his place. Corbin West engaged in that service this morning, and the boats proceeded on; water varying in depth, mostly shoal, through scattered rocks, and over ripples, often rubbing, and with difficulty getting through the narrow passes, on ledges of rock. In fine, it may be truly said, that, from the head of the long canal, above Harper's Ferry, to Sonders's ripple and Lucket's Ferry, above twelve miles, no navigation is afforded for boats of any burden, in low water; nor can it be deemed either good or safe in the best state of the water, from the great number of rocks which crowd the river a great part of the way, and are seen from three to ten feet above the surface of low water. From Lucket's Ferry to the head of Hook's Falls, good water half a mile; then shoal and rocky; through these falls,

where the river passes the break in the Catoctin mountain, one mile and a half, are more rocks and difficult navigation; then good water, passing Jenkins's Island to a fish dam; then shoal water; boats rub, and pass two other fish dams, in very shoal water, to the Kenawha spring, opposite Kemp's Island, where the boats put to for the night.

SEPTEMBER 11.

Remained at Kenawha spring, opposite Kemp's Island, until after dinner, waiting for the engineer to come down with his work. Started about two o'clock, and reached Noland's Ferry, a distance of about three and a half miles, where we moored for the night; the first two and a half miles good water, from two to four feet; the last mile shoaly, the water from ten to sixteen inches, along which we were enabled to keep our boats afloat only by frequent windings.

SEPTEMBER 12.

Started from Noland's Ferry; water good for half a mile, then shoal, being about ten inches. This water continues for about one hundred and thirty yards, to an old fish dam, just below which boat got fast. This shoal continues for at least half a mile, but occasionally rubbing, and once more fast; then good water to Monocacy, at the mouth of which one of the boats got fast; thence good water to Holmes's Ferry; thence to Douglass's Red Rock generally good water, the boat having scraped once or twice; water very shoal, and boat fast, at the head of Chapham's Island; shoal water during the whole length of this island.

D.

The amount of toll on a ton of merchandise being stated at one cent per mile, and the freight also at one cent per mile; and eight men, and eight wagons, and forty horses, being the number required to transport the burden of one boat, drawn by one horse, and managed by a man and a boy, viz. twenty-five tons: Assume, then, equal rates of expense, as the basis of calculation; say, for example, they each proceed one hundred miles—the wagons by land, and the boat by canal, and each travel twenty miles a day, carrying twenty-five tons of goods; the expense

of one wagon per day, say, is, for one man one dollar, for five horses five dollars, that is, -	$6 00
The expense, then, of eight wagons, eight men, and forty horses, is, per day, - -	48 00
The boat, at the same rates, is, for one man one dollar, one boy fifty cents, and a horse one dollar, each day, - - - - - - - -	2 50
It requires five days, at the rate of travelling assumed, to perform the trip of one hundred miles; five times the daily expense of the wagons is - - - - -	240 00
Five times the daily expense of the boat is - - - - -	12 50
The difference in the cost of freight of twenty-five tons by land or water, free from toll, is -	227 50
Next add the interest on the outfit for land carriage, and the same for the boat, &c. A wagon costs, when new, say $100; then, eight wagons cost $800, and forty horses, each $100, amount, together, to - - - - - - - - -	4,800 00
The gear of five horses, when new, say costs $50; and of forty horses, therefore, is - -	400 00
	5,200 00
A boat, seventy feet long, ten feet wide, say will cost $150, and the horse and gear $110—that is, for canal outfit, - - - - - - - -	260 00
Difference, - - -	$4,940 00

The annual interest on $4,940, at six per cent., is $296 40.

A wagon, it is supposed, cannot last in service on the road more than eight years without repairs; then, the rate of the wear of a wagon may be stated per annum at one-eighth of the cost.

For repairs of each wagon per annum, - - - - -	$12 50
Horses in constant use in heavy draught it is supposed cannot be fit for service more than five years on an average; then, one-fifth of the cost is the allowance for loss of horses; this, for five horses, is equal to - - - - - - - -	100 00
A horse in service will require a new set of shoes every two months; this, for five horses, makes the wear of shoes, - - - - - - - -	30 00

The gear of five horses is worth, new, $50, and will last on an average say five years; then, we may add for this item of wear, per annum, for each, $10.

At these rates, calculate the difference.

The interest on the outfit of eight wagons and forty horses, after deducting the cost of boat and horse, is - - - - - - - - -	$296 40
Wear of eight wagons, each $12 50, - - - - -	100 00
Wear of forty horses, as above, - - - - - -	800 00
Shoes for forty horses, as above, - - - - - -	240 00
Wear of gear, as above, - - - - - -	80 00
	$1,516 40
The cost of the boat and horse having been deducted from the sum on which interest is taken, no interest is therefore charged here; a boat will surely last longer than a wagon in service, but we will state it at the same—that is, eight years; then, take one-eighth of $150, the first cost, for the wear of a boat per annum, - - - - - - -	$18 75
Wear of one horse, - - - - - - -	20 00
Shoes for one horse, as above, - - - - - -	6 00
Wear of gear, as above, - - - - - -	2 00
	46 75
Difference in wear and interest in one year, - -	$1,469 65

To understand this difference more exactly, let the expenses per day, for five days, as above, on each kind of transportation, be added to a proportion of the sum of the annual wear and interest equal to five days.

Expenses of eight wagons, &c. per day, - - - - -	$240 00
$1,516 40, divided by 73, gives the wear, interest, &c. for five days, viz: - - -	20 77
Entire expenses of wagons per day, - -	$260 77
Same expenses, for same time, of the boat, &c. is - - - -	$12 50
$46 75, divided by 73, is - - - - - -	64
Entire expenses of boat, &c. per day, - -	$13 14

The sums total of the expense of each mode divided by each other, viz. $260 77 by $13 14, shows that the expenses of land carriage may be stated, in round numbers, at twenty times the cost of transportation by water; besides changing the employments of the supernumerary carriers, in extensive districts of country, from the unproductive to the productive classes of citizens.

To the commissioners appointed by the States of Virginia and Maryland to investigate the affairs of the Potomac Company, and to suggest such measures as may produce the benefits which would result from practical improvements of the navigation of the Potomac river: Isaac Briggs, in pursuance of authority conferred on him by the Board of Public Works of Virginia, and of the approbation of the said commissioners, as successor to the late engineer, respectfully offers the following report:

GENTLEMEN: GEORGETOWN, *December* 19, 1822.

From the notes of Thomas Moore, the late engineer, (notes which he left in pencil-writing,) I have carefully, and in detail, calculated and arranged all the estimates of expense necessary for constructing, along the valley of the Potomac river, an independent canal, in which the water is intended to be thirty feet wide on the surface, twenty feet wide at the bottom, and three feet deep. The notes of the late engineer commenced at Cumberland, and extended to a few perches more than 23 miles below Harper's Ferry—150 miles. In order to arrive at the greatest possible accuracy in making the estimates of cost, the time has been taken in minute portions, and each calculated separately, as the site has varied, according to the difficulty or facility, and, of course, the greater or less expense necessary for constructing a good canal. For the various kinds of works, prices have been assumed which have well sustained the test of experience, extensively in the State of New York, and in some measure in the State of Virginia. I, therefore, confidently believe that, if the execution of the work be faithfully and prudently managed, its cost will not exceed the estimate. It has been deemed expedient to divide into sections the proposed canal, for the purpose of facilitating its execution. The first section extends from its commencement at Cumberland, in Maryland, to the mouth of Capon, in Virginia, 54½ miles; the second section, from the mouth of Capon to the mouth of Great Conococheague, or Williamsport, in Maryland, 33½ miles; the third section, wholly on the Maryland side of the river, from the mouth of Great Conococheague to Harper's Ferry, opposite to the mouth of Shenandoah river, 38¾ miles; the fourth section, still on the Maryland side, from Harper's Ferry to the head of the Great Falls, 46¼ miles; and the fifth section, still on the Maryland side, from the head of the Great Falls to tide water, in the District of Columbia, 12 miles: amounting, altogether, to 185 miles of canal navigation, from Cumberland to tide water.

RECAPITULATION.

The first section

Commences at Cumberland, in Maryland, and, crossing the river three times, terminates at the mouth of Capon, on its western bank.

The first crossing to the Virginia shore, just above Cressap's landing, 16 miles from Cumberland, is by a dam of suitable elevation; then, descending by locks into the still-water above the dam, we pass through a guard-lock into a canal on the opposite shore.

The second crossing to the Maryland shore is also by means of a dam placed just below the mouth of South Branch, 19 miles from Cumberland, to raise the water in the Potomac eight feet. In every case where a dam is the means of crossing a river, a guard-lock is indispensable at the entrance of the canal on the opposite shore. Aqueducts, however, as the mode of crossing rivers with a canal, are, on account of the superior safety and convenience which they afford to navigation, decidedly preferable to dams, although more expensive in construction; yet, where we cannot avail ourselves of sufficient feeders from side streams to keep always a full and certain supply of water in our upper levels, dams are adopted, because by them we obtain from the river an abundant supply. This is precisely the case in the first crossing; and, in the second, there is not sufficient elevation for an aqueduct.

The third crossing to the Virginia shore, 29 miles from Cumberland, is by an aqueduct; which, by maintaining a level sufficiently high to be safe from freshets in the river, will augment the expense of a piece of walling just about $3,900.

Summary of the estimates of expense.

For excavating, walling, aqueducts, dams, &c., including 6 culverts, noted by the engineer, -	$262,656
The extra expense of a wall, mentioned above, - - - -	3,900
For lockage, 146 feet, (in 18 locks,) at $650 per foot, - - - -	94,900
For 48 culverts, (in addition to those in the first item,) at $200 each, - - -	9,600
For 30 farm bridges, at $300 each, - - - - -	9,000
For 4 road bridges, at $500 each, - - - - -	2,000
	$382,056
Add for contingencies, engineers, superintendents, &c., 10 per cent., - - -	38,206
Amount of estimates for the upper section, from Cumberland to the mouth of Capon, 54½ miles, $7,711 per mile, (which, in the same proportion, for a canal of the dimensions of those in New York, 40 feet wide and 4 feet deep, would be $13,983 per mile,) - - -	$420,262

The second section

Commences with an aqueduct across Capon, and, continuing on the Virginia side 14 miles, crosses the Potomac on an aqueduct to the Maryland shore, and terminates at the western bank of the Great Conococheague.

Summary of the estimates of expense.

For excavation, walling, aqueducts, dams, &c.,	$184,413
For lockage, 72 feet, (in 10 locks,) at $650 per foot,	46,800
For 33 culverts, at $200 each,	6,600
For 20 farm bridges, at $300 each,	6,000
For 3 road bridges, at $500 each,	1,500
	$245,313
Add for contingencies, engineers, superintendents, &c., 10 per cent.,	24,531
Amount of estimates for the second section, 33½ miles, $8,055 per mile, (stated in proportion to their dimensions on the canal of New York, it would be $14,606 per mile,)	$269,844

The third section

Commences with an aqueduct across Great Conococheague, and, continuing on the Maryland side, terminates at Harper's Ferry.

Summary of the estimates of expense.

For excavation, walling, aqueducts, dams, &c.,	$228,313
For lockage, 80 feet 8 inches, (in 10 locks,) at $650 per foot,	52,442
For 33 culverts, at $200 each,	6,600
For 30 farm bridges, at $300 each,	9,000
For 5 road bridges, at $500 each,	2,500
	$298,855
Add for contingencies, engineers, superintendents, &c., 10 per cent.,	29,885
Amount of estimates for the third section, 38¾ miles, $8,483 per mile, (rated on the canals of New York, in proportion to their dimensions, it would be $15,383 per mile,)	$328,740

The fourth section

Commences at Harper's Ferry, and, continuing on the Maryland side, terminates at the head of the Great Falls.

Summary of the estimates of expense.

For excavation, walling, aqueducts, &c.,	$229,679
For lockage, 86 feet, (in 11 locks,) at $650 per foot,	55,900
For 73 culverts, at $200 each,	14,600
For 37 farm bridges, at $300 each,	11,100
For 8 road bridges, at $500 each,	4,000
	$315,279
Add for contingencies, engineers, superintendents, &c., 10 per cent.,	31,528
Amount of estimates for the fourth section, 46¼ miles, $7,499 per mile, (rated on the canals of New York, in proportion to their dimensions, it would be $13,598 per mile,)	$346,807

The fifth section

Commences at the head of the Great Falls, and, continuing on the Maryland side, terminates at the head of tide-water navigation in the District of Columbia.

Summary of the estimates of expense.

For excavation, walling, aqueducts, dams, &c.,	$103,527
For lockage, 40 feet, (in 5 locks,) at $1,000 per foot,	40,000
For lockage, 62 feet, (in 9 locks,) at $750 per foot,	46,500
For 12 culverts, at $200 each,	2,400
For 5 farm bridges, at $300 each,	1,500
	$193,927
Add for contingencies, engineers, superintendents, &c., 10 per cent.,	19,393
Amount of estimates for the fifth section, 9 miles, $23,702 per mile, (rated on the canals of New York, in proportion to their dimensions, it would be $42,973 per mile,)	$213,320

General summary.

For 182 miles of canal, comprising, besides excavation, walling, aqueducts, and dams, 487 feet of lockage, 205 culverts, 122 farm bridges, and 20 road bridges:

For the 1st section,	54½ miles,	$7,711 per mile,	$420,262
For the 2d section,	33½ miles,	8,055 per mile,	269,844
For the 3d section,	38¾ miles,	8,483 per mile,	328,721
For the 4th section,	46¼ miles,	7,499 per mile,	346,807
For the 5th section,	9 miles,	23,702 per mile,	213,320
	182 miles,	$8,676 per mile,	$1,578,954

This average rate, on the whole canal, ($8,676 per mile,) would, if applied in exact proportion to a canal of the same dimensions as those in the State of New York, be $15,732 per mile; and this accords with the actual cost of such parts of the New York canals as resemble ours in amount of lockage and in laborious excavation.

All which is respectfully submitted.

ISAAC BRIGGS.

To His Excellency the Governor of Maryland: GEORGETOWN, *December* 19, 1822.

The commissioners, in submitting their report, deem it necessary, in justice to themselves, to state the reasons why the fulfilment of their important duties has been thus long delayed. Measures were taken to commence the survey so soon as the subsiding of the spring freshets would permit; but, owing to the distance at which the commissioners lived from each other, and to the circumstance that Mr. Moore, the late engineer of Virginia, was at that time engaged in a survey of the Roanoke, we did not assemble at Cumberland until the 15th of July last. The inspection of the river, from that point to the mouth of Savage, and the survey of the line of connexion between the western and eastern waters, occupied us until about the 31st of July, upon which day we commenced locating the canal. From that period we were most sedulously engaged; and, although several of our party were attacked with sickness shortly after leaving Cumberland, we still persevered, and, through many difficulties, on the 18th of September reached a point of the river one hundred and fifty-seven miles below the beginning. Here, nearly the whole party of commissioners, as well as others, were attacked by disease, which rendered our further progress impracticable. Mr. Moore had hitherto preserved his health, and we parted with him, under the expectation that we should again meet on the 4th of November. Soon, alas! we were distressed by hearing of his death—an event which has deprived the world of a most valuable man, remarkable for the scope of his intellect, the practical soundness of his views, and his devotion to pursuits which are becoming more and more important to our young and rising country. Deprived thus of the necessary services of Mr. Moore, and several of our number still being confined by sickness, no meeting took place at the appointed time, and it was not until about the 1st of December that we again assembled. In the interim, the Board of Public Works for Virginia, with a discernment which did them honor, appointed Mr. Isaac Briggs the successor of Mr. Moore, in his duties upon the Potomac. The advanced season of the year, and the inclemency of the weather, would probably have deterred us from finishing the survey, but the cheerful alacrity of Mr. Briggs encouraged and sustained us, and, under his auspices, we have happily completed our labors. Deeply impressed with a zeal for the internal improvements of our respective States, we regard it as a duty, at the same time that we feel it a pleasure, to recommend Mr. Isaac Briggs to their consideration. Few, if any, can be found to equal him in those most useful branches of science to which he has devoted himself. In practice, he is prompt and skilful; and, in calculation, his rapidity is like intuition, while his accuracy defies scrutiny. Considering how very little the important science of civil engineering is understood in our country, we do not hesitate to say that a man so thoroughly versed will be invaluable to that State which may have the discernment to perceive his merits, and the liberality to appreciate his services.

With great respect, we are,

ATHANS. FENWICK,
WILLIAM NAYLOR,
MOSES T. HUNTER.

SIR: GEORGETOWN, *December* 22, 1822.

In consequence of information acquired since my colleagues have returned to their homes, and since I find my signature to the joint report of the commissioners on the Potomac, I feel it a duty I owe to myself to state the partial change, on a single point, which has been operated in me.

In the opinion given in the report as to the forfeiture of the charter of the Potomac Company, no suggestion is made of any circumstances warranting any remuneration or provision to be made for the stock or for the debts of the said company, under the impression that this company stood precisely in the condition of all companies which had failed to comply with obligations entered into for a valuable consideration.

This opinion I still think strictly and legally correct, with this difference: that, inasmuch as it now appears to me, from the enclosed paper or document, (which I beg to be communicated, with others referred to in the report,) that the Legislatures themselves appear to have projected the scheme for the improvement of the river, and also the outline of the manner of its being done, which has been so unsuccessful; and that, therefore, the States, if not legally bound, by their recommendation of measures to effect the improvement of the river, to make provision, at least, for the payment of the debts of a company contracted to effect objects having thus their sanction, and due to persons who took no share in the enterprise or its expected profits, they will no doubt appreciate their moral obligations, under all the circumstances, whatever they find them to be.

In making this communication of ideas on the enclosed paper, my humble intentions will be, I trust, approved by the wisdom of the Legislature, and by your excellency.

I have the honor to be, sir, your obedient and humble servant,

ATHANS. FENWICK.

To His Excellency the GOVERNOR.

Report of the Commissioners of Virginia and Maryland.

CITY OF RICHMOND, *January* 22, 1785.

At a meeting at the city of Annapolis, on the 22d day of December, 1784, of the commissioners appointed by the Commonwealth of Virginia to confer with persons authorized on the part of the State of Maryland, upon the subject of opening and improving the navigation of the river Potomac, and concerting a plan for opening a proper road between the waters of the Potomac and the most convenient western waters; and a committee appointed by the Senate and House of Delegates of Maryland to meet the commissioners of Virginia for the purpose aforesaid, there were present—

General Washington and General Gates, from Virginia;

The Honorable Thomas Stone, Samuel Hughes, and Charles Carroll, of Carrollton, esquires, of the Senate;

And John Cadwallader, Samuel Chase, John Debutts, George Digges, Philip Key, Gustavus Scott, and Joseph Dashiell, esquires, of the House of Delegates.

General Washington in the chair; Randolph B. Latimer appointed clerk.

The conference proceeded to take the subject-matters to them referred into their consideration, and thereupon came to the following resolutions:

That it is the opinion of this conference that the removing the obstructions in the river Potomac, and the making the same capable of navigation from tide water as far up the north branch of the said river as may be convenient and practicable, will increase the commerce of the Commonwealth of Virginia and State of Maryland, and greatly promote the political interests of the United States, by forming a free and easy communication and connexion with

the people settled on the western waters, already very considerable in their numbers, and rapidly increasing, from the mildness of the climate and the fertility of the soil.

That it is the opinion of the conference that the proposal to establish a company for opening the river Potomac merits the approbation of, and deserves to be patronised by, Virginia and Maryland; and that a similar law ought to be passed by the Legislatures of the two Governments to promote and encourage so laudable an undertaking.

That it is the opinion of this conference that it would be proper for Virginia and Maryland each to become subscribers to the amount of fifty shares; and that such subscription would evince to the public the opinion of the Legislatures of the practicability and great utility of the plan; and that the example would encourage individuals to embark in the measure, give vigor and security to so important an undertaking, and be a substantial proof to our brethren of the western territory of our disposition to connect ourselves with them by the strongest bonds of friendship and mutual interest.

That it is the opinion of this conference that an act of Assembly of Virginia "for opening and extending the navigation of the river Potomac from Fort Cumberland to tide water" ought to be repealed.

That it is the opinion of this conference, from the best information they have obtained, that a road, to begin about the mouth of Stoney river, may be carried, in about twenty or twenty-two miles, to the Dunker bottom, on Cheat river; from whence this conference are of opinion that batteau navigation may be made, though perhaps at considerable expense; that, if such a navigation cannot be effected, by continuing the road about twenty miles further it would intersect the Monongahela, where the navigation is good, and has been long practised.

That a road from Fort Cumberland to Turkey Foot would be about thirty-three miles; from whence an improvement of the Youghiogeny river would be necessary, though probably it might be done at less expense than the navigation of the Cheat river could be rendered convenient from the Dunker bottom.

That it is a general opinion that the navigation on the Potomac may be extended to the most convenient point below, or even above, the mouth of Stoney river; from whence, to set off a road to Cheat river; and this conference are satisfied that that road, from the nature of the country through which it may pass, (wholly through Virginia and Maryland,) will be much better than a road can be made at any reasonable expense from Fort Cumberland to the Youghiogeny, which must be carried partly through Pennsylvania.

That it is the opinion of this conference that, if the navigation on the Potomac should be carried to about the mouth of the Stoney river, a communication with the western waters, through a road from thence, extended even to the Monongahela, would be preferable, in most points of view, to that by a road from Cumberland to Turkey Foot, the only other way practicable, and in any great degree useful; that the communication by a road from Fort Cumberland to the present navigable parts of the Youghiogeny, and thence through that river, (though, in the opinion of this conference, a secondary object only,) would facilitate the intercourse with a very respectable number of the western settlers, contribute much to their convenience and accommodation, and that the benefits resulting therefrom to these States would compensate the expense of improving that road.

The conference therefore recommend that the Legislatures of Virginia and Maryland appoint skilful persons to view, and accurately examine and survey, the Potomac, from Fort Cumberland to the mouth of Stoney river; and the river Cheat, from about the Dunker bottom to the present navigable part thereof; and if they judge the navigation can be extended to a convenient distance above Fort Cumberland, that they may from thence survey, lay off, and mark a road to the Cheat river, or continue the same to the navigation, as they may think will most effectually establish the communication between the said eastern and western waters; and that the said road be cut and cleared, not less than eighty feet, and properly improved and maintained in repair, not less than forty, nor more than fifty feet wide, at the joint expense of both States; and your conferees beg leave to recommend that each State appropriate $3,333 33 for the purpose. And this conference are further of opinion that the States of Virginia and Maryland request permission of the State of Pennsylvania to lay out and improve a road through such part of that State as may be necessary, in the best and most proper direction, from Fort Cumberland to the navigable part of the Youghiogeny; and, on such permission being obtained, that proper persons be appointed to survey, mark, clear, and improve such road, at the equal expense of Virginia and Maryland.

Which are submitted to the consideration of the Legislatures of Virginia and Maryland.

By order:

R. B. LATIMER, *Clerk.*

Managers are also appointed to receive subscriptions at the towns of Alexandria and Winchester; at Alexandria, John Fitzgerald and William Hartshorn, gentlemen; and at Winchester, Joseph Holmes and Edward Smith, gentlemen.

JACQUELIN AMBLER, JOHN BECKLEY, *Managers.*

17th CONGRESS.] No. 536. [2d SESSION.

SETTLEMENT AT THE MOUTH OF COLUMBIA RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 27, 1823.

To the House of Representatives of the United States: WASHINGTON, *January* 25, 1823.

I transmit, herewith, to the House of Representatives, a report from the Secretary of State, together with the document and information requested by the resolution of the House of the 19th of December last, relating to the establishment at the mouth of Columbia river.

JAMES MONROE.

DEPARTMENT OF STATE, WASHINGTON, *January* 24, 1823.

The Secretary of State, to whom has been referred the resolution of the House of Representatives of the 19th of December last, requesting of the President of the United States "to lay before that House so much of the letter of Mr. Prevost as relates to the establishment at the mouth of Columbia river, and such information as he may have in his possession in relation to the arrangements made, about the year 1814, by the Northwest Company, with the proprietors of a settlement made by citizens of the United States at the mouth of Columbia river, by which that company became possessed of that settlement," has the honor of reporting to the President copies of the papers requested by that resolution.

JOHN QUINCY ADAMS.

Mr. J. B. Prevost to the Secretary of State.

SIR: MONTE REY, NEW CALIFORNIA, *November* 11, 1818.

In conformity with mine of the 27th July, which I had the honor to address to your Department from Lima, I proceeded in His Britannic Majesty's sloop of war Blossom to the mouth of the Columbia, and entered the river on the 1st of October following. A few days thereafter, to wit, on the 6th, as you will perceive by referring to a copy of the act of surrender, (marked A,) I received, in the name and on the part of the United States, the possession of the establishment at Fort George, made under the first article of the treaty of Ghent, by Captain Hickey, of the royal navy, in compliance with the orders of the Prince Regent for that purpose, signified to him through the medium of Earl Bathurst. The British flag was, thereupon, lowered, and that of the United States hoisted in its stead; where it now waves, in token both of possession and of sovereignty.

The establishment, of which the annexed sketch (marked B) will give you a correct idea, has been considerably extended and improved by the agents of the Northwest Company of Canada, who will continue to occupy and protect it, under our flag, until it shall please the President to give orders for their removal. I will, however, suggest that, when such disposition shall take place, time ought to be granted, in a ratio with the distance, to enable them to obtain the means of transporting the private property deposited there, consisting of dry goods, furs, and implements of war, to a large amount.

Shortly after the ceremony of surrender, I received a note on this subject from Mr. Keith, the gentleman whose signature accompanies that of Captain J. Hickey, which, together with a copy of my answer, (also marked B,) is submitted for your inspection. A sense of justice would have dictated the assurances I have given him in reply; but I had a further motive, which was that of subsiding the apprehensions excited by the abrupt visit of the Ontario. It appeared to me prudent, in this view, to take no notice of the suggestion relative to a discussion of boundary, and, in answering, to avoid any intimation of immediate or of future removal; as either might have induced him to form a settlement elsewhere on the river, and thus have given rise to collisions between the two Governments, which may now be wholly avoided.

The bay is spacious; contains several anchoring places, in a sufficient depth of water; and is, by no means, so difficult of ingress as has been represented. Those enjoying the exclusive commerce have probably cherished an impression unfavorable to its continuance, growing out of the incomplete survey of Lieutenant Broughton, made under the orders of Vancouver, in 1792. It is true that there is a bar extending across the mouth of the river, at either extremity of which are, at times, appalling breakers; but it is equally true that it offers, at the lowest tides, a depth of twenty-one feet of water throughout a passage, exempt from them, of nearly a league in width. The Blossom, carrying more guns than the Ontario, encountered a change of wind while in the channel; was compelled to let go the anchor; and, when again weighed, to tack and beat, in order to reach the harbor; yet found a greater depth, and met with no difficulty either then or on leaving the bay. The survey (marked C) may be relied upon for its accuracy. The bearings, distances, and soundings were taken by Captain Hickey, who was kind enough to lend himself to the examination, and to furnish me with this result. It is the more interesting, as it shows that, with the aid of buoys, the access to vessels of almost any tonnage may be rendered secure. In addition to this, it is susceptible of entire defence; because a ship, after passing the bar, in order to avoid the breaking of the sea on one of the banks, is obliged to bear up directly for the knoll forming the cape; at all times to approach within a short distance of its base; and, most frequently, there to anchor. Thus, a small battery erected on this point, in conjunction with the surges on the opposite side, would so endanger the approach as to deter an enemy, however hardy, from the attempt.

This outlet, the only one between the thirty-eighth and fifty-third degrees of latitude, embraces the entire range of country from the ocean to the mountains; and its interior unites the advantage of a water communication throughout, by means of the many streams tributary to the Columbia, two of which disembogue opposite to each other within twenty-five leagues of the port, are navigable, and nearly of equal magnitude with this beautiful river. The ocean teems with *otter*, (mustela lutica,) the seal, and the whale; while the main land affords, in innumerable quantities, the common otter, (mustela lutica,) the bear, the buffalo, and the whole variety of deer.

It has been observed, by those exploring this coast, that the climate, to the southward of fifty-three degrees, assumes a mildness unknown in the same latitude on the eastern side of the continent. Without digressing to speculate upon the cause, I will merely state that such is particularly the fact in forty-six degrees sixteen minutes, the site of Fort George. The mercury, during the winter, seldom descends below the freezing point; when it does so, it is rarely stationary for any number of days; and the severity of the season is more determined by the quantity of water than by its congelation. The rains usually commence with November, and continue to fall partially until the latter end of March or beginning of April. A benign spring succeeds; and when the summer heats obtain, they are so tempered by showers as seldom to suspend vegetation. I found it luxuriant on my arrival, and, during a fortnight's stay, experienced no change of weather to retard its course. The soil is good; all the cereal gramina and tuberous plants may be cultivated with advantage; and the waters abound in salmon, sturgeon, and other varieties of fish.

The natives, in appearance as well as in character, differ essentially from those with us. They are less in stature, more delicately formed, and singular in the shape of the head, which, in infancy, is compressed between two small plates of wood or metal, so as in its growth to obtain the semblance of a wedge. They are inquisitive, cheerful, sagacious, possess fewer of the vices attributed to the savage, and are less addicted to cruelties in war. Scalping is unknown to them; and a prisoner suffers the infliction of no other punishment than that of becoming slave to the captor: but, as they neither sow nor reap, an observer cannot easily discern in what the servitude consists. The wants of the one are supplied by his own address in the use of the bow and spear; while those of the other require the same efforts, and equal skill, for their gratification.

The language on this side of the falls bears a strong analogy with that of Nootka; so much so, that, with the aid of a Spanish vocabulary of the latter, accompanying the voyage of Valdes, I could, notwithstanding the imperfection in this mode of conveying and of obtaining sounds, express my wants and be perfectly understood. I met with several of the natives who had heretofore volunteered on board of some one of our vessels in their fur excursions; two of whom had acquired a sufficient knowledge of our language to speak it with some ease, and were extremely solicitous to embark with us.

I regret that I could not collect sufficient data upon which to ground an estimate of the furs gathered on the Columbia: it was impossible, for reasons that are obvious. Humboldt has undertaken to number those of the otter taken on the coast and shipped to China, of which he assigns five-sixths to the Americans. He may be correct as to the quantity, but I doubt whether the proportion be quite so great; as it frequently happens that the English adventurer confides his stock to our countrymen, in order to participate in the benefit of a market, from a direct intercourse with which he is excluded by the laws of his country.

Perhaps I have gone too much into detail; but it appeared to me that, by exhibiting the importance of the position only, I should not have fulfilled the object of the President; that it was equally incumbent on me to present a view of the country, of its inhabitants, of its resources, of its approach, and of its means of defence. I shall now conclude with the relation of an occurrence which may and ought to influence the course to be adopted and pursued as to this station.

The speculations of Humboldt, and his glowing description of the soil and climate of this province, have probably given a new direction to the ambition of Russia, and determined its Emperor to the acquisition of empire in America. Until 1816, the settlements of this Power did not reach to the southward of 55°,* and were of no consideration, although dignified by them with the title of Russian America.

In the commencement of that year two distinct establishments were made, of a different and of a more imposing character. The first at Atooi, one of the Sandwich islands; the other in this vicinity, within a few leagues of St. Francisco, the most northerly possession of Spain, in 37° 56′. The sketch I subjoin (marked D) was procured from a member of the Government at this place, from whom I also learned that its augmentation has since become so considerable as to excite serious alarm. Two Russian ships left this on their way thither a few days anterior to our arrival—one having on board mechanics of every description, together with implements of husbandry. We passed sufficiently near the spot assigned to it to distinguish the coast with some precision, and ascertained that it was an open road—a circumstance that renders the position liable to many objections, if intended to be permanent; in other respects, the choice is judicious for an infant colony. It enjoys a climate still milder than that of Columbia; is environed by a beautiful country; and its proximity to an old settlement enables the Russians to partake of the numerous herds of black cattle and horses that have been there multiplying for the last fifty years. The port of St. Francis is one of the most convenient, extensive, and safe in the world, wholly without defence, and in the neighborhood of a feeble, diffused, and disaffected population. Under all these circumstances, may we not infer views to the early possession of this harbor, and ultimately to the sovereignty of entire California? Surely the growth of a race on these shores, scarcely emerged from the savage state, guided by a chief who seeks not to emancipate, but to inthral, is an event to be deprecated—an event, the mere apprehension of which ought to excite the jealousies of the United States, so far at least as to induce the cautionary measure of preserving a station which may serve as a barrier to a northern aggrandizement.

I have not been able to gather other information respecting the settlement at Atooi than that of an assurance of its existence—a fact corroborated by the visit of the two ships to those islands in their route hither. The Russians are not yet such enterprising navigators as to augment sea risks by extending a voyage several thousand miles without an object. Such was the case in this instance, unless connected with the settlement, as they had sailed from Lima abundantly supplied, a few weeks prior to my first visit to that city, in April last.

These islands yield the sandal wood, so much esteemed in China, and have been resorted to by our vessels, for years past, not only in search of this valuable article, but of the necessary stock of fresh provisions to supply the crew during their cruise on the northwest coast. How far this intercourse may be affected, hereafter, by this encroachment, is also a subject for the consideration of the President.

I have taken the liberty to enclose a note (marked E) of the authorities, Spanish as well as English, that have fallen under my view, illustrating the discovery of the Columbia by Mr. Gray, in 1791. Its subsequent occupation in 1811, by which the sovereignty of the United States was completed, to the exclusion of any European claimant, is a fact of which the surrender of the sole establishment on the river is conclusive evidence.

I have the honor to be, with great consideration, your very humble, obedient servant,

J. B. PREVOST.

Mr. J. J. Astor to the Secretary of State.

SIR: NEW YORK, *January* 4, 1823.

I had the honor to receive your letter of the 24th ultimo. Indisposition has prevented my acknowledging the receipt thereof at an earlier period.

You request information of arrangements made at about 1814, by the Northwest Company and citizens of the United States, by which that company became possessed of a settlement made at the mouth of Columbia river by citizens of the United States. The settlement to which you allude, I presume, is "Astoria," as I know of no other having been made at or near the mouth of that river. Several circumstances are alleged as having contributed to the arrangement by which the Northwest Company became in possession of that settlement, but chiefly to the misuse of the confidence which had been placed in Mr. McDougall, who, at the time the arrangement was made, and at the time my chief agent, Mr. Wilson P. Hunt, was absent, acted as sub-agent.

I beg leave briefly to state, that, contemplating to make an establishment at the mouth of Columbia river, which should serve as a place of depot, and give further facilities for conducting a trade across this continent to that river, and from thence, on the range of northwest coast, &c. to Canton, in China, and from thence to the United States, arrangements were accordingly made, in 1810, for a party of men to cross the continent for the Columbia river. At the same time, I fitted the ship Tonquin, carrying twenty guns and sixty men, commanded by the late Captain Thorn, lieutenant of the United States navy. This ship sailed in September, 1810, having on board the means for making an establishment at Columbia, where she arrived on 22d March, 1811. They landed, found the natives friendly, and built a fort, erected a house, store, &c. This being accomplished, Captain Thorn left thirty men in possession of the place, to await the party who were to make the voyage over land; these also happily arrived, though not till several months after. On or about the 1st of June, Captain Thorn left Columbia river with

*Chart of the discoveries of Russian navigators, published by order of the Emperor in 1802, referred to by Humboldt in his View of New Spain, (translation,) page 270, 2d vol. (note.)

a view to make some trade on the coast, and then to return to the river; but, unfortunately, Captain Thorn never returned. At about two hundred miles north of the Columbia, he put in a bay to trade with the natives. Not attending to the precautions necessary, as he had been instructed to do, to guard against an attack, he suffered a whole tribe of Indians to come on board and about his ship; an attack was made; he was overpowered; fire was communicated to the magazine; the ship was blown up; and every soul on board, or near her, perished.

In 1811 I fitted out another ship, the Beaver, carrying twenty guns, with a duplicate cargo of the ship Tonquin, and sixty or seventy men. The captain (Sowle) was instructed to sail for Columbia river, and in search of the men who were sent across the continent, as also of the Tonquin. The Beaver sailed from this in October, 1811, arrived at Columbia in May following, found the establishment, and landed such men, goods, provisions, &c. as the establishment was in need of. My instructions to the captain were, that, after supplying the establishment, he should proceed to Chatka, a Russian settlement, for the purpose of trade; and then return to Columbia, take what furs we had, and proceed to Canton, and from thence to New York. He accordingly left Columbia; and, most unfortunately, Mr. Hunt, of Trenton, New Jersey, my chief agent, left the river with him, sailed as directed, for the Russian settlement, and effected their object; but, instead of following instructions to return to Columbia, he sailed direct for Canton, leaving Mr. Hunt at one of the Sandwich islands, to await the arrival of another ship which I had promised to send from this in 1812. The ship Beaver arrived at Canton, and received there the news of war. I had sent orders to the captain to return to Astoria, but he was fearful of being captured, and remained safely at Canton till the war was over, when he came home. In consequence of the war, I found it inconvenient to send a ship in 1812; but I did send one (the Lark) early in 1813, with directions to the captain to sail for Columbia river, and to stop at the Sandwich islands for information. Being within a few days' sail of those islands, the ship, in a squall of wind, was upset, and finally drifted on the beach of one of those islands, a wreck—ship and cargo totally lost. Here was met Mr. Hunt, who, after all the information he received, and my great desire to protect the establishment at Columbia river, procured an American vessel, took some provisions, sailed, and arrived in Columbia river. He there learned that McDougall had transferred all my property to the Northwest Company, who were in possession of it, by a sale, as he called it, for the sum of about $58,000, of which he retained $14,000, for wages said to be due to some of the men. From the price obtained for the goods, &c., and he having himself become interested in the purchase, and made a partner of the Northwest Company, some idea may be formed as to this man's correctness of dealings. It will be seen, by the agreement (of which I transmit a copy) and the inventory, that he sold to the Northwest Company 18,170¼ pounds of beaver, at two dollars, which was at about that time selling in Canton at five and six dollars; 907 otter skins, at fifty cents, or half a dollar, which were selling in Canton at five to six dollars per skin.

I estimated the whole property to be worth nearer $200,000 than $40,000, about the sum which I received by bills on Montreal. Previous to the transaction of McDougall, we had already established trading-posts in the interior, and were in contact with the Northwest Company. It is now to be seen what means have been used by them to counteract my plan. It is well known that, as soon as the Northwest Company had information of my intentions and plan for conducting my commercial operations, they despatched a party of men from the interior, with a view to arrive before my people at Columbia. These men were obliged to return without effecting their object. In the mean time, representation was made to their Government as to the probable effect of my operations on their interest, and requesting to interfere in their behalf. This being in time of peace, the Government did not deem it advisable so to do. So soon, however, as war was declared, these representations were renewed, aid was asked from the Government, and it was granted. The Phœbe frigate, and sloops of war Racoon and Porcupine, were sent from England, with orders to proceed to Columbia river, and destroy my property. They sailed from England early in January, 1813. Arriving at Rio de Janeiro, Admiral Dickson ordered the Phœbe frigate, with one of the sloops, to pursue Captain Porter, in the frigate Essex, and the sloop of war Racoon to the Columbia. She arrived there, took possession in the name of the King, and changed the name of the place, Astoria, to Fort George. Previous to this, the Northwest Company had despatched another or second party of men to the Columbia. They arrived there in the absence of Mr. Hunt. McDougall gave them support and protection, and they commenced, after some time, to negotiate with this gentleman.

The reasons assigned by him for his conduct will be seen by an extract of a letter said to have been sent by a Mr. Shaw, of the Northwest Company, and of which I send you a copy. The plan by me adopted was such as must have materially affected the interest of the Northwest and Hudson's Bay Companies, and it was easy to be foreseen that they would employ every means to counteract my operations, and which, as my impression, I stated to the Executive of your Department as early as February, 1813, as will be seen by a copy of the sketch of a letter which I wrote to the Secretary of State, to which no reply was given. On repeated application, some time after, aid was promised me; but I believe the situation of our country rendered it inconvenient to give it. You will observe that the name of the Pacific Fur Company is made use of at the commencement of the arrangements for this undertaking. I preferred to have it appear as the business of a company rather than that of an individual; and several of the gentlemen engaged, Mr. Hunt, Mr. Crooks, Mr. McKay, McDougall, Stuart, &c. were, in effect, to be interested as partners in the undertaking, so far as respected any profit which might arise; but the means were furnished by me, and the property was solely mine, and I sustained the loss, which, though considerable, I do not regret; because, had it not been for the unfortunate occurrence just stated, I should have been, as I believe, most richly rewarded, as it will be seen that the difference of price in the beaver and otter skins alone, say what I received, and the value of them at Canton at that time, is about $60,000. The copy of agreement, inventory, and extract of Shaw's letter, you will please return to me.

I am, sir, &c.

Hon. JOHN QUINCY ADAMS, *Secretary of State.* JOHN JACOB ASTOR.

Mr. Astor to Mr. Monroe, Secretary of State.

SIR: NEW YORK, *February*, 1813.

I take the liberty to call to your recollection the subject of which I spoke when I had the honor of waiting on you at Washington, and to enclose a copy of a letter which I received in November last, *via* Canada, as also copies of some notes passed between some of the agents whom I sent to Columbia river and Mr. Thompson, a partner of the Northwest Company of Canada. By these it will be seen that the Indians on that part of the continent are friendly, and it is understood that the climate is mild and the country good, and I am informed and believe that a great and valuable trade may be carried on there with more advantage by this than any other country. By the extract of a letter from the wintering partners of the Northwest Company to Mr. McGillivray, of Montreal, it will be seen that they are more or less apprehensive that the plan pursued by me will more or less endanger the valuable and extensive trade of that company, which, though of some consideration to this country, is,

in my opinion, of less consequence than the trade which may be carried on on the coast, and from thence to China, as also a considerable trade with the Russian settlements in that part of the world.

You will perceive, sir, that the people whom I sent out in a ship in the year 1810 have established themselves on the Columbia river, and have built a fort, which I understand is on a favorable situation, about ten or twelve miles from the mouth of the river. If all the men who were sent thither have arrived safe, (as I believe they have,) then there must be about one hundred and fifty, besides a number of natives from the Sandwich islands.

I know that the Northwest Company have communicated my undertaking to the British Government, and, under present circumstances, I think it more than probable that they will apply for some aid to defeat it. Whether they have, or will succeed in obtaining it, I know not.

I have, however, every reason to believe that if the Government do not aid them, they will make themselves an effort to that effect. Under other circumstances than the present, (I mean in time of peace,) I think I could have made a stand against that company; in the present, it becomes doubtful and hazardous, and, in case of an interference on the part of the British Government, impossible for an individual to hold possession of a country which may become a source a wealth and comfort to many. In this situation, it becomes very interesting to know somewhat of the views of Government relative to this object; and whether the United States have or will assert any claim to that or any part of that country; and whether the Government will deem it expedient to take possession and give protection to the infant establishment which has been made. I presume, if forty or fifty men were placed in the fort already established, or on some more eligible situation, (if such there be,) they could, with the aid of the men already there, repel any force which I think it likely the British would at this time send; and, in the mean time, means might be found to send some more men, and to strengthen ourselves. My plan was to have reconciled the Indians on the Missouri to our having a free communication up that river, which no doubt in a future day will be effected, whence we can send any force necessary to protect ourselves. But it appears necessary that some step should now be taken which will afford a more speedy aid, which can only be done by sending a vessel, &c. round Cape Horn. There are at this time about twelve or thirteen American vessels on that coast; many of them might seek and find protection in the Columbia river if we had even a small force there. I beg leave to say, that, at the commencement of my undertaking, it appeared to be necessary that some of the people sent to that country should be acquainted with the Indian trade; and, they being very scarce in the United States, I have been under the necessity of taking some from Canada, some Canadians, and some few Scotchmen. Although they have all become citizens of the United States, I am more or less apprehensive that these, in time of war, may join any force sent by the Northwest Company or the British Government; and the more so if there should be no appearance of any protection from this country. The number of these is, however, small; and the principal agent is a Mr. Hunt, of Trenton, a real American, and a gentleman of integrity, honor, and talents. I believe, at present, there is no post or establishment on the Columbia river but the one here spoken of, though I am pretty sure the Northwest Company will endeavor to fix one, as I have just received a letter dated 19th November, in London, which says the Northwest Company are fitting the ship Isaac Todd, of about five hundred tons, to go to the northwest coast. The writer does not say under what circumstances the ship goes; but that she will go to Columbia river, there can be no doubt. I pray you, sir, to have the goodness to bring this subject under the consideration of the President, and, if permitted, I would ask the favor of being informed of the result; which is the more desirable, as I expect very shortly an opportunity of sending a messenger to that quarter of the world. I am sure the Government will readily see the importance of having possession and the command of a river so important and extensive as the Columbia, the fountain of which cannot be far distant from that of the river Missouri.

I have the honor to be, respectfully, your obedient servant,

JOHN JACOB ASTOR.

To the Hon. JAMES MONROE, *Secretary of State.*

UNITED STATES OF AMERICA, *City of New York, ss.*

Be it known that, on the day of the date hereof, before me, John G. Bogert, a public notary in and for the State of New York, duly admitted and sworn, dwelling in the city of New York, personally came Wilson P. Hunt, who, being by me duly sworn, did declare and say, that the annexed agreement, inventories, and account current, [are those] by which the property of the late Pacific Fur Company was transferred to the Northwest Company of Canada; which agreement said Hunt had not in his power to reject, as the property had been some months in the possession of said Northwest Company when said Hunt returned to Astoria, the 28th February, 1814.

That, in explanation of the first article of said agreement, he declares nothing more to have been intended or understood by the word "establishment," than the dwelling-houses and stores (and not right of soil) erected by the Pacific Fur Company at Astoria, as is fully shown by reference to the fourth article of said agreement, and to the tenth page of said inventory; in each of which the item of "buildings" comprehends all the property of that description paid for by the Northwest Company. And he further declares, that he never gave or conveyed to any person whatever any right or title to lands on the Columbia river and the northwest coast; nor has he any knowledge or suspicion of any member of the late Pacific Fur Company having transferred land to the Northwest Company; more particularly as no person was authorized so to do.

WILSON P. HUNT.

In testimony whereof, I have hereunto subscribed my name, and affixed my seal of office, the twelfth day [L. S.] of January, in the year of our Lord one thousand eight hundred and eighteen.

J. G. BOGERT, *Notary Public.*

The association heretofore carrying on the fur trade to the Columbia river and its dependencies, under the firm and denomination of the Pacific Fur Company, being dissolved on the 1st of July last, by Duncan McDougall, Donald McKenzie, David Stuart, and John Clarke, with the intention to abandon the trade in that quarter, it is hereby agreed, concluded, and settled upon, of their own free will and consent, by Duncan McDougall, acting for himself and in behalf of his associates, namely, Donald McKenzie, David Stuart, and John Clarke, on the one part, and John George McTavish and John Stuart, acting for themselves, and in behalf of the Northwest Company, on the other part, that the following agreement and settlement take place between them, and be binding and obligatory in the manner, and subject to the terms and agreements, hereinafter specified and contained: Now, therefore, it is hereby mutually agreed and concluded, by and between the said parties to these presents, and they do hereby mutually covenant and agree, to and with each other, in manner following, that is to say:

ARTICLE 1. The party of the former part hereby covenants and agrees to deliver, or cause to be delivered, the whole of their establishments, furs, and present stock on hand, on the Columbia and Thompson's rivers, as soon as

the necessary inventories can be taken, unto the said party of the latter part, or any other person or persons appointed by them to represent the Northwest Company, to receive the same at the prices and rates concluded and agreed upon as hereinafter specified in article fourth.

ART. 2. In consideration of article first being duly and faithfully performed by the party of the former part, they, the said John George McTavish and John Stuart, for themselves, and on behalf of the Northwest Company, do bind and oblige themselves and the said Northwest Company, or their agents, to pay, or cause to be paid, unto the said Duncan McDougall, acting for himself and in behalf of his associates, as before mentioned, his attorneys, assigns, or order, the amount of the sum or sums arising from the sale according to article first, and the rates hereinafter specified in article fourth, at three several instalments; the first one-third, on or before the twenty-fifth of October, one thousand eight hundred and fourteen; the second one-third, on or before the twenty-fifth of November; and the remaining one-third, on or before the twenty-fifth of December. And further: it is hereby understood, that, should the party of the former part find it convenient to leave the amount of the several drafts, after becoming payable as already specified, in the hands of the party of the latter part, or their agents, they, the said party of the latter part, or their agents, will allow interest at six per cent. until paid on demand; and as there are several moneys, the produce of their wages, due unto the people employed in the service of the late Pacific Fur Company, carrying on trade on the Columbia and Thompson's rivers, the said party of the latter part, namely, John George McTavish and John Stuart, acting for themselves and the Northwest Company, or their agents, do hereby bind and oblige themselves to pay, or cause to be paid, unto the several individuals employed by the party of the former part, the amount of the balances due them, according to the statement that shall be delivered by the said Duncan McDougall, acting for himself and his associates, as before mentioned, within one month after their arrival at Montreal, in the province of Lower Canada; the amount of which several sums so paid is to be considered as part of, and deducted from, the first instalment to be paid unto the said Duncan McDougall, acting for himself and his associates as before mentioned, his attorneys, assigns, or order, on or before the twenty-fifth of October, one thousand eight hundred and fourteen.

ART. 3. And further: The said John George McTavish and John Stuart, acting for themselves and the Northwest Company, will be at liberty to make a selection, and take into their service such of the people in the employment of the party of the former part, as they may think proper; in consideration of which, the said party of the latter part bind and oblige themselves to pay, or cause to be paid, unto the said party of the former part, the several sums due them, by such as may enter into the service of the party of the latter part; and the said party of the latter part further bind and oblige themselves to provide and insure a safe passage to the said party of the former part, and the remaining part that will not be taken into their service, to their respective homes.

ART. 4. And further: It is hereby agreed and concluded upon by the said parties, that the following are the rates at which the establishments, furs, and stock on hand, be valued at, as follows:

Dry goods, stationary, gunpowder, and leaf tobacco, fifty per cent. on the prime cost; ship chandlery, sixty per cent.; shot, ball, lead, iron, and steel, one hundred per cent.; deduction on made-up iron works at Columbia river, thirty-three and one-third per cent.; new boats, each ten pounds, Halifax currency; boats in use, each five pounds, Halifax currency; shallop, with rigging complete, one hundred and twelve pounds ten shillings; two blacksmith's forges, complete, twenty-five pounds; plug tobacco, one shilling and six pence per pound; plug tobacco manufactured at Columbia, one shilling and three pence per pound; beads, assorted, five shillings per pound; arms, cannon, &c. prime cost; provisions, at fixed prices; articles in use, half inventory prices; horses, thirty shillings each; buildings, two hundred pounds; John Reid's adventure, and Freeman's, in the vicinity of Snake country and Spanish river, to deduct one hundred per cent.; beaver furs, ten shillings per pound; beaver coating, eight shillings and four pence per pound; muskrats, seven pence half-penny each; land otters, two shillings and six pence each; sea otters, large, sixty shillings each.

And for the faithful performance of all and singular the said covenants and agreements to be by them, respectively, kept and performed, all and every of the parties to these presents bind themselves, separately and jointly, for their several associates, firmly by these presents.

In witness whereof, the parties to these presents have hereunto set their hands and seals, this sixteenth day of October, one thousand eight hundred and thirteen, at entrance of Columbia river, northwest coast of America.

DUN. McDOUGALL, [L. S.]
J. G. McTAVISH, [L. S.]
JOHN STUART. [L. S.]

Witnesses.—JOHN C. HALSEY, GABRIEL FRANCHERE, ALFRED SETON, WILLIAM WALLACE, ANGUS BETHUNE, JAMES McMELLAN, JOSEPH McGILLIVRAY.

In explanation of what is meant and intended by "inventory prices" for articles in use, and fixed prices for provisions, it was mutually understood by both parties, at the time, that the inventory prices of said articles in use should be fixed at half prime cost, and that no charges at all were to be made for provisions or stores of any description; and to prevent any difference that might, in future, arise on the subject, it is hereby mutually understood and agreed upon, by the parties present, that the inventory prices of said articles in use shall be fixed at half prime cost, and no charges at all be made for provisions: which explanation is to be considered equally valid and binding as if inserted or so explained in the body of the agreement itself.

DUN. McDOUGALL,
J. G. McTAVISH,
JOHN STUART.

Witnesses.—JOHN C. HALSEY, ANGUS BETHUNE.

It is hereby agreed, by and between the parties to these presents, that, in consideration of the arrival of W. P. Hunt, the aforementioned Duncan McDougall wishes to assign, and does hereby assign, to said W. P. Hunt, the part which the said Duncan McDougall held in acting for the party of the first part; and for the completion of the aforementioned agreement, the said W. P. Hunt holds himself equally bound with said Duncan McDougall: and further, to render the article regarding John Reid's adventure to the Snake country more explicit, it is hereby fully understood that fifty per cent. was meant, instead of one hundred per cent., expressed in the said aforementioned articles of agreement, to be deducted.

Signed this tenth day of March, one thousand eight hundred and fourteen.

DUNCAN McDOUGALL,
WILSON P. HUNT,
J. G. McTAVISH,
JOHN STUART.

Witnesses.—JOHN C. HALSEY, ANGUS BETHUNE.

E. E. WILSON P. HUNT, *in behalf of John Jacob Astor.*

March 12, 1814.

United States of America, *City of New York, ss.*

Be it known, that, on the day of the date hereof, before me, John G. Bogert, a public notary in and for the State of New York, duly admitted and sworn, dwelling in the city of New York, personally came John C. Halsey and Alfred Seton, who, being by me duly sworn, depose and say, that the letter hereto annexed is a true copy of a letter brought to Astoria by John G. McTavish, of the Northwest Company, and that they saw and read the same, and each became a witness to a copy thereof, which Duncan McDougall had recorded in a book of the Pacific Fur Company, for the purpose of justifying him in transferring the property of said company at Astoria to the Northwest Company of Canada, as appears by the subsequent transactions of said Duncan McDougall.

JOHN C. HALSEY,
ALFRED SETON.

In testimony whereof, I have hereunto subscribed my name, and affixed my seal of office, the twelfth day
[L. S.] of January, in the year of our Lord one thousand eight hundred and eighteen.

JOHN G. BOGERT.

Extract of a letter addressed to Mr. John G. McTavish, Columbia river, from A. Shaw, Agent for the Northwest Company, dated Montreal, May 9, 1813.

My Dear Sir: Astoria, Columbia River, *October* 9, 1813.

We are in hurry and confusion, preparing papers, &c. for the express canoe, having waited impatiently for some time. It was at last determined upon to send it off, without having received the least knowledge of what has been doing in England since December last; but, fortunately, the arrival of a frigate brought us accounts of the Isaac Todd, having on board Messrs. McTavish and McDonald, being ready for sea on the 18th of March. She is accompanied by a frigate to take and destroy every thing that is American on the northwest coast.

17th Congress.] No. 537. [2d Session.

OFFICIAL CONDUCT OF THE DISTRICT JUDGE OF ALABAMA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 28, 1823.

Mr. JOHNSTON, of Louisiana, made the following report:

The Committee on the Judiciary, to whom were referred the letter and documents of Edwin Lewis, containing charges against the official conduct of Judge Tait, a district judge of the United States for the State of Alabama, have had the same under consideration, and report:

That, as far as it is their duty to inquire, they find no irregular or illegal proceedings; and that they do not form any ground of accusation before this House.

The two first and principal charges upon which the petitioner relies in sustaining his application consist in—

1st. Refusing to permit Edwin Lewis to practice in his court as an attorney at law.

2dly. In using insulting language and gestures on the bench towards said Lewis, on his offering to qualify.

It appears that the petitioner did not present himself before the court in the usual form, with the evidence of his qualification and the testimonials of his character; but, unceremoniously, offered himself to the clerk, who was in the act of administering the oath, without any authorization, or even notification to the judge. This departure from ordinary usage, and this want of respectful attention, was construed, perhaps, into an act of rudeness, and might have been repressed with language deemed offensive. But, with regard to the second charge, it does not appear by the petition what language was used or gestures employed; nor is there any evidence of the fact; and there is, moreover, the negative to be inferred from the certificate of the clerk, in his silence on this point. It appears that the judge refused to allow him to qualify, stating *that he had that within his own breast which would exclude him;* and this constitutes the injury of which he complains.

The district judge makes all rules for the government of the court, which include regulations for the admission of attorneys and counsellors to the bar. These rules become the law of the court, and are administered, as all other laws, on the integrity and sound legal discretion of the judge. Admission to the bar is not a natural right, but a right to be acquired, under the rules and usages of the courts. These require the party to claim his right upon showing legal and moral qualifications to the satisfaction of the court; and, upon this showing, it is the duty of the judge to exercise his best judgment, conscientiously, but freely. The dignity of the tribunals, the purity of the bar, the rights of the people, and the transaction of business, require this to be done firmly and fearlessly—responsible only to the country for the integrity of his mind, not the errors of his judgment.

In this case, it is alleged that the judge has evidence within his own breast which ought to exclude him. If this *fact* be true, it is clear he should be rejected; that is, if a fact exists which would render him unfit and unworthy, he ought not to be admitted. The culpability of the judge must therefore depend upon the *falsity* of the statement; that falsity cannot, from its nature, be proven or inferred. There is not, in this case, any evidence of ill-will, hatred, prejudice, or passion, or any allegation of impure motive, which is not derived from this event. He has performed this duty, as all others, before the bar, who want neither independence nor professional sympathy; and in the presence of the people, who would frown indignantly upon an act of injustice or oppression. To these must be added the presumptions arising from professional character, official dignity, and religious sanctions.

The judge, moreover, in these personal cases, takes upon himself an undue responsibility; he encounters public opinion; he exposes himself to the wicked aspersion and bitter persecution of every disappointed and unworthy candidate. The fear of denunciation and the dread of public scrutiny (of which this case furnishes an example) are no small inducements to relax the rules, and shrink from the danger. It would require proof of some strong and violent cause to prevail over the mind to violate truth, duty, and conscience. We see no reason to impeach the purity of the motive, or doubt the truth of the fact. The personal knowledge of the judge is the highest evidence to him; and, having that evidence, he would have betrayed his sacred trust to have admitted him to the bar.

We are of opinion that the law has imposed on the courts the necessity of exercising a legal and salutary discretion, and that they must be relied on to perform it faithfully. We do not admit that the judge may exclude by his arbitrary will and his mere volition; he must exclude under the rules and the evidence before him. When, in the discharge of his duty, he alleges a fact to exist sufficient to disqualify, he does this under the oath of office, and must be believed. It would imply an absurdity to give him power to admit upon satisfactory evidence, and not the right to exclude upon his own personal knowledge. We are not satisfied with the propriety of locking up this secret and personal knowledge in the breast of the judge. If required, it was due to the party to state the fact, and the evidence on which it rested. But, in this case, it does not appear that he was requested to disclose the grounds of his objection; and his not having done so may have arisen from motives of delicacy to the party.

This is a novel case, and such as may not again occur. The law invests the courts with the power of admission, rejection, and dismission of attorneys; and, even when the qualifications are prescribed by *law*, they are invested with the power to decide on those qualifications. The right to admit, implies the right to reject; and the power of dismission is a much larger exercise of authority, more dangerous to the liberty of the citizen, but indispensable to preserve the purity of the bar. The exercise of this jurisdiction, in all the States, for a great number of years, has fully tested the principle. Instances of injustice or oppression have been rare; and, it is believed, the responsibility under which it is exercised has had a contrary tendency—to relax the rule, and to lower the standard of morals and merit in the bar. In this case, we cannot deny the judge the power of admission; we cannot impeach his integrity; we cannot say he has done wrong. The judiciary is a co-ordinate branch of the Government, acting under the same obligations, and amenable to us only for corruption, misfeasance, and mal-practice. We do not find either in this case. It is true that such a pretence might be seized on by an artful and wicked judge, for the purpose of oppression; but it is not to be believed without evidence. It may become an inquiry, how far an important right and a lucrative profession should be left to the will or the discretion of any individual, or how far it is proper to expose the judges to a duty so personal and delicate, and to a liability so serious?

The petitioner has gone into extensive details of judicial conduct; and his other charges relate to orders, decrees, and judgments rendered in court.

Your committee have not inquired into the regularity or legality of the proceedings. We are not the tribunal of appeal. We have no means of making the inquiry, if we had been competent. There is nothing to show that there is even error in them; and upon the face of the charges and the records there is no apparent irregularity, or

suspicion of corruption. The various questions with regard to jurisdiction, ownership, capture, condemnation, and possession, will, in due time, be brought before the Supreme Court, the only competent authority to decide those questions.

The principal charge relates to the capture of eighty-four slaves, in which two different captors, and the owners of the property, are contending. The court has rendered judgment; an appeal has been taken, and will, in due time, be tried. The parties know their rights, and will pursue their remedies in the usual way. It is stated that the State of Alabama interposed her right to the possession of the slaves, under the laws of that State, pending the trial of the cause, and that the judge refused to deliver them up. Your committee have no knowledge of the law under which the possession was claimed, nor of the rights of the State, nor of the ground of refusal. There is a legal remedy, we presume, for cases of this kind. But, if an application to this House could be proper, it would come with great propriety from the Governor or representatives of that State.

Your committee, therefore, recommend the adoption of the following resolution:

Resolved, That Edwin Lewis have leave to withdraw his letter and documents.

17th CONGRESS.] No. 538. [2d SESSION.

OFFICIAL CONDUCT OF THE PRINTERS TO THE HOUSE OF REPRESENTATIVES—SUPPRESSION OF DOCUMENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 30 AND FEBRUARY 27, 1823.

Mr. DWIGHT made the following report:

The committee appointed in pursuance of a resolution of the House of Representatives, adopted on the 21st of January, to investigate certain charges referred to in the letter of Messrs. Gales & Seaton, have attended to that service, and ask leave to report:

That they have given to the subject all that consideration which the magnitude of the charge and the reputation of those who have long been in the service of this House, and hitherto high in its confidence, seemed to require.

That, while your committee have been impressed with the importance of the charge to the reputation of the accused, they have not been unmindful that it involved, also, a gross violation of the rules of this House, and a contempt of its authority and dignity. Nor have your committee omitted to notice that the charge against Messrs. Gales & Seaton is enhanced in importance, by imputing to them the criminal design of shielding, by the alleged omission, an important Department of the Government from a "just responsibility."

To the investigation of such a subject, involving at once the confidence which this House and the nation shall repose in the information upon which it acts—the character of one of the first officers of the Government, and the fidelity of the public printers—your committee have not proceeded without the most cautious inspection of the documents submitted to them, and the most solemn sanction to the testimony of the witnesses, upon which their opinion was to be founded.

The evidence taken in the case has been preserved, and is submitted entire at the conclusion of the report.

The charge against Messrs. Gales & Seaton, in regard to which they prayed this investigation, was contained in a communication printed in the Washington Republican of the 20th of January instant, over the signature A. B., and was, in substance, as follows: (See document marked A, and the paper annexed;) that, in printing the documents accompanying the report of the Secretary of the Treasury of the 14th of February, 1822, in answer to a resolution of the House of Representatives, calling upon him to exhibit a statement of his transactions with all those banks which had been made by him the depositories of public moneys received from the sales of public lands, they had suppressed and totally omitted, in the printed document with which they furnished the House, parts of these documents implicating Mr. Crawford the most strongly.

The attention of your committee was first directed to an examination of all the original documents which accompanied the report of the Secretary above alluded to; and they find the following paragraphs, in the originals, entirely omitted in the printed documents which were furnished the House, to wit:

In a letter from William R. Dickinson, cashier of the Steubenville Bank, to the Hon. William H. Crawford, dated April 3, 1819, and referred to in the original documents by the pencil mark A 5, the following paragraph is omitted:

"The difference of which you speak in your letter of the 12th ultimo, between the sum mentioned in my letter of the 13th of February, arises from the circumstance of your having extended your friendly disposition to this bank beyond *what was dared by our board to ask*. I mentioned only the debt to the branch at Pittsburg, whereas you have directed (as well as that mentioned) a transfer from the branch at Chilicothe, which debt this branch was taking measures to discharge. As soon as the transfer is made from the Bank of Columbia, the entries shall be made on the books of this institution, as you direct. I remark, however, in the statement which you furnish from the Bank of Columbia, that 'notes, $3,895,' is entered, which I know nothing of, having never before heard of it." The above extract, in the original, is included between lead pencil brackets; the whole is crossed with a pencil; and the words "what was dared by our board to ask," are underscored by an ink line.

In a letter from John Sering, cashier of the Farmers and Mechanics' Bank of Indiana, dated Madison, August 24, 1820, to the Secretary of the Treasury, the following paragraph is included between pencil brackets, crossed by a pencil mark, and omitted in the printing.

This letter is referred to in the original documents, by a pencil mark in the margin, as F 6: "I would, however, inquire if the Mechanics' Bank of Alexandria, as well as the Franklin and Merchants' Bank, ought not to be excepted." The words *Mechanics' Bank of Alexandria* are underscored by an ink line, and the word *out* written in pencil, in the margin, against the above extract.

In a letter referred to in the original documents by the pencil mark I 6, from Aug. Chouteau, president of the Bank of Missouri, dated Saint Louis, August 9, 1819, to the Secretary of the Treasury, the following words

are crossed by a pencil mark, the word *out* written in pencil against them in the margin, and omitted in the printed documents:

"It is known to us that the same money which has been received in payment by the receiver at this place is not identically presented for deposite at this bank."

In a letter referred to in the original documents as L 5, from Leroy Pope, president of the Planters and Merchants' Bank of Huntsville, dated 4th May, 1819, to the Secretary of the Treasury, the following paragraphs, included in pencil brackets, and crossed by a pencil, are omitted in the printed documents:

"Your conjecture in relation to your circular of the 11th July last is correct: the important words, 'subsequent to the 30th June last,' are not contained in the copy received by us; and this circumstance satisfactorily accounts for the construction it received from the board of directors. We regret that any mistake should have occurred, but we rejoice that our decision is thus acknowledged to have been proper. Agreeably to your request, I return the copy heretofore received, and under which we have necessarily acted, and retain the correct copy accompanying your last letter."

In letter M 5 of the original documents, from Israel Pickens, president of the Bank of Tombigbee, to the Secretary of the Treasury, dated St. Stephen's, August 13, 1819, two pages are sealed over with white paper, and omitted in the printed documents.

In regard to those parts of the letters L 5, F 6, and I 6, above extracted, and omitted in the printed documents, the committee are satisfied that they were thus marked by Mr. Dickens, one of the chief clerks in the Department of the Treasury, for the purpose of calling the attention of the Secretary of the Treasury to them, as containing information irrelevant to the subject-matter of the call, and improper, in his opinion, to be communicated to the public, on account of disclosures they made, or opinions they expressed, which might be injurious to the affairs of the banks or individuals to whom they alluded; and that the word *out*, in the margin of each of those three letters, was made by him as a guide to the compositor to omit them in the printing.

In reference to the matter concealed in the letter M 5, by the white paper sealed over it, they feel themselves constrained to say, that it had no bearing upon the objects of the call for information, and might have been injurious to the interests of the individuals or the banks mentioned in it, had it been published at that time. They are satisfied, also, that such were the motives which induced Mr. Dickens, the clerk, to cover the pages with paper, which he disclosed was done by him.

The committee submit that they have been thus enabled to suggest satisfactorily to the House the causes which have produced the omission in the printing of all the documents, except that of A 5, which they suppose to be the particular document referred to in the communication signed A. B.; and in regard to which, after an examination of all the witnesses who were considered to be important to the investigation, and pushing the inquiries to the extent of the supposed powers of the committee, they are now obliged to confess (and they do it with regret) that they have obtained no satisfactory information.

Had the same causes existed for the suppression of this particular paragraph which actuated the clerk in the Treasury Department to mark all the others, your committee would feel no hesitation in presenting to the House the strong probability that it might have been done by that gentleman; but a recurrence to his testimony, communicated herewith, and marked E, will satisfy the House that that probability is too much weakened to be made the ground-work of the opinion of a committee of investigation.

But whatever difficulties the committee may have encountered in ascertaining by whom the marks were made, and the paragraph suppressed, they have none in stating that the accused did not cause it. And they cannot do justice to the unanimous opinion which they have formed, from a careful consideration of all the evidence before them, without stating their strong conviction that neither Mr. Gales nor Mr. Seaton had any knowledge of, nor participation in, the suppression of the paragraph omitted in the letter marked A 5, or any other of the documents which were submitted to the House in answer to the call so often alluded to. In support of their opinion upon this part of the case, your committee would refer the House to the annexed testimony of George M. Grouard, marked B; of William Kerr, jun., marked C; of Mr. Burch, deputy clerk of the House, marked D; of Asbury Dickens, marked E; and of the Hon. William H. Crawford, marked F.

In regard to the other individual implicated in the communication attached to the letter of Messrs. Gales & Seaton, your committee do not hesitate to say that there has not been any evidence submitted to them tending, in the slightest degree, to show that the suppression of the paragraph alluded to was caused either by the influence of the Secretary of the Treasury, or was done with his knowledge.

The interesting nature of the present inquiry has suggested to your committee the propriety of submitting to the House the expediency of appointing some member or members of its own body, in every case, to superintend the publication of all documents which may hereafter be printed by order of the House.

In conclusion, your committee would beg leave to submit the following resolution, to wit:

Resolved, That the committee appointed upon the letter of Messrs. Gales & Seaton be discharged from the further consideration of the subject referred to them.

A.

SIR: WASHINGTON, *January* 21, 1823.

In the Washington Republican of last evening is an article, a copy of which we have the honor to annex hereto, impeaching the honesty of our conduct as printers to the House of Representatives.

We are glad to meet this charge in a tangible form, unfounded as it is. Always holding ourselves amenable to the authority of the House for the faithful discharge of our official functions, we ask of the House that it will do us the justice to institute a committee to inquire into the correctness of our conduct, herein impeached, with power to send for persons and papers, and report the result of its investigation to the honorable body over which you preside.

With the highest respect, we have the honor to be your most obedient servants,

GALES & SEATON.

Hon. P. P. BARBOUR, *Speaker, &c.*

The following communication we are induced to insert in our paper, not from any feeling of hostility to the respectable gentlemen to whom it is addressed—a feeling we are incapable of cherishing towards them—but because we think it *due to them* to afford them an opportunity of doing away with an impression which has been made on the minds of some members of the House, and which, if suffered to remain, may be disadvantageous to their reputation.

Messrs. Gales and Seaton:

GENTLEMEN: Influenced by the charitable principle of considering every man innocent until his guilt is proved, and knowing that presumptions, even the most violent, are not always to be relied on, it is the object of this address, which shall be short, to elicit from you explanations that are indispensably necessary to acquit yourselves of suspicions highly injurious to you, that have existed for nearly twelve months past.

It will be recollected that, at the last session of Congress, the House of Representatives adopted a resolution calling upon Mr. Crawford to exhibit a statement of his transactions with all those banks which had been made by him the depositories of public moneys received from the sale of public lands. In conformity to which resolution, he made his report on the 14th of February, 1822, and accompanied it with numerous corroborating and explanatory documents, all of which the House ordered to be printed. You were the public printers to whom these documents were delivered, and it was your duty to have printed them correctly; yet it is a fact, incontrovertible, that parts of those documents, *implicating Mr. Crawford the most strongly*, were suppressed and totally omitted in the printed document with which you furnished the House, *professedly* in obedience to its orders. Of this fact any gentleman may be fully satisfied who will take the trouble to compare the printed document with the one transmitted to the House by Mr. Crawford, and which is now in the possession of the clerk. The latter also affords intrinsic evidence that the omissions were not accidental, for they are enclosed in black-lead pencil brackets, which would seem to have been intended as a guide to your compositor.

Strong as are the implications which those facts seem to warrant, and decided as your partiality for Mr. Crawford has been, I will not indulge the belief (at least until you have had an opportunity of explaining) that you could have reconciled it to yourselves to have sheltered him from a just responsibility, by so great a violation of the confidence reposed in you, and such a flagrant contempt of the legitimate authority of the House of Representatives, that no member thereof, however infatuated by party zeal, who feels the slightest respect for the dignity of his station, could, without dishonor, regard with indifference.

A. B.

B.

George M. Grouard's deposition.

I am foreman for Gales & Seaton, and have been for eight years past. I receive the documents, generally, through the messengers of the House: it is very rare that I receive any from Gales & Seaton. As soon as received, I number and enter them in a check book, and put them under lock and key, where they remain till they are placed in the hands of the compositors. I am persuaded no person had an inspection of these documents but myself. I noticed there were several erasures in these documents when I received them. It is my invariable practice to omit all the paragraphs erased, marked, or crossed. The marks and brackets alluded to were not made in the office. The paging was made at the office, as also the figures in the margin, to assist the compositor; and the word "*out*," in pencil, in the margin, was made, as I suppose, by my assistant, as an indication to the compositor to omit the paragraph against it. There was no reason for omitting the particular paragraph which did not apply to all the omissions. No hint was given to me to omit the paragraph, from any person.

I never knew Messrs. Gales & Seaton to insert a word, or leave out a word, or wish me to insert any word, or omit any word, which was ordered to be printed or omitted. If original documents are sent to the Clerk of the House by the Departments, they are sent to the office without being copied. The different Departments have no particular mode of indicating what they wish to have omitted.

I do not recollect that any of the other Departments have ever sent original papers with white paper pasted on any paragraph. I never read any of the passages erased in this case.

I feel myself bound by the direction of any proper officer of the House as to the mode of printing.

I have an indistinct recollection that there was some direction in the margin to omit the passages stricken out, or marked; but that would have had no additional weight with me.

C.

William Kerr, jun.'s deposition.

William Kerr, jun. testifies that he is an assistant in the office of Gales & Seaton; that certain marks, made with a pencil, in a document from the Treasury Department, containing information in relation to the banks in which the moneys received from the sales of public lands have been deposited, were not made by him, neither was the word "out," accompanying those marks, written by him; the papers were received at the office as now marked with a pencil, with the exception of the paging, which was done at the office; and, in one instance, where the conclusion of a letter had been omitted by the compositor, the part that had been omitted is included in a circle, and the word "out," in large characters, was written by me. It is my practice, when a compositor has omitted any matter, to mark the part omitted in this manner, and send it back to him for insertion; and the part thus marked, above referred to, will be found in the printed document. If any part of the copy sent to the office to be printed is crossed with a pen or pencil, as in the above document, I should understand such cross to mean that that part was not to be printed; and it is an invariable rule to omit all passages thus marked. Neither Mr. Gales nor Mr. Seaton gave directions to omit these passages, nor, to my knowledge, did they ever know that said passages were omitted. We considered it a thing of course; and, therefore, they were not consulted on the subject. All copy sent down from either House of Congress is put into the hands of Mr. Grouard, the foreman, or into mine; and, if not immediately put into the hands of the compositor, is placed under lock and key. Messrs. Gales & Seaton never concern themselves about the copy, further than to hasten the publication of some particular document, when it has been intimated to them at the House that it is in a hurry. They trust altogether to their foreman.

It is my impression that, during the last session of Congress, a document was received from the Treasury Department, through the House of Representatives, accompanying which was a direction to omit some part of it; and, as several erasures were made in *this* particular document, I am of opinion *that this was the one*. I cannot, however, speak *positively* on this point. I think the instructions were written with a pencil on the margin. We sometimes receive instructions, relative to the printing, from the officers of the respective Houses, but these instructions are written notes. I should, however, have considered it my duty to obey the instructions of Mr. Dickens, or any clerk having authority to give them in any Department of the Government from which documents might be received for publication. It is not in my power to single out either Mr. Dickens or any individual from whom said instructions might have been received; but, without particular instructions on the subject, the marks made with a pencil were sufficiently imperative. Any instructions received would necessarily have passed through the hands of Mr. Grouard before coming into mine. Original documents are sometimes sent from the Departments to Congress, when they have not time to prepare copies.

I have never had any conversation with Mr. Gales or Mr. Seaton on the subject of these papers.

D.

Testimony of Mr. Burch, deputy clerk of the House of Representatives.

Mr. Berry, of the clerk's office, informed me that he was directed by Mr. Cook to make him a copy of the letter marked A 5, and asked me whether he should put in the copy the paragraph enclosed in brackets and crossed with a pencil-mark, informing me, at the same time, that Mr. Cook wished the copy certified. I told him to make an exact copy. I think this was since the 1st of January.

I took the copy and marked it with a pencil, exactly after the manner of the original. The certificate stated the original to be marked with brackets and pencil. I delivered the copy to Mr. Cook.

I have seen papers, repeatedly, within the last twenty years, transmitted to the House of Representatives, which were marked in various ways. I will not undertake to particularize them at this time, or to state from what Department; but I believe it has not been confined to any particular Department. I will, however, mention the Department of State more particularly. I remember that, in some instances, requests came from the Executive Departments that certain papers transmitted to the House might not be printed, more particularly during the late war; as, in all cases of publication, the papers never failed to find their way to the enemy, and he thereby became too intimately acquainted with our concerns and situation.

I consider the several marks shown me to be a peremptory order to the printer to leave them out of the printed copy.

I frequently give instructions as to the printing bills, and as to documents; but the instructions never go beyond the order of the House. When the House orders the printing of a document generally, we never undertake to order a part to be suppressed. When the House orders parts of papers to be printed, the papers to be excepted are either taken out and retained in the office, or are legibly marked and labelled "not to be printed."

When Messrs. Gales & Seaton first became printers, Mr. Seaton directed all documents which were to be printed to be sent to their foreman, and all instructions to be given him. The name of Mr. Grouard was given to us by Mr. Seaton as the person to whom we were to make communications upon the subject of printing. I have seldom, if ever, addressed directions or communications directly to Messrs. Gales & Seaton, upon the subject of printing.

I never knew the late clerk, Mr. Dougherty, to make any marks other than those which he was authorized and directed to do by the order of the House; nor do I believe he made those in question.

James Barron's testimony.

I am messenger in the office of the Clerk of the House of Representatives, and have been for several years past. When I am ordered to carry documents, I am ordered to deliver them to Mr. Grouard, if present; and if not, to lay them on his table.

E.

Mr. Dickens's deposition.

Asbury Dickens, clerk in the office of the Secretary of the Treasury, testified: That all the papers in relation to banks, and the deposites of money in said banks, are in my hands. The general practice is to transmit copies when papers are called for. When business presses, we are obliged to send the originals. When copies are made, they are made of the whole correspondence, unless there may be some things improper to be communicated. It is the general direction of the Secretary, when information is called for, to give every thing that relates to the subject.

The papers, after selection, are laid before the Secretary; and, in this case, he directed me to collect every thing in the office relating to the subject: they were selected, and submitted to his inspection. In this case, from the urgency of it, I took the originals and rough-draughts.

Those passages which seemed to have no reference to the subject of the call, I marked with a pencil.

I have no recollection of having marked the particular passage suspected; and did not recollect there was such a passage. I only marked three passages, and them I recollect from the subject.

1st. I 6. The three last lines but one on page 114 I marked as omitted. The reason for marking this was, that it did not, in my opinion, relate to the subject; and implicated one who had been a public officer.

2d. L 5. The four last lines in page 148 erased, and the five lines on the next page; I crossed them as not relating to the subject of the call; and they referred to another and distinct letter.

3d. Was in a letter from Farmers and Mechanics' Bank of Indiana to the Secretary.

F 6. I marked to be left out the three last lines, as implicating the credit of two banks, and as not relating to the subject of the call.

M 5. The papers pasted over a part of the letter were not with a view to suppress the information; but, as it had no relation to the subject of the resolution, and was in relation to a quarrel between the Bank of Tombigbee and the Branch Bank of the United States at Savannah, I thought it not proper to be communicated.

I now recollect the above passages, because I then thought, and still think, the information ought not to have been communicated, and would be injurious to the parties if published.

I have no recollection of the letter A 5, and should not have made the marks to exclude the information, because I did not think it ought to have been concealed.

I see no reason why it should be concealed. I made the mark of the word "out" in the margin of letters I 6, L 5, F 6.

The whole of these transactions I was acquainted with at the time. The papers originally passed through my hands.

The papers remained some time before the Secretary, while he was making the report, after I gave them to him, before he communicated them to the House.

The Steubenville Bank was solvent at the time of deposite. The Government has lost nothing by that bank; it now has deposites of public moneys, and is solvent.

I never knew any mark or erasures to be made by Mr. Crawford on papers to be communicated, after I had made such as I thought proper to make. After the report had been sent to the House, I recollected that I had omitted the reference to one of the documents which now appears in the report, and came to the House and found the report had been read, and applied to Mr. Burch for the report and documents. He went into the House, and said the report was not on the Clerk's table, and he supposed some member had taken it to read. He went into the House again, and said he could not find them. While I was waiting, Mr. Cook came, with the report in his

hand, and gave it to Mr. Burch, and asked for the documents. Mr. Burch handed to him a sealed packet, which was the same I had sealed at the Treasury. Mr. Cook broke the seals, and began to look over the papers, and said, "I suppose I may take them to my room." Mr. Burch assented, and Mr. Cook took them away. I then put in the reference (+) which now appears on the report.

FRIDAY MORNING, *January* 24.

Mr. Dickens re-examined.—The paper contained in A 8 was a confidential communication from the Bank of Steubenville of the state of the bank, which is made once a month by each bank, in which the private affairs were stated, and agreed by the Secretary to be confidential.

The handwriting on A 5, in red ink, is mine. I do not know when made, but I think it was made when the subsequent letter of May 1 was received, in relation to Brownville and Mount Pleasant banks.

This letter of the 1st of May is not communicated, as will be seen by the printed documents.

B 1.—The red ink is in my own handwriting, and was made at the time the correspondence was prepared for the House.

I made the brackets in F 6; and made the red ink brackets in B 1. I have not seen the papers, since they were communicated to the House, until yesterday, with the exception of seeing them in the presence of Mr. Burch and Mr. Cook. I never had any conversation with Messrs. Gales & Seaton, or any person in their employment, in reference to the suppression of parts of papers in the printing.

I think the Secretary would, if particularly requested, communicate these monthly statements of the banks to the House.

I cannot say that I did not make the marks upon the letter A 5, but I gave yesterday the reasons why I think I did not.

There never have been any documents transmitted from the Treasury which were marked as not to be printed before this time.

I should think the marks I made a sufficient direction to the compositor not to print the parts included between them. And I think that, if the Secretary should have been of opinion that what I had marked ought to be printed, he would have erased my marks.

The Secretary and myself had no particular consultation on the subject of these papers.

The paragraph in A 5 does relate to the subject more than many others, and, I think, ought to have been communicated, though unimportant.

SATURDAY MORNING, *January* 25.

Mr. Dickens repeats the impression that he did not mark the paragraph in A 5. It was not his intention to mark it, and he thinks he did not.

The word "*out*" was written by him upon all the three letters in his first evidence particularly mentioned.

When the correspondence with these banks was received, I filed away the whole of it.

I do remember having referred to A 5 after it was received, and before it was communicated, for the purpose of making the reference which now appears upon it in red ink.

Many documents remain, without being filed away in the office, for some time after they are received.

When the call was made, I looked over all the letters, filed and unfiled, relating to the subject.

Since the first call, I do not recollect having found any additional letters relating to this subject.

The documents communicated under the second call were not laid before the Secretary on the first call.

In the letter A 2, although there is a paper pasted over a part of the original *memorandum*, yet the letter was communicated as it was originally sent to the cashier of the Bank of Steubenville.

F.

Testimony of the Honorable William H. Crawford.

I made no marks of any kind upon these papers, and know of no practice in the office which has ever authorized the marking of parts of original letters, in order that they may not be printed. No such practice has prevailed, within my knowledge. I have no recollection that any marks were made upon these papers, but have an indistinct recollection that Mr. Dickens stated something to me in relation to the correspondence with the Bank of Missouri, which affected the receiver at that place. I gave no instructions to Mr. Dickens to mark any part of the papers; nor have I ever given him a general direction to mark any particular passages. There might have been marks and erasures in the documents submitted to me by Mr. Dickens, which escaped my notice, as my attention was more particularly directed to the contracts than the correspondence. In framing the report, my attention was not particularly attracted to the correspondence, as it contained nothing important for that purpose; the material facts being comprehended in the contracts and the statement furnished from the books kept by Mr. Dickens, which showed the amount deposited in those banks, and the sums paid by them. I have no recollection of the letter pasted over.

There is nothing in the paragraph suppressed which I should have wished to be withheld from the House. If I then knew that any part of the correspondence had been marked, I do not now recollect it. I never sanctioned the omission of any part of the correspondence. Mr. Dickens is not the chief clerk; Mr. Jones is the chief clerk, and calls for records or files of the office are generally referred to him, with directions to examine and collect all that are embraced by such calls; but, in this case, I think Mr. Dickens was the person to whom the reference was made.

I never had any communication, direct or indirect, with Gales & Seaton, as to the manner in which they discharged their official duty, in this or any other case.

It is usual, when resolutions require information which the records or files of the office afford, to send copies; but when there is a press of business, the originals are sometimes sent, as in the present case.

The difference in the sum mentioned by the cashier of the Bank of Steubenville, and that in my letter of the 12th March, 1819, may be explained by referring to the original draught of that letter, now in possession of the committee. Owing to some differences with the officers of the United States Branch Bank at Pittsburg, the cashier, in his letter of 13th February, 1819, requested that the sum of $24,568 51, then in the possession of the Branch Bank, might be considered as due directly to the Treasury, and that it might not be collected through that office. The original draught of the letter, in the possession of the committee, directs that sum to be credited to the Treasurer on the books of the bank. Just before the date of that letter, the whole of the special deposite had been transferred to the Bank of Columbia. When my letter was carried out to be copied, Mr. Dickens, who keeps the bank

accounts, came to me and stated that there was about $18,650 44 of the notes of the Bank of Steubenville in the possession of the Branch Bank at Chilicothe, and which had been also transferred to the Bank of Columbia, and proposed that the same direction should be given as to that sum; which I assented to, and directed my letter to be modified accordingly. The original letter, thus modified, was retained as a copy, and sent to the House with the report. This is the circumstance which produced the paragraph in the letter of the cashier, which was omitted in the printing of the letter, and which omission is now the subject of investigation.

G.

The testimony of Daniel P. Cook, of the House of Representatives.

When the report was sent to the House, I moved for its printing, and the whole of the documents. Mr. Taylor, of New York, moved a division of the question. The report itself was then ordered to be printed, and the motion to print the documents was laid upon the table. The documents were taken to the Clerk's office. I then went there, and found them yet sealed. In the presence of the Clerk and Mr. Dickens (who was waiting to make some correction, as I understood, in the report,) I broke the seal, and, finding the documents too numerous to read in any short time, I asked permission to take them away. It was granted, and I took them to my room, where I particularly examined those which referred to the Banks of Missouri and Vincennes. It was the abuses which I believed had taken place in relation to those banks that induced me to make the call.

I very slightly examined some other papers; some of them I did not look into at all. I brought the papers back to the House, either on Saturday or Monday, as I believe; and, after the report was printed and laid on the tables of the members, I moved to take up the motion to print the documents, which was agreed to, and they were ordered to be printed.

In the examination which I gave the papers before they were printed, I do not remember that I saw any marks on any of the papers, nor the paper pasted on one of the letters. That part of the correspondence, however, I feel quite sure I did not look into at all.

There was nothing in the information I had, which induced me to move the call, that led me to examine with any minuteness the affairs of the Steubenville Bank; but my impression is, that correspondence being in front of all others, that I did glance through it; and I think I read the letter A 5, but I have no recollection of seeing the pencil marks upon it at that time. The kind of examination I gave this part of the correspondence was such, however, that my attention might not have been fixed upon these marks; and this is the more probable, because I do not remember to have noticed the marks on the letter from the Bank of Missouri, which Mr. Dickens says was marked by him before the papers were sent to the House.

Messrs. Gales & Seaton had furnished me (I believe, at my request, though I am not certain,) with the different forms of the printing as they were struck off, and I read them as the printing went on. In reading that part which relates to the Bank of Vincennes, I was under an impression that a typographical error had been made in printing the amount of money in the Vincennes Bank. In order to ascertain whether it was so, I sent for the original documents; and, when passing through the documents to get to those relating to that bank, my attention was first called to the pencil marks on letter A 5. After satisfying myself on the subject of the supposed error, I then adverted to the printed letter A 5, and found that that part of the letter over which the pencil marks were made was omitted; which was before my second call. I feel very certain that I did not make those marks, nor do I know when, where, or by whom, they were made. The particular character of the omitted passage induced me, some short time after, when in conversation on the subject of these bank transactions, to speak of it; and I think I am not mistaken in saying that I spoke of it in that way to the honorable Hugh Nelson, a representative from Virginia, and to Mr. Moore of Alabama. I was not under the impression that the marks for omission were made by Gales & Seaton, and did not mention it to them; nor did I think the omission so important as to make any inquiry of the Secretary of the Treasury, or to make any motion or proposition in the House on the subject.

I was induced to make the second call, because the documents sent to the House, in answer to the first call, referred to several letters and documents which I thought ought to have been sent with them, but which were not; and because I believed that those letters would afford important light to show the motive of the connexion, in the manner in which it existed, between the Treasury Department and those banks. When the answer to the second call was sent to the House, I was induced, for similar reasons, to make a third call, by a resolution, which was adopted on the last day of the session, but which remains unanswered.

I obtained a copy of letter A 5 during the present session, for prudential reasons, with which the honorable Mr. Edwards, of Connecticut, is acquainted, and which he will state to the committee. The copy was obtained on the 9th of the present month. I handed this letter to a friend, a member of Congress, whose name I decline stating. The copy went into the hands of several members of Congress, who wished to see it, with my consent. It was first handed to one of the gentlemen, who suggested the propriety of getting other members to inspect the original, or of obtaining a certified copy with a *fac simile* of the pencil marks, and which was to guard against the possible loss of the letter, and the consequent possibility of the fact of the omission resting upon my statement only.

I did not communicate the copy of this letter to the editor of the Washington Republican; nor did I make any of the communications signed A. B. in the Washington Republican; nor had I any agency in writing, or publishing, or causing to be written, either of those communications, unless the procurement of the copy, and permitting it to go into other hands, had that effect.

I know from information who the author is, but it was communicated to me in confidence, and I therefore decline giving his name. I did not derive this information from the person who I understood made the communication, but from another person. I understand they are not made by the person to whom I handed the copy of the letter. I am informed the communications are made by a member of Congress. I disclaim all agency in causing those publications to be made, other than such as I have mentioned; nor did I procure the copy of the letter for the purpose of publication, nor did I hand it over for that purpose.

I had a conversation with Mr. Agg, who is reporting the proceedings of Congress for the Washington Republican. The conversation was introduced by himself, and was confined to the fact of the omission in the printed letter A 5. I told him there was such omission. The conversation took place in the House of Representatives, and after I had obtained the copy of the letter from the Clerk. Mr. Agg seemed to be apprized of the existence of the copy, but he had not been apprized of it by me. This is the only conversation we ever had on this subject, and I think I have substantially repeated the whole of it. My attention, in examining the documents previous to their being printed, was principally confined to the amount of money in the Banks of Missouri and Vincennes, and the nature of the arrangements between them and the Treasury Department.

H.

Deposition of Mr. Edwards, of the committee.

Mr. Edwards, of the committee, states, that he was present when Mr. Cook made the statement that this paragraph was omitted, and deemed to be important.

He had seen the letter, and examined it; said it was marked so as to be omitted in the printing. Mr. Cook was then advised to get a certified copy, or get some members to examine it with him. Mr. Cook wished me to go with him. I intended to do so, but did not. Shortly after, Mr. Cook told me he had got a copy of the letter. I think this was the —— January. The advice to Mr. Cook was, that he should get the copy to be able to justify himself.

I.

Roger C. Weightman's deposition.

I was for several (six or eight) years printer to Congress; and it was a common thing, from both Houses, to have original documents, parts of which were marked in the way in which several of these documents are; and had they been sent to me in the state this particular document is, I should, without hesitation, have omitted the paragraph. I should also have omitted other parts as they are marked, and those pasted over.

In such an office as Messrs. Gales & Seaton's, it is impossible for the editors to inspect the printing the documents: they must be confided to the foreman.

J.

Colonel Moore's (of the House of Representatives) deposition.

When the subject of the suppressed paragraph was mentioned to me at this session, I then had an impression that it had been mentioned to me at the last. I cannot distinctly recollect having any particular conversation with Mr. Cook at the last session; but it is my impression that the intimation was made to me at the last session by Mr. Cook.

The suggestion was, at this session, that the omission had been made by Gales & Seaton, through the influence of the Treasury Department.

I had a right to suppose the intimation was made confidentially, though not expressly so told.

I do not feel authorized to name the person. He stated, at the same time, that the fact would be made known where the censure properly lay.

K.

Deposition of Matthew St. Clair Clarke, Clerk of the House of Representatives.

My attention was first called to the letter when the subject was first broached to the House. That was the day when the committee was appointed.

A few days after the session, I was called upon to certify the copy of a letter which I now find to be A 5. I was not applied to for it. Mr. Burch brought it to the desk, and I then certified it. Mr. Burch said, in reference to the copy, that the original was marked in the manner which the copy indicated.

FEBRUARY 27, 1823.

Mr. CAMPBELL, of Ohio, from the select committee appointed on the 6th instant, *further* to investigate the subject of documents suppressed in printing, made a report thereon as follows:

Thus far the attention of the committee has been chiefly directed to the performance of the duties required of them by the first member of the resolution. As the investigation was undertaken without any sanguine expectations of being able to designate the person who caused the suppression of the paragraph in letter A 5, they feel but little disappointed in not having made the discovery.

The committee requested the appearance of every person who, it was supposed, could make any disclosure tending in the least degree to the accomplishment of the object for which they were appointed. The attendance of the witnesses was prompt, and all the depositions were made under the solemnities of an oath. That the testimony might be as explicit and intelligible as possible, interrogatories deemed the most pertinent were propounded to the witnesses, and the responses reduced to writing, in the language in which they were given.

The committee submit the following as the substance of the testimony which has been collected, in addition to that already reported to the House:

Mr. Cook, the member from the State of Illinois, deposes: That the documents, of which letter A 5 is one, were in his possession two or three days; that he believes no person, during that period, had access to them in his absence; that Mr. Edwards, a Senator from the State of Illinois, inspected them in his presence, but whether the inspection extended to letter A 5 he is unable to say; that he is impressed with the belief that Mr. Van Swearingen, late a representative from Virginia, was present; but thinks he did not examine the documents. Mr. Cook states it to be his impression that he read the letter A 5 before the documents were printed; that he has no recollection of seeing the brackets, cross, and underscoring, at that time, nor does he yet know by whom, when, or where they were made; that he did not know, until the pendency of the former investigation, that the practice, in the office of the Intelligencer, was to omit printing those paragraphs which are included in brackets and crossed; that the documents were in his drawer, in the House of Representatives, about a day before he moved to have them printed; and that he very rarely kept the drawer locked. (See A.)

Mr. Edwards, a Senator from the State of Illinois, deposes: That, some time last winter, the manuscript documents, of which A 5 is one, were, at his request, brought to his room by Mr. Cook; that he inspected those minutely which had a relation to the bank at Edwardsville; that, having no motive to examine the correspondence between the Treasury Department and the Bank of Steubenville, he did not see letter A 5, nor did he ever see it until it was shown to him by the committee; that he knows not by whom, or when, the marks it now bears were

made; that, some time last winter, Mr. Cook intimated to him that there were such expressions in the documents as are contained in the suppressed paragraph. (See B.)

Mr. Dickens, a clerk in the Treasury Department, deposes: That he had no intercourse with the printers, for the purpose of seeing or in anywise altering the documents, during their publication. (See C.)

It having been intimated that the underscoring was made with ink different from that used in the Clerk's office, the committee requested the attendance of Mr. S. Burch, chief clerk in the House of Representatives. He states that age increases the darkness of the ink used in the office, whilst that which is furnished Congress, having been in use some time, fades, and assumes a rusty appearance, such as is exhibited in the underscoring of the suppressed paragraph. He states that the underscoring is, in his opinion, made with ink of a character unlike that with which the body of the letter is written. (See D.)

William R. Dickinson, Esq., in a letter to Mr. Dickens, of the 10th instant, states, that he had examined the letter book which contains A 5, and also conversed with the clerk of the bank on the subject, and that both are of opinion that no part of the letter was underscored or marked when it left the bank.

The committee cannot conclude this report without an expression of their conviction, founded as well on the character of the transaction to which the suppressed paragraph refers, as the circumstances under which it has been communicated to the House, that there does not exist the semblance of a reason for charging upon the Secretary of the Treasury any agency in its suppression, or for connecting him in any way with the mutilation of this document. The transfer from the Bank of Chilicothe to the Bank of Columbia, and thence to the Bank of Steubenville, of the sum of $18,000, which was held by the former institution as a special deposite, was an ordinary banking operation, weakening in no degree the security of the Government, and which has eventuated in no loss to the Treasury. There could have existed with the Secretary of the Treasury, therefore, no motive for this suppression. He had no end to attain, no purpose to subserve, by the practice upon the House of a fraud, alike insulting to its dignity, and discreditable to the agent who should hazard its perpetration. The circumstance that the Secretary of the Treasury, in responding to the call of the House, communicated the *original letter* of which the suppressed paragraph is a part, is decisive, in the judgment of the committee, to negative the idea, if ever indulged, that there could have been entertained by that high officer any intention to keep out of view any part of its *contents*, particularly as it is usual, in answer to calls from the House, to communicate the copies of documents rather than the originals, which have been transmitted in this case.

The committee, after a careful examination of the pencil brackets and marks upon A 5, and a close comparison of them with the marks upon other letters communicated to the House, acknowledged by Mr. Dickens to have been made by him, are unable to form any opinion of the probable authorship of this suppression. There is nothing in the marks themselves to indicate it, nor in the correspondence of the marks upon the one letter with those upon any other, to show that they are the work of the same hand. In reference to the underscoring of part of the suppressed paragraph of A 5, the committee have taken some testimony, which they beg leave to submit to the House, with the remark, that neither the testimony of Mr. Burch, nor any other testimony they have obtained, will, in their apprehension, justify the opinion that any member of Congress made the underscoring or the brackets, which induced the printers not to publish the paragraph. The letter of William R. Dickinson to Mr. Dickens, although not strictly before the committee as evidence, they have thought it not improper to bring to the view of the House.

An expectation that any further efforts to detect the person who caused the suppression of the paragraph in letter A 5 must prove as unavailing as those already made, induces the committee to ask to be discharged from the further consideration of so much of the resolution as relates to that subject.

A.

The examination of the Hon. D. P. Cook, taken on Monday, the 10th of February, 1823, under oath.

Question 1. Can you say, at this time, how long you were in possession of the documents of which A 5 is one?

Answer. I cannot say precisely how long. My impression is, I brought them to the House on the Saturday or Monday after they were presented to the House.

2. At whose house did you board last session?

Ans. I boarded at Mrs. Heyer's at the time I had possession of the documents.

3. Were the documents above alluded to inspected by any person but yourself, while they were in your possession? If they were, by whom?

Ans. They were. They were inspected by Governor Edwards; but to what extent, I do not know.

4. Do you know whether he inspected document A 5?

Ans. I do not know that he did.

5. Were the documents, or any of them, in possession of any other person than yourself, after they were withdrawn by you from the Clerk's office, and before their return thereto? If yea, in whose possession were they?

Ans. I think they were in possession of no person except when I was present; if they were, I have no recollection of it. And the only person in whose possession they were, when I was present, was Governor Edwards. My impression is, that Thomas Van Swearingen, a member from Virginia, was present; but I do not think he examined the papers. I understood from Governor Edwards, at that time, that some communication had been made to him, by Mr. Van Swearingen, which induced him to wish to see the papers; which was some conversation held either between Mr. Van Swearingen and the Secretary of the Treasury, or between the Secretary and some other person, of which he had been informed, and which I understood related to the bank at Edwardsville, where Governor Edwards lives.

5. Were the documents, or any of them, while in your possession, read by you to any person or persons? if yea, to whom?

Ans. If they were, I have no recollection of it; though it is possible they may have been.

6. When did you first observe the pencil brackets, embracing that part of A 5 which has been suppressed in the printing? and did you at that time—if not, at what time did you, observe the underscoring in said suppressed paragraph?

Ans. I first observed the pencil brackets after the documents were printed, in the Clerk's office, at the time I sent for them to make the examination alluded to in my former testimony. In relation to the underscoring, I have no recollection of it, until since the agitation of the subject at this session.

7. Do you know by whom the underscoring in the said suppressed paragraph was done, or caused to be done? if yea, by whom, and when?

Ans. I do not know when, where, or by whom, done.

8. Look at the letter A 5, and the marks thereupon. Do you believe it possible the said letter can be read, without noticing the said marks?

Ans. My impression is, I read this letter before the printing of the documents, and have no recollection of having seen the marks at that time. I also read a letter from the president of the Bank of Missouri, which it has been

stated was marked before it was sent to the House, and of the marks on which I have no recollection; and, therefore, it is possible that A 5 may have been marked, and I not have observed it.

9. What prudential reasons influenced you in your application for a certified copy of the letter A 5?

Ans. In conversation with two or three gentlemen, the subject of my calls on the Secretary of the Treasury at the last session, in relation to the bank deposites, became a topic of conversation. The subject of this omitted paragraph, after other conversation, was also spoken of. It was then suggested to me, as I had made the statement of the omission, if any difficulty should result from it, and it should be deemed a matter of any importance, that the letter might possibly be withdrawn in some way from the files of the House, and that, in the event of such an occurrence, it might be well for me either to have the letter examined by some member of Congress, or to obtain a certified copy of it; and that was the inducement for my obtaining the copy.

10. With whom was the conversation alluded to in your answer to the last interrogatory held? were they members of Congress, or others?

Ans. They were members of Congress; Mr. Edwards, of Connecticut, was one. I do not consider myself at liberty to name others without their leave, and to which, I presume, they will not object.

TUESDAY, 1 *o'clock*, *P. M.*

The committee met and resumed the examination of Daniel P. Cook, a representative from Illinois, who, in continuation of his answer to the last interrogatory proposed yesterday, says: That, having consulted the gentlemen with whom I had the conversation before referred to, and they having no objection to the communication of their names, I now state that they were Mr. Ingham, of Pennsylvania, Mr. Edwards, of Illinois, of the Senate of the United States, and Mr. Edwards, of Connecticut. Mr. McNeil was in the room in the course of the evening, but I do not think present at this conversation. This conversation took place in the room of Governor Edwards, and between the 1st and 6th of January last.

B.

Interrogatories proposed to the Hon. Ninian Edwards, a Senator from Illinois, which were answered under oath.

THURSDAY, *February* 13, 1823.

Interrogatory 1. Have you at any time, and, if yea, at what time or times, seen the *documents* now shown to you, of which A 5 is part, and which in printed documents is No. 66? where did you see them, and how often?

Answer. I am not here of my own suggestion, but by the *request* of the committee. The manuscript documents which include A 5 were brought to my room, at my request, by Mr. Cook, for my examination; and I did examine those parts which I was desirous to see, in the presence of Mr. Cook and the honorable Thomas Van Swearingen, then a member of the House of Representatives; very soon after which examination, Mr. Cook retired from my room, and took the documents with him, and I never have seen them since until the present time. As well as I remember, the House of Representatives directed Mr. Crawford's report to be published without the documents, and Mr. Cook told me that he had been permitted to take the documents into his possession for examination; upon which I requested him to bring them to my room. This was some time during the last session of Congress, and before the documents were printed.

Int. 2. What part of said documents did you examine particularly?

Ans. I examined those that related to the Bank of Edwardsville pretty minutely, partially those that related to the Bank of Missouri, and I think it probable that I examined a part of the documents that related to the Tombigbee Bank; I am under the impression that I did. I have not the slightest recollection of having examined any other part of the documents.

Int. 3. Look at the letter A 5 now shown to you, and the pencil marks and underscoring thereupon. Did you, when you made the examination of the documents, see and read this letter? If yea, did you discover upon its face the marks it now wears?

Ans. I did not examine the documents relating to the Bank of Steubenville; I had no motive to lead me to their examination; and I did not see the letter marked A 5; nor did I see or hear of any marks upon it, or upon any other letter, at that time.

Int. 4. Do you know by whom said marks or underscoring, or any part of them, were made?

Ans. I do not. They were not made by me, nor by any other person in my presence.

Int. 5. When did you first hear the marks upon this letter (A 5) spoken of, and by whom?

Ans. I think I heard them first spoken of last winter, after the documents were printed, by Mr. Cook; but I cannot state precisely the time.

Int. 6. Did Mr. Cook state to you when or how he first discovered the marks upon A 5?

Ans. All that I can recollect that throws any light upon that subject is this: Mr. Cook had stated to me that such expressions as are contained in the suppressed paragraph of the letter A 5 were in the documents, and, afterwards, upon reading the printed documents, and not being able to find these expressions, I reminded him of his having told me that there were such expressions in some part of the documents. I have always supposed that that was his reason for examining the documents, for he afterwards stated that the paragraphs were marked.

Int. 7. What led you to the examination of the documents brought to your room by Mr. Cook, at your request?

Ans. There were two objects. The first of which was, that I heard of certain suggestions, which I supposed were intended to criminate me in relation to the Bank of Edwardsville, and wished to see what the documents contained on that subject; and, particularly, one or more letters, which I believed had been written to Mr. Crawford in 1819. The other was a statement which I had seen, or understood to be in Mr. Crawford's report, and which I thought I knew to be erroneous, to wit, that the uncurrent paper which he received from the Bank of Edwardsville had been received by that bank before the date of the contract under which it agreed to pay specie; because I, myself, had made the arrangement with him concerning the bank, and knew that the first article of the contract under which it became a depository of public money was, that the deposite should be entered to the credit of the Treasurer as cash. I did not examine the documents with reference to any other objects.

Int. 8. Were you at any time a director in the Edwardsville Bank? Did you resign your seat as such director? If yea, at what time? And was it, or was it not, because you believed that the circumstances of said bank were impaired, and that it would be compelled to stop? When did said bank stop?

Answer. I was a director of the Bank of Edwardsville. It was organized about the time I left Edwardsville, in the fall of 1818, to take my seat in the Senate of the United States. Previous to that time, the public moneys received at Kaskaskia and Edwardsville were deposited in the Bank of Missouri, at St. Louis, as I understood, by the directions of the Secretary of the Treasury; and believing that the money received by these offices would be equally

as safe in the Bank of Edwardsville as in the Bank of Missouri, (in which opinion subsequent events have proved that I was not mistaken,) I applied to the Secretary of the Treasury to have the money received by these offices deposited in the Bank of Edwardsville, which he readily agreed to do. On my return to Edwardsville from Congress, in 1819, I found that a great run was made upon the bank, resulting, as I then believed, and still believe, from a formidable combination against it; and fearing that it might at some time or other fail to fulfil its engagements to the Government, I determined to sustain it against the run that was then made upon it; to get it, if possible, out of the reach of danger, and then to free myself from all responsibility with regard to it. Accordingly, some time in the year 1819, I made a publication in the St. Louis Enquirer, Edwardsville Spectator, and I think one other paper, the object of which was to give public notice, and to apprize the Secretary of the Treasury, of my intention to withdraw from the bank, and my determination to relieve myself from all responsibility in regard to it; leaving the Secretary to judge for himself, from the returns he required it to make, of the propriety of continuing it a depository of public money: and, although I believed that the St. Louis Enquirer was sent to him, I enclosed him a paper containing my publication; and, that he might have as perfect a control of the subject as possible, I prevailed upon Colonel Benjamin Stephenson, the receiver, and the president of the Bank of Edwardsville, who apprehended that ill consequences would result from my withdrawing from it, to write to the Secretary of the Treasury upon the subject, and enclose him one of my publications: and I advised him, in the mean time, to withhold all further deposites, till he could receive the orders of the Secretary; and I believe he did so, though I do not positively know it. I saw him write the letter, and enclose the publication, and I have no doubt the Secretary received it. Colonel Stephenson afterwards informed me that he had received a letter from the Secretary, directing him to continue the deposites in the bank; and I was much surprised at not seeing this correspondence in the report, as well as one or more letters, which, I confidently believe, were written to the Secretary of the Treasury in 1819, for the purpose of apprizing him of the situation of the bank at that time, and inducing him to forbear to draw upon it until it could relieve itself from the pressure it was then encountering. The bank continued to pay specie, notwithstanding the pressure; and in the fall of that year, I expect, was in as good situation as any bank in which the public money was then deposited.

According to the pledge which I gave in my publication, I resigned my seat as a director; and though I was once elected to the same station since that time, I refused to accept it, nor have I had any thing to do with the management of the bank since the fall of the year 1819; and that I might not be liable even to the suspicion of having been influenced by interested motives, in consequence of a hundred shares which I held in the bank, I have never borrowed one cent from it, though I paid the instalments required of me upon my shares in good money. I presume the documents will show when the bank stopped; I think it was in 1821, in the latter part of the summer, or the first of the fall; it continued, after that, to redeem its notes under ten dollars.

Int. 9. Can you furnish to the committee a copy of the publication referred to in your answer to the last interrogatory? If not, state it as well as you can recollect it.

Answer. I cannot furnish such copy, but think that Mr. Crawford could; and presume that Colonel Benton recollects it. I think it substantially contained what I have stated, in pretty express terms.

C.

Mr. Dickens examined.

TUESDAY MORNING, *February* 19, 1823.

Interrogatory 1. Were you at the office of the Intelligencer at any time during the printing of the documents, of which A 5 is a part? If yea, for what purpose?

Answer. I do not know that I was at the office of the Intelligencer during that time, nor do I know how long the documents were in the possession of the printers. I never saw the documents whilst in their possession, nor expressed to them any wish in relation to the documents.

D.

Mr. Burch examined.

Interrogatory 1. Look at the underscoring upon the suppressed paragraph of A 5. Is there any thing in the ink with which said underscoring has been made which can lead you to pass any opinion upon the character of the mark?

Answer. The underscoring upon the said letter is, in my opinion, in a different ink from that with which the body of the letter is written. It is not the ink of the Clerk's office of the House of Representatives; it is not so black, but approaches nearer the color of that furnished members during the last session of Congress.

Interrogatory 2. Is there any thing peculiar in the character of the ink furnished members of Congress which can enable you to identify it?

Answer. The ink, after being used for some time, assumed a rusty color, such as is exhibited by the underscoring upon the letter A 5. Instead of growing black as it grows older, it fades and rusts.

E.

Mr. Cook re-examined.

FEBRUARY 22.

Question 1. At what time did you first become acquainted with the practice in the office of the Intelligencer of omitting to print those parts of documents marked with crosses and included in brackets?

Answer. I never heard of such a practice until I heard it stated to the other committee of investigation by the printers.

Question 2. How long after the documents were returned by you to the House was it before you moved that they should be printed?

Answer. I think it was not more than two or three days, but I cannot say exactly how long it was.

Question 3. Do you think it was not on the same day?

Answer. I think it was not. It appears to me the documents lay in my drawer in the House of Representatives at least one day before I made the motion, and probably longer.

Question 4. Were you in the habit of locking your drawer?

Answer. No, I was not, except on some occasions when the House adjourned from Friday or Saturday until Monday, and not always then.

F.

DEAR SIR: BANK OF STEUBENVILLE, *February* 10, 1823.

I have just received yours of the 29th ultimo, calling my attention to a paragraph in my letter to the Secretary of the Treasury of the 3d of April, 1819, which paragraph was omitted by the printer on a call of the House of Representatives.

I have examined the book containing the copy of that letter, and have conversed with the clerk of the bank on the subject. We are both satisfied that no part was underscored or marked in any way when it left the bank. How or by whom it was thus marked, or for what purpose, I am totally ignorant.

Surely there was no just reason for suppressing that paragraph; the circumstance to which it referred being really trifling in itself, although, in the warmth of the moment, I gave an importance to it, which this unfortunate suppression is calculated to magnify. The debt of eighteen thousand dollars, transferred from the branch at Chilicothe to the Bank of Columbia, (where the whole amount of the special deposite was ordered to be placed,) and thence to this bank, was faithfully paid, with interest. If it had remained at either of those places, it would have been as faithfully paid. It was the property of the Government, and its character was not changed by this transfer.

I am, very truly, dear sir, your obedient servant,

W. R. DICKINSON.

A. DICKENS, Esq.

17th CONGRESS.] No. 539. [2d SESSION.

FURTHER LEGISLATION REQUIRED FOR THE IMPROVEMENT AND BETTER GOVERNMENT OF THE TERRITORY OF FLORIDA.

COMMUNICATED TO THE SENATE, FEBRUARY 3, 1823.

To the Senate of the United States: FEBRUARY 3, 1823.

Having lately received a memorial from the Legislative Council of the Territory of Florida, on subjects very interesting to the inhabitants of the Territory, and also to the United States, which require legislative provision, I transmit the same to Congress, and recommend it to their consideration.

JAMES MONROE.

To His Excellency James Monroe, President of the United States:

Your memorialists, constituting the Legislative Council of the Territory of Florida, beg leave to submit to the President of the United States a statement of the prominent subjects of general interest to the inhabitants of this Territory, for which they have been appointed to legislate, and in the destinies of which they feel a deep public and individual interest.

The Legislative Council will approach the topics to which they would most respectfully solicit your attention with that frankness and sincerity which citizens have the pride and satisfaction to assume in addressing the Chief Magistrate of our grand confederacy, and, through him, the Congress of the United States. After a long and protracted negotiation, the United States acquired the Floridas—an acquisition which it was then supposed would form one of the brightest epochs in the history of the distinguished administration that negotiated, and the Congress that sanctioned the treaty of cession, and enabled the ceded inhabitants, with the influx of population and wealth, to fulfil the high destiny to which the God of nature seemed to have assigned this highly favored country. Candor, however, obliges us to say that the act of Congress for the organization of the Government of this Territory, although calculated to remedy many of the defects of the provincial establishment from which it was lately emancipated, was nevertheless not so favorable as we had a right to expect, when we contemplate the value of the acquisition; the commercial and agricultural advantages of the country; its soils, bays, rivers, and harbors; its important resources and energies, when developed and called into action; and, above all, its exposed situation, possessing a seacoast of twelve hundred miles, constituting the natural boundary of the most important part of the Union, and liable to the incursions of any foreign invader, or lawless domestic enemy, whose cupidity and enterprising avarice might lead them to desolate our towns and plunder our sparse population. Your memorialists do not, in the remotest degree, charge the neglect to a want of that careful and provident attention to the interests of the native and adopted citizens of the United States which has always characterized the policy of those who are intrusted with the guardianship of our rights, but to a want of the requisite information in regard to the necessities and wants of our Territory, deprived as it has been of representation in Congress.

The first subject to which we would particularly invite your attention, and that of the Congress of the United States, is one of as much national concern as solicitude, in reference to the immediate prosperity of this Territory. It will be recollected that the late Government of Spain over these provinces considered East and West Florida as two distinct dependencies, from a connexion of which they could discover no immediate benefit to Spain, and, consequently, the settlements were confined to the vicinity of St. Augustine and Pensacola—more particularly in West Florida, where the settlement of the country was circumscribed, by an apprehension of Indian hostility. The effect has been to prevent the establishment of a road from the capitals of the above provinces to each other, or to the interior; and, as we are at present situated, the nearest practicable road from one to the other by land is seven hundred and fifty miles, through Alabama and Georgia; and the water communication round the cape is as difficult as a trip to Liverpool or Bordeaux. A conclusion, however, unfavorable to the conjunction of the two provinces in a Territory or State, cannot be drawn from this fact, the distance not being more than three hundred and fifty or four hundred miles, through a healthy fine country, a large portion of which, your memorialists are

induced to believe, for fertility, is not to be surpassed by any land in the southern country. A slight view of the geographical situation of the country, its local and political connexion with the United States, will demonstrate the policy and necessity of preserving the connexion of the Floridas, and also dictate the propriety of laying out a road from Pensacola to St. Augustine, from which our Government, in addition to the lasting improvement of her Territory, for the labor and expense will derive more than an equivalent from the sale of public lands, which will be much enhanced in value by such an improvement. Your memorialists would, therefore, request that your excellency would direct some intelligent officers of the engineer corps to explore the country, and mark out a road from Pensacola to St. Augustine, and adopt such measures as to your excellency may seem fit, to have the same opened, in conformity with their report; and, also, that they be directed to select some suitable place, in the Mickasuky country or on the Suwanee river, or the adjacent country, for the permanent seat of Government of Florida, and make report thereof to the Governor of this Territory, to be laid before the next Legislative Council. Whilst we are on the subject of establishment of public roads, so nearly connected with the growth, wealth, and prosperity of this Territory, we would also take the liberty to recommend to the General Government the necessity and practicability of opening the road from St. Augustine into Georgia, known by the appellation of the King's road, which was opened at great expense by the British Government, and could, at this time, be re-opened with very little labor, and will afford a communication to facilitate the intercourse between that part of the Territory and the southern States. The establishment of this road was deemed an object of the utmost importance to the province of East Florida by the British Government. Your memorialists are induced to believe that the policy and necessity of such measure will be more strongly felt by the Government of the United States.

Your memorialists would beg leave particularly to direct the attention of the Congress of the United States to the necessity of erecting light-houses at Pensacola and St. Augustine; and, also, to provide some law upon the subject of wrecking, at the peninsula of Florida, which is now in the hands of foreigners, and subject to the absolute control of the colonies of Great Britain and Spain, and is frequently made the pretext for piracy and smuggling.

Another subject to which the Legislative Council will call the attention of Congress is, the organization of the judiciary in this Territory. By reference to the act of Congress, it will be found that two district courts are established, one in East and the other in West Florida. Those courts are vested with jurisdiction in civil and criminal cases, without an appeal from their decisions to any other tribunal, only when they entertain jurisdiction in their federal capacity. It follows, therefore, that the act of Congress has vested in one judge power over the lives, liberties, and property of the citizens of this Territory, without providing for an appeal or writ of error, to correct a judgment rendered by misconception of the law, partiality, or judicial impetuosity. Whatever confidence we may repose in the virtues of our judges, or the upright integrity of the American bench, your memorialists conceive that it is a novel and dangerous power, inconsistent with the policy of our Government, and contrary to the usual course in relation to all the other Territories; in all of which, if they are not mistaken, three judges have been appointed, who were required to hold courts in different parts of the Territories, and once or twice a year hold a court of errors and appeals, in all cases arising under the territorial laws. The judges are incompetent to form such a connective tribunal; to supply the deficiencies in the judiciary system, as regulated by the act of Congress, the Legislative Council considered it incumbent upon them to establish inferior courts, as a temporary expedient, making it the duty of the judges of the inferior courts to hold pleas in the several counties, with an appeal from their decision to the district court of the United States. We believe this course to be indispensable to the convenience of large settlements remote from St. Augustine and Pensacola; a contrary policy would have subjected them to great inconvenience, and, in many instances, would have been tantamount to a denial of justice. We considered it necessary to prevent crime by its speedy punishment, to restrain the refractory, to protect the weak from the oppression of the strong; and thus to insure virtue and humanity among our citizens, and accomplish the great end of society—the happiness of the people. The salaries of the judges of the inferior courts amount to $2,400; and, as we are in the first grade of territorial government, we have reason to expect that Congress will make an appropriation of that sum; and, also, provide for the appointment of another judge, to reside at the seat of Government, which will do away the necessity of a longer continuance of the inferior courts.

There is another topic of considerable interest and magnitude to this Territory and the United States, upon which your memorialists would respectfully express their opinions on the present occasion. In consequence of the great extent of seacoast by which Florida is bounded, and the consequent exposure to which she is subjected, the speedy settlement of the country will readily present itself to your excellency as an object of the most important consideration. In order to give that strength and security to Territories thus peculiarly situated, emigration should be invited to them by every advisable means within the control of the General Government. To accomplish this desirable purpose, it may be considered of the first moment that the claims to land, of every description, should be promptly ascertained and adjusted. Upon this subject, your memorialists would, with all the respect and confidence due to the constituted authorities of the Union, recommend that the powers of the commissioners should be enlarged, relative to claims upon which they are authorized to pronounce a final decision. Your memorialists would also suggest the propriety of referring the larger grants to the investigation and determination of the judicial tribunals. Were the existence of this power thus vested in our courts, and transferred from the national councils, it is confidently believed that much expense would be avoided, as well as more ample and speedy justice administered to all the parties concerned. The members of the judiciary residing in the Territory, and having obtained an acquaintance with the laws and ordinances of the Government from which the claims emanated, they must necessarily be much better qualified to pronounce an opinion than any tribunal differently constituted. From the decision of the courts here, an appeal might be given to the Supreme Court, and thus the validity of titles decided by the constitutional arbiter, the judiciary, which would eminently contribute to secure the rights of the United States and of the claimants.

Until these difficulties are obviated, it cannot be expected that emigration should be successfully directed to the Territory of Florida. Large tracts of land are in some places covered by private claims. Before the proprietors can make any permanent disposition of them to settlers, by which a dense and efficient population can be obtained, it is indispensably necessary that they should be free from all incumbrance and litigation. This end can be most speedily, cheaply, and certainly accomplished, by the judicial tribunals of our country. Next to bringing the public lands into market at an early period, your memorialists consider the prompt and final decisions of land claims as an object of the highest consideration; upon it not only depend the growth and prosperity of this Territory, but the effectuation of those valuable purposes for which the United States obtained their cession by the late treaty with Spain.

In conclusion, your memorialists would beg leave to represent to your excellency the superior advantages of the harbor of Pensacola over any other on the Gulf of Mexico south of New Orleans, and to suggest the policy of selecting it as a naval depot by the Government of the United States. Although engineers have been appointed to make a survey of the harbor, who are amply competent to form a correct estimate of its importance; yet, it is to be hoped that the suggestions of your memorialists may not be considered obtrusive, but received with complacency, as the

offspring of a lively interest in the welfare of this Territory and of the United States. From a survey that has been made of the harbor of Pensacola, under the orders of the General Government, it is understood by your memorialists that, at the lowest water, vessels drawing not more than twenty-one and a half feet water may cross the bar, and enter the harbor with perfect safety. The medium depth of water between the highest and lowest tide may be confidently estimated at two additional feet, making in the aggregate twenty-three and a half feet. It is believed, from the best advice which has been obtained upon the subject, that this depth of water on the bar is sufficient for the entrance of vessels of any description, save those of the largest class; the locality of the bay is likewise such as to secure every facility to the entrance and departure of vessels. The opposite extremes of its oblong form extend in a northeasterly and southwesterly direction, which happily corresponds with the general range of winds, so as to subject vessels to very little delay in their arrival or departure. After vessels have entered the bay, they have every assurance of the most perfect security, even in the most violent gales; it is completely land-locked by the main land and the island of St. Rosa; it is uncommonly capacious, and its bottom, affording a stiff, tenacious clay, constitutes a safe and excellent anchorage. From St. Carlos de Barancas to the opposite point on St. Rosa's Island, is computed to be about three-fourths of a mile; with suitable fortifications at those two opposite positions, it is confidently believed, by military gentlemen of science who have visited them and expressed an opinion, that no vessel could pass into the bay without receiving a fatal injury; the guns of both fortifications could be brought to bear upon it with so much certainty and effect as to insure its destruction. Every examination which has been made of these commanding stations has resulted in the decided opinion that it can be much more easily defended than any other on the gulf, if not on the whole of the Atlantic coast.

A faithful topography of Pensacola and the adjacent country will demonstrate that it may be very efficiently protected from the inroads of the enemy by land. In the rear of the town, at the distance of about half a mile, the highlands are presented, upon which military works may be constructed to advantage so as completely to command the whole space intervening between them and the bay; a single fortification, strongly and judiciously built, would successfully bear upon the entrance into the town, in every direction. There is, probably, no other station on the southern coast which could be defended by land with so small a number of troops, or at less expense.

Independently of the facility with which Pensacola may be defended, if reliance is exclusively reposed on regular troops, there are other prominent considerations, which powerfully recommend it to the attention of the General Government. These result from its immediate connexion with New Orleans, and its contiguity to most of the States on the Mississippi river. In cases of emergency and invasion, should it become necessary to call the aid of the militia for the protection of this place, they can be readily obtained from Louisiana, Mississippi, Kentucky, Tennessee, and Alabama; owing to an advantage from a water communication, they may be conveyed to Pensacola in a short time, and, comparatively, with small expense to the General Government. Your memorialists are induced to believe that half of the expenditures of the late war were included in the item of transportation; much would be saved, on this score, were Pensacola selected as a naval station, not only in the transportation of soldiery, but also in provisions and the munitions of war. This desirable object would be more completely accomplished, should ever a communication be opened between the Bay of Pensacola and the Mississippi and Mobile rivers. Another prominent advantage in favor of Pensacola, which gives it elevated claims on the patronage of the Government, is, that it is distinguished for the salubrity of its atmosphere and mildness of climate; it is a situation where her troops may always calculate on enjoying good health, and where it is represented that breadstuffs and other provisions continue almost as long in a perfect state of preservation as in most of the northern ports of the United States.

In addition to this, your memorialists will take the present occasion to remark, that a military force stationed at Pensacola would, in time of war, give efficient aid in the defence of New Orleans, as well as additional security to Louisiana, Mississippi, and Alabama, by presenting a formidable barrier, by which inroads through West Florida would be checked and prevented. This assistance could not, with any certainty, be obtained from Tampa Bay; and no other position, it is believed, can be selected, south of Pensacola, which promises the other important advantages we have described; in consequence of its remaining at a great distance from a dense population, and the difficulties of transportation, it cannot be so conveniently connected with the adjoining States, and must rely for defence almost entirely upon regular troops, a much larger number of which will be necessarily required.

The occupation of Pensacola, with the necessary fortifications, is calculated to afford a more complete command over the commerce of the Gulf of Mexico, than any other position which could be selected on the southern coast; with this peculiar advantage, the United States would exclude the shipping of an enemy, probably, from the only port in Florida in which they could anchor with safety, owing to the violence of the West India gales. Your memorialists are of the opinion that there is no other harbor, save that of Havana, in which they could ride with security during a storm. But the benefits arising from the selection of Pensacola as a naval station are not entirely of a negative character; we should not only be enabled to exclude the hostile armaments of foreign nations, but our own vessels could be protected from capture and disaster. The harbor of Pensacola will always be a place of secure retreat, a station from which expeditions may be fitted out without interruption, and from which the West India commerce of an enemy might receive the most successful annoyance. Were New Orleans assailed, Pensacola would be competent to afford co-operation for its defence, both by land and water, which could not fail to excite in the enemy the most fearful apprehensions; by our vigorous and well-directed efforts, her commerce would be cut off, her detachments captured, and, in the end, her surrender or retreat accomplished. The security of this place, then, is believed by your memorialists to be inseparably connected with the prosperity and defence of New Orleans and the contiguous States. We, therefore, pray the attention of your excellency to the subjects upon which we have taken the liberty to remark; and be assured that those who give a different account of our Territory are ignorant of its resources, or wantonly misrepresent it.

Resolved by the Legislative Council of the Territory of Florida, That the Governor of this Territory be requested to forward a copy of the foregoing memorial to the President of the United States; and that another copy be delivered to the Delegate who may be elected to represent this Territory in Congress, to be laid before the Congress of the United States at their next session.

EDMUND LAW,
President of the Legislative Council.

Test:

ROBERT MITCHELL,
Clerk of the Legislative Council.

17th Congress.] No. 540. [2d Session.

EXPEDITION AGAINST THE ISLAND OF PORTO RICO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1823.

To the House of Representatives: FEBRUARY 4, 1823.

In compliance with the resolution of the House of Representatives of the 12th of December last, requesting the President "to communicate to the House such information as he might possess with regard to any expedition prepared in the United States, and having sailed from thence, within the year 1822, against the territory or dependency of any Power in amity with the United States; and to inform the House whether any measures had been taken to bring to condign punishment persons who have been concerned in such expedition, contrary to the laws," I transmit to the House reports from the Secretaries of State and of the Treasury, with the documents mentioned in each. Those documents contain all the information in possession of the Executive relating to the subject of the resolution. That a force of a very limited extent has been equipped in the ports of the United States, and sailed from thence for the purpose described in the resolution, is manifest from the documents now communicated. The reports from the collectors of Philadelphia and New York will show in what manner this equipment escaped their notice. The first information of this equipment was received from St. Bartholomew's, the place of its rendezvous. This was confirmed afterwards from Curaçoa, with an account of its failure. Should any of those persons return within the jurisdiction of the United States, care will be taken that the laws applicable to such offences are duly enforced against them. Whether any aid was afforded by others to the parties engaged in this unlawful and contemptible adventure, in the ports in which it was planned, inconsistent with ordinary commercial transactions, and contrary to the laws of the United States, will be referred to the Attorney General, on whose advice any measures in regard to them will depend.

JAMES MONROE.

DEPARTMENT OF STATE, WASHINGTON, *January* 31, 1823.

The Secretary of State, to whom has been referred the resolution of the House of Representatives of the 12th of December last, requesting the President to lay before the House such information as he might possess with regard to any hostile expedition prepared in the United States, and having sailed from thence, within the year 1822, against the territory or dependency of any Power in amity with the United States; and to inform the House whether any measures had been taken to bring to condign punishment persons who have been concerned in such expedition, contrary to the laws of the United States, has the honor of reporting to the President copies of the papers in the possession of this Department relating to the subject of the resolution.

JOHN QUINCY ADAMS.

Mr. Ingersoll to the Secretary of State.

SIR: PHILADELPHIA, *January* 8, 1823.

Since the receipt of your letter dated the 1st instant, concerning the Porto Rico expedition, I have ascertained, as the enclosed original papers will show, that an illegal expedition was fitted out in this port against that island, and sailed from here in the month of August last.

It appears that Ducoudray Holstein and Baptiste Irvine, with about forty other persons, chartered the brig Mary, of this port, from Thomas Wattson, her owner, for $20,000, and sailed in that vessel for Porto Rico, with a quantity of muskets, sabres, pistols, cartridges, gunpowder, and other munitions of war, besides a cargo of flour, but without, as I understand, other armament of the vessel than two cannon, which she had had mounted before her employment on this enterprise. A vessel from New York, and another from Baltimore, were to meet the Mary at sea, and the three to proceed in company to their destination.

With the result of the expedition you are informed, and the enclosed letters will acquaint you particularly. They have been freely put into my hands, together with the charter-party, policy of insurance, and copy on account of the invoice, also enclosed, by a gentleman who received them as assignee of Mr. Wattson, with whom also I have had an interview on the subject, in which he was fully apprized of my object in seeking it. I understand from him that, although the business was conducted with great despatch, there was nothing clandestine about it. You will see, by the list of articles annexed to the charter-party, that bills were furnished for the printing materials and ironmongery supplied. But I believe all these articles were purchased by Mr. Wattson. Policies of insurance were also effected on the Mary's cargo; two by insurance companies in this city, and one by an insurance company in Baltimore, (enclosed,) the tenor of which shows that the voyage was disclosed to the underwriters.

Why and how this expedition so far eluded the notice of the public officers of the United States as to have met with no obstruction, nor to have been made known to any of the Executive Departments at the seat of Government, I am unable to inform you, further than by submitting the enclosed note, which I addressed to the collector of the port, and his answer, on the subject.

I have good reason for believing that the minister of Spain was aware of the expedition at the time of its departure, but refrained from complaint here, preferring to take measures for its destruction after its concentration in the West Indies.

The first knowledge or intimation I had of it was derived from the newspaper accounts of its failure.

I remain, with great respect, sir, your obedient servant,

C. J. INGERSOLL.

The Hon. J. Q. ADAMS, *Secretary of State.*

Memorandum of an agreement entered into between Thomas Wattson, of the city of Philadelphia, (merchant,) and General Ducoudray Holstein, now of the said city, viz:

The aforesaid Thomas Wattson, on his part, agrees to advance to the said Holstein, in cash, twelve hundred dollars, to provide for the conveyance of himself (the said Holstein) and sixty other men that he may appoint, to be embarked

on board the American brig Mary, Captain Aaron Burns, and to be landed on the west side of the island of Porto Rico: and further, to deliver from on board the said brig to him, (the said Holstein,) or to his order, all articles, in good order and condition, as they are specified in the annexed list; the duties and expense of landing the said men and articles to be paid by the said Holstein. Captain Burns, however, is to render the necessary assistance his crew and the brig's boats can furnish, according to the custom of the island. And the aforesaid General Ducoudray Holstein, on his part, agrees to pay, or cause to be paid, unto the said Thomas Wattson, or to Mr. Isaac Reid and Captain Aaron Burns, his agents, the full sum of twenty thousand Spanish milled dollars, on or before the delivery of the said goods or articles, or to give them (the said Reid and Burns) good and satisfactory security that the aforesaid sum of twenty thousand dollars shall be paid within five days from the safe arrival of the said brig at the place of landing, which the said Holstein shall have to select; but it shall be optional with him (the said Holstein) to pay one-half of the above sum of twenty thousand dollars in produce of the island of Porto Rico, provided it be invoiced at least one-third less than the current prices of the place of shipping, and to be consigned to the said Thomas Wattson, of Philadelphia, to be sold for account and risk of the said Holstein, and the nett proceeds placed to his credit.

It is further agreed between the parties that eight days shall be allowed for the delivery of the cargo and for the shipping of the specie and return cargo on board said brig; and for each and every day's further detention of said brig over that time, the said Holstein is to pay, or cause to be paid, one hundred dollars per day demurrage; but, in no case, shall the brig be detained above fifteen days, except by consent of the aforesaid Isaac Reid and Captain Aaron Burns, agents for the said Thomas Wattson.

It is also agreed that for any small or unimportant deviation, either in quantity or quality, of the goods or articles specified in the annexed list, no abatement shall be made from the aforesaid sum of twenty thousand dollars; and that this agreement shall not be considered void until the said Thomas Wattson shall receive the full and nett sum of twenty thousand dollars; but no advantage shall be taken by either party of any informality in this agreement, as it is made in the full faith and confidence of the parties.

Witness, this first day of August, one thousand eight hundred and twenty-two.

H. V. DUCOUDRAY HOLSTEIN,
THOMAS WATTSON.

THOMAS WELSBUGER, } *Witnesses.*
ISAAC REID, }

List of articles for General Ducoudray Holstein, as per annexed agreement, dated August 1, 1822.

One hundred muskets.
One hundred and twenty sabres and belts.
Fifty drums.
Sixty speaking trumpets.
Thirty pairs of pistols.
Sixty jackets and trowsers of blue nankeen.
Sixty straw hats.
Thirty pairs of blankets.
Fifteen kegs of powder.
Fifteen fixed cartridges.
A quantity of medicine, per bill of J. Wittburger.
Three hundred pounds of musket balls.
Two thousand flints.
One box of mould candles.
One box of spermaceti candles.
Two hundred pounds of soap.
Twenty pounds of sewing twine.
Three hundred gunny bags.
Four pieces of bombazettes.
Two pounds of wafers.
Six pounds of sealing-wax.
Two spy glasses.
One dozen lanterns.
One dozen tinder-boxes.
Aquantity of paper, printing materials, and blank books, per Lafourcade's bill.
Six penknives.
Fourteen pairs of epaulettes.
And a quantity of hardware, consisting of axes, shovels, spades, hammers, hatchets, pincers, saws, files, needles, nails, &c., per Crap's bill.

BY THE PATAPSCO INSURANCE COMPANY:

No. 3568—CARGO.

This policy of insurance witnesseth, that the Patapsco Insurance Company have insured, and hereby do insure, Nathaniel Pearce, for account of whom it may concern, as well in his own name as in the name or names of all and every other person or persons to whom the same doth, may, or shall appertain, in part or in the whole, lost or not lost, at and from Philadelphia to St. Bartholomew's, St. Thomas's, and the privilege of three ports on the west side of the island of Porto Rico, (say Ponce, Mayaguez, Aguadilla,) and back to Philadelphia, or a port in the United States:

Five thousand dollars upon all kinds of lawful goods and merchandise, laden or to be laden, on board the brig called Mary, whereof is master for the present voyage Burns, or whoever else shall go for master in the said vessel, at Philadelphia, beginning the adventure upon the said goods and merchandise from the loading thereof on board the said vessel, and continuing the same until the said goods and merchandise shall be safely landed at the ports aforesaid.

And it shall and may be lawful for the said vessel, in her voyage, to proceed and sail to, touch and stay at, any ports or places, if thereunto obliged by stress of weather, or other unavoidable accident, without prejudice to this insurance. The adventures and perils which we the insurers are contented to bear and take upon us in this voyage, are: of the seas, jetsams, and all such other perils, losses, and misfortunes that have or shall come to the hurt, detriment, or damage of the said goods and merchandise, or any part thereof, as insurers are legally accountable for—warranted, nevertheless, by the insured, free from any charge, damage, or loss, which may arise in consequence of a seizure or detention of goods and merchandise hereby insured, or of the said brig, by reason or on account of any illicit or prohibited trade, or trade in articles contraband of war.

And all tobacco, salt, hides, skins, peltry, fish, fruit, wheat, Indian corn, Indian meal, peas, beans, flax-seed, or any other kind of grain or seeds, rice excepted; bread, coffee, and cocoa, stowed in bulk; all liquids, in casks or otherwise; and all other articles perishable in their own nature, are warranted by the insured free from average, unless general, or the ship be stranded; coffee and cocoa in bags, free from average, unless above ten per cent., or general; and all other goods free from average under five per cent., unless general.

And in case of capture or detention for adjudication, the insured renounce all claims against the insurers for demurrage; and in case of detention arising from stress of weather, the insured renounce all claim against the insurers for demurrage, seamen's wages, and provisions.

And in case of any loss or misfortune by any of the perils insured against, it shall be lawful to and for the insured, his factors, servants, and assigns, (and the insured on his part agrees and engages for himself, his factors, servants, or assigns,) to sue, labor, and travel for, in, or about the defence, safeguard, and recovery of the said goods and merchandise, or any part thereof, without prejudice to this insurance, to the charges whereof the said insurers will contribute, according to the rate of the sum hereby insured. And so the said insurers are contented, and stand bound to the insured, his executors, administrators, and assigns, for the true performance of the premises, confessing themselves paid the consideration for the insurance by the insured at and after the rate of five per cent. flat premium.

It is understood that this insurance is against sea risk only.

In case of loss, the same shall be paid in sixty days after proof and adjustment thereof, without any deduction, (except the amount of the premium, if then unpaid,) provided such loss shall amount to five per cent. on the sum hereby insured; under which no payment shall be made, unless in case of general average. In all cases of return premium, one-half per cent. on the sum insured shall be retained by the insurers. No part of the premium shall be returned or abated on account of any deviation from the voyage hereby insured. It is hereby agreed, that the insured shall not abandon to the insurers, until thirty days have elapsed after having given notice to them of his intention so to do, and of the loss or event which may entitle the insured thereto. It is declared and understood that, if the above-mentioned brig, after a regular survey, should be condemned for being unsound or rotten, the insurers shall not be bound to pay the sum hereby insured, nor any part thereof. It is also agreed by the parties of this policy, that in all instances when insurances are made to or from any ports or places at or on this side of the Cape of Good Hope, or Cape Horn, the lapse of twelve months from the time of sailing, or being last heard of, shall be considered as proof of loss, which loss the insurers agree to pay without further delay; and to or from any ports or places beyond either of the said capes, the lapse of eighteen months from the time of sailing, or being last heard of, shall be considered as proof of loss, entitling the insured to receive payment as aforesaid. And it is also mutually agreed by the parties to this policy, that if any dispute should arise relating to a loss or return premium on this policy, it shall be referred to two persons; one to be chosen by the insured out of three persons to be named by the president of the said company, and the other by the said president out of three persons named by the insured, who shall have full power to adjust the same; and in case they cannot agree, then they shall choose a third person, and the decision of any two of them shall be obligatory on both parties.

In witness whereof, the president of the said Patapsco Insurance Company hath subscribed his name and the sum insured, and caused their corporate seal to be affixed hereto, at the city of Baltimore, on the fifteenth day of August, in the year one thousand eight hundred and twenty-two.

LEWIS BRANT,
President pro tem. of the Patapsco Insurance Company.

SIR: CURAÇOA, *September* 25, 1822.

I am very sorry to tell you that after running great risks both as to lives and property, we arrived at this place on the 19th of this month. The expedition is completely destroyed, as some of the principals and the commander-in-chief are taken into custody by the authority of the Chief Magistrate of the island, and the vessel also that accompanied us to this place, which was a brig that joined us at St. Barts.

The brig Mary and cargo are safe, and most of her cargo is out and will be ready for sea in about ten days, unless prevented by Mr. Reid, as he and I do not agree.

Yours, respectfully,

A. BURNS.

Mr. THOMAS WATTSON.

N. B. This is in haste. I will give you every particular in my next, which will be very shortly.

SIR: CURAÇOA, *September* 26, 1822.

I have arrived at this place after encountering many difficulties and dangers both to lives and property. Every thing relating to the expedition is completely destroyed, and all that is saved are the provisions and brig. As [to] the military stores, [it] is doubtful whether they will be confiscated or not. As soon as I collect all the particulars relating to this unfortunate event, I shall endeavor to give them to you.

The reason why we are here is, that the general has deceived all who have had any thing to do with him; and while at St. Barts, and since, [there has been] nothing but quarrelling and dissatisfaction amongst those who ought to be united.

Yours, respectfully,

AARON BURNS.

Mr. THOMAS WATTSON, *Philadelphia.*

N. B. The brig and cargo are clear, except the military stores.

Aaron Burns to Thomas Wattson, dated at

SIR: CURAÇOA, *September* 26, 1822.

It falls to my part to inform you that every thing relating to the expedition is entirely destroyed. I will endeavor to give you all the particulars relating to this unfortunate expedition, and every transaction that has come within my knowledge shall be fully related.

We left the capes of Delaware on the 11th of August; on the 13th arrived at Barnegat; after cruising twenty-four hours off that place for our consorts, and not finding them, we proceeded on our passage for St. Barts. Nothing of consequence happened on our passage, except a little assumption on the part of Mr. Reid, which was highly resented by some of the passengers; they supposing him not vested with such high authority as he assumed. On the 8th of September, we arrived at St. Barts; we found Captain Gould, who is deeply concerned in the expedition, and who had been waiting some days for our arrival, he having arrived from New York in the schooner Selina, Captain Sisters: you have doubtless heard the general mention his name. He came on board, and desired us to come into port; which was immediately done, after consulting with General Holstein, who advised to that effect. At that place all the chief officers went on shore, where there was nothing but disputations between them and Mr. Reid, as they wished to take part of the cargo to raise funds. Four days after, arrived schooner *Andrew Jackson*,

Sanderson, from New York. After lying here five days, we were *ordered* off by the Governor, who repeated his order' declaring he would fire into us if we did not immediately obey the order. We left the principal officers on shore' and made sail for the Five Islands, at which place we arrived in two hours, it being only ten miles distant; both schooners from New York anchored there also, and a sharp built brig, called the Endracht, formerly the American privateer Saratoga, which had been bought at St. Barts by Captain Gould for the expedition. In the afternoon, all the officers who were compelled to leave St. Barts came on board. While at the Five Islands, nothing but the most violent disputes and contention was visible among the principal persons, and at last it was concluded to put all the military stores on board the brig Endracht, which was done, she being a very fast sailer. Several reports were current at this place, viz: that the inhabitants of St. Barts intended to rise and come against us; next, that several French men of war were cruising off for us, they having understood that the expedition was intended against St. Martin's and Guadaloupe. We all got under way immediately; the schooner Andrew Jackson proceeded to St. Barts, after having put all her military stores on board of the other brig, together with her passengers, to about thirty people in number, (the sharp brig, or Endracht, had in all about sixty in number,) all of the vessels doing the same; the rest, three in number, immediately put out to sea, as I thought with an intention to proceed to Crabb Island, to windward of Porto Rico, where the general repeatedly declared that every thing was in readiness to prosecute the expedition; but, after being at sea about six or eight hours, Mr. Irvine and the captain of the brig came on board, and declared that they had determined to proceed to Laguaira, instead of Crabb Island, the general having raised their expectations to the highest pitch in respect to procuring several hundred men at the latter place; they then discovered they had all been deceived, and that he had been guilty of the basest deception in holding out to them ideas which he never expected himself to be realized. We accordingly steered for Laguaira, but we got separated; some time after, Mr. Reid wished to go on board the other brig on some business, and I endeavored to come up to her, in which I succeeded; he went on board, and returned soon after, apparently very much alarmed, as he declared that they had threatened to detain him on board, and, with much uneasiness in his looks, also said they were desirous of sending a part of the passengers on board, to which I was strongly opposed. I then hailed the brig, and told them the decided course I should pursue; that if it was necessary to save the lives of the passengers, I would do all in my power to assist them; if, on the contrary, it was only a wish to get rid of some of them, that I would not take them on board; but would at any rate stay by them, and render them all necessary assistance; on which the French passengers in the other brig declared, unless I hove to, they would fire into me, and they had actually their muskets ready; on which I was compelled to heave to, and take some of them, but not until Mr. Irvine had come on board and said that their determination was to fire unless their demand was complied with. Those who had declared their determination to fire were nearly all French, to whom the general always appeared particularly partial; their determination was not only to fire into the brig, but to endeavor to kill all hands and take the brig from me. The number I took on board was twenty-six, mostly black, and of the lowest class. I then immediately lost all confidence in the principals, and determined to save the brig and cargo by getting her into the first port; and I succeeded in getting her in here on the 20th of September, and on the next day the brig arrived that I took the passengers out of. Both vessels were taken possession of by the orders of the Governor. After various examinations and questions, the Mary was given up; but the other brig is still in the hands of Government, with her cargo, which I believe will be cleared in a few days—at any rate, the cargo. Since we have been here, there have been continual disputes and contention among the passengers, myself, and Mr. Reid; some will have one thing, and some another. I have determined to abandoned the expedition, and save the brig and what cargo is left, as, in my opinion, there is but little confidence to be placed in any one, and great deception. The general at this time is confined; for what, I cannot say; the rest of the principal officers are rambling about, but not permitted to leave the place. The Mary's cargo is all out, and I shall take in for home in two or three days. All the cargo I had on board when we arrived here was the flour, beef, pork, bread, and saddles, with some trifling articles, as every thing else was put on board the brig Endracht at the Five Islands. I will conclude by observing, that the deception practised by the general almost exceeds the bounds of belief; for the resources and funds which he so repeatedly declared that he possessed in the West Indies were totally false, and every thing that he has said in relation to the expedition has proved a chimera of the wildest nature; and I cannot but believe him to be a foolish old man, whose ideas are almost obscured by age; and that he wanted not only the abilities to command, but a knowledge of the place to which he was destined, as his ignorance of the latter was only exceeded by his incapacity for the former.

AARON BURNS.

Mr. THOMAS WATTSON.

SIR: CURAÇOA, *October* 12, 1822.

I have written you all the most particular transactions since we left Philadelphia. I only have to add, that the general is still confined, and the principal officers are not permitted to leave the island. Every thing has been confusion and disorder amongst the passengers since our arrival here; and I do believe the most of them are a complete set of renegadoes, who are willing to say or do any thing for the sake of gain. For my part, I would scarcely trust any one, as they have said and declared to so many falsehoods respecting the expedition, and are still going on in the same way. The brig Mary is loaded with freight for New York, and will sail in about four days, unless something turns up that cannot be foreseen. Mr. Reid, I expect, has given you all the necessary information respecting the cargo, as to sails, &c.

Yours, respectfully,

Mr. THOMAS WATTSON. AARON BURNS.

I. Reid to Thomas Wattson, dated at

MY DEAR SIR: CURAÇOA, *October* 17, 1822.

Being detained here by this Government, and knowing not when leave will be given me to leave this miserable place, you may probably think that I ought to give you a detail of every thing relative to us since I left Philadelphia. But, as this will be handed you by Captain Burns, and as he himself has but barely escaped from the sad predicament in which all our concerns here are involved, I refer you to him for all the particulars.

Yours, &c. I. REID.

Mr. THOMAS WATTSON, *Philadelphia.*

SIR: JANUARY 8, 1823.

Representations having been made by the Spanish minister residing in this country that, in the course of the last summer, an illegal expedition against the Spanish island of Porto Rico was partly armed and fitted out in the

port of Philadelphia, I have been officially requested by the Secretary of State, under the President's direction, to collect and transmit to the Department of State any information concerning it which I can obtain, and particularly to ascertain why and how that expedition, if so armed and fitted out, so far eluded the notice of the public officers of the United States as to have met with no obstruction, nor to have been made known to any of the Executive Departments at the seat of Government.

According to this instruction, I have ascertained that an illegal expedition against Porto Rico sailed from this port in August, on board of the brig Mary, Captain Aaron Burns.

I request you to let me know, for the information of the Executive, why that vessel was not detained by you until the President's decision, or the owner's bond, was obtained, as the law requires of the collector, in case of an illegal expedition.

I will thank you for an early answer to this inquiry, and remain, very respectfully, your humble servant,

C. J. INGERSOLL.

JOHN STEELE, Esq., *Collector of the port of Philadelphia.*

---

232 barrels of superfine flour.	43 barrels of pork.
90 barrels of navy bread.	3 puncheons of rum and 1 cask of wine.
20 barrels of pilot bread.	27 saddles and 27 bridles.
40 barrels of beef.	112 cartridge boxes.

The above goods were shipped on board the brig Mary, Captain Burns, in addition to the list attached to the agreement; part of which was for the use of the passengers, and, consequently, not cleared out at the custom-house; and, in fact, some of the articles purchased after the vessel was cleared out; but every thing of importance, and what was considered as cargo, was regularly cleared out. The cost and charges of the whole, including the cash advanced, amount to $10,326 90.

THOMAS WATTSON.

PHILADELPHIA, *January* 7, 1823.

Robert Tillotson to the Secretary of State.

SIR: NEW YORK, *January* 23, 1823.

I have the honor to enclose an extract from a communication on the subject of the expedition in part fitted out in this port against the Spanish island of Porto Rico. Delicacy to those who have been good enough to give the information prevents me from accompanying this statement with the names of my informants. Should you, however, deem it necessary that a disclosure, on the authority of their names, should take place, I am authorized to say it shall be done.

Why this expedition eluded the vigilance of our public officers may in part be explained by that vigilance not being necessarily excited by a shipment that did not, in fact, develop its character until it left this port.

With great respect, I remain your obedient servant,

ROBERT TILLOTSON.

Hon. JOHN QUINCY ADAMS, *Secretary of State.*

[EXTRACT.]

Early in the month of August last, or thereabouts, there appeared in this city a Mr. Vogel, representing himself to be an agent of General William Henry Ducoudray Holstein, by him furnished with power to raise men and officers, and obtain supplies of arms and munitions of war, for the purpose of revolutionizing a Spanish colony, the name of which, for prudential motives, was concealed, until it might be more expedient to disclose it; at the same time, representing that the object in view had the sanction, through her agent in Philadelphia, of the Colombian republic, under whose flag, and in conjunction with whose forces, it was to be carried into effect; General Ducoudray in particular asserting, as we were informed, that Commodore Daniels, with his squadron, would co-operate in the attack. In consequence, on the 13th of August last, two vessels, the Andrew Jackson and the Selina, both schooners, sailed from New York, having on board a number of passengers, principally Americans and French, all of whom we believe (and in our own particular case do assert) were under the persuasion that our operations were to be conducted under the Colombian flag; the cargoes, consisting of muskets, sabres, saddles, powder, lead, and provisions, in packages of various sizes, having been shipped as merchandise for St. Thomas's or St. Barts. On leaving this port, we proceeded directly to the spot appointed as the place of rendezvous between our vessels and a Colombian twenty-two gun brig, which we had been taught by the agents of General Ducoudray to expect to fall in with off Barnegat: on board this vessel, which he asserted would sail from Philadelphia with men, arms, &c., it was our expectation to be transferred. After cruising some time on the above-mentioned ground without falling in with any such vessel, we proceeded (as had been preconcerted) to the second point of rendezvous, St. Barts. It may not be amiss, in this place, to remark, that a sail appearing in sight which was mistaken for our expected consort, a flag was displayed at the mast head, which we have since discovered to have been an assumed one, but respecting which we were at the time kept in ignorance whether it was a private signal or the Colombian flag, though we generally supposed it to be the latter. The Andrew Jackson being a dull sailer on a wind, and the weather proving adverse, our consort, the Selina, parted company, taking on board some of our principal officers, with intention to make the best of their way to St. Barts, to expedite some preparations making in that place. About this time it became known to some individuals that our destination was Porto Rico, though the same was not generally understood until about the time that we arrived at St. Barts; no suspicion being yet entertained that we were deceived respecting the expected succors and the protection of the Colombian flag. On our arrival at St. Barts, we learned that, instead of the Colombian brig, a vessel had arrived from Philadelphia, called the Mary, with men and arms; and that, in consequence of the non-performance of General Ducoudray's engagement, a vessel had been purchased in St. Barts, which had been a few days previously taken by a patriot privateer from the Spaniards. The Andrew Jackson did not enter the harbor of St. Barts, but lay on and off for three days, at the expiration of which time she received orders to make sail for Five Islands, where, on our arrival, we found lying in a small bay three vessels, the Mary, Selina, and Endracht, (as she was then called,) being, for some reason unknown to us, under Dutch colors.

At this place we first saw Mr. Irvine and General Ducoudray, and several persons to whom he had, as we understood, given commissions; but of what description we knew not, as we, the subscribers, never received any, nor saw one, until after our arrival at Curaçoa. The Governor of St. Bartholomew's, as we were informed, suspecting something of an improper nature in the expedition, had ordered these three vessels out of port; in consequence of which, but few of the soldiers there enlisted had been taken on board. The latter part of the day of our arrival at Five Islands was occupied in transferring the passengers, arms, munitions of war, and part of the stores, from the three vessels last mentioned into the newly purchased brig Endracht, and on the following morning the Endracht, Mary, and Selina weighed, and set sail (as we believed) for Crabb Island and St. Thomas's, there to take on board troops which had been previously raised; the Andrew Jackson entering the harbor of St. Barts to dispose of the remainder of her cargo; from and after which time we saw nothing more of her or of the Selina. On the same day, at sea, to our utter astonishment, we were informed by the captain of the Endracht (though the same was probably already known to some of the senior officers) that we had been deceived by General Ducoudray with respect to the existence of any Colombian commission for the vessels; on which the determination was, we believe, pretty general to leave the expedition on the first opportunity. About this time a council of the higher officers was held, in which it was determined that we should immediately proceed to Laguaira, to obtain the requisite commissions and a reinforcement of men; but this resolution was rendered impracticable by the discovery that the vessel was in danger of sinking; the guns were immediately thrown overboard, and the upper masts and spars sent down to ease the vessel; and the same evening, it coming on to blow hard, she was so damaged, and made so much water, that the master determined to enter the port of Curaçoa, stating that an attempt to enter that of Laguaira in our crippled state would unavoidably subject us to capture, as that place was in a rigid state of blockade. In consequence of the warped and colored representations of some interested person, a totally undeserved stigma has attached to the character of the Americans engaged in the expedition, by the assertion that they wished to fire into an American vessel. This vessel was our consort the Mary, the captain of which, refusing to take on board any of the passengers from the Endracht, (though informed that she was in danger, and had but one boat on board) was compelled by the threats of the troops on board this last vessel, being within half musket shot, to bring to for that purpose; but in this attempt to compel that assistance so inhumanly denied, however warrantable by the law of self-preservation, no American, we affirm, was engaged; and as no organization of the troops had taken place, they could not, had they been so inclined, have prevented it. Some of the passengers in the Mary from Philadelphia had signed, as they informed us, a declaration of independence; but the same was never seen by the subscribers [to this communication,] and the first and only copy of General Ducoudray's proclamation seen by us was on our homeward passage in another vessel, and was the same of which a translation appeared in the public prints. During an alarm occasioned by the appearance of the United States sloop Cyane, which was taken for a Spanish frigate, a bundle said to contain proclamations was brought on deck with intent to throw it overboard; but the Mary, being to windward of us, was first boarded by an officer from that ship, and, stating us to be a vessel in distress under her protection, the Cyane stood upon her course, and the proclamations were again carried below. On our arrival at Curaçoa, a Spanish admiral in that place demanding that an inquiry should be instituted into the nature of the expedition, such an inquiry accordingly took place: and circumstances appearing to justify such a measure, General Ducoudray and Mr. Irvine, who, as we understood, had signed the proclamation as Secretary of State, were arrested. The papers of the Endracht having been discovered at once to be forged Dutch papers, she had been already confiscated; but the master of the Endracht having succeeded in proving (as he himself informed the subscribers, who have since seen him in this city,) the cargo of that vessel to be American property, shipped at New York and Philadelphia, it was given up, as was the brig Mary and cargo, which had also been libelled; nothing having occurred in the proceedings of the court (before the departure of the Mary) to show her connexion with the expedition. The subscribers know little further of the proceedings of this court (which was still in session when they came away) than that, to our very great surprise, we heard that General Ducoudray and Mr. Irvine had there asserted that they had the sanction of the United States in preparing such an expedition; in relation to which, we can only say that such a thing had never been mentioned to us; but only that they had the authority of Don Manuel Torres, the Colombian agent at Philadelphia, and (he dying before the completion of the scheme) of his successor, Mr. Duane; for which reason we consider the assertion which we have above alluded to as ungrounded, and only intended to answer some private purpose of the general and his secretary.

Extracts from a letter of Mr. Robert M. Harrison to the Secretary of State, dated St. Bartholomew's, 16th September, and received at the Department of State 14th of October, 1822.

"I have the honor to inform you that there is an expedition, consisting of the following vessels, under the American *flag*, now at anchor in the *Five Islands*, for the purpose of going against *Porto Rico*, viz: schooner Andrew Jackson, of and from New York, captain's name unknown—cargo flour, salted provisions, and munitions of war; brig Mary, of and from Philadelphia, Burns, master, laden as above; schooner Selina, Sisters, master, cargo the same as the others; the Dutch hermaphrodite brig Endracht—that is to say, she hoists Dutch colors, but, in reality, has no papers, being a prize to a Colombian cruiser, which came here originally under the American flag: all these vessels are, apparently, under the direction of a Captain William Gould, who pretends that he is under bonds to the amount of $150,000.

"The chief of this expedition is a person of some celebrity, by the name of *Ducoudray de Holstein;* and I am sorry to say some citizens of the United States are engaged in it, not only of *splendid talents*, but who have heretofore held honorable and confidential situations under our Government, and who, I fear, will be forever lost to the country.

"I have been the more particular in detailing this affair to you from the circumstance of its originating in the United States, and its being prosecuted under that flag.

"I regret that none of our vessels of war should be here, as they might inquire into the conduct of the commanders of these vessels."

Mr. Cortland L. Parker, American Consul at Curaçoa, to the Secretary of State, dated

SIR: AMERICAN CONSULATE, CURAÇOA, *September* 27, 1822.*

On the 21st a brig, under the Netherlands flag, and another, under the American, arrived at this place from St. Bartholomew's; the former had on board Mr. Ducoudray Holstein, formerly a general in the Venezuela service, and a number of others, mostly European French, composing his staff as general, on an expedition against the Spanish

*Received at Department of State 8th November, same year.

Government of Porto Rico. On board the Mary, of Philadelphia, were several young men from the United States, mostly citizens, and of considerable respectability, attached to the above expedition. The vessels were brought in against the will of the general and all his foreign passengers, the masters declaring that they would follow no longer in an expedition unwarranted by their country or any other, and without either commission or force equal to the attempt.

The Dutch brig has been seized, and will no doubt be condemned, as her papers are false; the cargo I hope to get released as American property. The American brig has been permitted to unload her cargo, as usual, though under very strict examination.

The most correct information I can give you is in the proclamations enclosed, which I have with difficulty obtained permission to keep: but the most strange part of the affair, and that which proved the unfitness of Ducoudray Holstein to carry on such a plan, is, that he has bulletins ready written, in which he declares the brilliant success of the expedition. There are also letters from Mr. Irvine to Mr. Duane, wherein the success of the attack and landing is described at large.

I think it my duty to state these circumstances to you as soon as possible; and have the honor to be, with the greatest respect, your humble servant,

C. L. PARKER.

To the Hon. JOHN QUINCY ADAMS, *Secretary of State, Washington.*

PROCLAMATION.

[TRANSLATION.]

The General-in-chief of the army of the Republic of Boüqua (formerly Porto Rico) to the inhabitants of Porto Rico.

To arms, Americans, to arms! come and join our standard; your reward will be independence, your reward the name of free and brave Americans.

Our enterprise is easy and brilliant; the Spanish Governor has no other auxiliaries than those of the country, and he confides in your generosity! And what American could be such a traitor to his country, to his family, as to remain in the service of the King, and assist his tyrants to enchain us again?

To arms, companions, to arms! Live our independence, live our liberty! God, justice, reason, our valor, our union, and our sacred rights, call us and will protect us! Look at your families, your parents, your friends; think of their misery, of their slavery; and choose between chains or liberty!

Let the numerous patriots of this land who have called me come immediately to our head-quarters to be rewarded; let the valiant friends of independence unite under our banners; all shall be very well received and employed, according to his taste and his merits. The greatest part of you know me as one of the chiefs of the independence from the year 1811, and know that, as an old soldier, I have distinguished myself in the defence of the fortresses of Bocca Chica, and I am, moreover, married to a young American lady of Santa Fé de Bogota. I promise you liberty, a fixed and firm republic, if you choose to follow my counsels, and assist me, as your own interest requires, with your union, your zeal, and your valor.

That there may be regularity and order, I decree the following:

ARTICLE 1. Every one shall have protection and security of property. The person infringing this shall be punished capitally.

ART. 2. There shall be profound respect for divine worship, the churches, and the ministers of God, under pain of death.

ART. 3. The slaves shall not be set at liberty; otherwise, the country would be ruined, and the greatest disorders would take place.

ART. 4. The general-in-chief shall choose from among men of property, talents, and experience, inhabitants of the country, counsellors of state, who shall labor, conjointly with him, for a wise and solid organization; for laws, the maintenance of justice and of the tribunals; for the establishment of a good administration. These counsellors shall be engaged, later, in forming a project of a constitution and the mode of convoking a Congress.

ART. 5. The etat major shall dispose and organize what relates to the forces by land and sea.

ART. 6. Military men who serve under the royalist flag, European Spaniards, Americans or strangers, shall have superior rank, if they come immediately to our side with their arms; or they shall be rewarded according to their merit.

ART. 7. European Spanish civil officers, physicians, surgeons, and apothecaries, shall all remain in their situations until a new order, and those who conduct themselves well shall be continued.

ART. 8. There shall be appointed in each town one or more commissioners, to appoint freemen of the vicinity as citizens of our republic. Those who shall not conform to that order shall be treated as enemies of our cause. We shall keep a similar register at our head-quarters.

ART. 9. Americans born in the country shall enjoy the greatest advantages; they shall have the right of being employed in the Government, or in the army, according to their merits.

ART. 10. Foreigners, defenders of the country, or very useful with their talents and their industry, justly deserve the name of citizens, and shall enjoy the same rights as the rest.

ART. 11. Town councils shall, without any delay, send us a deputy; other voters shall remain each in his place and employment, to maintain quiet and order. The town councils which shall not conform to this article shall be treated as enemies of the country, and be brought before a military commission.

ART. 12. In each town a city militia shall be organized, which shall serve, till all be quiet, to maintain the public security.

ART. 13. There shall be raised a corps of infantry, and another of cavalry, composed of young citizens, who can equip themselves at their own expense, under the name of *guards of honor.* These guards shall have a brilliant uniform, and shall march with the general-in-chief.

ART. 14. All prisoners of state, whom the Spanish Government has confined for the sake of their political opinions, shall be set at liberty.

ART. 15. In each seaport in our power, all vessels shall be at once laid under embargo. None of them shall sail without leave in writing from the general-in-chief; the captains and their crews who shall assist us shall have the greatest advantages, according to their services and their merit. Those who do not conform to this embargo will expose themselves to all the rigor of the laws. The voters of the town council and the officers of the custom-house shall be responsible for the execution of this article.

ART. 16. Each town, each city, each individual, &c. who shall first rise in favor of independence, and shall send us deputies, or shall join us, shall have great rewards and privileges, according to their merit.

ART. 17. Commerce shall be free; and, to alleviate the public misery, the duties of entry and clearance in our ports shall be reduced to the half of what they were before for all articles of primary necessity.

ART. 18. The prohibition of any article whatever in the time of the King is null, and all may be introduced into our ports.

ART. 19. The beginning of the Government shall be very liberal, and shall protect not only commerce, but agriculture, industry, arts, sciences, public education, and the talents of the citizens.

Nothing shall be neglected that will give to our republic solidity and prosperity. The general-in-chief will receive with gratitude all plans and projects from any person whatsoever which tend to propose an establishment useful to the country; such individuals shall be rewarded.

When every thing shall be well arranged, that the republic be quiet, fixed, and firm, that we have a Congress and a wise constitution, that the three powers be well distinguished, then we shall be able to cry out, with truth, Live the country, live our independence, and perish the disturbers of it!

Given at our head-quarters of ———.

LUIS V. DUCOUDRAY HOLSTEIN.

[TRANSLATION.]

Solemn act of the Declaration of Independence.

The Spanish Government has given us the most forcible proofs of its tyranny, of its bad faith, and of its incapacity to protect and to govern us. The experience of three hundred years has made known to the whole world its passions, its unjust and perverse pretensions.

We have proved our gratitude and love to the Spanish Government with our fortunes and our blood; we have offered, in the beginning of the invasion of Spain by the troops of Napoleon, assistance, and every thing which a friendly nation can offer, without the least interest. Our recompense was the most unjust contempt; and, moreover, by a total abandonment of us to our own defence against the enemies of Spain, the Cortes, the Regency, and the King treated us as rebels, as perverse criminals, and pursued us with an unjust and cruel war, without our having given them any other reason than that of desiring to enjoy the same rights as the European Spaniards.

The Spanish Government has always desired to treat us as subjects, as slaves; it has been deaf to our just and lawful remonstrances; it has never ceased from tyrannizing over us; this Government has now lost our confidence, and is incapable and unworthy to govern us more.

Fully impressed with these truths, we declare solemnly before the Almighty God, before the whole universe, that we are resolved to suffer a similar tyranny no longer. A free, independent, and wise Government will give us happiness, strength, and consistency.

That order, union, activity, and the energy necessary in all the operations of our Government, may predominate, we have decreed as follows:

ARTICLE 1. Our general-in-chief is elected unanimously, and appointed President of the new republic of ——.

ART. 2. The President is the provisional, civil, political, and military chief. He shall direct all the branches of the administration, and of the forces, by sea and land, and shall appoint to all the offices, until the Congress shall be convened.

ART. 3. Our republic shall, from this time, leave off all communication with the Spanish Government.

ART. 4. The President is authorized to appoint a sufficient number of men of property and talents to form a Council of Government. These counsellors shall endeavor with him to consolidate and give activity to the well-being of the country.

ART. 5. A National Congress shall be assembled when the enemy shall be out of the territory of our country, and all shall be quiet and peaceable; then a project of constitution shall be attempted, and the installation of the legislative, judicial, and executive power shall take place.

Given at ———.

[TRANSLATION.]

Instruction of the General-in-chief, Provisional President of the Government of the Republic of ———, to the foreign officers serving in the army, by land and sea, of the said Republic, on the manner of conducting themselves with regard to the American inhabitants of the country.

It gives your chief pain to issue this instruction, although he is convinced of its utility. He hopes that you will make it your study, and follow it exactly.

The principal object of this instruction shall be, *to cause the inhabitants to forget that you are strangers.* It is indispensably necessary that their jealousy and natural hatred of all that bears the name of foreigner be forgotten, and that the reluctance they may feel to seeing you at their head should disappear, and be converted into esteem and admiration of your conduct and your talents. You will soon compel them to cherish you; and, in fine, to regard you as their brothers, their friends, and their superiors; then your chief will be content and satisfied. He has pursued the same course, the same conduct, and that for five years; and from the first year he has caused himself to be loved and to be respected to such a degree, that one word of his has had more effect than all the most rigorous punishments of their own native chiefs; for the officer and the soldier name him only as their father.

It is therefore his experience, it is the result of a very long and constant study of the character of this people, which he here presents to you. In following this instruction most exactly, you will find yourselves happy and content; in neglecting it, you will not only suffer personally from it, but your carelessness, your imprudence, your disobedience, will have an influence upon the well-being of your comrades, and upon that of all the foreigners who surround you. Wo to him, then, who shall wish to deviate from it; I shall immediately know him, and I shall be obliged to punish him rigorously, and to drive him from the midst of our ranks, which he would dishonor as a bad citizen, as a perverse and dangerous man, who obstinately persists in being guided only by his passions, and who would sacrifice the well-being of thousands of his equals upon the altar of a short-lived vanity. I am, as you know, upright, humane, indulgent to trifling faults; but I will be very severe, even inflexible, towards all those who shall give just causes of complaint, by having maltreated, without cause, either by word or deed, any American inhabitant, military or civil. The principles by which I am guided are known and simple—those of being impartial and just. The foreigner shall be treated as the American; the American as the foreigner: merit alone shall distinguish them.

Do you wish to be citizens of this country, and then to enjoy all their rights? Do you wish to aspire to the highest places in the Government, and to be on an equal footing with the native? They come to meet you; they offer you even all imaginable advantages; and do you wish, on your side, to do nothing to deserve these benefits? What is there out of the independent republic of South America which presents you such advantages? Certainly you will be very ungrateful, you will be unworthy of my confidence, if you do not exert all your zeal and your attention to come at it.

Assist me only by your docility, by your confidence, by your zeal, and I promise you that all will be well. I speak to you as a kind father of a family who loves his children; you are dear to me, as are the Americans; merit alone will distinguish you; and I shall know among you neither French, nor Germans, nor English, nor Poles, nor Danes, nor foreigners of any nation; you are in my eyes the children of the country, its defenders, and its citizens, as the natives are, who serve with you our common country. As to myself, personally, I am an American and a foreigner at the same time; for, born in Europe, and without the soil of this republic, as well as you, I am a naturalized American of long standing, as well by my services in the independence, as by my marriage with a young American lady. I will therefore hold the just medium between you and the American. I only ask of you confidence, union, and prudence, and all will be well. It is only by following my counsels, by studying this instruction, which has no tendency but to render you happy, to cause you to be loved and esteemed by the natives, that you will be worthy of being my children, and of filling the places which you now occupy.

As all these places are only provisional, your good or your bad conduct will have the greatest influence on your advancement. He who will take no care of himself will be exposed to be superseded immediately; whilst all those who shall conduct themselves well, who shall be zealous, active, and judicious, will be sure of being preferred. Read, therefore, with much attention, the following articles, and conform yourselves to them; then you will find yourselves well, happy, loved, and esteemed.

Article 1. The character of a native of this country.—This is good, tractable, and susceptible of receiving every impression, good or bad, according to the confidence which he shall have in his commander. His self-love is great; but, properly directed, it will render him susceptible of doing good and noble actions; ill-directed, it will only be productive of misfortune to him, and will drag you along with him. The love of liberty, of the independence of his country, the hatred which he naturally expresses for his oppressors, added to this self-love, will so elevate him, that he will fight with courage and with a greater degree of bravery, as he will have your example before his eyes.

Art. 2. Constantly and carefully avoid saying that you are French, English, Germans, &c. Tell them, on the contrary, that you are citizens of the country, zealous friends of independence, their brethren, their fellow-countrymen, and, when out of the service, their equals.

Art. 3. Above all, study with the greatest care the language of the country; employ all your leisure time in it; I will furnish you with all the elementary books gratis, as well as the necessary masters for attaining this language, as soon as possible.

Art. 4. Never affront any one whatever—your American superior, your American equal, or your inferior. Whoever shall address himself to you with any complaint, no matter what, hear him calmly and with patience. If you do not understand him, send for an interpreter; but immediately render him the strictest justice in the case of complaint: always say something obliging to him, even in refusing his demand. He will be at least satisfied of your good-will; he will communicate it to his comrades, and you will be greatly beloved.

Art. 5. Never be impatient in making your recruits go through the exercise, when they are naturally awkward and ignorant in the principle. Show them with mildness and patience what and how it ought to be done. Praise and encourage those whom you may observe willing to do well. If you ever perceive yourselves the evidence of any of these young people showing a repugnance, or even an ill-will, to do what you shall order, do not show them that you perceive it; do not humiliate him, but begin to excite his self-love; praise him at least a little for what he has executed but very ordinarily; encourage him in making him repeat it; he will finally lose that unwillingness, and will follow and obey you.

Art. 6. Punish only grievous faults; and, as to small ones, pardon them for the first time; exhorting them, however, with mildness, but with firmness, that they take good care of a second; that you should be sorry, but forced to punish them. Then you ought to do it, but coolly, and in a legal manner. You will soon see the good effect of such conduct upon all the spirits of those under you.

Art. 7. Never break your word to them, nor make a promise to them which you do not believe you can keep; for if you break it once, they will no more believe you; you will have lost their confidence. Say, rather, if the demand should seem to you to be well founded, that you will do your utmost to obtain it for them; make actually for them the necessary exertions; you will prove by that to your subordinates that you are in earnest for their welfare. He will soon know it; he will be content and satisfied; even when you have it not in your power to succeed, he will know your wish in it.

Art. 8. Take the greatest care of your troop; enter absolutely into the most minute details upon whatever concerns the comfort of your subordinates, and see that they want nothing. By that, you will be entitled to their gratitude, and to the power of commanding them.

Art. 9. Never mix with the soldiers when off duty, either in public places or any where else. Never drink with, nor descend to treat the soldier as your equal. Too much familiarity is as prejudicial as too much severity. It will sometimes happen that, in camps or in public feasts, some of your soldiers will offer you to drink to the republic or—no matter how; accept it; but immediately cause a bottle or more to be brought, tell them to drink your health, and go away.

Art. 10. When you are under arms at the head of your troop, either in the great manœuvres, or in the detail of exercises, say nothing to your soldiers but what is absolutely necessary; but when you come to go against the enemy, harangue them, and inspire them with courage, with ardor, and with confidence, by your good example. One single action, in which you shall have boldly exposed your person, will be sufficient to gain you their entire confidence. They will respect you and will cherish you; they will soon forget that you are a foreigner.

Art. 11. In conversation with any native, not even in speaking with your comrades, in presence of one of them, carefully avoid criticising their manners, their customs, their dress, &c. They will perhaps laugh with you; they will even frequently be the first to excite you; be always prudent and on your guard, for they will never forget your words; and the more elevated your rank, the more are you watched by them.

Art. 12. Abstain from gaming, and from debauchery of every kind; show, by your good conduct, that you are worthy of my confidence and of command. For gaming and debauchery will ruin your health and your purse; you will render yourself incapable of service, and you will become the butt of contempt.

Art. 13. Constantly endeavor to be brave, but just; even severe, when it shall be necessary; and six months of application and of practice in all that I have said to you will insure me your comfort and that of thousands of our compatriots. If any one of you have any doubts, any scruples, and will come and communicate them to me, I will, with pleasure, see all those who wish to be instructed, and I will endeavor to resolve them.

[TRANSLATION.]

Appeal of the General-in-chief, Provisional President of the Republic of Boüqua, (island of Porto Rico,) to foreigners of all nations, with the exception of European Spaniards.

HEAD-QUARTERS AT MAYAGUEZ, *September*, 1822.

The revolution in this island is accomplished; independence formally proclaimed; and a free Government, republican and wise, offers you employment, protection, security, and comfort.

We, in consequence, invite you to come and settle in our fine country, under a salubrious and benign climate, and we promise as follows:

ARTICLE 1. The right of citizen, that of voting, and that of aspiring to employments, civil and military, of the republic, without regard as to birth or religion, but purely to the morality and talents of the candidate.

ART. 2. To the military, the same right of citizen, punctual pay, and their wants fully provided. They may rely, according to their good conduct, upon certain and prompt advancement.

ART. 3. Those of the military and naval forces having had the misfortune to be wounded in the service of the republic shall be placed in the hotel of invalids, and shall be attended to at the expense of Government.

ART. 4. Physicians, surgeons, and apothecaries of talent, will find employment in our army and in our hospitals.

ART. 5. Cultivators, planters, and those versed in agriculture, will present themselves before the commission of agriculture, who will, according to their means and merit, assign to their hands the means to purchase the most necessary utensils, and instruct them in the way to prosperity.

ART. 6. Manufacturers, desirous to come and establish, will find protection and employment. Those who may have useful establishments to propose will present their plan to the council of state, and, if approved of, their enterprise will be facilitated and protected.

ART. 7. Merchants and traders are invited to establish here. There shall be no article prohibited; commerce will be protected; and the duties will be small.

ART. 8. Artists of every class, men of learning, and persons useful for public instruction, will find employment and protection.

ART. 9. Manufacturers of powder and tobacco, and curriers, armorers, carpenters, coopers, shoemakers, tailors, farriers, mechanics, workmen, and persons of whatsoever useful calling, will be employed and protected.

ART. 10. The present appeal excludes those who are prosecuted for crimes or infamous acts, stock-jobbers, gamesters by profession, persons without calling or trade, those living by unknown means, all adventurers, sharpers, and intriguers of every description having no profession or employment. They will soon be discovered, arrested, and expelled forever from the soil of our republic.

All persons designated in the first nine articles: those first arrived will enjoy greater advantages over those who will arrive later.

We invite the friends of our cause, the journalists and merchants, reading the present appeal, to assist us in propagating the same, by having it inserted in their papers, in the language of their country.

The main object of this proclamation is to endeavor to ameliorate the unhappy condition of thousands of foreigners, passing a miserable life, unmerited, and beneath their intellectual faculties.

They will endeavor to place each according to his merit, his conduct, his experience, and abilities, and will offer to all equality of rights, asylum, protection, and comfort.

The President General-in-chief:

LUIS VILLAUME DUCOUDRAY.

Secretary of State, pro tem.:

B. IRVINE.

[TRANSLATION.]

The General-in-chief of the republican army of Boüqua, (island of Porto Rico,) to the foreigners established in that island.

SIR: HEAD-QUARTERS AT ———.

Called by a considerable number of the inhabitants of your country, I come at the head of a corps armed to proclaim their liberty and independence.

This revolution is in your favor; by it, you will obtain the right of a citizen, and admission to civil and military situations, as the tenth article of the annexed proclamation proves.

The advantages to your families, and to so many thousands of our fellow-countrymen, are immense and incalculable. Come, then, without fear, to rally around me, to assist me in consolidating our work.

Those who shall prove their zeal and their devotion to our cause, and who shall present themselves first at our head-quarters, shall enjoy the greatest advantages, which shall surpass even their expectations. I shall know, in a few days, those who shall not have presented themselves there. All those who know me know that my word is sacred, and that my views tend towards the happiness of a wise, solid, and flourishing republic.

I have the honor to salute you.

L. V. DUCOUDRAY.

P. S.—I request you immediately to communicate this letter to your friends and acquaintances, and to rally them around us.

To the Foreigners of the island of Porto Rico.

Obligation of the sum of , pledged upon the national property of the republic of . In months from this date the treasurer of the republic will pay or his order the said sum of .

THE GENERAL-IN-CHIEF.

Registered by the intendant.

Extract of a letter from Mr. Cortland L. Parker, American Consul at Curaçoa, to the Secretary of State, dated

CONSULATE OF THE UNITED STATES, CURAÇOA, *October* 18, 1822.*

"Annexed is my letter of the 27th ultimo; since which, the crews and passengers of the American and Netherlands brigs therein mentioned have been under examination; and, from what I have been able to learn, it appears that this expedition was to have been the forerunner of others against the West India islands of every Power in Europe; and some very strong expressions to that effect, in a letter from Mr. B. Irvine, have been the cause of his being placed in close confinement. The brig Mary is cleared, and I have succeeded in obtaining passports for thirteen young Americans, who have been shamefully deceived into an expedition which could bring on them nothing but disgrace and destruction."

R. W. Meade to the Secretary of State, dated

SIR: PHILADELPHIA, *December* 17, 1822.

Observing in the National Gazette of last evening a communication extracted from a paper called "The Statesman," purporting to be a correct statement of the late Porto Rico expedition, in which it is attempted to prove, (on mere assertion, however,) that the said expedition was undertaken and fitted out with the knowledge and co-operation of the late Don Manuel Torres, chargé d'affaires of the Colombian republic; and conceiving such a report to be a libel on the character of my late and much lamented friend, and on the Government he represented, I conceive it a duty I owe both to them and to myself, as the executor, friend, and only agent of that Government legally authorized to receive and open its correspondence, and of course encharged with its affairs *ad interim*, to declare the same totally unfounded, and, in fact, a fabrication for some sinister purpose. How far the authors of the expedition may have made use of Mr. Torres's name to seduce the deluded men who joined them, is what I am ignorant of; but can easily conceive that men who could undertake such a scheme would not hesitate at the use of any deception or means to accomplish their ends.

My knowledge of Mr. Torres's character is of long standing; my personal acquaintance with him dates since my return to this city in August, 1820; since when Mr. Torres had no secrets concealed from me. For many months previous to his death I saw him daily; and, when absent, which happened during his and my visit for a few weeks to Washington, we were in constant correspondence; and at his decease, Colonel Duane and myself were left encharged by him with all his public business; and since the departure of Colonel Duane from this country, I have remained solely encharged with the affairs and correspondence of that Government; and I do solemnly declare that there is not the smallest ground for believing that Mr. Torres was ever acquainted with the expedition, much less that he had ever given it his countenance. In the whole of his correspondence with his Government and its agents, actually in my possession, not one word or hint of the most remote kind is made of such a scheme; and, in fact, to any man of common sense acquainted with the character, prudence, and delicacy of conduct of Mr. Torres, it must be apparent that he never could have countenanced such a perfectly mad scheme.

For many months prior to the declaration by this Government of the independence of the Spanish Americas, a set of adventurers existed in this country, holding their rendezvous in this city, Baltimore, and New York, watching their opportunity to undertake any adventure which could furnish them the means of living at the expense of their neighbors. Many of them were foreigners of desperate fortune, who, in their imaginations, fancied any project lawful which should put them in possession of the means of seizing on a portion of the Spanish colonies, under the pretence of establishing independent Governments, but, in fact, with no other view but that of enriching themselves. The declaration of the independence of these countries by this Government at once destroyed all their hopes and expectations, and nothing but some desperate measure was now left them. Many of them made application to Colonel Cortes for employment under the Mexican Government; and I recollect one anecdote which he mentioned to me, of two of the principal chiefs of the band in this city, which so strongly marks the character of the men as to be worthy of being mentioned. Some time after he had in the most positive terms informed them that they would not be employed in Mexico, a paragraph appeared in one of our papers containing some details of troubles and a probability of intestine commotion in Mexico; they waited on him again to tender their services, stating their having heard of these reports, and that they now thought their services might be required. The colonel answered them that he neither knew of nor believed any such reports; that it might possibly be that there did exist a difference of opinion among some of the persons in Mexico as to the form of government to be adopted, but that that was a question to be settled by themselves; at all events, they did not require strangers to settle the point for them. Colonel Cortes, however, added: But, gentlemen, since you have heard of these parties, pray to which do you wish to attach yourselves, or offer your services to? The answer was: Oh! to either of them; the strongest, of course, if we could ascertain it; our object is to get employ. I never spoke directly or indirectly with any one of the persons concerned in this expedition, except to two young men who, I lately learned, had gone with it, and who had applied to me to endeavor to get them employment in the Mexican service. Baptist Irvine, to whom I had been introduced at Washington, came to this city for the express purpose, as he informed me, of procuring Spanish authors on the Americas, in order to complete a work which he had announced as being about to publish on those countries. He waited on me on his arrival; and, believing his object a praiseworthy one, I permitted him the use of my library, from whence he took a number of valuable books. During his stay here, I saw him, I believe, thrice. He returned my books by a servant, with a note; and the first and only information I had of the desperate step he had adopted I received from his signature to the proclamation published in our papers. I have reason to believe that pecuniary distress alone drove him to the extremity of joining these adventurers.

About the period of Mr. Torres's death, which happened on the 14th June, I was informed by a gentleman of this city that a sum of money, said to be $18,000, had been remitted by sundry persons residing in Porto Rico

* Received at the Department of State 8th November, same year.

to assist in revolutionizing that island; and I have reason to believe that with that money vessels were chartered as merchant vessels to take out these adventurers to some one of the neighboring islands, from whence other arrangements were, in all probability, intended to be made for fitting out the expedition. I have also heard that, long prior to the vessels sailing from the United States, disagreements had taken place among the persons engaged in the scheme, as to the respective offices or employments claimed by each in the island, already, in their fertile imaginations, in their possession; and that one or two, dissatisfied with their nominations, had actually proceeded to Boston, where Mr. Anduaga, the Spanish minister, then was, and laid before him a circumstantial account of the expedition, and every thing and person connected with it. I, therefore, did not consider it my duty, either as executor of Mr. Torres, or as a citizen of the United States, to take any notice of the affair; nor should I at this moment trespass on your more important vocations, did I not think it necessary, in the absence of any other representative of the Colombian republic in this country, to disavow any countenance having been directly or indirectly afforded to it by Mr. Torres. What promises may have been held out or made by any of the commanders of the private armed vessels of Colombia in this port, I am ignorant of, but have no reason to suppose that any of them had any hand in this business. I feel pretty confident that the only officer of the Colombian Government with whom I had been made personally acquainted, on account of the decease of Mr. Torres—Commodore Daniels—had no share in it, as his objects in the service of that country, at that period, were of a much more important nature.

I have the honor to remain, sir, your obedient servant,

R. W. MEADE.

To the Hon. JOHN QUINCY ADAMS, *Secretary of State, Washington.*

SIR: TREASURY DEPARTMENT, *December* 30, 1822.

The Secretary of the Treasury, to whom was referred the resolution of the House of Representatives of the 12th instant, requesting of the President such information as he may possess concerning a hostile expedition alleged to have been fitted out in the ports of the United States against the island of Porto Rico, has the honor to report: That the records and files of this Department, at the time of the said reference, furnished no evidence that any such expedition had been fitted out in the said ports. Since that date, the collectors of the districts of Philadelphia and New York have been required to furnish any information in their possession relative to the said expedition. Copies of their answers to the requisition are herewith communicated; from which it appears that no ground of suspicion existed, at the time the vessels alleged to have composed a part of the expedition cleared out, that any violation of the laws was contemplated by the owners or commanders of those vessels.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

JAMES MONROE, *President of the United States.*

SIR: COLLECTOR'S OFFICE, PORT OF PHILADELPHIA, *December* 23, 1822.

Immediately after the receipt of your letter of the 21st instant, the records of this office were examined for the purpose of ascertaining when the brig Mary Ann, Burns, master, and the schooner Selina, Sisters, master, cleared from this port. It appears that the brig Mary, (not Mary Ann,) Aaron Burns, master, cleared hence for Aux Cayes on the 5th day of August last, with a cargo consisting of navy bread, pilot bread, flour, beef, pork, rum, powder, drums, muskets, pistols, swords, cartridge-boxes, saddles, and lead bullets.

No evidence or information whatever was received at this office, either before the departure of the brig, or subsequent thereto, (except what is communicated in your letter,) of her being unlawfully equipped, or engaged in any enterprise prohibited by the laws of the United States.

It does not appear by the books of this office that the schooner Selina cleared from this port for a foreign port during the present year.

Very respectfully, I am, sir, your obedient servant,

JNO. STEELE.

WM. H. CRAWFORD, Esq., *Secretary of the Treasury.*

SIR: CUSTOM-HOUSE, NEW YORK, COLLECTOR'S OFFICE, *December* 24, 1822.

I have received your letter of the 21st instant, relative to the schooner Andrew Jackson, Sanderson, master, which vessel cleared from this office on the 10th day of August last for St. Bartholomew's and St. Thomas's. A copy of her outward manifest is herewith transmitted, by which it will be perceived that the cargo was not of a suspicious character. Neither has there any thing subsequently occurred, to my knowledge, to create suspicion in relation to this vessel. Should any information hereafter occur, I will immediately communicate it.

I have the honor to be your obedient servant,

JONATHAN THOMPSON, *Collector.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

Report and manifest of the cargo laden at the port of New York on board the American schooner Andrew Jackson, Sanderson, master, bound for St. Bartholomew's and St. Thomas's.

Marks and numbers.	Packages and contents.	Value at the port of exportation.
H.	93 barrels beef,	$476 63

SAM'L SANDERSON.

17th Congress.] No. 541. [2d Session.

PRESERVATION OF THE MODELS IN THE PATENT OFFICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1823.

Mr. Wood, from the Committee on the Expenditures of the Department of State, to whom was referred the letter of the Secretary of December 3d, 1822, accompanied by one addressed to him by the Superintendent of the Patent Office, reported:

That they have examined the subject referred to them, and find that such was the decayed or injured condition of many of the models in the Patent Office, that, during the summer past, it was deemed a duty by the Department to employ an artist to repair such as were in the greatest state of dilapidation; that the said artist has been employed since the 23d day of August last, at a compensation of two dollars per day; that many of the models are very complicated and of delicate structure, and, by the frequent handling of the numerous persons who visit the office, are very liable to be injured, and that many of them are already so much injured as to require repairs for their preservation from entire destruction; that the Department has suggested the propriety of making provision for the permanent employment of an artist, for the purpose of repairing them, and keeping them in a constant state of preservation.

The committee have been furnished with a statement from the Patent Office, from which it appears that, since the institution of the office, about three thousand five hundred patents have been issued, and that about one thousand eight hundred models of machines have been deposited in the Patent Office.

It is evident from this statement that more than one-half of the patents that have been issued under the patent act have been for mechanical inventions; and it appears from the statement accompanying this report, as well as from inspection, that a large proportion of them are calculated to facilitate the labors of agriculture, manufactures, and navigation.

Inventions of this kind involve new combinations of the mechanic powers; and their utility consists in their subjecting these powers to a more efficient operation in their application to practical uses. Every improvement in mechanical operations serves as a guide to new combinations and different applications, and leads to further inventions: such inventions deserve every encouragement in a country where it is an object to cheapen labor. It is supposed by competent judges that the single machine for cleaning cotton has saved to the United States more than half a million of dollars, in superseding the necessity of manual labor.

The object in establishing the Patent Office was, the preservation of the models of the inventions which may be deemed of sufficient importance to merit preservation. It is the object of the model, no less than the specification, to secure to the patentee the exclusive enjoyment of his invention during the continuance of his patent; to guard others from interfering with his rights; and to enable the public to enjoy the benefit of the invention after the monopoly shall have expired. It is of some importance in this case, also, to observe that, in many instances, the model is the test of the nature and extent of the invention, and forms the rule by which subsequent improvements are ascertained and secured to the inventors; for, although the specification, or a certified copy of it, is the legal evidence of the invention, yet many machines are so complicated that no one but a skilful artist can comprehend their construction or mode of operation without the inspection of a model; and in all cases of dispute respecting the extent of improvements in the principles of original machines of any complexity, it is impossible for a court or jury to judge correctly without a model exhibiting the improvements.

If it be deemed desirable to preserve the models of inventions for these purposes, it seems absolutely necessary that they should be preserved entire.

The committee will further observe, that the Patent Office is supported by the fees paid by the patentees, and that the receipts of the office since its establishment exceed the expenditures by a very considerable amount.

Your committee are therefore of opinion that an artist should be permanently employed, for the purpose of repairing, and keeping in constant preservation, the models in the Patent Office; and that a clause should be added to some proper bill, making an appropriation for that purpose.

All which is respectfully submitted.

List of models in the Patent Office, January 21, 1823.

For propelling boats,	38	For steam mills,	14
Carding machines,	8	Nail-cutting machines,	95
Making carriage-wheels,	4	Machine for making barrels, &c.	1

SIR: TREASURY DEPARTMENT, REGISTER'S OFFICE, *January* 29, 1823.

In compliance with the request contained in your letter of the 23d instant, which I had the honor to receive, I beg leave to transmit, herewith, a statement of the annual receipts and expenditures of the Patent Office, from its establishment to the 31st December, 1821, so far as the records of this office have enabled me.

The vouchers for the contingent expenses of the Department of State, with which those of the Patent Office are blended, are at this time in that Department, for the purpose of forming a statement, under a recent resolution of the House of Representatives, of books, &c. purchased since the year 1817. The contingent expenses of the Patent Office, however, taking the average of 1814, 1815, and 1816, may be estimated at $600 per annum.

I am, sir, with great respect, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. SILAS WOOD.

Statement of the annual receipts and expenditures of the Patent Office to 31st December, 1821.

Years.	Receipts.	EXPENDITURES. Salaries of superintendent, clerks, and messengers.	Contingent expenses.
1793	$660	It does not appear that any payments were made during these years.	
1794	570		
1795	600		
1796	1,380		
1797	1,470		
1798	870		
1799	1,260		
1800	1,230		
1801	1,410		
1802	142		The vouchers for the contingent expenses were burnt by the British in 1814.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 20, 1823.

SIR: TREASURY DEPARTMENT, *February* 19, 1823.

In obedience to a resolution of the House of Representatives, instructing the Secretary of the Treasury "to communicate to Congress the amount of money appropriated for the road from Cumberland to Ohio, designating what proportion of the same was expended on the surveying and location, construction, and repairs of the road; also, what part of it was paid to superintendents and their assistants, for miscellaneous and contingent purposes; and whether any part thereof is yet unaccounted for, remains due upon settlement, and has been carried to the surplus fund:" I have the honor to submit the enclosed letter and statement from the Register of the Treasury.

I have the honor to be your most obedient servant,

WM. H. CRAWFORD.

Hon. P. P. BARBOUR, *Speaker of the House of Representatives.*

SIR: TREASURY DEPARTMENT, REGISTER'S OFFICE, *February* 19, 1823.

In compliance with the within resolution, I have the honor to transmit a statement exhibiting the amount of money appropriated for the road from Cumberland to Ohio, designating what proportion was expended in the surveying and location, construction, and repairs of the road; also, what part of it was paid to superintendents and their assistants for miscellaneous and contingent purposes, and what part thereof is yet unaccounted for, remains due upon settlement, and has been carried to the surplus fund.

I have the honor to be, respectfully, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

Statement of the expenditures for the road from Cumberland to Ohio.

Amount appropriated.	Surveying and locating.	Constructing.	Repairs.	Salaries to superintendents and assistants.	Miscellaneous and contingent.	Total amount accounted for.
$1,718,846 35	$29,144 25	$1,544,882 70	$16,160 19*	$53,034 61	$2,457 45	$1,645,679 20

Amount accounted for, brought down,	$1,645,679 20
To which add—	
Amount carried to the surplus fund,	66,810 63
Advances unaccounted for,	5,314 85
Due the United States on settlement,	1,041 67
Total appropriated,	$1,718,846 35

NOTE.—On the last settlement of David Shriver's account, there appears against him a balance of $22,013 07, for which he will be ultimately entitled to credit when the accounts of the individuals to whom it was paid (by said Shriver) shall be settled, or transferred to the books of the Treasury. This amount is included in the above statement of expenditures for the objects for which it was advanced.

TREASURY DEPARTMENT, REGISTER'S OFFICE, *February* 19, 1823.

JOSEPH NOURSE, *Register.*

17th Congress.] No. 543. [2d Session.

REORGANIZATION OF THE COURTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1823.

Mr. PLUMER, of New Hampshire, made the following report:

The Committee on the Judiciary, who were instructed by the House to inquire "whether any, and, if any, what alterations are necessary to be made in the organization of the courts of the United States, so as more equally to extend their advantages to the several States," and to whom was also referred the memorial of the State of Indiana upon the same subject, have had the same under consideration, and ask leave to report:

The number of new States admitted into the Union since the federal judiciary was first established, and the natural increase of business both in the old and new States, render, in the opinion of the committee, some change, at no very distant period, in the organization of the courts of the United States, highly expedient, if not essential to the due execution of the laws.

* The charges for repairs are so blended with the expenses of constructing, that it is difficult to discriminate the actual expenditure under this head; the above is the only charge which appears exclusively for repairs.

The judiciary system of the United States, as originally established, consisted of one supreme court, six circuit courts, and thirteen district courts. The district court was held by one judge in each district; the circuit court was formed by the union of the district judge with one or more of the judges of the supreme court; and the supreme court itself was composed of a chief justice and five associate judges. The number of the district courts has since been increased to twenty-seven, by the admission of new States into the Union, or the division of the old ones into separate districts; there being two district courts in New York, two in Pennsylvania, two in Virginia, and one in each of the other States. By an act of Congress, passed February 13, 1801, the United States were divided into six circuits, with a circuit court in each, consisting of three judges, who were to hold two terms a year in each district, and were invested with the same general powers and jurisdiction as the former circuit courts possessed. By the same act, the sessions of the supreme court were, in future, to be holden twice a year, at the city of Washington; the judges were no longer required to sit in the circuit courts; and their number, on the death or resignation of the judges then on the bench, was to be reduced to five. On the 8th of March, 1802, this act was repealed, and the former system was restored. On the 24th of February, 1807, a new circuit was formed in the western country, embracing the States of Kentucky, Tennessee, and Ohio; and the number of the judges of the supreme court was increased to seven. Since that time, six new States have been admitted into the Union from the West alone; and one has been created in the East, by the separation of Maine from Massachusetts. From the extent of the country, the number of the States, and the increasing mass of business constantly depending in the circuit courts, it was obviously impossible for seven judges to hold two courts annually in each of the twenty-seven judicial districts, into which the United States (exclusive of the Territories) are now divided. The judges of the supreme court have not, therefore, been required by law to go into the new western States; and there are, accordingly, no circuit courts holden in Louisiana, Indiana, Mississippi, Illinois, Alabama, and Missouri, nor in the Territories of Michigan, Arkansas, and Florida. In each of these States and Territories, the district court is vested with, and exercises, the jurisdiction of a circuit court of the United States.

The preceding statement may be considered as presenting a hasty outline of the principal features of the federal judiciary, with the most important changes it has successively undergone, but without pretending to notice its minuter variations.

It is understood by the committee that those States which, under the present arrangements, are deprived of the benefits of a circuit court, are desirous, for reasons not deemed necessary here to be enumerated, that such alterations should be made in the existing system as would extend to them the advantages enjoyed by the States where such courts exist. This desire of the new States to be placed upon a footing of equality with the old, in respect to their judicial establishments, so far as these depend upon the United States, appears to the committee just and reasonable. Nor are there wanting obvious reasons of interest and of policy, operating equally upon the Government and the people, in all parts of the Union, in favor of placing the courts of the United States, wherever they exist, upon the most respectable footing; and of giving them, in every section of the country, in the West as well as in the East, the form and the facilities which may, in each case, enable them best to answer the important objects of their original institution. For this purpose, three different plans have occurred to the committee as among the means most likely to effect this desirable object:

1. To increase the number of circuits to nine, and add two more judges to the supreme court.

2. To establish circuit courts throughout the United States, upon a plan similar to that adopted in 1801, but with such modifications as may be found expedient; and to provide for the eventual reduction of the number of judges of the supreme court to five.

3. To establish two circuit courts in the western States, with the same general powers and jurisdiction as are now possessed by the circuit courts of the United States, to which (as in other circuits) an appeal should lie from the district courts, and thence, under the ordinary limitations, to the supreme court.

Each of these plans possesses some advantages over the others, and is, at the same time, liable to some objections.

1st. In the final decision of judicial questions, a small number of judges, qualified for their station as those of the United States will, we may hope, always be, are likely to prosecute their legal inquiries more thoroughly, come to more correct conclusions, and act with greater impartiality, uniformity, and despatch, than a numerous, and consequently discordant, body can be presumed always to do. In this respect, it is believed that the number of the judges of the supreme court, as now constituted, is sufficiently large (if, indeed, it be not already too great) for the convenient despatch of the important business which comes yearly before it.

2d. With respect to the second proposition, it may be remarked, that a similar system having been once adopted, and subsequently abandoned, its re-enactment would probably be opposed, at least till other expedients, promising more favorable results, shall have been first tried.

3d. The institution of two new circuits in the western States, with one judge in each, who, sitting successively with the district judges in their several districts, should form the circuit court for those districts, would, it is believed, obviate many of the inconveniences arising from the present organization of the courts in that part of the Union; and the same arrangement, if found, on trial, to answer the purposes designed by it, might, as circumstances required, be extended to other sections of the country, and thus lead, finally, to the adoption of one uniform system of circuit courts throughout the United States. For the purposes of the present experiment, Indiana, Illinois, and Missouri might be conveniently formed into one circuit; and Louisiana, Mississippi, and Alabama into another.

Without going at all into the details of these several plans, or even expressing any decided opinion in favor of either of them, the committee, in obedience to the commands of the House to report on this subject, have thought proper to present it, at this time, in its present form, not with a view to the adoption, at this session, of any decisive measures in relation to a department of the Government so important as that of the judiciary, but in hopes that the subject may attract the attention of the country generally, and of those parts of it, in particular, which are more immediately concerned in its investigation; and that the next Congress may be prepared, at an early period, to decide whether any, and, if any, what changes are necessary in the organization of the courts of the United States, to enable them more effectually to attain the objects for which they were originally instituted.

The memorial from the Legislature of Indiana requests either that Congress would organize a new circuit, of which that State should form a part; or that she may be attached to the western circuit, consisting, at present, of Ohio, Kentucky, and Tennessee. The first of these requests would be substantially complied with by the adoption of either of the above plans suggested by the committee. The other alternative presented by the Legislature of Indiana is attended with some difficulty. There is, at present, but one judge of the supreme court in the western States; and it is understood by the committee that the terms which he is now by law required to hold, together with his attendance, annually, at the seat of Government, as a member of the supreme court, occupy his time and attention so exclusively, as to render it improper that any additional duties should be imposed upon him.

The committee, therefore, ask to be discharged from the further consideration of the resolution and memorial referred to them by the House.
